Report of the Board of Directors

The Board of Directors

Chairman

Gregory E. Johnson

Director since November 28, 2003

Greg Johnson (63) is executive chairman of the Board of Franklin Resources, Inc.

Mr. Johnson was elected co-CEO of Franklin Resources in 2004 and served as the company's CEO beginning in 2005 until February 2020. Under his tenure as CEO, Franklin Templeton became one of the most globally recognized firms in the asset management industry. In 2020, Mr. Johnson became executive chairman.

Mr. Johnson earned a B.S. in accounting and business administration in 1983 from Washington and Lee University, and his Certified Public Accountant (CPA) certificate in 1985. He is a board member and past chairman of the Investment Company Institute's Board of Governors. Mr. Johnson is a past vice chairman of the Mutual Fund Forum and a past chairman of the Western district of the Securities Industry Association. He is a current board member of Jumpstart, an early literacy and education organization. Previously, he served on the board of the San Francisco Symphony. Mr. Johnson serves as the chairman and designated control person for the San Francisco Giants and serves on Major League Baseball's audit and competition committees.

Directors

Mark G. Holowesko*

Director since November 30, 1994

Mark Holowesko (64) is the founding Partner and Chief Executive Officer of Holowesko Partners Ltd (HPL). Mr. Holowesko launched the firm in the fall of 2000, under the name of Templeton Capital Advisors, to serve the needs of institutional and high-net-worth investors. Subsequently renamed Holowesko Partners, under his leadership HPL has enjoyed steady and consistent growth and now stands as one of the premier global equity hedge firms in the industry.

Mr. Holowesko's investment career began in 1985 when he joined Templeton Global Advisors Ltd. as a research analyst. By 1987, he had assumed the day-to-day management of all portfolios previously managed by Sir John Templeton, including the Templeton Growth Fund and the Templeton Foreign Fund. In 1989, Mr. Holowesko became the Director of Research of the Templeton Global Equity Funds and later, in 1996, assumed the role of Chief Investment Officer.

Mr. Holowesko served as a member of the Executive Committee of Templeton, Galbraith & Hansberger from 1987 to 1992 and as a member of the Executive Committee of Franklin Resources from 1992 to 2000. Mr. Holowesko was Director, President & Head of Investments of Templeton Global Advisors Ltd. from 1992 to 2000.

William C. P. Lockwood*

Director since December 1, 2014

William Lockwood (68) joined Franklin Templeton in 1992 and served as General Manager of the Franklin Templeton Luxembourg subsidiary and Franklin Templeton Investment Funds until December 2005. From December 2005 until January 2014, he was Conducting Officer of Franklin Templeton Investment Funds and of Franklin Templeton International Services S.à r.l. subsequently. The Conducting Officer role was a management, oversight and governance role under the EU UCITS legislation reporting directly to the Board of Franklin Templeton Investment Funds. Mr Lockwood has been working in the financial services industry in Luxembourg since 1982. He is a Scottish Chartered Accountant and a Member of the Chartered Institute for Securities & Investment, London. He has served as a director and international vice chairman of the Luxembourg Fund Industry Association (ALFI) and as a council member of the Institute of Chartered Accountants of Scotland.

Report of the Board of Directors (continued)

The Board of Directors (continued)

Jed A. Plafker

Director since April 13, 2017

Mr. Plafker (53) is Executive Vice President of Global Alliances and New Business Strategies for Franklin Templeton. In this position, Mr. Plafker is responsible for the expansion of the company's digital wealth management and distribution-related financial technology, ensuring that the firm fully harnesses these capabilities for financial advisors and clients. In addition, he partners closely with the CEO to drive execution of the Legg Mason acquisition, working closely with the Specialist Investment Managers, to maximize coordination and operating connectivity across all aspects of the firm. Mr. Plafker is also responsible for the company's closed-end fund business, joint ventures, product governance, seed capital allocations, fund board management, and direct-to-consumer initiatives. He serves as a director of various Franklin Templeton corporate and investment entities and is a member of the Franklin Resources' Executive Committee, a small group of the company's top leaders responsible for shaping the firm's overall strategy.

Prior to assuming his current position in 2020, Mr. Plafker was Executive Vice President of Global Advisory Services, overseeing Franklin Templeton's global distribution efforts, including retail and institutional sales, marketing and product strategy. Prior to that, he was responsible for international distribution for the firm beginning in 2006. Mr. Plafker joined Franklin Templeton as a corporate attorney in 1994 and later served as chief legal counsel - Asia. In 2001, he moved to the distribution side of the business as Country Head of Hong Kong. Thereafter, he became a Managing Director in Europe.

Mr. Plafker earned a B.A. in economics and business from Lafayette College in Easton, Pennsylvania, and a Juris Doctorate from the University of Miami in Coral Gables, Florida.

Craig S. Tyle

Director since December 20, 2022

Craig S. Tyle (63) is a Senior Advisor for Franklin Templeton. Prior to his current role, Mr. Tyle was Executive Vice President and General Counsel for Franklin Resources, Inc., overseeing the Legal, Regulatory Compliance and Investment Compliance departments. Mr. Tyle is also Director of Irish domiciled Franklin Templeton funds. He joined Franklin Templeton in 2005. Previously, he was a partner at Shearman & Sterling LLP in Washington D.C., where his clients included investment advisory firms, investment companies and independent directors of investment companies.

Before joining Shearman & Sterling, Mr. Tyle was General Counsel for the Investment Company Institute (ICI), the national association of the mutual fund industry. As General Counsel, Mr. Tyle helped to develop industry positions on legislative and regulatory proposals, and was responsible for the drafting of Congressional testimony and submissions to the U.S. Securities and Exchange Commission and other federal, state and foreign regulatory agencies. Prior to being appointed General Counsel, Mr. Tyle held various positions in the ICI's legal department.

He started his career as an attorney with Sullivan & Cromwell LLP in New York. Mr. Tyle earned his B.A. with high honors from Swarthmore College and graduated magna cum laude from Harvard Law School.

Anouk Agnes*

Director since November 30, 2022

Anouk Agnes (50) is an independent director with a focus on financial services. She is currently a member of several investment fund and management company boards in Luxembourg. Until May 2022, Mrs Agnes served as Economic Advisor to the Prime Minister of Luxembourg. She joined the Prime Minister's office after 7 years at ALFI, the Association of the Luxembourg Fund Industry, where she was the Deputy Director General and the Director for Communications and Business Development.

Mrs Agnes previously worked as an Advisor to the Minister of Finance, with her main responsibilities targeted at the development of the financial centre. As such, she acted as the Secretary General of the High-level Committee for the Financial Centre, as well as Deputy Director General of Luxembourg for Finance, the Agency for the development of the financial centre. Mrs Agnes started her career in the area of international development cooperation in the Philippines and in Namibia. She holds Master's degrees in law (LL.M) and in political science (M.Sc).

Report of the Board of Directors (continued)

The Board of Directors (continued)

Joseph La Rocque*

Director since November 30, 2022

Joseph La Rocque (57) is the Founder of and provides US tax consultancy services on behalf of Lighthouse Tax Advisors in Baltimore, Maryland, USA. Mr. LaRocque is also an Independent Director of US, UK Luxembourg and Irish domiciled funds and Management Companies. He is also the Chairman of the Irish domiciled Franklin Templeton Fund families. He is a former Managing Director in charge of Affiliate Strategic Initiatives at Legg Mason. Mr. LaRocque worked for Legg Mason from 2001 until July 2019.

He is a Certified Public Accountant and from 1991 to 2001 was employed by PricewaterhouseCoopers in Boston, Massachusetts, Dublin, Ireland and Baltimore, Maryland in several capacities, most recently as a Senior Manager in their global financial services practice.

Virginie Lagrange*

Director since November 30, 2023

Virginie Lagrange (53) is the current Chair of the Luxembourg Institute of Directors (ILA). She is an Independent Director certified by INSEAD and ILA and a Chartered Accountant. She sits / chairs Boards, Audit / Risk Committees and Remuneration / Nomination Committees of several Insurance Companies, Banks, Management Companies and Funds. She has 30 years of experience in the Bank and Investment Fund industry in Luxembourg. She started as bank auditor at Ernst & Young in 1993. In 2000 she joined UBS as Head Internal Audit and then as Chief Risk Officer. In 2009 she became Chief Financial Officer at Credit Suisse and in 2010 she joined Nomura Bank Luxembourg as Chief Internal Auditor before being promoted Chief Administrative Officer. Virginie holds a Master in Management from the French Ecole de Commerce of Marseille. She speaks fluent French, German and English.

**Independent directors*

Roles and Responsibilities of the Board

The responsibilities of the Board is governed by the Luxembourg law. With respect to the annual accounts of the Company, the duties of the Directors are governed by the law of December 10, 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of December 17, 2010, as amended, relating to undertakings for collective investment.

A management agreement between the Company and Franklin Templeton International Services S.à r.l. (the "Management Company") sets out the matters over which the Management Company has authority under chapter 15 of the law December 17, 2010. This includes the investment management of the assets of the Company, the administration of the Company and the implementation of the Company's distribution and marketing policies.

Prior to each Board meeting the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting, as well as for any additional meeting where this could be relevant, the Board receives reports from, among the other contributors, the Management Company and the investment managers, as appropriate. Senior representatives for each function attend the Board meetings by invitation to enable the Directors to question the reports presented to them.

The Board has organized two sub-committees composed of Board members to enhance the level of governance and allow a more thorough and efficient review of the relevant materials and information.

The Board Operations, Valuation and Audit Committee ("BOVAC") chaired by Ms. Lagrange is convened quarterly in conjunction with the meetings of the Board of the Directors of the Company. It receives materials, updates and insights from relevant internal and external functions, approves matters within its competences, and recommends approvals to the full Board of Directors where necessary. It reports back to the full Board of Directors at the quarterly full Board of Directors' meeting.

Report of the Board of Directors (continued)

The Board of Directors (continued)

The Board Product Approval Committee (“BPAC”) chaired by Mr. Tyle is focused on matters relevant, or impacting shareholders, from a product standpoint. It is convened on an ad-hoc basis, it receives materials from internal and external relevant functions to instruct its decisions. It may approve matters within its competences and recommend approvals to the full Board of Directors where necessary. It reports back to the full Board of Directors at the next opportunity.

The Directors take decisions in the interest of the Company and its Shareholders, as a whole, and refrain from taking part in any deliberation or decision which may create a conflict of interest between their personal interests and those of the Company and its Shareholders.

The Prospectus and the Management Company’s policy on conflict of interest provide further details in this respect. the Management Company’s policy on conflict of interest is available at the following link:

[International Conflict of Interest Policy Overview¹](#)

The Board and its members can take independent professional advice at the Company’s expenses, where considered necessary.

THE FUND

At June 30, 2024 Franklin Templeton Investment Funds (“FTIF”, or the “Company”) had assets under management of USD 69.13 billion, up from USD 61.17 billion a year earlier.

The financial year was marked by the continued expansion of the range and depth of the Company’s offer, as detailed below. For more information on these events, please refer to Note 1.

Fund Closures

Franklin Emerging Market Sovereign Debt Hard Currency Fund was put into liquidation effective April 15, 2024 and closed with a final NAV on April 29, 2024.

Franklin Global Aggregate Bond Fund was put into liquidation effective January 15, 2024 and closed with a final NAV on January 25, 2024.

Franklin NextStep Dynamic Growth Fund was put into liquidation effective November 27, 2023 and closed with a final NAV on December 5, 2023.

Franklin NextStep Stable Growth Fund was put into liquidation effective November 27, 2023 and closed with a final NAV on December 5, 2023.

Templeton Global Total Return II Fund was put into liquidation effective September 25, 2023 and closed with a final NAV on October 9, 2023.

The Company will continue to make changes to the range of sub-funds when this is in the best interest of investors. We remain Committed to retaining investment techniques that have been shown, over time, to increase shareholder value.

For the full list of share classes offered as at June 30, 2024, please refer to the Statistical Information section.

Corporate Governance and ALFI Code of Conduct

The Board is responsible for monitoring that a high level of corporate governance is met and considers that the Company is committed to comply with the best practises and standards of the Luxembourg fund industry.

In that sense, the Board has adopted the ALFI Code of Conduct (the “Code”), which provides principles of good practice.

¹<https://franklintempletonprod.widen.net/s/vsdwgh9nbnm/mifid-ii-conflicts-of-interest-policy>

Report of the Board of Directors (continued)

The Board of Directors (continued)

The Code is available at the following link:

ALFI Code of Conduct²

The Board confirms that in the course of the financial year in scope the Company has adhered to the principles of the Code and followed the recommendations provided therein.

The Board has actioned the improvements that were deemed appropriate as a result of the recurring annual review performed to ensure ongoing compliance with the Code.

Environmental Social Governance (“ESG”)

In accordance with Article 11(1) of Regulation (EU) 2019/2088, for financial products promoting environmental or social characteristics or having sustainable investments as their objective, the information on the environmental or social characteristics or sustainable investment is provided in the Additional Information section of the annual report.

Final Considerations

Thank you for investing with Franklin Templeton. Please be advised that the prospectus, the Key Information Documents (“KIDs”) or Key Investor Information Documents (“KIIDs”) and all Funds and share classes of FTIF may not be available in your jurisdiction.

If you have any queries, comments or suggestions about your investments with us please contact your financial adviser or your local Franklin Templeton office using the contact details on the last page of the report.

Subsequent Events

Please refer to Note 30 for details of subsequent events after the year-end.

Report of the Investment Managers

Year to June 30, 2024

Global equities overall rose substantially during the 12-month period ended 30 June 2024. Following the volatility during August through October 2023, equities worldwide trended higher during the rest of the 12-month period amid artificial intelligence (AI)-enthusiasm, a generally improving economic outlook, the eventual start of interest-rate cuts in Europe in June, and hopes for rate cuts in the United States and the United Kingdom in 2024's second half. Nonetheless, investors remained concerned about the ongoing Russia-Ukraine war, the outbreak of war between Israel and Hamas, and various political developments in Europe during 2024's busy election cycle. As measured by MSCI indexes in US-dollar (USD) terms, developed market equities—driven by the strong performance of US stocks—outperformed a global index, while emerging market and frontier market stocks significantly trailed it. In terms of investment style, global growth stocks considerably outpaced global value stocks.

European stocks advanced during the 12-month period, aided by generally resilient economic growth, the European Central Bank's (ECB's) interest-rate cut in June and investor optimism the Bank of England (BoE) might follow suit in August. Despite the heightened volatility towards period-end due to the announcements of snap elections in France and the United Kingdom, all of the region's developed and emerging equity markets ended the period higher, all in USD terms. On the economic front, the eurozone's GDP grew at a modest rate sequentially in 2024's first quarter after contracting in the previous quarter. The currency bloc's manufacturing activity contracted in June for the 24th successive month, while its services activity expanded for the fifth consecutive month. The ECB cut its key refinancing rate at its June meeting, following nine months of holding the rate at a two-decade high. In the United Kingdom, GDP expanded sequentially in the first quarter after contracting for two consecutive quarters, indicating the country exited a technical recession. Following a contraction in April, UK manufacturing activity returned to growth in May and continued expanding in June, while services activity expanded in June for the eighth successive month. After raising its key bank rate in August 2023, the BoE left it unchanged during the rest of the period, holding it at the highest level in more than 16 years.

US stocks outperformed gauges of developed, emerging and frontier market equities for the 12 months under review, all in USD terms. Following the volatile months of August through October 2023, major US indexes repeatedly reached new record highs during the rest of the period amid AI fervour, stronger-than-expected earnings reports, and hopes for interest-rate cuts in the latter part of 2024. After raising the federal funds target rate in July 2023 to the highest level in more than two decades, the US Federal Reserve (Fed) paused during the rest of the period as it waited for additional data that would give it greater confidence that inflation is moving towards its 2.0% long-run goal. Annual inflation, as measured by the core personal consumption expenditures price index—the Fed's preferred inflation gauge—rose in May at the slowest rate since March 2021 but remained above the Fed's target. The US labour market cooled during the period but remained resilient. Meanwhile, gross domestic product (GDP) expanded in 2024's first quarter at a significantly slower annual rate than in the prior two quarters. Manufacturing activity contracted during most of the period except for a slight expansion in March 2024, while services activity rose during most of the period except for contractions in April and June.

In credit markets, outside of non-eurozone Europe, sovereign bond yields were generally higher over the period under review across both developed and emerging markets. The yield on the 10-year US Treasury note rose by 56 basis points (bps) to 4.40% over the period, as economic developments in the United States pushed back investor expectations of interest-rate cuts. In the eurozone, increases were more subdued, with the yield on the 10-year German Bund rising by 11 bps to 2.50%; outside the eurozone, sovereign bond yields generally fell in Europe's developed and emerging markets. Emerging Asian and Latin American government bond yields were mostly higher over the period. In Japan, the relaxation and then removal of yield curve control saw the 10-year government bond yield breach the 1% level for the first time since 2012; it rose by 66 bps to 1.05% over the period.

The global commodity complex collective rose during the 12 months under review, driven largely by price increases in crude oil, as well as certain precious and industrial metals, countered by price decreases in natural gas and major agriculture products. The USD was a mild headwind as it appreciated against a basket of its major currency counterparts, which made USD-denominated commodities more expensive for most non-US buyers. The commodity market's underpinnings appeared increasingly dependent on OPEC (Organization of the Petroleum Exporting Countries) oil-supply curbs (with oil serving as one of the most sensitive indicators of global economic growth), as well as monetary and fiscal stimulus measures in China, the record-setting US stock market, and geopolitical risk (i.e., wars in the Middle East and Europe). US and international benchmark crude oil prices touched six-month highs in April; despite declining for the second quarter amid oversupply concerns and tepid demand growth, they ended the 12-month period substantially higher. Spot gold reached new record highs and posted its third quarterly gain in a row in 2024's second quarter despite a seemingly tough fundamental backdrop for precious metals: high interest rates, tapering inflation, a strong stock market and a still-growing US economy.

As we enter the second half of 2024, global growth remains constructive in the developed world as leading indicators suggest continued expansion. Despite the optimism in equity markets, supported by an ongoing expansion in global economic activity, we see a balance of risks across assets. Improving earnings expectations support the outlook for global equities despite localised margin pressures. Longer-term equity fundamentals favour regions with proven earnings power and continued corporate resilience. In fixed income, the prospect of only a slow normalisation of inflation highlights bond risks as well. Yields are attractive, in our assessment, but may already largely discount likely policy easing. Corporate bond spreads remain low but offer adequate compensation for default risk given continued growth.

THE INVESTMENT MANAGERS

July, 2024

The information stated in this report represents historical data and is not an indication of future results.

Audit report

To the Shareholders of
FRANKLIN TEMPLETON INVESTMENT FUNDS

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of FRANKLIN TEMPLETON INVESTMENT FUNDS (the “Fund”) and of each of its sub-funds as at 30 June 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 30 June 2024;
- the statement of operations and changes in net assets for the year then ended;
- the schedule of investments as at 30 June 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;

- conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The performance is based on the net asset values as calculated on the last business day of the year June 28, 2024. Those net asset values reflect the market prices of the investments as of the last business day of the year. The performance is based on the change of the net asset value per share.

The Fund Performance disclosed in this table is the performance of the reference share class in base currency of the Fund.

Where Class A distribution "A (dis)" Shares are disclosed, the performance is calculated with all the income reinvested (total return). Information on other share classes is available on request.

¹ Unaudited figures.

¹ The launch date is for the Fund, however the reference share class launched at a later date.

² Fund performance prior to September 1996 excluded from calculation because a different portfolio allocation strategy was in use.

Information on other share classes is available on request. This report shall not constitute an offer or a solicitation of an offer to buy shares. Subscriptions are to be made on the basis of the current prospectus, where available the relevant Key Information Documents ("KIDs") or Key Investor Information Documents ("KIIDs"), a copy of the latest available audited annual report and, if published thereafter, the latest unaudited semi-annual report. The price of shares and income from them can go down as well as up and you may not get back the full amount that you invested. Past performance is no guarantee of future performance. Currency fluctuations may affect the value of investments.

*This Fund / Share class was launched during the year.

^oThis Fund / Share class was closed during the year.

^lThe share class was liquidated on January 12, 2024 and relaunched on April 19, 2024.

¹Please refer Note 1 for fund events.

²Proceeds received from sale of restricted securities sold during the current period which were considered as nil value in the last fiscal year which led to huge increase in NAV as at 28th June 2024.

Per Share NAV disclosed is as of June 28, 2024 the last valuation of the fiscal year.

Notes to Financial Statements

For the year ended June 30, 2024

Note 1 - The Company

Franklin Templeton Investment Funds (“FTIF” or the “Company”) is a collective investment undertaking pursuant to Part I of the amended Luxembourg law of December 17, 2010 on undertakings for collective investment and qualifies as a société d’investissement à capital variable. The Company was incorporated in Luxembourg on November 6, 1990, for an undetermined period. At the date of this report, it offers shares in 81 sub-funds of the Company (the “Funds”). The Board of Directors of the Company may authorise the creation of additional Funds in future with different investment objectives.

The Company aims to provide investors with a choice of Funds investing in a wide range of transferable securities and other eligible assets on a worldwide basis and featuring a diverse array of investment objectives, including capital growth and income. The overall objective of the Company is to seek to minimise investment exposure through diversification and to provide Shareholders with the benefit of a portfolio managed by Franklin Templeton, according to its successful time-tested investment selection methods.

- Templeton Emerging Markets Sustainability Fund: Share class was renamed from EB (acc) EUR to P1 (acc) EUR, EB (acc) GBP to P1 (acc) GBP and EB (acc) USD to P1 (acc) USD.

Note 2 - Significant accounting policies

(a) General

The financial statements are prepared in accordance with the regulations of the Grand Duchy of Luxembourg relating to investment funds under the going concern basis of accounting, with the exception of Franklin NextStep Balanced Growth Fund which got merged effective August 16, 2024. Hence the financial statements for this sub-fund have been prepared on a liquidation basis. The application of the non-going concern basis of accounting has not led to material adjustments to the sub-funds published net asset value.

(b) Investment in securities

Securities which are listed on a stock exchange or traded on any other organised market are valued at the last available price on such exchange or market which is normally the principal market for each security, and those securities dealt in on an over-the-counter market are valued in a manner as near as possible to that for quoted securities.

Securities not listed on any stock exchange nor traded on any organised market are valued at the last available price, or if such price is not representative of their fair value, they are valued prudently and in good faith on the basis of their reasonably foreseeable sales prices.

In accordance with the provisions of the current prospectus, Market Level Fair Valuation may be implemented to protect the interests of the Company's shareholders against market timing practices, as market timers may seek to exploit possible delays between the change in the value of a Fund's portfolio holdings and the Net Asset Value of the Fund's Shares in Funds that hold significant investments in foreign securities because certain foreign markets close several hours ahead of the US markets, and in Funds that hold significant investments in small-cap securities, high-yield (junk) bonds and other types of investments which may not be frequently traded.

Note 2 - Significant accounting policies (continued)**(b) Investment in securities (continued)**

The Company's directors are using several methods to reduce the risk of market timing. As at June 30, 2024, a Market Level Fair Valuation was applied to the following Funds:

Franklin Biotechnology Discovery Fund
Franklin Disruptive Commerce Fund
Franklin Diversified Balanced Fund
Franklin Diversified Conservative Fund
Franklin Diversified Dynamic Fund

The Company has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. In such circumstances, the price of such investment shall be adjusted in accordance with the procedures adopted, as determined by or under the direction of the Board of Directors.

During the accounting year under review, gains and losses on investment securities sold were computed on the average cost basis for all Funds with the exception of the Franklin High Yield Fund, the Franklin Income Fund, the Franklin U.S. Government Fund, the Templeton Asian Bond Fund and the Templeton BRIC Fund which were computed on the first-in, first-out basis.

During the accounting year under review, discounts and premiums were amortised to income over the year to maturity.

For mortgage-backed and other similar holdings with scheduled debt paydowns, the funds record accruals, based on their historical experience, for anticipated paydowns. Such accruals are recorded as a reduction or increase to the related holdings as disclosed on the Schedule of Investments and are included in the related unrealised appreciation/depreciation on investments shown on the "Statement of Operations and Changes in Net Assets".

Money market instruments are valued at market value.

On February 24, 2022, Russia began military operations in the sovereign territory of Ukraine. The current political and financial uncertainty surrounding Russia and Ukraine has increased market volatility and the economic risk of investing in securities in these countries and other impacted countries within the region. Due to the sanctions, actions by governments, developments in Ukraine itself and other circumstances, the Manager continues to assess the impact on valuation and liquidity and will take any potential actions needed, in accordance with the Funds' valuation policies and procedures. The Russian equity securities are priced at nil as at June 30, 2024.

Exposure within the sub-funds has been summarised as follows (exposure is limited to non-equity holdings as the equities have been fair valued at nil):

Funds	As of	% Ukraine	% Russia	% Belarus	% Total Exposed
Franklin Emerging Market Corporate Debt Fund	30/06/2024	1.16%	0.00%	0.35%	1.51%
Franklin Emerging Markets Debt Opportunities Hard Currency Fund	30/06/2024	0.59%	0.04%	0.78%	1.41%
Franklin K2 Alternative Strategies Fund	30/06/2024	0.49%	0.00%	0.00%	0.49%

(c) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the "Statement of Net Assets" date for the remaining period, until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the "Statement of Operations and Changes in Net Assets".

(d) Financial future contracts

The Company may enter into financial future contracts to gain exposure to market changes. A financial future contract is an agreement between two parties to buy or sell a security for a set price on a future date. Required initial margin deposits of cash or securities are maintained by a broker in a segregated account. Subsequent payments, known as variation margin, are made or received by the Company depending on the fluctuations in the value of the underlying securities. Such variation margin is

Note 2 - Significant accounting policies (continued)**(d) Financial future contracts (continued)**

accounted for as unrealised gains or losses until the contract is closed, at which time the gains or losses are reclassified to realised gains or losses. Realised and unrealised gains and losses are included in the "Statement of Operations and Changes in Net Assets".

(e) Interest rate swap contracts

Interest rate swap contracts are used to hedge the risk of changes in interest rates and are agreements between two parties to exchange cash flows based on a notional principal amount. The net interest received or paid on interest rate swap contract agreements is accrued daily as interest income/expense.

Interest rate swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of interest rate swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(f) Inflation swap contracts

An inflation swap contract is a bilateral agreement used to transfer inflation risk from one party to another through an exchange of cash flows.

Inflation swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of inflation swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(g) Cross currency swap contracts

A cross currency swap is an agreement between two parties to exchange interest payments and principals denominated in two different currencies. Cross currency swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of cross currency swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement. There were holdings during the year. However, the fund had no exposure as at June 30, 2024.

(h) Total return swap contracts

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

Total return swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

Note 2 - Significant accounting policies (continued)

(h) Total return swap contracts (continued)

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of total return swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(i) Contracts for difference

Contracts for difference are contracts entered into between a broker and the Fund under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place.

Upon entering into contracts for difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ("initial margin"). Subsequently, payments known as "variation margin" are made or received by the Fund periodically depending on fluctuations in the value of the underlying security.

The market value of CFDs is determined by the last known traded price on the exchange on which the underlying securities or assets are traded or admitted for trading. For underlying securities traded on markets closing after the time of the valuation, last known prices as of this time or such other time may be used.

Contracts for differences are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

(j) Credit default swap contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic payment for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual users.

Credit default swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

The risks of credit default swap contracts include unfavourable changes in interest rates, an illiquid secondary market and the possible inability of the counterparty to fulfil its obligations under the agreement, which may be in excess of the amount reflected in the "Statement of Net Assets".

(k) Option contracts

Options are contracts entitling the holder to purchase or sell a specified number of shares or units of a particular security at a specified price at any time until the contract-stated expiration date. Options purchased are recorded as investments; options written (sold) are recorded as liabilities. When the exercise of an option results in a cash settlement, the difference between the premium (original option value) and the settlement proceeds is accounted for as a realised gain or loss. When securities are acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium. When an option is closed, the difference between the premium and the cost to close the position is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

Note 2 - Significant accounting policies (continued)**(k) Option contracts (continued)**

The risks include price movements in the underlying securities, the possibility there may be an illiquid options market, or the inability of the counterparties to fulfil their obligations under the contract.

The Company writes options on securities, futures and interest rate swaps (“swaptions”). These options are settled in cash and subject the Company to unlimited risk of loss. The Company, however, is not subject to credit risk on written options as the counterparty has already performed its obligation by paying the premium at the inception of the contract.

The market values are recorded under “Option Contracts at Market Value” in the “Statement of Net Assets”.

(l) Foreign exchange transactions

Transactions expressed in currencies other than each Fund’s currency are translated into each Fund’s currency at the exchange rates applicable on the transaction dates.

Assets and liabilities denominated in currencies other than each Fund’s currency are translated into each Fund’s currency at the appropriate exchange rates ruling at the year end. Gains and losses on foreign exchange transactions are recognised in the “Statement of Operations and Changes in Net Assets” in determining the results for the accounting year.

The reference currency of the Company as reflected in the financial statements is U.S. dollar. The principal exchange rates applied as at June 30, 2024 are as follows:

AED	3.6730	IDR	16,375.0000	PHP	58.4900
AUD	1.4990	ILS	3.7714	PLN	4.0250
BRL	5.5904	INR	83.3605	PYG	7,538.4950
CAD	1.3682	ISK	138.8300	QAR	3.6458
CHF	0.8984	JPY	160.8650	RON	4.6467
CLP	941.0500	KES	129.2500	RSD	109.2900
CNH/CNY	7.3000	KRW	1,379.9450	RUB	85.7500
COP	4,150.7750	KWD	0.3067	SAR	3.7516
CZK	23.3900	KZT	473.6100	SEK	10.5967
DKK	6.9629	MAD	9.9703	SGD	1.3560
DOP	59.0600	MXN	18.2930	THB	36.7250
EGP	48.0300	MYR	4.7175	TRY	32.6566
EUR	0.9336	NAD	18.1967	TWD	32.5070
GBP	0.7910	NGN	1,525.0000	UGX	3,710.000
GEL	2.8050	NOK	10.6760	UYU	39.4400
GHS	15.3000	NZD	1.6418	UZS	12,557.6700
HKD	7.8091	OMR	0.3850	VND	25,455.0000
HUF	368.7950	PEN	3.8435	ZAR	18.1953

The above exchange rates have been rounded to four decimal places.

