Introduction

Fidelity Funds (the "Company") is an open-ended investment company established in Luxembourg as a société d'investissement à capital variable ("SICAV"). It has an umbrella structure and its assets are held in a number of different funds ("sub-funds"). Each sub-fund is a separate portfolio of securities and other assets managed in accordance with specific investment objectives. Separate classes of shares in the Company (the "Shares") are issued in relation to the sub-funds. Each sub-fund provides an investment opportunity in professionally managed pools of securities in different geographical areas and currencies, with the investment objective of capital growth, income or a balance between capital growth and income.

Shares are authorised for sale in a number of jurisdictions and may be listed on the Luxembourg Stock Exchange. However, Shares in the Reserved Funds and the Institutional Reserved Funds are not presently listed.

Swiss investors are advised that with the exception of Asian Equity Fund, Asia Pacific Multi Asset Growth & Income Fund, Greater China Fund II, Greater China Multi Asset growth & Income Fund, Institutional US High Yield Fund, the Fixed-Term Bond Funds, the Institutional Target Funds, the Reserved Funds, the present sub-funds of the Company have been authorised by the Swiss Financial Market Supervisory Authority for distribution in Switzerland.

Board of Directors

The Directors of the Company as at 31 October 2018 are listed on page 3. Six of the twelve Directors, serving as at 31 October 2018, are considered by the Board to be independent of the Investment Manager and free from any business or other relationship which could materially interfere with the exercise of their independent judgment.
During the period to 31 October 2018, Mr Glen Moreno was appointed to the Board of Fidelity Funds with effect from 4 October 2018.

This Semi-Annual Report of the Company does not constitute an offer of Shares. Shares are offered on the basis of the information contained in the current Prospectus (and the documents referred to within it) supplemented by the last available Annual Report of the Company and any subsequently published Semi-Annual Report. Copies of the current Prospectus, latest Annual and Semi-Annual Reports and Portfolio Changes for the Company are available free of charge from the registered office of the Company or from any of the companies registered as distributors of the Company, or, for investors in Switzerland, from the Representative of the Company in Switzerland.

This Semi-Annual Report has been approved for circulation in the United Kingdom by FIL Investments International, UK distributor of the Company, authorised and regulated in the UK by the Financial Conduct Authority.

Fidelity Funds

Investment Manager's Report*

Performance Overview - 6 months ending October 2018

Equity Markets

Global equities declined over the six-month period to October 2018. Although corporate earnings were encouraging, rising interest rates in the US weighed on sentiment. In addition, fears over the potential impact that the US-China trade dispute would have on global growth, political uncertainty in Europe and concerns over emerging markets hampered equities. The US Federal Reserve (Fed) led the pace of monetary policy normalisation amid expectations that central bank divergence will continue. The European Central Bank (ECB) moved forward with policy tightening, albeit at a much slower pace as it announced plans to end its bond-buying programme at the end of the year.

Source: Thomson Reuters Datastream, Total Returns, USD, 30.04.2018 - 31.10.2018

Against this backdrop, the US market generated positive returns, while Japanese, Pacific ex Japan and European equities declined. Emerging markets also fell as investors were concerned about the strong US dollar, US-China trade frictions, and economic crises in Turkey and Argentina. Returns in US dollar terms were undermined by its appreciation against sterling, euro and yen.

European equities ended a volatile six-month period in negative territory. Markets started the period on a positive note, supported by growing expectations that the UK will continue to participate in a customs union with the European Union (EU) even after it exits the region. Gains were also driven by a weaker euro. However, markets were negatively impacted by escalating geopolitical tensions between the US and its major trade partners, as well as weak economic data. Later in the period, Italy's higher than expected budget deficit dampened investor sentiment. Rising bond yields also contributed to the sell-off in equities.

The UK stock market fell over the review period. Investors were nervous due to uncertainty related to the UK's negotiations to exit the EU, as the deadline nears. On the policy front, the Bank of England raised interest rates by a quarter of a percentage point, from 0.5% to 0.75%, the highest level since March 2009. The interest rate increase was in line with market expectations and had little impact on sterling. At a sector level, health care and energy stocks gained, while telecommunications shares underperformed the broader market. Overall, large-cap companies outperformed their mid and small-cap peers, as the weak sterling buoyed companies that generate a high proportion of their sales in foreign currencies.

