Valuation of Assets

The value of the assets held by the Subfunds is determined as follows:

- Cash, term deposits and similar assets are valued at their face value plus interest. If there are significant changes in market conditions, the valuation may be made at realisation price if the Company can cancel the investment, the cash or similar assets at any time; the realisation price in this sense corresponds to the sales price

or the value that must be paid upon cancellation to the Company.

- Investments that are listed or traded on an exchange are valued based on the latest available trade price on the stock exchange which constitutes in principle the principal market for this investment.
- Investments traded on another regulated market are valued at the latest available trade price.
- Securities and money-market instruments whose latest available trade prices do not correspond to appropriate market prices, as well as securities and money-market

instruments not officially listed or traded on an exchange or on another regulated market, and all other assets, are valued on the basis of their probable sales price.

- e) Claims for reimbursement from securities lending are valued at the respective market value of the securities and money-market instruments lent.
- f) The liquidation proceeds of futures, forward foreign exchange or options contracts not traded on exchanges or on other regulated markets means their net liquidating value determined, pursuant to the policies established by the Board of Directors, on the basis of calculations consistently applied for all types of contracts. The liquidation proceeds of futures, forward or options contracts, traded on exchanges or on other regulated markets, are based upon the latest available trade price of these contracts on exchanges and regulated markets on which the particular futures, forward or options contracts are traded by the Company. If futures, forward or options contracts cannot be settled on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract is such a value as the Board of Directors may deem fair and reasonable.
- g) Interest-rate swaps are valued at their market value by reference to the applicable interest-rate curve.
- h) Index and financial instrument-related swaps are valued at their market value, established by reference to the applicable index or financial instrument. The valuation of the index or financial instrument-related swap agreement is based upon the market value of such swap transaction established in good faith pursuant to procedures established by the Board of Directors.
- i) Target Fund Shares/Units in undertakings for collective investment in transferable securities ("UCITS") or undertakings for collective investment ("UCI") are valued at the latest redemption price determined and obtainable.

Valuation of investments

Had the financial statements in this report been prepared on the last available market price in the period, the net asset value would have been impacted by:

- 1.23% on Allianz Global Artificial Intelligence
- 0.53% on Allianz Selection Small and Mid Cap Equity
- 0.50% on Allianz US Equity Fund
- 0.99% on Allianz Global Hi-Tech Growth

0.73% on Allianz Global Agricultural Trends
-0.56% on Allianz Global Metals and Mining

Securities Lending Income Accounting

Securities lending involves a transfer of securities (such as shares or bonds) to a third party (the borrower) who provides the lender collateral in the form of shares or bonds. The borrower pays the lender a fee for the loan and is contractually obliged to return the securities on demand. The borrower will also pass over to the lender any dividends/ interest payments and corporate actions that may arise.

Portfolios receive 70% of the revenue generated by the lending activities. Allianz Global Investors GmbH, acting as agent, receives 30%.

All costs of running the program are paid from the lending agent's portion of the income. This includes all direct operational and custodial costs, platform maintenance and technology costs.

Income recognition

Interest income is accrued daily. Bank interest income is recognised on an accrual basis. Dividend income is accrued on the ex-dividend date. This income is shown net of any withholding taxes.

Foreign Currencies

RMB or Chinese Renminbi refers to the official currency of the People's Republic of China. Unless the context otherwise requires, the term RMB refers to offshore Chinese Renminbi ("CNH") and not to onshore Chinese Renminbi ("CNY"). CNH represents the exchange rate of Chinese Renminbi that is traded offshore in Hong Kong or markets outside the People's Republic of China.

All-in-Fee

The Company pays all costs to be borne by the respective Subfund from the assets of that Subfund:

The Company pays a fee ("All-in-Fee") to the Management Company from the assets of the respective Subfund, unless this fee is charged directly to the Shareholder under the terms of a particular Share Class.

Fees for the Investment Managers used by the Management Company are paid by the Management Company from its All-in-Fee and, if applicable, from its performance related fee.

Provided that it is not charged directly to the Shareholder under the terms of a particular Share Class, the All-in-Fee is charged monthly in arrears on a pro rata basis on the average daily Net Asset Value of the respective Share Class of a Subfund. The amount of the All-in-Fee charged is listed thereafter.