The list of the currency abbreviations is available in note 28.

(m) Mortgage dollar rolls

In a mortgage dollar roll, a Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (name, type, coupon, and maturity) securities on a specified future date. During the year between the sale and repurchase, the Fund foregoes principal and interest paid on the mortgage-backed securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase, as well as by the interest earned on the cash proceeds of the initial sale.

Mortgage dollar rolls are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the “Statement of Operations and Changes in Net Assets”.

The difference between the current sales price and the lower forward price is treated as realised gain.

Note 2 - Significant accounting policies (continued)

(m) Mortgage dollar rolls (continued)

The market values are recorded under "Investment in mortgage dollar rolls at market value" or under "Open Short Positions on mortgage dollar rolls" in the "Statement of Net Assets".

(n) Income

Dividends are credited to income on their ex-dividend date. Interest income is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts, where applicable. Bank interest is credited to the funds upon receipt. Swap interest where applicable is recorded in accordance with the terms of the relevant swap deal. Sundry income are principally comprised of derivative income – net margin interest/price alignment on futures, options, accrual adjustments pertaining to consent fees and tax reclaims.

(o) Securities lending

To the extent permitted in the relevant Fund's investment policy, a Fund may utilise, on a temporary basis, up to 50% of its assets for securities lending transactions. The volume of the securities lending transactions of each Fund shall be kept at an appropriate level or each Fund shall be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations and that these transactions do not jeopardise the management of each Fund's assets in accordance with its investment policy. The counterparties to securities lending transactions are selected following an initial analysis, and subsequent annual review thereafter, of financial statements, company announcements, credit ratings and other market information which includes general market movements. While there are no predetermined legal status, credit rating or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process. Loans will be secured continuously by collateral which must at least equal the value of the securities lent. Securities lending income is disclosed under the caption "Securities lending" in the "Statement of Operations and Changes in Net Assets". Any transaction expenses in connection with the loans are charged to the concerned Fund.

(p) Formation expenses

Formation expenses associated with the launch of the new Funds are expensed as incurred.

(q) Swing pricing

A Fund may suffer dilution of the net asset value per share due to investors buying or selling shares in a Fund at a price that does not reflect dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

To counter this dilution impact and to protect Shareholders' interests, a swing pricing mechanism may be adopted by the Company as part of its valuation policy.

The Fund operates a swing pricing mechanism which is applied when the total estimated capital activity (aggregate of estimated inflows and outflows) at a Fund level exceeds a pre-determined threshold, as determined as a percentage of the net assets of that Fund for the Valuation Day. Funds can operate a full swing pricing mechanism where the threshold is set to zero or a partial swing pricing mechanism where the threshold is greater than zero.

Typically, such adjustment will increase the Net Asset Value per Share when there are net inflows into the Fund and decrease the Net Asset Value per Share when there are net outflows. The Net Asset Value per Share of each Share Class in a Fund will be calculated separately but any adjustment will, in percentage terms, affect the Net Asset Value per Share of each Share Class in a Fund identically. Swing pricing does not address the specific circumstances of each individual investor transaction.

The adjustments will seek to reflect the anticipated prices at which the Fund will be buying and selling assets as well as estimated transaction costs.

Investors are advised that the volatility of the Fund's Net Asset Value might not reflect the true portfolio performance as a consequence of the application of swing pricing.

Note 2 - Significant accounting policies (continued)**(q) Swing pricing (continued)**

The size of the adjustment impact is determined by factors such as the volume of transactions, the purchase or sale prices of the underlying investments and the valuation method adopted to calculate the value of such underlying investments of the Fund.

The swing pricing mechanism may be applied across all Funds of the Company. The extent of the price adjustment will be reset by the Company on a periodic basis to reflect an approximation of current dealing and other costs. Such adjustment may vary from Fund to Fund and under normal conditions will not exceed 2% of the original Net Asset Value per Share. The Board of Directors can approve an increase of this limit in case of exceptional circumstances, unusually large Shareholders trading activities, and if it is deemed to be in the best interest of Shareholders.

The Management Company mandates authority to the Swing Pricing Oversight Committee to implement and on a periodic basis review, the operational decisions associated with swing pricing. This committee is responsible for decisions relating to swing pricing and the ongoing approval of swing factors which form the basis of pre-determined standing instructions.

The price adjustment is available on request from the Management Company at its registered office.

On certain share classes, the Management Company may be entitled to a performance fee, where applicable, this will be based on the unswung NAV.

No swing pricing applied as at June 30, 2024.

During the year swing pricing adjustments affected the net asset value per share of the following Funds:

Franklin Diversified Conservative Fund
 Franklin Emerging Market Corporate Debt Fund
 Franklin Emerging Market Sovereign Debt Hard Currency Fund
 Franklin Emerging Markets Debt Opportunities Hard Currency Fund
 Franklin Euro Government Bond Fund
 Franklin Euro Short Duration Bond Fund
 Franklin European Corporate Bond Fund
 Franklin European Total Return Fund
 Franklin Global Aggregate Bond Fund
 Franklin Global Convertible Securities Fund
 Franklin Global Real Estate Fund
 Franklin Gold and Precious Metals Fund
 Franklin Gulf Wealth Bond Fund
 Franklin Japan Fund
 Franklin MENA Fund
 Franklin NextStep Dynamic Growth Fund
 Franklin Sealand China A-Shares Fund
 Martin Currie UK Equity Income Fund
 Templeton Asian Smaller Companies Fund
 Templeton China Fund
 Templeton Emerging Markets Local Currency Bond Fund
 Templeton Emerging Markets Smaller Companies Fund
 Templeton Emerging Markets Sustainability Fund
 Templeton European Opportunities Fund
 Templeton European Small-Mid Cap Fund
 Templeton European Sustainability Improvers Fund
 Templeton Global Bond (Euro) Fund

Note 2 - Significant accounting policies (continued)

(r) Combined financial statements

The accounts of the Fund are expressed in U.S. dollar and the accounts of the sub-funds are kept in the currency of each sub-fund. The combined "Statement of Net Assets" and the combined "Statement of Operations and Changes in Net Assets" are the sum of the "Statement of Net Assets" and the "Statement of Operations and Changes in Net Assets" of each sub-fund converted into the currency of the Fund using exchange rates prevailing at year-end.

Note 3 - Cross Funds Investments

Some Funds may invest into shares of UCITS and other open and closed end UCIs which may include other Funds of Franklin Templeton Investment Funds. As at June 30, 2024, the following Funds held shares issued by another Fund of the Company.

	Currency	Investment in securities at market value as per Statement of Net Assets	Market value of Cross Funds investment	Investment in securities at market value after deduction of Cross Funds investments
Franklin Diversified Balanced Fund	EUR	181,265,029	9,396,448	171,868,581
Franklin Diversified Conservative Fund	EUR	74,766,378	2,041,019	72,725,359
Franklin Diversified Dynamic Fund	EUR	157,916,427	2,322,232	155,594,195
Franklin Global Multi-Asset Income Fund	EUR	122,021,543	3,043,749	118,977,794
Franklin NextStep Balanced Growth Fund	USD	15,630,301	2,156,973	13,473,328
Franklin NextStep Conservative Fund	USD	26,132,519	2,347,249	23,785,270
Franklin NextStep Growth Fund	USD	21,752,016	1,609,604	20,142,412
Franklin NextStep Moderate Fund	USD	60,998,422	5,011,989	55,986,433
Templeton Asian Growth Fund	USD	1,858,284,446	16,923,731	1,841,360,715
Templeton Emerging Markets Dynamic Income Fund	USD	103,836,893	3,094,086	100,742,807

The total combined net assets at year-end without Cross Funds investments would amount to USD 69,080,987,885.

Note 4 - Time deposits ("TDs")

As at June 30, 2024, the Company had the following cash on time deposits:

Note 14 - Investment management fees

The Management Company receives from the Company a monthly investment management fee equivalent to a certain percentage per annum (as detailed below) of each Fund's average daily net assets during the accounting year. When Funds invest in other Franklin Templeton funds, a management fee is not applied to the amounts invested. The following percentages apply in respect of the different Funds as at year end.

The Investment Managers will be remunerated by the Management Company out of the investment management fee received from the Company.

No management fee is payable by an investor on the acquisition of Class X and Class Y shares, instead a fee is paid to the Investment Manager or affiliates under a separate agreement.

	Class A PF	Class I	Class I PF	Class J	Class S	Class S PF	Class W	Class P1/P2*	Other Classes except Class X and Class Y

* Please refer Note 1 for fund events.

Note 15 - Performance fees

The Management Company may be entitled to receive from the net assets attributable to a share class an annual performance-based incentive fee (the "Performance Fee") which, if applicable, will be calculated and accrued daily and payable as of the end of each fiscal year.

The performance fee becomes due in the event of outperformance, that is, if the increase in the NAV during the relevant performance period (after deduction of any subscription and/or redemption fees levied) exceeds (i) the increase in the target benchmark over the same period and (ii) the applicable high water mark point as defined in the prospectus.

If Shareholders redeem all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallise on that dealing day and will then become payable.

For the purpose of the Performance Fee calculation:

High Water Mark is calculated by reference to (i) the initial launch price or (ii) the NAV as of the last valuation day which formed the basis of an accrual within the relevant performance period, for which a performance fee was paid, whichever is the higher. The high-water mark is the highest peak in value that an investment fund has reached. The high-water mark ensures the fund does not pay for recovery of past performance.

Target NAV is the High Water Mark adjusted by the daily target benchmark return, where the target benchmark is the applicable benchmark as indicated above and is expressed in the currency in which the relevant share class is denominated or hedged into.

Note 15 - Performance fees (continued)

Performance period refers to each fiscal year, except where a share class with a performance fee is launched during the fiscal year, in which case its first performance period will commence on the launch date. Please refer to the prospectus for more details.

The following performance fees apply in respect of the PF(Performance fee) shares during the year ended June 30, 2024.

Fund and Share Classes	Sub-fund currency	Performance fees	Performance fees (amounts in sub-fund currency)	Percentage of average net assets	Target benchmark
Franklin K2 Alternative Strategies Fund

S PF (acc) EUR-H1 (hedged)	USD	15%	25,409	0.00%	Euro Short-Term Rate

Note 16 - Soft commission

Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the Company may be directed by the Investment Managers to broker-dealers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such broker-dealers.

The receipt of investment research and information and related services permits the Investment Managers to supplement their own research and analysis and makes available to them the views and information of individuals and research staffs of other firms.

Such services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payment, which are paid for directly by the Investment Managers.

Note 17 - Connected party transactions

Certain Directors of the Company are or may also be Officers and/or Directors of one or more of the various Investment Managers of the Funds, among others, Franklin Templeton Investments (Brasil) Ltd., Franklin Templeton Investments (Asia) Limited, Templeton Investment Counsel, LLC and Franklin Templeton Institutional, LLC. All transactions with connected parties were entered into in the ordinary course of business and under normal commercial terms. The investment management fees that are accrued by the Company in respect of the Management Company are detailed in note 14 to the financial statements.

There are no connected brokers in Franklin Templeton, and no transactions were entered into with connected brokers during the year ended June 30, 2024.

During the year ended June 30, 2024, the Company accrued administration and transfer agency fees and shares' maintenance and service charges in respect of Franklin Templeton International Services S.à r.l. as Management Company and Principal Distributor of the Funds.

Any investment in Cross Funds as defined in Note 3 or products issued by Franklin Templeton are made at normal market condition.

Note 18 - Taxation

Under current tax laws and practice, the Company is not liable in the Grand Duchy of Luxembourg to any taxes on income or on realised or unrealised capital gains.

The Company is liable in the Grand Duchy of Luxembourg to a tax of 0.05% per annum, such tax being paid quarterly, and calculated on the net asset value of each Fund at the end of each relevant quarter (except the Franklin U.S. Dollar Short-Term Money Market Fund for which the rate is 0.01%). This tax is not applicable for the portion of the assets of a Fund invested in

Note 18 - Taxation (continued)

other undertakings for collective investment that have already been subject to such tax. Class I shares, Class J shares, Class P1 shares, Class X shares and Class Y shares may benefit from a reduced rate of 0.01% per annum if all shareholders of these share classes are institutional investors.

Investment income received or capital gains realised by the Company may be subject to tax in the countries of origin. All liabilities in respect of taxes payable on unrealised capital gains on investments are provided for as soon as there is a reasonable certainty that a liability will crystallise.

No stamp duty or other tax is payable in the Grand Duchy of Luxembourg on the issue of shares in the Company.

The Company is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current laws.

Note 19 - Share classes

Class A shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00%, retained by the Principal Distributor, applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class AS shares: are offered in Singapore to CPF Investors as more fully described in the current prospectus of the Company. Class AS shares are offered at the applicable net asset value and are not subject to an entry charge. In addition, a maintenance charge of up to 0.40% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor.

Class AX shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% (except for the Franklin Diversified Conservative Fund which has an entry charge of up to 5.00%) of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00% applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class B shares: As from April 1, 2016, no additional Class B Shares are issued. Class B Shares purchased by an Investor prior to April 1, 2016 are subject to a contingent deferred sales charge up to 4.00% if such investor sells shares within 4 years of purchase. In addition, a maintenance charge of up to 0.75% per annum of the applicable average net asset value and a servicing charge of 1.06% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Starting from 2011, shares will be automatically converted into Class A shares of the same Fund 7 years after their purchase as more fully disclosed in the prospectus.

Class C shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of 1.00% if an investor redeems shares within one year of purchase. In addition, a maintenance charge of 1.08% per annum of the applicable average net asset value is deducted. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other party.

Class F shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class F shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Class G shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of 0.10% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are

Note 19 - Share classes (continued)

applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class G shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Class I shares: are offered to institutional investors as more fully described in the current prospectus of the Company. Purchases of Class I shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Class J shares: are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company. Purchases of Class J shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Class N shares: are subject to an entry charge of up to 3.00% of the total amount invested. In addition, a maintenance charge of up to 1.25% per annum of the applicable average net asset value is accrued daily and is deducted and paid monthly to the Principal Distributor. Class N shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class P1 / P2 shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class P1 / P2 shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class S shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class S shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class W shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class W shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class X shares: are not subject to an entry charge and no management fees will be payable by an investor on the acquisition of Class X shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class X shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Y shares: are not subject to an entry charge and no management, registrar, transfer, corporate, domiciliary or administration fees will be payable by an investor on the acquisition of Class Y shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class Y shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Z shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class Z shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Accumulating shares (acc): do not distribute any dividends but the income attributable is reflected in the increased value of the shares. All other terms and conditions are the same as those which apply to distributing share classes.

Distributing shares: may have different frequencies. (Mdirc) & (Mdis) share classes distribute monthly, (Qdis) share classes distribute quarterly, (Bdis) share classes distribute bi-annually and (Ydis) share classes distribute annually.

Class dirc shares: are distributing share classes with the suffix "dirc" are offered as part of a currency hedged share class.

Class pc shares*: are distribution share classes designed to offer, under normal market conditions, dividend distribution at a fixed percentage of the Net Asset Value per Share or a fixed amount respectively.

Performance fee classes: are classes that are subject to performance fees and are denoted by the inclusion of "PF" in their names.

Hedged share classes: In respect of hedged share classes, the Company offers the following alternatives:

Note 19 - Share classes (continued)

- H1: in order to reduce exchange rate fluctuations and return fluctuations, the base currency exposure of the Fund is hedged into the hedged share class alternative currency.

- H2: a hedging strategy is applied in order to reduce the risk of currency movements between the currency of the hedged share class and other material currencies of the securities and cash held by the Fund.

- H4: where currency controls imposed by a country's monetary authority prevent free movement of currency ("Restricted Currency"), another hedging methodology is used. The share class is denominated in the base currency of the Fund but hedges the Fund's base currency into a specified Restricted Currency for investors in that Restricted Currency.

*Please refer Note 30 for more information.

Note 20 - Directors Fees

For their role and services to the Board, the Independent Directors of the Board are remunerated an aggregate amount of EUR 350,000 per annum and an additional aggregate amount of EUR 30,000 per annum for membership and activities of the Board Committees. The rest of the Board members waive any right to remuneration.

Note 21 - Expenses reimbursement

On a daily basis, for share classes where the expenses are capped, the level of expenses is calculated and compared to the cap and where the level of expenses is higher than the cap, this difference is booked as a decrease of expense (the "waiver fees"). The performance fees do not form part of the capped expenses. On a monthly basis the waiver fees are deducted from the fees received by Franklin Templeton International Services S.à r.l.

The amount of waiver fees is disclosed as "Expenses reimbursement" in the "Statement of Operations and Changes in Net Assets".

Note 22 - Other Charges

Other expenses mainly consist of conducting officers fees, Shareholders reporting fee, legal fees, registration & filing fees, depository charges, paying agent fees, tax fees and miscellaneous fee/expense.

Note 23 - Statement of changes in the investment portfolio

A list, specifying for each Fund total purchases and sales transacted during the year under review, may be obtained, upon request, at the registered office of the Company.

Note 24 - Transaction costs

Transaction costs are costs incurred to acquire and dispose of financial assets or liabilities. They include fees and commissions paid to agents, brokers and dealers. During the year ended June 30, 2024, the Company incurred the following transaction costs:

Templeton Global Total Return II Fund*	USD	198
Templeton Growth (Euro) Fund	EUR	6,913,586
Templeton Latin America Fund	USD	219,569

Please refer Note 1 for fund events.

*For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

Note 25 - Equalisation

The Funds use an accounting practice known as equalisation, by which a portion of the proceeds from issues and the costs of sale of shares, equivalent on a per share basis to the amount of undistributed net investment income on the date of the transaction, is credited or charged to undistributed income. As a result, undistributed net investment income per share is unaffected by issues or redemptions of shares. However, in respect of any Fund offering only Accumulation Shares, the Board of Directors and/or the Management Company reserves the right not to apply equalisation.

Note 26 - Total Expense Ratio

The Total Expense Ratio ("TER"), expressed as a percentage, represents how the total annualised expenses of each share class relate to the average net assets of each share class for the year ended June 30, 2024. The total expenses comprise the investment management fees, the administration and transfer agency fees, the custodian fees and other expenses. However, TER does not include performance fees as summarised in the "Statement of Operations and Changes in Net Assets."

For share classes launched during the year, the TER is annualised.

Note 27 - Global Credit facility

The Company together with other European and U.S. registered investment funds managed by Franklin Templeton (individually, "Borrower"; collectively, "Borrowers"), entered into a joint syndicated senior unsecured credit facility totalling USD 2,675 million (Global Credit Facility) to provide a source of funds to the Borrowers for temporary and emergency purposes, including the ability, to meet future unanticipated or unusually large redemption requests.

Under the terms of the Global Credit Facility, the Company will, in addition to interest charged on any borrowings made by the company and other costs incurred by the Company, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee based upon the unused portion of the Global Credit Facility.

During the financial year ended June 30, 2024, the Company did not use the Global Credit Facility.

Note 29 - Additional Information

Following the invasion of Ukraine by Russia and sanctions that followed, the Russian assets held by the Fund as of February 25, 2022 were segregated from the liquid assets of the Templeton Eastern Europe Fund and allocated to seven share classes newly created on November 11, 2022 (the "Restricted Share Classes"). Shares in such new classes listed below were allocated to shareholders on November 11, 2022 in a manner to reflect their respective percentage holdings in the Fund's total NAV as of February 25, 2022. The Restricted Share Classes are closed to all subscriptions, redemptions, and switches.

Restricted Share Classes - A (acc) EUR RC, A (acc) USD RC, A (Ydis) EUR RC, I (acc) EUR RC, N (acc) EUR RC, W (acc), EUR RC, X (acc) EUR RC.

Note 30 - Subsequent events

Effective August 16, 2024, Franklin NextStep Balanced Growth Fund was merged into Franklin NextStep Moderate Fund.

Share class name change:

On August 27, 2024, Share Classes with the 'PC' code were renamed to the 'Plus' code, as detailed below.

Class Plus shares are distribution share classes designed to offer, under normal market conditions, dividend distribution at a pre-determined annual percentage of the Net Asset Value per Share that is not linked to income or capital gains.

Note 30 - Subsequent events (continued)

Current share class name	Revised share class name

Securities Financing Transactions (SFTs) and Total Return Swaps (TRS)

The Company engages in Securities Financing Transactions (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions) through its exposure on securities lending transactions and total return swap contracts during the year, in accordance with Article 13 of Regulation. Information on securities lending transactions and total return swaps are detailed below.

(¹) absolute value of the unrealised gains/(losses)

All Funds engaged in total return swap contracts utilise bi-lateral settlement and clearing with their respective counterparty.

Data on reuse of collateral

Collaterals received in relation to Securities lending and Total Return Swaps cannot be sold, re-invested or pledged.

Safekeeping of collateral

All the collateral received in relation to Securities Lending is in custody at Goldman Sachs International Bank and JPMorgan Chase Bank, N.A., London Branch. As at the reporting date, there was no collateral granted with respect to securities lending transactions.

All the collateral received in relation to Total Return Swaps is in custody at J.P. Morgan SE, Luxembourg Branch.

Data on return

The total income earned from the securities lending programme is detailed in Note 13.

The return from total return swap contracts is accrued to the Funds.

Collateral

The following table reports the collateral held as at June 30, 2024 to reduce counterparty exposure on OTC derivatives.

Fund	Counterparty	Collateral currency	Cash held as collateral	Sovereign Bonds held as collateral
Franklin Diversified Conservative Fund	Morgan Stanley	EUR	8,000	–

Distressed Securities

In line with the prospectus definition, distressed securities are to be understood as including defaulted securities, and securities that are being rated CCC or below by at least 2 ratings agencies, or if unrated, their equivalent and have a credit spread above 1,000 bps. However, with respect to securities with a credit spread higher than 1000 bps (irrespective of their credit rating), the Investment Manager will proceed to additional analyses and verifications notably based on the evolution of the security's credit spread and the rating provided by other credit agencies in order to assess whether this security should be requalified as a distressed security. This procedure is further described in the Management Company's risk management process.

The exposure to distressed securities as at June 30, 2024 is as follows:

Fund	Exposure in % of Net Assets
Franklin Emerging Market Corporate Debt Fund	1.41
Franklin Global Corporate Investment Grade Bond Fund	0.41
Franklin Global Fundamental Strategies Fund	0.14
Franklin Global Income Fund	0.85
Franklin High Yield Fund	1.23
Franklin Income Fund	1.48
Franklin Strategic Income Fund	0.53
Franklin U.S. Low Duration Fund	0.12
Templeton Emerging Markets Bond Fund	1.27
Templeton Global High Yield Fund	0.95

Portfolio Turnover Ratio

The portfolio turnover ratio, expressed as a percentage, is equal to the total of purchases and sales of securities netted against the total value of subscriptions and redemptions, over average net assets of the Fund for the 12 months period. It is effectively a measure of how frequently a Fund buys or sells securities.

The portfolio turnover ratio calculation is not applicable to Liquid Reserve and Money Market Funds, as such a ratio is not relevant to such Funds due to the short-term nature of the investments.

Remuneration

Franklin Templeton International Services S.à r.l. (“FTIS”), as UCITS licensed management company (the “Management Company”) has a remuneration policy (the “Policy”) in place which applies to all UCITS funds (each a “UCITS” and together the “UCITS”) under its management. The Policy has been designed to discourage excessive risk taking, integrating in its performance management systems risk criteria specific to the business units it covers. The policy has a governance structure aimed at preventing internal conflicts of interest.

There are defined procedures in place for the creation, update, review and approval of the Policy as well as for communication and implementation of the Policy. Senior Management, Human Resources, Compliance and other functions are all involved in this process and the Policy is approved by Senior Management and the Board of Directors of the Management Company.

Fixed remuneration is defined as base salary plus other benefits which may include pension contributions, life assurance premiums or private medical insurance premiums. Levels of fixed remuneration are set with reference to job complexity, level of responsibility, performance and market benchmarking data. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses, long term awards in the form of performance share grants or sales bonus payments. Levels of variable remuneration are set with reference to overall corporate and business unit performance as well as individual performance.

The full Policy is available at the registered office of the Management Company. Quantitative information relevant to the Franklin Templeton Investment Funds is outlined below.

Total amount of fixed remuneration paid by FTIS and its delegates during the year ended September 30, 2023 ^{*, **, ***}	€ 39,119,018
Total amount of variable remuneration paid by FTIS and its delegates during the year ended September 30, 2023 ^{*, **, ***}	€ 31,718,728
Number of staff of FTIS and in its delegates as at September 30, 2023	601
Total amount of compensation paid by FTIS and its delegates to Senior managers during the year ended September 30, 2023 ^{*, **, ***}	€ 19,827,601
Total amount paid by FTIS and its delegates to other members of staff who have a material impact on the profile of UCITS during year ended September 30, 2023 ^{*, **, ***}	€ –

*The total amount of compensation paid by FTIS has been allocated to UCITS based on its pro rata share of the average month end total net assets of the funds under management of FTIS for the year ended September 30, 2023.

**The total amount of compensation paid by the FTIS delegates has been allocated to UCITS based on its pro rata share of the average month end total net assets of the funds under management of the FTIS delegates for the year ended September 30, 2023.

***Delegates are Investment Management entities which are subject to regulatory requirements that are equally as effective as those under Article 69(3)(a) of the UCITS Directive.

Audited annual report and unaudited semi-annual reports

The audited annual reports and unaudited semi-annual reports will be available on the local Franklin Templeton website, www.franklintempleton.lu or may be obtained, free of charge, on request at the registered office of the Company; they are only distributed to registered shareholders in those countries where local regulation so requires. The complete audited annual reports and unaudited semi-annual reports are available at the registered office of the Company.

Appendix: Sustainable Finance Disclosure Regulation (unaudited)

Transparency of the promotion of environmental or social characteristics and of sustainable investment objectives in periodic reports

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088, the “SFDR”) requires the Company to include a description in its periodic reports of the extent to which any Fund classified pursuant to Article 8 of the SFDR (an “Article 8 Fund”) has met its environmental or social characteristics or classified pursuant to Article 9 of the SFDR (an “Article 9 Fund”) has met its sustainable investment objective. The SFDR also empowers the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively “ESAs”) to develop draft regulatory technical standards (“RTS”) to specify the information and presentation format in the periodic reports. The following SFDR Article 8 Fund’s and Article 9 Fund’s periodic disclosures have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023. The asset classifications in the following disclosures are based upon MSCI and may differ to the classification of the securities in the Schedule of Investments.