US equities advanced, supported by robust economic data, strong corporate earnings and interest rate hikes by the US Fed. However, investor sentiment was dampened due to continued trade wars between the US and China. The Fed increased its benchmark interest rate two times by a total of 0.50% over the period. The interest rate currently ranges between 2.00% and 2.25%. Moreover, the central bank removed the term "accommodative" from its policy statement, marking a rhetorical shift in its monetary policy outlook. Oil prices were volatile during the period. Prices initially rose due to fresh US sanctions against Iran, which come into effect in November. Towards the end of the period, oil prices declined as producers such as Saudi Arabia indicated that they will increase supply to meet the shortfall resulting from the sanctions. At a sector level, consumer staples and health care stocks were among the leading gainers.

Japanese equities fell, weighed down by the risk-off trend triggered by a rise in long-term interest rates in the US and weakness in global stock markets towards the end of the period. Stock prices experienced a sharp decline in September, as investors sold shares to lock-in profits following strong gains earlier in the period. There were also growing concerns over both Japanese and overseas corporate earnings. In terms of style, value-oriented companies outperformed growth names, while large-caps performed better than their smaller peers. At a sector level, real estate, materials and information technology (IT) were the leading decliners, while energy, health care and utilities recorded positive returns.

Pacific ex Japan equities retreated over the period. News flow surrounding the US-China trade war, worries over rising interest rates in the US and concerns over a slowdown in global economic growth dominated investor sentiment. Against this risk-off environment, Chinese and Hong Kong equities witnessed a sharp sell-off. Chinese authorities unveiled a package of targeted stimulus measures to cushion the impact of the trade war with the US. The Taiwanese and South Korean markets also declined. On a positive note, Australian equities advanced in local currency terms and outperformed regional markets. However, a depreciation in the Australian dollar weighed on US dollar returns. From a sector perspective, consumer discretionary was a key laggard, while health care and materials outperformed broader markets.

Emerging market equities fell as slowing economic growth in China, the largest developing country, unnerved investors. The US dollar strengthened as the US Fed continued to raise interest rates. Prospects of further monetary tightening also weighed on equities as it led to worries about capital outflows from the developing world. The US implemented tariffs on Chinese imports, prompting the latter to retaliate with its own set of duties. Subsequently, Chinese equities declined. In Latin America, Brazilian markets fell as the government re-introduced price controls and subsidies on fuel. However, stocks rose slightly as political uncertainty ended following the victory of Jair Bolsonaro in the final round of Presidential elections. Investors expect him to implement much-needed reforms and pass policies to fight crime and corruption.

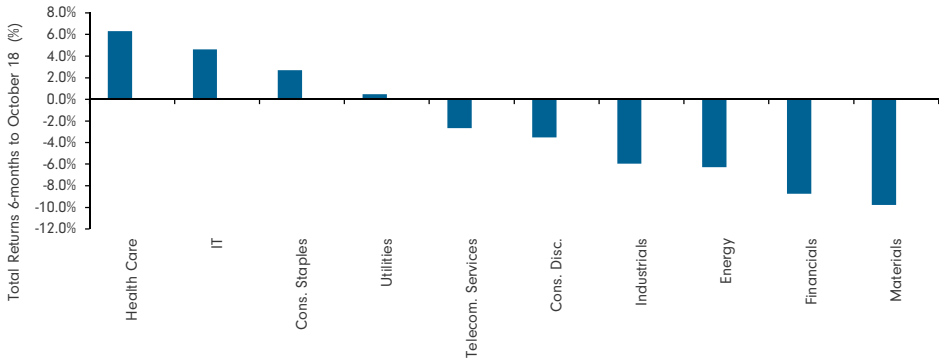
Mixed returns across sectors



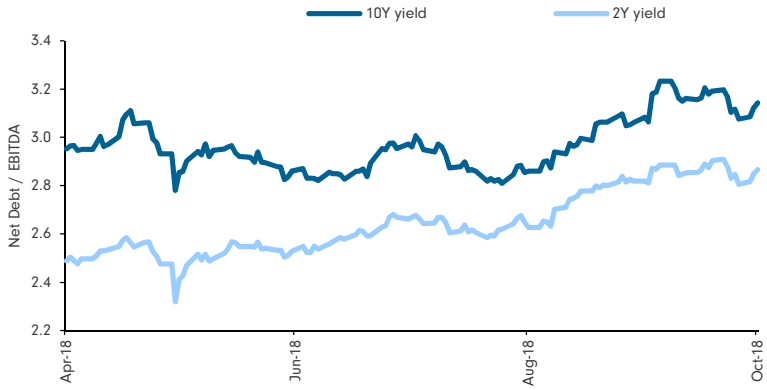
Source: Thomson Reuters Datastream, 31.10.2018