In return for the payment of the All-in-Fee the Management Company releases the Company from the following, conclusive enumerated commissions and expenditures:

- Management and central administration agent fees;
- Distribution fees;
- the administration and custody fee of the Depository;
- the fee of the Registrar and Transfer Agent;
- costs of the preparation (including translation) and dissemination of the Prospectus, Key Investor Information, Articles of Incorporation as well as annual, semi-annual and, if any, interim reports and other reports and notifications to Shareholders;
- costs of publishing the Prospectus, Key Investor Information, Articles of Incorporation, annual, semi-annual and, if any, interim reports, other reports and notifications to Shareholders, tax information, as well as Subscription and Redemption Prices, and official announcements made to the Shareholders;
- costs of auditing the Company and its Sub-Funds by the auditor;
- costs of registering the Shares for public distribution and/or the maintenance of such registration;
- costs of preparing share certificates and, if any, coupons and coupon renewals;
- paying agent and information agent fees;

- costs of assessing the Sub-Funds by nationally and internationally recognised rating agencies;
- expenses in connection with the establishment of a Sub-Fund;
- costs related to the use of index names, in particular licence fees;
- costs and fees incurred by the Company and by third parties authorised by the Company relating to the acquisition, use and maintenance of in-house or third-party computer systems used by Investment Managers and Investment Advisors;
- costs related to obtaining and maintaining a status authorising the direct investment in assets in a country or to act directly as a contracting partner in markets in a country;
- costs and expenses incurred by the Company, the Depositary and third parties authorised by the Company or the Depositary in connection with monitoring of investment limits and restrictions;
- costs for calculating the risk and performance figures and the calculation of performance-related fees for the Management Company by third parties appointed to do so;
- costs related to obtaining information about general Shareholders' meetings of companies or about other meetings of the owners of assets as well as costs related to direct participation or participation through authorised third parties in such meetings;
- postage, telephone, fax and telex fees.

Taxe d'abonnement

The Company is not liable to any Luxembourg tax on profits or income, nor is any income earned by any Subfund of the Company liable to any Luxembourg withholding tax.

The Company is, however, liable in Luxembourg to a tax of 0.05 % p.a. of its net asset value for retail share classes and of 0.01 % p.a. for institutional share classes. This tax is payable quarterly based on the net asset value of the Subfunds at the end of the relevant quarter.

Transaction costs

Transaction costs take into consideration all the costs that were reported or charged separately for the accounts of the Subfunds in the period from 1 October 2018 to 30 September 2019, and which are directly related to the buying or selling of

particular assets. Not all transaction costs are separately identifiable. For fixed income investments, forward currency contracts and other derivative contracts, transaction costs will be included in the purchase and sales price of the investment. Whilst not separately identifiable these transaction costs will be captured within the performance of each Subfund.

Performance Fee

The Management Company may charge a performance-related fee to Subfund assets for selected Subfunds for their management, provided that this fee is not charged directly to the shareholder in the framework of a special share class. The performance-related fee will be calculated in accordance with the method described in the current sales prospectus.

According to the current prospectus a performance fee is foreseen for the following share classes. It has been decided to set the performance fee rate at zero percent for these share classes.

- Allianz Multi Asset Long / Short - RT13 (H2-EUR), RT13 (USD);
- Allianz Merger Arbitrage Strategy - W23 (EUR);
- Allianz Structured Alpha 250 - P14 (EUR);

Retrocession of Management Fees

The investment management fees of certain underlying funds, in which some Subfunds invest, are partially or totally rebated by the investment managers of such underlying funds which have entered into agreements with Allianz Global Investors GmbH. Those amounts have been classified under caption other Income.

If a Subfund acquires shares of a UCITS or UCI which is directly or indirectly managed by the same investment manager or by another investment manager with which the Company is linked by common management or control, or by a substantial direct or indirect participation according to Part I of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment then neither the Company nor the associated investment manager may charge fees for the subscription or redemption of units. In the case of the previous

sentence, the Company will also reduce its share of the All-in-Fee for the part of units in such linked UCITS or UCI by the respective actual calculated fixed management fee of the UCITS or UCI acquired. However, a decrease does not occur with respect to such linked UCITS or UCI as far as a reimbursement of this actually calculated fixed management fee is made in favour of the respective Subfund.

Placement Fees

The Company may pay to the Management Company a placement fee ("Placement Fee") out of the assets of a Sub-Fund. The amount of the Placement Fee charged, if any, is in the sales prospectus.

