Appendix 1 – Remuneration Disclosures (Unaudited)

The Management Company is a subsidiary of DWS Group GmbH & Co. KGaA (“DWS KGaA”), and is subject to the regulatory requirements of the Fifth Directive on Undertakings for Collective Investment in Transferable Securities ("UCITS V Directive") as well as the European Securities and Markets Authority's Guidelines on Sound Remuneration Policies ("ESMA Guidelines") with regard to the design of its remuneration system.

Remuneration Policy & Governance

The Management Company is governed by the Group-wide Compensation Policy that DWS KGaA has adopted for itself and all of its subsidiaries ("DWS Group" or only "Group").

In line with the Group structure, committees have been set up to ensure the appropriateness of the compensation system and compliance with regulatory requirements on compensation and are responsible for reviewing it.

As such the DWS Compensation Committee was tasked by the DWS KGaA Executive Board with developing and designing sustainable compensation principles, making recommendations on overall compensation and ensuring appropriate governance and oversight with regard to compensation and benefits for the Group.

Furthermore, the Remuneration Committee was established to support the Supervisory Board of DWS KGaA in monitoring the appropriate structure of the remuneration systems for all Group employees. This is done by testing the consistency of the remuneration strategy with the business and risk strategy and taking into account the effects of the remuneration system on the group-wide risk, capital and liquidity management.

The internal annual review at DWS Group level concluded the design of the remuneration system to be appropriate and no significant irregularities were recognised.

Compensation Structure

Employee compensation consists of fixed and variable compensation.

Fixed compensation remunerates employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role.

Variable compensation takes into account performance at group, divisional and individual level. Variable compensation generally consists of two elements – the “Franchise Component” and the “Individual Component”.

The Franchise Component is determined based upon the performance of three Key Performance Indicators (“KPIs”) at DWS Group level. For the performance year 2025 these were: Adjusted Cost Income Ratio, long-term Net Flows and ESG metrics.

The individual component of variable compensation takes into account a number of financial and non-financial factors, relativities within the peer group, and retention considerations. Variable compensation can be reduced accordingly or cancelled completely in the event of negative performance contributions or misconduct. In principle, it is only granted and paid out if the granting is affordable for the Group. Guaranteed variable compensation is not normally granted to employees. On an exceptional basis, guaranteed variable compensation can be granted to new hires but only during their first year of employment.

The compensation strategy is designed to achieve an appropriate balance between fixed and variable compensation. This helps to align employee compensation with the interests of customers, investors and shareholders, as well as to industry standards. At the same time, it ensures that fixed compensation represents a sufficiently high proportion of total compensation to allow the Group full flexibility in granting variable compensation.

Determination of Variable Compensation and Appropriate Risk-Adjustment

The total amount of variable compensation is subject to appropriate risk-adjustment measures which include ex-ante and ex-post risk adjustments. The robust methodology is designed to ensure that the determination of variable compensation reflects Group’s risk-adjusted performance as well as the capital and liquidity position.

Appendix 1 – Remuneration Disclosures (Unaudited) cont/d

Determination of Variable Compensation and Appropriate Risk-Adjustment cont/d

A number of considerations are used in assessing the performance of the business units. Performance is assessed in the context of financial and non-financial targets based on balanced scorecards. The allocation of variable compensation to the infrastructure areas and in particular to the control functions depends on the overall results of the Group, but not on the results of the business areas they oversee.

Principles for determining variable compensation apply at individual employee level which detail the factors and metrics that must be taken into account when making individual variable compensation decisions. These include, for instance, investment performance, client retention, culture considerations, and objective setting and performance assessment based on the "Total Performance" approach. Furthermore, any control function inputs and disciplinary sanctions and their impact on the variable compensation have to be considered as well.

Sustainable Compensation

Sustainability and sustainability risks are an essential part that determine the variable compensation. Therefore, the remuneration policy is fully in line and consistent with sustainability risks. Hence, DWS Group incentivises behaviour that benefits both interest of clients and the long-term performance of the firm. Relevant sustainability factors are reviewed on a regular basis and incorporated in the design of the compensation system.

Compensation for 2025

The DWS Compensation Committee has monitored the affordability of variable compensation for 2025 and determined that the Group's capital and liquidity levels remain above regulatory minimum requirements, and internal risk appetite threshold.

As part of the overall 2025 variable compensation granted in March 2026, the Franchise Component is awarded to eligible employees in line with the assessment of the defined KPIs. The Executive Board recognising the considerable contribution of employees and determined a target achievement rate of 100.00% for 2025.

Identification of Material Risk Takers

In accordance with the Law as of 17 December 2010 on Undertakings for Collective Investments (as subsequently amended) in conjunction with the ESMA Guidelines, the Management Company has identified Material Risk Takers. The identification process was carried out in accordance with the Group's policies and is based on an assessment of the impact of the following categories of staff on the risk profile of the Management Company or on a fund it manages: (a) Board Members/Senior Management, (b) Portfolio/Investment Managers, (c) Control Functions, (d) Staff heading Administration, Marketing and Human Resources, (e) other individuals ("Risk Takers") in a significant position of influence, (f) other employees in the same remuneration bracket as other Risk Takers, whose roles have an impact on the risk profile of the Management Company or the Group. At least 40% of the variable compensation for Material Risk Takers is deferred. Additionally, at least 50% of both, the upfront and the deferred proportion, are granted in the Group share-based instruments or fund-linked instruments for Key Investment Professionals. All deferred components are subject to a number of performance conditions and forfeiture provisions which ensure an appropriate ex-post risk adjustment. In case the variable compensation is lower than EUR 50,000, the Material Risk Takers receive their entire variable compensation in cash without any deferral.

Appendix 1 – Remuneration Disclosures (Unaudited) cont/d

Aggregate Compensation Information for the Management Company for 2025[1]

Number of employees on an annual average	116
Total Compensation[2]	EUR 18,151,675
Fixed Pay	EUR 14,627,423
Variable Compensation	EUR 3,524,252
Thereof: Carried Interest	EUR -
Total Compensation for Senior Management[3]	EUR 1,658,571
Total Compensation for other Material Risk Takers[4]	EUR -
Total Compensation for Control Function employees	EUR 2,587,454

[1] In cases where portfolio or risk management activities have been delegated by the Management Company, the compensation data for delegates are not included in the table.

[2] Considering various elements of remuneration as defined in the ESMA Guidelines which may include monetary payments or benefits (such as cash, shares, options, pension contributions) or none (directly) monetary benefits (such as fringe benefits or special allowances for car, mobile phone, etc.).

[3] Senior Management refers to the members of the Management Board of the Management Company, only. Members of the Management Board meet the definition of Managers. Apart from the members of Senior Management, no further managers have been identified.

[4] Identified Risk Takers with control functions are shown in the line "Control Function employees".

Appendix 2 - Sustainable Finance Disclosure Regulation (Unaudited)

Any Funds not disclosed on the following pages are Article 6 financial products and the investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MDAX ESG Screened UCITS ETF

Legal entity identifier: 549300UH1JXLUG5LCG03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.39 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MDAX ESG Screened Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MDAX Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Assigned an Institutional Shareholder Services Inc ("ISS ESG") ESG Rating of D– or below;
• Identified as ‘Red’ by ISS ESG in their Norms Based Screening. ISS ESG’s Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines; and/or
• Identified by ISS ESG as having any involvement in controversial weapons; and/or
• Identified by ISS ESG as breaching certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, military equipment, coal expansion, oil fuels, gaseous fuels, and power generation.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 (“PAB Exclusions”).

The Reference Index also excluded companies which have missing ESG data.

The Reference Index utilised ESG data provided by ISS ESG. ISS ESG provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, human rights, labour standards, corruption and controversial weapons.

How did the sustainability indicators perform?

Xtrackers MDAX ESG Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)

…and compared to previous periods?

Xtrackers MDAX ESG Screened UCITS ETF

Exposure to Worst-in-Class Issuers	0.00	3.14	8.36	Market weight (%)
Controversial Weapons Involvement	0.00	3.14	6.16	Market weight (%)
Tobacco involvement	0.00	3.14	6.16	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 29.39% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

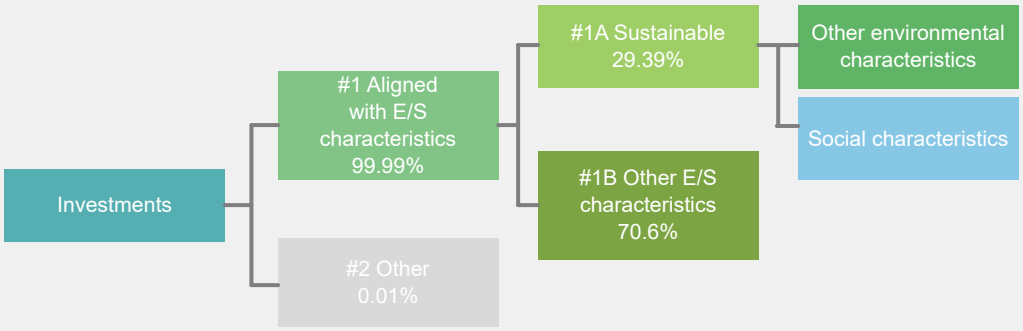
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.99% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 29.39% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.01% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MDAX ESG Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	18.4 %
D	Electricity, gas, steam and air conditioning supply	2.7 %

Exposure to companies active in the fossil fuel sector*		**5.4%**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

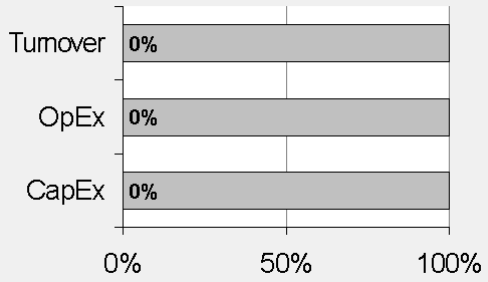
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

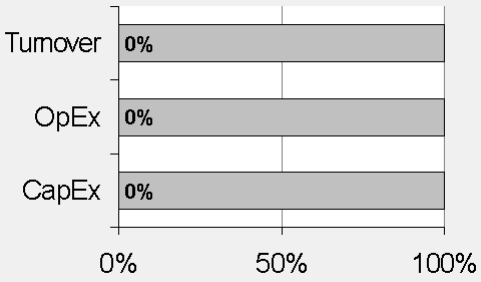
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.39% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.39% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a substantial number of, the constituents of the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MDAX ESG Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of medium–capitalisation segment of companies traded on the Frankfurt Stock Exchange which follow large–capitalisation companies included in the DAX® index with regard to market capitalisation or companies that are not eligible for inclusion in the DAX® index because they don't fulfil the DAX® profitability requirements. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Assigned an ISS ESG Rating of D– or below;
• Identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines;
• Identified by ISS ESG as having any involvement in controversial weapons; and/or
• Identified by ISS ESG as breaching certain revenue thresholds in business activities, including, but not limited to, tobacco, thermal coal mining, oil sands, nuclear power, civilian firearms, military equipment, coal expansion, oil fuels, gaseous fuels, and power generation.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index also excludes companies which have missing ESG data.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI AC World Screened UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.29 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI Select Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index, or unrelated transferable securities or other eligible assets. The Reference Index selected companies from the MSCI AC World Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil

• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

How did the sustainability indicators perform?

Xtrackers MSCI AC World Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.08 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.08 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.08 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.02 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 24.29% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

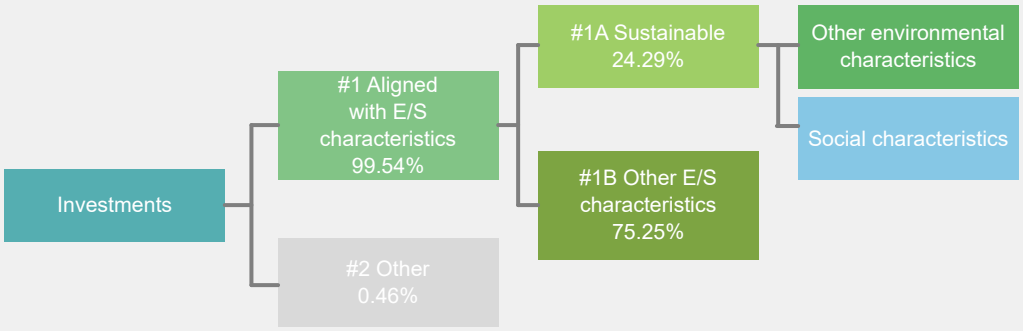
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.54% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 24.29% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.46% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

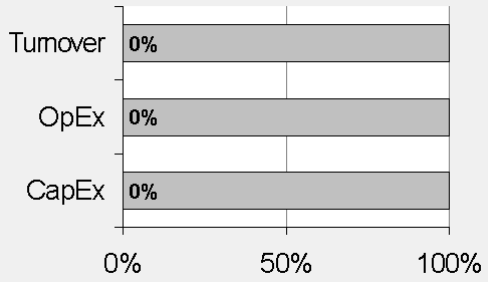
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

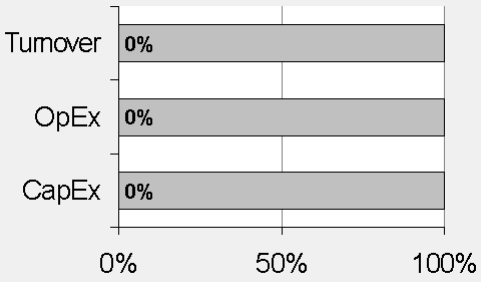
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.29% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.29% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index. Any unrelated transferable securities held by the financial product were similar to the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI Select Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed and emerging market countries. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI USA Screened UCITS ETF

Legal entity identifier: 5493001R2VWIV9D4XH46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.32 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Select Screened Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI USA Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil

• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies
The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“GHG”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

How did the sustainability indicators perform?

Xtrackers MSCI USA Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.12 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.12 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.12 Market weight (%)

Tobacco involvement	0.15	0.04	0.41	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 27.32% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI USA Screened UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country

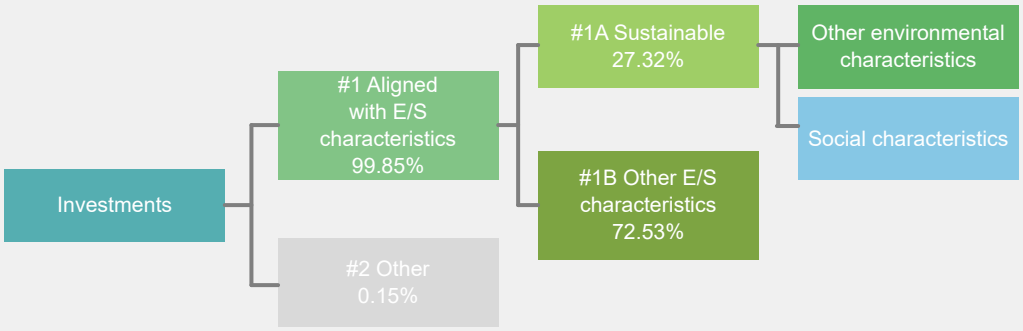
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.85% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.32% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.15% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI USA Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	0.7 %

Exposure to companies active in the fossil fuel sector*		**7.3 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

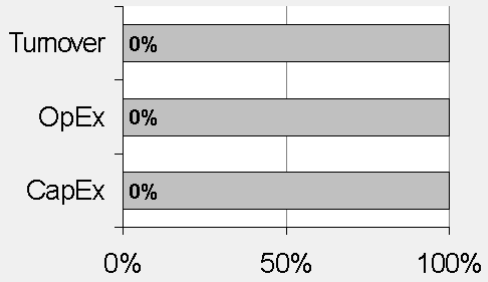
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

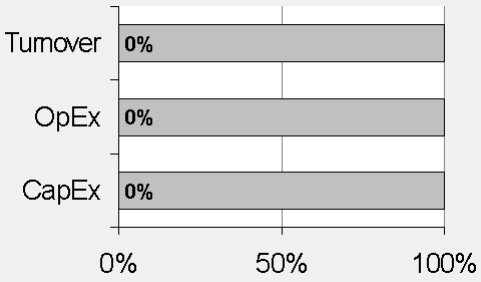
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.32% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.32% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI USA Select Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Japan Screened UCITS ETF

Legal entity identifier: 549300DIT7F25Z1MYN06

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.65 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Japan Select Screened Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI Japan Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“**GHG**”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

How did the sustainability indicators perform?

Xtrackers MSCI Japan Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 11.65% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

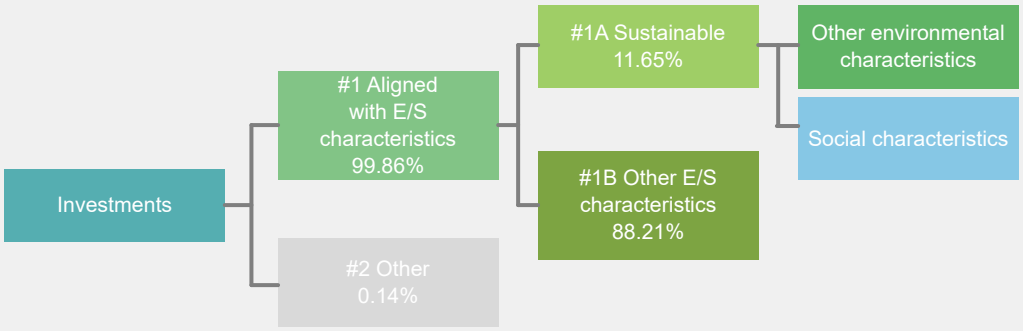
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.86% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 11.65% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.14% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Japan Screened UCITS ETF

Exposure to companies active in the fossil fuel sector*		**14.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

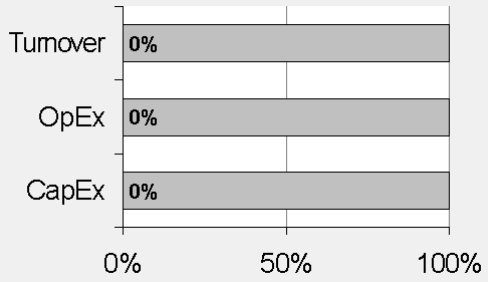
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

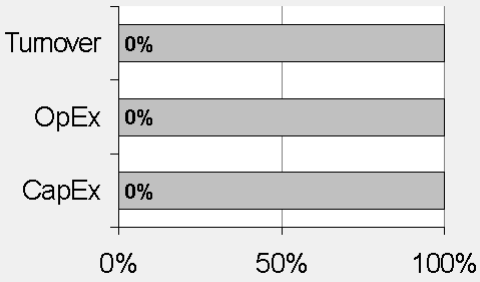
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 11.65% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 11.65% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

The financial product entered into securities lending transactions for efficient portfolio management purposes. Where the financial product entered into securities lending transactions during the period, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub–portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate developed market ESG equity index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Japan Select Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to offer a targeted coverage of the USD denominated emerging market sovereign bonds universe with adjusted weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings.

The weighting methodology aimed to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores were utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalised country weights such that they added up to 100% and ranked countries which were still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assessesed a country’s exposure to and management of environmental, social and governance risks and explained how these factors might impact the long–term sustainability of its economy. The factors which measured a country’s exposure to and management of ESG risks included but were not limited to: efficiency of resource utilisation, performance in relation to socio–economic factors, financial management, corruption control, political stability. These factors took into account a wide range of underlying data points, covering sub–factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness.

By providing a long–term view on sustainability the ratings aimed to complement traditional government debt analysis in order to analyse a country’s credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries were excluded until the cumulative market value weight of such exclusions reached a minimum 20% threshold (effectively a “best–in–universe” approach).

The remaining eligible country weights were then normalised again so that the cumulative weightings in the Reference Index added up to 100%.

How did the sustainability indicators perform?

Xtrackers ESG USD Emerging Markets Bond Quality Weighted UCITS ETF

Indicators	Description	Performance December 31, 2025

Country Social Pillar Score	6.20	5.60	5.66

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A – The financial product did not intend to make sustainable investments and invested solely into sovereign debt, therefore the financial product did not invest in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2(17) of SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that issuers follow good governance practices.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A – Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, the financial product did not invest in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A – Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, indicators for adverse impacts on sustainability factors were not taken into account for the purposes of determining sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A - Given the financial product did not intend to make sustainable investments and invested solely into sovereign debt, the financial product did not invest in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2(17) of SFDR.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Investee countries subject to social violations (no. 16).

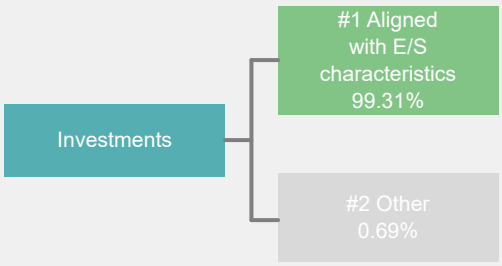
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.31% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics).

0.69% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Xtrackers ESG USD Emerging Markets Bond Quality Weighted UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	2.1 %
H	Transporting and storage	0.1 %
K	Financial and insurance activities	3.6 %
O	Public administration and defence; compulsory social security	92.0 %
NA	Other	2.3 %
Exposure to companies active in the fossil fuel sector*		**0.5 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

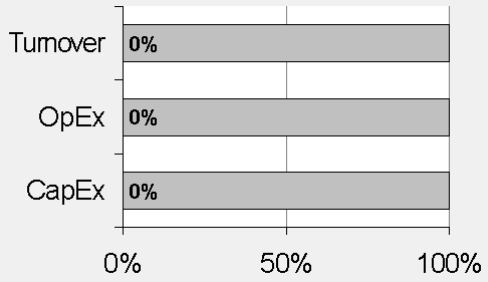
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

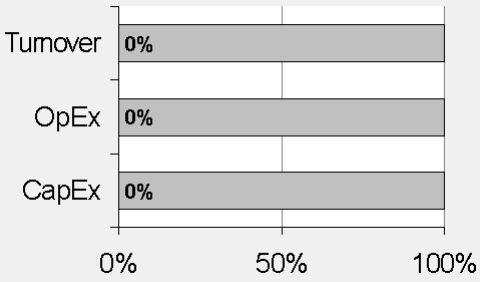
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not make an allocation to sustainable economic activities that contribute to an environmental objective.

What was the share of socially sustainable investments?

The financial product did not make an allocation to sustainable economic activities that contribute to a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by adjusting weights, by allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings, with a minimum of 20% of the eligible universe being excluded solely on the basis of the MSCI ESG Government Ratings. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio mainly comprised of fixed rate USD denominated government bonds issued by emerging market countries that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the iBoxx MSCI ESG USD Emerging Markets Sovereigns Quality Weighted Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index representing the performance of USD denominated sovereign bonds issued by emerging markets by adjusting weights, allocating higher weights to countries with relatively solid fundamentals and higher MSCI ESG Government Ratings while reducing weights of countries with relatively weak fundamentals and lower MSCI ESG Government Ratings.

The weighting methodology aims to achieve an index country weight reflecting the relative fundamental strength and higher MSCI ESG Government Rating of each of the underlying index countries. Relative fundamental scores are utilised to determine the index country weights in the Reference Index.

Following the application of financial screening criteria, the Reference Index normalises country weights such that they add up to 100% and ranks countries which are still eligible for inclusion by their MSCI Government ESG Rating. The MSCI Government ESG Rating assesses a country's exposure to and management of environmental, social and governance risks and explain how these factors might impact the longterm sustainability of its economy. The factors which measure a country's exposure to and management of ESG risks include but are not limited to: efficiency of resource utilisation, performance in relation to socio–economic factors, financial management, corruption control, political stability. These factors take into account a wide range of underlying data points, covering sub–factors including but not limited to: energy security risk, water resources, vulnerability to environmental events, higher education and technological readiness, the judicial and penal system, and governance effectiveness.

By providing a long–term view on sustainability the ratings aim to complement traditional government debt analysis in order to analyse a country's credit worthiness. Starting with the lowest MSCI Government ESG Rating, countries will be excluded until the cumulative market value weight of such exclusions reaches a minimum 20% threshold (effectively a "best–in–universe" approach).

The remaining eligible country weights are then normalised again so that the cumulative weightings in the Reference Index add up to 100%.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI EMU Screened UCITS ETF

Legal entity identifier: 549300KF3LBYJA2KD428

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.88 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU Select Screened Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI EMU Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas (“**GHG**”) intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.
MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

How did the sustainability indicators perform?

Xtrackers MSCI EMU Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 19.88% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

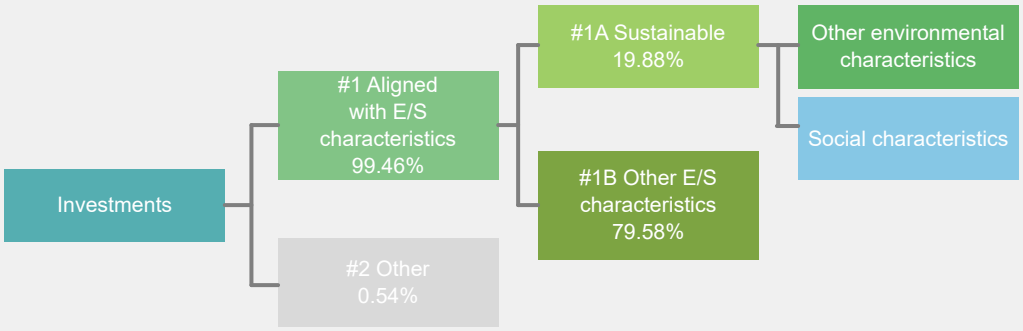
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.46% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 19.88% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.54% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.88% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.88% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI EMU Select Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil

• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles, or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers USD Corporate Bond Short Duration SRI PAB UCITS ETF

Legal entity identifier: 549300QIFH7Y0VUSB550

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.03 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI USD Corporate SRI 0–5 Years PAB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of the investment grade, USD–denominated, short–duration corporate bond market, excluding bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg USD Corporate 0–5 Years Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

• Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
• Securities that were unrated by MSCI ESG Research LLC;
• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company’s ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
• Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
• Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

How did the sustainability indicators perform?

Xtrackers USD Corporate Bond Short Duration SRI PAB UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	2.93 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.77 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.03 Market weight (%)
Total GHG Emissions	The financial product's portfolio's weighted average of ist issuers' total GHG emissions (Scopes 1, 2 and 3) as determined by MSCI.	22,217,384.95 tCO2e

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 25.03% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

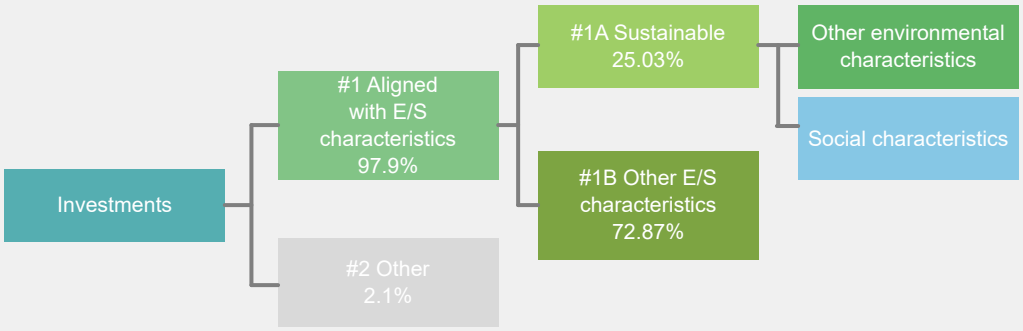
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 97.9% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.03% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

2.1% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers USD Corporate Bond Short Duration SRI PAB UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**4.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

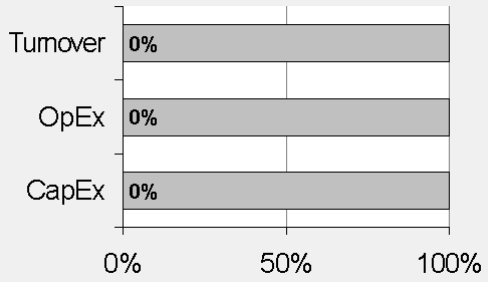
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

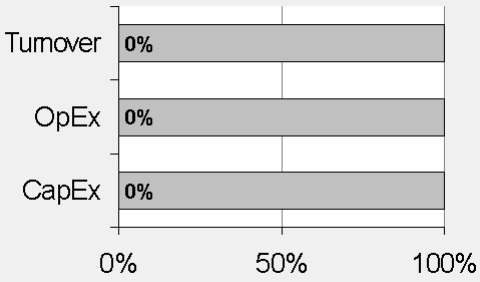
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.03% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.03% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI USD Corporate SRI 0–5 Years PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
• Securities that are unrated by MSCI ESG Research LLC;
• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and

• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC.

	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Select Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index, or unrelated transferable securities or other eligible assets. The Reference Index selected companies from the MSCI World Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction, and palm oil
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles, or had an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("**GHG**") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved as determined by MSCI Climate Change Metrics.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following four components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

How did the sustainability indicators perform?

Xtrackers MSCI World Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.1 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.1 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.1 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.09 Market weight (%)

Tobacco involvement	0.11	0.03	0.57	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 24.98% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI World Screened UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country

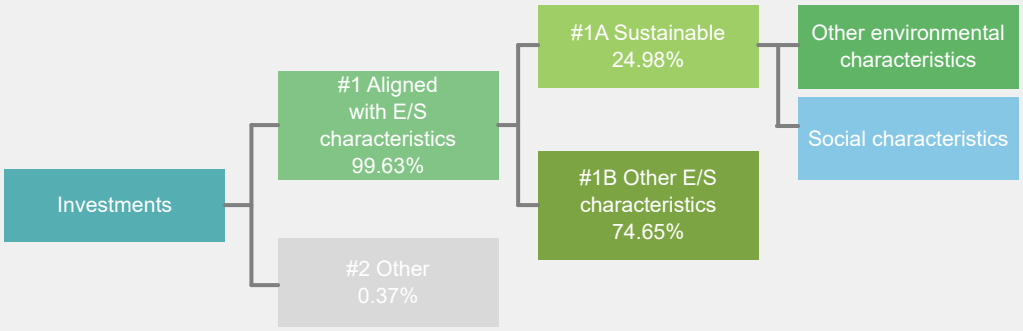
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.63% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 24.98% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.37% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**9.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

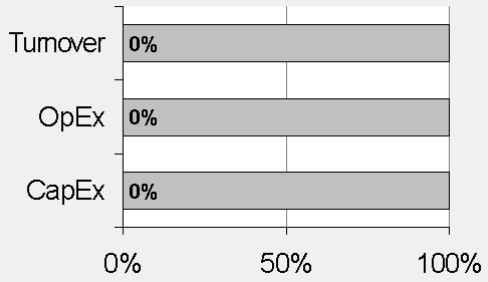
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

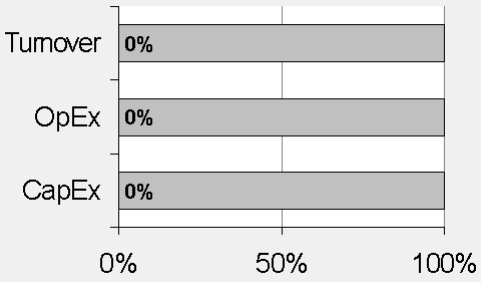
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.98% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.98% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index. Any unrelated transferable securities held by the financial product were similar to the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Select Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index which is designed to reflect the performance of the shares of large and mid–cap companies across 23 developed markets countries. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, unconventional and/or arctic oil and gas extraction and palm oil
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles or have an insufficient MSCI ESG Controversies Score related to certain biodiversity and/or environmental controversies.

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Japan ESG UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 10.91 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Japan Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI Japan Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with

any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI Japan ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	0.43 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	530.63 tCO2e / million EUR

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 10.91% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

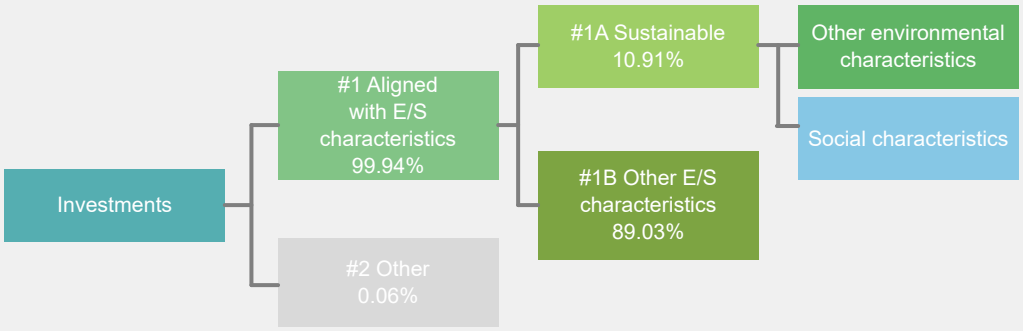
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.94% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 10.91% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.06% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Japan ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**1.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

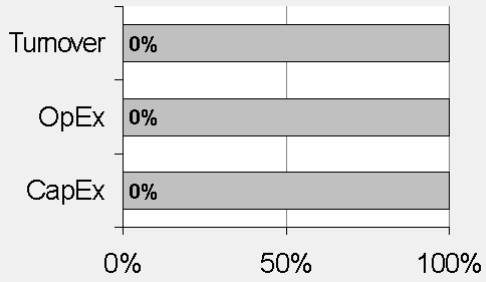
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

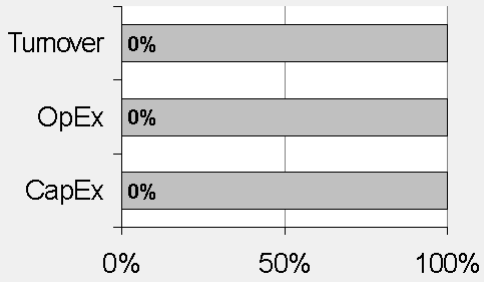
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 10.91% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 10.91% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate the Reference Index by buying all, or a substantial number of, the constituents of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Japan Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in Japan. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative

thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI World ESG UCITS ETF

Legal entity identifier: 549300KBPMH7CRUHUW62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.06 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in global developed markets. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI World Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with

any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI World ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.06 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	1.5 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.06 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.06 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	374.93 tCO2e / million EUR

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 31.06% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI World ESG UCITS ETF

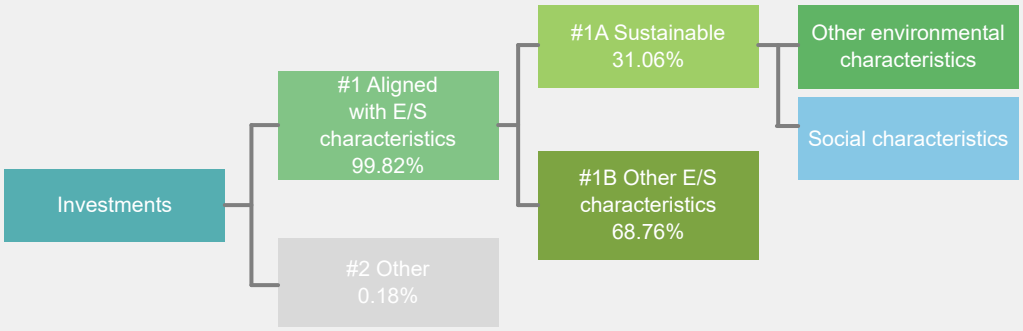
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.82% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 31.06% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.18% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World ESG UCITS ETF

Exposure to companies active in the fossil fuel sector*		**1.8 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

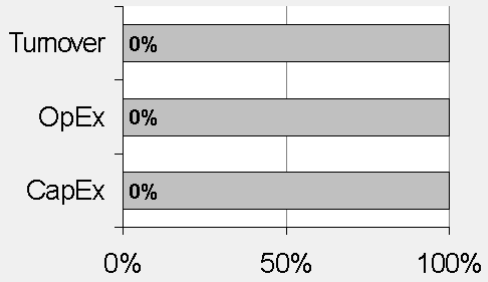
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

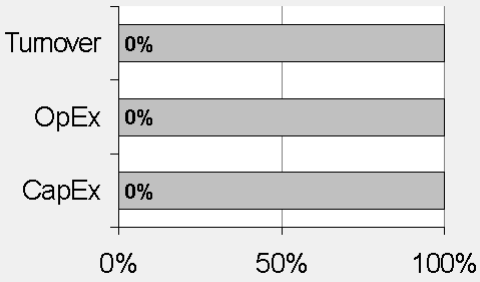
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 31.06% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 31.06% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global developed markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative

thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Europe ESG UCITS ETF

Legal entity identifier: 549300I5MYV9MCPQD952

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.45 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Europe Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI Europe Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with

any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI Europe ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	5.97 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	432.93 tCO2e / million EUR

…and compared to previous periods?

Controversial Weapons Involvement	0.00	0.11	0.20	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 27.45% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

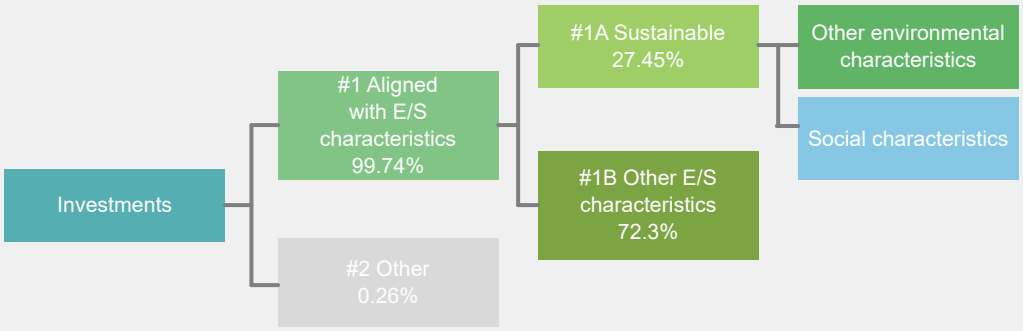
AXA	K - Financial and insurance activities	1.5 %	France

for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.74% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.45% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.26% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Europe ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.3 %
B	Mining and quarrying	0.3 %
C	Manufacturing	23.7 %
D	Electricity, gas, steam and air conditioning supply	0.8 %
E	Water supply; sewerage; waste managment and remediation activities	0.2 %
F	Construction	0.7 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.0 %
H	Transporting and storage	1.6 %
I	Accommodation and food service activities	1.2 %
J	Information and communication	9.5 %
K	Financial and insurance activities	29.5 %
L	Real estate activities	0.6 %
M	Professional, scientific and technical activities	26.2 %
N	Administrative and support service activities	1.3 %
NA	Other	3.2 %
Exposure to companies active in the fossil fuel sector*		**1.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

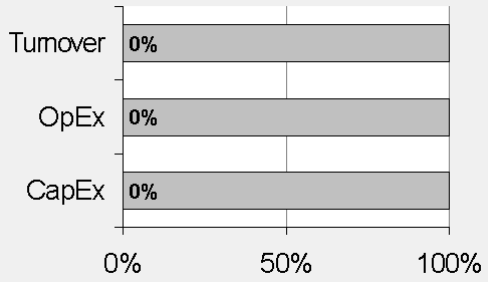
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

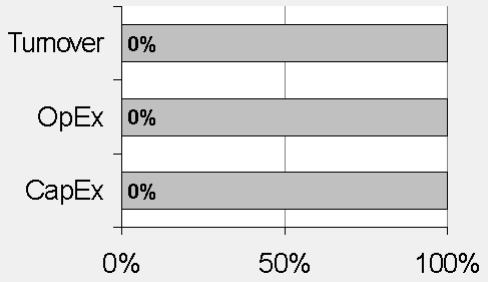
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.45% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.45% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Europe Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in Europe. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative

thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI USA ESG UCITS ETF

Legal entity identifier: 549300GV7ND6DPBVN624

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.67 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their peers in the MSCI USA Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with

any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI USA ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.08 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	0.75 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.08 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.08 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	378.08 tCO2e / million EUR

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 34.67% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

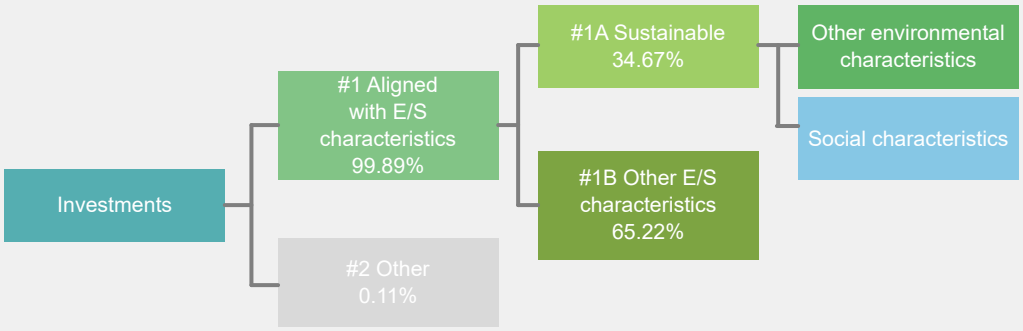
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.89% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 34.67% of the financial product’s assets qualified as sustainable investments (#1A Sustainable).

0.11% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**2.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

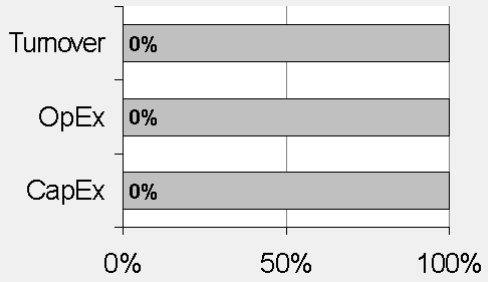
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

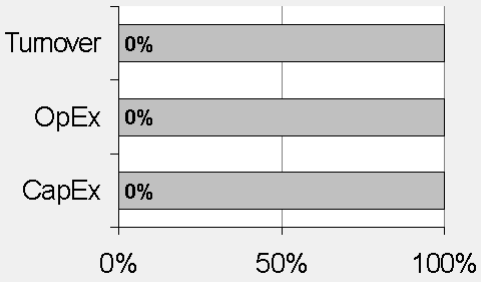
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 34.67% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 34.67% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI USA Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative

thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers Artificial Intelligence & Big Data UCITS ETF

Legal entity identifier: 254900X8OXFNVMRD9308

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.2 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Artificial Intelligence and Big Data Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the “Parent Index”) that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance (“ESG”) standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics (“Sustainalytics”), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and

• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

How did the sustainability indicators perform?

