

Allianz Dynamic Commodities - W9 - USD

Active strategy enabling participation in global commodities markets

Investment Objective

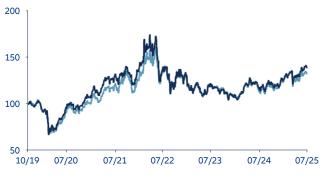

The funds aims at participating in the performance of international commodities markets. To this end, it takes exposure to the Dynamic Commodities Strategy by means of derivatives (swaps), in particular. The strategy invests, for one thing, in broadly diversified commodities indices. For another thing, it takes exposure to selected commodities by means of certificates (exchange-traded commodities). The weighting of the individual commodities is regularly adjusted on the basis of fundamental and technical indicators, in order to capture anticipated market and price trends. The fund's overall exposure to the strategy is to be controlled between 0 and 150 % of its assets. The liquidity corresponding with the derivatives structure is invested in a bond portfolio with a short duration.

Fund Manager Frederik Fischer (since 01/01/2016)

TER (%) ⁷	0.59

Opportunities

- + Broad-based participation in the price potential of commodities
- + Prospect for extra returns through active weighting of individual commodities
- Use of swaps enables efficient participation in the Dynamic Commodities Strategy

Risks

- Prices of commodities fluctuate strongly, losses are possible. The fund's share price may be subject to increased volatility
- Success of active allocation across individual commodities not guaranteed
- Swap agreements imply counterparty risks

FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. Any front-end loads reduce the capital employed and the performance.
- 2) Benchmark history: until 30/09/2023 BLOOMBERG Commodity Excl. Agriculture Excl. Livestock Capped Total Return (Shifted By 2 Days Forward) (hedged into EUR) (in USD)
- 3) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 4) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 5) This is for guidance only and not indicative of future allocation.
- 6) The all-in fee includes the expenses previously called management, administration and distribution fees. Any payment of a trail fee by the management company to a distribution partner will be effected from the all-in fee.
- 7) TER generally: Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of fising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Dynamic Commodities is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to a strongly increased volatility. The volatility of ther Unit/Share Classes may be different. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