Towards the end of the period, market volatility hurt most sectors, while defensives, including consumer staples and utilities remained resilient. Financials lagged the broader market as flattening yield curves weighed on investor sentiment, particularly in a rate-tightening environment. Elsewhere, leading index providers have rethought how they classify companies according to sectors. As a result, after the market close on 28 September 2018, the Global Industry Classification Standards (GICS) broadened and renamed the existing telecommunication services sector to a more encompassing communications services sector, which includes select IT and consumer discretionary companies.

Bond markets

Fixed income markets posted mixed returns over the review period. There were bouts of volatility due to geopolitical risks, political uncertainty in Italy, fears over a trade war between the US and its major trading partners and rising volatility in emerging markets. This stoked demand for safe haven assets and German bunds rallied. Ten-year UK government bond (Gilt) yields also fell to the lowest level in July, and the yield curve flattened. However, this failed to cause any significant re-pricing in US Treasuries as strong economic activity prompted the US Fed to raise interest rates twice over the period and the asset class posted losses. Meanwhile, spreads in credit markets widened, with both investment grade and high yield bonds posting negative returns. However, US high yield markets remained resilient and generated gains, driven by macroeconomic tailwinds and strong corporate earnings.

A World Of Negative Interest Rates



Source: Bloomberg, 31.10.2018

While the US Fed continued to normalise its monetary policy and said that it may retain its tightening bias at least until the end of this year, some leading indicators are pointing towards a slowdown in the economy. US housing starts fell over the period, hitting a nine-month low in June. The consumer sentiment index fell in October, due to less favourable economic conditions and higher inflationary pressures. This is priced in by the market, as reflected in the spread between short and long-term interest rates, which has continued to shrink. Yields at the long end are also being impacted by investors flocking to long-dated US Treasuries amid trade-related woes and volatility.

Notes to the Financial Statements

1. General

The Company is an open-ended investment company and was incorporated in Luxembourg as a SICAV (société d'investissement à capital variable) on 15 June 1990. The Company is a SICAV under part I of the Luxembourg Law of 17 December 2010, as amended, relating to undertakings for collective investment, which implements Directive 2014/91/EU ("UCITS V Directive").

FIMLUX is the Management Company of the Company, with the day-to-day responsibility for the administration, investment management and marketing/distribution functions of the Company.

As at 31 October 2018, the Company consisted of 149 active sub-funds. The Directors may from time to time close sub-funds as well as launch further sub-funds with different investment objectives, subject to the approval of the CSSF.

The following sub-funds were launched during the Period:

Sub-fund name	Date of launch
Multi Asset Target Income 2024 Fund	23/05/2018
UK Special Situations Fund	26/06/2018

The following classes of Shares were closed during the Period:

Sub-fund name	Class of Shares	Date of closure
China Focus Fund	Y-ACC Shares (HKD)	11/10/2018
European High Yield Fund	Y-MINCOME (G) Shares (SGD) (hedged)	11/10/2018

Investments in Indian securities within India Focus Fund are made through a wholly-owned Mauritian subsidiary, FIL Investments (Mauritius) Limited (the "Subsidiary") previously called Fid Funds (Mauritius) Limited, the sole object of which is to carry out investment activities on behalf of the Company. FIL Investment Management (Hong Kong) Limited ("FIMHK") provides investment advisory and management services to the Subsidiary. FIMHK has obtained approval from the Securities and Exchange Board of India and the Reserve Bank of India to invest in India on its own behalf and on behalf of approved client accounts as a Foreign Portfolio Investor under Indian law. The Subsidiary is registered as a Foreign Portfolio Investor sub-account of FIMHK's licence and has been granted approval to invest in Indian securities. The assets and liabilities of the Subsidiary are consolidated in the Statement of Net Assets and all investments held by the Subsidiary are disclosed in the Schedule of Investments.

On 17 September 2018, European Value Fund was renamed FIRST European Value Fund, and Asian Total Return Bond Fund was renamed Asia Pacific Strategic Income Fund on the same date.