Xtrackers Artificial Intelligence & Big Data UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.03 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.13 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.13 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.45 Market weight (%)

Tobacco involvement	0.09	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 15.2% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

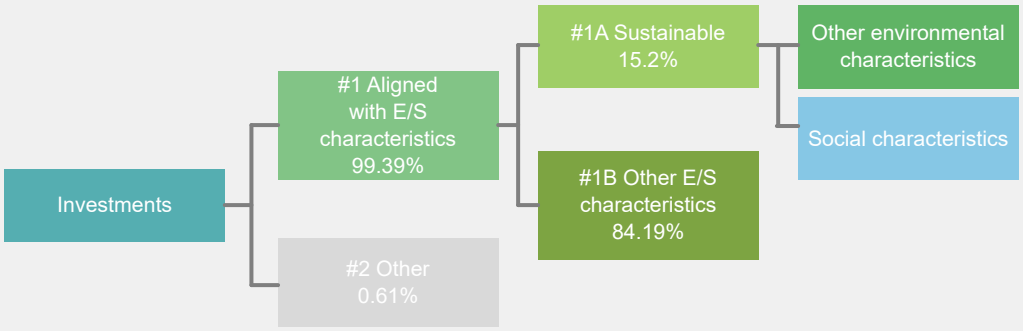
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.39% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 15.2% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.61% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Artificial Intelligence & Big Data UCITS ETF

Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

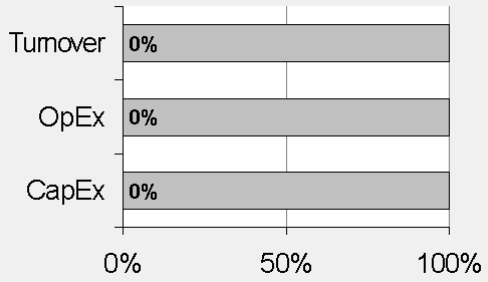
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

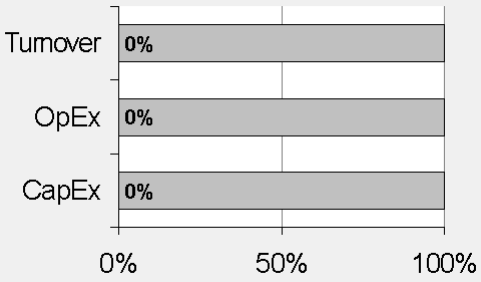
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 15.2% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 15.2% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Nasdaq Global Artificial Intelligence and Big Data Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in artificial intelligence; robotics; automotive innovation; healthcare innovation; new energy & environment; internet of things; and data computing & processing. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

• ESG Risk Score of at least 40;
• Non–compliance of the United Nations Global Compact Principles; and
• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Future Mobility UCITS ETF

Legal entity identifier: 254900BN65IWB0RK9A45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.53 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Nasdaq Global Future Mobility Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the Nasdaq Global Disruptive Technology Benchmark Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria.

The Reference Index utilised ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores were categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breached the following criteria was excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and

• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

How did the sustainability indicators perform?

Xtrackers Future Mobility UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.04 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.64 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.64 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	2.92 Market weight (%)

…and compared to previous periods?

Controversial Weapons Involvement	0.00	0.09	0.24	Market weight (%)
Tobacco involvement	0.22	0.09	0.24	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 22.53% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Future Mobility UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Tesla	C - Manufacturing	5.3 %	United States
Intel Corp.	C - Manufacturing	5.0 %	United States

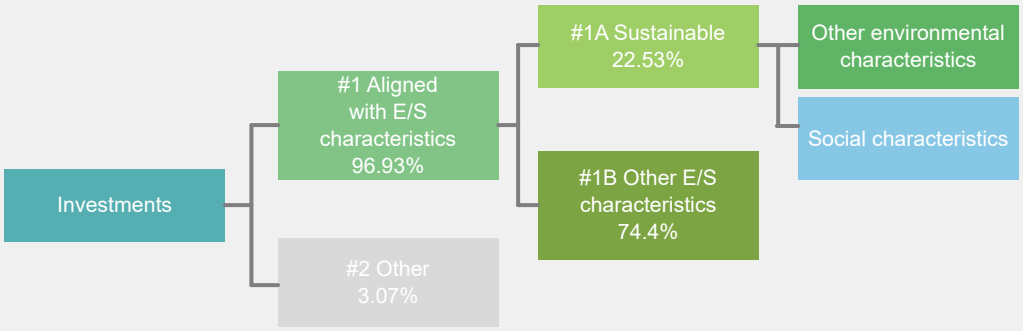
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 96.93% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.53% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

3.07% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Future Mobility UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	75.7 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.5 %
J	Information and communication	12.8 %
K	Financial and insurance activities	0.0 %
M	Professional, scientific and technical activities	4.1 %
NA	Other	7.0 %
Exposure to companies active in the fossil fuel sector*		**4.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

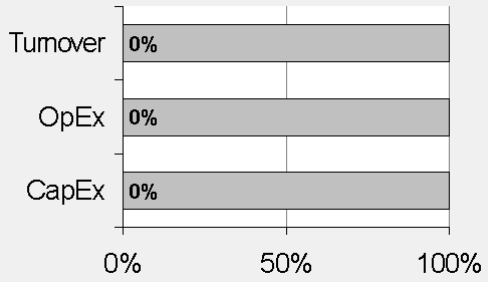
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

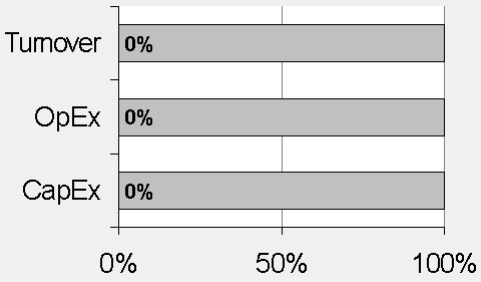
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.53% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.53% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Nasdaq Global Future Mobility Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of companies engaged in future mobility, for example: autonomous vehicles (i.e. driverless cars), 3D graphics, electric vehicles, hybrid vehicles and the technology and supply chain behind this, such as electric batteries and lithium batteries. The Parent Index is used as the universe of eligible securities for the Reference Index. The constituents of the Reference Index are determined by applying thematic selection criteria to the constituents of the Parent Index. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria.

The Reference Index utilises ESG Risk Scores from Morningstar Sustainalytics ("Sustainalytics"), a leading independent ESG and corporate governance research, ratings and analytics firm. The ESG Risk scores are categorized across five risk levels: negligible (0–10), low (10–20), medium (20–30), high (30–40) and severe (40+). Further information regarding ESG Risk Scores can be found on the company website https://www.sustainalytics.com/esg–ratings.

Any company from the eligible universe which breaches the following criteria shall be excluded from the Reference Index:

• ESG Risk Score of at least 40;

• Non–compliance of the United Nations Global Compact Principles; and
• Involvement of certain degrees in tobacco products, thermal coal, oil sands, controversial weapons, civilian firearms, small arms and military contracting, nuclear weapons, depleted uranium, adult entertainment or gambling.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EM Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in global emerging markets. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI Emerging Markets Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian

firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI Emerging Markets ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	1.77 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	575.64 tCO2e / million EUR

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 22.72% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

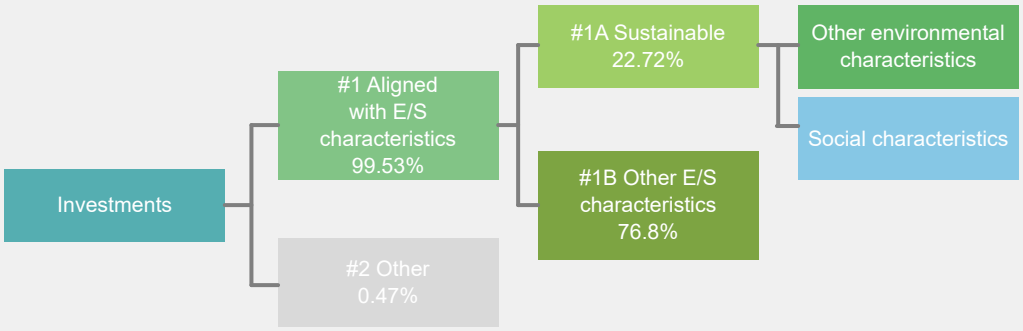
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.53% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.72% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.47% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Emerging Markets ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**3.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

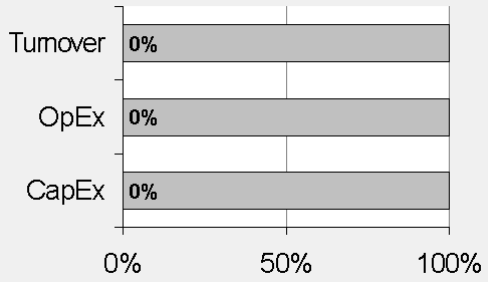
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

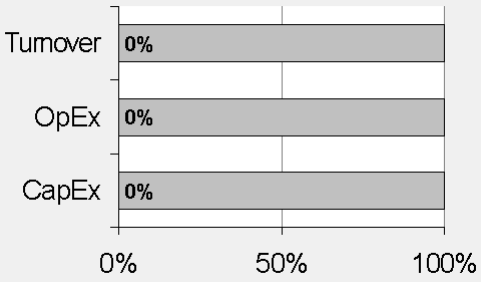
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.72% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.72% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a representation of, the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI EM Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global emerging markets. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative

thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers USD Corporate Bond SRI PAB UCITS ETF

Legal entity identifier: 254900YQ6CUXP95AXP64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.2% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of fixed–rate, investment grade, US Dollar denominated corporate bonds, excluding bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. The Reference Index aimed to comply with the minimum standards laid out for EU PAB in the PAB Regulation.

The Reference Index set an initial 50% decarbonization of absolute greenhouse gas ("GHG") emissions relative to the Bloomberg USD Liquid Investment Grade Corporate Index (the "Parent Index"), followed by an annual 7% decarbonization trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which do not fulfil specific ESG criteria.

In particular, the following bonds were excluded from the Reference Index:

• Issuers where MSCI did not have reported or estimated absolute GHG emissions data;
• Securities that were unrated by MSCI ESG Research LLC;
• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provided scores to measure a company’s ESG characteristics, relative to their industry peers and took into account over 30 Environmental, Social and Governance Key Issues;
• Issuers with a "red" MSCI ESG Controversies Score or issuers which breached a MSCI Environmental Controversy Score. MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited to, United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;
• Issuers that were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research were sourced from MSCI ESG Research LLC.

How did the sustainability indicators perform?

Xtrackers USD Corporate Bond SRI PAB UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	1.18 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.41 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 32.2% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

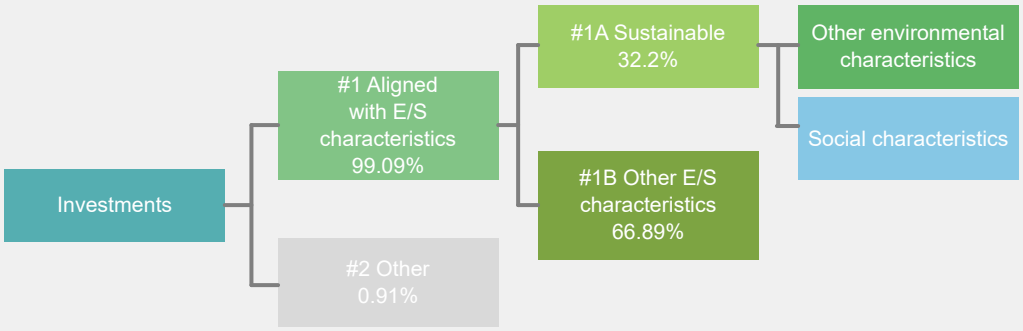
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.09% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 32.2% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.91% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers USD Corporate Bond SRI PAB UCITS ETF

Exposure to companies active in the fossil fuel sector*		**2.8 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

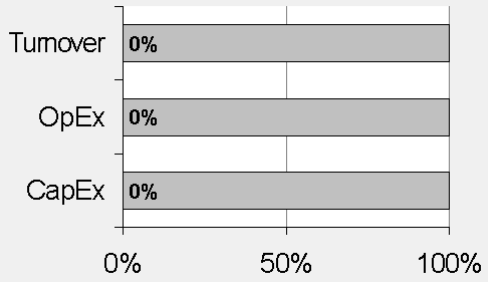
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

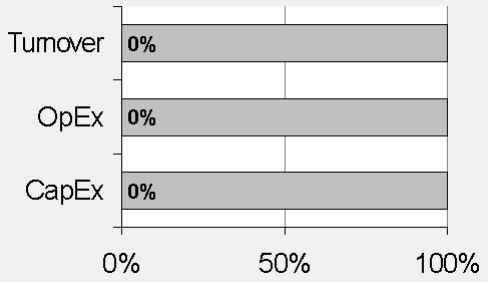
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 32.2% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 32.2% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by aiming to comply with the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to track, before fees and expenses, the performance of the Reference Index that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI USD Liquid Investment Grade Corporate SRI PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, which is the relevant broad market index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG (environmental, social, and governance) criteria.

In particular, the following bonds will be excluded from the Reference Index:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data;
• Securities that are unrated by MSCI ESG Research LLC;
• Bonds issued by issuers rated BB or below by MSCI ESG Research LLC. MSCI ESG ratings provide scores to measure a company's ESG characteristics, relative to their industry peers and takes into account over 30 Environmental, Social and Governance Key Issues;
• Issuers with a "red" MSCI ESG Controversies Score or issuers which breach a MSCI Environmental Controversy Score. MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to United Nations Global Compact, Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work;

• Issuers that are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal; and
• Issuers with any involvement in controversial weapons or fossil fuel reserves.

If having applied the above ESG exclusion criteria less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

The MSCI GHG emissions data, MSCI ESG ratings, MSCI ESG Controversies scores and Business Involvement Screening Research are sourced from MSCI ESG Research LLC

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI EMU ESG UCITS ETF

Legal entity identifier: 254900OARN1CRQBI4D27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.09 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU Low Carbon SRI Selection Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The constituents of the Reference Index had comparatively lower current and potential carbon emissions and comparatively higher environmental, social and governance performance characteristics relative to their regional and sector peers in the MSCI EMU Index (the "Parent Index").

The Reference Index applied three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the "Rules").

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC's Low Carbon Transition Risk Assessment was designed to identify potential leaders and laggards by holistically measuring companies' exposure to and management of risks and opportunities related to the low carbon transition. Companies were grouped into five categories that highlighted the predominant risks and opportunities they were most likely to face in the transition. In decreasing order of risk, the categories were asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding were excluded. Asset stranding refers to the potential for "stranding" of a company's physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index excluded companies that had a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment were excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings were determined by a combination of each company's current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC followed a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company was the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company's management of risks and opportunities presented by the low carbon transition was assessed.

This assessment was based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 were adjusted for the strength of management efforts as per Step 2. The company was then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules were based on:

• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology. These industries included, but were not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian

any involvement in controversial weaponswere explicitly excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology were used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identified companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings were used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings were used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents were then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index was reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applied the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index were insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics would be removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did the sustainability indicators perform?

Xtrackers MSCI EMU ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.06 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	8.69 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.06 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	501.44 tCO2e / million EUR

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 23.09% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.67% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 23.09% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.33% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI EMU ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	20.5 %
D	Electricity, gas, steam and air conditioning supply	1.2 %
F	Construction	0.6 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.4 %
H	Transporting and storage	3.3 %
I	Accommodation and food service activities	0.2 %
J	Information and communication	12.8 %

Exposure to companies active in the fossil fuel sector*		**2.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

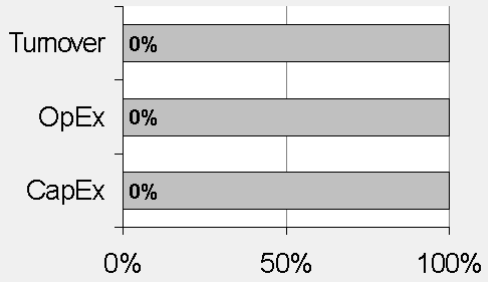
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

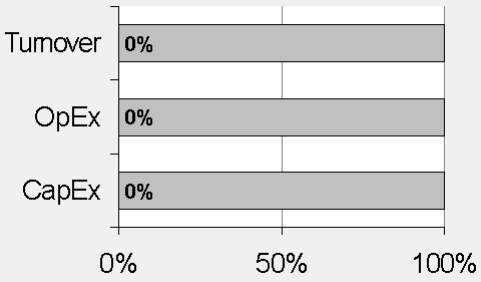
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 23.09% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 23.09% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the Low Carbon Transition Risk Assessment Rules, High ESG Performance Selection Rules, and the Low Carbon Emissions Rules outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI EMU Low Carbon SRI Selection Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in developed market countries in the European Economic and Monetary Union. The Reference Index applies three sets of rules, the Low Carbon Transition Risk Assessment Rules, Highest ESG Performance Selection Rules, and Low Carbon Emissions Rules (together the “Rules”).

Low Carbon Transition Risk Assessment Rules

MSCI ESG Research LLC’s Low Carbon Transition Risk Assessment is designed to identify potential leaders and laggards by holistically measuring companies’ exposure to and management of risks and opportunities related to the low carbon transition. Companies are grouped into five categories that highlight the predominant risks and opportunities they are most likely to face in the transition. In decreasing order of risk, the categories are asset stranding, transition product, transition operational, neutral and solutions. In this ruleset, all companies grouped in the category asset stranding are excluded. Asset stranding refers to the potential for “stranding” of a company’s physical and/or natural assets due to regulatory, market, or technological forces arising from low carbon transition. The Reference Index will exclude companies that have a comparatively high risk rating calculated in accordance with the methodology set out below (e.g. companies with the most risky Low Carbon Transition Risk Assessment are excluded, subject to the cumulative weight of securities remaining in each sector being a certain percentage of the weight of the sector in the Parent Index) while preserving the prevalent diversification within each sector of the Reference Index.

The risk ratings are determined by a combination of each company’s current risk exposure and its efforts to manage the risks and opportunities presented by the low carbon transition. MSCI ESG Research LLC follows a 3–step process:

Step 1: Measure Low Carbon Transition Risk Exposure

The first step towards measuring the risk exposure for a company is the computation of its carbon intensity.

Step 2: Assess Low Carbon Transition Risk Management

Then, a company’s management of risks and opportunities presented by the low carbon transition is assessed.

This assessment is based on policies and commitments to mitigate transition risk, governance structures, risk management programs and initiatives, targets and performance, and involvement in any controversies.

Step 3: Calculate Low Carbon Transition Category and Score

The risk exposures calculated in Step 1 are adjusted for the strength of management efforts as per Step 2. The company is then assigned a final score to illustrate its risk rating in this respect.

High ESG Performance Selection Rules

The High ESG Performance Selection Rules are based on:
• The MSCI SRI (Socially Responsible Investing) Indexes methodology, and
• The MSCI ESG Leaders Indexes methodology.

MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value–based criteria and thresholds from the MSCI SRI Indexes methodology.

These industries include, but are not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear weapons, thermal coal, fossil fuel, and power generation. Companies with any involvement in controversial weapons are explicitly

excluded. From time to time, other activities may also be subject to exclusion and more conservative thresholds may apply.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

MSCI ESG Ratings and MSCI ESG Controversies criteria in line with, or more restrictive than, the MSCI ESG Leaders Indexes methodology are used to identify and exclude further companies based on environmental, social and governance criteria. The MSCI ESG Controversies identifies companies involved in severe ESG controversies consistent with global conventions and norms, such as, but not limited, to the United Nations Global Compact, the Universal Declaration of Human Rights and the ILO Declaration on Fundamental Principles and Rights at Work, and the MSCI ESG Ratings are used to remove the worst performers and select the best performing ESG constituents, relative to their industry sector peer group.

Companies' MSCI ESG Ratings and industry–adjusted ESG ratings are used to rank constituents still eligible after the MSCI BISR, MSCI ESG Ratings and MSCI ESG Controversies filters have been applied. Constituents are then selected based upon these rankings until a target market capitalisation of the sector of the Parent Index is reached, with the remaining stocks excluded, in accordance with the MSCI ESG Leaders Indexes methodology.

Full details, including further eligibility and exclusion rules, can be found under the MSCI ESG Leaders Indexes and the MSCI SRI Indexes methodology on www.msci.com/index–methodology.

Low Carbon Emissions Rules

After applying the Low Carbon Transition Risk Assessment and High ESG Performance Selection Rules, the Reference Index applies the Low Carbon Emission Rules, whereby, if current selected carbon metrics relating to the Reference Index are insufficiently reduced compared to the current carbon metrics relating to the Parent Index, securities with the highest such current carbon metrics are removed until the current carbon metrics of the Reference Index are sufficiently reduced as compared with the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Product name: Xtrackers EUR Corporate Green Bond UCITS ETF
Legal entity identifier: 2549007L0TWXK1EJB707

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective: 93.44%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The financial product had sustainable investment as its objective and qualified as a financial product subject to Article 9(1) SFDR by tracking the Bloomberg MSCI EUR Corporate and Agency Green Bond Index (the "Reference Index"). The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of Euro

denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index included fixed income securities that met specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds met the green bond eligibility criteria. The universe of potential constituents was independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and were therefore eligible for inclusion in the Reference Index. These eligibility criteria reflected themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and required commitments about a bond's:

- Stated use of proceeds: For bonds to have been eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus included; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to have been eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must have been disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds still qualified for inclusion in the Reference Index, even if all principles were not satisfied. Such acceptance was assessed by MSCI ESG Research LLC and included as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applied an ESG screening approach where all of the issuers which breached the following ESG standards, amongst others, were excluded:

- Were associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Were assigned an MSCI ESG Rating of 'CCC';
- Derived certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Were assigned an MSCI ESG Controversies Score of 0 (red flag).

● ***How did the sustainability indicators perform?***

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Indicator	Description	Performance (as at 31.12.2025)
Green Bond Exposure	The percentage of the financial product's portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements: (i) CBI Certified Green Bond: These are issued either based on issuer's own green bond principles or CBI green bond principles and is also certified by CBI as a green. (ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria. (iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles.	99.71%
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.81%
Exposure to Worst-in-Class issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.19%
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.75%

…and compared to previous periods?

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)	Performance (as at 31.12.2024)
Green Bond Exposure	98.98%	99.38%	98.38%
Exposure to Very Severe Controversies	0.46%	0.35%	0.13%
Exposure to Worst-in-Class Issuers	0.46%	0.35%	0.13%
Controversial Weapons Involvement	0.46%	0.35%	0.13%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

Principal adverse impacts *are the* most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The list includes the *investments* constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2025 through 31.12.2025

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
SOCIETE DES GRANDS PROJETS	O - Public administration and defence; compulsory social security	0.58%	France
SOCIETE DES GRANDS PROJETS MTN	O - Public administration and defence; compulsory social security	0.39%	France

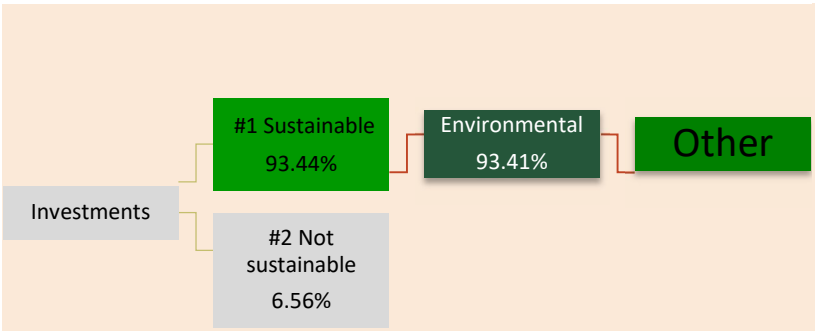
DANSKE BANK A/S	K - Financial and insurance activities	0.31%	Denmark



Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

As at 31 December 2025, this financial product invested 93.44% of its net assets in investments that were aligned with the sustainable investments with an environmental objective.

1.62% of the investments were not aligned with these characteristics (#2 Not sustainable).

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

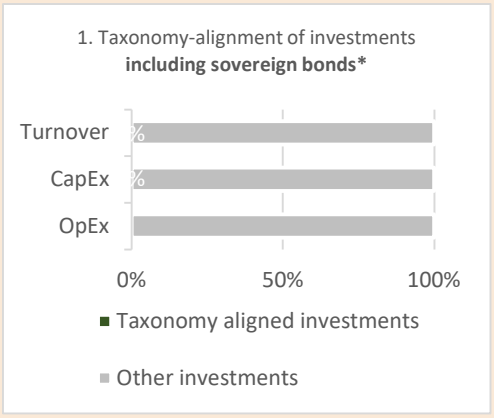
The table below summarises the GICS sector investments of the financial product as at 31 December 2025.

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	6.4%
D	Electricity, gas, steam and air conditioning supply	15.3%
E	Water supply; sewerage; waste managment and remediation activities	1.4%
F	Construction	0.9%
H	Transporting and storage	3.6%
I	Accommodation and food service activities	0.1%
J	Information and communication	0.3%
K	Financial and insurance activities	56.2%
L	Real estate activities	6.0%
N	Administrative and support service activities	1.1%
O	Public administration and defence; compulsory social security	6.7%
U	Activities of extraterritorial organisations and bodies	0.6%
NA	Other	1.3%
Exposure to companies active in the fossil fuel sector[1]		19.5%

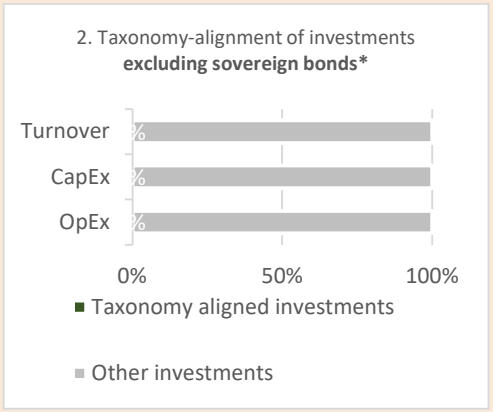
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.



[1] The financial product's exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[2]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

N/A

[2] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2025, the share of sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy was 93.44%.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under "#2 Other", included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Reference Index took into account sustainability factors in line with the sustainable investment objective by representing the performance of Euro-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which met certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds would exclusively and formally be applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, EUR-denominated green bonds, that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable

investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en-lu/about-us/corporate-governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI EUR Corporate and Agency Green Bond Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2025)	Performance of the benchmark (as at 31.12.2025)
Green Bond Exposure	99.71%	100%
Exposure to Very Severe Controversies	0.81%	0.49%
Exposure to Worst-in-Class issuers	0. 19%	0. 24%
Controversial Weapons Involvement	0. 74%	0. 43%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2025 to 31.12.2025)	2.7	2.9

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2025 to 31.12.2025)	2.7	0.0%

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Xtrackers USD Corporate Green Bond UCITS ETF
Legal entity identifier: 2549001CWO1OWBWUGJ52

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

■ **Yes**	☐ **No**
■ It made **sustainable investments with an environmental objective: 80.20%**	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
■ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The financial product had sustainable investment as its objective and qualified as a financial product subject to Article 9(1) SFDR by tracking the Bloomberg MSCI USD Corporate and Agency Green Bond Index (the "Reference Index"). The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to represent the performance of USD

denominated fixed income securities issued by certain corporate and agency (entities which are majority government-owned with no government guarantee, or government sponsored entities) issuers to fund projects with direct environmental benefits. The Reference Index included fixed income securities that met specific credit quality, liquidity, ESG and green bond eligibility and classification requirements.

The universe of eligible bonds met the green bond eligibility criteria. The universe of potential constituents was independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and were therefore eligible for inclusion in the Reference Index. These eligibility criteria reflected themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and required commitments about a bond's:

- Stated use of proceeds: For bonds to have been eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus included; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to have been eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must have been disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds still qualified for inclusion in the Reference Index, even if all principles were not satisfied. Such acceptance was assessed by MSCI ESG Research LLC and included as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applied an ESG screening approach where all of the issuers which breached the following ESG standards, amongst others, were excluded:

- Were associated to certain extents with controversial, civilian and nuclear weapons and tobacco;
- Were assigned an MSCI ESG Rating of 'CCC';
- Derived certain revenue thresholds from thermal coal, oil sands extraction and military defence weapons; and
- Were assigned an MSCI ESG Controversies Score of 0 (red flag).

How did the sustainability indicators perform?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

Indicator	Description	Performance (as at 31.12.2025)
Green Bond Exposure	The percentage of the financial product's portfolio which is exposed to securities identified as "green bonds" as determined by Refinitiv, incorporating data and classifications from the Climate Bond Initiative. In order to be identified as a green bond the asset and issuer must meet the following requirements: (i) CBI Certified Green Bond: These are issued either based on issuer's own green bond principles or CBI green bond principles and is also certified by CBI as a green. (ii) Self-Labelled Green Bond: These are labelled as green by the issuers but do not meet CBI criteria. (iii) CBI Verified Green Bond: These are labelled securities which also meet CBI green bond principles. These issuers issue green bonds based on their own green bond principles.	99.92%
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	7.99%[1]
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	2.67%[1]
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	7.08%[1]

[1] The percentage of the financial product's portfolio's market value exposed to such indicators is predominantly driven by agency-issued securities which conform with equivalent government indicators, where applicable, but for which no data was available for the corporate issuer-related indicators listed above.

…and compared to previous periods?

Indicator (as described above)	Performance (as at 31.12.2022)	Performance (as at 31.12.2023)	Performance (as at 31.12.2024)
Green Bond Exposure	97.69%	97.78%	98.57%
Exposure to Very Severe Controversies	1.64%	6.67%	7.15%
Exposure to Worst-in-Class Issuers	1.64%	7.04%	7.59%
Controversial Weapons Involvement	1.64%	6.67%	6.71%

How did the sustainable investments not cause significant harm to any sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

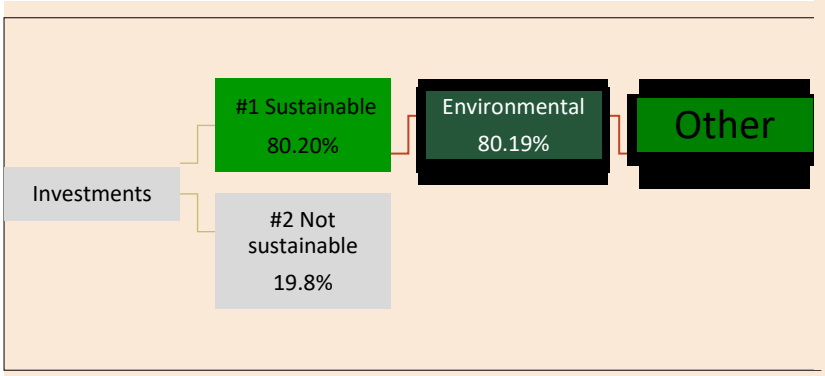
The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 01.01.2025 through 31.12.2025

What were the top investments of this financial product?

The table below summarises the average top fifteen investment of the financial product as at each quarter-end.

Largest investments	Sector	% Assets	Country
FORD MOTOR COMPANY	C - Manufacturing	1.32%	United States
JPMORGAN CHASE & CO	K - Financial and insurance activities	1.27%	United States
GACI FIRST INVESTMENT CO MTN RegS	O - Public administration and defence; compulsory social security	1.15%	Cayman Islands
FORD MOTOR COMPANY	C - Manufacturing	1.09%	United States
GACI FIRST INVESTMENT CO MTN RegS	O - Public administration and defence; compulsory social security	1.01%	Cayman Islands
DP WORLD CRESCENT LTD RegS	H - Transporting and storage	0.99%	Cayman Islands
GACI FIRST INVESTMENT CO MTN RegS	O - Public administration and defence; compulsory social security	0.95%	Cayman Islands
GACI FIRST INVESTMENT CO MTN RegS	O - Public administration and defence; compulsory social security	0.95%	Cayman Islands
MIZUHO FINANCIAL GROUP INC	K - Financial and insurance activities	0.92%	Japan
NEXTERA ENERGY CAPITAL HOLDINGS INC	D - Electricity, gas, steam and air conditioning supply	0.86%	United States

GENERAL MOTORS CO	C - Manufacturing	0.79%	United States
INDUSTRIAL AND COMMERCIAL BANK OF CHINA LTD	K - Financial and insurance activities	0.79%	China
PNC FINANCIAL SERVICES GROUP INC	K - Financial and insurance activities	0.78%	United States
NEDERLANDSE WATERSCHAPSBANK NV	K - Financial and insurance activities	0.77%	Netherlands
ING GROEP NV	K - Financial and insurance activities	0.75%	Netherlands



Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

As at 31 December 2025, this financial product invested 80.20% of its net assets in investments that were aligned with the sustainable investments with an environmental objective.

19.8% of the investments were not aligned with these characteristics (#2 Not sustainable).

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

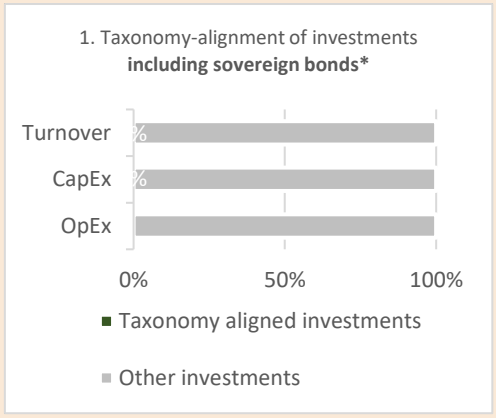
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waster management rules**.**

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective

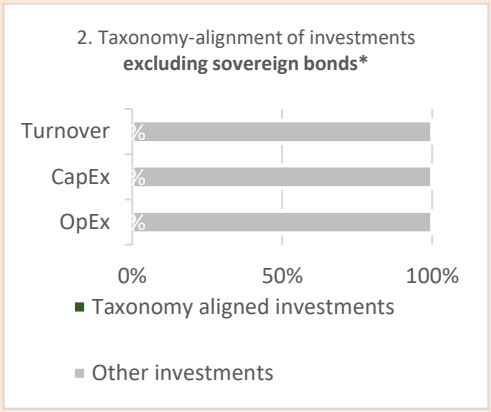
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

The table below summarises the GICS sector investments of the financial product as at 31 December 2025.



NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	6.0%
D	Electricity, gas, steam and air conditioning supply	20.6%
E	Water supply; sewerage; waste managment and remediation activities	0.20%
F	Construction	0.20%
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.5%
H	Transporting and storage	1.6%
I	Accommodation and food service activities	0.9%
J	Information and communication	2.1%
K	Financial and insurance activities	46.6%
L	Real estate activities	8.7%
M	Professional, scientific and technical activities	0.2%
N	Administrative and support service activities	0.5%
O	Public administration and defence; compulsory social security	8.9%
U	Activities of extraterritorial organisations and bodies	0.2%
NA	Other	2.8%
Exposure to companies active in the fossil fuel sector[2]		27.32%



To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

[2] The financial product's exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[3]?**

  ☐ Yes:

  ☐ In fossil gas ☐ In nuclear energy

  ■ No. While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

- ***What was the share of investments made in transitional and enabling activities?***

  N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

- ***How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?***

  N/A

[3] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As at 31 December 2025, the share of sustainable economic activities that contribute to an environmental objective that are not aligned with the EU Taxonomy was 80.20%.

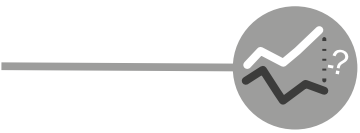
What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were sustainable investments with an environmental objective (#1 Sustainable).

Those investments included under "#2 Other", included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.



What actions have been taken to attain the sustainable investment objective during the reference period?

The Reference Index took into account sustainability factors in line with the sustainable investment objective by representing the performance of USD-denominated, investment grade bonds issued by corporate or agency bodies (entities which are majority government-owned with no government guarantee, or government sponsored entities) which met certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds would exclusively and formally be applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds, as independently evaluated by MSCI ESG Research LLC. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product will aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio of investment grade, USD-denominated green bonds, that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable

investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en-lu/about-us/corporate-governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI USD Corporate and Agency Green Bond Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a relevant broad market index by only including those bonds that meet certain ESG requirements and eligibility criteria with regard to green bond classification, in which the proceeds will be exclusively and formally applied to projects or activities that promote climate or other environmental sustainability purposes through their use of proceeds.

The universe of eligible bonds must meet the green bond eligibility criteria. The universe of potential constituents is independently evaluated by MSCI ESG Research LLC along four dimensions to determine whether bonds should be classified as a "green bond" and therefore eligible for inclusion in the Reference Index. These eligibility criteria reflect themes articulated in the green bond principles endorsed by the International Capital Market Association in 2014, and require commitments about a bond's:

- Stated use of proceeds: For bonds to be eligible for inclusion, the proceeds must be used for at least one of the eligible environmental categories defined by MSCI ESG Research LLC, which as of the date of the financial product's Supplement to the Prospectus include; alternative energy, energy efficiency, pollution prevention and control, sustainable water, green buildings, and climate adaption;
- Process for green project evaluation and selection;
- Process for management of proceeds: For bonds to be eligible for inclusion, an eligible mechanism to ring-fence the net proceeds must be disclosed in the bond's prospectus or offering documentation; and
- Commitment to ongoing reporting of the environmental performance of the use of proceeds.

Certain green bonds issued prior to 2014 that are widely accepted by investors as green bonds may still qualify for inclusion in the Reference Index, even if all principles are not satisfied. Such acceptance is assessed by MSCI ESG Research LLC and includes as a minimum conformity with principle one of the 2014 green bond principals, "stated use of proceeds", as described above.

The Reference Index also applies an ESG screening approach where all of the issuers which breach the following ESG standards, amongst others, are excluded:

- Are associated with controversial, civilian and nuclear weapons and tobacco;
- Are assigned an MSCI ESG Rating of 'CCC';
- Derive revenues from thermal coal, oil sands extraction and military defence weapons; and
- Are assigned an MSCI ESG Controversies Score of 0 (red flag).

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Indicators (as Described Above)	Performance of the financial product (as at 31.12.2025)	Performance of the benchmark (as at 31.12.2025)
Green Bond Exposure	99.92%	99.99%
Exposure to Very Severe Controversies	7.99%	7.61%
Exposure to Worst-in-Class Issuers	2.67%	2.99%
Controversial Weapons Involvement	7.08%	6.75%

- ***How did this financial product perform compared with the reference benchmark?***

	Financial product	Benchmark
Performance (during the period 01.01.2025 to 31.12.2025)	7.07%	7.53%

- ***How did this financial product perform compared with the broad market index?***

	Financial product	Broad market index
Performance (during the period 01.01.2025 to 31.12.2025)	7.07%	0.00%

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers EMU Net Zero Pathway Paris Aligned UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.24 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies across developed market countries in the European Economic and Monetary Union which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Eurozone Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Were assigned an ISS ESG rating of D– or below; and

• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;

• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did the sustainability indicators perform?

Xtrackers EMU Net Zero Pathway Paris Aligned UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	9.32 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.14 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	1.14 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	554.61 tCO2e / million EUR

Exposure to Fossil Fuels	3.43	2.24	1.56	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 25.24% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

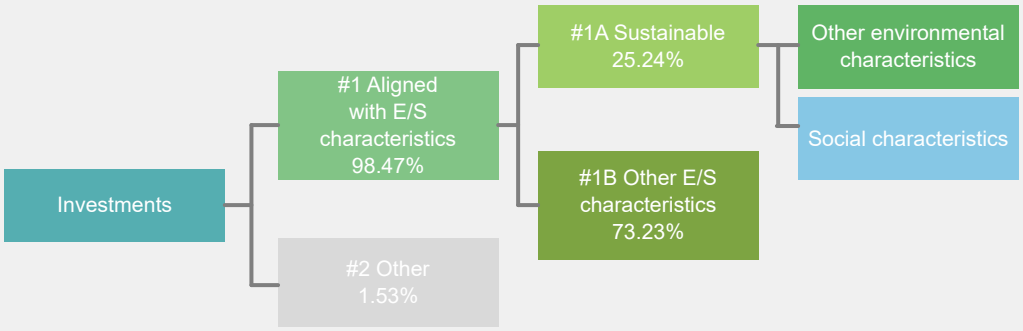
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 98.47% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.24% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.53% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers EMU Net Zero Pathway Paris Aligned UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**0.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

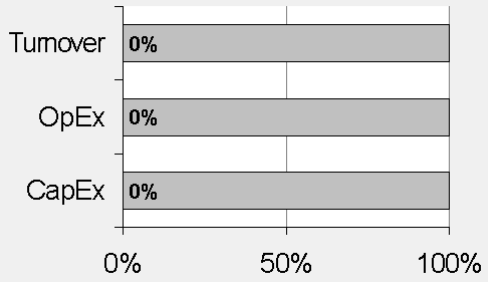
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

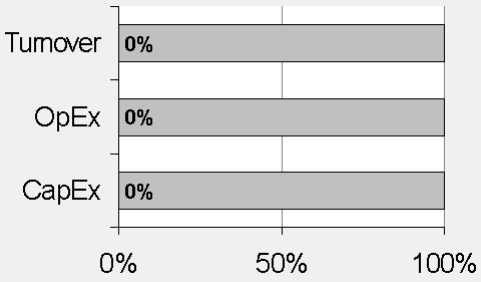
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.24% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.24% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Developed Markets Eurozone Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets in the European Economic and Monetary Union, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Developed Markets Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies across global developed markets which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Were assigned an ISS ESG rating of D– or below; and
• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The

decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did the sustainability indicators perform?