The disclosures for each classification are outlined as follows:

Sub-Fund Name	SFDR Classification

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas ("GHG") emissions). Franklin Advisers, Inc. (the Investment Manager) sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.20% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	3.39%
The share of companies rated AA by proprietary ESG methodology	36.98%
The share of companies rated A by proprietary ESG methodology	59.63%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

In the prior periodic reporting of the Fund, the companies 'rated B' were labeled as 'not rated'. The label has now been updated in the table below.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of companies rated AAA by proprietary ESG methodology	3.39%	0.76%
The share of companies rated AA by proprietary ESG methodology	36.98%	38.56%
The share of companies rated A by proprietary ESG methodology	59.63%	57.72%
The share of companies rated B by proprietary ESG methodology	0.00%	2.96%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
AMGEN INC.	Health Care	7.68%	United States
REGENERON PHARMACEUTICALS, INC.	Health Care	6.99%	United States
VERTEX PHARMACEUTICALS INCORPORATED	Health Care	6.15%	United States
BIOGEN INC.	Health Care	4.03%	United States
ASCENDIS PHARMA A/S	Health Care	3.95%	Denmark
GILEAD SCIENCES, INC.	Health Care	3.69%	United States

Intra-Cellular Therapies Inc	Health Care	3.04%	United States
JAZZ PHARMACEUTICALS PUBLIC LIMITED COMPANY	Health Care	3.00%	United States
INSMED INCORPORATED	Health Care	2.72%	United States
NEUROCRINE BIOSCIENCES, INC.	Health Care	2.56%	United States
argenx SE	Health Care	2.30%	Netherlands
Merus NV	Health Care	2.20%	Netherlands
Applied Therapeutics Inc	Health Care	1.92%	United States
ILLUMINA, INC.	Health Care	1.72%	United States

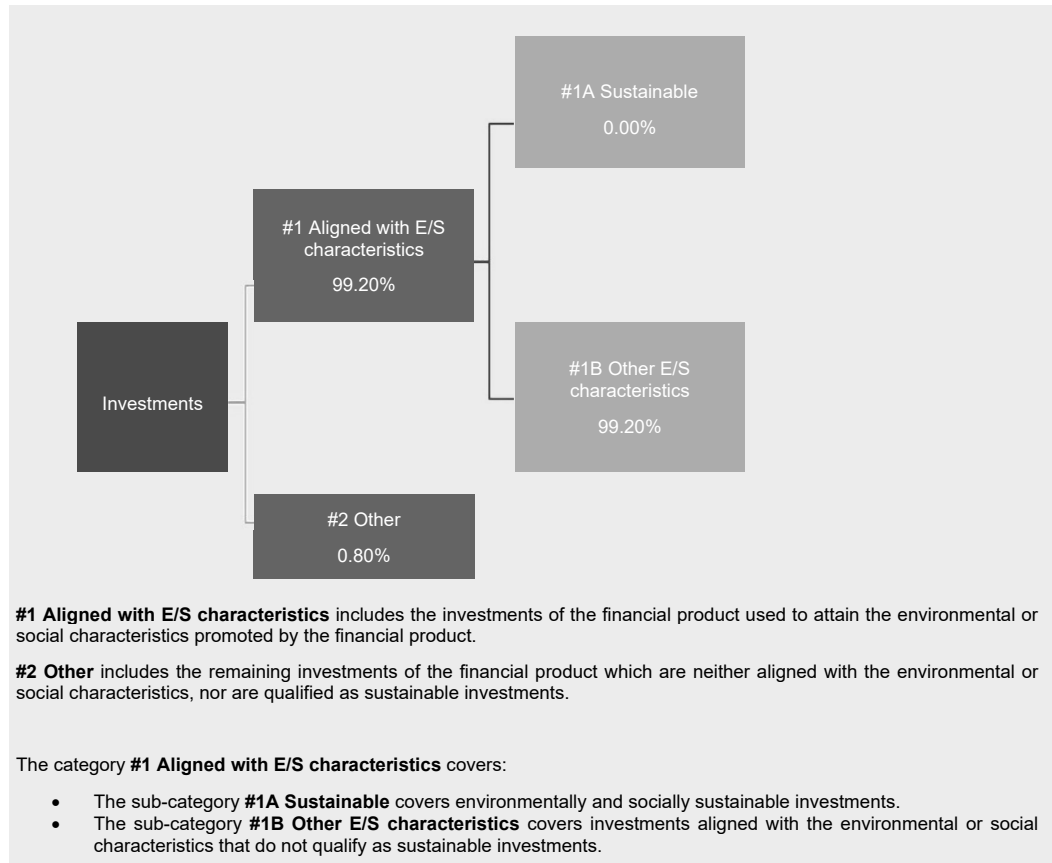

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.20% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.80%) was not aligned with the promoted characteristics and consisted primarily of liquid assets which were held for the purposes of servicing the day-to-day requirements of the Fund or issuers for which there was no ESG rating.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Health Care	99.20%
Top sub-sector	% of Assets
Biotechnology	76.65%
Pharmaceuticals	16.95%
Life Sciences Tools & Services	4.54%
Health Care Providers & Services	1.00%
Health Care Technology	0.05%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 0.80% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Disruptive Commerce Fund (the "Fund")

Legal Entity Identifier: 25490026RAMGQGPEIA14

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions and water usage). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.52% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	8.95%
The share of companies rated AA by proprietary ESG methodology	31.61%
The share of companies rated A by proprietary ESG methodology	59.44%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with

an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-03-25 - 2024-06-30.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

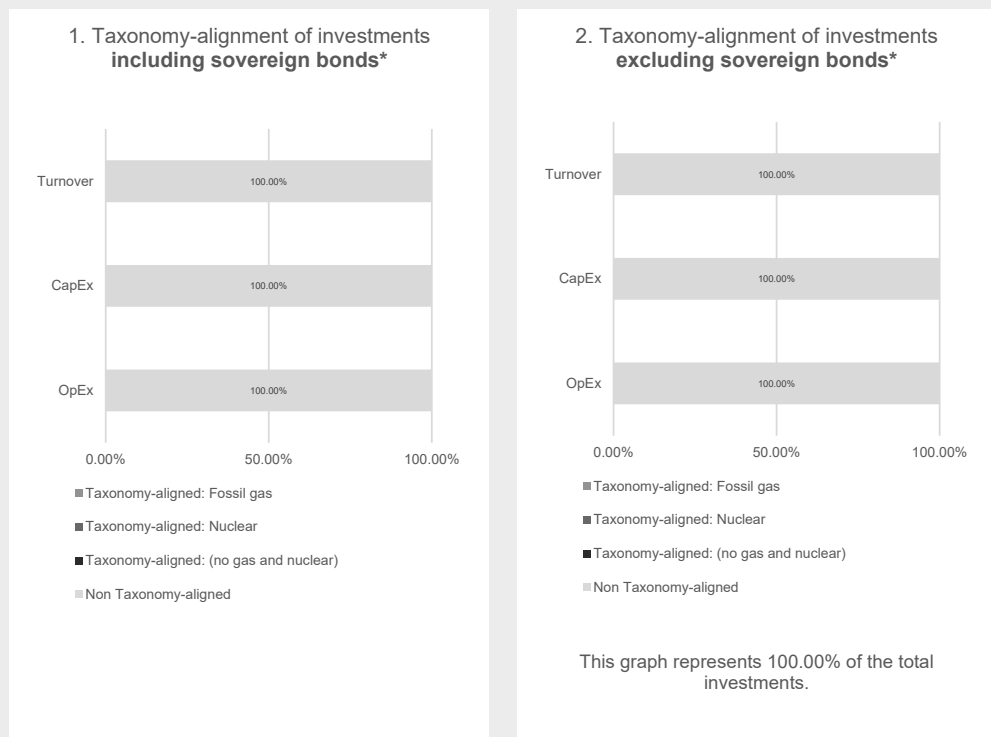

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 0.48% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 75.81% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 83.48% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 5 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 11 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Sustainability KPI Name	Value
Number of companies in the portfolio which are in top half of the Fund's corporate investment universe, defined by MSCI All Country World Index ("Fund's Corporate Investment Universe") in terms of GHG emissions	141.00

Sustainability KPI Name	Value
Number of sovereigns in the portfolio which are in top third of the Fund's sovereign investment universe, defined as the Bloomberg Global Aggregate Index ("Fund's Sovereign Investment Universe"), in terms of GHG emissions	10.00
Number of companies in the portfolio which are in the worst decile of the Fund's Corporate Investment Universe, in terms of GHG emissions	5.00
Number of companies in the portfolio with female board representation below 10%	11.00
Number of companies the Investment Managers have engaged with	15.00

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

--- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

--- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The portion of investments under “#2 Other” was 3.02% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 4 engagements focused on initiatives to reduce GHG emissions, 10 engagements focused on strengthening board gender diversity and 1 engagement covered both issues.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 79.94% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 95.25% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 5 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 11 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Sustainability KPI Name	Value
Number of companies in the portfolio which are in top half of the Fund's corporate investment universe, defined by MSCI All Country World Index ("Fund's Corporate Investment Universe") in terms of GHG emissions	141.00

Sustainability KPI Name	Value
Number of sovereigns in the portfolio which are in top third of the Fund's sovereign investment universe, defined as the Bloomberg Global Aggregate Index ("Fund's Sovereign Investment Universe"), in terms of GHG emissions	10.00
Number of companies in the portfolio which are in the worst decile of the Fund's Corporate Investment Universe, in terms of GHG emissions	5.00
Number of companies in the portfolio with female board representation below 10%	11.00
Number of companies the Investment Managers have engaged with	15.00

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation
describes the share of
investments in specific
assets.

● **What was the asset allocation?**

During the reference period, 98.91% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.09%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	41.90%
Financials	25.73%
Information Technology	4.76%
Industrials	4.55%
Communication Services	4.27%
Utilities	3.76%
Health Care	2.65%
Energy	2.53%
Real Estate	2.48%
Consumer Discretionary	2.42%
Materials	2.34%
Consumer Staples	1.54%
Top sub-sector	% of Assets
Government bonds	41.90%
Financial Services	10.84%
Banks	9.53%
Electric Utilities	3.12%
Insurance	2.74%
Capital Markets	2.61%
Diversified Telecommunication Services	2.46%
Oil, Gas & Consumable Fuels	2.07%
Real Estate Management & Development	1.84%
Semiconductors & Semiconductor Equipment	1.82%
Pharmaceuticals	1.70%
Chemicals	1.40%
Air Freight & Logistics	1.17%
Entertainment	1.03%
Transportation Infrastructure	0.99%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The portion of investments under “#2 Other” was 1.09% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 4 engagements focused on initiatives to reduce GHG emissions, 10 engagements focused on strengthening board gender diversity and 1 engagement covered both issues.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Diversified Dynamic Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, during the reference period:

- 74.26% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 92.56% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

Over the reference period:

- There were 5 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 11 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Franklin Emerging Market Corporate Debt Fund (the “Fund”)

Legal Entity Identifier: 549300F1TXCRMRF8M59

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.07% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics. The below presents the degree of success for each of the following characteristics:

- Reduction of GHG emissions and facilitation of the development of sustainability-oriented financial markets in emerging economies, especially promoting transparent disclosure practices and issuance of securities with robust sustainability attributes:

In order to promote the reduction of GHG emissions, the Fund committed to engage with the issuers falling within the bottom 20% of their peer group, as determined by the proprietary tools, as measured by their greenhouse gas emissions and greenhouse gas intensity. As a part of this commitment, the Investment Managers initiated the engagement process with 19 issuers by e-mails and online meetings. During the engagement process the Investment Managers monitored the engaged position's emissions status and their efforts in meeting the presented targets. In addition, the Fund refrained from investing in issuers where exposure to fossil fuel extraction exceeded the Investment Managers' acceptable limit, as described in the Fund's pre-contractual disclosure: any company, which derives more than 5% of its revenue from thermal coal production is deemed not investable.

Additionally, the Fund invested in ESG themed bonds, which drives the demand for these instruments, influencing the development of sustainability-oriented financial markets in emerging economies. The Investment Managers dispatched written communications to issuers on a quarterly basis, encouraging them to voluntarily report Principal Adverse Impact indicators. Such reporting translates into increased market transparency, which is especially important in jurisdictions with weaker regulatory reporting requirements.

- Fair and sound labour practices:

The Investment Managers observed the issuers against repeated and serious violations of the United Nations Global Compact principles, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, by monitoring factors including labour practices and responsible corporate governance. In addition, Investment Managers monitored child labour violations. There were no issuers identified within the Fund that were potentially involved in such violations.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the E/S characteristics promoted performed as follows:

Sustainability KPI Name	Value
Percentage of the Fund's net assets invested in green bonds	9.12%
Percentage of the Fund's net assets invested in social bonds	0.00%
Percentage of the Fund's net assets invested in sustainability bonds	1.95%
Percentage of the Fund's net assets invested in sustainability-linked bonds, or Sustainable Development Goals (the "SDGs") bonds	7.71%
Percentage of the Fund's net assets invested in issuers falling under ESG exclusions	0.00%
The number of issuers with which the Investment Managers engage	93.00

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, impact on biodiversity; or
- The development of a circular economy.

This was achieved by investing in bonds labelled "Green" or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards, as further described in the pre-contractual disclosure of the Fund; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

An example of financing greenhouse gas (GHG) reduction efforts is the Fund's investment in a green bond issued by Georgian Railway JSC. The achievements in this area are detailed in the Green Bond and Impact Allocation report published in November 2023. The primary focus of this framework is the development of railway infrastructure to support clean transportation objectives. The projects include modernizing rail infrastructure through the Railway Modernization Project, which aims to fully electrify the railway system. Construction is currently underway in central Georgia and is nearing completion. Another example is the Freight and Passenger Rolling Stock project. Lastly, the Railway Line project seeks to extend existing railway lines and maintain the current infrastructure. These projects are expected to result in benefits such as reduced electricity consumption, lower GHG emissions, decreased air pollution, and enhanced safety levels - according to the 2023 Impact report, thanks to the project developments, approximately 43,000 tonnes of CO2 emissions were avoided in 2022.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining (quasi- and sub-sovereign) issuers in the universe according to their greenhouse gas emissions and intensity. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gasses emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gas emission, the emitters historic trajectories, SBTi targets, etc.

Additionally, quasi- and sub-sovereign issuers were subjected to tests based on their political liberties and/or corruption.

The investment universe was defined as primarily fixed and floating rate debt securities and debt obligations which were located in emerging market countries and/or deriving a significant proportion of their economic activity from developing countries.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduce exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by quasi- and sub-sovereign entities, the Organization for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Guiding thematic engagement; and
- Implementing exclusions.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage with corporate issuers actively held by the Fund, which were considered as laggards and scored in the bottom 20% of the investment universe within their sector in terms of greenhouse gas emission and greenhouse gas intensity metrics, with the aim to improve the risk-management they apply in these areas. In addition, the Investment Managers are on target with their commitment to engage with issuers that were failing to disclose mandatory PAIs indicators by sending quarterly written requests.

Applying exclusions

The Fund considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions as detailed in the pre-contractual disclosure of the Fund.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
International Container Terminal Services Inc 4.75% 06/17/2030 REG S	Industrials	1.78%	Philippines

What was the proportion of sustainability-related investments?

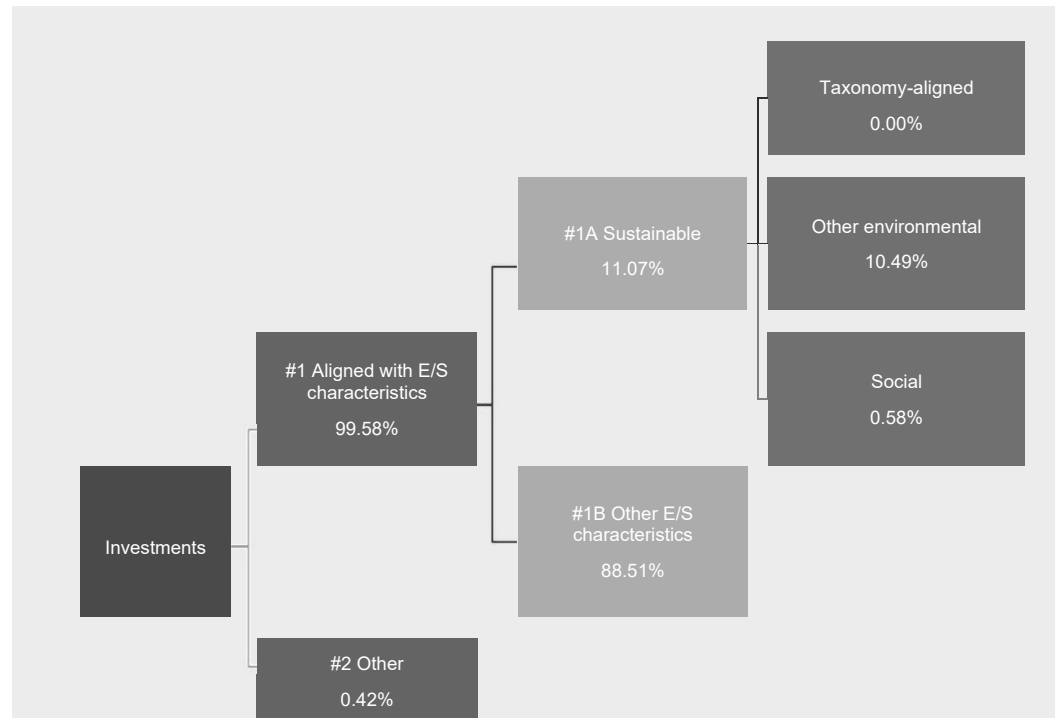

The proportion of sustainable investments was 11.07%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.58% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.42%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund, as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 88.51% portion, where the Investment Managers has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 11.07% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	25.49%
Government bonds	17.62%
Utilities	11.88%
Materials	10.42%
Industrials	9.18%
Energy	9.06%
Communication Services	5.86%
Consumer Staples	4.93%
Consumer Discretionary	2.66%
Real Estate	1.76%
Health Care	0.67%
Top sub-sector	% of Assets
Government bonds	17.62%
Banks	16.55%
Oil, Gas & Consumable Fuels	9.06%
Financial Services	8.94%
Electric Utilities	7.54%
Metals & Mining	4.57%
Wireless Telecommunication Services	3.96%
Chemicals	3.76%
Consumer Staples Distribution & Retail	2.59%
Independent Power & Renewable Electricity Producers	2.53%
Transportation Infrastructure	2.43%
Ground Transportation	2.31%
Diversified Telecommunication Services	1.90%
Construction & Engineering	1.89%
Diversified REITs	1.47%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.49%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 0.58%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 0.42% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes. For the avoidance of doubt, this did not include certain money market instruments, such as government T-Bills, where the Investment Managers have confirmed they were aligned with environmental and/or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards have been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated a proportion of its net assets to sustainable investments through ‘use of proceeds’ instruments funding projects with positive environmental impacts. The Investment Managers evaluated each security against applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application), which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then included in an engagement process.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the Investment Managers also assessed issuers’ involvement in controversy business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage with the 20% of worst scoring issuers within their sector based on their GHG emissions and GHG intensity as well as to meet the commitment to engage with issuers that were failing to disclose mandatory PAIs indicators by sending quarterly written requests, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed GHG emission topics, and encouraged proactive remedies, addressed risks and opportunities, including GHG emissions reduction, and the issuer’s emission targets.
 - Written communications: The Investment Managers sent letters on material topics, such as disclosure of PAIs indicators, to promote transparency and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Euro Government Bond Fund (the "Fund")

Legal Entity Identifier: 0YX4QFLYLSHIYAKFZJ30

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.17% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champion. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 23.76% of its net asset value (NAV).

Furthermore, the average GHG intensity of the investee countries for the Fund was 236.26, while the benchmark was 210.75. The average GHG intensity of the Fund was marginally higher than the benchmark, potentially due to investments in the green bonds of countries with elevated GHG intensity. Nonetheless, the Investment Managers believe that, in the long term, such an investment will support their energy transition.

To further promote these characteristics, the Investment Managers engaged with various sovereign issuers to discuss the reduction of GHG emissions in their national economy.

(iii) biodiversity protection:

The Investment Managers have actively engaged with a range of issuers to emphasize the critical need for the conservation and protection of biodiversity, including engagements with sovereigns. Following the adoption of the Kunming-Montreal Global Biodiversity Framework in December 2022, which outlined 23 targets with one dedicated to the funding of biodiversity conservation, the Investment Managers' efforts were focused on understanding governmental initiatives aimed at achieving these objectives. This included discussions with officials from various governments, such as Austria, among others. The meeting focused on discussion about Austria's finalized Biodiversity Strategy 2030, next the possibility of issuing pure-play biodiversity bonds and the challenges of financing biodiversity protection, including the evaluation of payment for ecosystem services, and lastly the challenges related to nature impact reporting and the difficulty of tracking specific amounts of money to specific projects. These meetings were instrumental in enhancing the understanding of country-level preparedness and about the need to monitor the implementation of national and local policies aimed at biodiversity protection. They have also set reference to encourage less advanced sovereign to adopt and execute targets and strategies related to biodiversity.

Furthermore, the Investment Managers promoted biodiversity protection through investment in 'use of proceeds' instruments with eligible projects, including but not limited to protection of endangered species, landscape management or sustainable agricultural practices.

(iv) fundamental political freedoms and civil liberties:

The Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Taking this exclusion a step further, the Fund only invested in those countries, or regions within countries, that were awarded the highest Freedom House Index score of "Free". Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy mostly through investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Government Bond Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds	46.81%
Percentage of investments in social bonds	5.66%
Percentage of investments in sustainability bonds	0.70%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	23.76%
The ESG score of the portfolio	6.65
The ESG score of the investment universe	6.39
Percentage of issuers having exposure to, or tying with excluded sectors	0.00%
The number of issuers with which the Investment Managers engaged	10.00

● ... And compared to previous periods?

Please note that due to a change in methodology, some sustainability indicators from this reference period (Environmental Champions, percentage of investment in green, social and sustainable bonds, PAIs and ESG score) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

In the current reference period that concluded on 30 June 2024, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. As of 30 June 2023, the exposure to green bonds was at 31.52%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 46.81%. In case of social bonds, as of 30 June 2023, the exposure was at 2.45%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 5.66%. Overall, the percentage of investment in green, social and sustainable bonds at 30 June 2023 was 34.96%, while the average allocation increased to 53.17% in the fiscal year ending 30 June 2024.

During both reference periods, the Fund maintained its level of investment in Environmental Champions. As of 30 June 2023, the exposure to Environmental Champions was at 26.20%, while throughout the fiscal year ending on 30 June 2024, the average allocation was at 23.76%.

At the end of the current and previous reference periods, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

During both reference periods, the Investment Manager has been active in the field of sustainability engagement, with 16 SSA issuers engaged in the previous reference period and 10 in the current reference period.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2023, the ESG score of the portfolio was 6.59, while the ESG score of the investment universe was 6.31. Where throughout the fiscal year ending on 30 June 2024, the average ESG score of the portfolio was 6.65, while the average ESG score of the investment universe was 6.39.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
	Value	Value
Percentage of investments in green bonds	46.81%	31.52%
Percentage of investments in social bonds	5.66%	2.45%
Percentage of investments in sustainability bonds	0.70%	0.99%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	23.76%	26.20%
The ESG score of the portfolio	6.65	6.59
The ESG score of the investment universe	6.39	6.31
Percentage of issuers having exposure to, or tying with excluded sectors	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Below are some examples of investments made by the Fund that contributed to its sustainable investment objectives. An example of promoting of reduction of GHG emissions and energy conservation through investments in 'use of proceeds' instruments is the green bond from Republic of Ireland. Allocations supported Ireland's commitment to sustainable development and achieving carbon neutrality by 2050. Across various categories of eligible green projects were energy efficiency or clean transportation. Among these programmes was the Energy Efficiency Retrofit Programme to retrofit social homes as well as non-residential buildings from public and business sector. A significant part of the expenditure has been allocated to clean transportation that included State's investment in public transport initiatives. It also funded cycling and walking initiatives and

sustainable urban transport measures in cities. Further, it promoted the decarbonisation of the heavy-duty sector, by supporting the purchase of new large vans, trucks, buses and coaches. Through funding the government also supported Climate Action Plan to increase usage of Electric Vehicles (EVs).

An aforementioned Ireland bond also had part of its expenditures financing projects in sustainable water and wastewater management category, which contribute to a sustainable and efficient use of water objective. Uisce Éireann is a fully publicly owned, regulated, commercial State body with responsibility for the operation and maintenance of Ireland's public water and wastewater assets. The expenditures supported their Strategic Funding Plan 2019-2024 which focuses on improving public water and wastewater services' quality, conservation, and future proofing, ensuring compliance with public health and environmental standards, improving resource management, and fostering economic and social progress. Additionally, another supported programme was The Rural Water Programme in rural Ireland that improves domestic water services by investing capital and supporting sustainable outcomes. It helps rural water supplies achieve clean, compliant drinking water, supports water conservation and central wastewater collection systems.

An example of promoting of a lowering negative impact on biodiversity through investments in 'use of proceeds' instruments is the green bond from the Federal Republic of Germany. Through part of the financing, the federal government provided funding for various programmes dedicated to the conservation of biodiversity and the protection of endangered species. The GAK ("Improvement of Agricultural Structures and Coastal Protection") program, co-financed by the federal government and the Länder, supports market- and locally-adapted, environmentally friendly land management, including nature conservation and landscape management, focusing on sustainable practices in arable farming, specialized crop cultivation, or orchards. The federal Programme "Biodiversity" is the Environment Ministry's primary funding tool for biodiversity improvement, focusing on combating insect decline through conservation projects in urban and protected areas, and knowledge dissemination about insects. The "chance.natur" programme supports the creation and conservation of significant natural areas, contributing to the protection of Germany's biodiversity and natural heritage. The "Wilderness Fund" acquires and safeguards forests and moors to fulfil the government's objective of preserving 2% of Germany's land as wilderness areas.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe.

Additionally, sovereign issuers of green bonds, social bonds and other eligible securities were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the roll out of renewable energy sources, the Investment Managers ascertained that financed projects had a positive impact on greenhouse gas intensity of a national economy.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries and the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting the Fund's investable universe; and
- Guiding thematic engagement.

Identifying best-in-class issuers

The Fund invested in bonds issued by governments, government-related, and supranational issuers deemed by the Investment Managers to be Environmental Champions.

Environmental Champions were identified using a proprietary ESG ranking. The Energy and Environmental Transition Index (the "EETI") ranked sovereign issuers energy efficiency, natural capital conservation, renewable energy performance, using various data points, including greenhouse gas emissions normalized by gross domestic product (CO2e/GDP).

Restricting the Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI were excluded from the Fund's portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

The average of the PAI metrics is based on 30 September 2023, 31 December 2023, 31 March 2024 and 30 June 2024.

PAI indicators	Unit of measurement	Value	Coverage
GHG Intensity of investee countries EUR	tCO2e/M€ revenue	236.26	81.70%
Benchmark GHG Intensity of investee countries EUR	tCO2e/M€ revenue	210.75	86.74%
Investee countries subject to social violations	Count of Countries in Fund	0.00	81.70%
Benchmark Investee countries subject to social violations	Count of Countries in Fund	0.00	86.74%

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

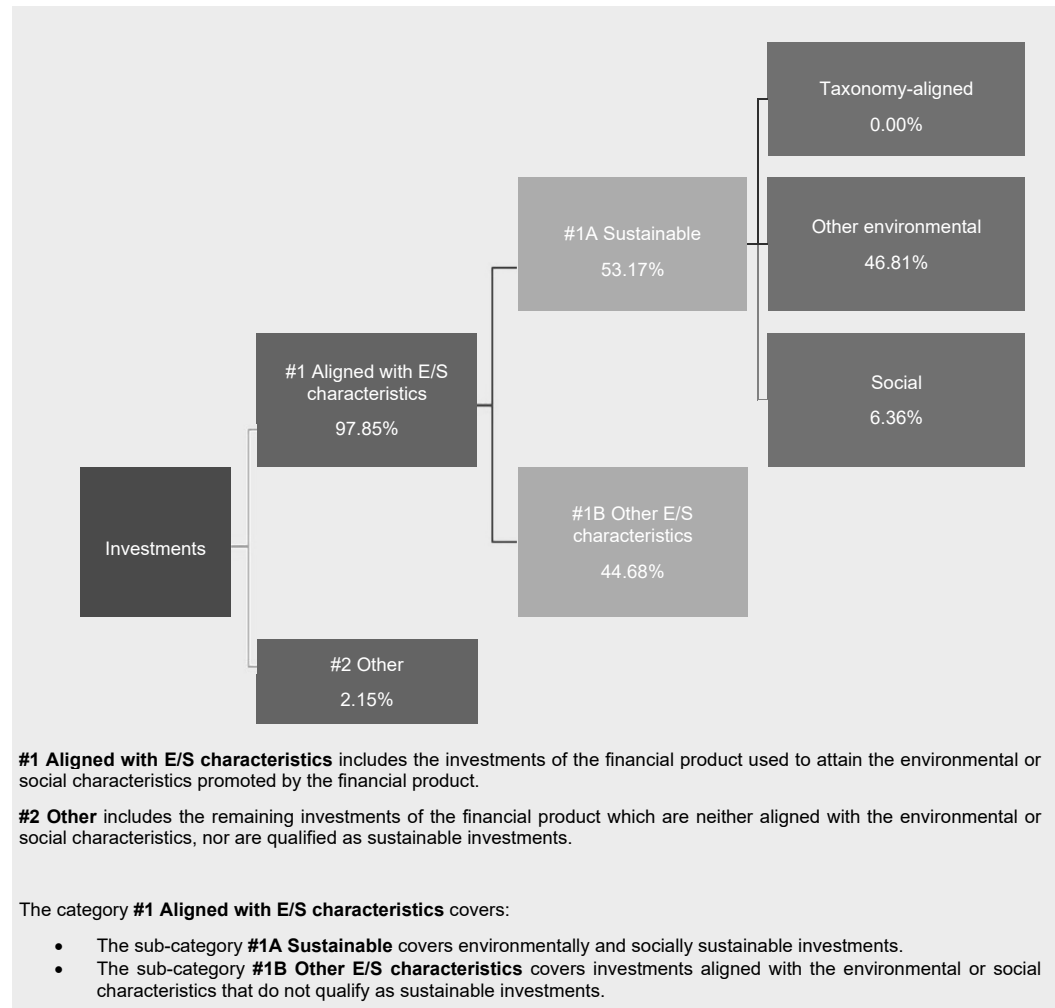

The proportion of sustainable investments was 53.17%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.85% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (2.15%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 53.17% of its portfolio in sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	97.01%
Financials	0.88%
Top sub-sector	% of Assets
Government bonds	97.01%
Financial Services	0.88%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 46.81%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 6.36%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 2.15% and included cash held for the purposes of servicing the day-to-day requirements of the Fund and derivatives for hedging purposes, for which there were no minimum environmental or social safeguards.

Investments under “#2 Other” also included derivatives instruments which were used by the Fund for hedging purposes. The pre-contractual disclosure of the Fund will be amended at the next prospectus update to clarify this fact. For the avoidance of doubt, derivatives were not used by the Fund to promote E/S characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.
2. The Investment Manager used proprietary ESG IT solutions (including the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their groups based on GHG emissions and other environmental factors which are then excluded from the investment universe.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like the Freedom House Index, the manager also assessed issuers’ involvement in social controversies. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Euro High Yield Fund (the “Fund”)

**FRANKLIN
TEMPLETON**

Legal Entity Identifier: A3OFOMMYV8PYF37HFY49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.35% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's allocation to Environmental Champions stood at 24.01% of its net asset value (NAV).

Additionally, the Fund refrained from investing in issuers where exposure to coal extraction exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: any company, which derives more than 5% of its revenue from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity of the investee companies (Scope1,2,3) for the Fund was 722.61, while for the benchmark it was 967.19, whereas Scope 1 and 2 GHG intensity for the Fund was 96.73, compared to 166.29 for the benchmark. The Fund's total GHG intensity and the Fund's Scope 1,2 GHG intensity is lower than that of the benchmark.

(ii) alignment with the international business conduct principles:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises. Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

(iii) products and services without negative societal effects:

The Investment Managers included a negative screen and set of exclusions as part of the investment process to assess the investments toward to societal effects these could have. The issuers were screened toward protection of international human rights; no complicity in human rights violations; respect for freedom of association and the right to collective bargaining; elimination of forced labour; abolition of child labour; elimination of discrimination in respect of employment and occupation; working and/or standing up against corruption in all its forms; manufacture or distribute nuclear weapons or controversial weapons defined as anti-

personnel mines, biological & chemical weaponry; or those that manufacture components intended for use in such weapons; manufacture conventional weapons; those that derive revenue from such products that exceeds the Investment Managers' threshold (5%); manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Managers' thresholds (5%); adhere to the bespoke list of gambling companies, that are set according to the bespoke gambling policy. The Investment Managers have monitored the issuers in respect to the abovementioned exclusions and confirmed that no security is breaching any of the specific factors on a pre-deal basis and during the time the security is a part of the portfolio.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark ICE BofA Euro High Yield Constrained. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators during the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds	9.90%
Percentage of investments in social bonds	1.16%
Percentage of investments in sustainability bonds	1.29%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	24.01%
The ESG score of the portfolio	6.32
The ESG score of the investment universe	5.85
Percentage of investment in issuers having exposure to, or tying with excluded sectors	0.00%
The number of issuers with which Investment Managers engaged	118.00

● ... And compared to previous periods?