The Placement Fee is determined as a fixed amount per Share which shall in particular serve as a compensation for the distribution. The Placement Fees is paid in a single instalment on the first Valuation Day after the expiry of the subscription period ("Payment Date") and at the same time added to the Sub-Fund's assets as prepaid expenses. The Net Asset Value on the Payment Date is therefore not impacted by the Placement Fee. The Sub-Fund's position of pre-paid expenses is then amortized over a defined number of years ("Amortization Period") on a daily basis from the Payment Date. The remaining position of prepaid-expenses per Share on each Valuation Day is calculated by linearly decreasing the fix amount per Share over the Amortization Period on a daily basis. After expiration of the Amortization Period the remaining position of prepaid expenses per Share is zero by definition.

Securities Prices

In accordance with the Prospectus, the net asset values have been calculated by reference to the valuation day which might differ from their value on a dealing day.

The financial statements presented in this report have been prepared on the basis of the latest calculated net asset values in the period.

Fair Value Pricing

A fair value pricing model is used for several Subfunds. A fair value pricing model means that the value of certain assets will be adjusted to more accurately reflect their fair value based upon certain criteria. Such adjustments may occur during monitoring periods as defined by the Board of Directors from time to time, if a single country equity risk exposure (excluding equity exposure held via target funds) of a Subfund reaches or exceeds a certain trigger level, as defined by the Board of Directors from time to time, on the first Valuation Day of the respective monitoring period and, at the respective Subfund's deadline for receipt of applications, the main stock exchange of the respective country is already closed during normal course of business. If the aforementioned conditions are fulfilled the value of Subfund's assets which form part of the respective single country equity risk exposure based on the closing prices of the relevant country's main stock exchange is compared to their estimated value at the moment when the Subfund's Net Asset Value is calculated; the estimation is based on the movement of index orientated instruments since the close of business of the respective country's main stock exchange. If such comparison leads to a deviation in Subfunds estimated Net Asset Value by, at least, a certain trigger level, as defined by the Board of Directors from time to time, the Subfund's Net Asset Value will be adjusted accordingly to the extent that the unadjusted value would not represent their actual value.

Soft Commission Agreements/Commission Sharing Arrangements

Soft Commission Agreements/Commission Sharing Arrangements have been undertaken in respect of the Company.

The Company may pay, or be responsible for payment of, soft commissions only insofar as:

- a) the Management Company and/or the Investment Managers, as the case may be, act at all times in the best interest of the Company and the shareholders when entering into soft commission arrangements;

- b) the goods and/or services provided by the broker dealers relate directly to the activities of the Management Company and/or the Investment Managers, as the case may be, and such activities are of demonstrable benefits to the Shareholders; and
- c) any such soft commission is paid by the Management Company and/or the Investment Managers, as the case may be, to broker-dealers which are corporate entities and not individuals.

During the Company's fiscal year, services which are paid for through or by soft commissions were in majority limited to research, market analysis as well as data and quotation services.

Transactions with Connected Parties

The Company has entered into agreements with the Management Company under which management and performance fees are payable. The annual management fees, as part of the All-in-fee, and performance related fees are disclosed in the combined Statement of Operations on page 74.

Information on the All-in-fee rates charged to the Subfunds is shown in the table on pages 1488-1499. Further details on fees payable by the Company can be found in the current prospectus.

As at 30 September 2019, the Company held investments into other funds that were managed by the Management Company or other companies belonging to the same group as the Management Company.

There were no transactions with connected brokers during the fiscal year.

Collateral Management

For some Subfunds, the Management Company has implemented collateral management processes to mitigate counterparty risks with OTC-counterparties. OTC-transactions are effected on the basis of standardised contracts that also provide for respective requirements in relation to accepted type of eligible collateral and discounts for collateral valuation ("haircuts"). The collateral management is performed on our behalf by SST/BNYM collateral manager to which we outsourced the activity.