Xtrackers World Net Zero Pathway Paris Aligned UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.38 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.24 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 28.13% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

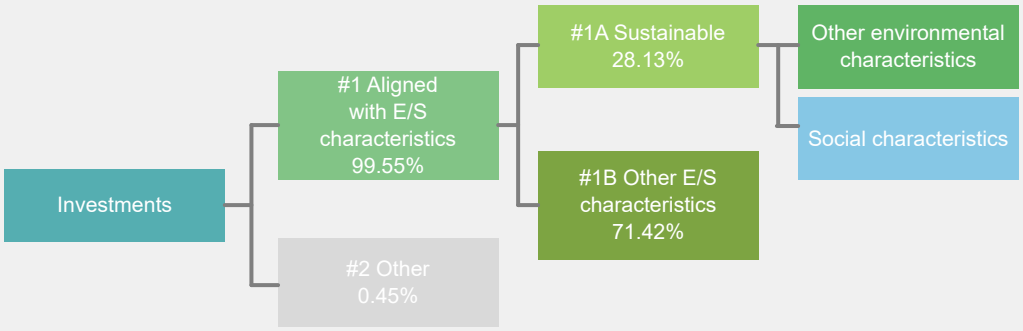
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.55% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.13% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.45% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers World Net Zero Pathway Paris Aligned UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.2 %
B	Mining and quarrying	0.7 %
C	Manufacturing	31.6 %
D	Electricity, gas, steam and air conditioning supply	0.9 %
E	Water supply; sewerage; waste managment and remediation activities	0.5 %
F	Construction	0.8 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	12.4 %
H	Transporting and storage	1.6 %
I	Accommodation and food service activities	0.9 %
J	Information and communication	18.7 %
K	Financial and insurance activities	16.2 %
L	Real estate activities	2.3 %
M	Professional, scientific and technical activities	8.5 %
N	Administrative and support service activities	0.9 %
Q	Human health and social work activities	0.5 %
R	Arts, entertainment and recreation	0.4 %
S	Other services activities	0.1 %
NA	Other	3.1 %
Exposure to companies active in the fossil fuel sector*		**2.3 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

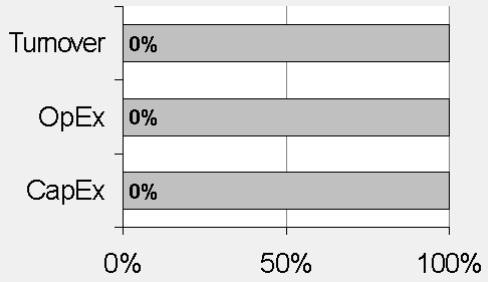
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

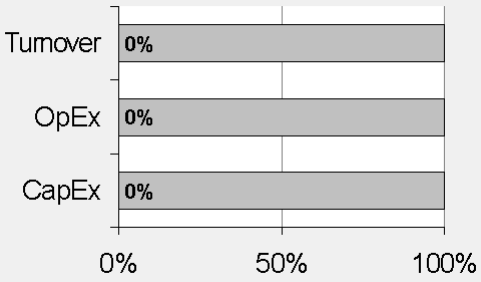
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.13% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.13% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Developed Markets Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:
• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers EUR High Yield Corporate Bond SRI PAB UCITS ETF

Legal entity identifier: 254900JCYVIMXES6K908

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.89 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI Euro High Yield Sustainable and SRI PAB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted the environmental characteristics of: a reduction in GHG emissions, a reduction in fossil fuel extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences.

In order to promote these characteristics, the financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. The Reference Index was designed to reflect the performance of high yield, Euro denominated corporate bonds that met specific maturity, credit quality, liquidity, and environmental, social and governance (“ESG”) criteria.

The Reference Index applied the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Bloomberg Euro High Yield 250mn Index (the “Parent Index”), followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG criteria, including those laid out in Article 12(1)(a) to (g) of the PAB regulation (“PAB Exclusions”).

In particular, the following bonds were excluded from the Reference Index due to the following ESG considerations:

• Issuers where MSCI did not have reported or estimated absolute GHG emissions data.
• Bonds issued by issuers rated BB or below or that did not have a MSCI ESG rating by MSCI ESG Research LLC. MSCI ESG Ratings were designed to help identify the ESG risks and opportunities of investments. Companies were rated on a 7-point ‘AAA’ to ‘CCC’ scale according to their exposure to industry-specific ESG risks and their ability to manage those risks relative to peers.
• Issuers with a “red” MSCI ESG Controversies score or issuers which breached a MSCI Environmental Controversy score. MSCI ESG Controversies measured a company’s involvement in notable ESG controversies related to the company’s operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. Each ESG Controversy was attributed a 0-10 score and a flag colour depending on the severity of its ESG impact.
• Issuers that were classified by MSCI in their MSCI ESG Business Involvement Screening Research ("BISR") as having any involvement (as determined by MSCI ESG Research LLC) in controversial weapons or with any fossil fuel reserves, as well as issuers breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil & gas, nuclear power and weapons, and thermal coal. BISR aimed to enable institutional investors to manage ESG standards and restrictions.

The MSCI ESG Ratings, MSCI ESG Controversies scores and BISR were sourced from MSCI ESG Research LLC.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the “Relevant Threshold”) were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

How did the sustainability indicators perform?

Xtrackers EUR High Yield Corporate Bond SRI PAB UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	3.69 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	3.69 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	3.69 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	3.58 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 34.89% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non-renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG emissions (Scope 1, 2, 3 and total) (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non-renewable energy consumption and production (no. 5);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

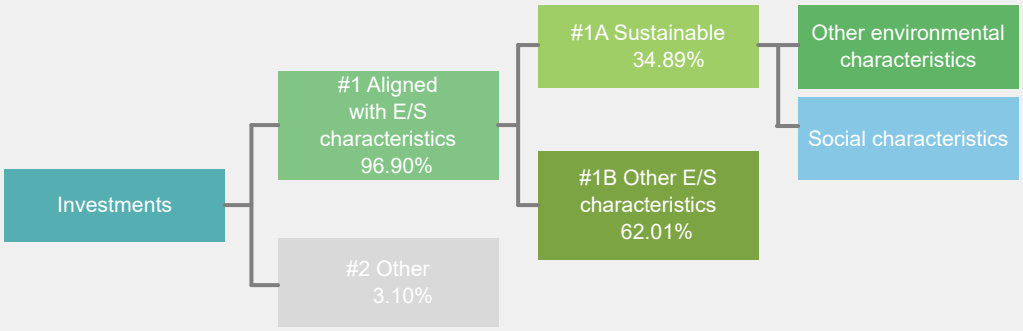
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 96.90% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 34.89% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

3.10% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**0.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

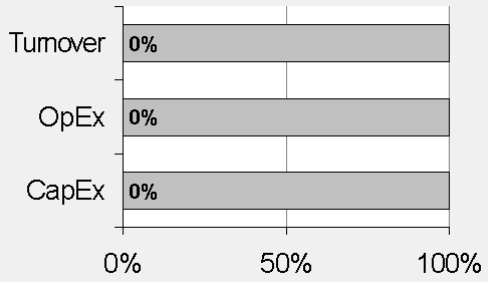
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

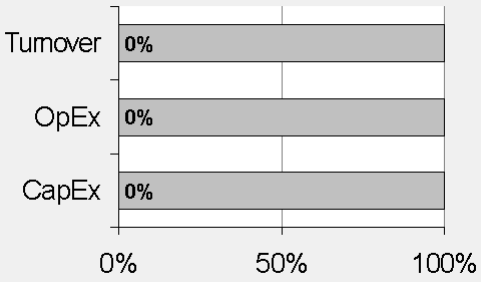
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 34.89% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 34.89% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other” included secured/unsecured deposits (cash) and shares of other collective investment schemes which pursued a money market strategy as at 31.12.2025. It also included securities which have been recently downgraded by the relevant ESG data provider but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by applying the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index set an initial 50% decarbonisation of absolute greenhouse gas (“GHG”) emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index excluded bonds which did not fulfil specific ESG (environmental, social, and governance) criteria. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of fixed income securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI Euro High Yield Sustainable and SRI PAB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index representing the performance of high yield, Euro denominated corporate bonds by applying the minimum standards laid out for EU PAB in the PAB Regulation. The Reference Index will set an initial 50% decarbonisation of absolute greenhouse gas ("GHG") emissions relative to the Parent Index, followed by an annual 7% decarbonisation trajectory of absolute GHG emissions. In addition, the Reference Index will exclude bonds which do not fulfil specific ESG criteria, including those laid out in Article 12(1)(a) to (g) of the PAB regulation ("PAB Exclusions").

In particular, the following bonds will be excluded from the Reference Index due to the following ESG considerations:

• Issuers where MSCI does not have reported or estimated absolute GHG emissions data.
• Bonds issued by issuers rated BB or below or that do not have a MSCI ESG rating by MSCI ESG Research LLC. MSCI ESG Ratings are designed to help identify the ESG risks and opportunities of investments. Companies are rated on a 7-point 'AAA' to 'CCC' scale according to their exposure to industry-specific ESG risks and their ability to manage those risks relative to peers.
• Issuers with a "red" MSCI ESG Controversies score or issuers which breach a MSCI Environmental Controversy score. MSCI ESG Controversies measure a company's involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. Each ESG Controversy is attributed a 0-10 score and a flag colour depending on the severity of its ESG impact.
• Issuers that are classified by MSCI in their MSCI ESG Business Involvement Screening Research ("BISR") as having any involvement (as determined by MSCI ESG Research LLC) in controversial weapons or with any fossil fuel reserves, as well as issuers breaching certain revenue thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, civilian firearms, oil

The MSCI ESG Ratings, MSCI ESG Controversies scores and BISR are sourced from MSCI ESG Research LLC.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers USD High Yield Corporate Bond Screened UCITS ETF

Legal entity identifier: 254900AN6N7D4N3AT454

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.64 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Bloomberg MSCI US High Yield Sustainable and SRI Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of securities that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets. The Reference Index was designed to reflect the performance of high yield, USD denominated corporate bonds that met specific maturity, credit quality, liquidity, and environmental, social and governance (“ESG”) criteria.

The Reference Index excluded bonds which did not fulfil specific ESG criteria. In particular, bonds were excluded from the Reference Index due to the following ESG considerations:

• Bonds rated below BB by MSCI ESG Research. MSCI ESG Ratings are designed to help identify the ESG risks and opportunities of investments. Companies were rated on a 7–point ‘AAA’ to ‘CCC’ scale according to their exposure to industry–specific ESG risks and their ability to manage those risks relative to peers.
• Issuers with a “red” MSCI ESG Controversies score (less than 1). MSCI ESG Controversies scores measures a company’s involvement in notable ESG controversies related to the company’s operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. Each Controversy was attributed a 0–10 score and a flag colour depending on the severity of its ESG impact.
• Issuers that were classified by MSCI in their MSCI ESG Business Involvement Screening Research ("BISR") as breaching certain thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, nuclear power, civilian firearms, military weapons, and energy production from thermal coal, nuclear power or natural gas based power generation. BISR aims to enable institutional investors to manage ESG standards and restrictions.
• Issuers with any involvement in controversial weapons, nuclear weapons, or with any fossil fuel reserves.

The MSCI ESG Ratings, MSCI ESG Controversies scores and BISR were sourced from MSCI ESG Research LLC.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the “Relevant Threshold”) were excluded, the remaining issuers were ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking were excluded from the Reference Index, until the number of excluded issuers was higher than the Relevant Threshold.

Issuers with an MSCI ESG Rating of BBB or higher were weighted in the Reference Index at 100% weight by market value while the weight of bonds from issuers with an MSCI ESG Rating of BB were weighted in the Reference Index at a 50% weight by market value.

How did the sustainability indicators perform?

Xtrackers USD High Yield Corporate Bond Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	3.69 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	3.69 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	3.69 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	3.58 Market weight (%)

Controversial Weapons Involvement	3.40	4.24	0.50	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 19.64% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

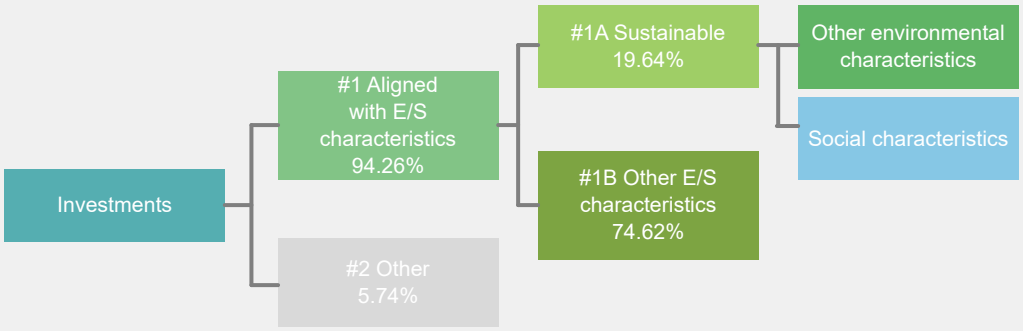
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 94.26% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 19.64% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

5.74% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**6.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

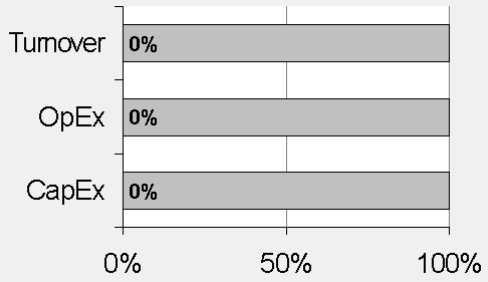
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

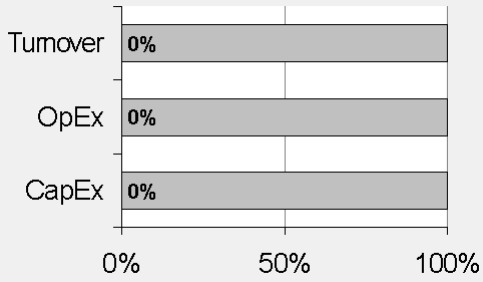
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.64% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.64% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to track, before fees and expenses, the performance of the Reference Index by holding a portfolio that comprised all or a representation of the securities comprised in the Reference Index or unrelated transferable securities. Any unrelated transferable securities held by the financial product were typically similar to the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Bloomberg MSCI US High Yield Sustainable and SRI Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index representing the performance of high yield, USD denominated corporate bonds by excluding bonds which do not fulfil specific ESG criteria. In particular, bonds will be excluded from the Reference Index due to the following ESG considerations:

• Bonds rated below BB by MSCI ESG Research. MSCI ESG Ratings are designed to help identify the ESG risks and opportunities of investments. Companies are rated on a 7–point 'AAA' to 'CCC' scale according to their exposure to industry–specific ESG risks and their ability to manage those risks relative to peers.
• Issuers with a "red" MSCI ESG Controversies score (less than 1). MSCI ESG Controversies scores measures a company's involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. Each Controversy is attributed a 0–10 score and a flag colour depending on the severity of its ESG impact.
• Issuers that are classified by MSCI in their MSCI ESG Business Involvement Screening Research ("BISR") as breaching certain thresholds in controversial activities, including, but not limited to, alcohol, tobacco, gambling, adult entertainment, genetically modified organisms, nuclear power, civilian firearms, military weapons, and energy production from thermal coal, nuclear power or natural gas based power generation. BISR aims to enable institutional investors to manage ESG standards and restrictions.
• Issuers with any involvement in controversial weapons, nuclear weapons, or with any fossil fuel reserves.

The MSCI ESG Ratings, MSCI ESG Controversies scores and BISR are sourced from MSCI ESG Research LLC.

If having applied the above ESG exclusion criteria, less than 20% of the total number of issuers in the universe of eligible bonds (the "Relevant Threshold") are excluded, the remaining issuers are ranked according to MSCI ESG Ratings score and MSCI ESG Controversies score and those with the lowest ranking will be excluded from the Reference Index, until the number of excluded issuers is higher than the Relevant Threshold.

Issuers with an MSCI ESG Rating of BBB or higher will be weighted in the Reference Index at 100% weight by market value while the weight of bonds from issuers with an MSCI ESG Rating of BB will be weighted in the Reference Index at a 50% weight by market value.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Fintech Innovation UCITS ETF

Legal entity identifier: 2549001B8QLCJ3D9JZ85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.19 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI Fintech Innovation Select Screened 100 Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI ACWI IMI Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following three components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

How did the sustainability indicators perform?

Xtrackers MSCI Fintech Innovation UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	1.85 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	1.85 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.85 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	1.85 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 7.19% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Fintech Innovation UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country

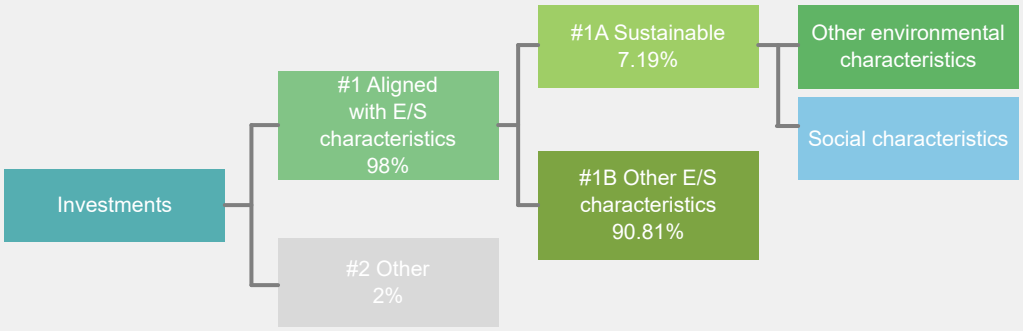
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 98% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics).
Within this category, 7.19% of the financial product’s assets qualified as sustainable investments (#1A Sustainable).

2% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Fintech Innovation UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	12.8 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	10.5 %
J	Information and communication	25.3 %
K	Financial and insurance activities	29.3 %
M	Professional, scientific and technical activities	8.4 %
N	Administrative and support service activities	1.6 %
NA	Other	12.1 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

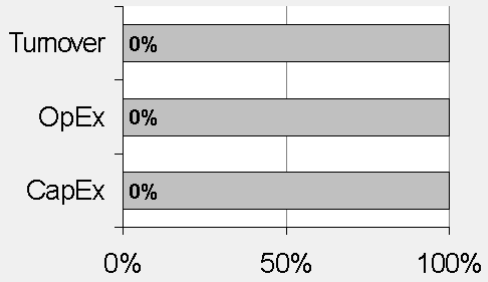
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

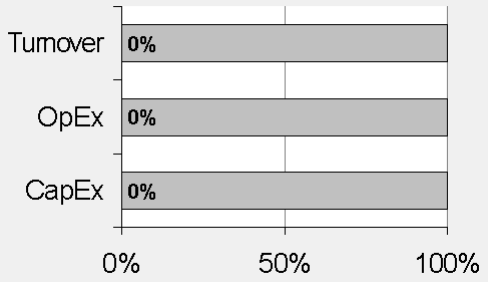
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 7.19% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 7.19% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI Fintech Innovation Select Screened 100 Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which includes large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index applies, among other thematic selection criteria, an ESG screening approach where all of the companies from the Parent Index which breach the following ESG standards, are excluded:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Genomic Healthcare Innovation UCITS ETF

Legal entity identifier: 254900YDA32R6YR7LG05

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 90.27 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI Genomic Innovation Select Screened 100 Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI ACWI IMI Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following three components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 90.27% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

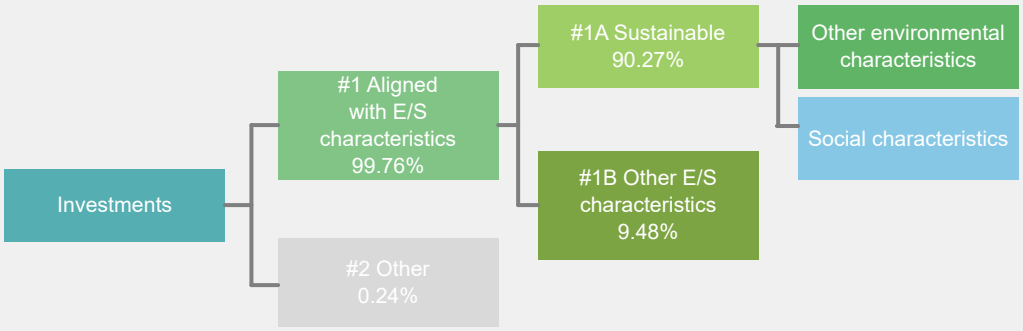
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.76% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 90.27% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.24% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Genomic Healthcare Innovation UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	49.4 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.5 %
K	Financial and insurance activities	2.2 %
M	Professional, scientific and technical activities	38.8 %

NA	Other	5.6 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

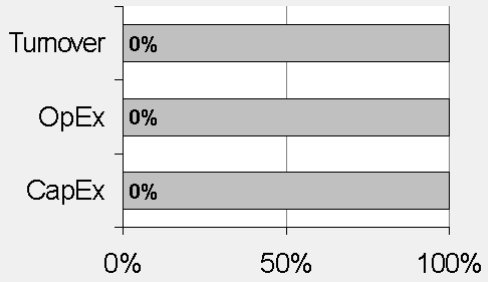
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

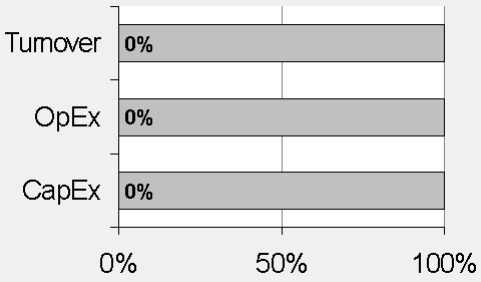
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 90.27% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 90.27% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI Genomic Innovation Select Screened 100 Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which includes large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index applies, among other thematic selection criteria, an ESG screening approach where all of the companies from the Parent Index which breach the following ESG standards, are excluded:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons

• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction

• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Innovation UCITS ETF

Legal entity identifier: 2549002978IBTMB2PC64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.33 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI Innovation Select Screened 200 Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI ACWI IMI Index (the "Parent Index") that met certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following three components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

How did the sustainability indicators perform?

Xtrackers MSCI Innovation UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.94 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.94 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.94 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.94 Market weight (%)

Tobacco involvement	0.06	0.00	0.17	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 39.33% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

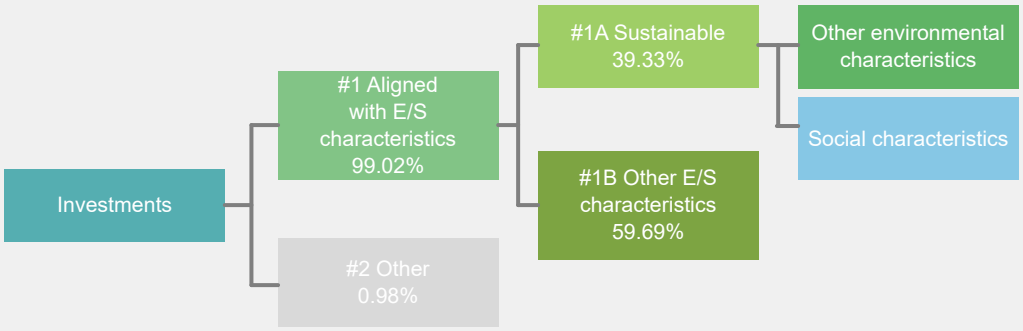
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.02% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 39.33% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.98% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Innovation UCITS ETF

Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

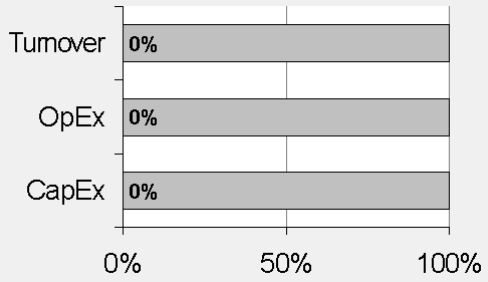
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

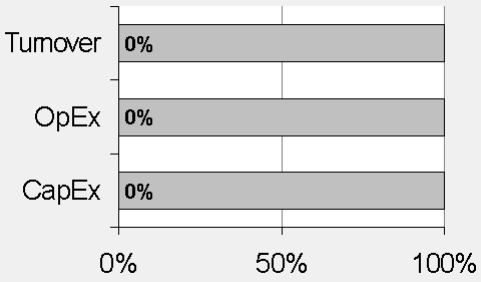
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 39.33% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 39.33% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI Innovation Select Screened 200 Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which includes large, medium, and small–capitalisation companies across developed and emerging markets globally that derive significant revenues from technological innovation. The Reference Index applies an ESG screening approach where all of the companies from the Parent Index which breach the following ESG standards, are excluded:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons

• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction

• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Next Generation Internet Innovation UCITS ETF

Legal entity identifier: 25490053VF2NBGMAJC18

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.95% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI Next Generation Internet Innovation Select Screened 100 Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index selected companies from the MSCI ACWI IMI Index (the "Parent Index") that met, among other thematic selection criteria, certain minimum Environmental, Social and Governance ("ESG") standards, by excluding companies from the Parent Index which did not fulfil the following specific ESG criteria:

• Were unrated by MSCI ESG Research
• Were assigned an MSCI ESG Rating of CCC
• Had any involvement in controversial weapons
• Were classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Had an MSCI ESG Controversies Score of 0 and/or failed to comply with the United Nations Global Compact principles
The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following three components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions.

How did the sustainability indicators perform?

Xtrackers MSCI Next Generation Internet Innovation UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.43 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.43 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.43 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.43 Market weight (%)

Tobacco involvement	0.27	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 17.95% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

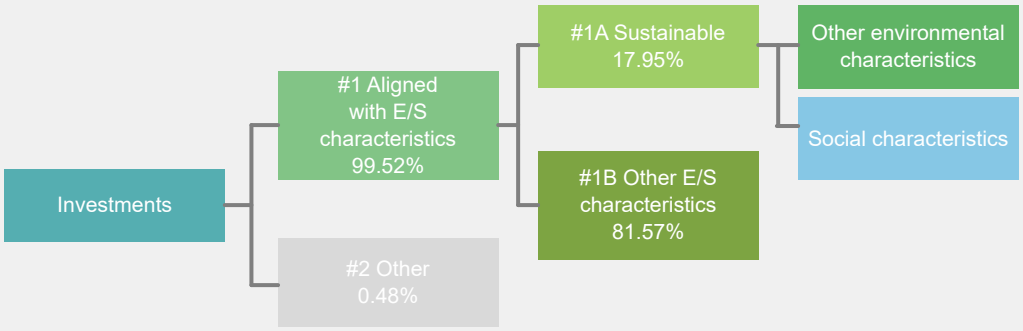
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.52% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 17.95% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.48% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Next Generation Internet Innovation UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	30.5 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	9.9 %
J	Information and communication	37.1 %
K	Financial and insurance activities	12.4 %
L	Real estate activities	0.3 %
M	Professional, scientific and technical activities	3.7 %
NA	Other	5.9 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

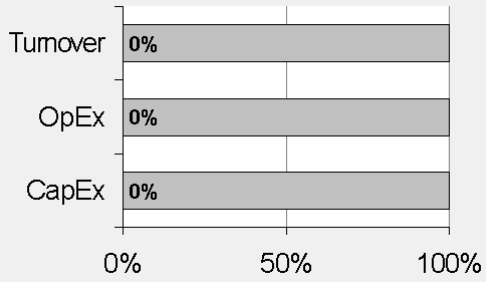
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

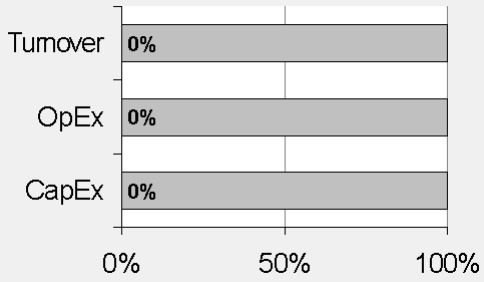
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.95% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.95% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Where the financial product entered into securities lending transactions during the period, if any, the collateral received in relation to such transactions complied with ESG standards as determined by the relevant investment manager, sub-portfolio manager and/or securities lending agent. Equity collateral conforming to such ESG standards were identified by reference to an appropriate ESG index and incorporated as a minimum ESG screens substantially similar to those of the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI Next Generation Internet Innovation Select Screened 100 Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which includes large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index applies, among other thematic selection criteria, an ESG screening approach where all of the companies from the Parent Index which breach the following ESG standards, are excluded:

• Are unrated by MSCI ESG Research
• Are assigned an MSCI ESG Rating of CCC
• Have any involvement in controversial weapons
• Are classified by MSCI in their ESG Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, and oil sands extraction
• Have an MSCI ESG Controversies Score of 0 and/or fail to comply with the United Nations Global Compact principles.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Developed Markets Europe Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in developed markets in Europe which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Europe Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Were assigned an ISS ESG rating of D– or below; and
• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards;

and

• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The

decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did the sustainability indicators perform?

Xtrackers Europe Net Zero Pathway Paris Aligned UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	9.26 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.44 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.44 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	534.98 tCO2e / million EUR

…and compared to previous periods?

Exposure to Worst-in-Class Issuers	0.52	0.50	0.72	Market weight (%)
Greenhouse Gas Intensity	569.16	628.91	681.65	tCO2e / million EUR
Exposure to Fossil Fuels	4.12	1.51	1.14	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 30.65% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and

Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

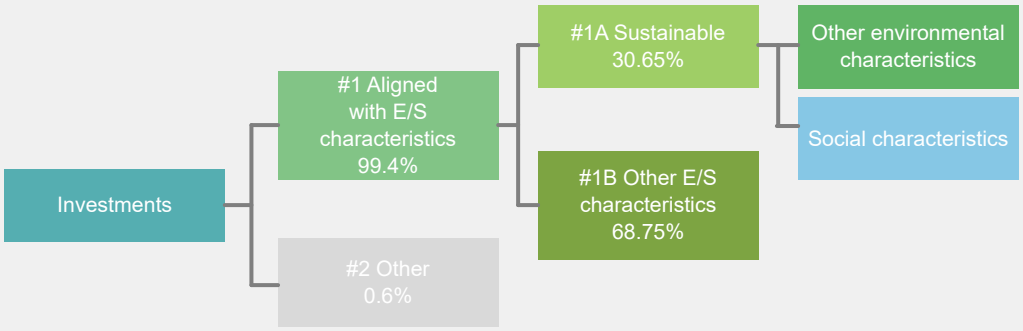
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.4% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 30.65% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.6% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Europe Net Zero Pathway Paris Aligned UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.6 %

Exposure to companies active in the fossil fuel sector*		**0.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

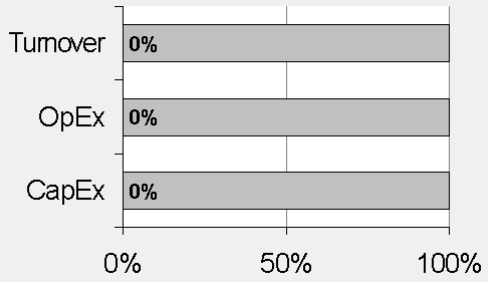
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

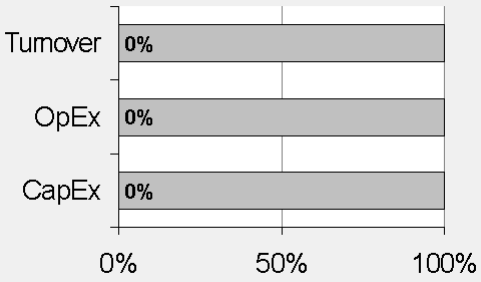
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 30.65% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 30.65% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Developed Markets Europe Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in developed markets in Europe, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers Japan Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900D5JGXF6U1L9Z45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.25 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Japan Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in Japan which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Japan Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;

• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;

• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;

• Fossil fuel production, servicing, exploration, distribution, or power generation;

• Oil sands production;

• Civilian firearms distribution;

• Tobacco related products; and

• Military weapons;

• Were assigned an ISS ESG rating of D– or below; and

• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference

Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 28.25% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

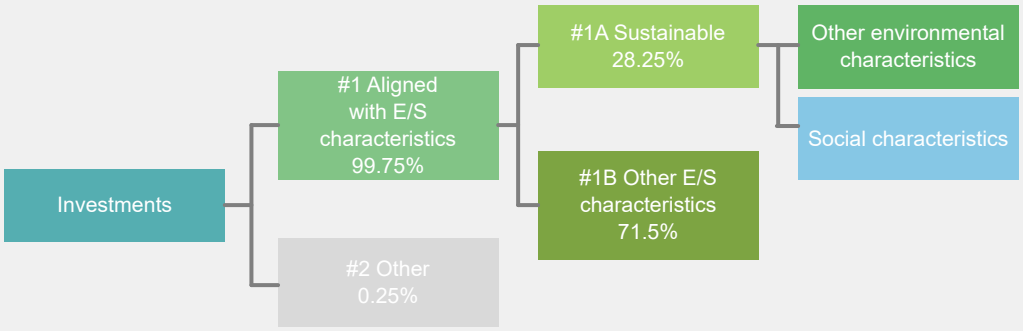
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.75% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.25% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.25% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Japan Net Zero Pathway Paris Aligned UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume

Exposure to companies active in the fossil fuel sector*		**3.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

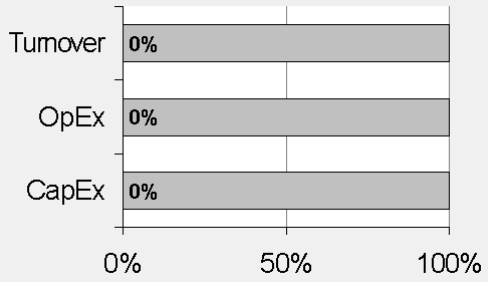
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

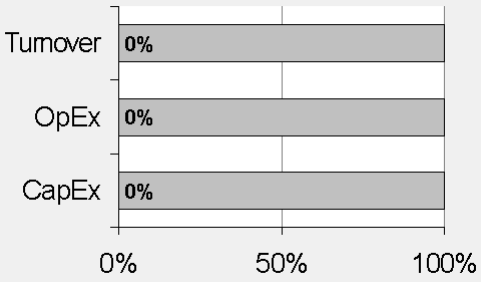
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.25% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.25% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Japan Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in Japan, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG United States Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in the USA which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS United States Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Were assigned an ISS ESG rating of D– or below; and
• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The

decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did the sustainability indicators perform?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 29.48% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

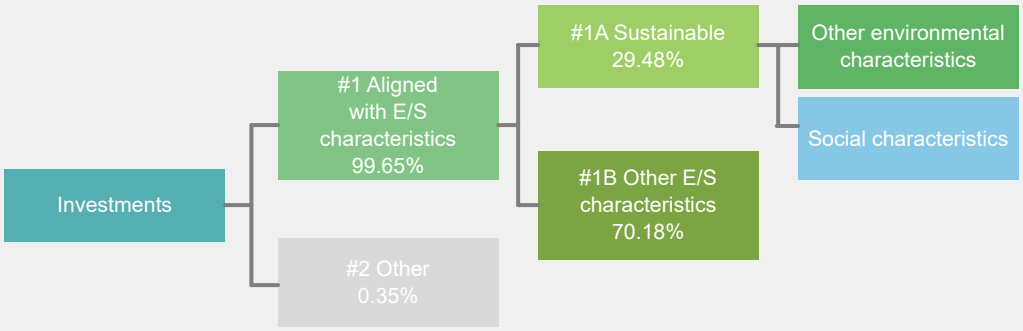
The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.65% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 29.48% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.35% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Exposure to companies active in the fossil fuel sector*		**2.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

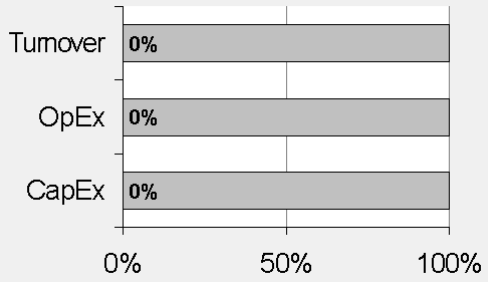
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

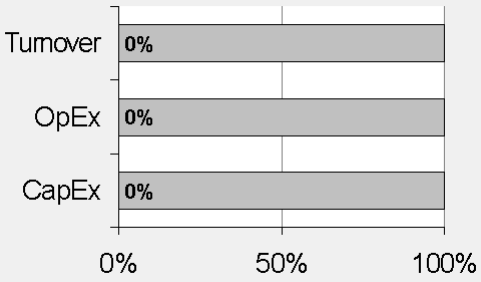
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.48% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.48% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG United States Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies in the USA, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Emerging Markets Net Zero Pathway Paris Aligned UCITS ETF

Sustainability indicators measure how the environmental or social characteristics promoted by the

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Emerging Markets Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies across global emerging markets which were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Emerging Markets Large & Mid Cap Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilised ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Were assigned an ISS ESG rating of D– or below; and
• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;

• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The

decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did the sustainability indicators perform?

Xtrackers Emerging Markets Net Zero Pathway Paris Aligned UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.85 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	2.24 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	4.89 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 21.46% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Emerging Markets Net Zero Pathway Paris Aligned UCITS ETF

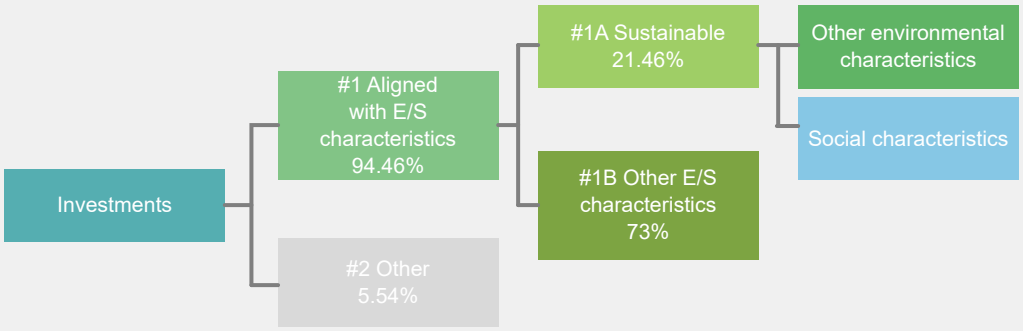
The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 94.46% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 21.46% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

5.54% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Emerging Markets Net Zero Pathway Paris Aligned UCITS ETF

Exposure to companies active in the fossil fuel sector*		**3.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

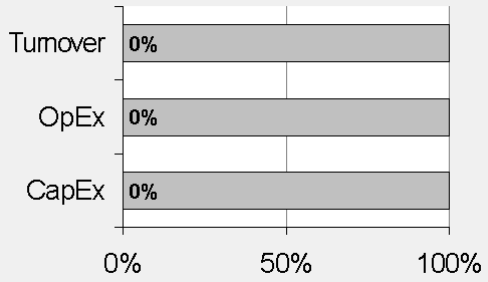
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

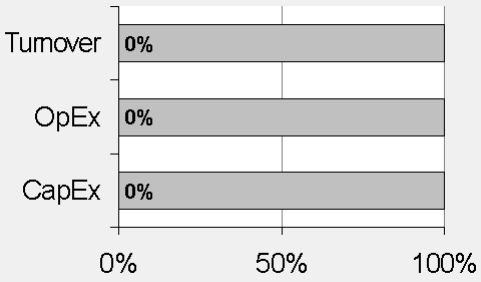
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 21.46% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 21.46% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Emerging Markets Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global emerging markets, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping of up to 5%, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers S&P 500 Scored & Screened UCITS ETF

Legal entity identifier: 2549005KB8JP85LZK139

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.23 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the S&P 500 Scored & Screened Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large–capitalisation companies representing all major US industries and which met certain environmental, social and governance ("ESG") criteria.

The Reference Index excluded companies from the S&P 500 Index (the "Parent Index") which did not fulfil specific ESG criteria, including but not limited to:

• That did not have an S&P Global ESG Score, or with an S&PGlobal ESG Score that fell within the worst 25% of ESG scores from each GICS Industry Group, as calculated by S&P Global Sustainable1 ("Sustainable1") using a company's 'Corporate Sustainability Assessment' ("CSA)" which was derived using either company–provided data, publicly available information, or a combination thereof;
• Were classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Had a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that did not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index used company ratings and research provided by Sustainable1, a business division of S&P Global which specialised in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provided research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provided an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aimed to enable investors to align investment values withinvestment strategy by providing detailed assessments of common areas of concern pinpointing thelevel of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supported investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage were ineligible for index inclusion until they received such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index used RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents were excluded, for each GICS® Industry Group, companies were selected in decreasing order of S&P DJI ESG Score until 65% of the Parent Index's cumulative float–adjusted market capitalization ("FMC") was reached. Then for each GICS® Industry Group, existingconstituents ranked between 65% and 85% of a GICS® Industry Group's cumulative FMC were selected to get as close as possible to the target 75% of FMC. If the combined FMC of selected companies was not above the 75% FMC target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 75% FMC target. This process ended when the addition of the next eligible company would result in the total FMC of the relevant GICS® Industry Group moving further away from the 75% FMC target.

How did the sustainability indicators perform?