Please note that due to a change in methodology, some sustainability indicators from this reference period (Environmental Champions, percentage of investment in green, social and sustainable bonds, PAIs and ESG score) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

In the current reference period that concluded on 30 June 2024, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. As of 30 June 2023, the exposure to green bonds was at 7.27%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 9.90%. In case of social bonds, as of 30 June 2023, the exposure was at 1.16%, and throughout the fiscal year ending on 30 June 2024, the average allocation was also 1.16%. The allocation of the sustainability bonds as of 30 June 2023 was 1.25%, and throughout the fiscal year ending on 30 June 2024, the average allocation rose to 1.29%.

In the current reference period that concluded on 30 June 2024, the Fund has notably increased its average allocation in Environmental Champions compared to the previous reference period. As of 30 June 2023, the exposure to Environmental Champions was at 17.5%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 24.01%.

At the end of the current and previous reference periods, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

During both reference periods, the Investment Managers were very active in the field of sustainability engagement. This is highlighted by the fact that 106 issuers were engaged in the previous reference period, and the Investment Managers have continued to expand its engagement efforts, resulting in 118 issuers being engaged in the current reference period.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2023, the ESG score of the portfolio was 6.17, while the ESG score of the investment universe was 5.43. Where throughout the fiscal year ending on 30 June 2024, the average ESG score of the portfolio was 6.32, while the average ESG score of the investment universe was 5.85.

Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch. Benchmark PAI 1 metrics as of 30 June 2023 have been adjusted since the prior reporting of the Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

The Fund promoted the reduction of GHG emissions through investment in numerous green use-of-proceeds. An example of is the green bond from Orsted. In 2023 DKK 18.7 billion was allocated to the 11 projects in renewable energy including offshore and onshore wind farms and solar PV farms. Key projects include the Hornsea 2 offshore wind farm in the UK, which became fully operational in August 2022 and has a capacity of 1.32 GW, enough to power over 1.4 million UK homes. Financed projects support the Paris Agreement and aim to have a transformative impact on the UN Sustainable Development Goals, particularly those focused on affordable and clean energy and climate action. Additionally, the company is committed to biodiversity conservation, with all new renewable energy projects commissioned from 2030 onwards expected to have a net-positive biodiversity impact, and a ban on landfilling wind turbine blades and solar PV modules.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

-----**How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

-----**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The sustainable investments were aligned with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Guiding thematic engagement; and
- Applying exclusions

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using a proprietary ESG ranking:

- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories, SBTi target.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions.

The average of the PAI metrics is based on 30 September 2023, 31 December 2023, 31 March 2024 and 30 June 2024.

What was the proportion of sustainability-related investments?

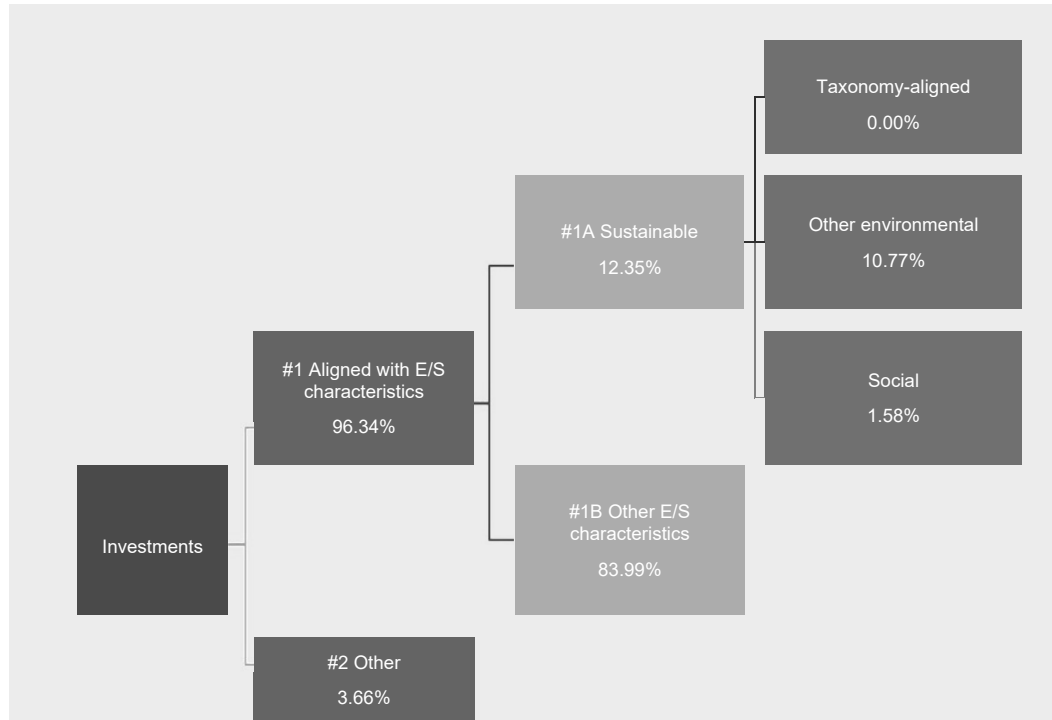

The proportion of sustainable investments was 12.35%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.34% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (3.66%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 12.35% of its portfolio to sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Financials	27.49%
Consumer Discretionary	17.10%
Industrials	11.35%

Communications Equipment	2.37%
Real Estate Management & Development	2.17%
Construction & Engineering	2.09%
Wireless Telecommunication Services	2.08%
Metals & Mining	1.89%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

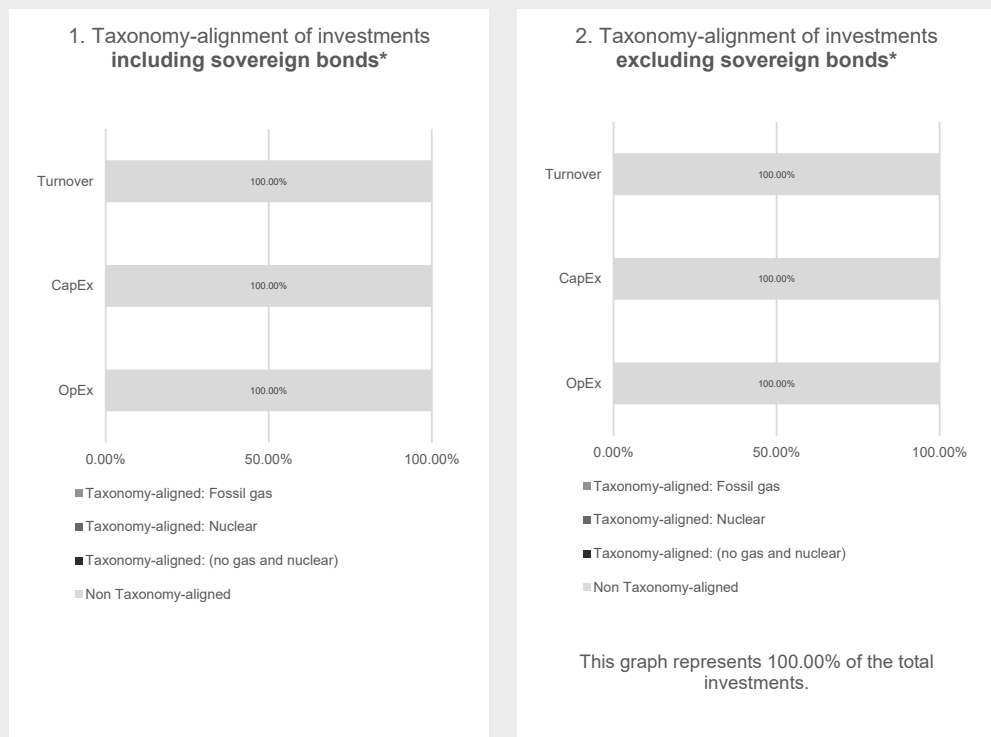

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 10.77%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 1.58%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under '#2 Other' was 3.66% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund. No minimum environmental and/or social safeguards have been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated a part of its net assets to sustainable investments through 'use of proceeds' instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.
2. The Investment Managers used a proprietary IT tool (the ESG Credit Application), which identified the issuers determined as the so called "Environmental Champions".
3. The Fund did not invest in issuers that violated exclusions. Using internal and external resources, such as MSCI and Sustainalytics, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured the pre-trade exclusion of all ineligible issuers, post-trade monitoring of any prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies., addressed risks and opportunities, including GHG emissions reduction.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin European Corporate Bond Fund (the "Fund")

FRANKLIN
TEMPLETON

Legal Entity Identifier: 0JRKFOGJGO9U5HR6QY84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.91% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 39.33% of its net asset value (NAV).

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average greenhouse gas (GHG) intensity of the investee companies (Scope 1,2,3) for the Fund was 988.46, while for the benchmark it was 945.10. The Scope 1 and 2 GHG intensity for the Fund was 62.17, compared to 106.08 for the benchmark. Although the Fund's total GHG intensity was marginally higher than the benchmark, the Investment Managers still consider it to be acceptable, especially given the quality of the current Scope 3 reporting data. The Fund's Scope 1 and 2 GHG intensity is lower than that of the benchmark.

To further promote these characteristics, the Investment Managers engaged with various corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the time of disclosure, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (Principal Adverse Impact ("PAI") indicator 7). The Investment Managers have actively engaged with a range of issuers to emphasize the critical need for the conservation and protection of biodiversity. This has taken various forms, such as leading webinars with various stakeholders, including asset managers, government representatives, corporate issuers and financial institutions. Such meetings with various public entities help to further raise awareness among entities about their possible impact on biodiversity-sensitive areas. This includes evaluating the location of their operations, determining the presence of any endangered flora or fauna, and

ensuring that their activities do not harm such areas. Additionally, these meetings support the advocacy of issuing of green 'use of proceeds' instruments, where eligible categories will focus on the environmentally sustainable management of living natural resources and land use and/or terrestrial and aquatic biodiversity conservation projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

To further promote these characteristics, the Investment Managers engaged with various corporate issuers.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers promoted the reduction of gender pay gap and increase of board gender diversity through engagement and investment in 'use of proceeds' instruments

In terms of related PAI metrics, the average board gender diversity of the corporate part of the Fund's portfolio was 40.32%, compared to 38.91% for the benchmark. The average unadjusted gender pay gap of investee companies was 15.50% for the Fund and 14.45% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers regards the average outperformance of PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics, and the quality of PAI indicator 12 data remains sparse and disproportionate, as differences in data transparency are largely country dependent. Therefore, the Investment Managers hopes that the implementation of new disclosure regulations, along with proactive engagement, would improve these aspects.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro-Aggregate: Corporates Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds	28.98%
Percentage of investments in social bonds	5.97%
Percentage of investments in sustainability bonds	0.96%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	39.33%
Percentage of investment in issuers having exposure to, or tying with excluded sectors	0.00%
The number of issuers with which the Investment Managers engaged	125.00

● ... And compared to previous periods?

Please note that due to a change in methodology, some sustainability indicators from this reference period (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

In the current reference period that concluded on 30 June 2024, the Fund has increased its average allocation in sustainable investment compared to the previous reference period. As of 30 June 2023, the exposure to green bonds was at 20.49%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 28.98%. In case of social bonds, as of 30 June 2023, the exposure was at 4.63%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 5.97%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2023 was 26.33%, while the average allocation increased to 35.91% in the fiscal year ending 30 June 2024.

In the current reference period that concluded on 30 June 2024, the Fund has increased its average allocation in Environmental Champions compared to the previous reference period. As of 30 June 2023, the exposure to Environmental Champions was at 36.00%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 39.33%.

At the end of the previous reference period, the Fund had 2.74% exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund. Securities where the percentage of revenues from excluded sectors rose above limits mandated by prospectus following original purchase, which triggered a plan to divest the securities in due time, taking into account the Shareholders' best interests and they were sold. At the end of the current reference period, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

During both reference periods, the Investment Managers were very active in the field of sustainability engagement. This is highlighted by the fact that more than 60 issuers were engaged in the previous reference period, and the Investment Managers have continued to expand its engagement efforts, resulting in 125 issuers being engaged in the current reference period.

Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch. Benchmark PAI 1 metrics as of 30 June 2023 have been adjusted since the prior reporting of the Fund.

Sustainability KPI Name	Sustainability KPI historical comparison

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Below are some examples of investments made by the Fund that contributed to its sustainable investment objectives. An example of promoting the reduction of GHG emissions and energy conservation through investments in 'use of proceeds' instruments is the green bond from Orsted. In 2023 DKK 18.7 billion was allocated to the 11 projects in renewable energy including offshore and onshore wind farms and solar PV farms. Key projects include the Hornsea 2 offshore wind farm in the UK, which became fully operational in August 2022 and has a capacity of 1.32 GW, enough to power over 1.4 million UK homes. Financed projects support the Paris Agreement and aim to have a transformative impact on the UN Sustainable Development Goals, particularly those focused on affordable and clean energy and climate action. Additionally, the company is committed to biodiversity conservation, with all new renewable energy projects commissioned from 2030 onwards expected to have a net-positive biodiversity impact, and a ban on landfilling wind turbine blades and solar PV modules.

Another example is a green bond from Bank of Ireland. The framework was designed to support the green transition by financing projects in four categories: Green Buildings & Energy Efficiency (Residential and Commercial), Renewable Energy, and Clean Transportation. The Green Eligible Asset Portfolio includes top energy-efficient residential properties, commercial properties with high BREEAM or LEED certifications, renewable energy generation facilities, and clean transportation operations like electric vehicles. Almost 11,000 projects have been supported through expenditures.

An example of promoting of a lowering negative impact on biodiversity through investments in 'use of proceeds' instruments is the green bond of Munich Re. Over 40% of the proceeds of the bond financed Environmentally sustainable management of living natural resources and land use category, including specifically 3 projects. Both Dansk Demetra and Pegasos are the investment related to sustainable agricultural practices, which aims to cultivate land with integrity. Project Dansk Demetra is an SMA that invests in high-quality farmland with a focus on cereal production in Denmark. Project Pegasos consists of high-quality farmland with a focus on single-year crops in Lithuania. And Faunus Silva is a certified sustainable forestry investment, managing over 91,000 hectares of loblolly pine and slash pine plantations.

An instance of a bond financing the development of circular economy is the issuance from Suez. The Group is a circular economy model-focused company, operates in all aspects of water management and waste-recovery, including construction, infrastructure operation, recycling, renewable energy production, and digital services. The bond funded, among others, projects in wastewater treatment, including development, construction, operation, extension, renewal, and maintenance of wastewater collection networks and infrastructure for municipal and industrial clients. Another scope included eligible waste-related projects like development, construction, installation, and/or maintenance of waste sorting, processing, recycling, biowaste composting facilities, as well as collection, transport, and transfer of non-hazardous waste, and urban cleaning services.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using proprietary ESG rankings: the ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories.

Restricting Fund's investable universe

Issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions.

The average of the PAI metrics is based on 30 September 2023, 31 December 2023, 31 March 2024 and 30 June 2024.

What was the proportion of sustainability-related investments?

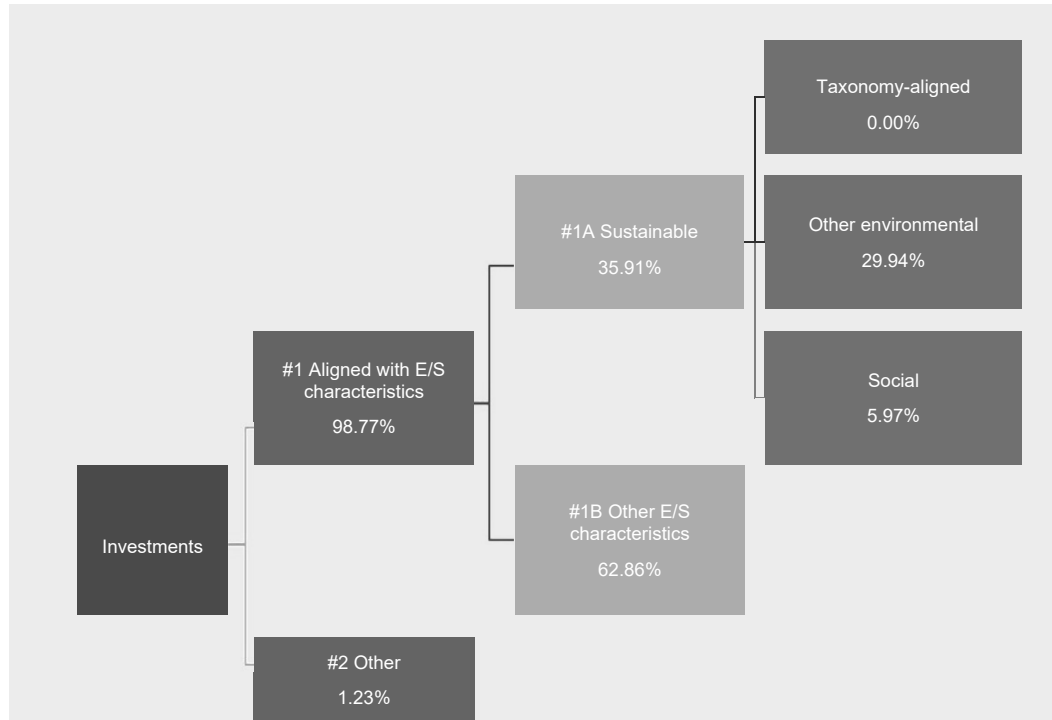

The proportion of sustainable investments was 35.91%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.77% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.23%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 35.91% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets

Automobiles	2.36%
Health Care Equipment & Supplies	2.27%
Chemicals	1.85%
Automobile Components	1.62%
Construction & Engineering	1.45%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.94%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 5.97%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 1.23% and included cash held for the purposes of servicing the day-to-day requirements of the Fund and derivatives for hedging purposes, for which there were no minimum environmental or social safeguards.

Investments under “#2 Other” also included derivatives instruments which were used by the Fund for hedging purposes. The pre-contractual disclosure of the Fund will be amended at the next prospectus update to clarify this fact. For the avoidance of doubt, derivatives were not used by the Fund to promote E/S characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.
2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin European Social Leaders Bond Fund (the "Fund")

TEMPLETON**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 99.18%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in bonds adhering to a recognised social bond assessment framework and other eligible bonds and/or other instruments qualifying as sustainable investments. This was achieved primarily via investing in social bonds (99.18% NAV) and sustainability bonds with the majority of social expenditures. Through these investments, the Fund supported various positive social outcomes, such as but not limited to, social cohesion, social integration, labour relations, and investments in economically or socially disadvantaged communities. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 2059 people benefiting from social projects - including c. 442 seniors, c. 351 individuals receiving improved healthcare services, c. 41 people from underprivileged areas, c. 31 students benefiting from educational programs, c. 33 employees benefited from educational and protective actions - as well as c. 86 jobs saved or maintained, c. 180 housing units provided or maintained per every million of Euro invested (data as of 29th Dec 2023).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 10 Reduced Inequalities (45%), SDG3 Good Health and Well-Being (45%), SDG 1 No Poverty (43%) SDG 11 Sustainable Cities and Communities (40%), and SDG 4 Quality Education (36%) (as of 29 December 2023).

One of the examples is the social bond from CaixaBank. CaixaBank's commitment to social and economic development through its financing activities, particularly in supporting projects that contribute to the advancement of SDGs related to no poverty, good health and well-being, quality education, and decent work and economic growth. It is committed to sustainability and is leading the transition towards sustainable banking.

Caixa Bank's social investments, amounting to €6 billion as of December 31, 2022, have been instrumental in fostering employment, with a significant percentage of the funds allocated towards promoting job creation and maintenance. This strategic funding has been pivotal in supporting 319,932 loans and benefiting 286,633 borrowers, thereby contributing to the Sustainable Development Goals (SDGs) with the majority (78.8%) contributing to SDG 8 (Employment Creation and Maintenance), followed by SDG 1 (Access to essential services) at 20.2%, SDG 3 (Affordable basic infrastructure and access to essential services) at 0.6%, and SDG 4 (Access to essential services) at 0.4%.

Additionally, Franklin Templeton Investment Management Limited (the "Investment Manager") sourced a unique private placement deal that resulted in the first sovereign gender diversity bond issued by the Republic of Iceland. The financed projects include increasing the capital contribution to affordable housing for women in a vulnerable position and enhancing parental leave payments.

Iceland is recognized as one of the leading nations in gender equality, being in the top spot in the World Economic Forum's Global Gender Gap Index over recent years. Despite these achievements, the country remains committed to attaining complete gender equality and continues to pursue the social and economic upliftment of women across its society. The Investment Manager believes that proceeds from the bond issuance bring further positive impact on women empowerment within the country.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability KPI Name	Value
The percentage of investments in social bonds	93.60%
The percentage of investments in other eligible bonds	5.58%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%

● **... And Compared to Previous Periods?**

Please note that due to a change in methodology, some sustainability indicators from this reference period (percentage of investment in social and sustainable bonds) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments with a slightly higher average allocation at the end of the current reference period. As of 30 June 2023, the exposure to social and other eligible bonds was at 97.89%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 99.18%.

At the end of the previous reference period, the Fund had 0.90% exposure to the excluded sectors and additional exclusions defined in the pre-contractual disclosure of the Fund. Securities where the percentage of revenues from excluded sectors rose above limits mandated by prospectus following original purchase, which triggered a plan to divest the securities in due time, taking into account the Shareholders' best interests and they were sold.

At the end of the current reference period, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The percentage of investments in social bonds	93.60%	94.55%
The percentage of investments in other eligible bonds	5.58%	3.34%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.90%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Corporate issuers were monitored using the Principal Adverse Impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party data providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

--- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable

investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible social bonds, the Investment Manager reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affected the issuer's overall PAIs outlook.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and United Nations (the "UN") Guiding Principles on Business and Human Rights were not applicable.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App (PAI Risk App). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Communaute Francaise De Belgique 3.75% 06/22/2033 REG S	Government bonds	6.73%	Belgium

What was the proportion of sustainability-related investments?

99.18% of the Fund's NAV contributed to the sustainable investment objective.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.18% of the Fund's portfolio contributed to the sustainable investment objective. Out of these sustainable investments, 99.18% had a social objective.

The remaining portion (0.82%) did not contribute to such objective and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	69.44%
Financials	26.94%
Real Estate	2.80%
Top sub-sector	% of Assets
Government bonds	69.44%
Banks	21.72%
Financial Services	5.22%
Diversified REITs	2.14%
Real Estate Management & Development	0.66%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

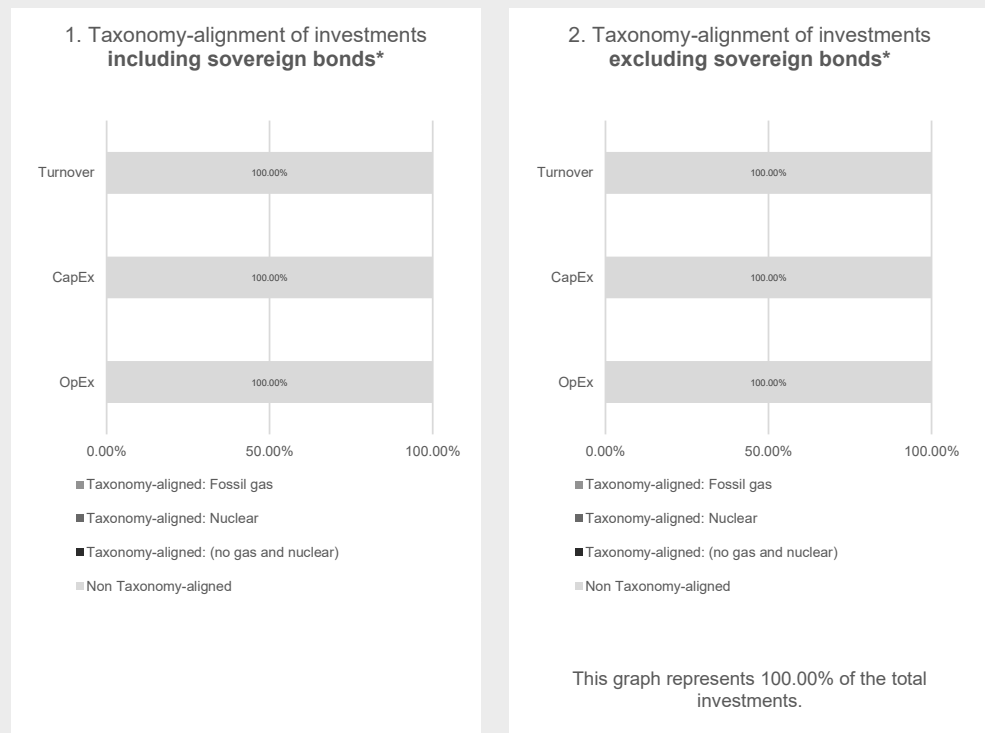

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not invest in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?**

Not applicable.

 **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 99.18%.

 **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes.

For derivatives, the Investment Manager determined what is the underlying asset and if applicable, subjected this asset to all relevant ESG screening depending on the underlying asset’s nature. For the avoidance of doubt, the Investment Manager ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

If the Investment Manager was not in position to determine the ESG quality of the underlying asset because of its nature (e.g., currency forwards for hedging purposes), the Investment Manager assessed the ESG credentials of a derivative contract counterparty. If a counterparty was a subsidiary without a separate ESG reporting scheme, the ESG characteristics of a parent company apply. The Fund did not engage in derivatives with financial institutions which are not meeting the Investment Manager’s ESG criteria. To qualify as eligible counterparty, a financial institution must meet at least two of the following criteria:

- MSCI ESG rating of BBB or above – or in absence of MSCI rating, being above industry average rating as judged by alternative third party ESG data provider;
- signatory to the Equator Principles;
- signatory to Task Force on Climate-Related Financial Disclosures; and
- is committed to set a Science Based Target initiative (the “SBTi”) target.

For liquid assets, the Investment Manager applies minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Manager employed a variety of techniques to achieve the Sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of qualitative and quantitative analysis of investments to determine a positive contribution to social objectives, ensuring investments do no significant harm and their promoters follow good governance practices, IT applications, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged social objectives.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive social impacts. The Investment Manager evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.

2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe. The Fund observed this until the commitment was removed in March 2024. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any

violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Manager engaged with the identified issuers by using the following methods:

- 1:1 meetings: The Investment Manager discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
- Written communications: The Investment Manager sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
- In-person meetings: The Investment Manager engaged with stakeholders at conferences, sharing best practices in sustainable investing.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

Franklin European Total Return Fund (the "Fund")

FRANKLIN
TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.55% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 36.24% of its net asset value (NAV).

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity of the investee companies (Scope 1, 2, 3) for the Fund was 549.74, while for the benchmark it was 966.18. The Scope 1 and 2 GHG intensity for the Fund was 30.4, compared to 75.22 for the benchmark.

The average GHG intensity of the investee countries for the Fund was 245.36, while the benchmark was 218.64. The average GHG intensity of the Fund was marginally higher than the benchmark, potentially due to investments in the green bonds of countries with elevated GHG intensity. Nonetheless, the Investment Managers believe that, in the long term, such an investment will support their energy transition.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (Principal Adverse Impact ("PAI") indicator 7).

Additionally, the Investment Managers promoted good practices in terms of biodiversity protection. This has taken various forms, such as leading webinars with various stakeholders, including asset managers, government representatives, corporate issuers and financial institutions. Such meetings with various public entities help to further raise awareness among entities about their possible impact on biodiversity-sensitive areas. This includes evaluating the location of their operations, determining the presence of any endangered flora or fauna, and ensuring that their activities do not harm such areas. Additionally, these meetings support the advocacy of issuing of green 'use of proceeds' instruments, where eligible categories will focus on the environmentally sustainable management of living natural resources and land use and/or terrestrial and aquatic biodiversity conservation projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Taking this exclusion a step further, the Fund only invested in those countries, or regions within countries, that were awarded the highest Freedom House Index score of "Free". Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers promoted the reduction of gender pay gap and increase of board gender diversity through engagement and investment in 'use of proceeds' instruments

In terms of related PAI metrics, the average board gender diversity of the corporate part of the Fund's portfolio was 40.39%, compared to 38.96% for the benchmark. The average unadjusted gender pay gap of investee companies was 15.48% for the Fund and 15.59% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers regard the average outperformance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. However, both indicators are subject to data quality and availability, especially the unadjusted gender pay gap, therefore the Investment Managers hope that the implementation of new disclosure regulations along with proactive engagement would improve these aspects.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds	41.27%
Percentage of investments in social bonds	5.66%
Percentage of investments in sustainability bonds	0.62%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	36.24%
Percentage of investment in issuers having exposure to, or tying with excluded sectors	0.00%
The number of issuers with which the Investment Managers engaged	104.00

● ... And compared to previous periods?

Please note that due to a change in methodology, some sustainability indicators from this reference period (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

In the current reference period that concluded on 30 June 2024, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. As of 30 June 2023, the exposure to green bonds was at 20.94%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 41.27%. In case of social bonds, as of 30 June 2023, the exposure was at 4.21%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 5.66%.

Overall, the percentage of investment in green, social and sustainable bonds at 30 June 2023 was 26.15%, while the average allocation increased to 47.55% in the fiscal year ending 30 June 2024.

During both reference periods, the Fund maintained its level of investment in Environmental Champions. As of 30 June 2023, the exposure to Environmental Champions was at 37.50%, while throughout the fiscal year ending on 30 June 2024, the average allocation was at 36.24%.

At the end of the previous reference period, the Fund had 0.16% exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund. Securities where the percentage of revenues from excluded sectors rose above limits mandated by prospectus following original purchase, which triggered a plan to divest the securities in due time, taking into account the Shareholders' best interests and they were sold. At the end of the current reference period, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

During both reference periods, the Investment Managers were very active in the field of sustainability engagement. This is highlighted by the fact that more than 80 issuers were engaged in the previous reference period, and the Investment Managers have continued to expand its engagement efforts, resulting in 104 issuers being engaged in the current reference period.

Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch. Benchmark PAI 1 metrics as of 30 June 2023 have been adjusted since the prior reporting of the Fund.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
	Value	Value

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Below are some examples of investments made by the Fund that contributed to its sustainable investment objectives. An example of promoting the reduction of GHG emissions and energy conservation through investments in 'use of proceeds' instruments is the green bond from Orsted. In 2023 DKK 18.7 billion was allocated to the 11 projects in renewable energy including offshore and onshore wind farms and solar PV farms. Key projects included the Hornsea 2 offshore wind farm in the UK, which became fully operational in August 2022 and has a capacity of 1.32 GW, enough to power over 1.4 million UK homes. Financed projects support the Paris Agreement and aim to have a transformative impact on the UN Sustainable Development Goals, particularly those focused on affordable and clean energy and climate action. Additionally, the company is committed to biodiversity conservation, with all new renewable energy projects commissioned from 2030 onwards expected to have a net-positive biodiversity impact, and a ban on landfilling wind turbine blades and solar PV modules.

Another example is a green bond from Bank of Ireland. The framework was designed to support the green transition by financing projects in four categories: Green Buildings & Energy Efficiency (Residential and Commercial), Renewable Energy, and Clean Transportation. The Green Eligible Asset Portfolio includes top energy-efficient residential properties, commercial properties with high BREEAM or LEED certifications, renewable energy generation facilities, and clean transportation operations like electric vehicles. Almost 11,000 projects have been supported through expenditures.

An example of promoting a reduction in the negative impact on biodiversity through investments in 'use of proceeds' instruments is the green bond from the Federal Republic of Germany. Through part of the financing, the federal government provided funding for various programmes dedicated to the conservation of biodiversity and the protection of endangered species. The GAK ("Improvement of Agricultural Structures and Coastal Protection") program, co-financed by the federal government and the Länder, supports market- and locally-adapted, environmentally friendly land management, including nature conservation and landscape management, focusing on sustainable practices in arable farming, specialized crop cultivation, or orchards. The federal Programme "Biodiversity" is the Environment Ministry's primary funding tool for biodiversity improvement, focusing on combating insect decline through conservation projects in urban and protected areas, and knowledge dissemination about insects. The "chance.natur" programme supports the creation and conservation of significant natural areas, contributing to the protection of Germany's biodiversity and natural heritage. The "Wilderness Fund" acquires and safeguards forests and moors to fulfil the government's objective of preserving 2% of Germany's land as wilderness areas.

Additionally, the Investment Managers sourced a unique private placement deal that resulted in the first sovereign gender diversity bond issued by the Republic of Iceland, which advanced objectives of tackling inequalities. The financed projects include increasing the capital contribution to affordable housing for women in a vulnerable position and enhancing parental leave payments. Iceland is recognized as one of the leading nations in gender equality, holding the top spot in the World Economic Forum's Global Gender Gap Index in recent years. Despite these achievements, the country remains committed to attaining complete gender equality and continues to pursue the social and economic upliftment of women across its society. The Investment Managers believe that proceeds from the bond issuance bring further positive impact on women empowerment within the country.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers of green bonds, social bonds and other eligible securities were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund’s investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various data points that included energy efficiency, natural capital conservation, renewable energy performance, greenhouse gas intensity (emissions normalized by gross domestic product, CO₂e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gas emissions, emitters’ historic trajectories.

Restricting Fund’s investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

The average of the PAI metrics is based on 30 September 2023, 31 December 2023, 31 March 2024 and 30 June 2024.

What was the proportion of sustainability-related investments?

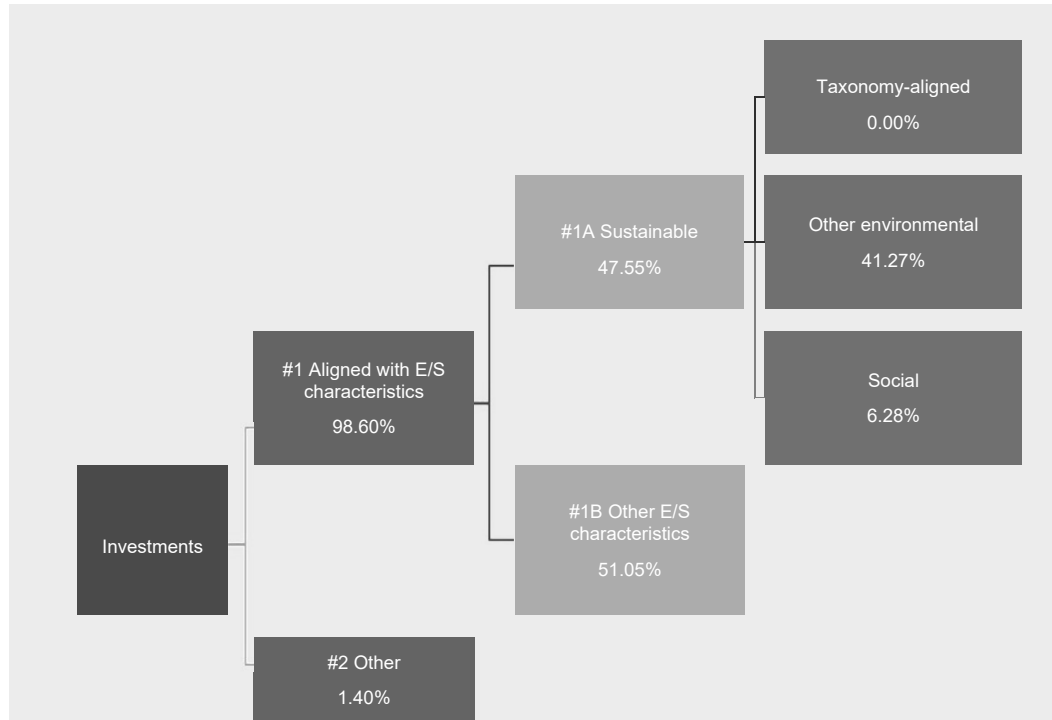

The proportion of sustainable investments was 47.55%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.60% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.40%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 47.55% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	55.90%
Financials	27.90%

Building Products	0.62%
Industrial Conglomerates	0.56%
Life Sciences Tools & Services	0.54%
Machinery	0.52%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 41.27%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 6.28%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 1.40% and included cash held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives for hedging purposes, for which there were no minimum environmental or social safeguards.

Investments under “#2 Other” also included derivatives instruments which were used by the Fund for hedging purposes. The pre-contractual disclosure of the Fund will be amended at the next prospectus update to clarify this fact. For the avoidance of doubt, derivatives were not used by the Fund to promote E/S characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.
2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Euro Short Duration Bond Fund (the "Fund")

Legal Entity Identifier: 549300WUQJDZB0YAUO10

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 38.65% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 30.78% of its net asset value (NAV).

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund also refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average greenhouse gas (GHG) intensity of the investee companies (Scope 1,2,3) for the Fund was 1,023.86 while for the benchmark it was 1,130.10. The Scope 1 and 2 GHG intensity for the Fund was 34.42, compared to 74.30 for the benchmark.

Additionally, the average GHG intensity of the investee countries for the Fund was marginally lower than the benchmark, where average GHG intensity for the Fund was 217.61, while the benchmark was 217.70.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the time of disclosure, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (Principal Adverse Impact ("PAI") indicator 7).

Additionally, the Investment Managers promoted good practices in terms of biodiversity protection. This has taken various forms, such as leading webinars with various stakeholders, including asset managers, government representatives, corporate issuers and financial institutions. Such meetings with various public entities help to further raise awareness among entities about their possible

impact on biodiversity-sensitive areas. This includes evaluating the location of their operations, determining the presence of any endangered flora or fauna, and ensuring that their activities do not harm such areas. Additionally, these meetings support the advocacy of issuing of green 'use of proceeds' instruments, where eligible categories will focus on the environmentally sustainable management of living natural resources and land use and/or terrestrial and aquatic biodiversity conservation projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Taking this exclusion a step further, this Fund only invested in those countries, or regions within countries, that were awarded the highest Freedom House Index score of "Free". Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers promoted the reduction of gender pay gap and increase of board gender diversity through engagement and investment in 'use of proceeds' instruments

In terms of related PAI metrics, the average board gender diversity of the corporate part of the Fund's portfolio was 41.71%, compared to 38.65% for the benchmark. The average unadjusted gender pay gap of investee companies was 18.85% for the Fund and 16.13% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers regards the average outperformance of PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics, and the quality of PAI indicator 12 data remains sparse and disproportionate, as differences in data transparency are largely country dependent. Therefore, the Investment Managers hopes that the implementation of new disclosure regulations along with proactive direct engagement would improve these aspects.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate (1-3Yr) Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds	32.83%
Percentage of investments in social bonds	5.76%
Percentage of investments in sustainability bonds	0.06%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	30.78%
Percentage of investment in issuers having exposure to, or tying with excluded sectors (securities where the percentage of revenues from excluded sectors rose above limits mandated by prospectus following original purchase, triggering a plan to divest the securities in due time, taking into account the Shareholders' best interests)	0.16%
The number of issuers with which the Investment Managers engaged	142.00

● ... And compared to previous periods?

Please note that due to a change in methodology, some sustainability indicators from this reference period (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAI) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

In the current reference period that concluded on 30 June 2024, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. As of 30 June 2023, the exposure to green bonds was at 18.42%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 32.83%. In case of social bonds, as of 30 June 2023, the exposure was at 2.88%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 5.76%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2023 was 21.52%, while the average allocation increased to 38.65% in the fiscal year ending 30 June 2024.

As of 30 June 2023, the exposure to Environmental Champions was at 36.20%, while throughout the fiscal year ending on 30 June 2024, the average allocation dropped to 30.78%. While the average percentage of investments in Environmental Champions has declined, the Fund's corporate GHG intensity still remains below the benchmark.

At the end of the previous reference period, the Fund had 0.76% exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund. Securities where the percentage of revenues from excluded sectors rose above limits mandated by prospectus following original purchase, which triggered a plan to divest the securities in due time, taking into account the Shareholders' best interests and they were sold.

At the end of the current reference period, the Fund had 0.16% exposure to additional exclusions due to position reclassified as so-called Environmental Laggard, which occurred on the last business day of June, which was the end of the current reference period, and the Investment Managers will divest from such security as soon as reasonably possible, taking into account best interest of the Shareholders and at the latest by the binding date in the pre-contractual disclosure. Apart from this, the Fund had no additional exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

During both reference periods, the Investment Managers were very active in the field of sustainability engagement. This is highlighted by the fact that more than 70 issuers were engaged in the previous reference period, and the Investment Managers have continued to expand its engagement efforts, resulting in 142 issuers being engaged in the current reference period.

Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch. Benchmark PAI 1 metrics as of 30 June 2023 have been adjusted since the prior reporting of the Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Below are some examples of investments made by the Fund that contributed to its sustainable investment objectives. An example of promoting of reduction the GHG emissions and energy conservation through investments in 'use of proceeds' instruments is the green bond from Orsted. In 2023 DKK 18.7 billion was allocated to the 11 projects in renewable energy including offshore and onshore wind farms and solar PV farms. Key projects included the Hornsea 2 offshore wind farm in the UK, which became fully operational in August 2022 and has a capacity of 1.32 GW, enough to power over 1.4 million UK homes. Financed projects support the Paris Agreement and aim to have a transformative impact on the UN Sustainable Development Goals, particularly those focused on affordable and clean energy and climate action. Additionally, the company is committed to

biodiversity conservation, with all new renewable energy projects commissioned from 2030 onwards expected to have a net-positive biodiversity impact, and a ban on landfilling wind turbine blades and solar PV modules.

Another example is a green bond from Bank of Ireland. The framework was designed to support the green transition by financing projects in four categories: Green Buildings & Energy Efficiency (Residential and Commercial), Renewable Energy, and Clean Transportation. The Green Eligible Asset Portfolio includes top energy-efficient residential properties, commercial properties with high BREEAM or LEED certifications, renewable energy generation facilities, and clean transportation operations like electric vehicles. Almost 11,000 projects have been supported through expenditures.

An example of promoting of a lowering negative impact on biodiversity through investments in 'use of proceeds' instruments is the green bond from the Federal Republic of Germany. Through part of the financing, the federal government provided funding for various programmes dedicated to the conservation of biodiversity and the protection of endangered species. The GAK ("Improvement of Agricultural Structures and Coastal Protection") program, co-financed by the federal government and the Länder, supports market- and locally-adapted, environmentally friendly land management, including nature conservation and landscape management, focusing on sustainable practices in arable farming, specialized crop cultivation, or orchards. The federal Programme "Biodiversity" is the Environment Ministry's primary funding tool for biodiversity improvement, focusing on combating insect decline through conservation projects in urban and protected areas, and knowledge dissemination about insects. The "chance.natur" programme supports the creation and conservation of significant natural areas, contributing to the protection of Germany's biodiversity and natural heritage. The "Wilderness Fund" acquires and safeguards forests and moors to fulfil the government's objective of preserving 2% of Germany's land as wilderness areas.

An instance of a bond financing the development of circular economy is the issuance from Suez. The Group is a circular economy model-focused company, operates in all aspects of water management and waste-recovery, including construction, infrastructure operation, recycling, renewable energy production, and digital services. The bond funded, among others, projects in wastewater treatment, including development, construction, operation, extension, renewal, and maintenance of wastewater collection networks and infrastructure for municipal and industrial clients. Another scope included eligible waste-related projects like development, construction, installation, and/or maintenance of waste sorting, processing, recycling, biowaste composting facilities, as well as collection, transport, and transfer of non-hazardous waste, and urban cleaning services.

Additionally, the Investment Managers sourced a unique private placement deal that resulted is the first sovereign gender diversity bond issued by the Republic of Iceland, which advanced objectives of tackling inequalities. The financed projects include increasing the capital contribution to affordable housing for women in a vulnerable position and enhancing parental leave payments. Iceland is recognized as one of the leading nations in gender equality, holding the top spot in the World Economic Forum's Global Gender Gap Index in recent years. Despite these achievements, the country remains committed to attaining complete gender equality and continues to pursue the social and economic upliftment of women across its society. The Investment Managers believe that proceeds from the bond issuance bring further positive impact on women empowerment within the country.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers of green bonds, social bonds and other eligible securities were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO₂e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

What was the proportion of sustainability-related investments?

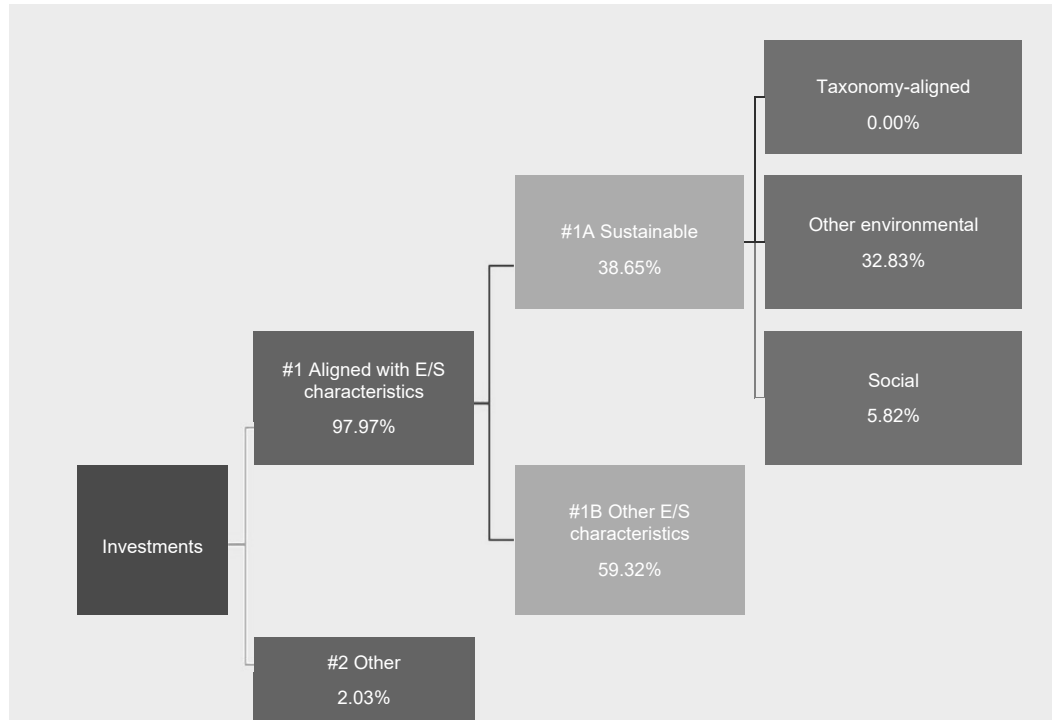

The proportion of sustainable investments was 38.65%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.97% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (2.03%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 38.65% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

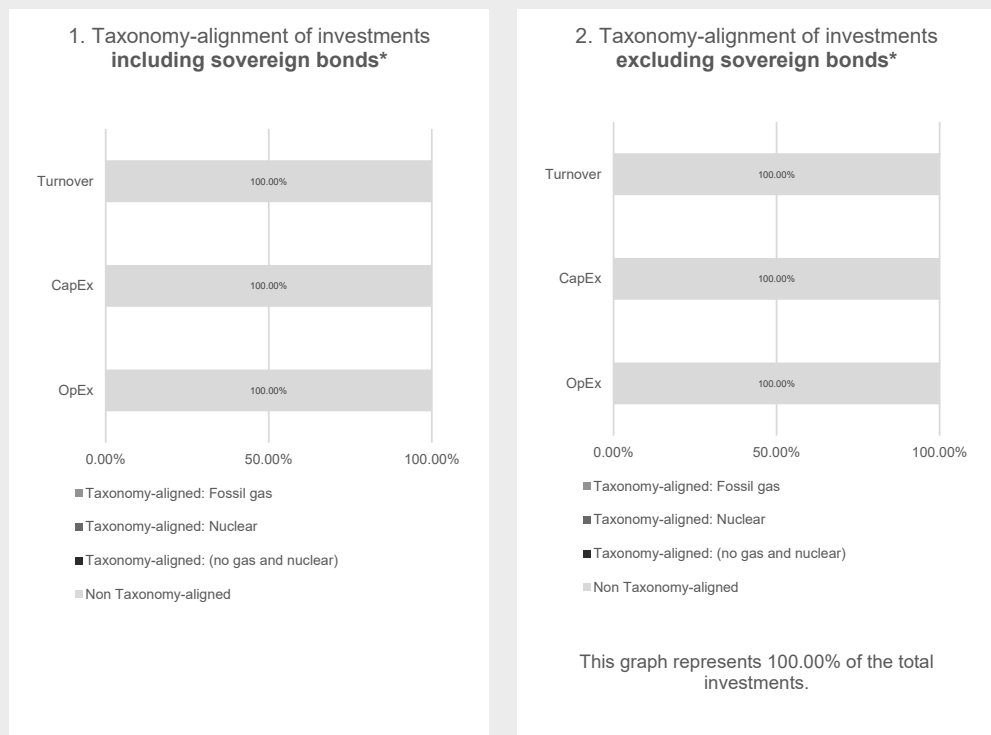

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 32.83%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 5.82%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 2.03% and included cash held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives for hedging purposes, for which there were no minimum environmental or social safeguards.

Investments under “#2 Other” also included derivatives instruments which were used by the Fund for hedging purposes. The pre-contractual disclosure of the Fund will be amended at the next prospectus update to clarify this fact. For the avoidance of doubt, derivatives were not used by the Fund to promote E/S characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds has been classified as sustainable investments.
2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Genomic Advancements Fund (the “Fund”)

Legal Entity Identifier: 2549008AQJB3984XPF72

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social (“E/S”) characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas (“GHG”) emissions). Franklin Advisers, Inc. (the Investment Manager) sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.17% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager’s proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager’s analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	12.58%
The share of companies rated AA by proprietary ESG methodology	27.37%
The share of companies rated A by proprietary ESG methodology	60.05%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with

an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2024-03-25 - 2024-06-30.

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 0.83% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Global Aggregate Bond Fund (the "Fund")

Legal Entity Identifier: 4S11SQ65Q40D8JWP8C65

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.89% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio and included the reduction of greenhouse gas emissions, energy conservation, biodiversity protection, responsible solid and water waste management, alignment with international business conduct principles, and/or board gender diversity. Franklin Templeton Investment Management Limited and Franklin Advisers, Inc. (the "Investment Managers") sought to attain these characteristics by:

- Avoiding investments in issuers that were lagging in the transition to a low-carbon economy; and
- Implementing negative screens as part of its investment process, as further detailed in the section 'What investment strategy does this financial product follow?' of Fund's pre-contractual disclosure.

Moreover, the Fund had a minimum allocation of 5% of its portfolio to sustainable investments in economic activities that contributed to environmental objectives and a minimum allocation of 1% of its portfolio to sustainable investments in economic activities that contributed to social objectives. The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

Sustainability indicators

indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro-Aggregate: Corporates Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- The list of issuers, with which the Investment Managers engaged between 1st July 2023-15th January 2024: 1. China Development Bank 2. Morgan Stanley 3. Republic of Italy

Sustainability KPI Name	Value
Percentage of investments in green bonds	16.28%
Percentage of investments in social bonds	1.61%
Percentage of investments in sustainability bonds	0.00%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	32.45%

Sustainability KPI Name	Value
Percentage of investment in issuers having exposure to, or tying with excluded sectors	0.00%

● ... And compared to previous periods?

The Fund was liquidated mid-reference period.

Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch. Benchmark PAI 1 metrics as of 30 June 2023 have been adjusted since the prior reporting of the Fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

The Fund's sustainable investments included a minimum allocation of 5% of its portfolio to sustainable investments in economic activities that contributed to environmental objectives.

This was achieved by investing in bonds labelled as being green or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards (including but not limited to, the International Capital Market Association (the "ICMA") Green Bond Principles, future European Union Green Bond Standard (the "EU GBS")); and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Additionally, the Fund committed to include a minimum allocation of 1% of its portfolio to sustainable social activities. This was achieved by investing in bonds labelled as being social or in any other securities, whose:

- Proceeds were used on eligible social projects;
- Framework adhered to international standards (including but not limited to, ICMA Social Bond Principles); and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental Champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various data points that included energy efficiency, natural capital conservation, renewable energy performance, using various data points, including greenhouse gas intensity (emissions normalized by gross domestic product, CO₂e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions.

PAI metrics are an average as of 29 September 2023 and 29 December 2023.

What was the proportion of sustainability-related investments?

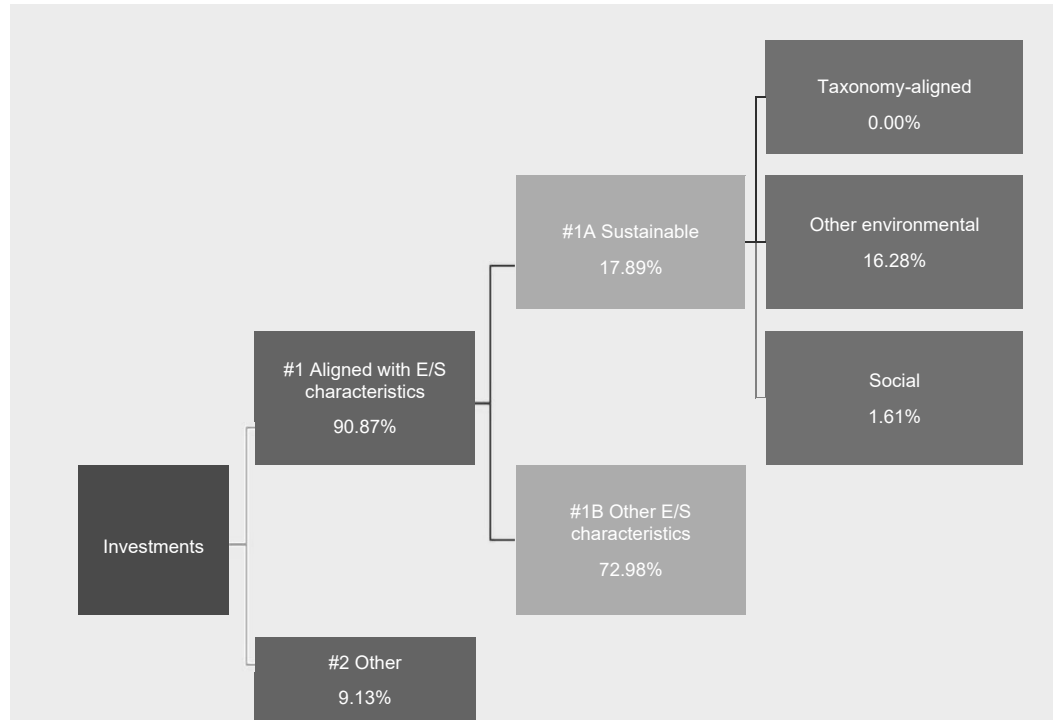

The proportion of sustainable investments was 17.89%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

90.87% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (9.13%) was not aligned with the promoted characteristics and consisted primarily of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 17.89% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	61.90%
Financials	12.20%
Health Care	5.44%
Communication Services	2.74%
Consumer Staples	2.25%
Real Estate	2.24%
Information Technology	1.08%
Industrials	1.08%
Consumer Discretionary	0.68%
Energy	0.57%
Utilities	0.39%
Materials	0.36%
Top sub-sector	% of Assets
Government bonds	61.90%
Financial Services	5.90%
Banks	3.74%
Health Care Providers & Services	3.10%
Insurance	1.41%

Energy Equipment & Services	0.57%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 16.28%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 1.61%

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 9.13% and included cash held for the purposes of servicing the day-to-day requirements of the Fund, and derivatives for hedging purposes, for which there were no minimum environmental or social safeguards.

Investments under “#2 Other” also included derivatives instruments which were used by the Fund for hedging purposes. The pre-contractual disclosure of the Fund will be amended at the next prospectus update to clarify this fact. For the avoidance of doubt, derivatives were not used by the Fund to promote E/S characteristics.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were as follows:

- The exclusion of the bottom 20% of the investment universe based on the EETI and ESG Credit App;
- The commitment to engage with the 5% of holdings which were considered underperformers in terms of their PAIs metrics; and
- The application of the ESG exclusions further described in the investment strategy section of Fund’s pre-contractual disclosure.

Utilizing sophisticated IT solutions, the Investment Managers effectively identified issuers positioned in the bottom 20% of their peer group and removed them from the investment universe. The Investment Managers also identified issuers that failed the Fund’s exclusions and did not invest in them. Furthermore, the Investment Managers successfully engaged with three underperforming issuers. The Fund was liquidated on 15 January 2024. As of this date, the number of issuers engaged with did not comprise 5% of the underperforming issuers.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Global Corporate Investment Grade Bond Fund (the "Fund")

Legal Entity Identifier: 549300WDS73FHS1LLT86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.40% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics, the list below presents degree of success for each of the following characteristics:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

The Investment Managers sought exposure to, what they termed, Environmental Champion. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's allocation to Environmental Champions stood at 27.92% of its net asset value (NAV).

Moreover, the bottom 20% of so-called climate laggards were removed from the investable universe. The Investment Managers also refrained from investing in issuers where exposure to fossil fuels extraction or energy production from fossil fuels exceeded their acceptable limit (as described in the Fund's pre-contractual disclosure). Furthermore, during the reference period, the average GHG intensity of the investee companies (Scope 1, 2, 3) for the Fund was 613.57, whereas for the benchmark it was 1,074.15. The Scope 1 and 2 GHG intensity for the Fund was 70.9 compared to 220.26 for the benchmark.

(iii) biodiversity protection:

The Investment Managers have monitored the Fund in regard of impact on biodiversity-sensitive areas, which is related to Principal Adverse Impact Indicator #7 (PAI #7), activities negatively affecting biodiversity-sensitive areas). At the end of the reporting period, no issuer within the Fund's portfolio is actively breaching the PAI indicator #7.

Additionally, the Investment Managers promoted good practices in terms of biodiversity protection. This has taken various forms, such as leading meetings with various stakeholders, including asset managers, government representatives, corporate issuers and financial institutions. Such meetings with various public entities help to further raise awareness among entities about their possible impact on biodiversity-sensitive areas. This includes evaluating the location of their operations, determining the presence of any endangered flora or fauna, and ensuring that their activities do not harm such areas. Additionally, these meetings support the advocacy of issuing of green use-of-proceeds instruments, where eligible categories will focus on the environmentally sustainable management of living natural resources and land use and/or terrestrial and aquatic biodiversity conservation projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations (Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to wastewater treatment, waste sorting, processing and recycling, and biowaste composting.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers promoted the reduction of gender pay gap and increase of board gender diversity through engagement and investment in 'use of proceeds' instruments. In terms of related PAI metrics, the average board gender diversity of the corporate part of the Fund's portfolio was 36.28%, compared to 35.27% for the benchmark. And the average unadjusted gender pay gap of investee companies was 17.69% for the Fund and 15.25% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager regards the average outperformance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. However, both indicators are subject to data quality and availability, especially the unadjusted gender pay gap, therefore the Investment Manager hopes that that the implementation of new disclosure regulations, along with proactive direct engagement, would improve these aspects.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Global Aggregate Credit Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators as of the reference period.

Sustainability KPI Name	Value
Percentage of investments in green bonds;	10.15%
Percentage of investments in social bonds	1.04%
Percentage of investments in sustainability bonds	1.21%
Percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions")	27.92%
Percentage of investment in issuers having exposure to, or tying with excluded sectors and additional exclusions (above applicable thresholds)	0.00%
The number of issuers with which the Investment Managers engage.	85.00

● ... And compared to previous periods?

Not applicable as there were no prior reference periods.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds labelled as being green/social or in any other securities whose:

- Proceeds were used on eligible environmental projects;
- Framework adhered to international standards; and
- Issuers that did not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds was clearly defined and aligned with the objectives above.

Below are some examples of investments made by the Fund that contributed to its sustainable investment objectives.