On 3 October 2018, Global Telecommunications Fund was renamed Global Infrastructure Fund.

2. Significant Accounting Policies

The financial statements are prepared in accordance with the Luxembourg legal and regulatory requirements relating to undertakings for collective investment.

Calculation of the Net Asset Value. The Net Asset Value per share of each class of shares, is calculated by determining first the proportion of the net assets of the relevant sub-fund attributable to each class of shares. Each such amount will be divided by the number of shares of the relevant class outstanding as at close of business to the extent feasible. The Net Asset Value of each class is determined in the principal dealing currency of the respective class.

Security Valuation. Investments in financial instruments traded on any stock exchange are valued at the last available price at the time when the valuation is carried out on the principal stock exchange on which such security is traded. Financial instruments dealt on any over the counter market are valued in the same manner. The valuation of short-dated debt transferable securities and money market instruments not traded on a regulated exchange or market is determined by means of the amortised cost method to the extent this does not materially deviate from market value. Under this method, amortised cost is determined by valuing the security at original cost and thereafter accreting (amortising) the discount (premium) to its nominal value at a constant rate until maturity. All other assets are valued in such manner as the Directors of the Company consider appropriate. All holdings owned by the Company are quoted on a regulated market, except where otherwise distinguished in a sub-fund's Schedule of Investments.

Price Adjustment Policy. The Board of Directors of the Company implemented a price adjustment policy in order to protect the interests of the Company's Shareholders. The purpose of the price adjustment policy is to allocate the costs associated with large inflows and outflows to investors transacting that day, thereby protecting the long-term Shareholder from the worst effects of dilution. It achieves this purpose by adjusting the share class prices at which deals in a sub-fund are transacted. As such, share class prices may be adjusted up or down depending on the level and type of investor transactions on a particular day within a sub-fund. In this way the existing and remaining Shareholders do not suffer an inappropriate level of dilution. The Company will only trigger an adjustment in the price when there are significant net flows likely to have a material impact on the remaining Shareholders. The adjustment will be based on the normal dealing costs for the particular assets in which a sub-fund is invested but will not exceed 2% of the price. Once an adjustment is made to a share class price, that price is the official price for that share class for all deals that day. As at 31 October 2018, price adjustments were made on the following sub-funds:

Sub-fund name	Class of Shares	Un-adjusted NAV per Share	Adjusted NAV per Share
Emerging Markets Inflation-linked Bond Fund	I-ACC Shares (USD)	9.1130	9.1020
Emerging Markets Inflation-linked Bond Fund	A-ACC Shares (EUR)	11.080	11.070

Japan Advantage Fund	Y Shares (EUR) (hedged)	9.1290	9.1410

Fair Value Adjustments Policy. Fair value adjustments may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly if a sub-fund invests in markets that are closed for business at the time the sub-fund is valued, the Directors may, by derogation from the provisions above under security valuation, allow for the financial instruments included in a particular portfolio to be adjusted to reflect more accurately the fair value of the sub-fund's investments at the point of valuation.

Bank Deposits and Cash at Banks and Brokers. All bank deposits and cash at bank and brokers amounts are carried at face value.

Investment Security Transactions. Investment security transactions are accounted for on the date securities are purchased or sold. The computation of the cost of sales of securities is made on the basis of average cost.

Futures. Futures are accounted for on the date of opening or closing of the contract. Subsequent payments are made or received by the sub-fund each day, dependent on the daily fluctuations in the value of the underlying index or security which are recorded for financial reporting purposes as unrealised gains or losses by the sub-fund. The unrealised gains or losses resulting from futures are included in the Statement of Net Assets and in

the Schedule of Investments.

Forward Foreign Exchange Contracts. Forward foreign exchange contracts are valued on the basis of forward exchange rates prevailing at the closing date and applicable to the remaining period until the expiration date. The unrealised gains or losses resulting from forward foreign exchange contracts are included in the Statement of Net Assets and in the Schedule of Investments. All forwards, including those used for the hedging of share classes, are included in the Schedule of Investments.

Option Contracts. Options purchased are recorded as investments at their realisable market value; options written or sold are recorded as liabilities based on the cost to close the position. Purchased and written options are included in the Statement of Net Assets and in the Schedule of Investments. When the exercise of an option results in a cash settlement, the difference between the premium and the settlement proceeds is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

Interest Rate Swaps. Interest receivable and payable on interest rate swap contracts is accrued on a daily basis, and future commitments under the swap are valued at market rates. Interest rate swap contracts are disclosed in the Statement of Net Assets and in the Schedule of Investments.

