**N (acc) PLN-H1: LU2310757393**

**Value | Factsheet as of 31 July 2025**

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions.

## Investment Overview

To seek long-term investment growth, mainly through growth of capital, while contributing to climate change mitigation and adaptation. The Fund also aims to achieve greenhouse gas (GHG) reductions aligned with the Paris Climate Agreement's long-term global warming target of 1.5 degrees. The Fund mainly invests in equities of companies that help reduce carbon emissions, improve resource efficiencies or limit the physical consequences of climate change. These investments may include such sectors as renewable energy, energy distribution, green materials and recycling, as well as individual companies that already have low carbon emissions or are making industry-leading efforts to reduce them. These investments may be from anywhere in the world.

Past performance does not predict future returns.

**What are the Risks?**

The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is subject to the following risks which are materially relevant: **Sustainability:** The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Emerging markets risk:** the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Complete information on the risks of investing in the Fund are set out in the Fund's prospectus.

**Glossary**

**Ongoing Charges Figure (OCF):** The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. For recent all-in annual costs, as well as hypothetical performance scenarios that show the effects that different levels of return could have on an investment in the fund, where applicable, see the KID. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment. **Weighted Average Market Capitalization:** A determination of a company's value, calculated by multiplying the total number of company stock shares outstanding by the price per share. For a portfolio, the value represents a weighted average based on the stocks held. **Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Earnings (12-Month Trailing)** is the share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds. **Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds. **Standard Deviation:** Measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

**Benchmarks:** The **MSCI All Country World Index-NR** is used for performance comparison purposes. It is not used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The **MSCI ACWI Investable Market Index-NR** is used as a proxy for the universe, for the purpose of the ESG rating comparison.

Investors who understand the risks of the Fund and plan to invest for at least 5 years. The Fund may appeal to investors who are looking for a growth-oriented investment that pursues a sustainable investment objective, are interested in a thematic exposure to equity markets as part of a diversified portfolio, have a high risk profile and can tolerate significant short-term changes in the share price.

**Product availability** The Fund is available to all investors with at least basic investment knowledge, through all distribution channels, with or without the need for advice.

**Performance:** The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy EUR, while share class returns are shown in the reference currency of share class PLN.

As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.