An example of an investment supporting GHG emissions reduction and contributing to other, Acciona Energía exemplifies investment in essential infrastructure. Specializing in the utility sector, the company provides electricity generation services for various projects. Acciona exclusively generates energy from renewable sources and has maintained carbon neutrality since 2016. The company's projects, detailed in Acciona's Green Financing Framework, aim to reduce greenhouse gas emissions

and supply electricity to at least 1.3 million homes. Notable projects include the construction of renewable energy facilities such as wind farms in Oaxaca, Mexico—one of the largest in Latin America—and a photovoltaic plant in Puerto Libertad, Mexico, which is among the largest photovoltaic power plants in Latin America. Additionally, Acciona has developed a solar power plant in Nevada, United States. According to the 2022 Sustainable Finance Report, these initiatives have collectively contributed to the avoidance of 79 kilotons of CO₂ emissions, the addition of 206.6 MW of energy capacity, and the production of 118.7 GWh of energy.

An example of promoting a reduction in the negative impact on biodiversity is the Green Bond issued by a telecom company Verizon. Due to issuance of the green bond, the company allocated proceeds into the biodiversity and conservation category. As an example of the financed project, Verizon invested over \$0.777 million with Arbor Day Foundation, Texas Trees and Eden Reforestation as part of commitment to plant 10M trees by 2030. Verizon is a founding member of Arbor Day Foundation's Time for Trees initiative which launched in 2019 and focuses its replanting efforts in areas as geographically diverse as the tropical rain forests and the iconic California national forests.

An instance of a bond financing the development of circular economy is the issuance from Suez. The Group is a circular economy model-focused company, operates in all aspects of water management and waste-recovery, including construction, infrastructure operation, recycling, renewable energy production, and digital services. The bond funded, among others, projects in wastewater treatment, including development, construction, operation, extension, renewal, and maintenance of wastewater collection networks and infrastructure for municipal and industrial clients. Another scope included eligible waste-related projects like development, construction, installation, and/or maintenance of waste sorting, processing, recycling, biowaste composting facilities, as well as collection, transport, and transfer of non-hazardous waste, and urban cleaning services.

CaixaBank is an example of the issuer emitting a social bond, which was at part dedicated to tackling inequalities topic. CaixaBank set new collaboration agreement with the Ministry of Agriculture, Fisheries and Food focusing the strategy on digitalisation, the improvement of industry training, as well as the incorporation of women and generational change-over to improve the sector's competitiveness. Part of the agreement is AgroBank Diversity Programme for diversity and to promote the role of women in rural areas. The following initiatives were taken as part of the programme: New AgroBank Chair "Women, Business and the Rural World", created in cooperation with the University of Castile-La Mancha; Presentation of the ClosinGap report, which quantifies the opportunity cost of the gap in rural areas; and Collaboration agreement between FADEMUR and MicroBank, for the financing of business projects through microcredits to promote equal opportunities and entrepreneurship in rural areas.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and exclude such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe. Another tool, ESG Credit App ranked corporate issuers by their greenhouse gasses emissions, emitters' historic trajectories, Science Based Target initiative (SBTi) target. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio. Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers reviewed and documented the materiality of the relevant PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduce exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organization for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments. For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Alignment was monitored using data from a third-party data provider. Breaches identified by this service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

All mandatory PAIs under EU SFDR formed one part of the input in the Investment Managers' ESG assessments of the investment. PAIs indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various references that included energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO₂e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi target.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund considered UNGC violations, negative impact on biodiversity-sensitive areas and exposure to controversial weapons for the purpose of applying specific ESG exclusions as described in the investment strategy section.

PAI metrics are an average as of 29 September 2023, 29 December 2023, 29 March, 2024 and 30 June 2024.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 12.40%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.37% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (4.63%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as financial derivatives instruments for hedging, efficient portfolio management and investment purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 82.97% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund. The Fund invested 12.40% of its portfolio in sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	32.45%
Health Care	12.36%
Communication Services	9.12%
Consumer Staples	9.11%
Utilities	8.41%

Consumer Finance	2.18%
Food Products	2.11%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

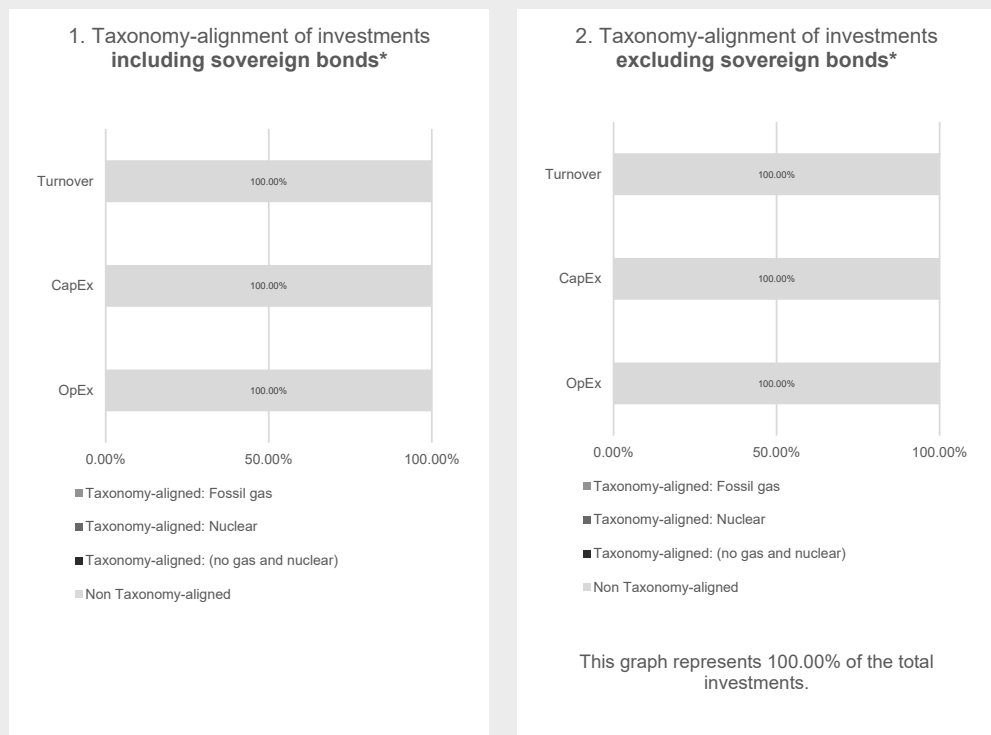

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.36%.

- **What was the share of socially sustainable investments?**

The share of socially sustainable investments was 1.04%.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 4.63% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to day requirements of the Fund as well as financial derivatives instruments for hedging, efficient portfolio management and investment purposes. For the avoidance of doubt, this did not include certain money market instruments, such as government T-Bills, where the Investment Managers have confirmed there were aligned with environmental and/or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards have been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Investment Managers employed a variety of techniques to meet the environmental and social characteristics promoted by the Fund, while adhering to the binding elements of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of IT applications, qualitative and quantitative analysis, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental and social characteristics.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental or social impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds has been classified as sustainable investments.
2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:
 - 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
 - Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
 - In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Global Green Bond Fund (the “Fund”)

Legal Entity Identifier: 2549006AK218PYV09U02

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> YES	<input type="radio"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 99.54%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in bonds adhering to a recognised green bond assessment framework and other eligible bonds and/or instruments that qualified as sustainable investments with an environmental objective. This was achieved primarily via investing in green bonds (99.54% of NAV), proceeds of which financed expenditures in renewable energy deployment, efficient use of energy, carbon efficient modes of transportation and green buildings. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 435 tons of CO₂e avoided or reduced, c. 775 MWh of renewable energy produced, c. 166 MWh of energy saved, c. 1000 m² of green buildings constructed or renovated and c. 13,7 millions of liters of water saved or treated per every million of Euro invested (data as of 29th Dec 2023).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG7 Affordable and Clean Energy (67%), SDG 13 Climate Action (53%), SDG 11 Sustainable Cities and Communities (45%), SDG 9 Industry, Innovation and Infrastructure (43%), and SDG 6 Clean Water and Sanitation (25%) (as of 29 December 2023).

An example of green bond investment is Orsted's green bond. In 2023 DKK 18.7 billion was allocated to the 11 projects in renewable energy including offshore and onshore wind farms and solar PV farms. Key projects included the Hornsea 2 offshore wind farm in the UK, which became fully operational in August 2022 and has a capacity of 1.32 GW, enough to power over 1.4 million UK homes. Financed projects support the Paris Agreement and aim to have a transformative impact on the UN Sustainable Development Goals, particularly those focused on affordable and clean energy and climate action. Additionally, the company is committed to biodiversity conservation, with all new renewable energy projects commissioned from 2030 onwards expected to have a net-positive biodiversity impact, and a ban on landfilling wind turbine blades and solar PV modules.

Another case is a green bond from Bank of Ireland. The framework was designed to support the green transition by financing projects in four categories: Green Buildings & Energy Efficiency (Residential and Commercial), Renewable Energy, and Clean Transportation. The Green Eligible Asset Portfolio includes top energy-efficient residential properties, commercial properties with high BREEAM or LEED certifications, renewable energy generation facilities, and clean transportation operations like electric vehicles. Almost 11,000 projects have been supported through expenditures.

The Fund invested in use of proceeds instruments, the proceeds of which were used for financing projects, including but not limited to, protection of biological diversity, promotion of circular economy and sustainable waste management, and efficient use of water.

An example of promoting of biodiversity protection through investments in 'use of proceeds' instruments is the green bond from the United Kingdom. The UK's Green Financing Programme, which includes the issuance of sovereign green bonds (green gilts), is designed to Fund green expenditures that address environmental challenges, including biodiversity loss. One of the expenditures allocated for this purpose is the Nature for Climate Fund (NCF), which aims to expand and enhance woodland cover and to restore, protect and better manage peatland. While acting as carbon sinks these projects aim to also create sustainable biodiverse habitats. Another programme is agri-environment schemes, supporting the UK in transitioning from a land-based farming subsidy system to a sustainable one, focusing on preventing soil erosion and promoting biodiverse natural spaces alongside crop growing areas. But the bond proceeds not only supported national efforts, but also international programmes such as the Investments in Forests and Sustainable Land Use (ODA), which supports support public-private partnerships that can work collaboratively to reduce deforestation internationally.

In terms of sustainable waste management, and efficient use of water, an example is the green bond from Iren. Bond proceeds concentrated in different regions of Italy. Among the various supported projects, part of the expenditures financed development, construction and operation of waste-to-energy plants for municipal and special solid waste in Parma and Piacenza, where the thermal energy produced from processed waste is transferred to the city district heating network. The proceeds have strengthened their energy efficiency, renewable energy share, and thermal energy recovery capabilities. Further, it financed the development of separate waste collection services, including the transformation of collection systems in Torino and Emilia, and the extension of collection hubs in the Emilia area. The expenditures also covered upgrades to wastewater treatment plants in various locations, aiming to improve waste management efficiency and recycling, and to allow for irrigation re-use of treated water.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

Sustainability KPI Name	Value
The percentage of investments in green bonds	99.54%
The percentage of investments in other eligible bonds supportive of a low-carbon future or supportive of the Paris Climate Agreement. (This indicator was changed into "the percentage of investments in other eligible bonds and/or instruments qualifying as environmentally sustainable investments under SFDR and/or instruments qualifying as environmentally sustainable investments under SFDR in March 2024)	0.00%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%

● **... And Compared to Previous Periods?**

Please note that due to a change in methodology, some sustainability indicators from this reference period (percentage of investment in social and sustainable bonds) are based on the average of the quarter end, whereas the previous reference period only reflects values as at the last day of the end of the fiscal year (30 June 2023).

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments with a slightly higher average allocation at the end of the current reference period. As of 30 June 2023, the exposure to green bonds was at 96.52%, while throughout the fiscal year ending on 30 June 2024, the average allocation rose to 99.54%.

At the end of the current and previous reference periods, the Fund had no exposure to the excluded sectors and additional exclusions detailed in the pre-contractual disclosure of the Fund.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The percentage of investments in green bonds	99.54%	96.52%
The percentage of investments in other eligible bonds supportive of a low-carbon future or supportive of the Paris Climate Agreement. (This indicator was changed into "the percentage of investments in other eligible bonds and/or instruments qualifying as environmentally sustainable investments under SFDR and/or instruments qualifying as environmentally sustainable investments under SFDR in March 2024)	0.00%	0.00%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Corporate issuers were monitored using the principal adverse impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption. Finally, the Investment Managers applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of relevant PAIs for the project as well as how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted development of renewable energy sources, e.g., solar/PV panels, the Investment Managers ascertained that the financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from MSCI and ISS. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

Performing the DNSH test

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests and evaluation based on their greenhouse gas emissions, political liberties and/or corruption.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2023-07-01 - 2024-06-30.

Diversified Telecommunication Services	2.48%
Real Estate Management & Development	2.20%
Automobiles	1.61%
Ground Transportation	1.56%
Financial Services	1.07%
Specialized REITs	1.05%
Gas Utilities	0.94%
Independent Power & Renewable Electricity Producers	0.82%
Automobile Components	0.60%
Media	0.54%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

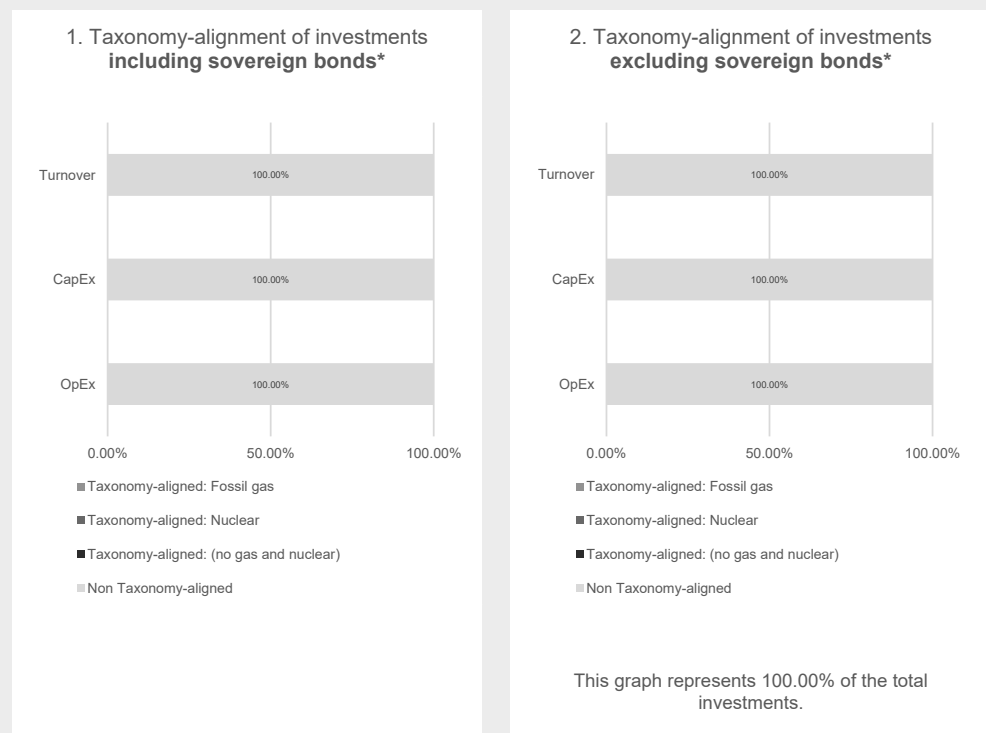

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Fund did not invest in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments

with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 99.54% of NAV.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes.

For derivatives, the Investment Managers determined what is the underlying asset and if applicable, subjected this asset to all relevant ESG screening depending on the underlying asset’s nature. For the avoidance of doubt, the Investment Managers will ensure that the underlying asset of any derivatives used for efficient portfolio management will qualify as a sustainable investment.

If the Investment Managers was not in position to determine the ESG quality of the underlying asset because of its nature (e.g., currency forwards for hedging purposes), the Investment Managers assessed the ESG credentials of a derivative contract counterparty. If a counterparty was a subsidiary without a separate ESG reporting scheme, the ESG characteristics of a parent company apply. The Fund did not engage in derivatives with financial institutions which did not meet Investment Managers’ ESG criteria. To qualify as eligible counterparty, a financial institution must meet at least two of the following criteria:

- MSCI ESG rating of BBB or above – or in absence of MSCI rating, being above industry average rating as judged by alternative third party ESG data provider;
- signatory to the Equator Principles;
- signatory to Task Force on Climate-Related Financial Disclosures; and
- is committed to set a Science Based Target initiative (the “SBT”) target.

For liquid assets, the Investment Managers applies minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Managers employed a variety of techniques to achieve the Sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, enumerated subsequently, comprise a synthesis of qualitative and quantitative analysis of investments to determine a positive contribution to environmental objectives, ensuring investments do no significant harm and their promoters follow good governance practices, IT applications, and interactions with diverse stakeholders, among others. Through the implementation of these techniques, the Fund has successfully fulfilled its pledged environmental objectives.

1. The Fund allocated part of its net assets to sustainable investments through ‘use of proceeds’ instruments, funding projects with positive environmental impacts. The Investment Managers evaluated each security against the applicable requirements, and the thorough process ensured that only verified bonds have been classified as sustainable investments.

2. The Fund did not invest in issuers that violated its exclusions. Using internal and external resources like MSCI and Sustainalytics, the manager also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. In order to meet its commitment to engage (on a calendar year basis) with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics, the Investment Managers engaged with the identified issuers by using the following methods:

- 1:1 meetings: The Investment Managers discussed sustainability topics, controversies, and encouraged proactive remedies, addressed risks and opportunities, including biodiversity protection, GHG emissions reduction, and gender pay gap.
- Written communications: The Investment Managers sent letters and questionnaires on material topics, such as fossil fuel financing activities, to promote environmental and social business activities and facilitate better informed investment decisions.
- In-person meetings: The Investment Managers engaged with stakeholders at conferences, sharing best practices in sustainable investing.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Franklin Global Multi-Asset Income Fund (the "Fund")

Legal Entity Identifier: 549300A75JSDJHNO0S41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 72.56% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 77.45% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 5 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Sustainability KPI Name	Value
Number of companies in the portfolio which are in top half of the Fund's corporate investment universe, defined by MSCI All Country World Index ("Fund's Corporate Investment Universe") in terms of GHG emissions	116.00

Sustainability KPI Name	Value
Number of sovereigns in the portfolio which are in top third of the Fund's sovereign investment universe, defined as the Bloomberg Global Aggregate Index ("Fund's Sovereign Investment Universe"), in terms of GHG emissions	9.00
Number of companies in the portfolio which are in the worst decile of the Fund's Corporate Investment Universe, in terms of GHG emissions	5.00
Number of companies in the portfolio with female board representation below 10%	3.00
Number of companies the Investment Managers have engaged with	7.00

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-08-23 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation
describes the share of
investments in specific
assets.

● **What was the asset allocation?**

During the reference period, 98.13% of the Fund's portfolio based on market value was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.87%) was not aligned with the promoted characteristics and consisted primarily of liquid assets, index derivatives, certain collective investment management schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Financials	29.42%
Government bonds	11.44%
Information Technology	11.30%
Health Care	8.45%
Communication Services	6.76%
Consumer Discretionary	6.54%

Utilities	5.44%
Materials	3.67%
Energy	3.31%
Consumer Staples	3.10%
Real Estate	2.19%
Top sub-sector	% of Assets
Banks	11.57%
Government bonds	11.44%
Financial Services	10.68%
Semiconductors & Semiconductor Equipment	6.30%
Pharmaceuticals	5.02%
Electric Utilities	4.57%
Insurance	3.77%
Capital Markets	3.37%
Oil, Gas & Consumable Fuels	2.99%
Diversified Telecommunication Services	2.47%
Chemicals	2.04%
Air Freight & Logistics	1.95%
Communications Equipment	1.94%
Biotechnology	1.90%
Automobiles	1.83%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

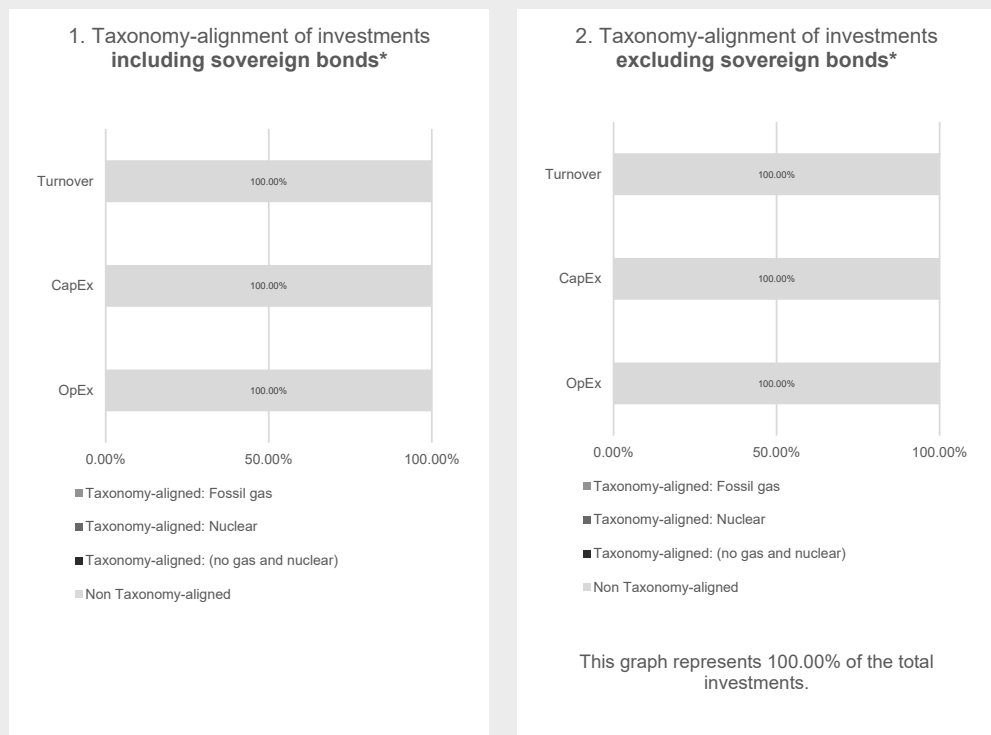

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The portion of investments under “#2 Other” was 1.87% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 4 engagements focused on initiatives to reduce GHG emissions, 2 engagements focused on strengthening board gender diversity and 1 engagement covered both issues.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.60% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI India Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	33.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	49.00%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	15.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	43.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	47.70%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	6.60%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	5.60
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.50

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2024-03-28 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

The Fund invested in 52.60% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 2.24% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Innovation Fund (the “Fund”)

Legal Entity Identifier: 5493001D4005GUTY6W49

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social (“E/S”) characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the “Investment Manager”) sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.21% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager’s proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager’s analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	6.62%
The share of companies rated AA by proprietary ESG methodology	59.50%
The share of companies rated A by proprietary ESG methodology	33.88%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

In the prior periodic reporting of the Fund, the companies 'rated B' were labeled as 'not rated'. The label has now been updated in the table below.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of companies rated AAA by proprietary ESG methodology	6.62%	10.56%
The share of companies rated AA by proprietary ESG methodology	59.50%	61.13%
The share of companies rated A by proprietary ESG methodology	33.88%	26.20%
The share of companies rated B by proprietary ESG methodology	0.00%	2.11%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Aerospace & Defense	1.12%
Health Care Providers & Services	0.96%
Energy Equipment & Services	0.96%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 0.79% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Intelligent Machines Fund (the "Fund")

Legal Entity Identifier: 254900ZZZRM3C21CZ625

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 96.94% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	11.01%
The share of companies rated AA by proprietary ESG methodology	54.37%
The share of companies rated A by proprietary ESG methodology	34.62%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

Franklin K2 Alternative Strategies Fund (the "Fund")

Legal Entity Identifier: 54930062LATFG8YHK918

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund encouraged at portfolio level minimum environmental, social and governance (the "ESG") standards by targeting a weighted average ESG score greater than i) the median MSCI ESG score of the investment universe; or ii) an MSCI ESG score of 5.25, whichever was higher, based on the long exposure in the portfolio of rated securities.

Thereby, the Fund promoted environmental and social characteristics which include inter alia actions to combat climate change, reduction of pollution and waste and/or human rights.

The investment universe was defined as all issuers with a current MSCI ESG score. Holdings without MSCI attributed ESG score did not contribute to the ESG score of the Fund or its investment universe.

In addition, the Fund implemented negative screens as part of its investment process.

In this regard, the Fund allocated 56.59% of its assets to investments aligned with the E/S characteristics during the reference period.

Sustainability indicators

measures how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

- The weighted average MSCI ESG score of the portfolio; and
- The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions described in the Fund's pre-contractual disclosure.

Sustainability KPI Name	Value
The weighted average MSCI ESG score of the portfolio	6.22
The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions	0.00

● ... And compared to previous periods?

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The weighted average MSCI ESG score of the portfolio	6.22	6.00
The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions	0.00	0.00

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts (the "PAIs") were integrated into K2/D&S Management Co., L.L.C. (the "Investment Manager") proprietary scoring model, the ESG 360 Dashboard. This ESG modelling tool takes in position level scoring from MSCI ESG and produces sleeve and portfolio scores.

The following PAIs were considered in relation to the Fund:

- Exposure to companies active in the fossil fuel sector;
- Violations of United Nations Global Compact principles (the "UNGC Principles") and Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons.

The Fund monitors exposure to companies active in fossil fuels sector and targets 0% long exposure to companies which generate more than 30% of their revenues from coal production or distribution.

The Fund committed to have less than 1% long exposure in the portfolio to equities and corporate credit that violated the UNGC Principles without positive perspective. The Fund limited exposure to equities and corporate credit that violated the UNGC Principles without positive perspective to 0.31%. Furthermore, the Fund considered Violations of UN Global Compact and OECD Guidelines as part of the assessment of investee companies good governance. The Investment Manager screened the long holdings to identify securities which failed the UNGC or OECD Guidelines. The Investment Manager engaged with the Investment Co-Managers to understand the investment proposition of the security which were flagged as violating UN Global Compact or OECD Guidelines and performed an assessment of the underlying company's governance. If it was determined that the security indeed had poor governance, the security was added to the Fund's restricted list, leading the Investment Manager to divest within 90 days.

The Fund limited exposure to controversial weapons to 0%.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

What was the proportion of sustainability-related investments?

The Fund did not make sustainable investments during the reference period.

Asset allocation describes the share of investments in specific assets.

● **What was the asset allocation?**

56.59% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (43.41%) was not aligned with E/S characteristics and consisted primarily of asset types and securities which were considered ineligible assets within the MSCI ESG Ratings methodology.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Equity Index	23.20%
Government	21.07%
FX	18.46%
Health Care	14.90%
Credit Index	14.47%
Industrials	10.57%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

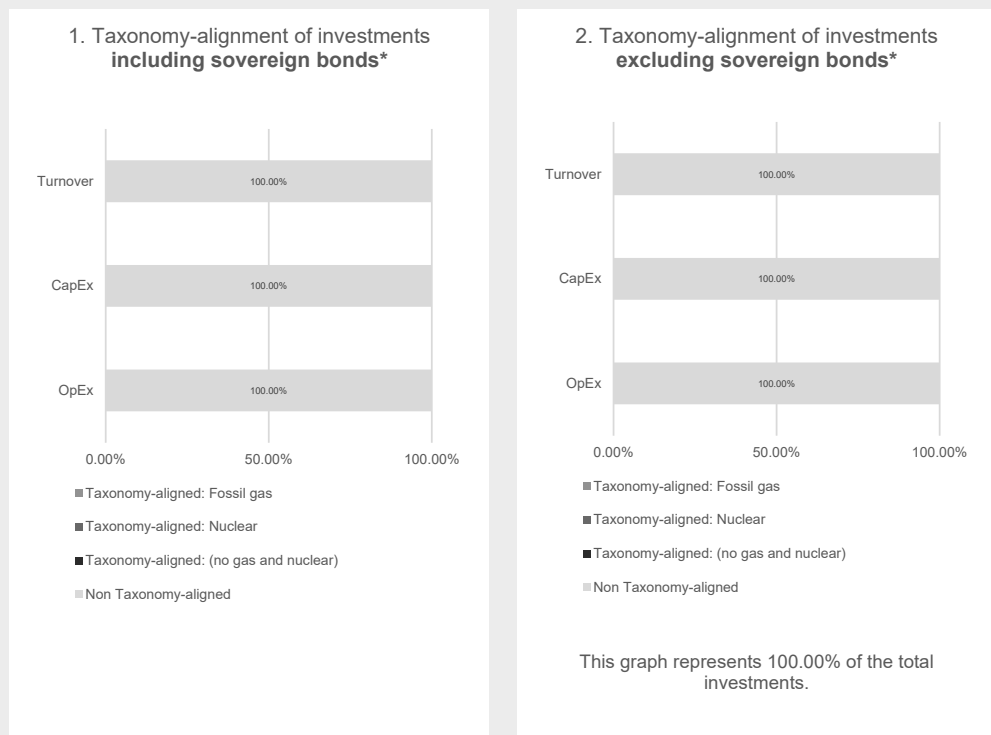

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 43.41% and included asset types and securities that were considered ineligible assets within the MSCI ESG Ratings methodology. This included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), foreign exchange and foreign exchange derivatives, interest rate swaps and UCITs eligible commodities. In addition, the Fund invested in assets that are eligible under MSCI ESG Ratings methodology, but which are not covered for the purpose of calculating an overall Fund ESG score. These assets included structured credit and short derivative positions. Lastly, no environmental and/or social safeguards have been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy can be summarized as follows:

1. The Fund committed and succeeded to reach an overall ESG score of at least 5.25, based on the weighted average MSCI ESG rating for all long holdings of rated securities actively held in the portfolio and covered by MSCI. If the Fund’s score fell below 5.25, the Investment Manager rebalanced across the Investment Co-Manager’s sleeves to achieve a Fund score of 5.25 or better within 90 days.

