Notes to the Financial Statements for the financial period ended 30 June 2026

1. General Information

The Company is an investment company with variable capital incorporated on 17 November 2004 under registered no. 393802, authorised and regulated by the Central Bank under the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended), and under the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1) (Undertakings for Collective Investment in Transferable Securities) Regulations 2026) (together the "UCITS Regulations"). The Company had no employees during the financial period ended 30 June 2026 or for the financial year ended 31 December 2025.

Investment objectives of each Fund may be found in the relevant Fund's Supplement.

2. Material Accounting Policies

(i) Basis of preparation
These condensed unaudited interim financial statements have been prepared in accordance with the Financial Reporting Standard 104 "Interim Financial Reporting" ("FRS 104") and the UCITS Regulations. FRS 104 is the reduced reporting standard of Financial Reporting Standard ("FRS 102"); the Financial Reporting Standard applicable in the UK and Republic of Ireland.

(ii) Accounting Policies
The accounting policies applied are consistent with those of the annual financial statements for the financial year ended 31 December 2025, as described in those financial statements. The condensed unaudited interim financial statements should be read in conjunction with the Company's annual audited financial statements for the financial year ended 31 December 2025.

These condensed interim financial statements are unaudited. We note that the statutory auditor's report in the Company's annual audited financial statements for the financial year ended 31 December 2025 was unqualified.

3. Directors' remuneration

The Directors who are not associated with the Management Company or any affiliate will be entitled to remuneration for their services as Directors provided, however that the aggregate emoluments of each such Director shall not exceed EUR 75,000 or such other amount as may be approved by a resolution of the Directors or the Shareholders in general meeting. In addition, all of the Directors will be entitled to be reimbursed for their reasonable out of pocket expenses incurred in discharging their duties as Directors. Such reimbursement may be out of the assets of the relevant Fund.

4. Fair valuation hierarchy

FRS 102 Section 11.43 requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements, using a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy.

The fair value hierarchy has the following levels as defined under FRS 102 Section 34.22:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

Notes to the Financial Statements for the financial period ended 30 June 2026 cont/d

4. Fair valuation hierarchy cont/d

The level in the fair value hierarchy within which the fair value measurement was categorised in its entirety was determined on the basis of the lowest level input that was significant to the fair value measurement in its entirety. For this purpose, the significance of an input was assessed against the fair value measurement in its entirety. If a fair value measurement used observable inputs that required significant adjustment based on unobservable inputs, that measurement was a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety required judgement, considering factors specific to the asset or liability. The determination of what constituted "observable" required significant judgement by the Management Company.

The Management Company considered observable data to be that market data that was readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

As at 30 June 2026 and 31 December 2025, all investments in bank loans, total return swaps and forward foreign currency exchange contracts were classified as Level 2. During the financial period ended 30 June 2026 and financial year ended 31 December 2025, all investments in debt securities were also classified as Level 2 with the exception of corporate bonds with a carrying amount of EUR 1,018,035,090 (31 December 2025: 915,716,261) and government bonds with a carrying amount of EUR 3,496,248,105 (31 December 2025: 3,566,345,072), were classified as Level 1 of the fair value hierarchy due to their increase in liquidity as per the bid/ask spread and market stability. Furthermore, all investments in equities, rights, exchange traded funds, mutual funds / open-ended funds, preferred stocks and futures held as at 30 June 2026 and 31 December 2025 were also classified as Level 1, with the exception of the following investments for the Company given on disaggregated sub-fund basis, that were valued using observable inputs and unobservable inputs, and therefore classified as Level 2 and Level 3, respectively.

7. Efficient Portfolio Management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down by the Central Bank, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or an increase in capital or income returns to a Fund and may not be speculative in nature. Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques.

During the financial period ended 30 June 2026 and year ended 31 December 2025, the Company employed techniques or instruments for efficient portfolio management purposes, see details below.

Futures Contracts
Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Portfolio of Investments of each relevant Fund and as appropriate, in the Statement of Financial Position as financial assets or liabilities at fair value through profit or loss.

Forward Foreign Currency Exchange Contracts
The fair value of open forward foreign currency exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. For each relevant Fund, gains or losses on open forward foreign currency exchange contracts are included in the financial assets or liabilities at fair value through profit or loss, as appropriate, in the Statement of Financial Position and are shown in the Portfolio of Investments of each relevant Fund.

Total Return Swaps
“Total Return Swap” is the generic name for any non-traditional swap where one party agrees to pay the other the “total return” of a defined underlying reference obligation, usually in return for receiving a stream of SOFR based cashflows. The total return swap may be applied to any underlying reference obligation but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages.

7. Efficient Portfolio Management cont/d

Total Return Swaps cont/d

The total return swaps held by the Company are exposed to fluctuations on the underlying reference obligations. However, in contrast to the typical total return swap there are no periodic payments to the swap counterparty. The total return swaps are recorded as financial assets or financial liabilities at fair value through profit or loss in the Statement of Financial Position.

The fair value of these total return swaps is determined by the Directors based on the mark to market valuation provided by the counterparty. In determining the mark to market valuation, the counterparty makes assumptions that are based on market conditions existing on each Statement of Financial Position date and uses valuation techniques which include the use of comparable recent arm's length transactions, discounted cash flow techniques, option pricing models and other valuation techniques commonly used by market participants.

Securities Lending Activities
Securities lending agreements may be used by the Funds for efficient portfolio management purposes. Deutsche Bank AG, acting through its Frankfurt head office and its London and New York branches, acts as securities lending agent for securities lending transactions entered into on behalf of the Funds.

During the financial period ended 30 June 2026 and the financial year ended 31 December 2025, the Funds, as disclosed in the tables below, had securities lending agreements in place. The tables detail the fair value of securities on loan and collateral held at 30 June 2026 and 31 December 2025.

The TER percentage is presented in the Share Class' currency.

The TER expresses the sum of all fees and incidental costs charged on an ongoing basis to the collective investment scheme's assets (operating expenses) taken retrospectively as a percentage of the net assets, and is in principle calculated as follows according to the Swiss Asset Management Association (AMAS) Guidelines on the calculation and disclosure of the Total Expense Ratio (TER) of collective investment schemes from 16 May 2008 (dated 5 August 2021):

$$\text{TER \%} = \frac{\text{Total operating expenses in CU*}}{\text{Average net assets in CU*}} \times 100$$

* CU = currency units in the accounting currency of the collective investment scheme
