Key Risks

The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss. The Fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The Fund will enter into a derivative with a counterparty. If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

The fund provides a notional exposure to interest rates, which may be volatile. Interest rates react to various economic, fiscal, monetary and political factors. This may result in your investment suffering a loss, up to a total loss.
