

# BGF Global Multi-Asset Income Fund Class A2 Hedged EUR

## FEBRUARY 2020 FACTSHEET

Unless otherwise stated, Performance, Portfolio Breakdowns and Net Assets information as at: 29-Feb-2020. All other data as at 08-Mar-2020.

This document is marketing material. For Investors in Switzerland. Investors should read the Key Investor Information Document and Prospectus prior to investing.

### FUND OVERVIEW

The Global Multi-Asset Income Fund follows a flexible asset allocation policy that seeks an above average income without sacrificing long term capital growth. The Fund invests globally in the full spectrum of permitted investments including equities, equity-related securities, fixed income transferable securities (which may include some high yield fixed income transferable securities), units of undertakings for collective investment, cash, deposits and money market instruments. This Fund distributes income gross of expenses. Currency exposure is flexibly managed.

### GROWTH OF HYPOTHETICAL 10,000

Share Class performance displayed in EUR and Benchmark performance displayed in USD. Source: BlackRock. Performance is shown on a net asset value basis, with gross income reinvested. **Past performance is not a guide to future performance.**

### RATINGS

**Key Risks Continued:** The fund invests a large portion of assets which are denominated in other currencies; hence changes in the relevant exchange rate will affect the value of the investment. Investors in this Fund should understand that capital growth is not a priority and values may fluctuate and the level of income may vary from time to time and is not guaranteed. The fund(s) may invest in structured credit products such as asset backed securities ('ABS') which pool together mortgages and other debts into single or multiple series credit products which are then passed on to investors, normally in return for interest payments based on the cash flows from the underlying assets. These securities have similar characteristics to corporate bonds but carry greater risk as the details of the underlying loans is unknown, although loans with similar terms are typically packaged together. The stability of returns from ABS are not only dependent on changes in interest-rates but also changes in the repayments of the underlying loans as a result of changes in economic conditions or the circumstances of the holder of the loan.

## GLOSSARY

**Ongoing Charge:** is a figure representing all annual charges and other payments taken from the fund.

**Quartile Rank:** categorises a fund into four equal bands based on their performance over a specified period within the relevant Morningstar's sector. The top or first quartile contains the top 25% of funds, through to the bottom or 4th quartile which contains the bottom 25% of funds.

**SRRI:** is a value based on the volatility of the fund, which gives an indication of the overall risk and reward profile of the Fund.

**Nominal Weighted Average Life (WAL):** A bond's maturity is the length of time until the principal amount of the bond is to be repaid. WAL of the fund is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the fund.

**Yield To Worst:** The lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst-case scenario assumptions on the issue by calculating the returns that would be received if provisions are used by the issuer.

**Standard Deviation:** Standard deviation is applied to the annual rate of return of an investment to measure the investment's volatility. Standard deviation is also known as historical volatility and is used by investors as a gauge for the amount of expected volatility.

**Performance Fee:** is charged on any returns that, subject to a High Water Mark, the Fund achieves above its performance fee benchmark. Please refer to the Prospectus for further information.