Swing pricing

A Subfund may suffer reduction of the Net Asset Value per share due to investors purchasing, selling and/or switching in and out of shares of a Subfund at a price that does not reflect the dealing costs associated with this Subfund's portfolio trades undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to reduce this impact and to protect shareholders' interests, a swing pricing mechanism may be adopted by the Company as part of the general valuation policy. According to the prospectus swing pricing is foreseen for the following funds: Allianz Convertible Bond, Allianz Emerging Markets Local Currency Bond, Allianz Emerging Markets Select Bond, Allianz Emerging Markets Short Duration Bond, Allianz Euro Credit SRI, Allianz Euro Government Bond, Allianz Euro High Yield Bond, Allianz Euro High Yield Defensive, Allianz Euro Investment Grade Bond Strategy, Allianz Euro Subordinated Financials, Allianz German Small and Micro Cap, Allianz Global Aggregate Bond, Allianz Global Credit SRI, Allianz Global Financials, Allianz Global Floating Rate Notes Plus, Allianz Global Government Bond, Allianz Global High Income Short Duration, Allianz Global High Yield, Allianz Global Multi-Asset Credit, Allianz Japan Smaller Companies Equity, Allianz Selective Global High Yield, Allianz SGD Income, Allianz Short Duration Global Bond, Allianz Short Duration Global Real Estate Bond. The extent of such adjustment will be reset by the Company on a periodic basis to reflect an approximation of current dealing and other costs. Such price adjustment may vary from Subfund to Subfund and will not exceed 3 % of the original Net Asset Value per share. The price adjustment will be available on request from the Management Company at (i) its registered office and/or (ii) on the webpage <https://regulatory.allianzgi.com>. As at 30 September 2019 none of the NAVs of the above mentioned Subfunds was swung.

Introduction of Securities Lending

The Board of Directors of Allianz Global Investors Fund (SICAV) (the "Company") hereby gives notice of the following changes, which became effective on 17 December 2018:

As an active investment manager, Allianz Global Investors GmbH is continuously on the search for new sources of returns for investors. In addition to the selection and management of promising securities, securities lending offers an opportunity to generate additional income for the benefit of the clients.

Securities lending refers to a transaction whereby securities are temporarily lent from a portfolio and collateral for the loaned securities is received. In return for lending the securities, a "loan fee" is received. The loan fee (after costs) is credited to the respective sub-fund portfolio, from which the securities in question have been lent. The loan fee collected thus increases the return.

Allianz Global Investors GmbH has decided to manage the securities lending business themselves through an internal agency lending offering. Allianz Global Investors GmbH has established a team that is dedicated to securities lending providing transparency and direct risk management oversight of lending activities. This means that an external broker shall no longer be required in most cases.

In order to be able to use securities lending to enhance returns, substantial efforts are incurred. These costs include for example analysis and selection of suitable counterparties, negotiation of the securities lending terms (e.g. type and amount of collateral), preparation and execution of the securities lending agreement, ongoing monitoring of the agreement trades, trade selection and risk management.

Allianz Global Investors GmbH takes a proportion of the revenue from the activities associated with securities lending (in the amount of up to 30% of the loan fee), whilst absorbing all of the aforementioned costs. The remaining 70% of the income from the loan fee is credited directly to the respective sub-fund assets.

Unless other specified in a sub-fund's individual investment restrictions the maximum proportion of the use of securities lending agreements is 50% of Net Asset Value.

Investors do not incur any further or higher costs than before under the new structure. The investment profile of the sub-funds does not change either as a result of the introduction of the new securities lending offering. Sub-fund's individual investment restrictions contain a reference in case a sub-fund may not engage in securities lending and/or repurchase/reverse repurchase transactions.

Ongoing Charges

The Ongoing Charges are costs incurred by the Subfunds (or the respective Share Classes) during the preceding financial year (excluding transaction costs) and are expressed as a ratio of the average volume of the Subfunds (or of the average volume of the respective Share Classes) ("Ongoing Charges"). In addition to the all-in-fee as well as the Taxe d'Abonnement, all other costs are considered except for the incurred transaction costs and any performance-related fees. Costs incurred will not be subject to cost compensation. If a Subfund invests more than 20 % of its assets in other UCITS or UCI that publish Ongoing Charges, the Ongoing Charges of these other UCITS or UCI are taken into consideration when calculating Ongoing Charges for the Subfund (synthetic); however, if these UCITS or UCI do not publish their own Ongoing Charges, then it is not possible to take the Ongoing Charges of the other

UCITS or UCI into consideration when calculating Ongoing Charges.

If a Swiss registered Subfund invests more than 10 % of its assets in other UCITS or UCI that publish Ongoing Charges, the Ongoing Charges of these other UCITS or UCI are taken into consideration when calculating Ongoing Charges for the Subfund (synthetic); however, if these UCITS or UCI do not publish their own Ongoing Charges, then it is not possible to take the Ongoing Charges of the other UCITS or UCI into consideration when calculating Ongoing Charges. If such a Subfund does not invest more than 10 % of its assets in other UCITS or UCI, any costs that may be incurred at the level of these UCITS or UCI are not taken into consideration. These Ongoing Charges have been calculated in accordance with the guidelines issued by the Swiss Funds and Asset Management Association (SFAMA).

