### Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions, sector, geographical region and political events. The Fund follows a rules-based strategy which will deviate from the overall market or parent index. Your investment is likely to be less diversified and there is no guarantee that the index's 'rules-based' strategy will be achieved.