Credit Default Swaps. Premiums paid and received on credit default swap contracts to buy or sell protection against a credit event are accrued on a daily basis and reflected as net income. Future commitments under the swap are valued at market rates. Credit default swap contracts are disclosed in the Statement of Net Assets and the Schedule of Investments.

Contracts for Difference. Contracts for difference are contracts entered into between a broker and the Company under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place. When a contract is closed, the Company records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The valuation of contracts for difference is based on the underlying security and they are disclosed in the Statement of Net Assets and the Schedule of Investments.

Equity Linked Notes. Equity Linked Notes are valued daily based on the price of the underlying security and are disclosed in the Statement of Net Assets and the Schedule of Investments at market value. The intermediate coupon(s) and final payment at maturity are determined by the change in value of the underlying security.

Term Loans. The Company invests in term loans that have been made by banks to companies. Term Loans are traded at tranche level and are made up of a number of underlying loans all with different terms (coupon rates, payment dates, maturity dates) from the same issuer. Term loans are valued according to the general security valuation policy and are disclosed in the Statement of Net Assets and the Schedule of Investments at market value.

Foreign Exchange. The Directors determine the designated currency of each sub-fund. Assets and liabilities as at 31 October 2018 have been translated at the prevailing exchange rates on that date. All transactions denominated in foreign currencies during the period are translated into the subfund's designated currency at the exchange rate prevailing on the day of transaction.

Bonds in Escrow. Bonds included in the Schedule of Investments can be used as collateral against open derivative exposures. Where this is the case, bonds will be escrowed to prevent them from being traded.

Fund share Transactions. The issue and redemption price per share of each sub-fund is the Net Asset Value per share on the date of trade, subject to the price adjustment policy.

Formation Costs. All formation costs related to the launch of the Company have been amortised. Costs incurred in launching new sub-funds will be charged to current operating expenses.

Income. Dividends on equities are recognised when the security is quoted ex-dividend. Interest is accounted for on an accruals basis.

Zero Coupon Disclosure. Zero coupon bonds and zero coupon money market instruments are disclosed in the Schedule of Investments at a rate reflecting the actual return.

Co-Management of Assets. For the purpose of effective management, where the investment policies of the sub-funds so permit, the Board of Directors may choose to co-manage assets of certain sub-funds within the Fidelity Funds range. In such cases, assets of different sub-funds will be managed in common. Fractions may result from the co-management technique. The value of these fractions is based on the market value of the underlying financial instruments in the portfolio of the co-managed sub-funds at the end of the year and is included in the total market value of the portfolio. Considering the insignificance of these amounts, they have been included as "Fractions" in the Schedule of Investments.

Combined Accounts. The combined financial statements have been presented in USD which is the Company's designated currency and represent the total financial statements of the different sub-funds. Sub-funds stated in currencies other than USD have been converted at exchange rates ruling at the year-end.

3. Investment Management Fees and Other Transactions with the Investment Manager or its Affiliates

Pursuant to the Investment Management Agreement dated 1 June 2012, FIL Fund Management Limited ("FFML") is entitled to a monthly investment management fee and asset allocation fee, accrued daily and based on the average Total Net Assets of each sub-fund, at annual rates disclosed in the table below:

Sub fund name / Class of Shares	Maximum annual investment management fee	Maximum asset allocation fee

m Will be reduced to 0.60% on 1 January 2043 and reduced further on 1 January 2048 to 0.45%.

Class C Shares are subject to an annual distribution fee of up to 1.00% of the Net Asset Value of the relevant class. Class E Shares are subject to an annual distribution fee of up to 0.75% of the Net Asset Value of the relevant class. These fees are accrued daily and payable quarterly to FIL Distributors. The Reserved Funds' classes of Shares may only be acquired by investors who are either Undertakings for Collective Investment or investors whose assets are held in accounts managed by FIL or its affiliates. Expenses and charges, excluding investment management fees, administration expenses, government taxes and custodian fees for such classes of Shares, will be charged to, and paid directly by, FIL and its affiliates. The investment management fees, administration expenses, government taxes and custodian fees for such classes of Shares are charged to the sub-funds but are reimbursed in full by FIL and its affiliates.