TBA (to be announced) Securities

TBA positions refer to the common trading practice in the mortgage-backed securities market in which a commitment to buy or sell a mortgage backed security (issued by Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed future price at a future date is given. At the time of purchase of a TBA, the exact underlying pool of mortgages that is to be delivered is not known, but the main characteristics are specified. Such transactions are entered into with financial institutions specialised in such transactions.

Although the Subfund may enter into TBA purchase commitments with the intention of acquiring securities, the Subfund may also close a position prior to settlement by entering into an opposite transaction in order to fix the economical result of the initial transaction.

In the period under review the Subfunds entered into TBA transactions which are presented in the Statement of Net Assets within the unrealized gain/loss.

Securities Repurchase Agreements, Securities Lending Transactions

The Company may enter into repurchase agreements and into securities lending transactions in accordance with the requirements as set out in the Securities Financing Transactions Regulation and in accordance with the requirements as set out in the Circulars 08/356 dated 4 June 2008 and 14/592 dated 30 September 2014 of the CSSF.

Pursuant to a Sub-Fund's individual Investment Restrictions and a Sub-Fund's specific Asset Class Principles and taking into consideration its obligation to redeem Shares on each Dealing Day, the Company may enter into securities repurchase agreements and securities lending transactions in accordance with the limits as disclosed in Appendix 7.

Audit report

To the Shareholders of
Allianz Global Investors Fund

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Allianz Global Investors Fund (the "Fund") and of each of its sub-funds as at 30 September 2019, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 30 September 2019;
- the investment portfolio as at 30 September 2019;
- the combined statement of operations for the Fund and the statement of operations for each of the sub-funds for the year then ended;
- the combined statement of changes in net assets for the Fund and the statement of changes in net assets for each of the sub-funds for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Determining the market risk and leverage effect

As part of the risk-management procedure the market risk of the Subfund is measured and limited either using the commitment or Value-at-Risk (VaR) approach (relative or absolute VaR). When determining the market risk of the Company, the commitment approach takes into account the additional risk that is generated through the use of derivative

financial instruments. The VaR approach represents a statistical method for calculating the potential loss arising from value changes in the whole Subfund. The VaR calculation is generally based on the "Delta Normal" method (confidence level of 99%, an assumed holding period of 10 days, data history of 260 days), otherwise the alternative calculation method is shown in the following table.

As at the end of the financial year, the following approach applied to the Subfunds for calculating the market risk:

The minimum, maximum and average risk budget utilisation (RBU) of the Company in the period under review can be seen in the following table. For Subfunds using the relative value-at-risk (VaR) approach, the utilisation is reported in relation to the limit stipulated by the regulatory authorities (i.e. 2 times the VaR of the defined benchmark). For Subfunds using the

absolute VaR approach, it is reported in relation to the absolute VaR limit indicated in the table above. The table also shows the average leverage effect of the Company in the period under review. The average leverage effect is calculated as the average sum of notionals of derivatives.

Name of the Subfund	Average leverage in %	Minimum RBU in %	Maximum RBU in %	Average RBU in %

Disclosures relating to employee remuneration (all figures in EUR) of Allianz Global Investors GmbH for the financial year from 01/01/2018 to 31/12/2018

The following table shows that total amount of remuneration actually paid to the employees of Allianz Global Investors GmbH in the past financial year divided into fixed and variable components. It is also broken down by members of

management, risk takers, employees in controlling positions and employees whose total remuneration puts them in the same remuneration category as members of management and risk takers.

Number of employees 1,718

		thereof Risk Taker	thereof Board Member	thereof Other Risk Taker	thereof Employees with Control Function	thereof Employees with Comparable Compensation
Fixed remuneration	152,084,831	8,487,988	1,962,234	1,226,734	405,616	4,893,404
Variable remuneration	119,079,444	28,858,193	12,335,788	4,789,449	323,424	11,409,531
Total remuneration	271,164,275	37,346,181	14,298,022	6,016,183	729,040	16,302,935

The information on employee remuneration does not include remuneration paid by delegated managers to their employees. KVG does not pay remuneration to employees of delegated companies directly from the fund.

Setting the remuneration

AllianzGI is subject to the supervisory requirements applicable to investment management companies with regard to structuring the remuneration system. Company management is usually responsible for decision-making about determination of employee remuneration. Decisions about the remuneration of the management itself are taken by the shareholder.

