A separate pool of assets and separate accounting records are maintained for each Subfund.

The figures presented in this report relate to the period from 1 October 2024 to 30 September 2025. They should not necessarily be taken as an indication of the future development of the Subfunds.

Subscriptions are only valid if made on the basis of the current Prospectus, the Articles of Incorporation, the Key Investor Information Document supplemented by the latest available audited Annual Report. If the latest Annual Report was published more than eight months ago, then the most recent Semi-Annual Report must also be made available.

The Prospectus, the Articles of Incorporation, the Key Investor Information Document as well as the respective Annual and Semi-Annual Reports can be obtained at the registered office of the Company or from the Management

Company, the Custodian and each Paying and Information Agent without charge.

Some transactions conducted in the reporting period do no longer appear in the Investment Portfolio. The Statement of Changes in the composition of the securities portfolio during the reference period is available free of charge on request at the registered office of the Company and at the representatives where the Subfunds are distributed.

¹⁾ Not authorized in Hong Kong and not available to the public of Hong Kong.

Important notice to our Shareholders

As of 30 September 2025, the Fund holds direct investments in Russia, Ukraine, or Belarus. These assets have been either valued with de minimis (i.e. near nil), given the uncertainty of their value due to trading restrictions applicable under the relevant sanction regimes for these specific financial instruments or using 3rd party vendor data for financial instruments deemed as still tradeable even if under certain constraints. As of 30 June 2021, before the conflict, these assets were material to the Fund. For further details please refer to the Notes to the Financial Statements on page 1581. The statements included herein are as of the date provided and are subject to change.

¹⁾ In the case of liquidation/merger the performance until the liquidation/merger date is shown.

* The Net Asset Value calculation of Allianz Emerging Europe Equity (in liquidation) has been suspended with effect from 28th February 2022 due to current and ever-evolving circumstances associated with the Ukraine/Russia situation.

The calculation is based on the net asset value per share (excluding sales charge), assuming distributions, if any, were reinvested. The performance is calculated according to the method recommended by the German BVI (Bundesverband Investment und Asset Management e.V.).

Past performance is not an indication of current or future performance.

The performance data do not take account of the commissions and costs incurred on the issue and redemption of shares.

Economic situation and capital market in the reporting period/outlook

Regional trends gaining momentum

In the year under review, ended September 2025, the global economy continued to grow overall, though trends varied significantly between regions. In the US there was something of a slowdown in the economy, but output increased significantly on balance as a robust recovery followed the setback experienced at the start of the year. Strong consumer spending was particularly noticeable. The economy in Japan, by contrast, was almost stagnant as the weak yen made imported goods significantly more expensive and weighed on domestic demand. GDP in China, meanwhile, continued to grow considerably, albeit with declining momentum. The positive effects both of the demand for exports and of the fiscal policy were driving factors here, while the real estate sector, which is important for consumption, remained weak. In Europe, the economy in the United Kingdom in particular was comparatively solid. There was limited impetus in France given the country's ongoing political paralysis. The German economy stagnated, due largely to the structural crisis in the industrial sector.

The monetary policy of central banks in developed economies indicated a relaxed trend in the US, the United Kingdom and the eurozone. These regions have made a number of interest rate cuts in a bid to stimulate growth, and inflation is declining. Key interest rates fell from 4.75–5.00% to 4.00–4.25% in the US, from 5% to 4% in the United Kingdom and from 3.5% to 2.00% in the eurozone. The Bank of Japan, meanwhile, tightened its strategy and despite a weak economy took a step towards normalising monetary policy by raising the interest rate to 0.5%.

Stock exchanges: Predominantly strong price increases

Against the backdrop of the expanding global economy, the major stock exchanges were dominated by significant price gains. The strongest price increases were seen in China; next was Japan where foreign investors achieved significantly lower earnings due to the weakness of the yen. There were also substantial price gains in the United States, with average growth remaining in the double-digit percentage range in the broad market despite the depreciation of the dollar. In Europe, meanwhile, the market-wide index experienced weaker growth, though German blue chips performed particularly well. Their price performance was among the best in the world thanks to the predominantly global orientation of the companies. In the major emerging

markets segment there were also strong increases in value, thanks not least to the increasing importance of domestic demand in many instances.

Bond markets: Higher-risk securities still in demand

In the case of interest-bearing securities, only those with risk premiums achieved definitively positive results. Corporate bonds with ratings below investment grade were still in demand – equally so in the US, Asia and Europe. Government bonds from emerging markets also performed very well overall. In the case of local-currency securities, this reflected both the often attractive real returns and the weakness of the dollar, which led to additional demand from international investors. As in the equity markets, US dollar exposure for euro investors suffered due to the strong depreciation of the US currency; the negative effect was particularly notable for US government bonds. Euro government bonds held up better, but their interest income was generally eroded by the rise in maturity premiums, particularly for longer maturities.

Outlook

Equities

We believe that the global economy is entering a more fragile phase. Investors should therefore structure their portfolios flexibly, manage them actively and be prepared to take action. We believe there is a risk of stagflation in the US given the resurgence of inflation and the muted growth. Inflation is expected to be higher than generally anticipated in 2025 and 2026 as import duties are passed on to end users and immigration restrictions are weighing on labour supply. However, in a generally risk-tolerant environment, equities are likely to maintain their upward trend provided corporate earnings keep pace with rising prices and valuations. We believe the outlook for Europe is generally positive. Inflation appears to be under control and government spending in Germany is expected to rise significantly from 2026, improving growth prospects. The topic of “strategic autonomy” is likely to remain central here. Local market leaders in strategically important sectors are showing strong growth at fair valuations. In China, growth is expected to decline from the third quarter. However, we expect further government stimulus that should limit downside risks. China's stock markets could be buoyed in particular by AI and related sectors, as well as by improvements in

the real estate sector. Emerging market equities generally appear to present a wealth of opportunities. They are set to benefit from the weak dollar, rising corporate profits and strong price momentum.

Outlook for bonds

With inflation picking up again and growth slowing, we see a risk of stagflation in the US. The US Federal Reserve cut the interest rate by 25 basis points (bp) in September, implementing its "precautionary" rate-cutting cycle that is expected to lead to a key interest rate of 3.5% by mid-2026. We do not expect the new US Budget Act to provide fiscal stimulus before 2026. The political instability in France remains a risk in Europe, but as long as the economy does not weaken significantly, we expect a further interest rate cut of 25 bp by the European Central Bank by the end of 2025. The Bank of England is expected to lower rates by a further 25 bp, though potentially with something of a delay. Due to the downside risks to growth, our preference is for a long duration (measure of interest rate risk) in some markets. We also expect a steeper yield curve in important countries such as the US. Euro-periphery government bonds appear more attractive than US government bonds. However, we consider inflation-linked US bonds (TIPS) to be an attractive option as the markets may underestimate the inflation risk in the US. In the credit sector, our preference is for high-quality issuers with an investment-grade rating over high-yield bonds. Our focus is on non-cyclical securities. Emerging market bonds offer attractive interest rate premiums and are likely to benefit from the weakness of the dollar. We remain sceptical about the dollar itself given the slowing growth in the US, interest rate cuts and the growing risks to the US Federal Reserve's political independence.
