FOR FUND DISTRIBUTORS AND PROFESSIONAL INVESTORS ONLY

- 1) Calculated at the net asset value, excl. front-end load, distributions reinvested. Calculation according to method as defined by BVI, the German Fund Companies Association. Past performance is not a reliable indicator of future results. Any front-end loads reduce the capital employed and the performance stated. All performance data in respect of Allianz Best Styles Global Equity – W – EUR prior to the launch date, 6/08/2013, are based on another investment fund, Allianz Strategiefonds Wachstum Plus. This is an investment fund subject to the Investment Code (Kapitalanlagegesetzbuch - KAGB), organised under the laws of Germany and managed by Allianz Global Investors GmbH - Frankfurt, namely Allianz Strategiefonds Wachstum Plus – I – EUR (ISIN DE0009797316), launched on 13/06/2007. This does not imply that Allianz Best Styles Global Equity – W – EUR will enjoy similar performance in the future.
- 2) The Sharpe ratio states the relationship between the return generated by the fund and the investment risk. The fund's excess return versus the risk-free market rate is compared to volatility. Negative values are not meaningful.
- 3) Volatility measures the fluctuation range of the fund's performance over a specified period of time.
- 4) Measure of the proportion of fund assets that is invested differently from the benchmark.
- 5) The dividend yield corresponds to the expected dividend divided by the current price of the share, expressed as a percentage. (eDiv/share price) where: eDiv = product of the last dividend payment and the number of expected dividend payments per year (e.g. the expected dividend for a share with quarterly dividend payment corresponds to the dividend for the last quarter times four). The dividend yield depends both on the amount of the dividend and the current price of the share. Both these key variables may be subject to constant change. The dividend yield is only a snapshot based on the current amount of the dividend and the current share price; **as a result, it is not suitable as an indicator of the future performance of an equity fund.**
- 6) This is for guidance only and not indicative of future allocation.
- 7) The all-in fee includes the expenses previously called management, administration and distribution fees. Any payment of a trail fee by the management company to a distribution partner will be effected from the all-in fee.
- 8) TER (Total Expense Ratio): Total cost (except transaction costs) charged to the fund during the last financial year.

Disclaimer

Investing involves risk. The value of an investment and the income from it may fall as well as rise and investors might not get back the full amount invested. Allianz Best Styles Global Equity is a sub-fund of Allianz Global Investors Fund SICAV, an open-ended investment company with variable share capital organised under the laws of Luxembourg. The value of the units/shares which belong to the Unit/Share Classes of the Sub-Fund that are denominated in the base currency may be subject to an increased volatility. The volatility of other Unit/Share Classes may be different and possibly higher. Past performance is not a reliable indicator of future results. If the currency in which the past performance is displayed differs from the currency of the country in which the investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency.