Xtrackers S&P 500 Scored & Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.13 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.13 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.13 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.13 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 28.23% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers S&P 500 Scored & Screened UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
NVIDIA Corp.	C - Manufacturing	10.3 %	United States
Apple	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	9.8 %	United States

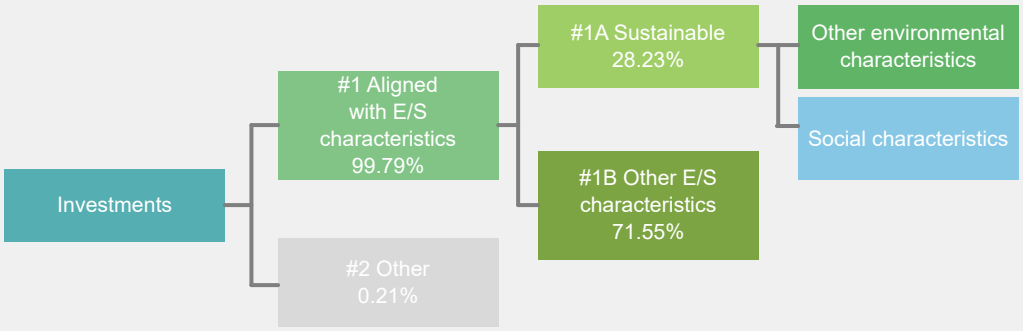
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.79% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.23% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.21% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers S&P 500 Scored & Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	1.0 %

Exposure to companies active in the fossil fuel sector*		**8.4 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

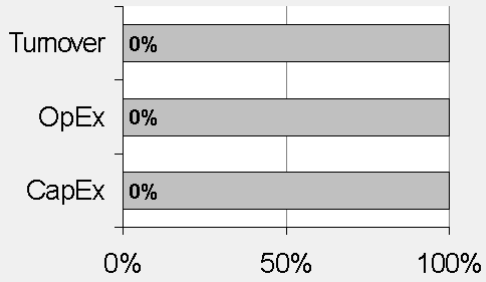
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

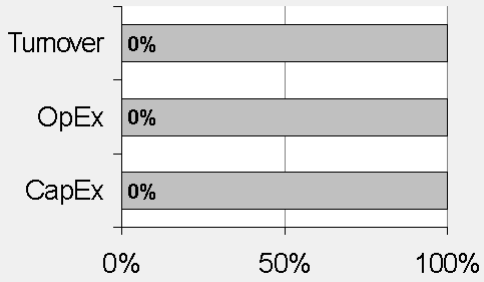
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.23% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.23% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the S&P 500 Scored & Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of circa 500 large–cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's CSA which is derived using either company–provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P DJI ESG Score until 65% of the Parent Index's cumulative float–adjusted market capitalization ("FMC") is reached. Then for each GICS® Industry Group, existing constituents ranked between 65% and 85% of a GICS® Industry Group's cumulative FMC are selected to get as close as possible to the target 75% of FMC. If the combined FMC of selected companies is not above the 75% FMC target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 75% FMC target. This process ends when the addition of the next eligible company would result in the total FMC of the relevant GICS® Industry Group moving further away from the 75% FMC target.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF

Legal entity identifier: 254900GFCY04N1RL0519

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.86 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the S&P 500 Equal Weight Scored & Screened Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the equal weighted performance of the shares of large–capitalisation companies representing all major US industries and which met certain environmental, social and governance (“ESG”) criteria.

The Reference Index excluded companies from the S&P 500 Equal Weight Index (the “Parent Index”) which did not fulfil specific ESG criteria, including but not limited to:

• That did not have an S&P Global ESG Score, or with an S&PGlobal ESG Score that fell within the worst 25% of ESG scores from each GICS Industry Group, as calculated by S&P Global Sustainable1 ("Sustainable1") using a company’s ‘Corporate Sustainability Assessment’ ("CSA") which was derived using either company–provided data, publicly available information, or a combination thereof;
• Were classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Had a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that did not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index used company ratings and research provided by Sustainable1, a business division of S&P Global which specialised in providing in-depth sustainability intelligence. In particular, the following two components were utilised:

S&P Global ESG Scores

S&P Global ESG Scores provided research and ratings measuring a company’s performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provided an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aimed to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supported investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage were ineligible for index inclusion until they received such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index used RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents were excluded, for each GICS® Industry Group, companies were selected in decreasing order of S&P DJI ESG Score until 50% of the Parent Index’s constituent count within the industry group was reached. Then for each GICS® Industry Group, existing constituents ranked between 50% and 70% of a GICS® Industry Group’s constituent count were selected to get as close as possible to the target 60% of FMC. If the number of selected companies was not above the 60% count target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 60% count target. This process ended when the addition of the next eligible company would result in the total constituent count of the relevant GICS® Industry Group moving further away from the 60% count target.

How did the sustainability indicators perform?

Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.45 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.45 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.45 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.39 Market weight (%)

Controversial Weapons Involvement	0.73	0.37	0.99	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 21.86% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

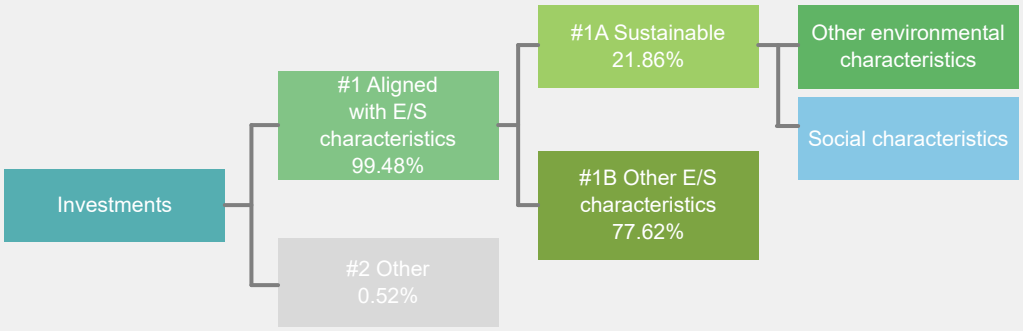
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.48% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 21.86% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.52% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers S&P 500 Equal Weight Scored & Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	2.2 %

Exposure to companies active in the fossil fuel sector*		**11.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

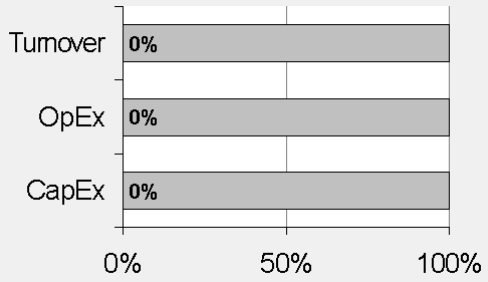
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

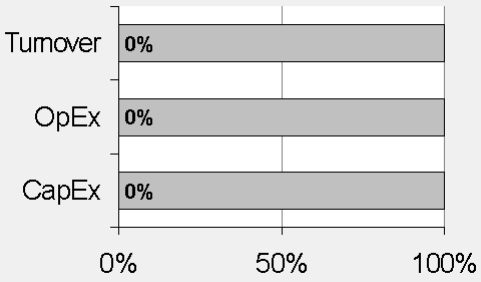
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 21.86% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 21.86% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the S&P 500 Equal Weight Scored & Screened Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is an equal weighted index reflecting the performance of large–cap common stocks of publicly held companies actively traded on regulated US equities' exchanges.

The Reference Index excludes companies from the Parent Index (as defined below) which do not fulfil specific ESG criteria, including but not limited to:

• That do not have an S&P Global ESG Score, or with an S&P Global ESG Score that falls within the worst 25% of ESG scores from each GICS Industry Group, as calculated by Sustainable1 using a company's CSA which is derived using either company–provided data, publicly available information, or a combination thereof;
• Are classified by S&P Global Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or
• Have a disqualifying United Nations Global Compact (UNGC) score (i.e. companies that do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by Sustainalytics).

The Reference Index uses company ratings and research provided by Sustainable1, a business division of S&P Global which specialises in providing in-depth sustainability intelligence. In particular, the following two components are utilised:

S&P Global ESG Scores

S&P Global ESG Scores provide research and ratings measuring a company's performance on and management of environmental, social and governance risks and opportunities. S&P Global ESG Scores provide an overall company ESG rating. For more details on S&P Global ESG Scores, please refer to: Sustainable1 Solutions: ESG Scores | S&P Global (spglobal.com)

S&P Global Business Involvement Screens

S&P Global Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to: Sustainable1 Solutions: Business Involvement Screens | S&P Global (spglobal.com)

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

In addition, the Reference Index uses RepRisk, a leading data science company, for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Once constituents have been excluded, for each GICS® Industry Group, companies are selected in decreasing order of S&P DJI ESG Score until 50% of the Parent Index's constituent count within the Industry group is reached. Then for each GICS® Industry Group, existing constituents ranked between 50% and 70% of a GICS® Industry Group's constituent count are selected to get as close as possible to the target 60% of the Parent Index's constituent count. If the number of selected companies is not above the 60% count target, companies not already selected from the eligible universe may be added, in decreasing order by S&P Global ESG Score, to get as close as possible to the 60% count target. This process ends when the addition of the next eligible company would result in the total constituent count of the relevant GICS® Industry Group moving further away from the 60% count target.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

Legal entity identifier: 2549001F2P63VH5GSB64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.11 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 9 Industry, Innovation and Infrastructure Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to Sustainable Development Goal 9 (“SDG 9”) of the United Nations 2030 Agenda for Sustainable Development (“UN 2030 Agenda”), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals (“SDGs”) contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of ‘B’ and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions’ SDG Alignment as ‘Misaligned’ or ‘Strongly Misaligned’ on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI’s ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions’ SDG Alignment

MSCI Impact Solutions’ SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies’ operations, products and services, policies,

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aimed to contribute positively to SDG 9. Companies that met a certain revenue threshold from business activities associated with SDG 9 were selected ("SDG 9 Aligned Business Activities"). Such SDG 9 Aligned Business Activities included, but were not limited to:

• Alternative energy;
• Pollution prevention;
• Clean transport infrastructure;

• Industrial automation;
• Demand–side management;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "Thematic Parent Index"). Constituents' exposure to the theme of robots and automation (the "Theme"), which included (but was not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non–industrial robots, and autonomous robots, was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data was then analysed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must have met a certain relevance score threshold. Constituents that did not have any revenue that contributed to SDG 9 were excluded.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 75%; and
• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	1.03 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.03 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	1.03 Market weight (%)
SDG 9 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 9, based on companies' revenues from clean and efficient technologies and enabling activities such as SME financing and connectivity, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	7.99

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 67.11% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Central Japan Railway Co.	H - Transporting and storage	4.7 %	Japan
East Japan Railway Co.	H - Transporting and storage	4.6 %	Japan
Alstom	M - Professional, scientific and technical activities	4.6 %	France

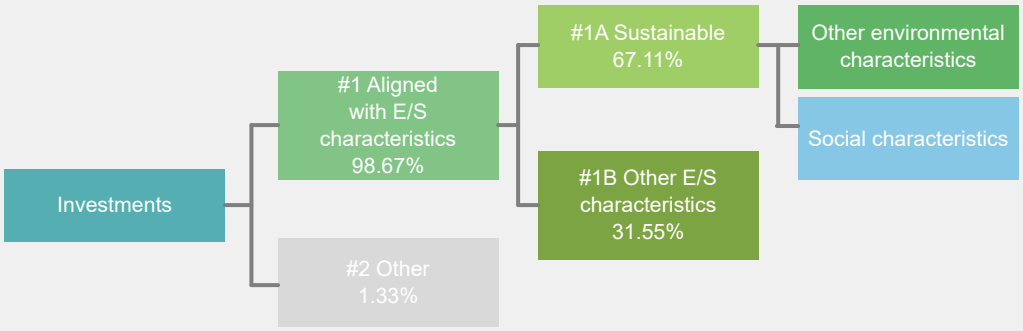
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 98.67% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 67.11% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.33% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global SDG 9 Industry, Innovation & Infrastructure UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	44.3 %
D	Electricity, gas, steam and air conditioning supply	19.7 %
E	Water supply; sewerage; waste managment and remediation activities	1.0 %
F	Construction	1.9 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.9 %
H	Transporting and storage	12.2 %
K	Financial and insurance activities	0.8 %
M	Professional, scientific and technical activities	11.4 %
S	Other services activities	0.4 %
NA	Other	7.4 %
Exposure to companies active in the fossil fuel sector*		**4.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

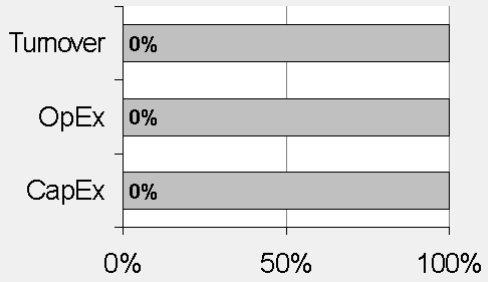
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

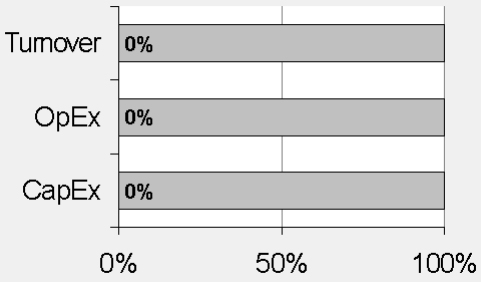
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 67.11% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 67.11% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applied SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 9 Industry, Innovation and Infrastructure Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 9 (build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 9 ("SDG 9") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 9. Companies that meet a certain revenue threshold from business activities associated with SDG 9 are selected ("SDG 9 Aligned Business Activities"). Such SDG 9 Aligned Business Activities may include, but are not limited to:

• Alternative energy;
• Pollution prevention;
• Clean transport infrastructure;
• Industrial automation;
• Demand–side management;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI Robotics Index (the "Thematic Parent Index"). Constituents' exposure to the theme of robots and automation (the "Theme"), which includes (but is not limited to) the development of new products and services focused on robots, artificial intelligence, industrial robots, automation, non–industrial robots, and autonomous robots, is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 9 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 9 and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 11 Sustainable Cities and Communities Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to Sustainable Development Goal 11 (“SDG 11”) of the United Nations 2030 Agenda for Sustainable Development (“UN 2030 Agenda”), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals (“SDGs”) contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of ‘B’ and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions’ SDG Alignment as ‘Misaligned’ or ‘Strongly Misaligned’ on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI’s ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions’ SDG Alignment

MSCI Impact Solutions’ SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aimed to contribute positively to SDG 11. Companies that met a certain revenue threshold ("SDG Revenue") from business activities associated with SDG 11 ("SDG 11 Aligned Business Activities") were included in the selection universe (the "SDG Impact Selection Universe"). SDG 11 Aligned Business Activities included, but were not limited to:

• Pollution prevention;
• Demand–side management;
• Smart grid;
• Clean transport infrastructure;
• LED/CFL lighting;
• Insulation;
• Green building; and
• Affordable real estate.

Constituents in the SDG Impact Selection Universe were assigned to a Global Industry Classification Standard (GICS) sector and were ranked according to their SDG Revenue. A certain threshold of top–ranking constituents from each GICS sector were selected for inclusion. For GICS sectors that had less constituents than the threshold, all securities were selected for inclusion.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the "Thematic Parent Index"). Constituents' exposure to the theme of smart solutions for urban infrastructure (the "Theme"), which included (but was not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data was then analysed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code.

To be eligible for inclusion in the Reference Index, securities must have met a certain relevance score threshold. Constituents that did not have any revenue that contributed to SDG 11 and securities which were mapped to certain GICS sub–industries were excluded.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 75%; and
• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.12 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
SDG 11 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 11, based on companies' revenues from infrastructure including green buildings, clean transport, and affordable real estate, amongst others, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	8.12

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 63.95% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Umicore	C - Manufacturing	4.9 %	Belgium

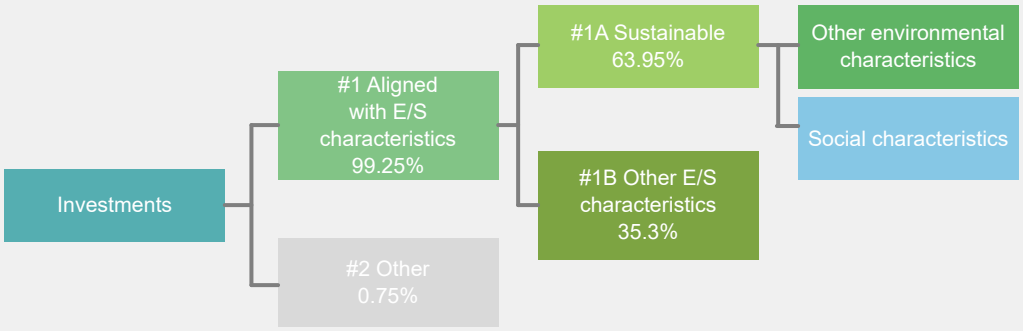
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.25% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 63.95% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.75% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	38.0 %
E	Water supply; sewerage; waste managment and remediation activities	5.9 %
F	Construction	15.5 %
H	Transporting and storage	8.8 %
K	Financial and insurance activities	5.3 %
L	Real estate activities	10.4 %
M	Professional, scientific and technical activities	14.9 %
N	Administrative and support service activities	0.1 %
NA	Other	1.2 %
Exposure to companies active in the fossil fuel sector*		**0.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

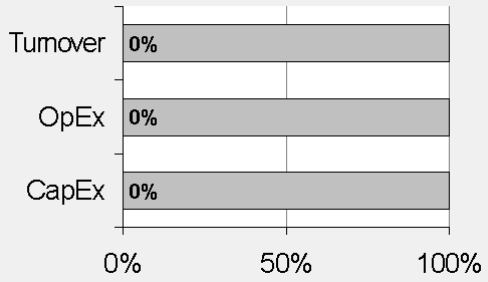
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

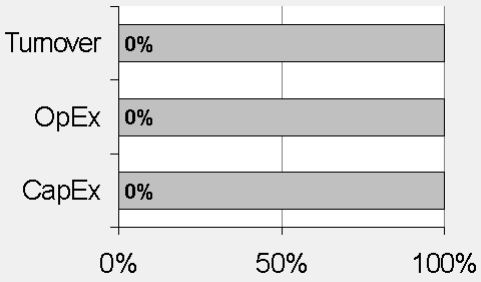
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 63.95% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 63.95% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 11 Sustainable Cities and Communities Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 11 (“SDG 11”) of the United Nations 2030 Agenda for Sustainable Development (“UN 2030 Agenda”), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals (“SDGs”) contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of ‘B’ and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions’ SDG Alignment as ‘Misaligned’ or ‘Strongly Misaligned’ on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI’s ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions’ SDG Alignment

MSCI Impact Solutions’ SDG Alignment aims to provide a holistic view of companies’ net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 11. Companies that meet a certain revenue threshold ("SDG Revenue") from business activities associated with SDG 11 ("SDG 11 Aligned Business Activities") are included in the selection universe (the "SDG Impact Selection Universe"). SDG 11 Aligned Business Activities may include, but are not limited to:

• Pollution prevention;
• Demand–side management;
• Smart grid;
• Clean transport infrastructure;
• LED/CFL lighting;
• Insulation;
• Green building; and
• Affordable real estate.

Constituents in the SDG Impact Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top–ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Smart Cities Index (the "Thematic Parent Index"). Constituents' exposure to the theme of smart solutions for urban infrastructure (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on smart connectivity for internet of things (e.g. nonstandard computing devices that connect wirelessly to a network and have the ability to transmit data), smart infrastructure, smart buildings, smart homes, smart safety and security, smart waste and water management, smart mobility, and smart energy and grids is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 11 and securities which are mapped to certain GICS sub–industries are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 11 and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI Global SDG 11 Sustainable Cities UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Global Circular Economy UCITS ETF

Legal entity identifier: 254900MYTY0UR4AKNH15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.63 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 12 Responsible Consumption and Production Select Index (the "Reference Index") which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the "Parent Index") which were associated with a positive contribution to Sustainable Development Goal 12 ("SDG 12") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of 'B' and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aimed to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aimed to contribute positively to SDG 12. Companies that met a certain revenue threshold from business activities associated with SDG 12 were selected ("SDG 12 Aligned Business Activities"). Such SDG 12 Aligned Business Activities included, but were not limited to:

• Alternative energy;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defined a circular transition universe (the "Circular Transition Universe"). The Circular Transition Universe was constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "Key Issue Management Scores"), in order to identify companies that had better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("AMS") was calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which were not assessed on any relevant key issues or did not have exposure above a certain threshold to any relevant key issues were excluded from the Circular Transition Universe. A sector–relative management score ("SRMS") was then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (GICS) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company did not meet a minimum AMS were excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must have met a certain SRMS threshold.

Constituents that did not have any revenue that contributed to SDG 12 and constituents that did not reach a certain threshold on any of the relevant Key Issue Management Scores were excluded from the eligible universe.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 75%; and
• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted according to their free float–adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global Circular Economy UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.12 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
SDG 12 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 12, based on companies' revenues from products contributing to climate change mitigation and the protection of natural capital, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	6.21

…and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 49.63% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Global Circular Economy UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Taiwan Semiconductor Manufacturing Co.	C - Manufacturing	4.6 %	Taiwan
Schneider Electric	M - Professional, scientific and technical activities	4.5 %	France

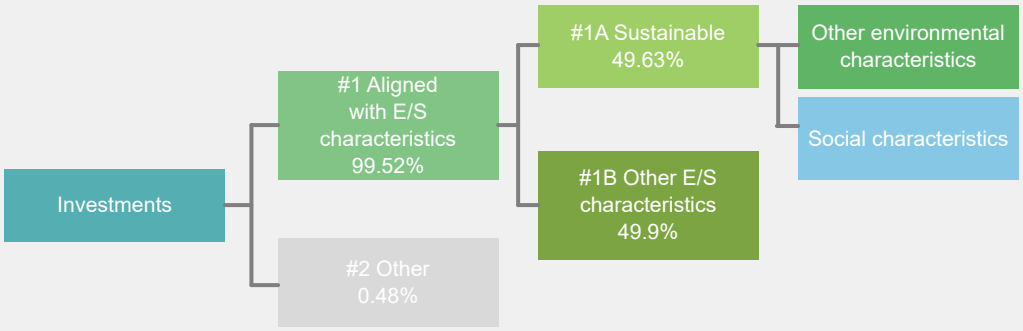
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.52% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 49.63% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.48% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global Circular Economy UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.3 %
C	Manufacturing	52.8 %
D	Electricity, gas, steam and air conditioning supply	3.6 %
E	Water supply; sewerage; waste managment and remediation activities	4.8 %
F	Construction	2.0 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.5 %
H	Transporting and storage	1.9 %
J	Information and communication	3.4 %
K	Financial and insurance activities	3.5 %
L	Real estate activities	8.8 %
M	Professional, scientific and technical activities	9.9 %
NA	Other	7.5 %
Exposure to companies active in the fossil fuel sector*		**3.3 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

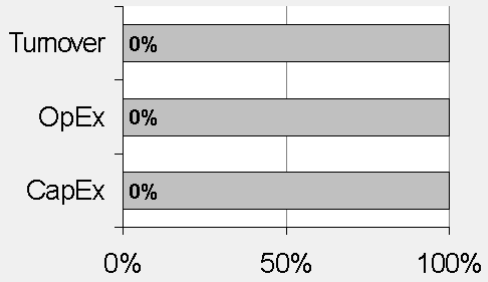
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

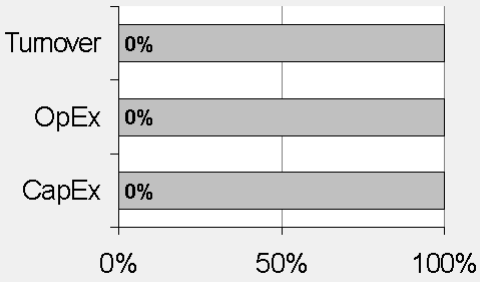
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 49.63% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 49.63% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which do not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 12 Responsible Consumption and Production Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 12 (ensure sustainable consumption and production patterns) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 12 ("SDG 12") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 12. Companies that meet a certain revenue threshold from business activities associated with SDG 12 are selected ("SDG 12 Aligned Business Activities"). Such SDG 12 Aligned Business Activities may include, but are not limited to:

• Alternative energy;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping enable the transition to a circular economy, the Index Administrator defines a circular transition universe (the "Circular Transition Universe"). The Circular Transition Universe is constructed using management scores of the following MSCI ESG Ratings' key issues: water stress, biodiversity & land use, raw material sourcing, toxic emissions & waste, packaging material & waste, and electronic waste (the "Key Issue Management Scores"), in order to identify companies that have better management strategies to protect natural resources and/or address waste issues relative to their sector peers.

An average management score ("AMS") is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the Circular Transition Universe. A sector–relative management score ("SRMS") is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (GICS) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the Circular Transition Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to SDG 12 and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 12 and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%; and
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global SDGs UCITS ETF

Legal entity identifier: 254900H4CT68SNYH4735

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.63 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG Impact Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of 'B' and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products was available on: https://www.msci.com/esg–investing. In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social, and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products, and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR) aimed to enable institutional investors to manage ESG standards and restrictions.*MSCI Impact Solutions SDG Alignment*

MSCI Impact Solutions SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data & tools to support investors integrating climate risk & opportunities into their investment strategy

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and MSCI BISR for their exposure to products and services which aimed to contribute positively to the SDGs. Companies that met a certain revenue threshold (the "SDG Revenue") from business activities associated with SDGs ("SDGs Aligned Business Activities") were included in the selection universe ("Selection Universe"). Such SDGs Aligned Business Activities may have included, but were not limited to:

• Alternative energy;
• Hydro power generation;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention;
• Sustainable agriculture;
• Nutrition;
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Affordable real estate;
• SME finance;
• Education; and
• Connectivity.

Constituents in the Selection Universe were assigned to a Global Industry Classification Standard (GICS) sector and were ranked according to their SDG Revenue. A certain threshold of top–ranking constituents from each GICS sector were selected for inclusion. For GICS sectors that had less constituents than the threshold, all securities were selected for inclusion.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted by the product of their percentage of SDG Revenue and their free float–adjusted market capitalisation.

How did the sustainability indicators perform?

Xtrackers MSCI Global SDGs UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.18 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.18 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.18 Market weight (%)
SDG Impact Rating	The financial product’s portfolio’s median score of each company’s overall impact on the SDGs, based on the sum of the companies’ highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by ISS ESG.	4.06

…and compared to previous periods?

Exposure to Very Severe Controversies	1.22	0.46	Market weight (%)
Exposure to Worst-in-Class Issuers	1.22	0.46	Market weight (%)
SDG Impact Rating	3.87	2.37	
Controversial Weapons Involvement	1.21	0.46	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 82.63% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

What were the top investments of this financial product?

Xtrackers MSCI Global SDGs UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
First Solar	C - Manufacturing	4.4 %	United States
NVIDIA Corp.	C - Manufacturing	4.4 %	United States
Digital Realty Trust REIT	L - Real estate activities	4.3 %	United States

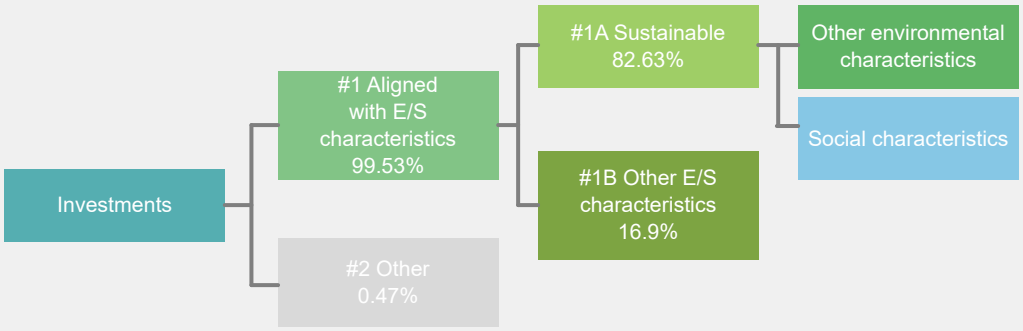
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.53% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 82.63% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.47% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global SDGs UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	1.6 %
C	Manufacturing	44.4 %
D	Electricity, gas, steam and air conditioning supply	5.5 %
E	Water supply; sewerage; waste managment and remediation activities	0.2 %
F	Construction	3.5 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.7 %
H	Transporting and storage	2.9 %
J	Information and communication	1.8 %
K	Financial and insurance activities	2.8 %

M	Professional, scientific and technical activities	12.6 %
P	Education	1.8 %
NA	Other	11.4 %
Exposure to companies active in the fossil fuel sector*		**2.8 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

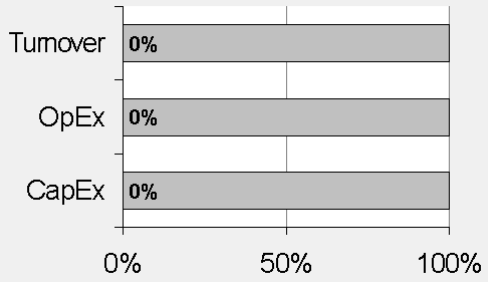
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

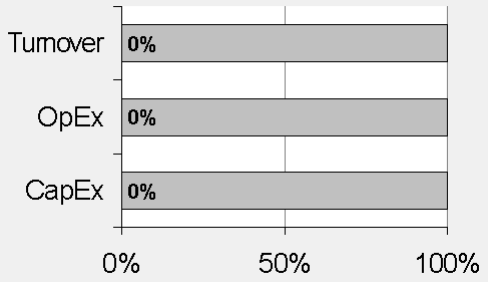
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 82.63% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 82.63% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applying SSDG impact selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG Impact Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the 17 Sustainable Development Goals of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index (as defined below) which are associated with a positive contribution to the 17 Sustainable Development Goals ("SDGs") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies'

operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics, MSCI Climate Change Metrics, and MSCI BISR for their exposure to products and services which aim to contribute positively to the SDGs. Companies that meet a certain revenue threshold (the "SDG Revenue") from business activities associated with the SDGs ("SDG Aligned Business Activities") are included in the selection universe ("Selection Universe"). Such SDG Aligned Business Activities may include, but are not limited to:

• Alternative energy;
• Hydro power generation;
• Energy efficiency;
• Green building;
• Sustainable water;
• Pollution prevention;
• Sustainable agriculture;
• Nutrition;
• Major disease treatment;
• Sanitation;
• Contraceptives;
• Affordable real estate;
• SME finance;
• Education; and
• Connectivity.

Constituents in the Selection Universe are assigned to a Global Industry Classification Standard (GICS) sector and are ranked according to their SDG Revenue. A certain threshold of top–ranking constituents from each GICS sector are selected for inclusion. For GICS sectors that have less constituents than the threshold, all securities are selected for inclusion.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted by the product of their percentage of SDG Revenue and their free float–adjusted market capitalisation.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI Global SDGs UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

Legal entity identifier: 254900BDBGMBEQO4SF60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.68 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 3 Good Health and Well–being Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well–being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to Sustainable Development Goal 3 ("SDG 3") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of 'B' and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products was available on: https://www.msci.com/esg–investing. In particular, the following five components were utilized:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social, and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products, and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions SDG Alignment

MSCI Impact Solutions SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analyzing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data & tools to support investors integrating climate risk & opportunities into their investment strategy

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aimed to contribute positively to SDG 3. Companies that met a certain revenue threshold from business activities associated with SDG 3 were selected ("SDG 3 Aligned Business Activities"). Such SDG 3 Aligned Business Activities may have included, but were not limited to:

• Major disease treatment;

• Sanitation;

• Contraceptives;

• Conventional pollution control solutions; and

• Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "Thematic Parent Index"). Constituents' exposure to the theme of digital healthcare (the "Theme"), which included (but was not limited to) the development of new products and services focused on telehealth, medical robots, and automation in healthcare was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data was then analysed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and

• Descriptions of companies' activities from publicly available sources.

A relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities had to meet a certain relevance score threshold. Constituents that did not have any revenue that contributed to SDG 3 were excluded.

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 75%.

• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
SDG 3 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 3, based on companies' revenues from major disease treatment or pollution control (positive) and/or tobacco-related products (negative), measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	8.5

Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 94.68% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

What were the top investments of this financial product?

Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

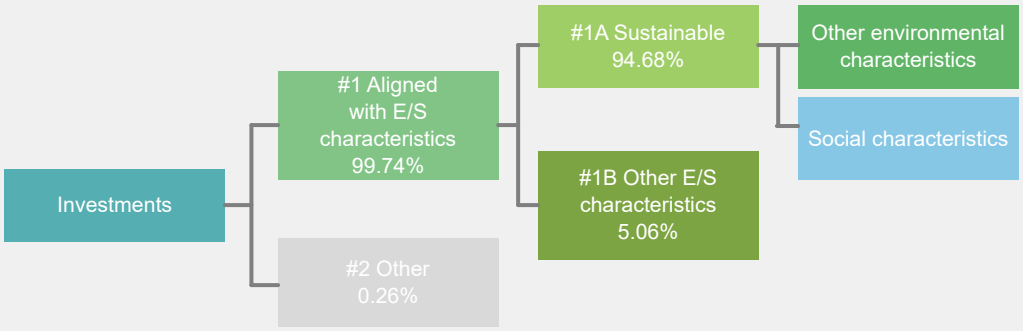
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.74% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 94.68% of the financial product’s assets qualified as sustainable investments (#1A Sustainable).
0.26% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global SDG 3 Good Health UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	73.7 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.3 %
J	Information and communication	0.0 %
M	Professional, scientific and technical activities	21.7 %
Q	Human health and social work activities	2.4 %
NA	Other	1.9 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

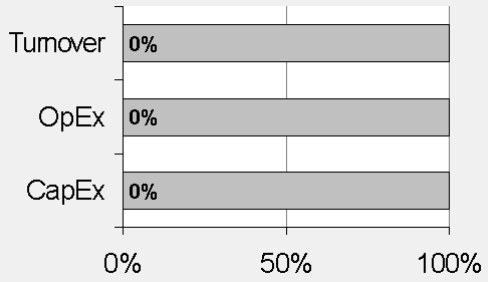
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

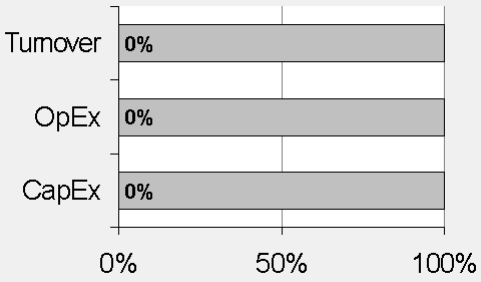
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 94.68% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 94.68% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 3 Good Health and Well–being Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 3 (ensure healthy lives and promote well–being for all at all ages) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 3 ("SDG 3") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI BISR for their exposure to products and services which aim to contribute positively to SDG 3. Companies that meet a certain revenue threshold from business activities associated with SDG 3 are selected ("SDG 3 Aligned Business Activities"). Such SDG 3 Aligned Business Activities may include, but are not limited to:

• Major disease treatment;
• Sanitation;
• Contraceptives;
• Conventional pollution control solutions; and
• Low toxicity solutions and/or low volatile organic compounds solutions.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Digital Health Index (the "Thematic Parent Index"). Constituents' exposure to the theme of digital healthcare (the "Theme"), which includes (but is not limited to) the development of new products and services focussed on telehealth, medical robots, and automation in healthcare is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Constituents that do not have any revenue that contributes to SDG 3 are excluded.

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 3 and their free float–adjusted market capitalization. Such securities then have their weighting in the Reference Index scaled to 75%.

• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted by the product of their relevance score and their free float–adjusted market capitalization. Such securities then have their weighting in the Reference Index scaled to 25%

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF

Legal entity identifier: 2549006CWZHL0FBC5B98

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.02 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 6 Clean Water and Sanitation Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to Sustainable Development Goal 6 ("SDG 6") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of 'B' and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products was available on: https://www.msci.com/esg–investing. In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social, and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products, and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions SDG Alignment

MSCI Impact Solutions SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data & tools to support investors integrating climate risk & opportunities into their investment strategy

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aimed to contribute positively to SDG 6. Companies that met a certain revenue threshold from business activities associated with SDG 6 were selected ("SDG 6 Aligned Business Activities"). Such SDG 6 Aligned Business Activities may have included, but were not limited to:

• Sustainable water;

• Sanitation; and

• Sustainable agriculture;

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "Thematic Parent Index"). Constituents' exposure to the theme of water (the “Theme”), which consisted of business activities such as; water supply, water treatment, water utilities, and water–related equipment was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Sub–Themes and a range of company data was then analyzed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and

• Descriptions of companies' activities from publicly available sources.

A relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities had to meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry ‘water utility’ and companies that met a certain sustainable water revenue threshold were also eligible for inclusion. Constituents that did not have any revenue that contributed to SDG 6 were excluded.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 75%.
• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
SDG 6 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 6, based on companies' revenues from sanitation related products and services, sustainable agriculture and sustainable water projects, measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	7.13

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 61.02% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

What were the top investments of this financial product?

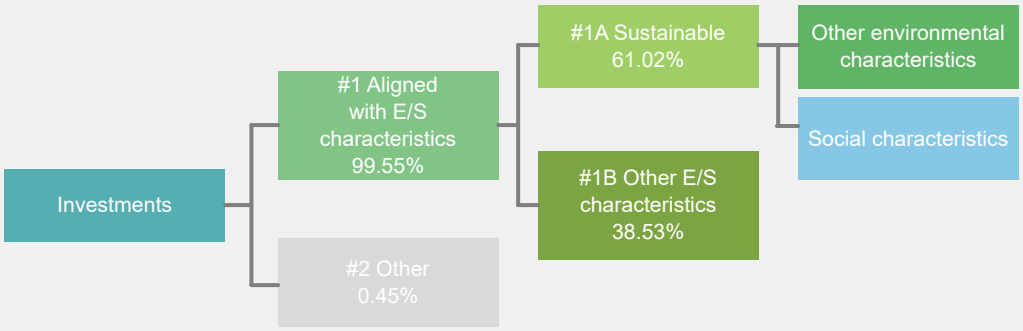
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.55% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 61.02% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.45% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global Clean Water & Sanitation UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	8.8 %
C	Manufacturing	48.1 %
D	Electricity, gas, steam and air conditioning supply	0.0 %
E	Water supply; sewerage; waste managment and remediation activities	21.3 %

NA	Other	6.4 %
Exposure to companies active in the fossil fuel sector*		**3.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

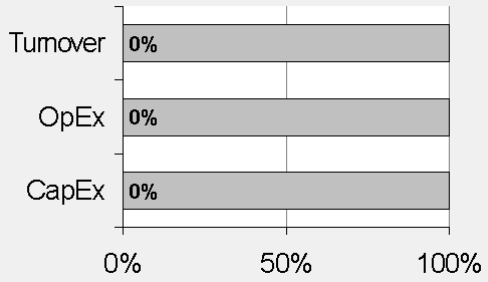
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

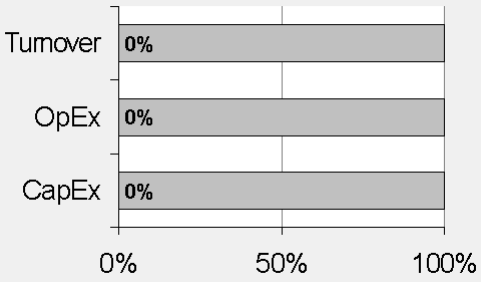
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 61.02% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 61.02% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applying SDG impact selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 6 Clean Water and Sanitation Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 6 (ensure availability and sustainable management of water and sanitation for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 6 ("SDG 6") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to SDG 6. Companies that meet a certain revenue threshold from business activities associated with SDG 6 are selected ("SDG 6 Aligned Business Activities"). Such SDG 6 Aligned Business Activities may include, but are not limited to:

• Sustainable water;
• Sanitation; and
• Sustainable agriculture.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Water Index (the "Thematic Parent Index"). Constituents' exposure to the theme of water (the "Theme"), which consists of business activities such as; water supply, water treatment, water utilities, and water–related equipment is assessed. In order to assess such exposure, the Index Administrator defines a broad set of relevant words and phrases associated with business activities connected to the Theme and a range of company data is then analysed for references to such relevant words and phrases. Such data includes:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A relevance score is calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which is derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities must meet a certain relevance score threshold. Additionally, all companies from the Global Industry Classification Standard (GICS) subindustry 'water utility' and companies that meet a certain sustainable water revenue threshold are also eligible for inclusion. Constituents that do not have any revenue that contributes to SDG 6 are excluded.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from business activities associated with SDG 6 and their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 75%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float–adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 25%

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

Legal entity identifier: 254900T2I3WMJK7S5Q13

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 70.45% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to Sustainable Development Goal 7 (ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the MSCI ACWI IMI Index (the “Parent Index”) which were associated with a positive contribution to Sustainable Development Goal 7 ("SDG 7") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of 'B' and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products was available on: https://www.msci.com/esginvesting. In particular, the following five components were utilized:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social, and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products, and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions SDG Alignment

MSCI Impact Solutions SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analyzing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data & tools to support investors integrating climate risk & opportunities into their investment strategy

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aimed to contribute positively to SDG 7. Companies that met a certain revenue threshold from business activities associated with SDG 7 were selected ("SDG 7 Aligned Business Activities"). Such SDG 7 Aligned Business Activities may have included, but were not limited to:

• Alternative energy;
• Demand–side management;
• Smart grids;
• Other energy storage; and
• Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "Thematic Parent Index"). Constituents' exposure to the theme of clean energy such as batteries, smart grids, and future fules and technology (the "Sub–Themes") was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Sub–Themes and a range of company data was then analysed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A combined relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities had to meet a certain relevance score threshold. Constituents that did not have any revenue that contributed to SDG 7 were excluded.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float–adjusted market capitalization.

Such securities then had their weighting in the Reference Index scaled to 75%.

• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 25%

How did the sustainability indicators perform?

Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	1.17 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.17 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	1.17 Market weight (%)
SDG 7 Net Product and Service Alignment Score	The financial product's portfolio's weighted average of each company's net product and service alignment score to SDG 7, based on companies' revenues from alternative energy (positive), and/or fossil fuels and related products (negative), measured by MSCI on a scale of -10 (strongly misaligned) to 10 (strongly aligned).	6.84

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 70.45%% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

What were the top investments of this financial product?

Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country

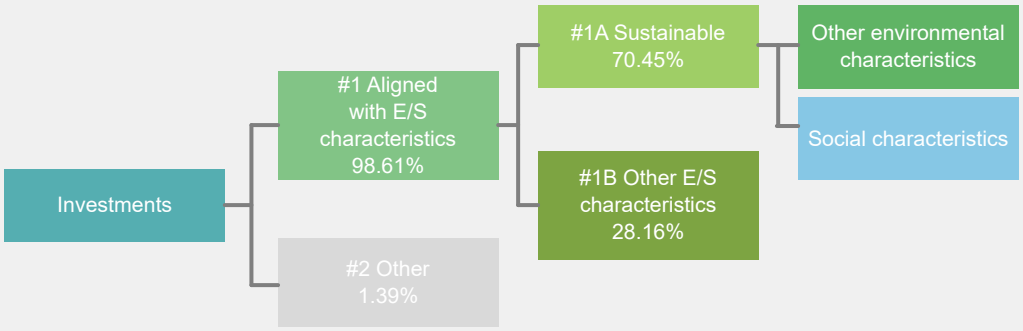
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 98.61% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 70.45% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
1.39% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global SDG 7 Affordable and Clean Energy UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	1.2 %
C	Manufacturing	38.2 %
D	Electricity, gas, steam and air conditioning supply	36.3 %
F	Construction	2.0 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	1.1 %
K	Financial and insurance activities	0.2 %
M	Professional, scientific and technical activities	8.6 %

Exposure to companies active in the fossil fuel sector*		**11.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

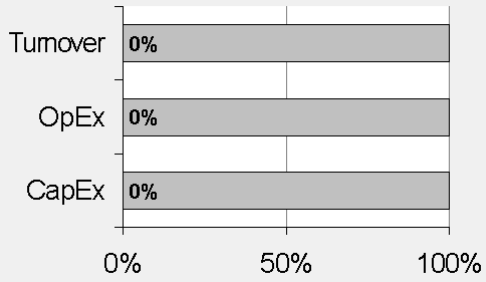
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

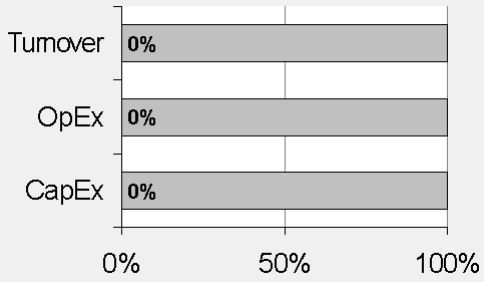
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 70.45% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 70.45% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG 7 Affordable and Clean Energy Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small–capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to Sustainable Development Goal 7 (Ensure access to affordable, reliable, sustainable and modern energy for all) of the United Nations 2030 Agenda for Sustainable Development.

Constituents of the Parent Index which are associated with a positive contribution to Sustainable Development Goal 7 ("SDG 7") of the United Nations 2030 Agenda for Sustainable Development ("UN 2030 Agenda"), and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 sustainable development goals ("SDGs") contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution,

both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes.

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions' Sustainable Impact Metrics and MSCI Climate Change Metrics for their exposure to products and services which aimed to contribute positively to SDG 7. Companies that met a certain revenue threshold from business activities associated with SDG 7 were selected ("SDG 7 Aligned Business Activities"). Such SDG 7 Aligned Business Activities may have included, but were not limited to:

• Alternative energy;
• Demand–side management;
• Smart grids;
• Other energy storage; and
• Hydro power generation.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria, derived primarily from the MSCI ACWI IMI Clean Energy Infrastructure Index (the "Thematic Parent Index"). Constituents' exposure to the theme of clean energy such as batteries, smart grids, and future fules and technology (the "Sub–Themes") was assessed. In order to assess such exposure, the Index Administrator defined a broad set of relevant words and phrases associated with business activities connected to the Sub–Themes and a range of company data was then analysed for references to such relevant words and phrases. Such data included:

• Business segment information from company annual reports and third–party data sources; and
• Descriptions of companies' activities from publicly available sources.

A combined relevance score was calculated for all securities in the eligible universe, taking into account the portion of a company's revenue which was derived from relevant business segments, and filtered by a Standard Industry Classification (SIC) code. To be eligible for inclusion in the Reference Index, securities had to meet a certain relevance score threshold. Constituents that did not have any revenue that contributed to SDG 7 were excluded.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index were weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from business activities associated with SDG 7 and their free float–adjusted market capitalization.

Such securities then had their weighting in the Reference Index scaled to 75%.

• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted by the product of their relevance score and their free float–adjusted market capitalization. Such securities then had their weighting in the Reference Index scaled to 25%

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Japan Climate Transition UCITS ETF

Legal entity identifier: 2549006JTJKGYQVCAK94

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.85% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Japan Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of of large and medium capitalisation in Japan that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on the MSCI Japan Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI Japan Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	6.45 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	490.09 tCO2e / million EUR

Greenhouse Gas Intensity	578.18	614.37	tCO2e / million EUR
Exposure to Fossil Fuels	5.05	5.58	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 17.85% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Activities negatively affecting biodiversity–sensitive areas (no. 7);
- Emissions to water (no. 8);
- Hazardous waste ratio (no. 9);
- Violation of UN Global Compact principles and OECD Guidelines for

multinational enterprises (no. 10); and

- Exposure to controversial weapons (no. 14).

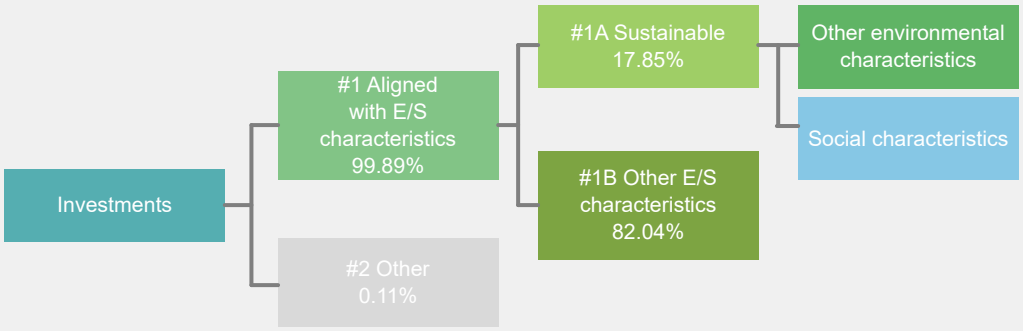
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.89% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 17.85% of the financial product’s assets qualified as sustainable investments (#1A Sustainable).
0.11% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Japan Climate Transition UCITS ETF

Exposure to companies active in the fossil fuel sector*		**3.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

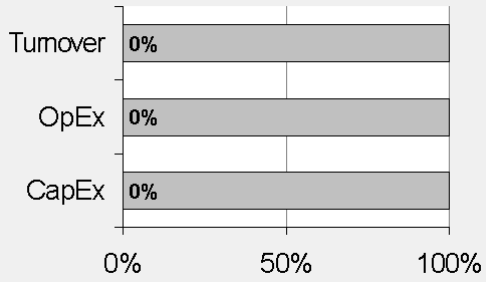
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

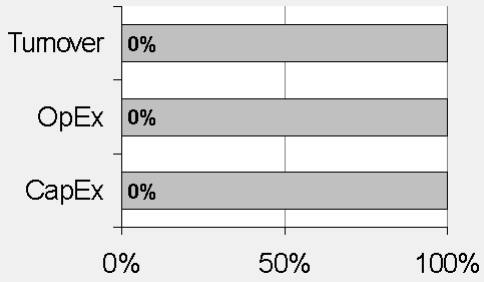
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.85% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.85% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB") and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Japan Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in Japan. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as 'Red Flags' by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive

revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the “Eligible Universe”. Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (“GHG”) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI USA Climate Transition UCITS ETF

Legal entity identifier: 254900DDFT5L2CMNMR62

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.30% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in the USA that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on the MSCI USA Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI USA Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	7.25 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.16 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.16 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	394.46 tCO2e / million EUR

Exposure to Fossil Fuels	7.25	7.22	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 29.30% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

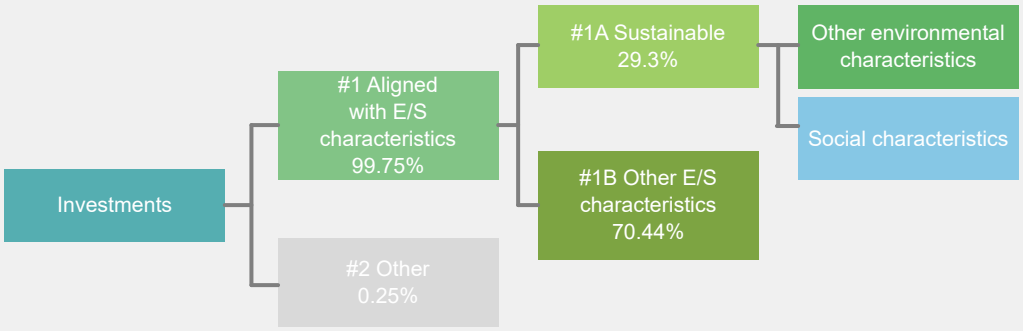
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.75% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 29.30% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.25% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**4.8 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

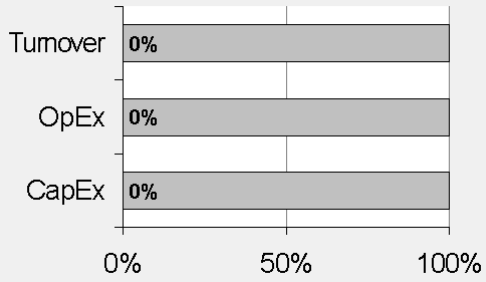
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

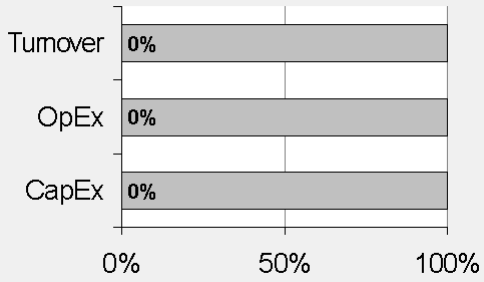
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.30% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.30% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB") and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI USA Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in the USA. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as 'Red Flags' by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive

revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the “Eligible Universe”. Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (“GHG”) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;

• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI EMU Climate Transition UCITS ETF

Legal entity identifier: 2549008ANG5OWCI95V65

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.66 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of of large and medium capitalisation in developed market countries in the European Economic and Monetary Union that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on the MSCI EMU Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI EMU Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	12.98 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.08 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	593.7 tCO2e / million EUR

…and compared to previous periods?

Greenhouse Gas Intensity	600.44	628.48	tCO2e / million EUR
Exposure to Fossil Fuels	7.00	6.18	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 24.66% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

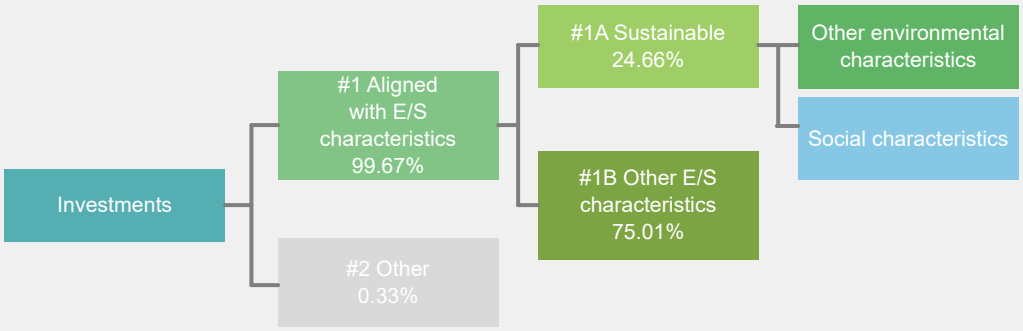
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.67% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 24.66% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.33% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI EMU Climate Transition UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	19.0 %

Exposure to companies active in the fossil fuel sector*		**3.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

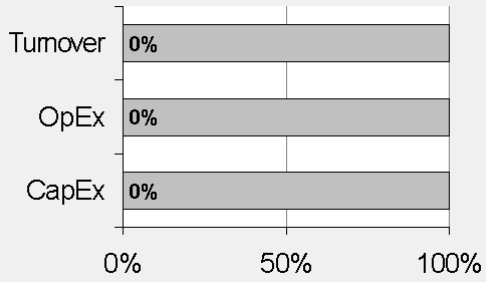
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

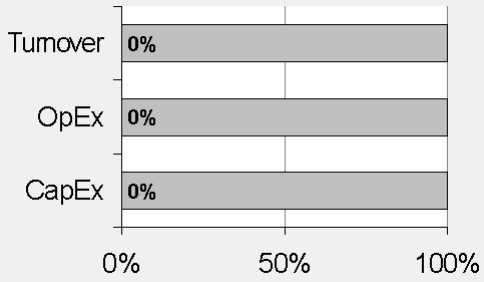
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.66% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.66% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB") and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI EMU Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in developed markets in the European Economic and Monetary Union. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the "Eligible Universe". Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (GHG) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Europe Climate Transition UCITS ETF

Legal entity identifier: 254900PGFK839OXUQ556

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.76 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by the tracking MSCI Europe Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of of large and medium capitalisation companies in developed market countries in Europe that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on MSCI Europe Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI Europe Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	14.61 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.08 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	537.15 tCO2e / million EUR

…and compared to previous periods?

Greenhouse Gas Intensity	572.82	620.06	tCO2e / million EUR
Exposure to Fossil Fuels	9.80	7.47	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 29.76% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

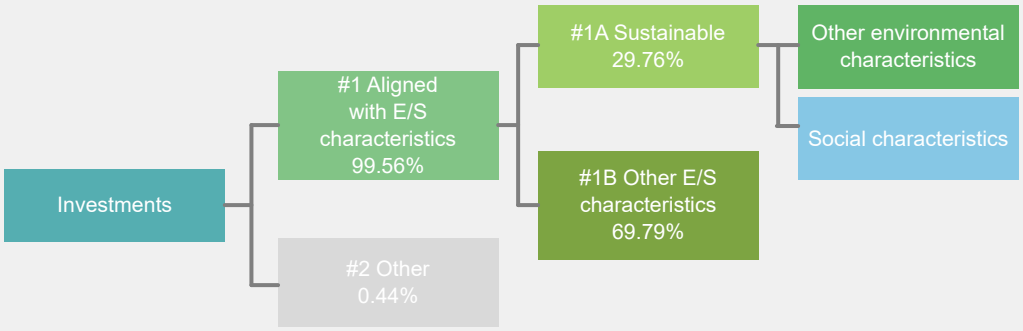
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.56% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 29.76% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.44% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Europe Climate Transition UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.5 %
B	Mining and quarrying	0.6 %

NA	Other	3.4 %
Exposure to companies active in the fossil fuel sector*		**5.2 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

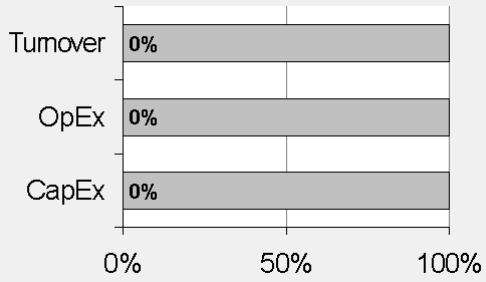
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

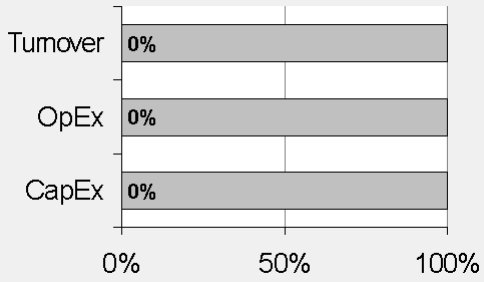
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.76% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 29.76% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB") and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprises all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Europe Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in developed markets in Europe. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as 'Red Flags' by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive

revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the “Eligible Universe”. Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (“GHG”) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;

• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI World Climate Transition UCITS ETF

Legal entity identifier: 254900SHTQO0N7TBRS64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.32 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in global developed market countries that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on the MSCI World Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• A minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• A minimum average reduction per year of 7% in carbon intensity;
• A minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• A minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• A minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• A minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• A maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI World Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	9.69 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.09 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.09 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	499.86 tCO2e / million EUR

…and compared to previous periods?

Xtrackers MSCI World Climate Transition UCITS ETF

Exposure to Worst-in-Class Issuers	0.07	0.02	Market weight (%)
Greenhouse Gas Intensity	509.93	553.29	tCO2e / million EUR
Exposure to Fossil Fuels	8.92	8.06	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 27.32% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for

multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI World Climate Transition UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
NVIDIA Corp.	C - Manufacturing	5.0 %	United States

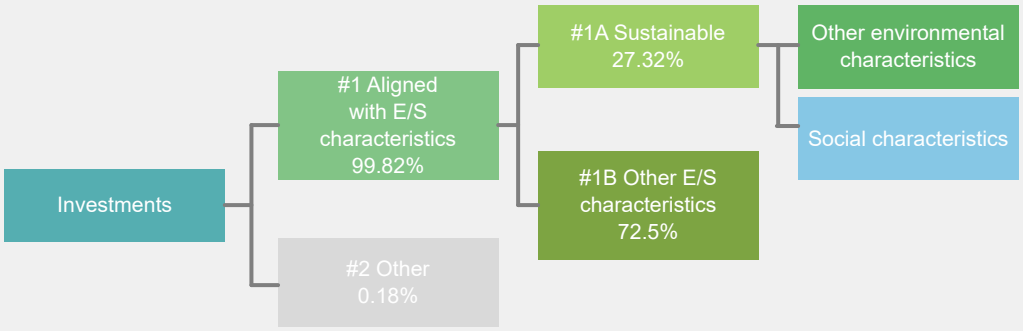
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.82% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.32% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.18% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Climate Transition UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.1 %
B	Mining and quarrying	1.5 %
C	Manufacturing	30.2 %

S	Other services activities	0.0 %
NA	Other	3.6 %
Exposure to companies active in the fossil fuel sector*		**5.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

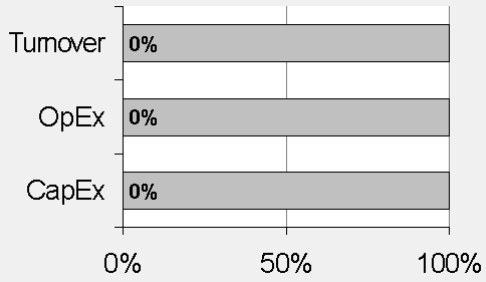
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

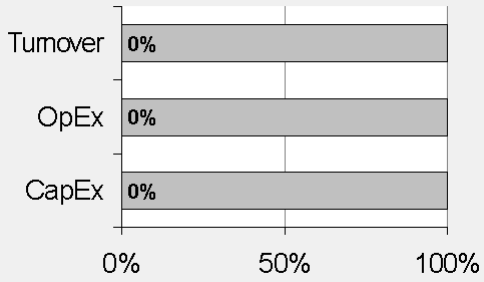
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.32% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.32% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks (“EU CTB”) and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all or a substantial number of the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global developed markets. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as 'Red Flags' by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive

revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the “Eligible Universe”. Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (“GHG”) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;

• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Nordic Net Zero Pathway Paris Aligned UCITS ETF

Legal entity identifier: 254900UCTJVD9X265I90

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.34 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Solactive ISS ESG Nordic Investable Universe Net Zero Pathway Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of companies of the Nordic countries that were selected and weighted with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks. The Reference Index was based on the Solactive GBS Developed Markets Nordic Investable Universe EUR Index (the “Parent Index”).

The Reference Index aimed to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also sought to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilisesed ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including those that were:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Had any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Had involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to have been industries with a high potential for negative environmental, health and/or social impact. These included, but were not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Were assigned an ISS ESG rating of D– or below; and
• Had a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which could not be evaluated on these criteria due to missing or insufficient data were also excluded.

Securities from the Parent Index that met these ESG criteria were then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions >br>• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights were further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index was capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day.

The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings were subject to capping, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index. Individual securities in the Reference Index were capped at 9%.

How did the sustainability indicators perform?

Xtrackers Nordic Net Zero Pathway Paris Aligned UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	6.52 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.01 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	511.94 tCO2e / million EUR

…and compared to previous periods?

Indicators Performance	30/12/2024	29/12/2023	
Exposure to Very Severe Controversies	0.54	0.59	Market weight (%)
Exposure to Worst-in-Class Issuers	0.54	0.59	Market weight (%)
Greenhouse Gas Intensity	539.52	523.84	tCO2e / million EUR
Exposure to Fossil Fuels	0.54	1.82	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 42.34% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Share of non–renewable energy consumption and production (no. 5);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Nordic Net Zero Pathway Paris Aligned UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Novo-Nordisk	C - Manufacturing	6.7 %	Denmark

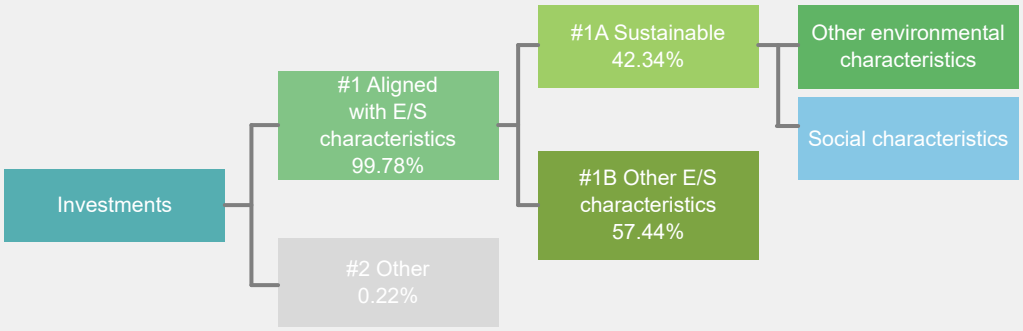
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.78% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 42.34% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.22% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Nordic Net Zero Pathway Paris Aligned UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	2.2 %
C	Manufacturing	30.9 %
D	Electricity, gas, steam and air conditioning supply	0.5 %
F	Construction	3.5 %

Exposure to companies active in the fossil fuel sector*		**2.3 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

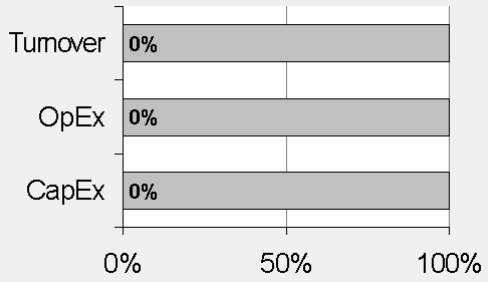
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

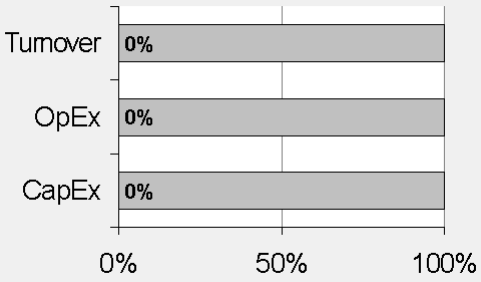
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 42.34% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 42.34% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of seeking alignment with EU Paris–aligned Benchmark (“EU PAB”) standards and certain net zero frameworks and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visithttps://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Solactive ISS ESG Nordic Investable Universe Net Zero Pathway Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large and medium capitalisation companies across global developed markets, selected according to the Solactive country classification framework. The Reference Index aims to comply with the regulations laid out for EU PAB in the PAB Regulation. The Reference Index also seeks to implement recommendations published by the Institutional Investors Group on Climate Change on their Net Zero Investment Framework which can be found on https://www.iigcc.org and https://parisalignedinvestment.org.

The Reference Index utilises ESG data from Institutional Shareholder Services Inc. (“ISS”). ISS provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal ("SDG") linked impacts, human rights, labour standards, corruption and controversial weapons.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including those that are:

• Involved in severe and very severe controversies relating to the environment, human rights, corruption or labour rights;
• Have any involvement in controversial weapons, nuclear weapons, civilian firearm production or tobacco cultivation and production;
• Have involvement over a specific threshold in industries (as set out in the minimum standards for EU PAB) or in certain industries as determined by the Index Administrator to be industries with a high potential for negative environmental, health and/or social impact. These include, but are not limited to:

• Coal mining and power generation;
• Fossil fuel production, servicing, exploration, distribution, or power generation;
• Oil sands production;
• Civilian firearms distribution;
• Tobacco related products; and
• Military weapons;
• Are assigned an ISS ESG rating of D– or below; and
• Have a significant negative impact on United Nations SDG 12 (Responsible Consumption & Production), SDG 13 (Climate Action), SDG 14 (Life Below Water), SDG 15 (Life on Land).

Please note that companies which cannot be evaluated on these criteria due to missing or insufficient data are also excluded.

Securities from the Parent Index that meet these ESG criteria are then assigned an initial weight in the Reference Index based on their market capitalisation, with each constituent’s initial weight tilted based on a scoring process for each of the three pillars listed below (the “Tilted Weights”):

• Science–based targets relating to reducing carbon emissions;
• Climate disclosure standards; and
• Green revenue relating to SDG 13.

Additionally, constituent weights are further adjusted to align with the objectives of the EU PAB (including reducing the carbon intensity of the Reference Index). The carbon intensity of the Reference Index is capped at the minimum of the carbon intensity of the decarbonization trajectory on the selection day and 50% of the carbon intensity of the Parent Index on the selection day. The decarbonization trajectory is defined by an annual minimum carbon intensity reduction of 7% compared to the carbon intensity of the Reference Index on the base day in a geometric progression.

Under this process, weightings are subject to capping, with individual weight deviations and sector weight deviation limits applied to the Tilted Weights to minimise, to the extent possible, the deviations against the Parent Index.

Individual securities in the Reference Index are capped at 9%.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI World Minimum Volatility ESG UCITS ETF

Legal entity identifier: 254900U3G64JS9WBDC76

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.5 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Minimum Volatility Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and mid–cap companies across developed markets that exhibited low volatility characteristics and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the "Parent Index"). The Reference Index excluded companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of BB or below;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to:https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification and factor selection constraints.

The Reference Index was reviewed and rebalanced on at least a quarterly basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI World Minimum Volatility ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	9.57 Market weight (%)*
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	17.7 Market weight (%)*
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	9.57 Market weight (%)*
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.31 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	453.02 tCO2e / million EUR

** A substantial portion of the percentage of the financial product's portfolio exposure to this indicator relates to a holding in a money market collective investment scheme, for which no data was available.*

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 33.5% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

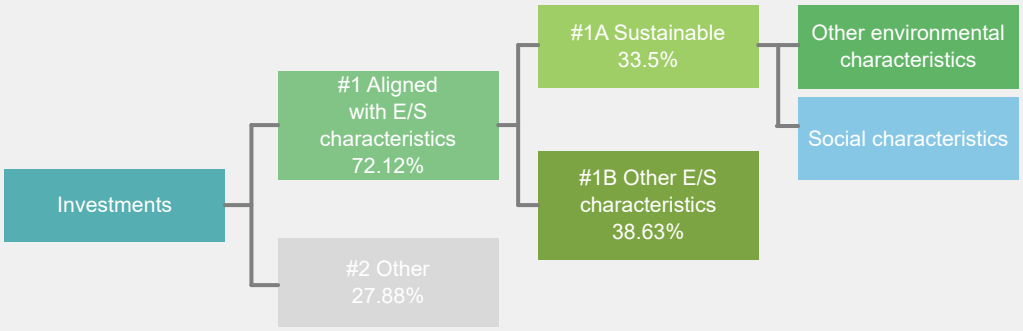
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 72.12% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 33.5% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

27.88% of the investments were not aligned with these characteristics (#2 Other)*.

** As a result of Primary Market activity in the Shares of the financial product, the financial product temporarily held material portions of its Net Asset Value in cash and ancillary liquid assets. Such ancillary liquid assets do not equate to a breach in the stated environmental and social characteristics, however are categorised under #2 Other.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Minimum Volatility ESG UCITS ETF

Exposure to companies active in the fossil fuel sector*		**4.0 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

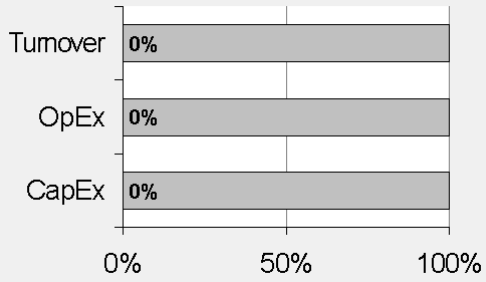
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

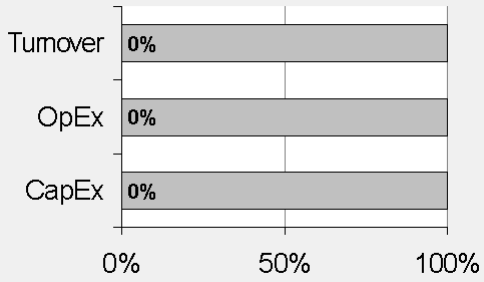
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.5% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.5% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Minimum Volatility Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed markets. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of BB or below;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification and factor selection constraints.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI World Minimum Volatility ESG UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI World Momentum ESG UCITS ETF

Legal entity identifier: 254900JKYTVBY8DY8948

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 17.47% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Momentum Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and mid–cap companies across developed markets that exhibited strong momentum characteristics and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the "Parent Index"). The Reference Index excluded companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of BB or below;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to:https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification and factor selection constraints.

The Reference Index was reviewed and rebalanced on at least a quarterly basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI World Momentum ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.69 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 17.47% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

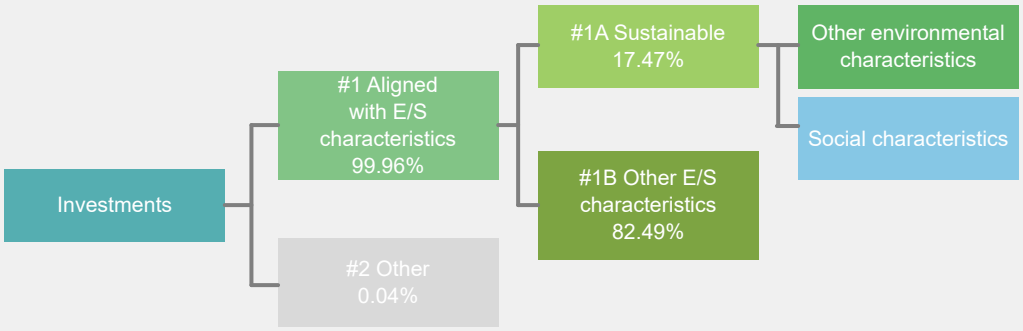
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.96% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 17.47% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.04% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Momentum ESG UCITS ETF

Exposure to companies active in the fossil fuel sector*		**2.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

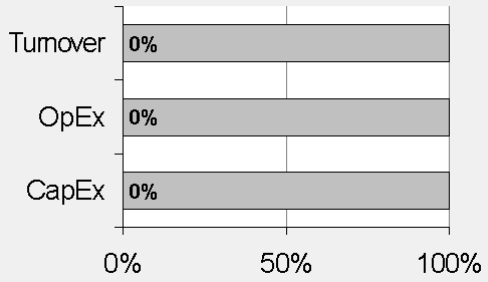
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

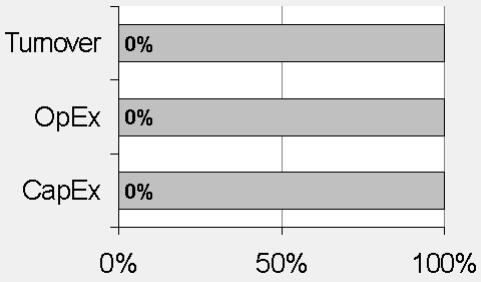
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.47% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 17.47% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Momentum Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed markets. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of BB or below;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification and factor selection constraints.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI World Quality ESG UCITS ETF

Legal entity identifier: 254900T3OHD3UN3TDP12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.86 % of sustainable investments.

	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Quality Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index . The Reference Index was designed to reflect the performance of large and mid–cap companies across developed markets that exhibited high quality characteristics and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the "Parent Index") . The Reference Index excluded companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of BB or below;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to:https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification and factor selection constraints.

The Reference Index was reviewed and rebalanced on at least a quarterly basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI World Quality ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	3.44 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	560.44 tCO2e / million EUR

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 25.86% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2)
• GHG Intensity of investee companies (no. 3)
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

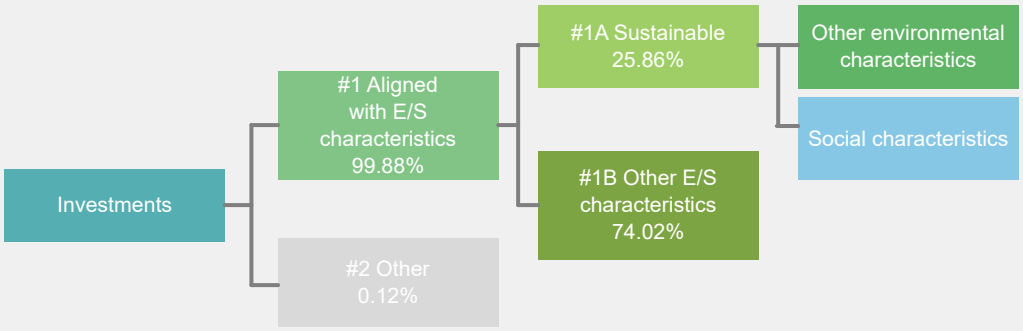
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.88% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.86% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.12% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Quality ESG UCITS ETF

Exposure to companies active in the fossil fuel sector*		**0.5 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

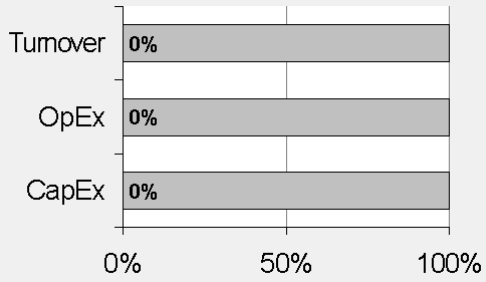
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

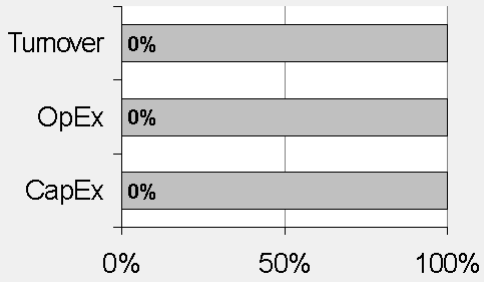
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.86% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.86% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outline above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Quality Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed markets. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of BB or below;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–datametrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe areselected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification and factor selection constraints.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI World Value ESG UCITS ETF

Legal entity identifier: 254900P65I8XFODM3M60

☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Value Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and mid–cap companies across developed markets that exhibited high value characteristics and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the “Parent Index”). The Reference Index excluded companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of BB or below;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:
• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification and factor selection constraints.

The Reference Index was reviewed and rebalanced on at least a quarterly basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI World Value ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	1.81 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	8.46 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	1.81 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	475.34 tCO2e / million EUR

Exposure to Fossil Fuels	5.68	4.17	Market weight (%)
Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 27.21% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

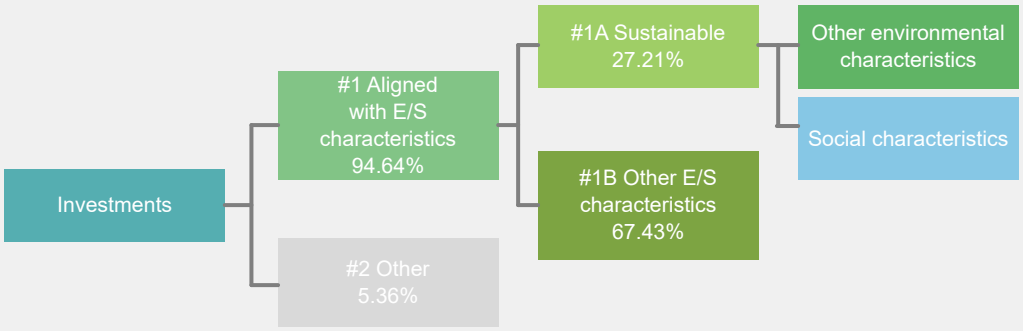
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 94.64% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.21% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

5.36% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World Value ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	2.2 %
C	Manufacturing	35.6 %
F	Construction	5.6 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.7 %
H	Transporting and storage	5.6 %
J	Information and communication	13.1 %
K	Financial and insurance activities	19.5 %
L	Real estate activities	3.0 %
M	Professional, scientific and technical activities	1.5 %
N	Administrative and support service activities	2.2 %

Exposure to companies active in the fossil fuel sector*		**3.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

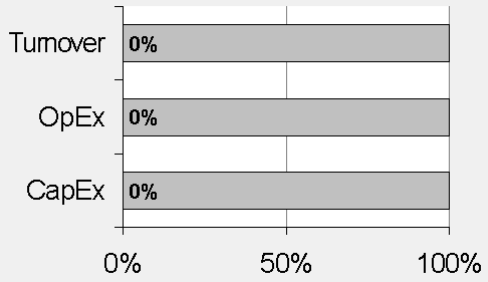
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

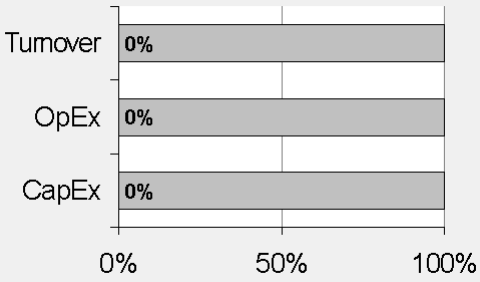
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.21% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.21% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Value Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in developed markets. The Reference Index excludes companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of BB or below;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas extraction, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above will constitute the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach subject to the following two objectives: (i) climate and ESG objectives and (ii) diversification and factor objectives.

Climate and ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification and factor selection constraints.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI World Value ESG UCITS ETF

Indicators	Performance Financial Product Xtrackers MSCI World Value ESG UCITS ETF	Performance Benchmark MSCI World Value Low Carbon SRI Screened Select Index

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Legal entity identifier: 254900GAI0KC8ZWVR296

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 26.26 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI EMU High Dividend Yield Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in the European Economic and Monetary Union with a focus on maximising the exposure to the dividend yield factor and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI EMU Index (the "Parent Index"). The Reference Index looked to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of CCC;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had an MSCI ESG Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification selection constraints.

The Reference Index was reviewed and rebalanced on at least a semi–annual basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	21.73 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	595.45 tCO2e / million EUR

…and compared to previous periods?

Exposure to Fossil Fuels	6.66	4.79	Market weight (%)
Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 26.26% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Allianz	K - Financial and insurance activities	5.6 %	Germany

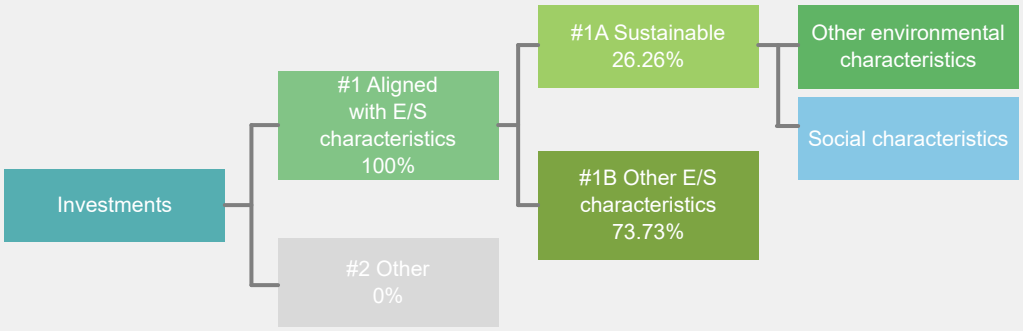
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 100% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics).
Within this category, 26.26% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	25.3 %
D	Electricity, gas, steam and air conditioning supply	1.2 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	0.4 %

Exposure to companies active in the fossil fuel sector*		**10.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

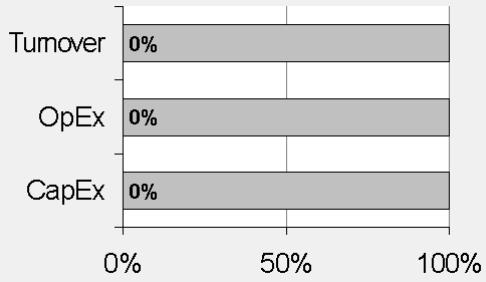
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

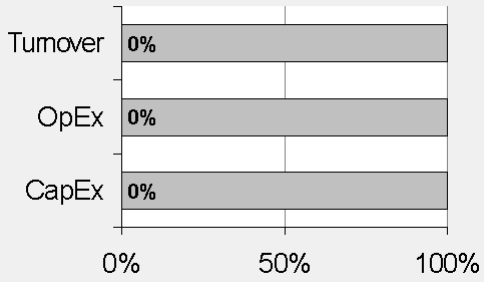
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 26.26% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 26.26% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selected and weighted eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI EMU High Dividend Yield Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the European Economic and Monetary Union and looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of CCC;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to:https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above constitute the eligible

universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification constraints.

