FUND OVERVIEW

The Fund aims to provide a return on your investment through a combination of capital growth and income commensurate with a conservative level of risk and in a manner consistent with the principles of environmental, social and governance (ESG) investing. The Fund will seek to achieve its investment objective by obtaining indirect exposure to equity securities (e.g. shares), equity-related (ER) securities, fixed income (FI) securities (such as bonds), FI-related securities, alternative assets (such as property and 'hard' commodities, but excluding 'soft' commodities), cash and deposits. FI securities include money market instruments (MMIs) (i.e. debt securities with short term maturities). ER securities and FI-related securities include financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets). 'Hard' commodities are commodities which are natural resources that are mined or extracted (e.g. gold, aluminium, copper, oil and natural gas) and 'soft' commodities are commodities which are agricultural products or livestock (e.g. corn, wheat, coffee, sugar, soybeans and pork). It is intended that the Fund's exposure (direct and indirect) to equity securities will not exceed 50% of its net asset value, however, this exposure may vary over time.

Key Risks Continued: Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment. The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events. The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	A	MSCI ESG Quality Score (0-10)	7,13
MSCI ESG Quality Score - Peer Percentile	18,71%	MSCI ESG % Coverage	93,06%
Fund Lipper Global Classification	Mixed Asset EUR Bal - Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	108,66
Funds in Peer Group	759		

All data is from MSCI ESG Fund Ratings as of **21-Sep-2022**, based on holdings as of **31-May-2022**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% of the fund's gross weight must come from securities covered by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities. For newly launched funds, sustainability characteristics are typically available 6 months after launch.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. The Score also considers ESG Rating trend of holdings and the fund exposure to holdings in the laggard category. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score, and MSCI ESG Quality Score - Peer Percentile metrics are displayed for funds with at least 65% coverage.

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.
