Allianz Dynamic Commodities

Investment team

Frederik Fischer
(since 01/01/2016)

Investment objective

The fund aims at participating in the performance of international commodities markets. To this end, it takes exposure to the Dynamic Commodities Strategy by means of derivatives (swaps), in particular. The strategy invests, for one thing, in broadly diversified commodities indices. For another thing, it takes exposure to selected commodities by means of certificates (exchange-traded commodities). The weighting of the individual commodities is regularly adjusted on the basis of fundamental and technical indicators, in order to capture anticipated market and price trends. The fund's overall exposure to the strategy is to be controlled between 0 and 150 % of its assets. The liquidity corresponding with the derivatives structure is invested in a bond portfolio with a short duration.

Performance (basis USD, net of fees)¹

Period (annual)	% Fund	% BM	Period	% Fund	% BM
15/10/19 - 29/02/20	-7.86	-9.39	1 month	-3.81	-3.68

OPPORTUNITIES AND RISKS

Opportunities

- Broad-based participation in the price potential of commodities
- Prospect for extra returns through active weighting of individual commodities
- Use of swaps enables efficient participation in the Dynamic Commodities Strategy

Risks

- Prices of commodities fluctuate strongly, losses are possible. The fund's share price may be subject to increased volatility
- Success of active allocation across individual commodities not guaranteed
- Swap agreements imply counterparty risks

Footnotes

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. Past performance is not a reliable indicator of future results. Any front-end loads reduce the capital employed and the performance. These figures refer to the past. If the currency of a financial product, financial service or its costs is different from your reference currency, the return and/or costs can increase or decrease as a result of currency fluctuations. Source for all data and chart (if not indicated otherwise): IDS GmbH.
- 2) Morningstar Rating: © 2007 Morningstar, Inc., all rights reserved. The information given here: (1) is protected by copyright for Morningstar and/or its content providers; (2) may not be reproduced or distributed; and (3) is not guaranteed to be accurate, complete or up-to-date. Morningstar and its content providers assume no responsibility for any losses or damage that result from any use of the information provided. Past performance is not a guarantee of future results. To determine the Morningstar Rating, funds of a comparable group in issue for at least three years are considered. The long-term performance serves as a basis, taking into account fees and risk. As a result, the funds are awarded stars, which are calculated monthly: Top 10%: 5 stars; next 22.5%: 4 stars; middle 35%: 3 stars; next 22.5%: 2 stars; flop 10%: 1 star. A ranking, rating or award is not an indicator of future performance and is subject to change over time. Rating as of: 31/01/2026
- 3) The Risk Indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. The categorization of a product is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment
- 4) until 30/09/2023 BLOOMBERG Commodity Excl. Agriculture Excl. Livestock Capped Total Return (Shifted By 2 Days Forward) (hedged into EUR) (in USD)
- 5) The all-in fee covers the fees formerly designated as management, administration and distribution fee. A potential payment of a trail fee from the management company to the distribution partner would be taken out of the all-in fee.
- 6) Total Expense Ratio (TER): Total cost (except transaction costs) charged to the fund during the last financial year. TER for funds-of-funds: The costs incurred by the fund itself (except transaction costs). Since the fund held other investment units ("target funds") in the reporting period, further costs, charges and fees may have been incurred at the level of the target fund.
- 7) Effective duration is a measure of the price sensitivity of bonds, particularly useful for bonds with embedded options. It is calculated by using the interest rate model to calculate three values for the bond: the value given the current yield curve, and the values for both up and down shocks to that curve.
- 8) Yield to worst: Represents the lowest potential yield that an investor could theoretically receive on the bond up to maturity if bought at the current price (excluding the default case of the issuer). The yield to worst is determined by making worst-case scenario assumptions, calculating the returns that would be received if worst-case scenario provisions, including prepayment, call or sinking fund, are used by the issuer (excluding the default case). It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. Calculation is before currency hedging. The yield to worst is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to worst is not suitable as an indicator of the future performance of a bond fund. Forecasts are not a reliable indicator of future results.
- 9) Alpha is a measure of a portfolio's excess return relative to its expected return based on its risk level. It represents the value added (or subtracted) by a portfolio manager beyond what is explained by market movements.
- 10) Tracking error is the difference in actual performance between the portfolio and its corresponding benchmark. The tracking error can be also considered as an indicator of how actively a fund is managed and its corresponding risk level. It is measured as standard deviation of the portfolio's excess returns over the benchmark.
- 11) The Information Ratio (IR) is a measure of a portfolio manager's ability to generate excess returns relative to a benchmark, adjusted for risk.
- 12) Volatility measures the fluctuation range of the fund's performance over a specified period of time
- 13) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 14) This is for guidance only and not indicative of future allocation.
- 15) Positioning data are based on portfolio management estimates. Investors cannot invest directly into an index.
- 16) © 2007 Morningstar, Inc. All rights reserved. The information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. Morningstar style box Equities: This fund appeared as a fund on the Morningstar Style BoxTM at 31/12/2025.
- 17) Yield to maturity: The yield to maturity of a bond indicates what capital growth p.a. is theoretically possible up to maturity, if bought at the current price. In addition to coupon income, any price gains/losses up to repayment of the bond are taken into account. The yield to maturity of a fund is the weighted average of the yield to maturity of all the bonds that are held. It is assumed that the bonds are held until maturity and interest income is reinvested on the same conditions. The yield to maturity is a portfolio characteristic; in particular, it does not reflect the actual fund income. The expenses charged to the fund are not taken into account. As a result, the yield to maturity is not suitable as an indicator of the future performance of a bond fund.
- 18) Securities mentioned in this document are for illustrative purposes only and do not constitute a recommendation or solicitation to buy or sell any particular security. These securities will not necessarily be comprised in the portfolio by the time this document is disclosed or at any other subsequent date.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Investing in fixed income instruments may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including positions with respect to short-term fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values of these instruments are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Allianz Dynamic Commodities is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to a strongly increased volatility. The volatility of other Unit/Share Classes may be different. Past performance does not predict future returns. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. This is for information only and not to be construed as a solicitation or an invitation to make an offer, to conclude a contract, or to buy or sell any securities. The products or securities described herein may not be available for sale in all jurisdictions or to certain categories of investors. This is for distribution only as permitted by applicable law and in particular not available to residents and/or nationals of the USA. The investment opportunities described herein do not take into account the specific investment objectives, financial situation, knowledge, experience or specific needs of any particular person and are not guaranteed. The Management Company may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with applicable de-notification regulation. The views and opinions expressed herein, which are subject to change without notice, are those of the issuer companies at the time of publication.