The weighted average MSCI ESG score of the portfolio was 6.22 (and the median MSCI ESG score of the investment universe was 5.25) ; and

2. the Fund excluded certain sectors and companies with respect to the following criteria:

- 0% exposure to controversial weapons;
- Less than 1% long exposure to securities which fail the UNGC Principles without positive perspective;
- Less than 5% long exposure to MSCI CCC-rated securities;
- The Fund targets 0% long exposure in aggregate to (i) companies which generate more than 5% of their revenues from tobacco production or distribution and (ii) companies which generate more than 30% of their revenues from coal production or distribution. At not time will this exposure exceed 1% of long positions, and should it exceed 0%, the positions in violation of these thresholds will be removed from the Fund by the end of the calendar month following the month in which the issue is identified by the Investment Manager.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Mutual European Fund (the "Fund")

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund include, among other things, the reduction of greenhouse gas ("GHG") intensity and board gender diversity. Since these commitments have been made, the Investment Manager attained these characteristics by:

- Maintaining lower portfolio GHG intensity (scope 1+2) compared to both the MSCI Europe Value Index (the "Benchmark") and MSCI All Country Europe Index (the "Investment Universe");
- Engaging with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable; and
- Implementing negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

- The Fund's weighted GHG intensity (scope 1+2) was at least 20% below both the Benchmark and Investment Universe.
- The percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions as further detailed in section "What investment strategy does this financial product follow?" in the Fund's prospectus have been 0%.
- The percentage of Fund's votes in favor of separation of the roles of CEO and Chair of the Board of Directors of the invested companies, when presented with the opportunity, has been 100%.
- The percentage of investments in companies that have less than one female director on the board of directors has been 0%, while also engaging with certain investee companies to promote Board diversification towards at least two female directors, or 30% of the board, whichever is greater.

Sustainability KPI Name	Value
Fund's weighted GHG intensity (scope 1+2), in percentage points, below the Benchmark (at least 20%)	49.46%

Sustainability KPI Name	Value
Fund's weighted GHG intensity (scope 1+2), in percentage points, below the Investment Universe (at least 20%)	26.57%
Percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions	0.00%
Percentage of Fund's votes in favor of separation of the roles of CEO and Chair of the board of directors of the invested companies, when presented with the opportunity	100.00%
Percentage of investments in companies that have less than one female director	0.00%
Percentage of investments in companies with less than two or 30% female directors	3.95%

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Greenhouse gas intensity
- Board gender diversity
- Controversial weapons

- Greenhouse gas (GHG) intensity

The Fund committed to maintaining a portfolio GHG intensity (scope 1+2), at least 20% below that of the Benchmark and of the Investment Universe, whichever was the lowest.

- Board gender diversity

The Investment Manager engaged with the investee companies to encourage a minimum of 2 females, or 30% of the board, whichever was greater, as a minimum board gender diversity threshold (below referred to as "2 or 30%" threshold). The Fund did not invest in companies which had no female directors. In cases where the company had at least one female director but did not meet the "2 or 30%" threshold, the Investment Manager would have engaged with the company and may have voted against key committee

members unless the company was in the process of rectifying the shortcoming. Failure to achieve, or present a clear and credible plan to achieve, the "2 or 30%" threshold within 3 years from establishment of the position would result in divestment from this company as soon as practicably possible. Divestment would normally occur within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

- Controversial weapons

The Fund did not invest in companies that were involved in the production or distribution of controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2024-03-27 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

Energy Equipment & Services	2.12%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 4.88% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as securities held for investment purposes which were involved in special situations, including merger arbitrage, stressed and distressed debt issuers. No minimum environmental or social safeguards were put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To meet the environmental and/or social characteristics during the referencing period, the Fund has:

- Maintained at least a 20% lower portfolio GHG intensity (scope 1+2) compared to both the MSCI World Value Index (the "Benchmark") and MSCI All Country World Index (the "Investment Universe");
- Implemented negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus;
- Avoided investment in companies without at least one female board director and engaged with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable;
- Voted to separate the roles of CEO and Chair of the Board of Directors of the investee companies, when presented the opportunity.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Franklin Technology Fund (the "Fund")

Legal Entity Identifier: 549300P9XZCZFA3DI319

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.02% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Value
The share of companies rated AAA by proprietary ESG methodology	10.18%
The share of companies rated AA by proprietary ESG methodology	53.08%
The share of companies rated A by proprietary ESG methodology	36.74%
The share of companies rated B by proprietary ESG methodology	0.00%

Sustainability KPI Name	Value
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

In the prior periodic reporting of the Fund, the companies 'rated B' were labeled as 'not rated'. The label has now been updated in the table below.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of companies rated AAA by proprietary ESG methodology	10.18%	11.72%
The share of companies rated AA by proprietary ESG methodology	53.08%	52.80%
The share of companies rated A by proprietary ESG methodology	36.74%	34.05%
The share of companies rated B by proprietary ESG methodology	0.00%	1.44%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 1.98% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The proportion of investments under ‘#2 Other’ was 1.22% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund, for which there were no minimum environmental or social safeguards. It also included issuers for which there was no ESG rating.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Templeton All China Equity Fund (the "Fund")

FRANKLIN
TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China All Shares 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	19.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	55.10%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	21.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	20.20%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	42.60%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	33.40%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	4.80
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	3.20

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights). Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-08-25 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

Textiles, Apparel & Luxury Goods	3.35%
Independent Power & Renewable Electricity Producers	3.27%
Insurance	3.04%
Pharmaceuticals	2.75%
Machinery	2.53%
Air Freight & Logistics	2.41%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 9.00% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 46.00% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 3.79% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Asian Bond Fund (the "Fund")

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 60.58 and the investment universe average base ESG score was 51.25 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In this regard, the Fund allocated 95.50% of its assets to investments aligned with the E/S characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated. Values below are as of 30 June 2024.

Sustainability KPI Name	Value
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	9.33

● **... And compared to previous periods?**

The values were in line with previous periods.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	9.33	7.25

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points

Social violations by the investee countries were monitored as part of the Investment Manager's proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Pemerintah Republik Indonesia	Government bonds	20.44%	Indonesia
Republic of India	Government bonds	20.41%	India
Government of the Republic of Korea	Government bonds	19.86%	South Korea
Kerajaan Malaysia	Government bonds	19.65%	Malaysia
New South Wales Treasury Corporation	Government bonds	2.90%	Australia
Treasury Corporation Of Victoria	Government bonds	2.04%	Australia
Republic of Singapore	Government bonds	2.02%	Singapore
Commonwealth of Australia	Government bonds	2.02%	Australia
Republic of Kazakhstan	Government bonds	1.99%	Kazakhstan
Democratic Socialist Republic of Sri Lanka	Government bonds	1.92%	Sri Lanka
QUEENSLAND TREASURY CORPORATION	Government bonds	1.20%	Australia
Kingdom of Thailand	Government bonds	0.26%	Thailand

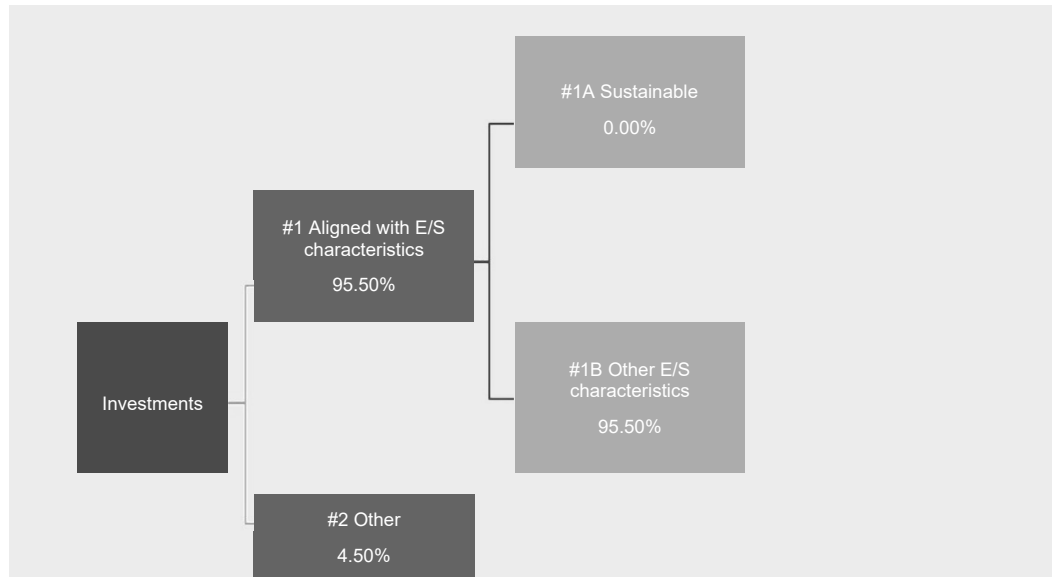

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.50% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (4.50%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities and undertakings for collective investment in transferable securities and undertakings for collective investment for liquidity management purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government bonds	94.70%
Top sub-sector	% of Assets
Government bonds	94.70%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 4.50% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities, for which there were no minimum environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own any corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.50% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI All Country Asia ex-Japan 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	22.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	61.60%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	13.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	37.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	43.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	16.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	6.50
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.00

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-08-25 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.80%	Taiwan

Electronic Equipment, Instruments & Components	1.80%
Household Durables	1.65%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 31.80% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 47.70% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 1.20% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 13.80% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 38.80% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 3.80% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

FRANKLIN
TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China A Onshore Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	33.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	37.90%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	20.60%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	18.80%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	36.20%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	36.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	4.80
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	2.50

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights). Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-08-25 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 49.00%.

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

91.87% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (8.13%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 49.00% of its net assets in sustainable investments, with a 19.90% allocation of net assets towards environmental objectives and 29.10% towards social objectives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	19.27%
Financials	14.94%
Consumer Discretionary	13.12%
Consumer Staples	13.05%

Electronic Equipment, Instruments & Components	2.79%
Food Products	2.32%
Chemicals	2.30%
Air Freight & Logistics	2.23%
Automobile Components	2.04%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 19.90% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 29.10% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 8.13% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton China Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.50% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	18.20%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	54.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	23.10%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	19.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	38.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	38.30%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	4.90
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	3.20

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights). Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. Exceptions were only made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-08-25 - 2024-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 62.50%.

Asset allocation
describes the share of
investments in specific
assets.

● What was the asset allocation?

95.78% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.22%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 62.50% of its net assets in sustainable investments, with a 9.70% allocation of net assets towards environmental objectives and 52.80% towards social objectives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Discretionary	32.08%
Communication Services	22.60%
Financials	11.12%
Consumer Staples	8.68%
Industrials	6.17%
Health Care	6.10%
Utilities	3.61%
Information Technology	2.26%
Energy	1.30%
Materials	0.99%
Real Estate	0.87%
Top sub-sector	% of Assets
Interactive Media & Services	13.76%
Broadline Retail	13.43%
Hotels, Restaurants & Leisure	8.45%
Beverages	6.26%
Banks	5.93%
Entertainment	4.88%
Electrical Equipment	4.11%
Media	3.97%
Insurance	3.81%
Independent Power & Renewable Electricity Producers	3.61%
Textiles, Apparel & Luxury Goods	2.76%
Food Products	2.42%
Pharmaceuticals	2.30%
Automobile Components	1.95%
Household Durables	1.92%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

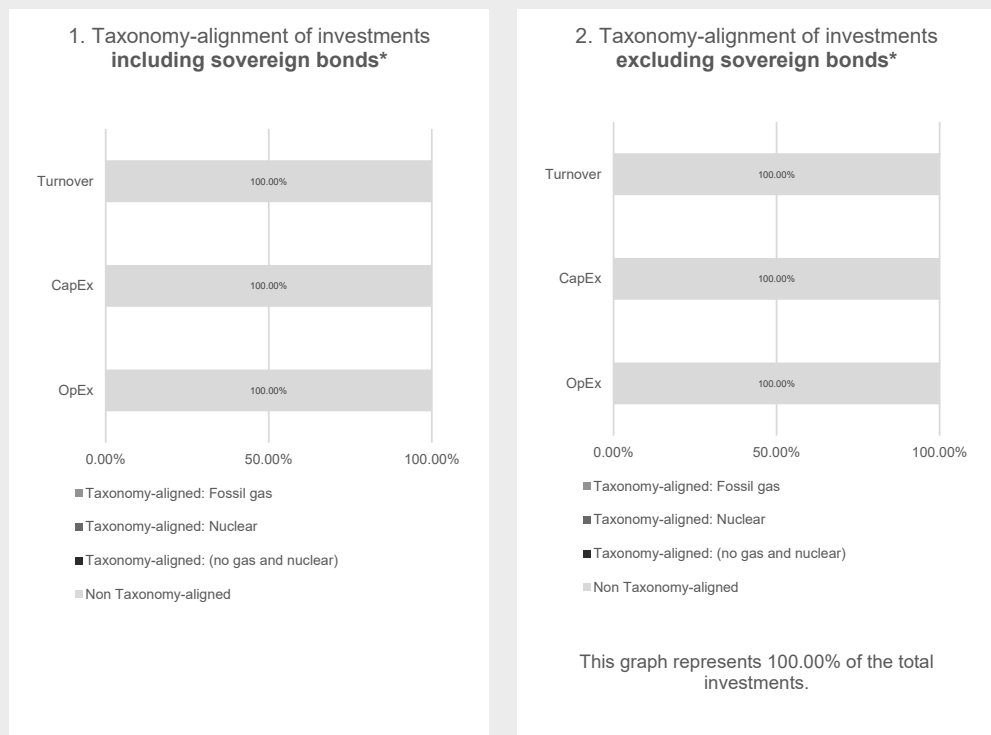

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 9.70% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 52.80% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 4.22% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Bond Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 53.75 and the investment universe average base ESG score was 49.28 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In that regard, the Fund allocated 94.63% of its assets to investments aligned with the E/S characteristics over the reference period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated. Values below are as of 30 June 2024.

Sustainability KPI Name	Value
The shares of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	4.48

● **... And compared to previous periods?**

The values were in line with previous periods.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The shares of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	Value 0.00%	Value 0.00%
The ESG score difference between the Fund's portfolio and the investment universe	Value 4.48	Value 0.73

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of the Investment Manager’s proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
Kerajaan Malaysia	Government bonds	8.91%	Malaysia
Arab Republic of Egypt	Government bonds	8.65%	Egypt
Republica Federativa do Brasil	Government bonds	8.65%	Brazil
Republica de Colombia	Government bonds	8.64%	Colombia
Republica del Ecuador	Government bonds	8.17%	Ecuador
Republica Oriental del Uruguay	Government bonds	6.68%	Uruguay
Pemerintah Republik Indonesia	Government bonds	4.99%	Indonesia
Gobierno de la Republica Dominicana	Government bonds	4.80%	Dominican Republic
ASIAN DEVELOPMENT BANK	Government bonds	4.36%	Supranational
Estados Unidos Mexicanos	Government bonds	3.49%	Mexico
Magyarország	Government bonds	3.07%	Hungary
Romania	Government bonds	2.74%	Romania
Government of Mongolia	Government bonds	2.56%	Mongolia
Republic of Kazakhstan	Government bonds	2.51%	Kazakhstan
International Bank for Reconstruction and Development	Government bonds	2.40%	Supranational

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

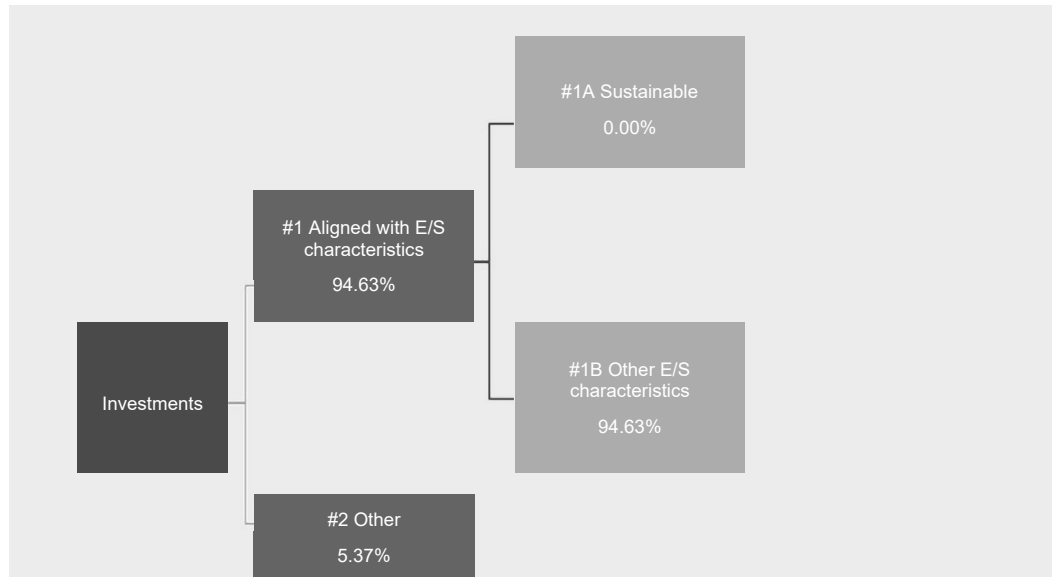

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

94.63% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (5.37%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities and undertakings for collective investment for liquidity management purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	94.03%
Communication Services	0.04%
Top sub-sector	% of Assets
Government bonds	94.03%
Wireless Telecommunication Services	0.04%
Specialty Retail	0.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 5.37% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities, for which there were no minimum environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund effectively held 0% in corporate bonds over the reference period.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Templeton Emerging Markets Fund (the "Fund")

Legal Entity Identifier: 549300N1D1LWXSXW8XY56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.80% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI Emerging Markets Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;
2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	22.80%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	59.50%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	13.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	28.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	35.80%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	32.00%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	6.40
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.10

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights). Exceptions were made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. Exceptions were only made in two cases after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-08-25 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.83%	Taiwan

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 79.80%.

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

96.25% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.75%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 79.80% of its net assets in sustainable investments, with a 28.30% allocation of net assets towards environmental objectives and 51.50% towards social objectives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Information Technology	27.58%
Financials	24.84%
Consumer Discretionary	11.43%
Communication Services	9.12%
Industrials	8.16%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

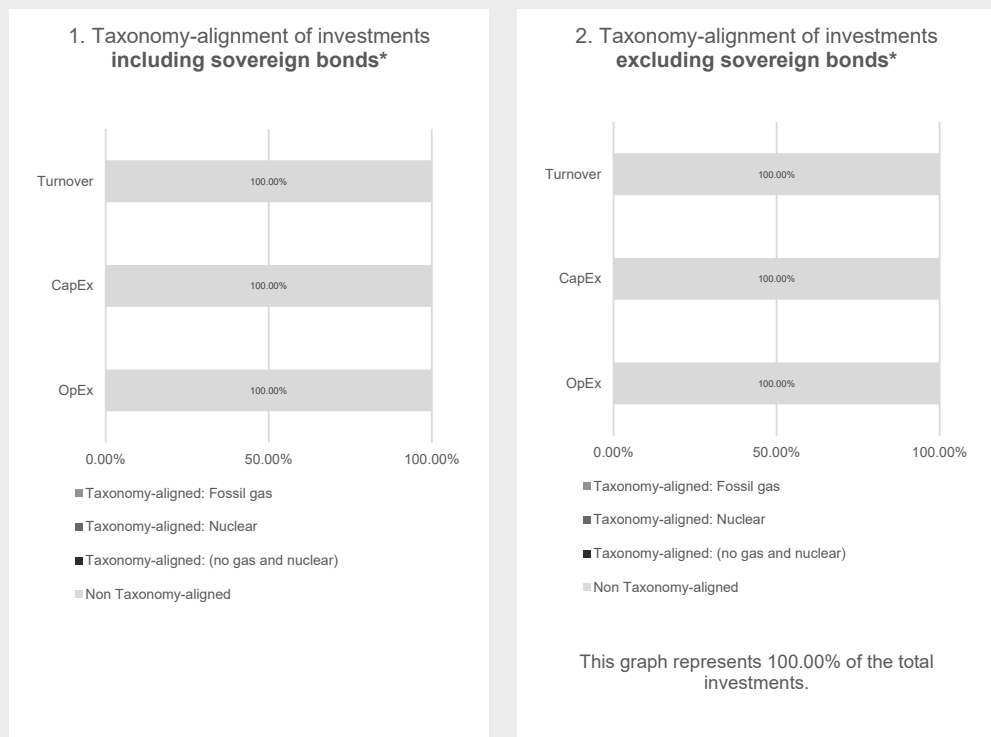

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 28.30% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 51.50% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 3.75% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.01% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments 	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. and Templeton Asset Management Limited ("the Investment Managers") attained these characteristics by using a proprietary environmental, social and governance ("ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debts of issuers that are in the bottom 10% based on MSCI ESG ratings and excluded them from the Fund's investment universe dedicated to corporate bonds; and
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- with no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in Euro or US dollar and did not have a local custodian entity

- meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds and corporate bonds of the Fund's portfolio was constructed by issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental outcomes by investing at least 5% of its portfolio in green bonds, where the use of proceeds had been specified by the issuer and verified by a third party or the Investment Manager, to benefit underlying environmental projects.

The Fund's weighted average base ESG score was 56.89 and the investment universe average base ESG score was 49.28 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 93.51% of its assets to investments aligned with the E/S characteristics over the reference period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated. Values below are as of 30 June 2024.

Sustainability KPI Name	Value
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	7.62
The percentage of investments in green bonds	10.01%

● **... And compared to previous periods?**

The values were in line with previous periods.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	7.62	7.87
The percentage of investments in green bonds	10.01%	15.97%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The Fund invested 10.01% of its portfolio in green bonds over the reference period, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

Republika Srbija	Government bonds	2.87%	Serbia

What was the proportion of sustainability-related investments?

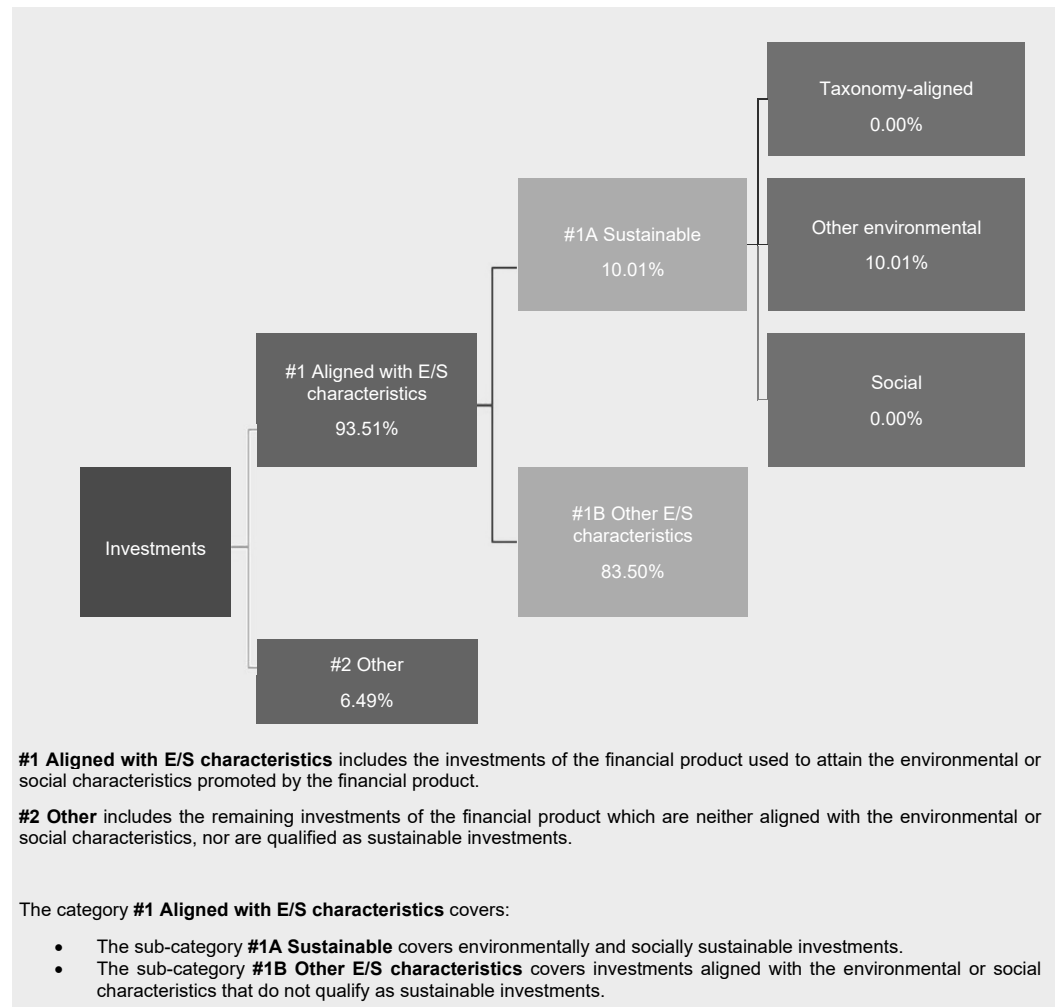

The proportion of sustainable investments was 10.01% over the reference period.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

93.51% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (6.49%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities and undertakings for collective investment for liquidity management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 10.01% of its portfolio in sustainable investments over the reference period.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government bonds	93.56%
Top sub-sector	% of Assets
Government bonds	93.56%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

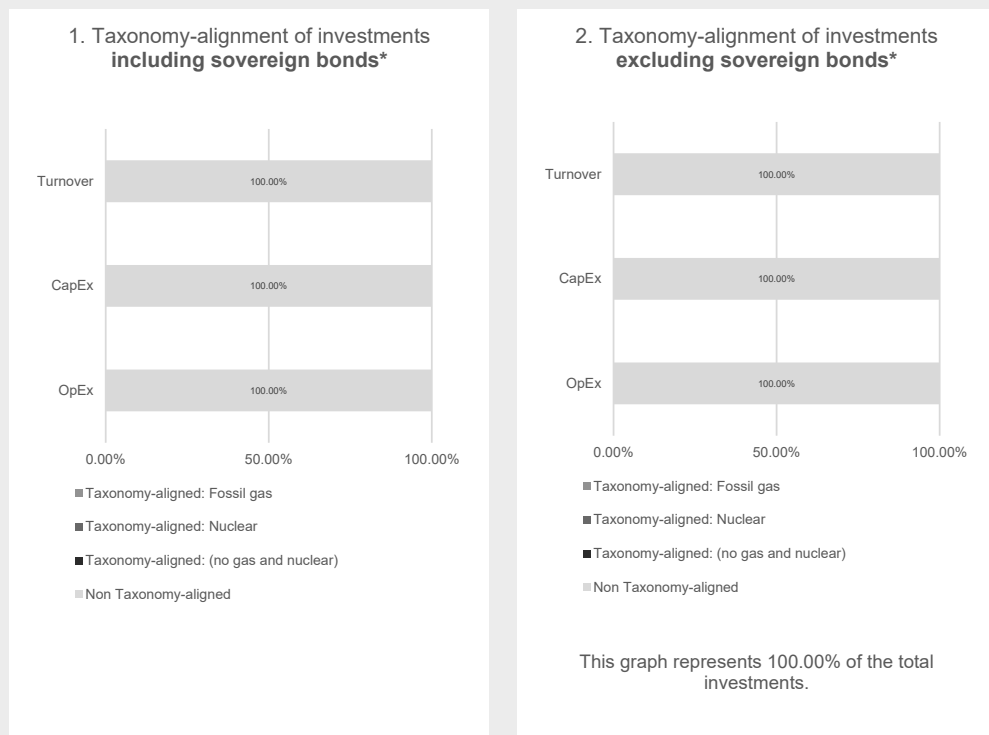

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 10.01% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under '#2 Other' was 6.49% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities, for which there were no minimum environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund invested more than 5% of the portfolio (10.01%) in green bonds qualifying as sustainable investments over the reference period;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Templeton Emerging Markets Smaller Companies Fund (the “Fund”)

Legal Entity Identifier: 5493006EW07Y7KY7V319

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.30% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology.
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Below is a breakdown of the portfolio's investments measured using an average taken from 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	12.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	51.90%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	32.80%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	6.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	48.70%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	42.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-03-28 - 2024-06-30.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 56.30%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.27% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.73%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 56.30% of its net assets in sustainable investments, with a 11.40% allocation of net assets towards environmental objectives and 44.90% towards social objectives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Discretionary	22.44%
Financials	21.56%
Information Technology	18.60%
Health Care	10.46%
Industrials	8.12%

Broadline Retail	3.29%
Insurance	3.20%
Capital Markets	2.89%
Construction Materials	2.24%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The Fund invested in 11.40% sustainable investments with an environmental objective.

- **What was the share of socially sustainable investments?**

The Fund invested in 44.90% sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 2.73% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

- **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Sustainability Fund (the "Fund")

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> YES	<input type="radio"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 40.30% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 55.30% <ul style="list-style-type: none"> <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments 	

To what extent was the sustainable investment objective of this financial product met?

The Fund had a sustainable investment objective in accordance with Article 9 of the Sustainable Finance Disclosure Regulation (the "SFDR"). In its implementation of the Fund's environmental, social, governance ("ESG") process, Franklin Templeton Investment Management Limited and Templeton Asset Management Limited (the "Investment Managers") pursued the sustainable investment objective by investing in companies located or having their principal business activities in developing or emerging nations and which contributed to a positive social and/or environmental outcome. The Fund measured the attainment of the sustainable investment objective through its exposure to companies contributing to positive social and/or environmental outcome areas, using its proprietary ESG ratings system further described in the Fund's pre-contractual disclosure. The Fund also ensured that its sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. As part of its investment decision making process, the Fund's ESG process used binding criteria for the selection of underlying assets and applied specific ESG exclusions.

In this regard, using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period, 95.6% of the Fund's assets contributed to the sustainable investment objective.

The six positive outcome areas, being 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

Breakdown of Fund measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

Portfolio Breakdown by alignment assessment (%)

- 50%+ of revenues: 83.5
- 25-49% of revenues: 12.1

- 10-24% of revenues: 0.0
- 0-9% of revenues: 0.0
- Cash: 4.4

Portfolio breakdown by internal ESG rating (%)

- AAA: 33.8
- AA: 50.1
- A: 11.7
- BBB: 0.00
- BB: 0.00
- B: 0.00
- CCC: 0.00
- Cash: 4.4

The Fund did not use derivatives to attain its sustainable investment objective. Additionally, the Fund did not use a reference benchmark to attain its sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the sustainable investment objective are:

1. exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security; and
2. exposure to companies with alignment to the United Nations Sustainable Development Goals ("UN SDGs").

