

Swisscanto (CH) Gold ETF EA CHF

Other | distributing | November 2025 - Marketing Material

Fund Description

Listed on the SIX Swiss Exchange, the fund invests exclusively in gold and is always backed 100% by the physical precious metal. All assets are held in Switzerland. There is no counterparty risk as the fund has separate asset status as defined by the Swiss Collective Investment Schemes Act (CISA). Investors are able to sell their units at any time or request payment in physical gold in standard bars at a rate of 12.5 kilograms per unit. A range of different currency classes means investors can have their holdings denominated in the reference currency (CHF, USD, EUR or GBP) of their choice.

Advantages of Precious Metals

Precious metals offer an effective hedge against inflation and protection in times of crisis. Because of their low correlation with traditional investments such as bonds or equities, they provide an ideal means of diversification. Including positions in precious metals optimizes a portfolio and improves its risk-return profile.

Sustainability Policy

This asset is not managed sustainably.

Profile/Suitability

This product is suitable for investors who

- have a long-term investment horizon.
- would like to participate in the performance of the gold. An extra yield compared with the performance of the gold can not be expected.

^b The gross performance indicated before deduction of any regular fund fees incurred.

Comments to the Fund

Target Investor Group - Term

All Investors

Target Investor Group - Description

The E-class is offered to all investors. The second letter «A» indicates that the class distributes profits. An all-in fee is charged. The E-class is reserved for ETFs (exchange-traded funds).

Flat Fee (FF)

The AIF is used to compensate the fund management company and fund administration, asset management and - if compensated - the distribution of the fund as well as the custodian bank for the services it provides.

Total Expense Ratio (TER)

The Total Expense Ratio (TER) refers to the annual costs that are continuously charged to the fund's assets and is expressed as a percentage of the fund's assets. The figure corresponds to the level of the TER in the most recently completed financial year and does not guarantee a similar level in the future.

Explanation of general risks

Investment involves risks, especially with regard to fluctuations in value and return. Investments in foreign currencies are subject to exchange rate fluctuations. Custody and counterparty risks represent further significant risks. We hereby refer to the detailed description of various risks which are included in the prospectus.

Risk Indicator

The historical data used to calculate the risk and return category cannot be used as a reliable indication of the future risk profile. The reported risk and return category may well be subject to change. The lowest risk category cannot be compared with a risk-free investment. There is no capital guarantee or capital protection. The risk of capital loss is borne by the investor.

Breakdown Allocations

Allocation refers to invested fund capital adjusted to 100%. Minor deviations can be caused by rounding errors. The weighting of the money market may include the synthetic exposure from the equity hedging strategy.

Volatility

Volatility is a statistical measure of risk which indicates the extent to which the absolute return on an investment or a portfolio fluctuates on average around its mean value in the course of a year.

Sharpe Ratio

The Sharpe ratio is a performance measure which indicates the risk-adjusted excess return (difference between the portfolio return and the risk-free return) compared to the investment risk incurred (volatility).

ISO Certification

Asset Management at Zürcher Kantonalbank is ISO 9001 certified. The ISO 9001 certification guarantees that the authorised user has a management system that meets the requirements of a suitable and recognised standard and has been successfully certified/assessed by the Swiss Association for Quality and Management Systems (SQS).

Further Specific Explanations

- The value of the gold is calculated based on afternoon closing prices on the London gold market (London, PM Fixing).
- The acquired gold complies with the Good Delivery conditions of the LBMA (London Bullion Market Association), which defines different criteria regarding the trade of gold and silver (for example the minimum quality of the precious metal).