The Reference Index is reviewed and rebalanced on at least a semi–annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI EMU High Dividend Yield ESG UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Europe High Dividend Yield ESG UCITS ETF

Legal entity identifier: 254900GSIB1QGJEHYS16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.88 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Europe High Dividend Yield Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in Europe with a focus on maximising the exposure to the dividend yield factor and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the "Parent Index"). The Reference Index looked to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of CCC;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI ESG Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification selection constraints.

The Reference Index was reviewed and rebalanced on at least a semi–annual basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI Europe High Dividend Yield ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.04 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	14.68 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.04 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	717.14 tCO2e / million EUR

…and compared to previous periods?

Exposure to Worst-in-Class Issuers	0.00	0.00	Market weight (%)
Greenhouse Gas Intensity	614.64	621.40	tCO2e / million EUR
Exposure to Fossil Fuels	5.40	6.00	Market weight (%)
Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 32.88% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Europe High Dividend Yield ESG UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Novartis AG	C - Manufacturing	5.0 %	Switzerland

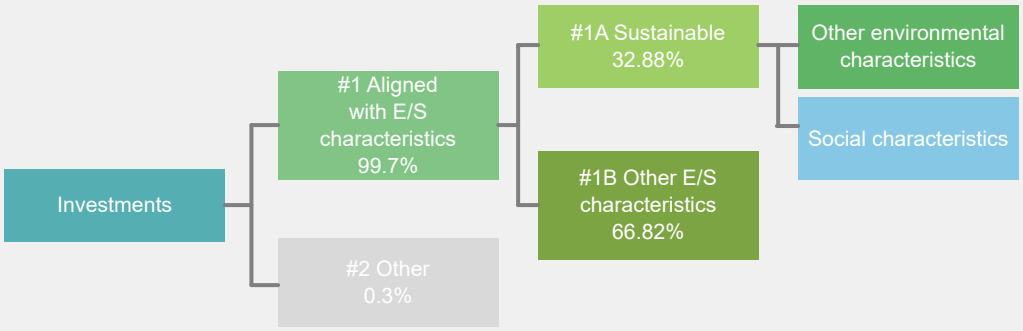
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.7% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 32.88% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.3% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Europe High Dividend Yield ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	3.5 %
C	Manufacturing	23.5 %

Exposure to companies active in the fossil fuel sector*		**5.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

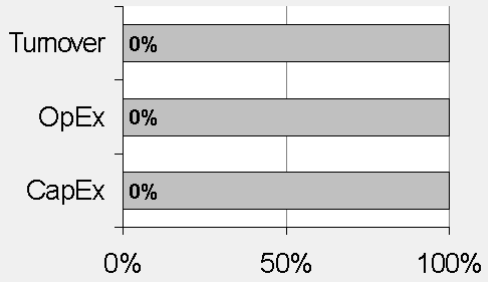
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

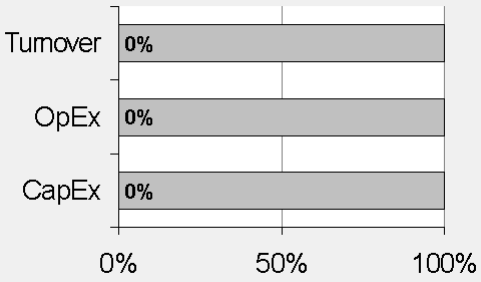
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 32.88% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 32.88% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selected and weighted eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Europe High Dividend Yield Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in Europe and looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yieds relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of CCC;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to:https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above constitute the eligible

universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification constraints.

The Reference Index is reviewed and rebalanced on at least a semi–annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI USA High Dividend Yield ESG UCITS ETF

Legal entity identifier: 254900Y9L9A1D2BS6P34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.37% of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA High Dividend Yield Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies inthe USA with a focus on maximising the exposure of the dividend yield factor and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI USA Index (the "Parent Index"). The Reference Index looked to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of CCC;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification selection constraints.

The Reference Index was reviewed and rebalanced on at least a semi–annual basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI USA High Dividend Yield ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	3.07 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	391.38 tCO2e / million EUR

Exposure to Fossil Fuels	5.39	2.67	Market weight (%)
Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 28.37% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI USA High Dividend Yield ESG UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Microsoft Corp.	J - Information and communication	5.4 %	United States
NVIDIA Corp.	C - Manufacturing	4.3 %	United States
Alphabet Cl.C	J - Information and communication	3.8 %	United States
Apple	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	3.7 %	United States

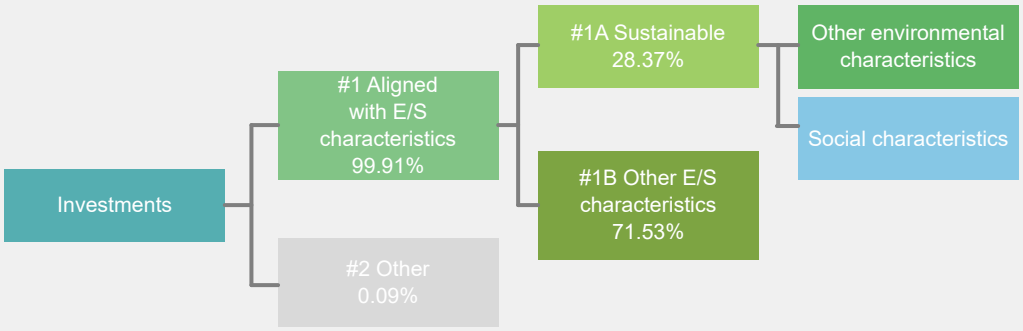
for the period from January 01, 2025, through December 31, 2025



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.91% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.37% of the financial product's assets qualified as sustainable investments (#1A Sustainable).
0.09% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI USA High Dividend Yield ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	41.9 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	10.2 %
H	Transporting and storage	2.8 %
J	Information and communication	24.8 %
K	Financial and insurance activities	8.1 %
L	Real estate activities	3.4 %
M	Professional, scientific and technical activities	4.4 %
N	Administrative and support service activities	0.3 %
Q	Human health and social work activities	0.6 %
NA	Other	3.6 %
Exposure to companies active in the fossil fuel sector*		**1.8 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

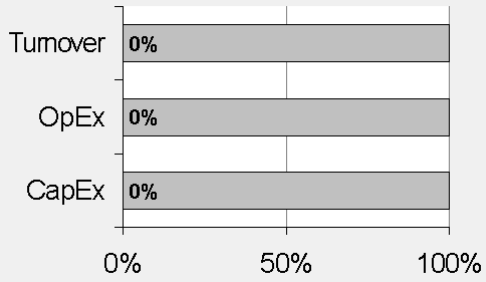
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

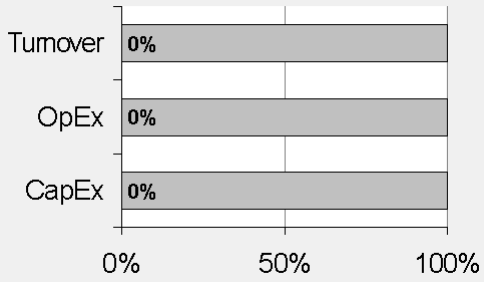
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.37% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.37% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI USA High Dividend Yield Low Carbon SRI Screened Select TR net Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in the USA and looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of CCC;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to:https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above constitute the eligible

universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification constraints.

The Reference Index is reviewed and rebalanced on at least a semi–annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI World High Dividend Yield ESG UCITS ETF

Legal entity identifier: 254900ELEJ7PLWBX7F21

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.75 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World High Dividend Yield Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of large and medium capitalisation companies in global developed markets with a focus on maximising the exposure of the dividend yield factor and which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Index (the "Parent Index"). The Reference Index looked to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent index which did not fulfil certain ESG (environmental, social and governance) criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were unrated or missing coverage by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of CCC;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Failed to comply with the United Nations Global Compact principles, had a MSCI Controversies Score of 0, or had an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. Security Selection and Weighting

Securities from the Parent Index which passed the ESG exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe were also subject to diversification selection constraints.

The Reference Index was reviewed and rebalanced on at least a semi–annual basis and may have been also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did the sustainability indicators perform?

Xtrackers MSCI World High Dividend Yield ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	5.9 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	592.94 tCO2e / million EUR

…and compared to previous periods?

Xtrackers MSCI World High Dividend Yield ESG UCITS ETF

Exposure to Very Severe Controversies	0.00	0.00	Market weight (%)
Exposure to Worst-in-Class Issuers	0.00	0.00	Market weight (%)
Greenhouse Gas Intensity	477.66	547.51	tCO2e / million EUR
Exposure to Fossil Fuels	4.79	4.79	Market weight (%)
Controversial Weapons Involvement	0.00	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 27.75% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI World High Dividend Yield ESG UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Microsoft Corp.	J - Information and communication	3.3 %	United States
Johnson & Johnson	C - Manufacturing	3.2 %	United States
Cisco Systems	C - Manufacturing	3.0 %	United States

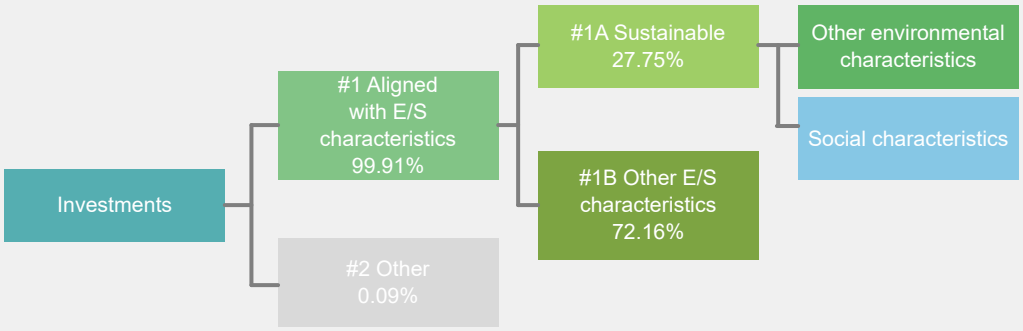
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.91% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 27.75% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.09% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI World High Dividend Yield ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	2.4 %
C	Manufacturing	39.9 %
D	Electricity, gas, steam and air conditioning supply	0.1 %
F	Construction	0.2 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	5.3 %
H	Transporting and storage	3.2 %
J	Information and communication	20.8 %
K	Financial and insurance activities	12.2 %
L	Real estate activities	3.9 %
M	Professional, scientific and technical activities	8.1 %
N	Administrative and support service activities	0.3 %
Q	Human health and social work activities	0.7 %
NA	Other	2.9 %
Exposure to companies active in the fossil fuel sector*		**2.4 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

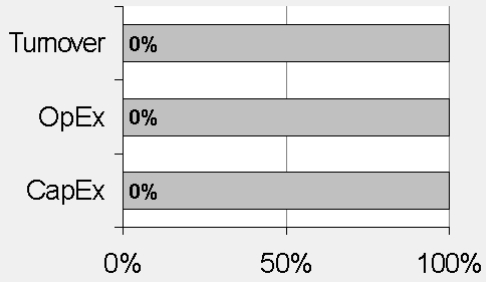
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

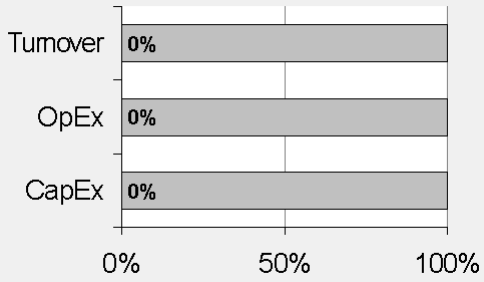
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.75% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 27.75% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation–based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a "Direct Investment Policy" which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World High Dividend Yield Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed markets and looks to maximise its exposure to the dividend yield factor by optimising the Reference Index for the selection of securities with high dividend yields relative to the Parent Index whilst excluding companies from the Parent Index which do not fulfil the following specific ESG criteria:

• Are unrated or missing coverage by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of CCC;
• Have any involvement in controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, oil & gas, and power generation; and
• Fail to comply with the United Nations Global Compact principles, have a MSCI Controversies Score of 0, or have an insufficient MSCI ESG Controversies Score related to certain environmental controversies.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research LLC to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: https://www.msci.com/our–solutions/esg–investing/esg–ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdp/4dfb3240–b5ed–0770–62c8–159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to:https://www.msci.com/our–solutions/esg–investing/climate–solutions/climate–data–metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG exclusions outlined above constitute the eligible

universe (the “Eligible Universe”). Securities from the Eligible Universe are selected and weighted following an optimisation–based approach (including optimising for high dividend yields) subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum reduction in greenhouse gas intensity relative to the Parent Index;
• A minimum reduction in fossil fuel sector exposure relative to the Parent Index;
• A minimum control or reduction in water emissions intensity and hazardous waste intensity relative to the Parent Index;
• A minimum control or improvement in the weighted average ESG score and/or ESG trend score relative to the Parent Index; and
• A maximum weight in securities below a certain ESG score.

Securities in the Eligible Universe are also subject to diversification constraints.

The Reference Index is reviewed and rebalanced on at least a semi–annual basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Europe Biodiversity Focus SRI UCITS ETF

Legal entity identifier: 254900M4JTG9LCK0U426

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.7 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the ISS STOXX® Europe 600 Biodiversity Focus SRI Index (the "Reference Index") which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in negative impact on biodiversity, a reduction in greenhouse gas intensity, and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in Europe that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

The Reference Index was based on the STOXX Europe 600 Index (the "Parent Index"). The Parent Index included companies from Europe. Constituents of the Parent Index that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria were eligible for inclusion in the Reference Index.

ESG and Biodiversity Exclusions

Securities from the Parent Index which did not meet certain ESG or biodiversity related criteria were excluded, including, but not limited to, those that:

• Were unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Were assigned an ESG Rating of D+ or below by ISS ESG;
• Were identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anticorruption established in the UN Global Compact and the OECD Guidelines;
• Were identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Were identified by ISS ESG as having any involvement in controversial weapons;
• Were identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Were identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index were assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aimed to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time. Securities were ranked by PDF over enterprise value including cash ("EVIC").

The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/

SDG Impact Assessment

Potential constituents were assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measured the extent to which companies were managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs. ISS ESG calculated an aggregated SDG Impact Rating score, based on certain biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved.

The Reference Index utilised ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and controversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components were utilised:

ISS ESG Corporate Rating

ISS ESG provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. ISS ESG provided an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assessed and quantified the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determined a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provided carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions

How did the sustainability indicators perform?

Xtrackers Europe Biodiversity Focus SRI UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Biodiversity-related Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more severe or very severe environmental controversies related to biodiversity, as determined by MSCI or for which no data was available.	1.31 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	13.75 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	543.88 tCO2e / million EUR
SDG Impact Rating	The financial product's portfolio's median score of each company's overall impact on the SDGs, based on the sum of the companies' highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by ISS ESG.	4.71

…and compared to previous periods?

Exposure to Fossil Fuels	6.73	3.60	Market weight (%)
Controversial Weapons Involvement	0.00	0.16	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 33.7% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7)
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Europe Biodiversity Focus SRI UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
ASML Holding	M - Professional, scientific and technical activities	3.5 %	Netherlands
Siemens Reg.	C - Manufacturing	3.2 %	Germany

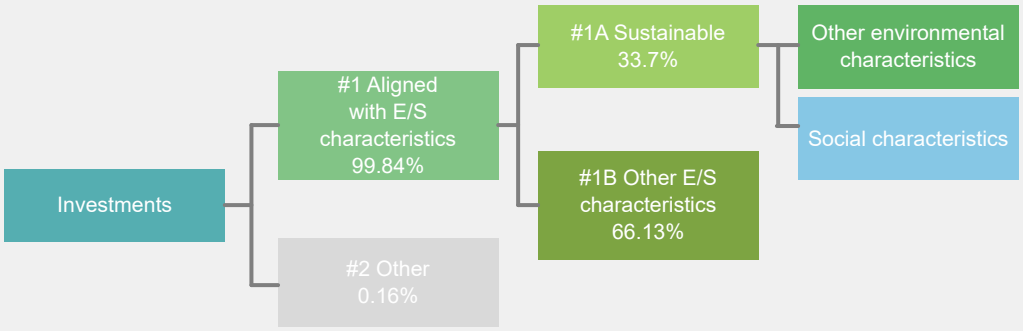
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.84% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 33.7% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.16% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Europe Biodiversity Focus SRI UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.8 %
B	Mining and quarrying	0.3 %
C	Manufacturing	21.0 %
D	Electricity, gas, steam and air conditioning supply	1.8 %
E	Water supply; sewerage; waste managment and remediation activities	0.6 %
F	Construction	0.9 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	4.9 %

NA	Other	2.5 %
Exposure to companies active in the fossil fuel sector*		**3.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

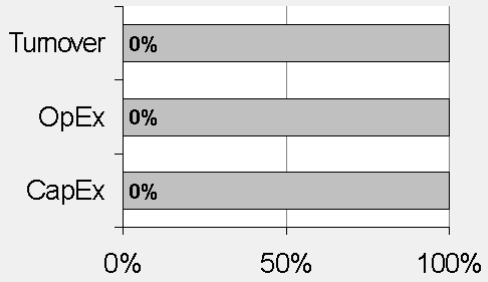
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

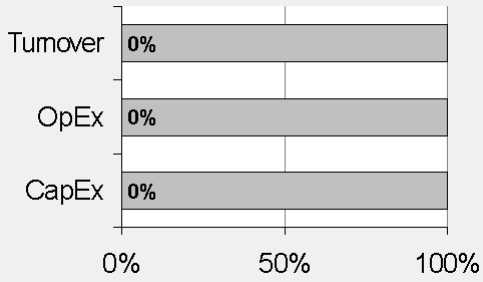
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.7% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.7% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific biodiversity–related and ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the ISS STOXX® Europe 600 Biodiversity Focus SRI Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies in Europe that meet certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

ESG and Biodiversity Exclusions

Securities from the Parent Index which do not meet certain ESG or biodiversity related criteria are excluded, including, but not limited to, those that:

• Are unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Are assigned an ESG Rating of D+ or below by ISS ESG;
• Are identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines;
• Are identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Are identified by ISS ESG as having any involvement in controversial weapons;
• Are identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Are identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index are assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aims to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time. Securities are ranked by PDF over enterprise value including cash ("EVIC"). The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index are excluded from the Reference Index. Securities for which no data is available are also excluded from the Reference Index.

For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/.

SDG Impact Assessment

Potential constituents are assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measures the extent to which companies are managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs.

ISS ESG calculates an aggregated SDG Impact Rating score, based on certain biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score are excluded from the Reference Index. Securities for which no data is available are also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved.

The Reference Index utilises ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and cotroversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components are utilised:

ISS ESG Corporate Rating

ISS ESG provides research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. ISS ESG provides an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assesses and quantifies the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determines a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provide carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Emerging Markets Climate Transition UCITS ETF

Legal entity identifier: 254900YCD9VLP1WR5351

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 20.38 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Emerging Markets Select Sustainability Screened CTB Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of of large and medium capitalisation in global emerging market countries that were selected and weighted with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB"). The Reference Index was based on MSCI Emerging Markets Index (the “Parent Index”).

The Reference Index aimed to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aimed to reduce exposure to select indicators, as detailed below, that were considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities were removed from the Parent Index that did not meet certain ESG criteria, including, but not limited to, those that:

• Were classified as ‘Red Flags’ by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• Were assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• Were assigned an insufficient MSCI ESG Rating;
• Were categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• Had any involvement in controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms (“GMO”) and nuclear power; and
• Were classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

The Reference Index used company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics was designed to identify companies that derive revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that were not removed in accordance with the ESG exclusions constituted the "Eligible Universe". Securities from the Eligible Universe were selected and weighted following an optimization–based approach which used their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index were subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas ("GHG") intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;
• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did the sustainability indicators perform?

Xtrackers MSCI Emerging Markets Climate Transition UCITS ETF

Indicators	Description	Performance December 31, 2025
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.75 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.12 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.1 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	611.92 tCO2e / million EUR

…and compared to previous periods?

Indicators Performance	30/12/2024	29/12/2023	
Exposure to Very Severe Controversies	0.00	0.85	Market weight (%)
Exposure to Worst-in-Class Issuers	0.00	1.26	Market weight (%)
Greenhouse Gas Intensity	748.44	828.91	tCO2e / million EUR
Exposure to Fossil Fuels	4.97	6.65	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 20.38% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Emissions to water (no. 8);
• Hazardous waste ratio (no. 9);
• Violation of UN Global Compact principles and OECD Guidelines for

multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers MSCI Emerging Markets Climate Transition UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Taiwan Semiconductor Manufacturing Co.	C - Manufacturing	10.6 %	Taiwan

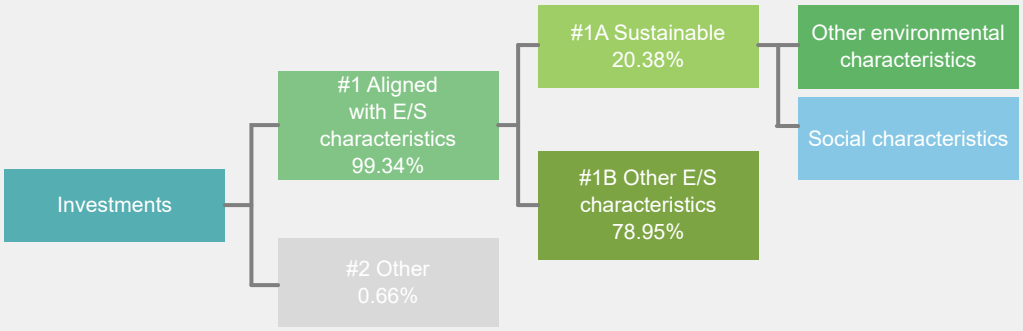
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.34% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 20.38% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.66% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**3.7%**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

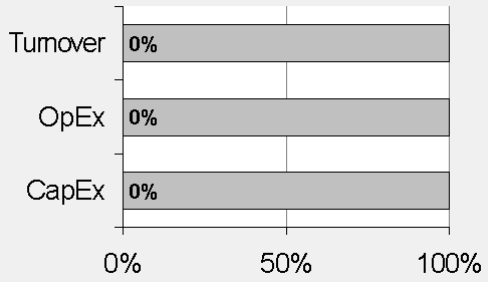
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

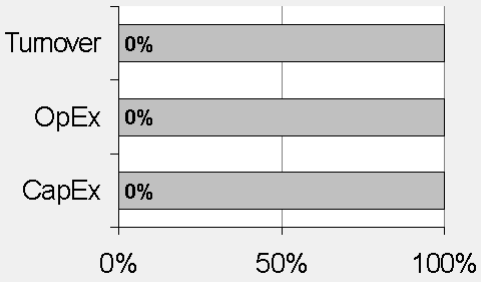
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 20.38% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 20.38% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by selecting and weighting the constituents with the aim of meeting the minimum standards of the EU Climate Transition Benchmarks ("EU CTB") and removing securities from the Parent Index that did not meet certain ESG criteria as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Emerging Markets Select Sustainability Screened CTB Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of the shares of certain listed large and medium capitalisation companies in global emerging markets. The Reference Index aims to meet the minimum standards for EU CTB as set out in the CTB Regulation. The Reference Index also aims to reduce exposure to select indicators, as detailed below, that are considered to have adverse environmental or social impact, and increase exposure to companies that make a positive contribution to the society and the environment.

Securities are removed from the Parent Index that do not meet certain ESG criteria, including, but not limited to, those that:

• are classified as 'Red Flags' by MSCI in their ESG Controversies assessment (such as by failing to comply with the United Nations Global Compact principles);
• are assigned an insufficient Environment Controversy score as determined by MSCI in their ESG Controversies assessment;
• are assigned an insufficient MSCI ESG Rating;
• are categorised below a certain percentile threshold in the Biodiversity & Land Use Key Issue category as determined by MSCI in their ESG Ratings assessment;
• have any involvement in controversial weapons;
• are classified by MSCI in their Business Involvement Screening Research as breaching certain revenue thresholds in controversial activities, including, but not limited to, nuclear weapons, conventional weapons, civilian firearms, tobacco, genetically modified organisms ("GMO") and nuclear power; and
• are classified by MSCI in their Climate Change Metrics as breaching certain revenue thresholds in business activities that have a high potential impact on climate change, including, but not limited to, unconventional oil and gas extraction, arctic oil and gas extraction, thermal coal–based power generation and mining.

Please note that companies that are not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments are also excluded.

The Reference Index uses company ratings and research provided by MSCI ESG Research. In particular, the following components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provides research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provides climate data and tools to support investors integrating climate risk and opportunities into their investment strategy and processes.

MSCI Impact Solutions: Sustainable Impact Metrics

MSCI Impact Solutions' Sustainable Impact Metrics is designed to identify companies that derive

revenue from products or services with positive impact on society and the environment.

Securities from the Parent Index that are not removed in accordance with the ESG exclusions will constitute the “Eligible Universe”. Securities from the Eligible Universe are selected and weighted following an optimization–based approach which uses their market capitalisation as a starting point, based on the following constraints and objectives.

Securities in the Reference Index are subject to the following climate and other environmental or social objectives constraints, according to the thresholds determined by the Index Administrator:

• a minimum reduction of 30% in carbon intensity, as measured by Greenhouse Gas (“GHG”) intensity compared to the Parent Index;
• a minimum average reduction per year of 7% in carbon intensity;
• a minimum weight in high climate impact sectors at least equal to its weight in the Parent Index
• a minimum reduction in water emissions intensity and hazardous waste intensity compared to the Parent Index;

• a minimum weighted average company revenue in activities deemed as having a sustainable impact as determined by the Index Administrator;
• a minimum increase in the weight of companies setting decarbonisation targets compared to the Eligible Universe; and
• a maximum weight in securities with lower MSCI ESG Ratings.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers USA Biodiversity Focus SRI UCITS ETF

Legal entity identifier: 254900Q1GMM5X0HLK512

Did this financial product have a sustainable investment objective?

Yes	No
[ ] it made **sustainable investments with an environmental objective:** ___%	[X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.62 % of sustainable investments.
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It made **sustainable investments with a social objective:** ___%	[ ] It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the ISS STOXX® US Biodiversity Focus SRI Index (the "Reference Index") which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in negative impact on biodiversity, a reduction in greenhouse gas intensity, and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies in the USA that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

The Reference Index was based on the STOXX US Index (the "Parent Index"). The Parent Index included companies in the USA. Constituents of the Parent Index that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria were eligible for inclusion in the Reference Index.

ESG and Biodiversity Exclusions

Securities from the Parent Index which did not meet certain ESG or biodiversity related criteria were excluded, including, but not limited to, those that:

• Were unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Were assigned an ESG Rating of D+ or below by ISS ESG;
• Were identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines;
• Were identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Were identified by ISS ESG as having any involvement in controversial weapons;
• Were identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Were identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index were assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aimed to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time. Securities were ranked by PDF over enterprise value including cash ("EVIC").

The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/

SDG Impact Assessment

Potential constituents were assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measured the extent to which companies were managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs. ISS ESG calculated an aggregated SDG Impact Rating score, based on certain

biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved.

The Reference Index utilised ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and cotroversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components were utilised:

ISS ESG Corporate Rating

ISS ESG provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. ISS ESG provided an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assessed and quantified the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determined a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provided carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions

How did the sustainability indicators perform?

Xtrackers USA Biodiversity Focus SRI UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.14 Market weight (%)
Exposure to Biodiversity-related Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more severe or very severe environmental controversies related to biodiversity, as determined by MSCI or for which no data was available.	0.14 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	1.07 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.14 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.14 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	477.11 tCO2e / million EUR
SDG Impact Rating	The financial product's portfolio's median score of each company's overall impact on the SDGs, based on the sum of the companies' highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by ISS ESG.	2.68

…and compared to previous periods?

Xtrackers USA Biodiversity Focus SRI UCITS ETF

Controversial Weapons Involvement	0.55	0.34	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 31.62% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7)
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers USA Biodiversity Focus SRI UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Apple	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	8.2 %	United States
NVIDIA Corp.	C - Manufacturing	8.2 %	United States
Microsoft Corp.	J - Information and communication	7.9 %	United States
JPMorgan Chase & Co.	K - Financial and insurance activities	3.1 %	United States
Amazon.com	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	2.4 %	United States

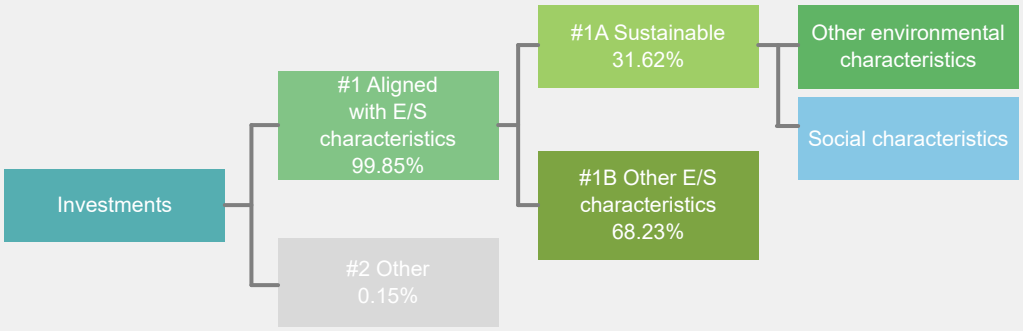
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.85% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 31.62% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.15% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers USA Biodiversity Focus SRI UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	0.6 %
C	Manufacturing	36.4 %
D	Electricity, gas, steam and air conditioning supply	0.1 %
E	Water supply; sewerage; waste managment and remediation activities	0.3 %
F	Construction	0.1 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	18.2 %
H	Transporting and storage	0.6 %
I	Accommodation and food service activities	1.3 %
J	Information and communication	20.1 %
K	Financial and insurance activities	15.3 %

M	Professional, scientific and technical activities	3.4 %
N	Administrative and support service activities	0.8 %
Q	Human health and social work activities	0.7 %
NA	Other	0.9 %
Exposure to companies active in the fossil fuel sector*		**1.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

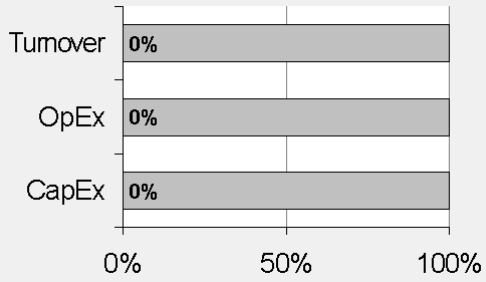
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

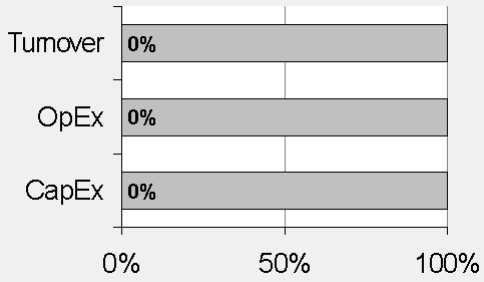
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 31.62% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 31.62% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific biodiversity–related and ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the ISS STOXX® US Biodiversity Focus SRI Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of companies in the USA that meet certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

ESG and Biodiversity Exclusions

Securities from the Parent Index which do not meet certain ESG or biodiversity related criteria are excluded, including, but not limited to, those that:

• Are unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Are assigned an ESG Rating of D+ or below by ISS ESG;
• Are identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines;
• Are identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Are identified by ISS ESG as having any involvement in controversial weapons;
• Are identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Are identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index are assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aims to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time. Securities are ranked by PDF over enterprise value including cash ("EVIC"). The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index are excluded from the Reference Index. Securities for which no data is available are also excluded from the Reference Index. For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/.

SDG Impact Assessment

Potential constituents are assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measures the extent to which companies are managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs.

ISS ESG calculates an aggregated SDG Impact Rating score, based on certain biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score are excluded from the Reference Index. Securities for which no

data is available are also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved.

The Reference Index utilises ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and cotroversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components are utilised:

ISS ESG Corporate Rating

ISS ESG provides research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. ISS ESG provides an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assesses and quantifies the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determines a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provide carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers World Biodiversity Focus SRI UCITS ETF

Legal entity identifier: 254900L0MY77Q8HZYW55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 30.34 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the ISS STOXX® Developed World Biodiversity Focus SRI Index (the "Reference Index") which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in negative impact on biodiversity, a reduction in greenhouse gas intensity, and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium capitalisation companies in global developed market countries that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

The Reference Index was based on the STOXX Developed World Index (the "Parent Index"). The Parent Index included large and medium capitalisation companies across developed markets globally. Constituents of the Parent Index that met certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria were eligible for inclusion in the Reference Index.

ESG and Biodiversity Exclusions

Securities from the Parent Index which did not meet certain ESG or biodiversity related criteria were excluded, including, but not limited to, those that:

• Were unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Were assigned an ESG Rating of D+ or below by ISS ESG;
• Were identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anticorruption established in the UN Global Compact and the OECD Guidelines;
• Were identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Were identified by ISS ESG as having any involvement in controversial weapons;
• Were identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Were identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index were assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aimed to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time.

Securities were ranked by PDF over enterprise value including cash ("EVIC"). The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/.

SDG Impact Assessment

Potential constituents were assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measured the extent to which companies were managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs. ISS ESG calculated an aggregated SDG Impact Rating score, based on certain

biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score were excluded from the Reference Index. Securities for which no data was available were also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also included a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index had been insufficiently reduced compared to the Parent Index, constituents were excluded by descending order of GHG intensity until a relevant reduction threshold was achieved.

The Reference Index utilised ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provided expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and controversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components were utilised:

ISS ESG Corporate Rating

ISS ESG provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. ISS ESG provided an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assessed companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assessed and quantified the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determined a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provided carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions

How did the sustainability indicators perform?

Xtrackers World Biodiversity Focus SRI UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.09 Market weight (%)
Exposure to Biodiversity-related Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more severe or very severe environmental controversies related to biodiversity, as determined by MSCI or for which no data was available.	0.28 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.36 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.12 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.12 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	493.76 tCO2e / million EUR
SDG Impact Rating	The financial product's portfolio's median score of each company's overall impact on the SDGs, based on the sum of the companies' highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by ISS ESG.	2.94

…and compared to previous periods?

Xtrackers World Biodiversity Focus SRI UCITS ETF

Indicators Performance	30/12/2024	29/12/2023	
Exposure to Very Severe Controversies	0.22	0.26	Market weight (%)
Exposure to Worst-in-Class Issuers	0.23	0.32	Market weight (%)
Greenhouse Gas Intensity	446.21	468.93	tCO2e / million EUR

Exposure to Biodiversity-related Controversies	0.22	0.26	Market weight (%)
Exposure to Fossil Fuels	3.24	2.05	Market weight (%)
Controversial Weapons Involvement	0.20	0.26	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 30.34% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7)
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14)

What were the top investments of this financial product?

Xtrackers World Biodiversity Focus SRI UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
NVIDIA Corp.	C - Manufacturing	6.8 %	United States
Apple	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	6.6 %	United States
Microsoft Corp.	J - Information and communication	6.3 %	United States
Amazon.com	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	1.7 %	United States
VISA Cl.A	K - Financial and insurance activities	1.5 %	United States

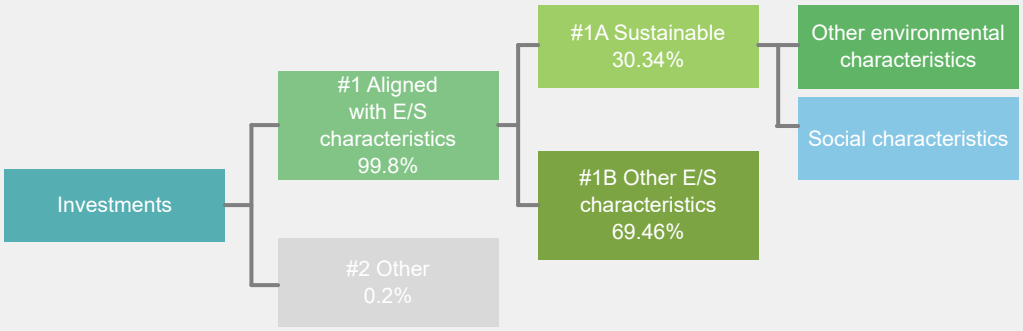
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.8% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 30.34% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.2% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers World Biodiversity Focus SRI UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.1 %
B	Mining and quarrying	0.7 %
C	Manufacturing	32.4 %
D	Electricity, gas, steam and air conditioning supply	0.3 %
E	Water supply; sewerage; waste managment and remediation activities	0.4 %
F	Construction	0.2 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	15.2 %
H	Transporting and storage	1.1 %
I	Accommodation and food service activities	1.2 %
J	Information and communication	18.2 %
K	Financial and insurance activities	19.1 %
L	Real estate activities	1.2 %
M	Professional, scientific and technical activities	6.9 %
N	Administrative and support service activities	0.9 %
Q	Human health and social work activities	0.5 %
R	Arts, entertainment and recreation	0.0 %
S	Other services activities	0.0 %
NA	Other	1.4 %
Exposure to companies active in the fossil fuel sector*		**2.5 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

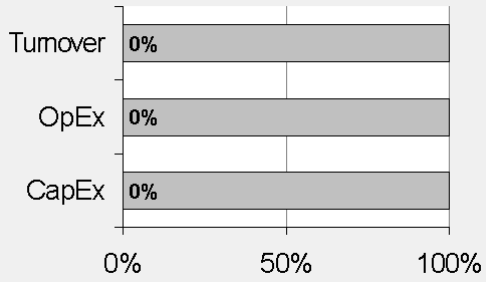
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

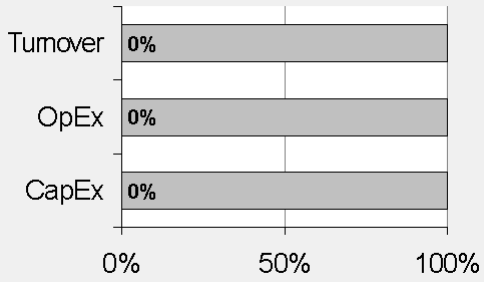
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 30.34% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 30.34% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific biodiversity–related and ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financiel product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the ISS STOXX® Developed World Biodiversity Focus SRI Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The investment objective of the financial product is to track the performance before fees and expenses of the Reference Index. The Reference Index is designed to reflect the performance of the shares of large and medium capitalisation companies in global developed market countries that meet certain minimum standards with regard to biodiversity and environmental, social and governance ("ESG") criteria.

ESG and Biodiversity Exclusions

Securities from the Parent Index which do not meet certain ESG or biodiversity related criteria are excluded, including, but not limited to, those that:

• Are unrated by Institutional Shareholder Services Inc. ("ISS ESG");
• Are assigned an ESG Rating of D+ or below by ISS ESG;
• Are identified as 'Red' by ISS ESG in their Norms Based Screening. ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines;
• Are identified by ISS ESG to have 'Severe' or 'Very Severe' controversies with regard to Environmental Protection;
• Are identified by ISS ESG as having any involvement in controversial weapons;
• Are identified by ISS ESG as breaching certain revenue thresholds in controversial activities, including, but not limited to: tobacco, civilian firearms, military equipment, nuclear power, thermal coal, unconventional oil and gas extraction, fossil fuels, adult entertainment, alcohol, and gambling;
• Are identified by ISS ESG as breaching certain revenue thresholds in activities with the potential to negatively contribute to biodiversity, including, but not limited to: palm oil, genetically modified organism (GMO) agriculture, hazardous pesticides, animal welfare, animal testing, and fur involvement.

Biodiversity Impact Assessment

Constituents from the Parent Index are assessed by ISS ESG's Biodiversity Impact Assessment Tool on their Potentially Disappeared Fraction ("PDF"), which aims to quantify the impact of companies on biodiversity by measuring the potential decline in species richness in an area over a specific period of time. Securities are ranked by PDF over enterprise value including cash ("EVIC"). The worst 20% of companies, as measured by PDF/EVIC, within each sector, as classified by the Industry Classification Benchmark ("ICB") approach, in the Parent Index are excluded from the Reference Index. Securities for which no data is available are also excluded from the Reference Index. For more details on the ISS ESG Biodiversity Impact Assessment Tool, please refer to: https://www.issgovernance.com/esg/biodiversity–impact–assessment–tool/.

SDG Impact Assessment

Potential constituents are assessed by ISS ESG's SDG Impact Rating on their impact on biodiversity–related UN Sustainable Development Goals ("SDG") objectives. The SDG Impact Rating measures the extent to which companies are managing negative externalities in their operations across the entire value chain to minimise negative impacts, while at the same time making use of existing and emerging opportunities in their products and services to contribute to the achievement of the SDGs.

ISS ESG calculates an aggregated SDG Impact Rating score, based on certain biodiversity–related UN SDGs, including:

• SDG 6 – Clean water and sanitation;
• SDG 7 – Affordable and clean energy;
• SDG 11 – Sustainable cities and communities;
• SDG 12 – Responsible consumption and production;
• SDG 13 – Climate action;
• SDG 14 – Life below water; and
• SDG 15 – Life on land.

The worst 20% of companies within each ICB sector in the Parent Index as measured by the aggregated SDG Impact Rating score are excluded from the Reference Index. Securities for which no

data is available are also excluded from the Reference Index.

Greenhouse Gas Intensity Reduction

The Reference Index also includes a carbon emission reduction rule, whereby if having applied the above exclusion and assessment criteria, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved.