FIL and its affiliates may waive any or all of their fees and limit the maximum level of expenses (with certain exceptions) that the sub-funds would be

paying. These waivers are voluntary and may be revised at any time. In addition, FFML may from time to time bear certain expenses of the subfunds, on a discretionary basis. Certain officers and directors of the Company are also directors, officers or employees of FIL or its affiliates.

The Variable Management Fee ("VMF") comprises of a set base fee (the "Base Fee") of 0.50% and a positive or negative variable element of up to 0.20%, which is calculated daily to the nearest 0.01%. The variable element of the VMF is calculated based on the performance of each Share of the relevant Share class relative to that of its Market Index over the same period.
The period used to assess the performance of a Variable Share Class and Market Index is the lesser of: (i) the time since launch of the Share Class; or (ii) the previous 3 years (the "Performance Period"). The difference between the value (inclusive of income distributions previously paid out) at the beginning of Performance Period compared to the value (inclusive of income distributions previously paid out) at the end of the Performance Period for each of the relevant Variable Share Class and the Market Index form the basis of the calculation of the variable element of the VMF.

4. Securities Lending

As at 31 October 2018, the Company lent securities having a value of USD 321,308,344 and received collateral with a market value of USD 346,527,853. During the period ended 31 October 2018, the Company paid USD 751,111 to the Custodian in relation to the securities lent. The following table discloses the breakdown of the total value of securities on loan, by sub-fund, as at 31 October 2018:

Sub-fund name	Currency	Maturity Tenor	Securities Values	% of Lendable Assets	% of AUM

The following table discloses the breakdown of the total value of securities on loan by counterparty and the total collateral market value by counterparty as at 31 October 2018:

Counterparty	Total Value USD	Collateral Market Value USD	Country	Clearing Type
UBS	133,650,936	140,621,208	Switzerland	Bilateral
Morgan Stanley	78,153,698	89,143,857	UK	Bilateral
Merrill Lynch	37,330,665	39,321,146	UK	Bilateral
Deutsche Bank	29,466,619	31,040,618	Germany	Bilateral
Credit Suisse Securities	18,964,384	20,697,895	UK	Bilateral
Goldman Sachs	14,313,212	15,735,718	UK	Bilateral
HSBC	5,345,520	5,628,340	UK	Bilateral
Societe Generale	4,083,310	4,339,071	France	Bilateral

The collateral which consists of government bonds is held by the Custodian and is not reflected in the financial statements. The collateral has not been reused. There are no restrictions on the reuse of collateral. As at 31 October 2018, the analysis of collateral received on securities lending was as follows:

Collateral Type	Total Value USD	Collateral Quality	Maturity Tenor of Collateral	Collateral Currency
Government Bond	10,905,780	Aa2	1 Week to 1 Month	EUR
Government Bond	14,827,045	Aaa	1 Week to 1 Month	USD
Government Bond	6,140,844	Aaa	1 Month to 3 Months	EUR
Government Bond	68,043,516	Aaa	1 Month to 3 Months	USD
Government Bond	20,515,830	Aa2	3 Months to 1 Year	EUR
Government Bond	111,823,462	Aa2	Above 1 Year	EUR
Government Bond	56,400,042	Aaa	Above 1 Year	EUR
Government Bond	57,871,334	Aaa	Above 1 Year	USD

5. Taxation

The Company is not liable to any Luxembourg taxes on income or on realised or unrealised capital gains, nor to any Luxembourg withholding tax. The sub-funds are subject to an annual subscription tax of 0.05% on Equity, Equity Income, Asset Allocation, Multi Asset, SMART, Bond, Fixed-Term Bond and Fidelity Lifestyle Funds and 0.01% on Cash, Reserved, Institutional Reserved Funds, Class P, R, X and I Shares, calculated and payable quarterly on the Net Assets of the sub-fund on the last day of each calendar quarter.

Foreign capital gains, dividends and interest may be subject to capital gain and withholding taxes or other taxes imposed by the country of origin concerned and such taxes may not be recoverable by the Company or its Shareholders. Where there is a reasonable likelihood that a liability will crystallise, the tax payable on the unrealised gain is provided for in the NAV.