The company has set up a remuneration committee to perform the duties required by law. This committee consists of two members of the company's Supervisory Board, each of whom is appointed by the Supervisory Board, where one member should be an employee representative.

Working in close cooperation with the Risk Management and Legal & Compliance departments as well as with external advisers and in conjunction with the management, the Human Resources department has developed the company's remuneration policy under the requirements of the UCITS and AIFM Directives. This remuneration policy applies to the company domiciled in Germany and to its branches.

Remuneration structure

The primary components of monetary remuneration are the basic salary, which typically reflects the scope, responsibilities and experience required in a particular role, and an annual variable remuneration.

The total amount of the variable remuneration payable throughout the Company depends on the performance of the business and on the Company's risk position and will therefore vary every year. In this respect, the allocation of specific amounts to particular employees will depend on the performance of the employee and their departments during the period under review.

Variable remuneration includes an annual bonus paid in cash following the end of the financial year. In the case of employees whose variable remuneration exceeds a certain threshold, a substantial portion of the annual variable remuneration is deferred for a period of three years.

The deferred portions increase in line with the level of the variable remuneration. Half of the deferred amount is linked to the performance of the company, and the other half is invested in the funds managed by AllianzGI. The amounts ultimately distributed depend on the company's business performance or the performance of shares in certain investment funds over several years.

In addition, the deferred remuneration elements may be withheld under the terms of the plan.

Performance evaluation

The level of pay awarded to employees is linked to both quantitative and qualitative performance indicators.

For Investment managers, whose decisions make a real difference in achieving our clients' investment goals, quantitative indicators are geared towards sustainable investment performance. For portfolio managers in particular, the quantitative element is aligned with the Benchmark of the client portfolios they manage or with the client's expected return, measured over a period of one year and three years.

For client-facing employees, goals also include client satisfaction, which is measured independently.

The remuneration of employees in controlling functions is not directly linked to the business performance of individual departments monitored by the controlling function.

Risk takers

The following groups of employees were qualified as risk carriers: Members of management, risk takers and employees in controlling positions (as identified in current organisational charts and job profiles and as assessed in terms of the influence on the risk profile) as well as all employees whose total remuneration puts them in the same remuneration

category as members of management and risk takers and whose activities have a significant effect on the risk profiles of the company and the investment funds managed by it.

Risk avoidance

AllianzGI has comprehensive risk reporting in place, which covers both current and future risks of our business activities. Risks which exceed the organisation's risk appetite are presented to our Global Remuneration Committee, which will decide, if necessary, on the adjustments to the total remuneration pool.

Individual variable compensation may also be reduced or withheld in full if employees violate our compliance policies or take excessive risks on behalf of the company.

Annual review and material changes to the remuneration system

The Remuneration Committee did not find any irregularities during the annual review of the remuneration system, including a review of the existing remuneration structures as well as implementation of the regulatory requirements and compliance with them. In the course of this centralised and independent review, it was also found that the remuneration policy had been implemented in accordance with the remuneration regulations stipulated by the Supervisory Board. Furthermore, no material changes were made to the remuneration policy in the past financial year.

Further unaudited information

Techniques for efficient portfolio management

Sections 35 (c)-(f) and 40 (a)-(c) of the European Securities and Markets Authority's (ESMA's) guideline 2012/832 on Exchange-Traded Funds (ETFs) and other UCITS issues require disclosures in the Subfund's annual report on the exposure obtained through efficient portfolio management techniques (security lending, repos/reverse-repos) and/or derivatives, disclosure of the identity of the counterparties to these transactions and statements as to the type and amount of collateral received in this regard and statements as to the issuer's identity in connection with the OTC derivatives and collateral in the form of securities issued by a Member State. The following table shows the minimum, maximum and average exposure during the period under review, broken down by technique and derivatives. The figures for the Company's minimum and maximum exposure indicate the minimum and maximum exposure during the period under review as a percentage of the Company's net assets on that day. Average exposure is calculated as the simple average of the daily exposure of the Company as a percentage of Company's net assets each day. The exposure (counterparty) from techniques for efficient portfolio management and/or derivatives was looked at separately for exchange-traded derivatives, OTC derivatives (including total return swaps), repurchase agreements (repos/reverse-repos) and securities lending.

Exchange-Traded Derivatives

During the period under review, the below Subfunds had positions in exchange-traded derivatives, however, initial and variation margins were on deposit at all times and therefore the positions had no open exposure.