The Reference Index utilises ESG data provided by Institutional Shareholder Services Inc. ("ISS ESG"). ISS ESG provides expertise across a variety of sustainable and responsible investment issues, including climate change, sustainable development goal linked impacts, biodiversity impact assessments, human rights, labour standards, corruption, and cotroversial weapons. More information on ISS ESG is available on https://www.issgovernance.com/esg/. In particular, the following five components are utilised:

ISS ESG Corporate Rating

ISS ESG provides research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. ISS ESG provides an overall company ESG rating.

ISS ESG Norms Based Screening

ISS ESG's Norms Based Screening assesses companies against their adherence to international norms on human rights, labour standards, environmental protection and anti–corruption established in the UN Global Compact and the OECD Guidelines.

ISS ESG Biodiversity Impact Assessment Tool

The ISS ESG Biodiversity Impact Assessment Tool assesses and quantifies the potential impact of companies on biodiversity.

ISS ESG SDG Impact Rating

The ISS ESG SDG Impact Rating determines a company's positive or negative impact on the United Nations' Sustainable Development Goals across three key pillars: Products & Services, Operations Management and Controversies.

ISS ESG Climate Solutions

ISS ESG Climate Solutions provide carbon and climate data, such as analyses of Scope 1, 2 and 3 emissions.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Legal entity identifier: 254900OGLQZJKMKIV360

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 38.34 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI ACWI IMI SDG Social Fairness Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in fossil fuel extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production and a positive impact on the UN Sustainable Development Goals (“SDGs”).

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of companies that were associated with a positive contribution to the following SDGs: SDG 1, SDG 2, SDG 4, SDG 5, SDG 8 and SDG 10 (the “Social Fairness SDGs”) of the United Nations 2030 Agenda for Sustainable Development (the “UN 2030 Agenda”).

The Reference Index was based on the MSCI ACWI IMI Index (the “Parent Index”). Constituents of the Parent Index which were associated with a positive contribution to the Social Fairness SDGs, and which met certain ESG criteria were eligible for inclusion in the Reference Index. Information on the 17 SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were unrated by MSCI ESG Research;
• Were assigned an MSCI ESG Rating of ‘B’ and below;
• Had any tie to controversial weapons;
• Were classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Failed to comply with the United Nations Global Compact principles;
• Had an MSCI ESG Controversies score of 0 or those with very severe controversies, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Were assessed by MSCI Impact Solutions’ SDG Alignment as ‘Misaligned’ or ‘Strongly Misaligned’ on their net alignment to any of the 17 SDGs.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index used company ratings and research provided by MSCI ESG Research. Information on MSCI’s ESG Research products is available on: > https://www.msci.com/esg–investing .

In particular, the following five components were utilised:

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: > https://www.msci.com/our-solutions/esg-investing/esg-ratings.

MSCI ESG Controversies

MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: b3240-b5ed-0770-62c8-159c2ff785a0”> https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4df b3240-b5ed-0770-62c8-159c2ff785a0

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research (“BISR”) aimed to enable institutional investors to manage ESG standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: > http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

MSCI Impact Solutions’ SDG Alignment

MSCI Impact Solutions’ SDG Alignment aimed to provide a holistic view of companies’ net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies’ operations, products and services, policies, and practices.

MSCI Climate Change Metrics

MSCI Climate Change Metrics provided climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. For more details on MSCI Climate Change Metrics, please refer to: > https://www.msci.com/our-solutions/esginvesting/climate-solutions/climate-data-metrics .

SDG Impact Selection

Constituents from the Parent Index which passed the ESG exclusions criteria outlined above were assessed by MSCI Impact Solutions’ Sustainable Impact Metrics for their exposure to products and services which aimed to contribute positively to the Social Fairness SDGs. Companies that met a certain revenue threshold from business activities associated with the Social Fairness SDGs were selected (“Social Fairness SDGs Aligned Business Activities”). Such Social Fairness SDGs Aligned Business Activities may have included, but were not limited to:
• Nutrition;
• Major Disease Treatment;
• Sanitation;
• Affordable Real Estate;
• Education;
• Contraceptives;
• Sustainable Agriculture;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) passed the ESG exclusions criteria outlined above, but (ii) did not pass the SDG impact selection criteria outlined above, may however still have been eligible for inclusion in the Reference Index if (iii) they passed certain SDG thematic selection criteria.

In order to assess constituents’ exposure to the theme of helping promote growth, development, and safeguards for employees and communities, MSCI Limited (the “Index Administrator”) defined a SDG management universe (the “SDG Management Universe”). The SDG Management Universe was constructed by using management scores of the following MSCI ESG Ratings’ key issues: Labour Management, Human Capital Development, Supply Chain Labour Standards, Health & Safety, Community Relations, Controversial Sourcing, Access to Finance, Opportunities in Nutrition & Health, Workforce Diversity Oversight & Programs (the “Key Issue Management Scores”), in order to identify companies that had better management strategies geared towards promoting growth, development, and safeguards of key stakeholders relative to their sector peers. The Workforce Diversity Oversight & Programs key issue management score was determined by combining two separate indicators - Workforce diversity oversight by management and Programs to increase workforce diversity. These were converted and combined to give a key issue score.

An average management score (“AMS”) was calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which were not assessed on any relevant key issues or did not have exposure above a certain threshold to any relevant key issues were excluded from the SDG Management Universe. A sector-relative management score (“SRMS”) was then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its Global Industry Classification Standard (“GICS”) Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company did not meet a minimum AMS were excluded from the calculation of SRMS. To have been eligible for inclusion in the SDG Management Universe, securities must have met a certain SRMS threshold.

Constituents that did not have any revenue that contributes to Social Fairness SDGs and constituents that did not reach a certain threshold on any of the relevant Key Issue Management Scores were excluded from the eligible universe.

Selection and Weighting

The Reference Index excluded securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which were traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which passed the ESG exclusions criteria and the SDG impact selection criteria were weighted by the product of their percentage of revenue exposure from Social Fairness SDGs Aligned Business Activities and their free float-adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 50%.
• Securities which passed the ESG exclusions criteria and the SDG thematic selection criteria were weighted according to their free float-adjusted market capitalisation. Such securities then had their weighting in the Reference Index scaled to 50%.

How did the sustainability indicators perform?

Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	9.8 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
SDG Impact Rating	The financial product’s portfolio’s median score of each company’s overall impact on the SDGs, based on the sum of the companies’ highest positive and lowest negative SDG impact rating on a scale of -10 (significant negative impact) to 10 (significant positive impact), as measured by ISS ESG.	3.73

…and compared to previous periods?

Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Indicators Performance	30/12/2024	
Exposure to Very Severe Controversies	0.13	Market weight (%)
Exposure to Worst-in-Class Issuers	0.13	Market weight (%)
SDG Impact Rating	3.61	
Exposure to Fossil Fuels	1.48	Market weight (%)
Controversial Weapons Involvement	0.13	% of assets

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 38.34% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Activities negatively affecting biodiversity–sensitive areas (no. 7);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no.14).

What were the top investments of this financial product?

Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
Siemens Reg.	C - Manufacturing	4.5 %	Germany
Bank of America Corp.	K - Financial and insurance activities	4.5 %	United States
Lowe's Companies	G - Wholesale and retail trade; repair of motor vehicles and motorcycles	3.9 %	United States
Cisco Systems	C - Manufacturing	3.6 %	United States
Sumitomo Mitsui Financial Group	K - Financial and insurance activities	3.1 %	Japan
Eli Lilly and Company	C - Manufacturing	2.7 %	United States

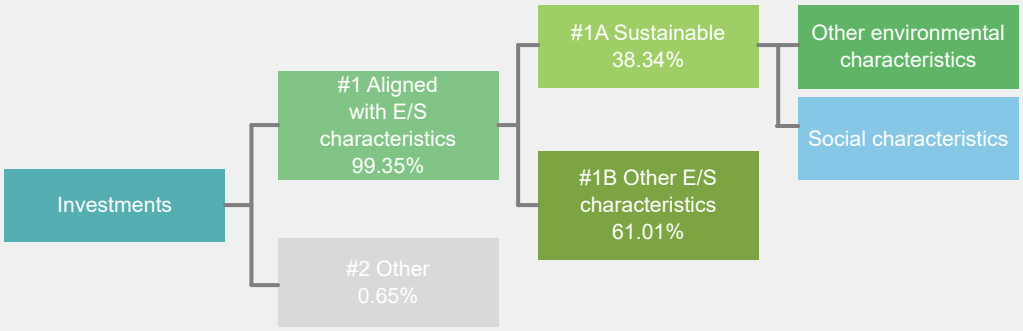
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.35% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 38.34% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.65% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	1.0 %
C	Manufacturing	31.2 %
F	Construction	0.9 %
G	Wholesale and retail trade; repair of motor vehicles and motorcycles	5.0 %
J	Information and communication	12.5 %
K	Financial and insurance activities	22.1 %
L	Real estate activities	5.7 %
M	Professional, scientific and technical activities	13.7 %
N	Administrative and support service activities	3.2 %
P	Education	1.7 %
Q	Human health and social work activities	0.4 %
NA	Other	2.4 %
Exposure to companies active in the fossil fuel sector*		**5.5 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

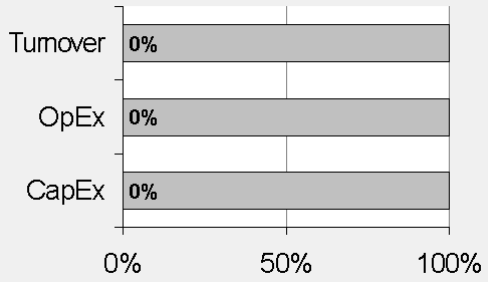
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

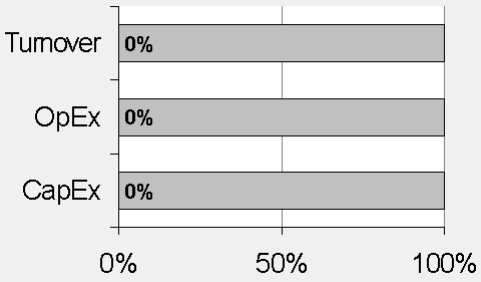
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 38.34% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 38.34% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and applying SDG impact selection and SDG thematic selection criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI ACWI IMI SDG Social Fairness Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of large, medium, and small-capitalisation companies across developed and emerging markets globally. The Reference Index is designed to reflect the performance of the shares of companies that are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda.

Constituents of the Parent Index which are associated with a positive contribution to the Social Fairness SDGs of the UN 2030 Agenda, and which meet certain ESG criteria are eligible for inclusion in the Reference Index. Information on the 17 SDGs contained in the UN 2030 Agenda is available on: https://sdgs.un.org/.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are unrated by MSCI ESG Research;
• Are assigned an MSCI ESG Rating of 'B' and below;
• Have any tie to controversial weapons;
• Are classified by MSCI in their Business Involvement Screening Research as breaching certain thresholds in controversial activities, including, but not limited to: tobacco, conventional weapons, nuclear weapons, civilian firearms, thermal coal, adult entertainment, alcohol, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction and oil sands, unconventional oil & gas extraction, and power generation;
• Fail to comply with the United Nations Global Compact principles;
• Have an MSCI ESG Controversies score of 0 or those with very severe controversies, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies; and
• Are assessed by MSCI Impact Solutions' SDG Alignment as 'Misaligned' or 'Strongly Misaligned' on their net alignment to any of the 17 SDGs.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index uses company ratings and research provided by MSCI ESG Research. Information on MSCI's ESG Research products is available on: https://www.msci.com/esg–investing. In particular, the following five components are utilised:

MSCI ESG Ratings

MSCI ESG Ratings provide research, data, analysis, and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating. For more details on MSCI ESG Ratings, please refer to: > https://www.msci.com/our-solutions/esg-investing/esg-ratings.

MSCI ESG Controversies

MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. For more details on MSCI ESG Controversies Score, please refer to: b3240-b5ed-0770-62c8-159c2ff785a0"> https://www.msci.com/documents/1296102/1636401/ESG_Controversies_Factsheet.pdf/4df b3240-b5ed-0770-62c8-159c2ff785a0.

MSCI ESG Business Involvement Screening Research

MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions. For more details on MSCI ESG Business Involvement Screening Research, please refer to: > http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf.

MSCI Impact Solutions' SDG Alignment

MSCI Impact Solutions' SDG Alignment aims to provide a holistic view of companies' net contribution, both positive and negative, towards addressing each of the 17 SDGs by analysing companies' operations, products and services, policies, and practices. MSCI Climate Change Metrics MSCI Climate Change Metrics provides climate data > https://www.msci.com/our-solutions/esginvesting/climate-solutions/climate-data-metrics .

SDG Impact Selection

Constituents from the Parent Index which pass the ESG exclusions criteria outlined above are assessed by MSCI Impact Solutions' Sustainable Impact Metrics for their exposure to products and services which aim to contribute positively to the Social Fairness SDGs. Companies that meet a certain revenue threshold from Social Fairness SDGs Aligned Business Activities are selected. Such Social Fairness SDGs Aligned Business Activities may include, but are not limited to:
• Nutrition;
• Major Disease Treatment;
• Sanitation;
• Affordable Real Estate;
• Education;
• Contraceptives;
• Sustainable Agriculture;
• SME finance; and
• Connectivity.

SDG Thematic Selection

Constituents from the Parent Index which (i) pass the ESG exclusions criteria outlined above, but (ii) do not pass the SDG impact selection criteria outlined above, may however still be eligible for inclusion in the Reference Index if (iii) they pass certain SDG thematic selection criteria.

In order to assess constituents' exposure to the theme of helping promote growth, development, and safeguards for employees and communities, the Index Administrator defines a SDG management universe (the "SDG Management Universe"). The SDG Management Universe is constructed by using management scores of the following MSCI ESG Ratings' key issues: Labour Management, Human Capital Development, Supply Chain Labour Standards, Health

An AMS is calculated for all companies in the Parent Index using the relevant Key Issue Management Scores. Constituents which are not assessed on any relevant key issues or do not have exposure above a certain threshold to any relevant key issues are excluded from the SDG Management Universe. A SRMS is then calculated for each company by dividing its AMS by the AMS of the highest scoring company in its GICS Sector. All companies belonging to GICS Sectors where the AMS of the highest scoring company does not meet a minimum AMS are excluded from the calculation of SRMS. To be eligible for inclusion in the SDG Management Universe, securities must meet a certain SRMS threshold.

Constituents that do not have any revenue that contributes to Social Fairness SDGs and constituents that do not reach a certain threshold on any of the relevant Key Issue Management Scores are excluded from the eligible universe.

Selection and Weighting

The Reference Index excludes securities from the Parent Index, which would otherwise have passed the exclusion and selection criteria outlined above, which are traded on certain local exchanges in a select number of emerging market countries in order to aid replication of the Reference Index and the tradability of eligible securities.

Securities in the Reference Index are weighted according to the following rules:

• Securities which pass the ESG exclusions criteria and the SDG impact selection criteria are weighted by the product of their percentage of revenue exposure from Social Fairness SDGs Aligned Business Activities and their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.
• Securities which pass the ESG exclusions criteria and the SDG thematic selection criteria are weighted according to their free float-adjusted market capitalisation. Such securities will then have their weighting in the Reference Index scaled to 50%.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI Global Social Fairness Contributors UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Global Infrastructure ESG UCITS ETF

Legal entity identifier: 254900RTC4KIYT715444

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.49 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the Dow Jones Brookfield Global Green Infrastructure Index (the “Reference Index”) which included environmental and/or social considerations. The financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The financial product specifically promoted, amongst others, the environmental characteristics of: a reduction in greenhouse gas (“GHG”) intensity; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of listed companies from developed markets that were owners and operators of infrastructure assets, and which met certain, environmental, social and governance ("ESG") criteria.

The Reference Index was based on the Dow Jones Brookfield Global Plus Index (the “Parent Index”). The Reference Index sought to minimize the difference in constituent weights relative to the Parent index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints (as defined below) and excluding companies which did not fulfil certain ESG criteria.

ESG Exclusions

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG standards, amongst others, were excluded:

• Were classified by Sustainalytics by Morningstar (“Sustainalytics”) as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, and thermal coal, and conventional weapons;
• Were classified by S&P Trucost Limited (“Trucost”) in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing, and generation;
• Failed to comply with the United Nations Global Compact principles; and
• Were assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilised ESG data and research from S&P Global, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supported investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage were ineligible for index inclusion until they received such coverage. Please refer to http://www.sustainalytics.com/ for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assessed risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions used Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com/ for more information.

Reprisk

RepRisk is a leading data science company, was used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may have resulted in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG Exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum improvement in the weighted average S&P DJI ESG Score of the Reference Index relative to the Parent Index;
• A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas (“GHG”), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilised ESG data and research from S&P DJI ESG and Trucost for the Climate and other ESG Objectives.

S&P DJI ESG

The S&P DJI ESG Score was built from the S&P Global ‘Corporate Sustainability Assessment’ (CSA), which was derived using either company-provided data, publicly available information. S&P Global used the CSA results to then calculate the S&P DJI ESG Scores. Please refer to https://www.spglobal.com/ for more information.

Trucost

Trucost climate data, as defined above, was used for the Climate related Objectives. Additionally, the below two Trucost attributes were utilised in the climate and other ESG constraints:

• Trucost’s Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs were those associated with a company’s direct operations, while indirect costs were those that were borne in the company’s supply chain. This included coverage of the company’s greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.
• Trucost’s Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index were subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index was reviewed and rebalanced on a quarterly basis and may have also been rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

How did the sustainability indicators perform?

Xtrackers Global Infrastructure ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0.17 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.17 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	811.72 tCO2e / million EUR

…and compared to previous periods?

Xtrackers Global Infrastructure ESG UCITS ETF

Indicators Performance	30/12/2024	
Exposure to Very Severe Controversies	0.00	Market weight (%)
Greenhouse Gas Intensity	787.77	tCO2e / million EUR
Tobacco Involvement	0.00	Market weight (%)
Controversial Weapons Involvement	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 33.49% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers Global Infrastructure ESG UCITS ETF

Largest investments	Breakdown by sector according to NACE Codes	in % of average portfolio volume	Breakdown by country
American Tower REIT	J - Information and communication	9.5 %	United States

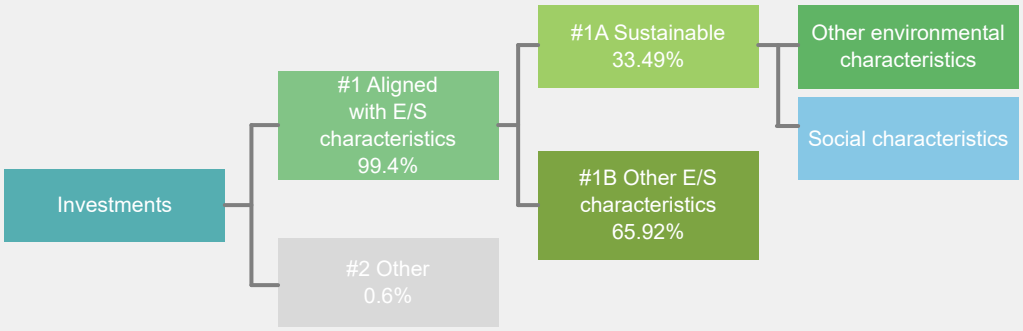
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.4% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 33.49% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.6% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Global Infrastructure ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
C	Manufacturing	8.2 %
D	Electricity, gas, steam and air conditioning supply	40.8 %
E	Water supply; sewerage; waste managment and remediation activities	4.2 %
F	Construction	0.2 %
H	Transporting and storage	4.8 %
J	Information and communication	14.8 %
K	Financial and insurance activities	0.4 %
M	Professional, scientific and technical activities	18.7 %
NA	Other	8.0 %
Exposure to companies active in the fossil fuel sector*		**47.2 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

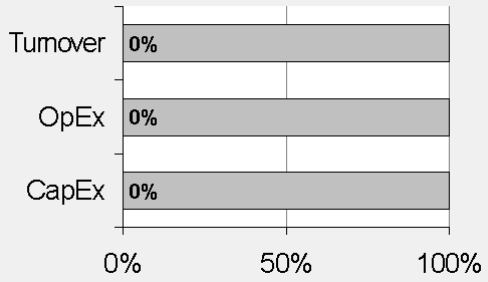
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

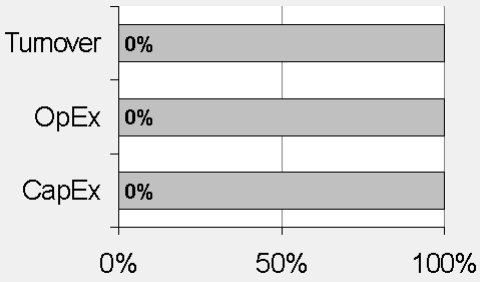
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.49% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 33.49% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation-based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Dow Jones Brookfield Global Green Infrastructure Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints and excluding companies which do not fulfil certain ESG criteria.

ESG Exclusions

The Reference Index applies an ESG exclusion approach where all of the companies from the Parent Index which breach the following ESG standards, amongst others, are excluded:

• Are classified by Sustainalytics by Morningstar ("Sustainalytics") as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, and thermal coal, and conventional weapons;
• Are classified by S&P Trucost Limited ("Trucost") in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing, and generation;
• Fail to comply with the United Nations Global Compact principles; and
• Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data and research from S&P Global, Trucost, Sustainalytics and RepRisk for the ESG Exclusions.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assesses risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions use Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com/ for more information.

Reprisk

RepRisk is a leading data science company, is used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the "Eligible Universe"). Securities from the Eligible Universe are selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum improvement in the weighted average S&P DJI ESG Score of the Reference Index relative to the Parent Index;
• A minimum reduction in the weighted average Trucost Total Impact Ratio of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas ("GHG"), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum reduction in Green-to-Brown Revenue Share of the Reference Index relative to the Parent Index; and
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from S&P DJI ESG and Trucost for the Climate and other ESG Objectives.

S&P DJI ESG

The S&P DJI ESG Score is built from the S&P Global 'Corporate Sustainability Assessment' (CSA), which is derived using either company-provided data, publicly available information. S&P Global uses the CSA results to then calculate the S&P DJI ESG Scores. Please refer to https://www.spglobal.com/ for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Additionally, the below two Trucost attributes are utilised in the climate and other ESG constraints:

• Trucost's Total Impact Ratio is a company level metric representing the sum of all the direct and indirect external environmental damage costs of a company, expressed as a percentage of revenue. Direct costs are those associated with a company's direct operations, while indirect costs are those that are borne in the company's supply chain. This includes coverage of the company's greenhouse gases, water use, waste generated, land, water and air pollutants generated, and natural resources used.
• Trucost's Green-to-Brown Revenue Share is the weighted average share of revenue derived from Green Sectors (including but not limited to renewable energy generation) over the weighted average share of revenue derived from Brown Sectors (including but not limited to non-renewable energy generation), as defined by Trucost Sectors.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers Global Infrastructure ESG UCITS ETF

Indicators	Performance Financial Product Xtrackers Global Infrastructure ESG UCITS ETF	Performance Benchmark Dow Jones Brookfield Global Green Infrastructure Index
Controversial Weapons Involvement	0 Market weight (%)	0 Market weight (%)
Tobacco involvement	0.17 Market weight (%)	0.17 Market weight (%)
Exposure to Very Severe Controversies	0.17 Market weight (%)	0.17 Market weight (%)

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers Developed Green Real Estate ESG UCITS ETF

Legal entity identifier: 254900JG0RK31LJM3E55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.09 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking Dow Jones Developed Green Real Estate Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, amongst others, the environmental characteristic of: a reduction in greenhouse gas (“GHG”) intensity; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of listed equity securities issued by real estate companies (including real estate investment trusts, "REITs") from global developed markets which met certain, environmental, social and governance ("ESG") criteria.

The Reference Index was based on the Dow Jones Developed Markets Select RESI Index (the “Parent Index”). The Reference Index sought to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints (as defined below) and excluding companies which did not fulfil certain ESG criteria.

ESG Exclusions

All of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Were classified by S&P Global Sustainable1’s (“Sustainable1”) Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
• Were classified by S&P Trucost Limited (“Trucost”) in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing, and generation;
• Failed to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar (“Sustainalytics”); and
• Were assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilised ESG data from Sustainable1, Trucost, Sustainalytics, and RepRisk for the ESG Exclusions.

Sustainable1 Business Involvement Screens

Sustainable1 Business Involvement Screens aimed to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to https://www.spglobal.com/ for more information.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supported investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage were ineligible for index inclusion until they received such coverage. Please refer to http://www.sustainalytics.com/ for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assessed risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions used Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com/ for more information.

Reprisk

RepRisk is a leading data science company, was used for daily filtering, screening, and analysis of

ESG risk incidents and controversial activities related to the companies which may have resulted in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG Exclusions outlined above constituted the eligible universe (the “Eligible Universe”). Securities from the Eligible Universe were selected and weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe were subject to climate and other ESG constraints including, but not limited to:

• A minimum improvement in the weighted average GRESB Total Score of the Reference Index relative to the Parent Index;
• A minimum improvement in the weighted average GRESB Building Certification Aspect Score of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas (“GHG”), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilised ESG data and research from GRESB and Trucost for the Climate and other ESG Objectives.

GRESB

GRESB is an independent organization providing validated ESG performance data and peer benchmarks for investors and managers. The GRESB Total score was an overall issuer score assigned based on the GRESB Real Estate Assessment which evaluated performance against seven sustainability aspects, including information on performance indicators, such as energy, GHG emissions, water, and waste. The GRESB Building Certificate Aspect Score assessed issuers’ use of green building certificates. The methodology was consistent across different regions, investment vehicles, and property types, and aligned with international reporting frameworks. Please refer to https://www.gresb.com/ for more information.

Trucost

Trucost climate data, as defined above, was used for the Climate related Objectives. Physical risk score assessed issuer sensitivity to the physical risks of climate change. Physical risks included wildfire, cold wave, heatwave, water stress, sea level rise, flood, and hurricanes.

Diversification and Deviation Objectives

Securities in the Reference Index were subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index.

The Reference Index was reviewed and rebalanced on a quarterly basis and may also have been rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

How did the sustainability indicators perform?

Xtrackers Developed Green Real Estate ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	336.48 tCO2e / million EUR

…and compared to previous periods?

Xtrackers Developed Green Real Estate ESG UCITS ETF

Indicators Performance	30/12/2024	
Exposure to Very Severe Controversies	0.00	Market weight (%)
Greenhouse Gas Intensity	363.16	tCO2e / million EUR
Controversial Weapons Involvement	0.00	Market weight (%)
Tobacco Involvement	0.00	Market weight (%)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 63.09% of the financial product's net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals ("UN SDGs"), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

- Involvement in harmful business activities;
- Violation of international norms or involvement in very severe controversies; and
- Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

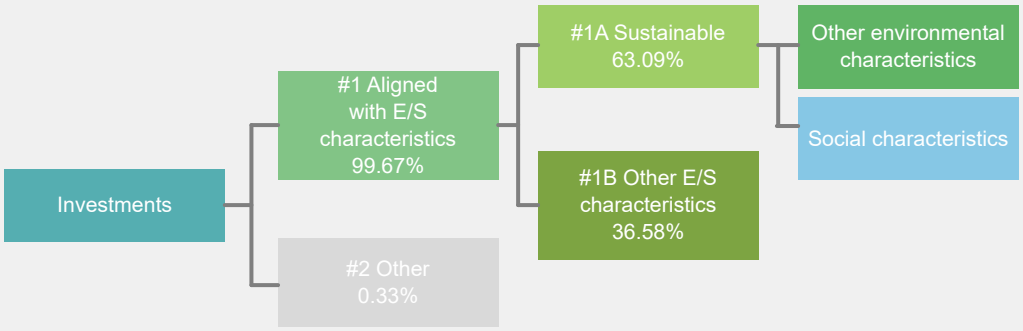
for the period from January 01, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.67% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 63.09% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.33% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers Developed Green Real Estate ESG UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
F	Construction	3.1 %
J	Information and communication	5.1 %
K	Financial and insurance activities	29.6 %
L	Real estate activities	59.0 %
M	Professional, scientific and technical activities	0.7 %
NA	Other	2.5 %
Exposure to companies active in the fossil fuel sector*		0.0 %

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

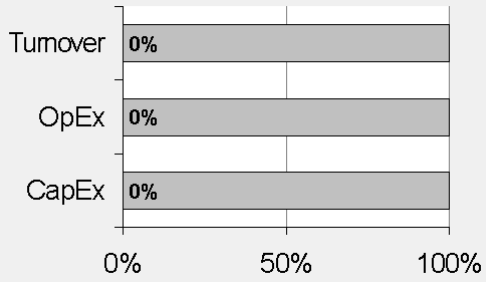
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

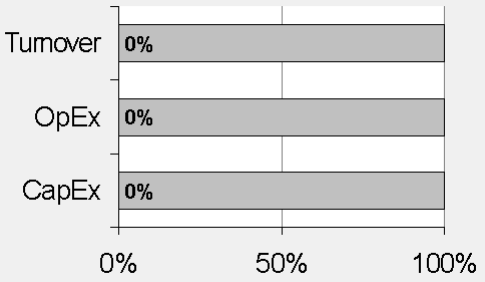
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 63.09% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 63.09% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria and selecting and weighting eligible securities following an optimisation-based approach subject to certain climate and ESG objectives outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the Dow Jones Developed Green Real Estate Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index. The Reference Index seeks to minimize the difference in constituent weights relative to the Parent Index, while aligning with certain ESG and climate-related criteria through the use of optimisation constraints and excluding companies which do not fulfil certain ESG criteria.

ESG Exclusions

All of the companies from the Parent Index which breach the following ESG criteria are excluded:

• Are classified by S&P Global Sustainable1's ("Sustainable1") Business Involvement Screens as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, oil sands extraction, thermal coal, and conventional weapons;
• Are classified by S&P Trucost Limited ("Trucost") in their sector revenue dataset as breaching certain thresholds in controversial activities, including, but not limited to, fossil fuel exploration, processing, and generation;
• Fail to comply with the United Nations Global Compact principles as determined by Sustainalytics by Morningstar ("Sustainalytics"); and
• Are assessed by S&P Global, using RepRisk data, to have been involved in certain controversies or ESG risk incidents.

The Reference Index utilises ESG data from Sustainable1, Trucost, Sustainalytics, and RepRisk for the ESG Exclusions.

Sustainable1 Business Involvement Screens

Sustainable1 Business Involvement Screens aim to enable investors to align investment values with investment strategy by providing detailed assessments of common areas of concern pinpointing the level of involvement. For more details on S&P Global Business Involvement Screens, please refer to https://www.spglobal.com/ for more information.

Sustainalytics

Sustainalytics, a Morningstar company, is a leading independent ESG and corporate governance research, ratings and analytics firm that supports investors around the world with the development and implementation of responsible investment strategies. Companies without Sustainalytics coverage are ineligible for index inclusion until they receive such coverage. Please refer to http://www.sustainalytics.com/ for more information.

Trucost

S&P Trucost Limited (a part of S&P Global) is a leader in carbon and environmental data and risk analysis. S&P Trucost Limited assesses risks relating to climate change, natural resource constraints, and broader environmental, social, and governance factors. Companies and financial institutions use Trucost intelligence to understand their exposure to these factors, inform resilience, and identify transformative solutions for a more sustainable global economy. Please refer to https://www.spglobal.com/ for more information.

Reprisk

RepRisk is a leading data science company, is used for daily filtering, screening, and analysis of ESG risk incidents and controversial activities related to the companies which may result in further exclusions of companies from the Reference Index as determined by the Index Administrator. Please refer to http://www.reprisk.com/ for more information.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusions outlined above will constitute the eligible universe (the "Eligible Universe"). Securities from the Eligible Universe are selected and

weighted following an optimisation-based approach subject to the following two objectives: (i) climate and other ESG objectives and (ii) diversification objectives.

Climate and other ESG Objectives

Securities in the Eligible Universe are subject to climate and other ESG constraints including, but not limited to:

• A minimum improvement in the weighted average GRESB Total Score of the Reference Index relative to the Parent Index;
• A minimum improvement in the weighted average GRESB Building Certification Aspect Score of the Reference Index relative to the Parent Index;
• A minimum reduction in greenhouse gas ("GHG"), (expressed in CO2 equivalents) emissions intensity of the Reference Index relative to the Parent Index;
• A minimum reduction in the Physical Risk Score of the Reference Index relative to the Parent Index;
• A minimum improvement in the weight of eligible Science Based Target Companies relative to the Parent Index.

The Reference Index utilises ESG data and research from GRESB and Trucost for the Climate and other ESG Objectives.

GRESB

GRESB is an independent organization providing validated ESG performance data and peer benchmarks for investors and managers. The GRESB Total score is an overall issuer score assigned based on the GRESB Real Estate Assessment which evaluates performance against seven sustainability aspects, including information on performance indicators, such as energy, GHG emissions, water, and waste. The GRESB Building Certificate Aspect Score assesses issuers' use of green building certificates. The methodology is consistent across different regions, investment vehicles, and property types, and aligns with international reporting frameworks. Please refer to https://www.gresb.com/ for more information.

Trucost

Trucost climate data, as defined above, is used for the Climate related Objectives. Physical risk score assesses issuer sensitivity to the physical risks of climate change. Physical risks include wildfire, cold wave, heatwave, water stress, sea level rise, flood, and hurricanes.

Diversification and Deviation Objectives

Securities in the Reference Index are subject to diversification constraints to ensure diversification and representativeness of, for example, constituent weightings and liquidity constraints compared to the Parent Index. The Reference Index is reviewed and rebalanced on a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers DJE US Equity Research UCITS ETF

Legal entity identifier: 254900NOOJDDY9ZY9188

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

● ● ☐ Yes	● ○ X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.69 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had an MSCI Controversies Score of 0;
• Had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including civilian firearms, nuclear weapons, and conventional weapons;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco, oil sands extraction, and thermal coal.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

*MSCI ESG Ratings*MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

The portfolio allocation (the "Proposed Allocation") was provided by DJE Kapital AG (the "Discretionary Investment Advisor") on a scheduled quarterly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

The financial product did not designate a reference benchmark to promote these environmental and/or social characteristics.

How did the sustainability indicators perform?

Xtrackers DJE US Equity Research UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 28.69% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities
• iolation of international norms or involvement in very severe controversies; and
• iolation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

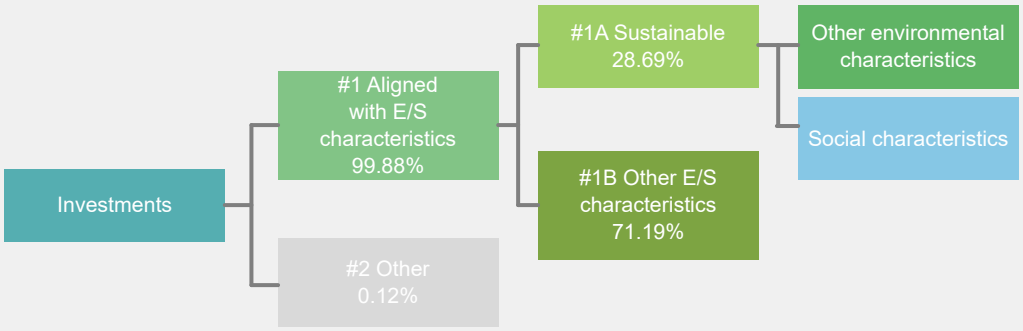
for the period from January 15, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 15, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.88% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 28.69% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.12% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers DJE US Equity Research UCITS ETF

Exposure to companies active in the fossil fuel sector*		**4.7 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

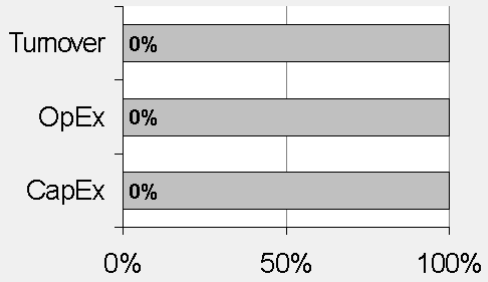
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

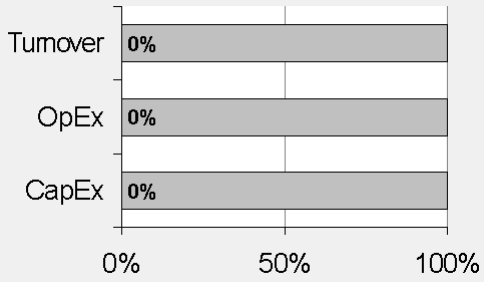
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.69% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 28.69% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had an MSCI Controversies Score of 0;
• Had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including civilian firearms, nuclear weapons, and conventional weapons;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco, oil sands extraction, and thermal coal.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

MSCI ESG Ratings

MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

The Proposed Allocation was provided by the Discretionary Investment Advisor on each Asset Selection Date or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance

How did this financial product perform compared to the reference sustainable benchmark?

The financial product did not designate a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers Europe Equity Enhanced Active UCITS ETF

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.78 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had a MSCI Controversies Score of 0;
• Had any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
• Were classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)
The Urgewald Global Coal Exit List aimed to give financial institutions a tool to remove coal from their portfolios. The GCEL aimed to provide coal-related data for companies within the coverage universe. GCEL covered the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The portfolio allocation (the "Proposed Allocation") was provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

The financial product did not designate a reference benchmark to promote these environmental and/or social characteristics.

How did the sustainability indicators perform?

Xtrackers Europe Equity Enhanced Active UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Oil Sands Extractions	The percentage of the financial product’s portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, or for which no data was available, as determined by MSCI.	0 Market weight (%)
Tobacco Production	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, or for which no data was available, as determined by MSCI.	0 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 23.78% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities
• iolation of international norms or involvement in very severe controversies; and
• iolation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

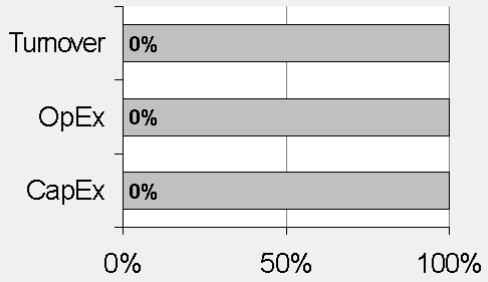
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

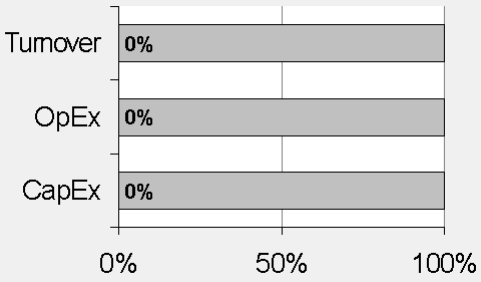
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 23.78% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 23.78% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had a MSCI Controversies Score of 0;
• Had any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
• Were classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)
The Urgewald Global Coal Exit List aimed to give financial institutions a tool to remove coal from their portfolios. The GCEL aimed to provide coal-related data for companies within the coverage universe. GCEL covered the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The Proposed Allocation was provided by the Discretionary Investment Advisor on each Asset Selection Date or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product did not designate a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The portfolio allocation (the "Proposed Allocation") was provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

The financial product did not designate a reference benchmark to promote these environmental and/or social characteristics.

How did the sustainability indicators perform?

Xtrackers US Equity Enhanced Active UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Oil Sands Extractions	The percentage of the financial product’s portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, or for which no data was available, as determined by MSCI.	0 Market weight (%)
Tobacco Production	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, or for which no data was available, as determined by MSCI.	0 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 24.73% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

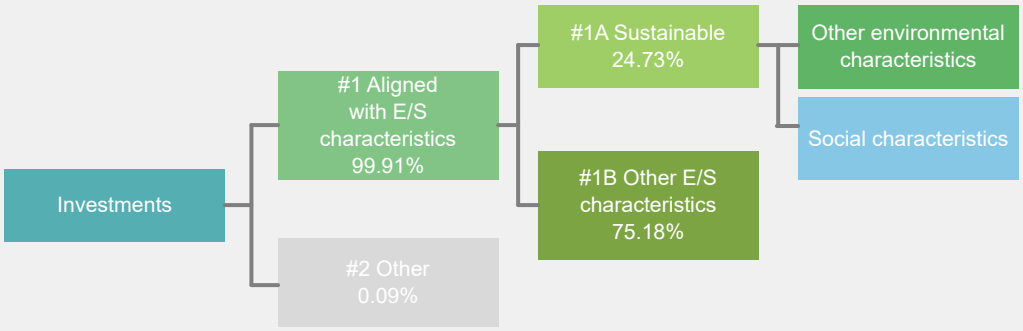
for the period from May 14, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from May 14, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.91% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 24.73% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.09% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers US Equity Enhanced Active UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
B	Mining and quarrying	1.2 %
C	Manufacturing	33.6 %

Exposure to companies active in the fossil fuel sector*		**9.5 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

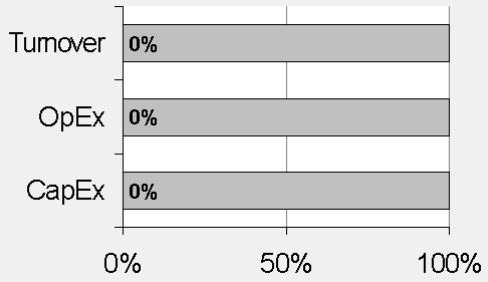
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

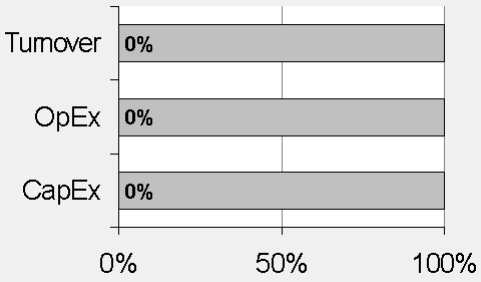
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.73% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 24.73% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had a MSCI Controversies Score of 0;
• Had any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
• Were classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)
The Urgewald Global Coal Exit List aimed to give financial institutions a tool to remove coal from their portfolios. The GCEL aimed to provide coal-related data for companies within the coverage universe. GCEL covered the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The Proposed Allocation was provided by the Discretionary Investment Advisor on each Asset Selection Date or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product did not designate a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. GCEL covered the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The portfolio allocation (the "Proposed Allocation") was provided by DWS International GmbH (the "Discretionary Investment Advisor ") on a scheduled monthly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

The financial product did not designate a reference benchmark to promote these environmental and/or social characteristics.