6. For UK residents only

The affairs of the Company have been conducted to ensure as far as possible that United Kingdom Reporting Fund Status will be granted for the period of these accounts with respect to the sub-funds and Share classes that are registered in the United Kingdom. With respect to UK registered sub-funds and Share classes in existence prior to the introduction of the new regime the Company has applied to the UK Inland Revenue to transition into the new regime and the UK authorities have given notice that they accept this entry. Moreover, the Company has submitted an application for the new regime for UK registered sub-funds and Share classes launched during the accounting period ending 30 April 2018. It also submitted or will submit an application for new Share classes in existing or new UK registered sub-funds launched during the accounting period. Reportable income figures are generally available six months after the year end date. The distributing subfunds and Share classes of the Company that were registered in the UK at the time have also been certified as "distributing funds" by the UK Inland Revenue authorities under the predecessor regime for all accounting periods up to 30 April 2010.

7. Equalization

Income equalisation arrangements are applied to all share classes (accumulating and distributing), across all sub-funds. For distributing shares, these arrangements are intended to ensure that the income per Share which is distributed in respect of a distribution period is not affected by changes in the number of Shares in issue during that period. The calculation of equalisation is based on net investment income.

8. Dividend Payments

The following dividend payments were made during the period ended 31 October 2018:

Sub-fund name	Div per Share	Ex-div date
ASEAN Fund A Shares (SGD)	0.0118	01-Aug-2018
ASEAN Fund A Shares (USD)	0.2134	01-Aug-2018

12. Credit Facility

The Company has syndicated multi-currency committed revolving credit facilities totalling USD 500,000,000 with a number of banks, for which J.P.Morgan Europe Limited acts as Agent. The facilities were renewed on 13 November 2017 for a further 364 days. The facilities incur commitment fees of 0.07%. The facilities, if drawn, bear interest at a rate of 1.00% above LIBOR (London Inter Bank Offer Rate) or, in the case of Swingline advances, at a rate of the higher of Prime Rate or 1.25% above the Federal Funds rate. Furthermore, if on any date the aggregate principal amount borrowed under any such facility (including amounts borrowed under any associated Swingline facility) equals or exceeds 33% of the aggregate committed amounts in respect of any such facility, then such facility will bear interest on the outstanding principal amount thereof at a rate per annum equal to the rate of interest otherwise applicable to such facility plus 0.05% per annum. The facilities are unsecured.

13. Claims for Discriminatory Withholding Taxes within the European Union

Investment funds are generally subject to local withholding taxes on receipt of cross-border payments of dividends throughout Europe. However, European Court of Justice and European Free Trade Association Court decisions support a tax discrimination claim where EU or European Economic Area ("EEA") countries impose such withholding taxes on cross-border payments at rates higher than the withholding tax imposed on dividends paid in similar situations to resident investors.

The Board of the Company has therefore authorised the filing of protective claims, based on the EU principle of the freedom of movement of capital within the EU & EEA, against countries where it is believed that withholding taxes may have been unlawfully imposed by individual EU or EEA States on dividend payments to the Company. The Board's decision has been taken exclusively to protect the position of investors in the Company.

The nature of these claims is complex and subject to each jurisdiction's local statute of limitations and procedural requirements. Consequently, these claims may be subject to lengthy litigation, and at the current time there is no certainty whether all the protective claims will ultimately be successful and whether or how much withholding tax will ultimately be recovered in each of the jurisdictions.

14. Statement of Changes in Investments

A list for each sub-fund, specifying for each investment the total purchases and sales which occurred during the period under review, may be obtained free of charge from the Registered Office of the Company or from any of the companies registered as Distributors of the Company. It is possible to receive information about the full holdings of the sub-funds in which you invest, at any point in time during the period. This is available upon request, by contacting your usual Fidelity Representative.

15. Rates of Exchange

The USD exchange rates as at 31 October 2018 are noted below. For the Chinese Renminbi currency, please note that the offshore rate is applied. RMB is a colloquial reference to the Chinese Renminbi, which is also know internationally as the Chinese Yuan ('CNY'). Whilst the CNY is traded both onshore in China and offshore (primarily in Hong Kong), it is the same currency although currently traded at different rates. The offshore rate for trading CNY is generally referred to as 'CNH'. The CNH rate will be used when determining the value of the Shares of a fund as well as for hedging purposes.

Currency	Exchange rate	Currency	Exchange rate
Argentine peso (ARS)	36.195	New Zealand dollar (NZD)	1.53291945