How did the sustainability indicators perform?

Xtrackers World Equity Enhanced Active UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Oil Sands Extractions	The percentage of the financial product’s portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, or for which no data was available, as determined by MSCI.	0 Market weight (%)
Tobacco Production	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco production with a revenue in this area of more than 0%, or for which no data was available, as determined by MSCI.	0 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 22.03% of the financial product’s net assets were invested in sustainable economic activities that contribute to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities refer to the proportion of an issuer's economic activities that contribute to an environmental objective and/or a social objective, provided that such investments do not significantly harm any of those objectives and that the investee companies follow good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable. The environmental and/or social objectives were identified by activities that contributed positively to the United Nations Sustainable Development Goals (“UN SDGs”), which included, but was not limited to, (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well–being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land, were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities
• iolation of international norms or involvement in very severe controversies; and
• iolation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers World Equity Enhanced Active UCITS ETF

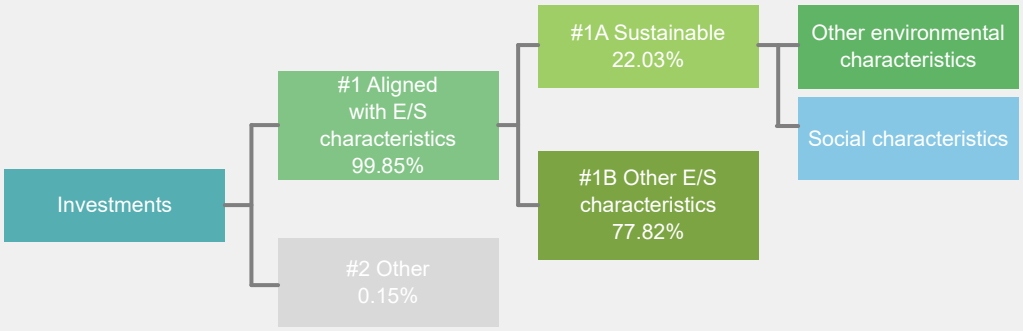
for the period from May 14, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from May 14, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.85% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.03% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.15% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers World Equity Enhanced Active UCITS ETF

Exposure to companies active in the fossil fuel sector*		**10.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

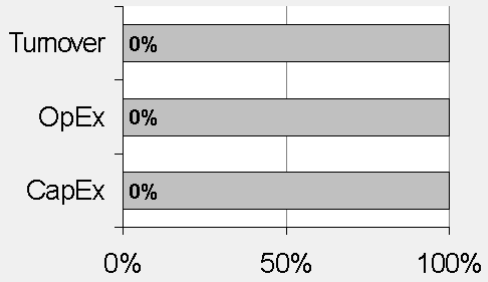
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

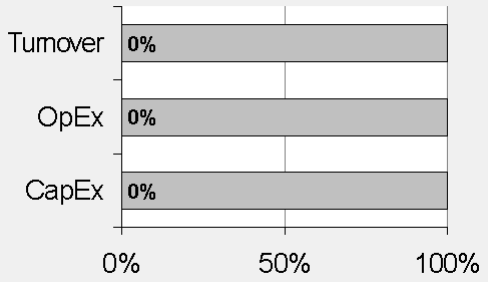
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.03% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.03% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from Urgewald and MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: Urgewald Global Coal Exit List (GCEL), MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had a MSCI Controversies Score of 0;
• Had any involvement in controversial or nuclear weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 10% in weapon-related activities, including conventional weapons and civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco production, thermal coal mining and power and unconventional oil and gas extraction (oil sands); and
• Were classified by GCEL as having any involvement in coal power expansion projects or coal mining expansion projects.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

*MSCI ESG Ratings*MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

Urgewald Global Coal Exit List (GCEL)
The Urgewald Global Coal Exit List aimed to give financial institutions a tool to remove coal from their portfolios. The GCEL aimed to provide coal-related data for companies within the coverage universe. GCEL covered the entire thermal coal value chain from coal exploration and mining, to coal power production and coal gasification. For full details please refer to www.urgewald.org/english

The Proposed Allocation was provided by the Discretionary Investment Advisor on each Asset Selection Date or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product did not designate a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI Europe Small Cap ESG UCITS ETF

Legal entity identifier: 254900TFVV5PWT2P1544

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	X No
☐ it made **sustainable investments with an environmental objective:** ___%	X It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.4 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	X with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI Europe Small Cap Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, the environmental characteristics of: reduction in greenhouse gas (“GHG”) intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of small-capitalisation companies across European developed markets which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI Europe Small Cap Index (the “Parent Index”). The Reference Index excluded companies from the Parent Index which did not fulfil certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applied an ESG Exclusion approach, where all of the companies from the Parent Index which breached the following ESG criteria, were excluded:
• Companies which were unrated or missing relevant coverage by MSCI ESG Research;
• Companies which were assigned an MSCI ESG Rating of BB or below;
• Companies which had any involvement in controversial weapons as categorised by MSCI ESG Research;
• Companies which had an MSCI ESG Controversies score of 0, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies;
• Companies which were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, fossil fuel power generation, unconventional oil and gas extraction, oil and gas, thermal coal mining and thermal coal power; and
• Companies which failed to comply with the United Nations Global Compact principles.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data

GHG Intensity Reduction Criteria
The Reference Index also includes carbon emission reduction criteria, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG Exclusion Criteria outlined above constituted the eligible universe (the “Eligible Universe”). The GHG Intensity Reduction Criteria may then have been applied to exclude additional securities from the Eligible Universe until the relevant GHG intensity reduction was achieved relative to the Parent Index. After the ESG Exclusion and GHG Intensity Reduction Criteria were applied, the remaining securities were weighted in proportion of their free float-adjusted market capitalisation.

The Reference Index was a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

How did the sustainability indicators perform?

Xtrackers MSCI Europe Small Cap ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.39 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 25.4% of the financial product's net assets were invested in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities were calculated as the product of an issuer's weight within the financial product and the proportion of such issuer's economic activities which contributed to an environmental objective and/or a social objective (an activity-based approach), provided that such investments did not significantly harm any of those objectives and that the investee companies followed good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable.

Sustainable economic activities that contribute to an environmental and/or social objective can be defined as 1) economic activities contributing to the objectives set out under the EU Taxonomy Regulation including, but not limited to, climate change mitigation and adaptation, or 2) economic activities that are not environmentally sustainable under the EU Taxonomy, but which contribute to an environmental or social objective as defined under Article 2(17) SFDR. The environmental and/or social objectives under Article 2(17) SFDR, which are not defined under the EU Taxonomy, included the United Nations Sustainable Development Goals ("UN SDGs"), of (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land. Such environmentally or socially sustainable investments were identified by their activities which contributed positively to the UN SDGs as measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

For the avoidance of doubt, while this Fund may have contributed to the environmental objectives of climate change mitigation and climate change adaptation, it measured such contribution in the manner outlined above and not against the technical screening criteria set down in the EU Taxonomy Regulation. As such, it did not commit a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

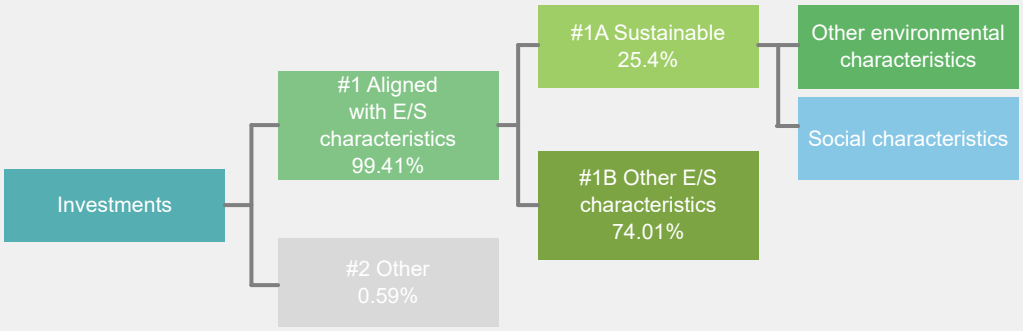
for the period from August 05, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from August 05, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.41% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.4% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.59% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI Europe Small Cap ESG UCITS ETF

Exposure to companies active in the fossil fuel sector*		**2.1 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

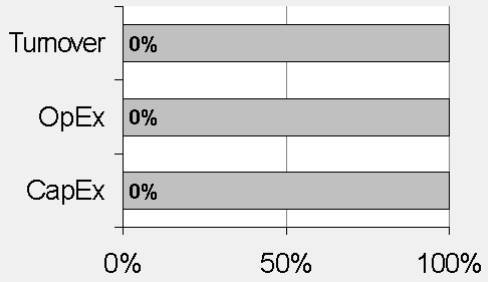
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

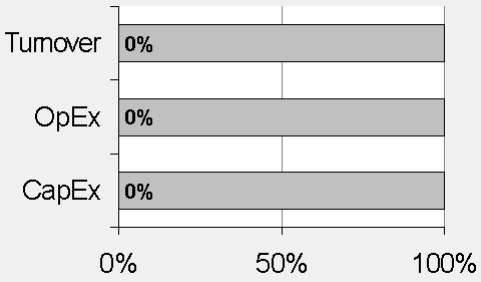
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.4% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.4% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI Europe Small Cap Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of small-capitalisation companies in European developed markets.

The Reference Index is based on the Parent Index and is designed to exclude companies from the Parent Index which do not meet certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applies an ESG Exclusion approach, where all of the companies from the Parent Index which breach the following ESG criteria, are excluded:
• Companies which are unrated or missing relevant coverage by MSCI ESG Research;
• Companies which are assigned an MSCI ESG Rating of BB or below;
• Companies which have any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Companies which have an MSCI ESG Controversies score of 0, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies;
• Companies which are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, fossil fuel power generation, unconventional oil and gas extraction, oil and gas, thermal coal mining and thermal coal power; and
• Companies which fail to comply with the United Nations Global Compact principles.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data

GHG Intensity Reduction Criteria

The Reference Index also includes carbon emission reduction criteria, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusion Criteria outlined above will constitute the eligible universe (the “Eligible Universe”). The GHG Intensity Reduction Criteria may then be applied to exclude additional securities from the Eligible Universe until the relevant GHG intensity reduction is achieved relative to the Parent Index. After the ESG Exclusion and GHG Intensity Reduction Criteria are applied, the remaining securities are weighted in proportion of their free float- adjusted market capitalisation.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers’ ESG metrics.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Xtrackers MSCI Europe Small Cap ESG UCITS ETF

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers MSCI World Small Cap ESG UCITS ETF

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 22.39 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

Sustainability indicators measure

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI World Small Cap Low Carbon SRI Screened Select Index (the “Reference Index”) which included environmental and/or social considerations. The financial product specifically promoted, the environmental characteristics of: reduction in greenhouse gas (“GHG”) intensity and a reduction in fossil fuel production; and the social characteristics of: a reduction in human and labour rights controversy occurrences and a reduction in controversial weapon production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of small-capitalisation companies across global developed markets which met certain minimum environmental, social and governance (“ESG”) criteria.

The Reference Index was based on the MSCI World Small Cap Index (the “Parent Index”). The Reference Index excluded companies from the Parent Index which did not fulfil certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applied an ESG Exclusion approach, where all of the companies from the Parent Index which breached the following ESG criteria, were excluded:
• Companies which were unrated or missing relevant coverage by MSCI ESG Research;
• Companies which were assigned an MSCI ESG Rating of BB or below;
• Companies which had any involvement in controversial weapons as categorised by MSCI ESG Research;
• Companies which had an MSCI ESG Controversies score of 0, or had an insufficient MSCI ESG Controversies score related to certain environmental controversies;
• Companies which were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, fossil fuel power generation, unconventional oil and gas extraction, oil and gas, thermal coal mining and thermal coal power; and
• Companies which failed to comply with the United Nations Global Compact principles.

Such exclusions comprised the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilised data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research (BISR) aimed to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provided climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes.

GHG Intensity Reduction Criteria

The Reference Index also includes carbon emission reduction criteria, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusion Criteria outlined above will constitute the eligible universe (the "Eligible Universe"). The GHG Intensity Reduction Criteria may then be applied to exclude additional securities from the Eligible Universe until the relevant GHG intensity reduction is achieved relative to the Parent Index. After the ESG Exclusion and GHG Intensity Reduction Criteria are applied, the remaining securities are weighted in proportion of their free float-adjusted market capitalisation.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

How did the sustainability indicators perform?

Xtrackers MSCI World Small Cap ESG UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.79 Market weight (%)
Exposure to Fossil Fuels	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in fossil fuels as determined by MSCI, which includes companies deriving revenue from thermal coal extraction, unconventional and conventional oil and gas extraction, oil refining, as well as revenue from thermal coal based power generation, liquid fuel based power generation, or natural gas based power generation, or for which no data was available.	4.81 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.79 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of "CCC" as determined by MSCI, or for which no data was available.	0.66 Market weight (%)
Greenhouse Gas Intensity	The financial product's portfolio's weighted average of ist holding issuers' GHG Intensity (Scope 1, Scope 2 and estimated Scope 3 GHG emissions/EUR million revenue), as determined by MSCI.	692.12 tCO2e / million EUR

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 22.39% of the financial product's net assets were invested in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities were calculated as the product of an issuer's weight within the financial product and the proportion of such issuer's economic activities which contributed to an environmental objective and/or a social objective (an activity-based approach), provided that such investments did not significantly harm any of those objectives and that the investee companies followed good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable.

Sustainable economic activities that contribute to an environmental and/or social objective can be defined as 1) economic activities contributing to the objectives set out under the EU Taxonomy Regulation including, but not limited to, climate change mitigation and adaptation, or 2) economic activities that are not environmentally sustainable under the EU Taxonomy, but which contribute to an environmental or social objective as defined under Article 2(17) SFDR. The environmental and/or social objectives under Article 2(17) SFDR, which are not defined under the EU Taxonomy, included the United Nations Sustainable Development Goals ("UN SDGs"), of (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy, (viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land. Such environmentally or socially sustainable investments were identified by their activities which contributed positively to the UN SDGs as measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

For the avoidance of doubt, while this Fund may have contributed to the environmental objectives of climate change mitigation and climate change adaptation, it measured such contribution in the manner outlined above and not against the technical screening criteria set down in the EU Taxonomy Regulation. As such, it did not commit a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

for the period from August 05, 2025, through December 31, 2025

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 98.8% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 22.39% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

1.2% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**1.6 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

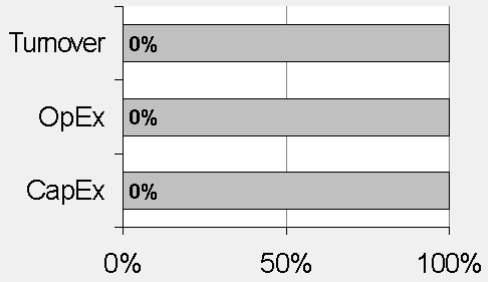
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

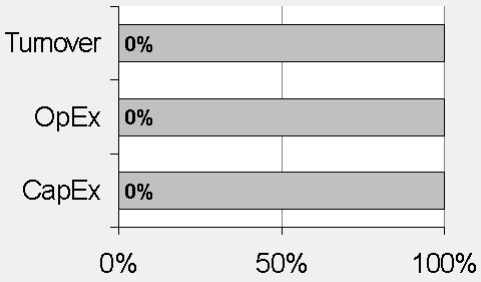
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.39% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 22.39% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG criteria outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index or unrelated transferable securities or other eligible assets.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI World Small Cap Low Carbon SRI Screened Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The Reference Index is based on the Parent Index, which is designed to reflect the performance of small-capitalisation companies in global developed markets.

The Reference Index is based on the Parent Index and is designed to exclude companies from the Parent Index which do not meet certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applies an ESG Exclusion approach, where all of the companies from the Parent Index which breach the following ESG criteria, are excluded:
• Companies which are unrated or missing relevant coverage by MSCI ESG Research;
• Companies which are assigned an MSCI ESG Rating of BB or below;
• Companies which have any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Companies which have an MSCI ESG Controversies score of 0, or have an insufficient MSCI ESG Controversies score related to certain environmental controversies;
• Companies which are classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, nuclear weapons, tobacco, adult entertainment, alcohol, conventional weapons, gambling, genetically modified organisms, nuclear power, fossil fuel reserves ownership, fossil fuel extraction, fossil fuel power generation, unconventional oil and gas extraction, oil and gas, thermal coal mining and thermal coal power; and
• Companies which fail to comply with the United Nations Global Compact principles.

Such exclusions comprise the requirements as laid out in Article 12(1)(a) to (g) of the Commission Delegated Regulation (EU) 2020/1818 ("PAB Exclusions").

The Reference Index utilises data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provide research, data, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities. MSCI ESG Ratings provides an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR is utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data

GHG Intensity Reduction Criteria

The Reference Index also includes carbon emission reduction criteria, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the Reference Index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved as determined by MSCI Climate Change Metrics.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusion Criteria outlined above will constitute the eligible universe (the "Eligible Universe"). The GHG Intensity Reduction Criteria may then be applied to exclude additional securities from the Eligible Universe until the relevant GHG intensity reduction is achieved relative to the Parent Index. After the ESG Exclusion and GHG Intensity Reduction Criteria are applied, the remaining securities are weighted in proportion of their free float-adjusted market capitalisation.

The Reference Index is reviewed and rebalanced on at least a quarterly basis and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions or based on certain changes to issuers' ESG metrics.

The Reference Index is a total return net index. A total return net index calculates the performance of the index constituents on the basis that any dividends or distributions are reinvested net of applicable withholding tax.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Xtrackers DJE Europe Equity Research UCITS ETF

Legal entity identifier: 254900VGYTM7SHS9BG15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
[ ] it made **sustainable investments with an environmental objective:** ___%	[X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 19.91 % of sustainable investments.
[ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy	[ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
[ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	[X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	[X] with a social objective
[ ] It made **sustainable investments with a social objective:** ___%	[ ] It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had an MSCI Controversies Score of 0;
• Had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco and oil sands extraction;
• Were classified by MSCI as breaching revenue thresholds of up to 30% in thermal coal activities.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

*MSCI ESG Ratings*MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

The portfolio allocation (the "Proposed Allocation") was provided by DJE Kapital AG (the "Discretionary Investment Advisor") on a scheduled quarterly basis (the "Asset Selection Date") or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

The financial product did not designate a reference benchmark to promote these environmental and/or social characteristics.

How did the sustainability indicators perform?

Xtrackers DJE Europe Equity Research UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0 Market weight (%)
Tobacco involvement	The percentage of the financial product's portfolio's market value exposed to companies flagged for involvement in tobacco as determined by MSCI, and includes all tobacco producers as well as tobacco distributors, suppliers, and retailers with a combined revenue in these areas of more than, or equal to, 5%, or for which no data was available.	0 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0 Market weight (%)
Oil Sands Extractions	The percentage of the financial product’s portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, or for which no data was available, as determined by MSCI.	0 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 19.91% of the financial product’s net assets were invested in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities were calculated as the product of an issuer’s weight within the financial product and the proportion of such issuer's economic activities which contributed to an environmental objective and/or a social objective (an activity-based approach), provided that such investments did not significantly harm any of those objectives and that the investee companies followed good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable.

Sustainable economic activities that contribute to an environmental and/or social objective can be defined as 1) economic activities contributing to the objectives set out under the EU Taxonomy Regulation including, but not limited to, climate change mitigation and adaptation, or 2) economic activities that are not environmentally sustainable under the EU Taxonomy, but which contribute to an environmental or social objective as defined under Article 2(17) SFDR. The environmental and/or social objectives under Article 2(17) SFDR, which are not defined under the EU Taxonomy, included the United Nations Sustainable Development Goals (“UN SDGs”), of (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy,(viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land. Such environmentally or socially sustainable investments were identified by their activities which contributed positively to the UN SDGs as measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

For the avoidance of doubt, while this Fund may have contributed to the environmental objectives of climate change mitigation and climate change adaptation, it measured such contribution in the manner outlined above and not against the technical screening criteria set down in the EU Taxonomy Regulation. As such, it did not commit a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were ineligible for investment by the financial product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

Xtrackers DJE Europe Equity Research UCITS ETF

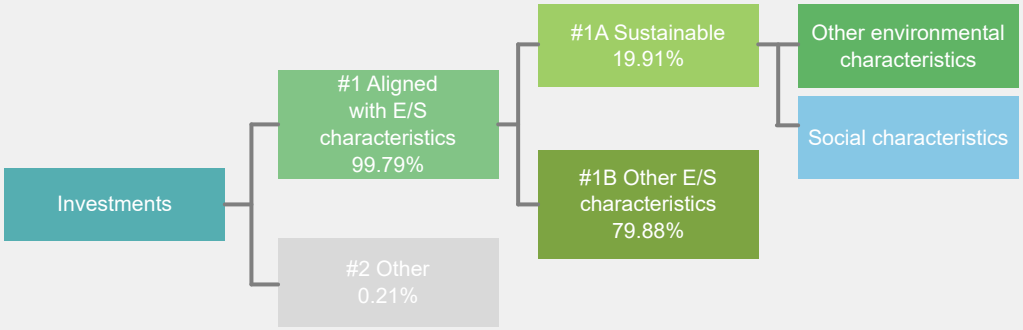
for the period from December 09, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from December 09, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.79% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 19.91% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.21% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Exposure to companies active in the fossil fuel sector*		**15.5%**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

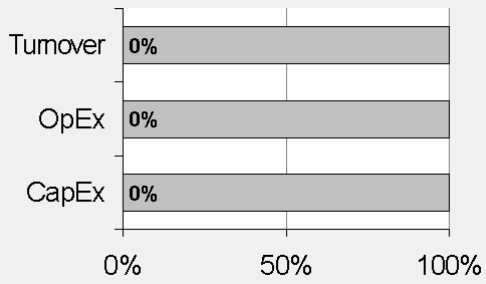
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

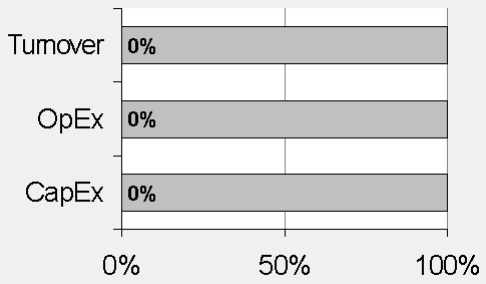
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.91% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 19.91% in total.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under "#2 Other", included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR through the screening of the portfolio against an ESG database. The financial product specifically promoted, the environmental characteristic of a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production. The financial product utilised data from MSCI ESG Research LLC ("MSCI") to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies, and MSCI ESG Business Involvement Screening Research.

Companies in the Investment Universe which breached the following ESG standards, among others, were excluded:
• Were assigned an MSCI ESG Rating of 'CCC';
• Failed to comply with the United Nations Global Compact principles or had an MSCI Controversies Score of 0;
• Had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in civilian firearms;
• Were classified by MSCI as breaching revenue thresholds of up to 5% in controversial activities, including tobacco and oil sands extraction;
• Were classified by MSCI as breaching revenue thresholds of up to 30% in thermal coal activities.

Please note that companies that were not assessed by MSCI ESG Research in the ESG Controversies and ESG Ratings assessments were also excluded.

*MSCI ESG Ratings*MSCI ESG Ratings provided research, data, analysis, and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aimed to enable institutional investors to manage ESG standards and restrictions.

The Proposed Allocation was provided by the Discretionary Investment Advisor on each Asset Selection Date or at other times where the Discretionary Investment Advisor wished to update the Proposed Allocation based on economic and/or other indicators. While the financial product sought to ensure compliance with the above ESG standards at each Asset Selection Date or review date, between these dates, securities which no longer met these criteria may have remained included in the portfolio of the financial product until it was possible and practicable to divest such positions.

Active engagement with investee issuers, using proxy voting and engagement to drive change for the benefit of clients is a key part of DWS Group's approach to sustainable investment. DWS applied an Engagement Policy and Corporate Governance & Proxy Voting Policy. For further information regarding the proxy voting activities of the financial product, please visit https://funds.dws.com/en–lu/about–us/corporate–governance/.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product did not designate a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name: Xtrackers MSCI USA Positioning Screened UCITS ETF

Legal entity identifier: 254900YRQN46FY1Y6W03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ it made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.99 % of sustainable investments.
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but did **not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Climate Action Select Index (the "Reference Index") which included environmental and/or social considerations. The financial product specifically promoted the environmental characteristic of: a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium-capitalisation companies in the USA which were assessed as sector group leaders in terms of their positioning and action relative to a climate transition and which met certain minimum environmental, social and governance ("ESG") criteria.

The Reference Index was based on the MSCI USA Index (the "Parent Index"). The Reference Index excluded companies from the Parent Index which did not fulfil certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG criteria were excluded:
• Companies which were unrated or missing relevant coverage by MSCI ESG Research;
• Companies which were assigned an MSCI ESG Rating of CCC;
• Companies which had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Companies which had an MSCI ESG Controversies score of 0;
• Companies which were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, tobacco, oil sands, thermal coal mining, and thermal coal power;
• Companies which were categorised by MSCI in the 95th percentile or above in either greenhouse gas ("GHG") emission intensity or potential GHG emissions corresponding to levels of fossil fuel reserves, and did not yet have science-based targets as approved by the Science Based Targets Initiative ("SBTI"); and
• Companies which were categorised the lowest quartile of their sector based on their Climate Risk Management Score relative to their sector peers.

The Reference Index utilised data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
& tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes.

Security Selection and Weighting

Securities from the Parent Index which passed the ESG Exclusion Criteria outlined above constituted the eligible universe (the "Eligible Universe").

Intensity Score

Each security in the Eligible Universe was then assigned an "Intensity Score" based on the following criteria:

- The company's GHG intensity relative to sector peers ((i) Scope 1 carbon emissions, namely emissions generated from sources that are controlled by the company that issues the underlying assets, (ii) Scope 2 carbon emissions, namely emissions from the consumption of purchased electricity, steam, or other sources of energy generated upstream from the company that issues the underlying assets and (iii) estimated Scope 3 carbon emissions, namely all indirect emissions that are not covered by points (i) and (ii) that occur in the value chain of the reporting company, including both upstream and downstream emissions), as calculated by MSCI ESG Research;
- The company having either an approved SBTI, a published emissions target or a track record of decreasing GHG emissions reported over time, as calculated by MSCI ESG Research; and
- The company's Climate Risk Management Weighted Average Score (a score signifying how the company manages certain key climate change risks and environmental opportunities) or Green Business Revenue (the proportion of a company's revenue generated from certain clean technology themes) relative to sector peers, as calculated by MSCI ESG Research.

Securities within the Eligible Universe were then ranked based on their Intensity Score and market capitalisation compared to their sector peers. The Reference Index targeted companies with a favourable Intensity Score relative to their sector peers by targeting 50% of the number of securities within each sector of the Parent Index, with the remaining stocks excluded.

How did the sustainability indicators perform?

Xtrackers MSCI USA Positioning Screened UCITS ETF

Indicators	Description	Performance December 31, 2025
Controversial Weapons Involvement	The percentage of the financial product's portfolio's market value exposed to companies with ties to cluster munitions, landmines, biological / chemical weapons, depleted uranium weapons, blinding laser weapons, incendiary weapons, and/or non-detectable fragments as determined by MSCI, or for which no data was available.	0.05 Market weight (%)
Exposure to Very Severe Controversies	The percentage of the financial product's portfolio's market value exposed to companies facing one or more Very Severe controversies related to the environment, customers, human rights, labour rights and governance, as determined by MSCI, including violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, or for which no data was available.	0.05 Market weight (%)
Exposure to Worst-in-Class Issuers	The percentage of the financial product's portfolio's market value exposed to companies with a rating of “CCC” as determined by MSCI, or for which no data was available.	0.05 Market weight (%)
Oil Sands Extractions	The percentage of the financial product’s portfolio's market value exposed to companies flagged for involvement in oil sands extraction with a revenue in this area of more than, or equal to, 5%, or for which no data was available, as determined by MSCI.	0 Market weight (%)

…and compared to previous periods?

N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While the financial product did not have sustainable investment as its objective, it invested a minimum proportion of its assets in sustainable investments as defined by Article 2 (17) SFDR.

As at 31.12.2025 25.99% of the financial product’s net assets were invested in sustainable economic activities that contributed to an environmental and/or social objective, in accordance with Article 2 (17) SFDR. Sustainable economic activities were calculated as the product of an issuer’s weight within the financial product and the proportion of such issuer's economic activities which contributed to an environmental objective and/or a social objective (an activity-based approach), provided that such investments did not significantly harm any of those objectives and that the investee companies followed good governance practices. The sustainability investment assessment used data from one or multiple data providers and/or public sources to determine if an activity was sustainable.

Sustainable economic activities that contribute to an environmental and/or social objective can be defined as 1) economic activities contributing to the objectives set out under the EU Taxonomy Regulation including, but not limited to, climate change mitigation and adaptation, or 2) economic activities that are not environmentally sustainable under the EU Taxonomy, but which contribute to an environmental or social objective as defined under Article 2(17) SFDR. The environmental and/or social objectives under Article 2(17) SFDR, which are not defined under the EU Taxonomy, included the United Nations Sustainable Development Goals (“UN SDGs”), of (i) Goal 1: No poverty, (ii) Goal 2: Zero hunger, (iii) Goal 3: Good health and well-being, (iv) Goal 4: Quality education, (v) Goal 5: Gender equality, (vi) Goal 6: Clean water and Sanitation, (vii) Goal 7: Affordable and clean energy,(viii) Goal 10: Reduced inequality, (ix) Goal 11: Sustainable cities and communities, (x) Goal 12: Responsible consumption, (xi) Goal 13: Climate action, (xii) Goal 14: Life below water, and (xiii) Goal 15: Life on land. Such environmentally or socially sustainable investments were identified by their activities which contributed positively to the UN SDGs as measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

For the avoidance of doubt, while this Fund may have contributed to the environmental objectives of climate change mitigation and climate change adaptation, it measured such contribution in the manner outlined above and not against the technical screening criteria set down in the EU Taxonomy Regulation. As such, it did not commit a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In accordance with Article 2 (17) SFDR, any such sustainable investments did not significantly harm any environmental or social objectives and such sustainable investment issuers followed good governance practices. Any investment that failed to meet the do no significant harm ("DNSH") thresholds were not considered towards the sustainable investment share of the financial product. Such DNSH thresholds included, but were not limited to:

• Involvement in harmful business activities;
• Violation of international norms or involvement in very severe controversies; and
• Violation of certain principal adverse indicator thresholds.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Any securities that violated the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were excluded by the financial product's Reference Index.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the DNSH assessment under article 2(17) SFDR, the sustainable investment assessment integrated certain metrics related to principle adverse indicators and the Reference Index of the financial product included criteria to reduce exposure to or to exclude securities which were negatively aligned with the following principal adverse indicators:

• Carbon footprint (no. 2);
• GHG intensity of investee companies (no. 3);
• Exposure to companies active in the fossil fuel sector (no. 4);
• Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
• Exposure to controversial weapons (no. 14).

What were the top investments of this financial product?

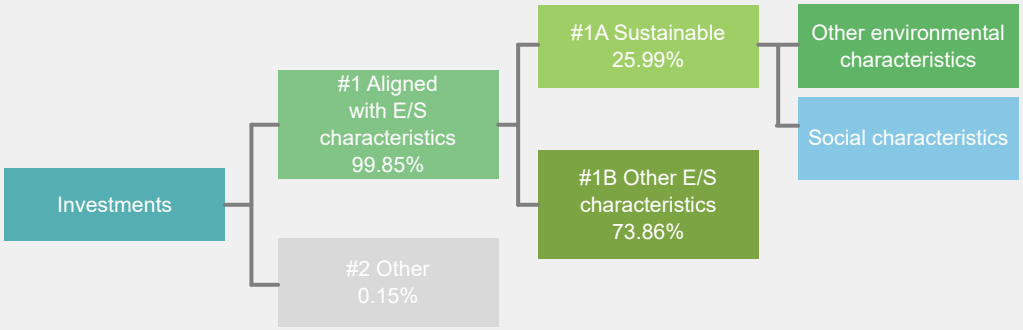
for the period from December 11, 2025, through December 31, 2025

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from December 11, 2025, through December 31, 2025



What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

As at 31.12.2025, this financial product invested 99.85% of its net assets in investments that are aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 25.99% of the financial product's assets qualified as sustainable investments (#1A Sustainable).

0.15% of the investments were not aligned with these characteristics (#2 Other).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Xtrackers MSCI USA Positioning Screened UCITS ETF

NACE-Code	Breakdown by sector according to NACE Codes	in % of portfolio volume
A	Agriculture, forestry and fishing	0.1 %
B	Mining and quarrying	0.9 %

Exposure to companies active in the fossil fuel sector*		**6.9 %**

As of: December 31, 2025

** The financial product's economic exposure to companies active in the fossil fuel sector was derived as the aggregate weight of any companies with any revenues from fossil fuel, including secondary activities, and is distinct from the economic sectors defined in accordance with the NACE classification system. The calculation is only applicable to securities classified as corporates. The data is obtained from various data vendors and may result in a divergence, if any, from other disclosures related to fossil fuel exposure as disclosed in this report.*

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of environmentally sustainable investments in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were nevertheless compliant with the environmental objective of the Taxonomy Regulation.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

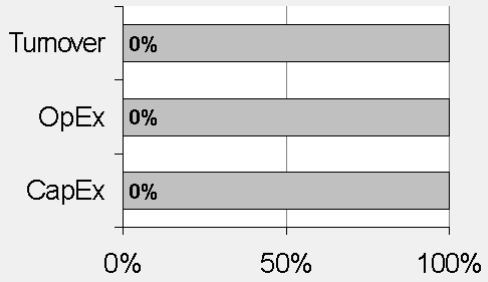
Transitional activities are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

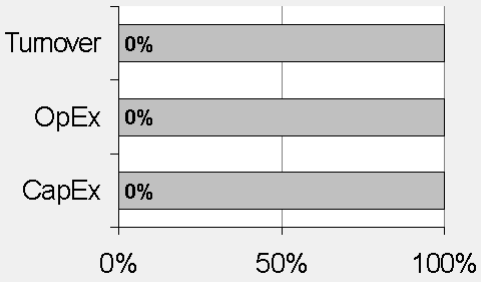
☒ No



While it is considered that no relevant investments were made, it is possible the financial product may have made some investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

Taxonomy-aligned: Fossil gas	0.00%
Taxonomy-aligned: Nuclear	0.00%
Taxonomy-aligned (no gas and nuclear)	0.00%
Taxonomy-aligned	0.00%
Non Taxonomy-aligned	100.00%

This graph represents 100% of the total investments.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments made in transitional and enabling activities?

N/A – There was no minimum proportion for sustainable investments with an environmental objective that were consistent with the EU Taxonomy. For this reason, the share of investments in transitional and enabling activities in accordance with Regulation (EU) 2020/852 (Taxonomy Regulation) is considered to be 0% of the financial product's assets. It may, however, have been the case that some sustainable investments were in transitional and enabling activities.

How did the percentage of investments that are aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to an environmental objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.99% in total.

What was the share of socially sustainable investments?

The financial product did not intend to make a minimum allocation to sustainable economic activities that contribute to a social objective. However, as at 31.12.2025 the share of environmentally and socially sustainable investments was 25.99% in total.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The financial product predominantly promoted asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics).

Those investments included under “#2 Other”, included any ancillary liquid assets for the purpose of efficient portfolio management, including any secured and/or unsecured deposits and/or units or shares of other UCITS or other collective investment schemes which pursued a money market or cash strategy, or financial derivative instruments. It also included (i) any securities which have been recently downgraded by the relevant ESG data provider used in the construction of the Reference Index but could not be removed from the Reference Index until the next Reference Index rebalance and could therefore not be removed from the portfolio until that time and (ii) any securities for which the relevant ESG data provider (a) did not provide a rating or (b) provided a rating that diverged from the Reference Index ESG data provider.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Reference Index promoted environmental and social characteristics by excluding companies from the Parent Index which did not fulfil the specific ESG exclusion criteria and selecting companies assessed as sector group leaders in terms of their positioning and action relative to climate transition as outlined above, as of each Reference Index rebalance. In order to seek to achieve the investment objective, the financial product adopted a “Direct Investment Policy” which means that the financial product aimed to replicate or track, before fees and expenses, the performance of the Reference Index by holding a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index.

Active engagement with investee issuers to drive change for the benefit of clients is a key part of DWS Group’s approach to sustainable investment. DWS applied an Engagement Policy, which sets out types and methods of engagement, escalation strategies and expectations regarding communication with inter alia DWS as an investor and DWS on behalf of its clients on a number of topics, including ESG.

How did this financial product perform compared to the reference sustainable benchmark?

The financial product has designated the MSCI USA Climate Action Select Index as the reference benchmark. Please see below for the performance comparison between the financial product and the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did the reference benchmark differ from a broad market index?

The financial product promoted environmental and social characteristics and qualified as a financial product subject to Article 8(1) SFDR by tracking the MSCI USA Climate Action Select Index (the "Reference Index") which included environmental and/or social considerations. The financial product specifically promoted the environmental characteristic of: a reduction in oil sands extraction; and the social characteristics of: a reduction in human and labour rights controversy occurrences, a reduction in controversial weapon production, and a reduction in tobacco production.

In order to promote these characteristics, the financial product held a portfolio of equity securities that comprised all, or a substantial number of, the securities comprised in the Reference Index. The Reference Index was designed to reflect the performance of the shares of large and medium-capitalisation companies in the USA which were assessed as sector group leaders in terms of their positioning and action relative to a climate transition and which met certain minimum environmental, social and governance ("ESG") criteria.

The Reference Index was based on the MSCI USA Index (the "Parent Index"). The Reference Index excluded companies from the Parent Index which did not fulfil certain minimum ESG criteria.

ESG Exclusion Criteria

The Reference Index applied an ESG exclusion approach where all of the companies from the Parent Index which breached the following ESG criteria were excluded:

• Companies which were unrated or missing relevant coverage by MSCI ESG Research;
• Companies which were assigned an MSCI ESG Rating of CCC;
• Companies which had any involvement in controversial weapons, as categorised by MSCI ESG Research;
• Companies which had an MSCI ESG Controversies Score of 0;
• Companies which were classified by MSCI in their Business Involvement Screening Research or Climate Change Metrics as breaching certain revenue thresholds in controversial activities, including, but not limited to, civilian firearms, tobacco, oil sands, thermal coal mining, and thermal coal power;
• Companies which were categorised by MSCI in the 95th percentile or above in either greenhouse gas ("GHG") emission intensity or potential GHG emissions corresponding to levels of fossil fuel reserves, and did not yet have science-based targets as approved by the Science Based Targets Initiative ("SBTI"); and
• Companies which were categorised the lowest quartile of their sector based on their Climate Risk Management Score relative to their sector peers.

The Reference Index utilised data from MSCI ESG Research to apply certain ESG criteria using the following products: MSCI ESG Ratings, MSCI ESG Controversies Score, MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics.

MSCI ESG Ratings
MSCI ESG Ratings provided research, data, analysis and ratings of how well companies managed environmental, social and governance risks and opportunities. MSCI ESG Ratings provided an overall company ESG rating.

MSCI ESG Controversies
MSCI ESG Controversies provided assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services.

MSCI ESG Business Involvement Screening Research
MSCI ESG Business Involvement Screening Research ("BISR") aims to enable institutional investors to manage ESG standards and restrictions. MSCI ESG BISR was utilised to identify and exclude companies involved in industries with a high potential for negative environmental, health and/or social impact based on the value-based criteria and thresholds from the MSCI SRI Indexes methodology.

MSCI Climate Change Metrics
MSCI Climate Change Metrics provides climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes.

Security Selection and Weighting

Securities from the Parent Index which pass the ESG Exclusion Criteria outlined above will constitute the eligible universe (the "Eligible Universe").

Intensity Score

Each security in the Eligible Universe is then assigned an "Intensity Score" based on the following criteria:

- The company's GHG intensity relative to sector peers ((i) Scope 1 carbon emissions, namely emissions generated from sources that are controlled by the company that issues the underlying assets, (ii) Scope 2 carbon emissions, namely emissions from the consumption of purchased electricity, steam, or other sources of energy generated upstream from the company that issues the underlying assets and (iii) estimated Scope 3 carbon emissions, namely all indirect emissions that are not covered by points (i) and (ii) that occur in the value chain of the reporting company, including both upstream and downstream emissions), as calculated by MSCI ESG Research;
- The company having either an approved SBTI, a published emissions target or a track record of decreasing GHG emissions reported over time, as calculated by MSCI ESG Research; and
- The company's Climate Risk Management Weighted Average Score (a score signifying how the company manages certain key climate change risks and environmental opportunities) or Green Business Revenue (the proportion of a company's revenue generated from certain clean technology themes) relative to sector peers, as calculated by MSCI ESG Research.

Securities within the Eligible Universe are then ranked based on their Intensity Score and market capitalisation compared to their sector peers. The Reference Index targets companies with a favourable Intensity Score relative to their sector peers by targeting 50% of the number of securities within each sector of the Parent Index, with the remaining stocks excluded.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?