Below is a breakdown of the portfolio's investments measured using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period.

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.3
- Wellbeing: 13.4
- Decent Work: 27.5

Environmental

- Healthy Ecosystems: 0.0
- Climate Stability: 39.6
- Resource Security: 0.8

Cash: 4.4

2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.9
- SDG 3: Good Health and Well-Being, 12.8
- SDG 8: Decent Work and Economic Growth, 22.2
- SDG 9: Industry, Innovation, and Infrastructure, 33.7
- SDG 10: Reduced Inequalities, 10.0
- SDG 12: Responsible Consumption and Production, 0.8
- SDG 13: Climate Action, 11.2
- Cash: 4.4

Sustainability KPI Name	Value
Exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security	95.60%
Exposure to companies with alignment to the UN SDGs.	95.60%

● **... And Compared to Previous Periods?**

Here is a comparison of this year's average figures vs. last year's figures (as at 30/06/2023):

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.3 (15.2)
- Wellbeing: 13.4 (14.1)
- Decent Work: 27.5 (27.3)

Environmental

- Healthy Ecosystems: 0.0 (0.0)
- Climate Stability: 39.6 (37.5)
- Resource Security: 0.8 (1.2)

Cash: 4.4 (4.5)

2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.9 (5.4)
- SDG 3: Good Health and Well-Being, 12.8 (14.4)
- SDG 8: Decent Work and Economic Growth, 22.2 (21.6)
- SDG 9: Industry, Innovation, and Infrastructure, 33.7 (31.3)
- SDG 10: Reduced Inequalities, 10.0 (9.5)
- SDG 12: Responsible Consumption and Production, 0.8 (1.2)
- SDG 13: Climate Action, 11.2 (11.9)
- Cash: 4.4 (4.5)

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
Exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security	95.60%	95.48%
Exposure to companies with alignment to the UN SDGs.	95.60%	95.48%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Do No Significant Harm ("DNSH") assessment has been integrated into the strategy through environmental, social and governance ("ESG") minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Managers examined negative externalities by screening for severe environmental and social controversies through third party Environmental, Social and Governance data provided by MSCI). All stocks had to pass the ESG minimum standards set for DNSH i.e., they did not exhibit severe environmental or social controversies that had not been resolved or without a positive forward-looking view. Additionally, negative externalities were captured, and formed part of the Fund's Intentionality pillar assessment as defined below to ensure there were no severe negative environmental or social externalities.

Lastly, as part of their DNSH test for the Fund, the Investment Managers (i) applied exclusions and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment with the relevance and materiality of the PAI indicators varying across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis and hence all holdings qualified sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights).

Exceptions have only been made once a formal review of alleged violations has been carried out and where the Investment Managers either disagreed with the conclusion that the company is complicit in violations of the principles of such conventions or have determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement have been considered in making a judgement on whether the company observed international conventions. Such an exception has been made once during the reference period.

As a result, and per the Investment Managers' analysis, the Fund's sustainable investments were aligned with these principles.

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the research process, the Investment Managers adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Managers took a sector-relative approach to the relevance of the PAI

indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Managers and defined below, the Investment Managers monitored and engaged to encourage the company to adequately set emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold has been set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified three companies where further analysis was required. On these three names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund did not invest in companies that do not observe the main international conventions. Except for cases referred to in section above (where exceptions can be made following the Investment Manager's further analysis), if MSCI has deemed a company in violation of UNGC Principles, the Fund did not invest in the company.

This condition was met.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Managers' controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

This condition was met.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2023-07-01 - 2024-06-30.

Interactive Media & Services	8.17%
Technology Hardware, Storage & Peripherals	6.72%
Health Care Providers & Services	6.58%
Broadline Retail	5.80%
Electronic Equipment, Instruments & Components	5.60%
Electrical Equipment	2.91%
Ground Transportation	2.47%
IT Services	2.34%
Insurance	2.21%
Automobiles	2.17%
Water Utilities	2.08%
Chemicals	2.05%
Software	1.97%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

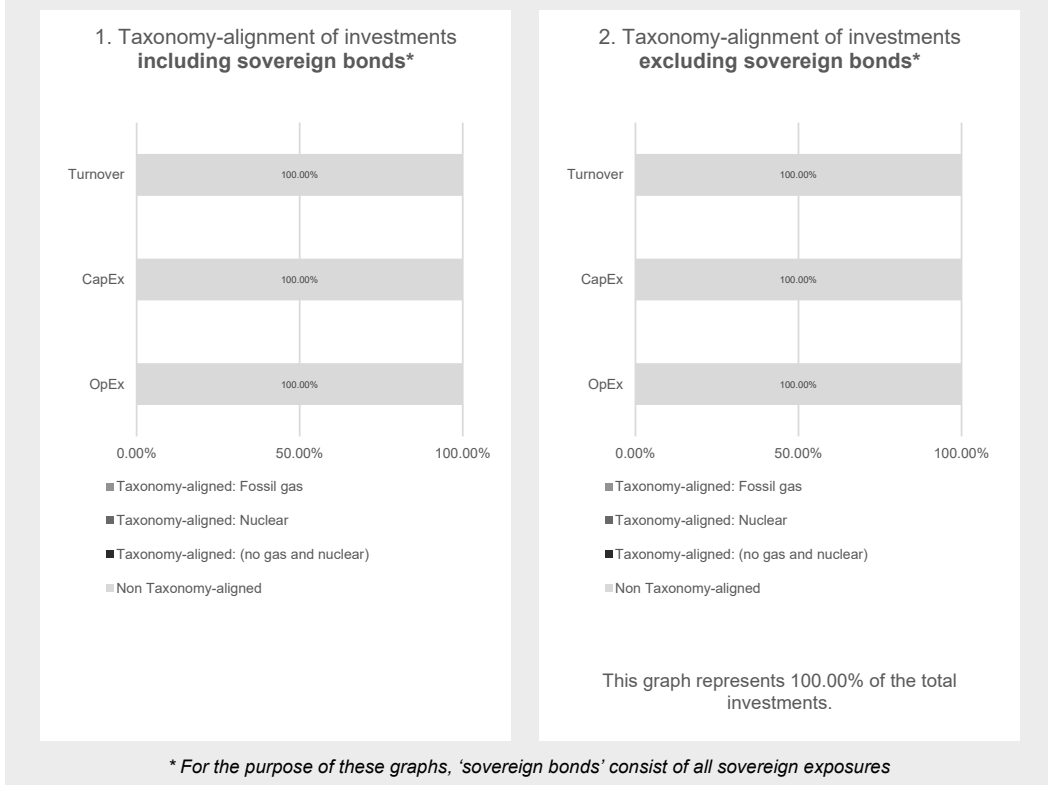

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The Fund committed to a minimum 25% of sustainable investments with an environmental objective aligned with the SFDR. Using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period, 40.3% of the portfolio was invested in companies with sustainable environmental objectives that are not aligned with EU Taxonomy. These investments could be aligned with the Taxonomy Regulation but the Investment Managers are not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

For avoidance of doubt, all companies in the portfolio are required to meet either a social or environmental sustainable objective under sustainable investment definition of SFDR. The allocation has been disclosed in this report.

What was the share of socially sustainable investments?

The Fund committed to a minimum 25% of sustainable investments with a social objective. Using an average taken from 9/30/2023, 12/31/2023, 3/31/2024 and 6/30/2024 quarterly snapshots over the fiscal year period, 55.3% of the portfolio is invested in companies that are socially sustainable investments, across the three social positive outcome areas.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under "#2 Not sustainable" was 4.4% and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market Funds) held for liquidity purposes of the Fund.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under "#2 Not sustainable" and the applicable minimum safeguards do not affect the delivery of the sustainable investment objectives of the Fund on a continuous basis.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy can be summarized as follows:

1. the Fund only invested in companies which (i) scored a minimum percentage of net contribution on the "Alignment Pillar", and (ii) scored an A or above on the combined 3-pillar ESG assessment; and
2. the Fund did not invest in companies which according to the Investment Managers' analysis:
 - Repeatedly and/or seriously violate the UNGC Principles, without positive perspective;
 - Manufacture or distribute nuclear weapons or controversial weapons defined as anti-personnel mines, biological & chemical weaponry, depleted uranium, and cluster munitions or those that manufacture components intended for use in such weapons. Companies that derive more than 5% revenue from any other weapons will also be excluded;
 - Manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds 5%;
 - Derive more than 5% of their revenue from thermal coal extraction or unconventional oil & gas extraction;
 - Derive more than 5% of their revenue from gambling or adult entertainment;
 - Which appears as excluded on the Norges Bank Investment Management (NBIM) exclusion list.

Ensuring the binding elements have been applied to portfolio selection and monitoring, the Fund has been able to attain its sustainable investment objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Templeton European Opportunities Fund (the "Fund")

Legal Entity Identifier: 549300E2K4E8O6FKNS31

FRANKLIN
TEMPLETON

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.96% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favoring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 95.18% of its assets to investments aligned with E/S characteristics as of 30 June 2024.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 12.96% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes as of 30 June 2024.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective. No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	12.96%
Number of investee companies with which the Investment Manager engages	35.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	61.31%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	38.69%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Percentage of companies held that are ranked in the worst quintile and greater than half the weighted average carbon intensity of MSCI Europe.	0.00%
Percentage of investee companies with no females on the board of directors	0.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs") are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a combination of third-party global norms-based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. In addition, the Fund applied exclusions that further reduce the likelihood of issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to Controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, including with Fund holding Infineon Technologies.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder’s meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2024.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder’s meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2024.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2024-03-27 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
COATS GROUP PLC	Consumer Discretionary	8.03%	United Kingdom
PAYPOINT PLC	Financials	7.24%	United Kingdom
SFC Energy AG	Industrials	5.92%	Germany
Hensoldt AG	Industrials	4.73%	Germany
BRITVIC PLC	Consumer Staples	4.50%	United Kingdom
WH SMITH PLC	Consumer Discretionary	4.17%	United Kingdom
GREGGS PLC	Consumer Discretionary	4.04%	United Kingdom
DASSAULT AVIATION SA	Industrials	3.78%	France

SUESS MicroTec SE	Information Technology	2.92%	Germany
BIG YELLOW GROUP PLC	Real Estate	2.86%	United Kingdom
BARRATT DEVELOPMENTS P L C	Consumer Discretionary	2.54%	United Kingdom

What was the proportion of sustainability-related investments?

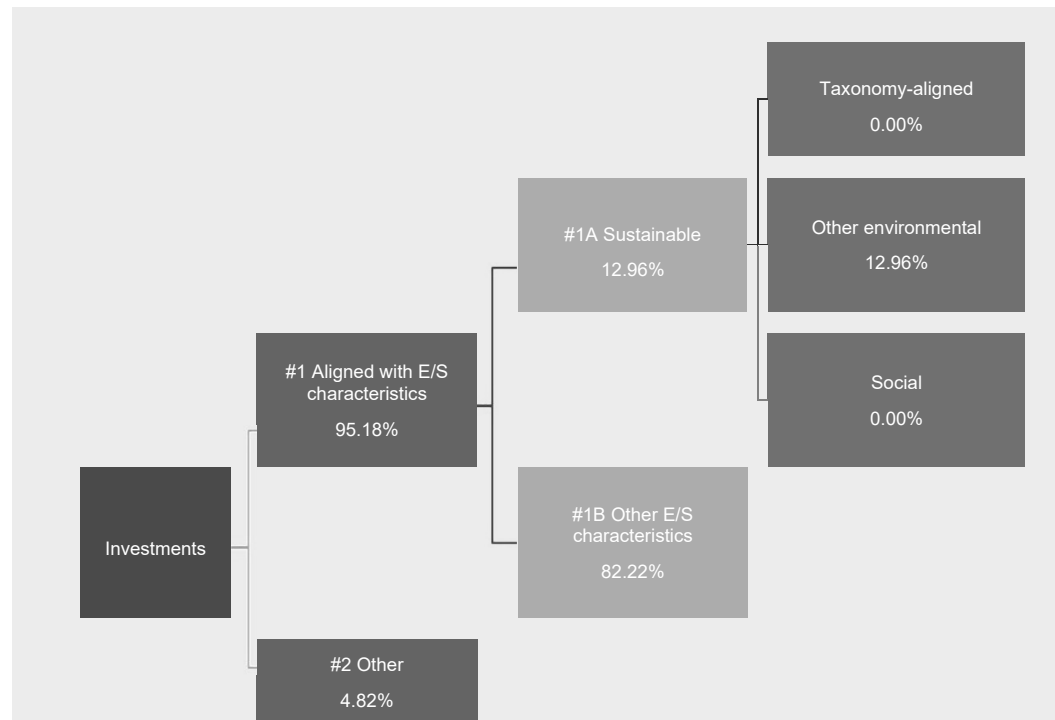

The proportion of sustainable investments was 12.96% as of 30 June 2024.

Asset allocation
describes the share of
investments in specific
assets.

● What was the asset allocation?

95.18% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund as of 30 June 2024. The remaining portion (4.82%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 12.96% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Discretionary	26.07%
Industrials	19.35%
Information Technology	12.30%
Financials	9.70%
Real Estate	6.49%
Communication Services	5.01%

Health Care	4.02%
Materials	3.48%
Utilities	2.23%
Energy	2.16%
Top sub-sector	% of Assets
Textiles, Apparel & Luxury Goods	12.90%
Semiconductors & Semiconductor Equipment	12.30%
Aerospace & Defense	11.01%
Financial Services	7.24%
Electrical Equipment	5.92%
Media	5.01%
Specialty Retail	4.50%
Beverages	4.17%
Hotels, Restaurants & Leisure	4.04%
Health Care Technology	3.63%
Retail REITs	3.42%
Entertainment	2.86%
Chemicals	2.54%
Specialized REITs	2.45%
Electric Utilities	2.43%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 12.96% as of 30 June 2024.

 **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 0% as of 30 June 2024.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 4.82% as of 30 June 2024 and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager's proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager's proprietary ESG methodology. No companies held as of 30 June 2024 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section "What investment strategy does this financial product follow?" in the Fund's pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton European Small-Mid Cap Fund (the "Fund")

Legal Entity Identifier: 549300U3RRXWK6GSP710

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.29% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favoring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 92.60% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 13.29% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes as of 30 June 2024.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective. No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Exposure to companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	13.29%
Number of investee companies with which the Investment Manager engages	32.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	42.55%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	57.45%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector	0.00%
Share of investee companies with no females on the board of directors	0.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs") are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a combination of third-party global norms-based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. In addition, the Fund applied exclusions that further reduce the likelihood of issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeq-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criterion as of 30 June 2024.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2024.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 13.29% as of 30 June 2024.

 **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 0% as of 30 June 2024.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 7.40% as of 30 June 2024 and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No companies held as of 30 June 2024 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton European Sustainability Improvers Fund (the "Fund")

Legal Entity Identifier: 54930019QGXC4U81ZY46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.11% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, environmental positive outcomes (e.g., reduction of greenhouse gas emissions, waste management, natural resource conservation, energy use) as well as social positive outcomes (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity).

The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good and improving environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 96.21% of its assets to investments aligned with E/S characteristics, as of 30 June 2024.

Each company holding was assigned a measurable improvement target, whose achievement will contribute to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The Fund also has a minimum allocation of 15% of its portfolio to sustainable investments with an environmental objective and 5% of its portfolio to sustainable investments with a social objective. Each sustainable investment is contributing to one of the above positive outcome areas.

The Fund also has a minimum allocation of 1% to sustainable investments with an environmental objective aligned with the EU Taxonomy, which is included in the minimum 15% allocation to sustainable investments with an environmental objective.

In this regard, the Fund allocated 55.35% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental and social outcomes, and the Fund's EU Taxonomy alignment was 6.71% as of 30 June 2024.

No reference benchmark has been designated with the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators

measures how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund has high exposure to companies positively contributing to the United Nations Sustainable Development Goals (the "UN SDGs"). In addition, all companies have been assigned improvement targets related to material environmental or social factors, which are positively aligned to the UN SDGs.

- During the past year, The Investment Manager engaged with 13 holdings, or 41% of equity assets under management (as of 30 June 2024) to influence positive change related to sustainability and/or governance issues.
- The Investment Manager also conducted engagements for change or to develop insights during the year across 29 holdings representing 84% of equity assets under management (as of 30 June 2024). The latter included discussions to confirm the Fund's improvement targets were appropriate and consistent with the company's strategy.
- All of the companies held were invested in companies rated average or better based on the Investment Manager's proprietary methodology, as of 30 June 2024.

Below are details on the sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Fund.

Sustainability KPI Name	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	55.00%
Number of investee companies with which the Investment Manager engages	42.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	4.58%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	70.02%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	25.40%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Percent of companies held that ranked in the worst quintile and greater than half the weighted average carbon intensity of MSCI Europe.	0.00%
Percent of companies held that had no females on the board (weighted average = 42%)	0.00%
Percent of companies held that have emissions reduction targets	100.00%
Percent of companies held that have implemented a human rights policy	100.00%
Weighted average percent of women in the workforce	36.00%
Percentage of investee companies held conducting employee satisfaction surveys	94.00%
Percentage of investee companies held providing non-compensation benefits	74.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third-party global norms-based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager’s fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. In addition, the Fund applied exclusions that further reduce the likelihood of issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund’s sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards (“RTS”) as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the “UNGC Principles”), Organisation for Economic Cooperation and Development (the “OECD”) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, including with Fund holdings Infineon Technologies and Veolia Environnement.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting this criterion as of 30 June 2024.

- Board gender diversity
- Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting these criteria as of 30 June 2024.
- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-03-25 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
SSE PLC	Utilities	4.77%	United Kingdom
VEOLIA ENVIRONNEMENT SA	Utilities	4.76%	France
Norsk Hydro ASA	Materials	4.33%	Norway
PRYSMIAN S.P.A.	Industrials	4.13%	Italy
ING Groep N.V.	Financials	3.96%	Netherlands
Stellantis N.V.	Consumer Discretionary	3.82%	United States of America
Infineon Technologies AG	Information Technology	3.78%	Germany
ANTOFAGASTA PLC	Materials	3.53%	United Kingdom
UNILEVER PLC	Consumer Staples	3.43%	United Kingdom
BP P.L.C.	Energy	3.41%	United Kingdom
Deutsche Telekom AG	Communication Services	3.18%	Germany
SPIE SA	Industrials	3.16%	France
SANOFI SA	Health Care	3.02%	France
LLOYDS BANKING GROUP PLC	Financials	3.00%	United Kingdom
ADIDAS AG	Consumer Discretionary	2.83%	Germany

What was the proportion of sustainability-related investments?

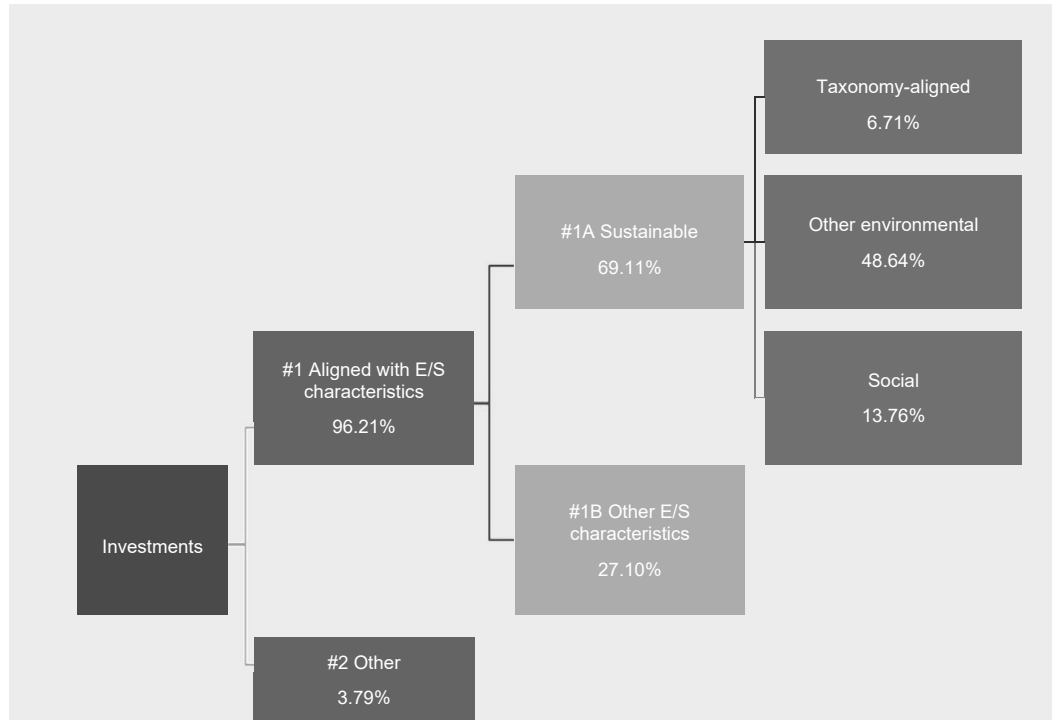

The proportion of sustainable investments was 69.11% as of 30 June 2024.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.21% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund as of 30 June 2024. The remaining portion (3.79%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 69.11% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	20.20%
Consumer Discretionary	13.76%
Financials	12.04%
Materials	9.88%
Utilities	9.53%
Consumer Staples	8.21%
Health Care	7.04%
Energy	6.13%
Information Technology	6.13%
Communication Services	3.18%
Top sub-sector	% of Assets
Banks	8.21%
Metals & Mining	7.86%
Textiles, Apparel & Luxury Goods	6.19%
Oil, Gas & Consumable Fuels	6.13%
Machinery	5.02%
Electric Utilities	4.77%
Multi-Utilities	4.76%
Electrical Equipment	4.13%
Food Products	3.87%
Automobiles	3.82%
Semiconductors & Semiconductor Equipment	3.78%
Personal Care Products	3.43%
Diversified Telecommunication Services	3.18%
Commercial Services & Supplies	3.16%
Pharmaceuticals	3.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 6.71% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of June 30, 2024.

6.71% of the Fund's investments contributed to the climate change mitigation objective.

The Taxonomy-alignment of the investments mentioned above has not been subject to an assurance provided by an auditor or a third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

Yes

No

● **What was the share of investments made in transitional and enabling activities?**

This has not been calculated.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 48.64% as of 30 June 2024.

 **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 13.76% as of 30 June 2024.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 3.79% as of 30 June 2024 and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology, subject to the active engagement of those companies to drive an improvement in the scoring to a 3 within a three-year timeframe. No companies held as of 30 June 2024 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies reporting a deterioration in the targeted KPI. Failure to report an improvement within two full years after the first publication of the KPI deterioration will result in divestment. There were no prior reference periods to measure improvement, as this Fund adopted its current policies in March 2024;
- The Fund committed to divest from companies that make no progress against sustainability KPIs over a three-year period. There were no prior reference periods to measure improvement;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.
- The Fund committed to conduct engagement with a minimum of 50% of the portfolio, measured both in number of names and in AuM. During the past year, The Investment Manager engaged with 13 holdings, or 41% of equity assets under management (as of 30 June 2024) to influence positive change related to sustainability issues. The Investment Manager also conducted engagements for change or to develop insights during the year across 29 holdings representing 84% of equity assets under management (as of 30 June 2024). The latter included discussions to confirm the Fund’s improvement targets were appropriate and consistent with the company’s strategy.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Global Bond (Euro) Fund (the "Fund")

Legal Entity Identifier: GVEB5FR7K0S8BJ1KRI44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made sustainable investments with an environmental objective: 0.00%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made sustainable investments with a social objective: 0.00%

NO

- It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.92% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds of the Fund's portfolio was constructed by supranational issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental and/or social outcomes by investing 9.92% of its portfolio in green bonds, where the use of proceeds has been specified by the issuer and verified by a third party or Franklin Advisers, Inc. (the "Investment Manager"), to benefit underlying environmental projects.

The Fund's weighted average base ESG score was 60.79 and the investment universe average base ESG score was 53.98 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 89.42% of its assets to investments aligned with the E/S characteristics over the reference period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated. Values below are as of 30 June 2024.

Sustainability KPI Name	Value
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%
The ESG score difference between the Fund's portfolio and the investment universe; and	6.81
The percentage of investments in green bonds.	9.92%

● **... And compared to previous periods?**

The values were in line with previous periods.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
Sustainability KPI Name	Value	Value
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%
The ESG score difference between the Fund's portfolio and the investment universe; and	6.81	3.34
The percentage of investments in green bonds.	9.92%	10.28%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The Fund invested 9.92% of its portfolio in green bonds, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Republica de Colombia	Government bonds	8.97%	Colombia
Government of the Republic of Korea	Government bonds	8.51%	South Korea
Kerajaan Malaysia	Government bonds	8.16%	Malaysia
Republica Federativa do Brasil	Government bonds	8.02%	Brazil
Pemerintah Republik Indonesia	Government bonds	7.43%	Indonesia
Republic of India	Government bonds	7.15%	India
Sultanate of Oman	Government bonds	6.15%	Oman
International Bank for Reconstruction and Development	Government bonds	6.02%	Supranational
United States of America	Government bonds	5.51%	United States
Romania	Government bonds	5.15%	Romania

Credit Agricole Group	Financials	3.40%	France
Arab Republic of Egypt	Government bonds	3.16%	Egypt
Gobierno de la Republica Dominicana	Government bonds	2.36%	Dominican Republic
New South Wales Treasury Corporation	Government bonds	1.71%	Australia

What was the proportion of sustainability-related investments?

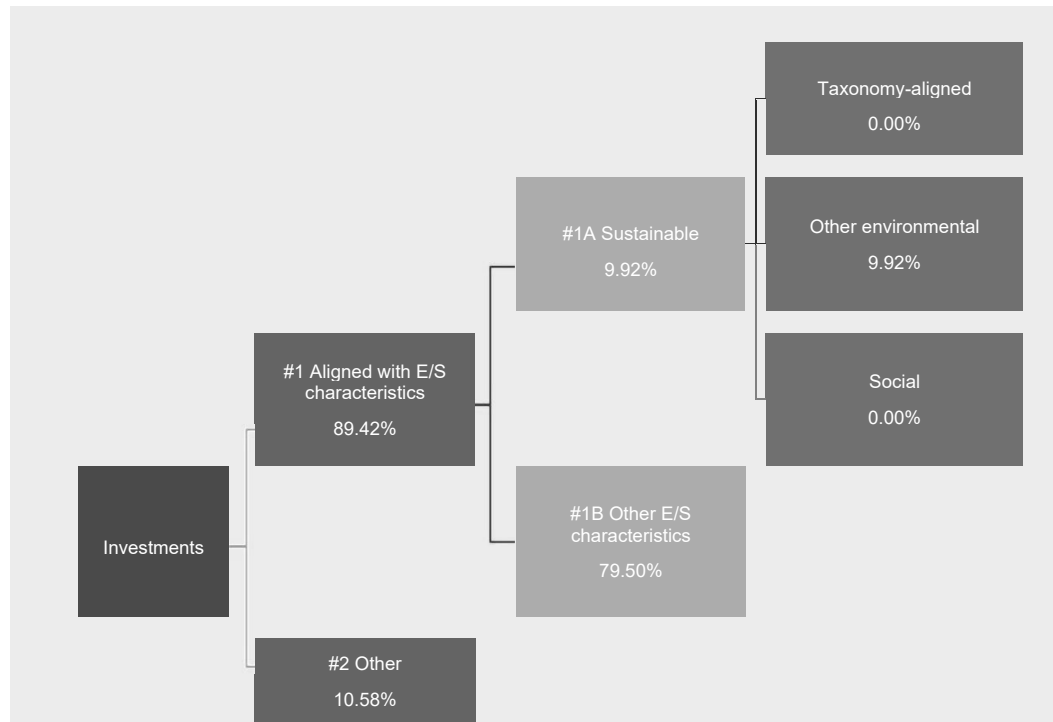

The proportion of sustainable investments was 9.92%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

89.42% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (10.58%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities and undertakings for collective investment for liquidity management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 9.92% of its portfolio in sustainable investments over the reference period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	88.95%
Top sub-sector	% of Assets
Government bonds	88.95%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 9.92% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

 **What was the share of socially sustainable investments?**

Not applicable.

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under '#2 Other' was 10.58% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities, for which there were no minimum environmental or social safeguards.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded of government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund invested more than 5% of the portfolio (9.92%) in green bonds qualifying as sustainable investments; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio is higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

 **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Global Bond Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio was constructed based on the universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universe dedicated to the supranational bonds of the Fund's portfolio was constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 65.19 and the investment universe average base ESG score was 53.99 over the reference period.

No reference benchmark was designated to attain the environmental and/or social characteristics promoted.

In this regard, the Fund allocated 88.45% of its assets to investments aligned with the E/S characteristics over the reference period.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

The sustainability indicators performed as anticipated. Values below are as of 30 June 2024.

Sustainability KPI Name	Value
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	11.20

● ... And compared to previous periods?

The values were in line with previous periods.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	11.20	10.44

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of Franklin Advisers, Inc. (the "Investment Manager")'s proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
Kerajaan Malaysia	Government bonds	8.20%	Malaysia
Republica Federativa do Brasil	Government bonds	7.17%	Brazil
Government of the Republic of Korea	Government bonds	6.93%	South Korea
Pemerintah Republik Indonesia	Government bonds	6.71%	Indonesia
Republica de Colombia	Government bonds	6.55%	Colombia
Republic of India	Government bonds	6.30%	India
New South Wales Treasury Corporation	Government bonds	4.55%	Australia
Japan	Government bonds	4.47%	Japan
Estados Unidos Mexicanos	Government bonds	4.46%	Mexico
QUEENSLAND TREASURY CORPORATION	Government bonds	4.43%	Australia
Treasury Corporation Of Victoria	Government bonds	4.42%	Australia
Bundesrepublik Deutschland	Government bonds	3.86%	Germany
United States of America	Government bonds	3.73%	United States
Republic of Singapore	Government bonds	3.58%	Singapore
Gobierno de la Republica de Panama	Government bonds	3.31%	Panama

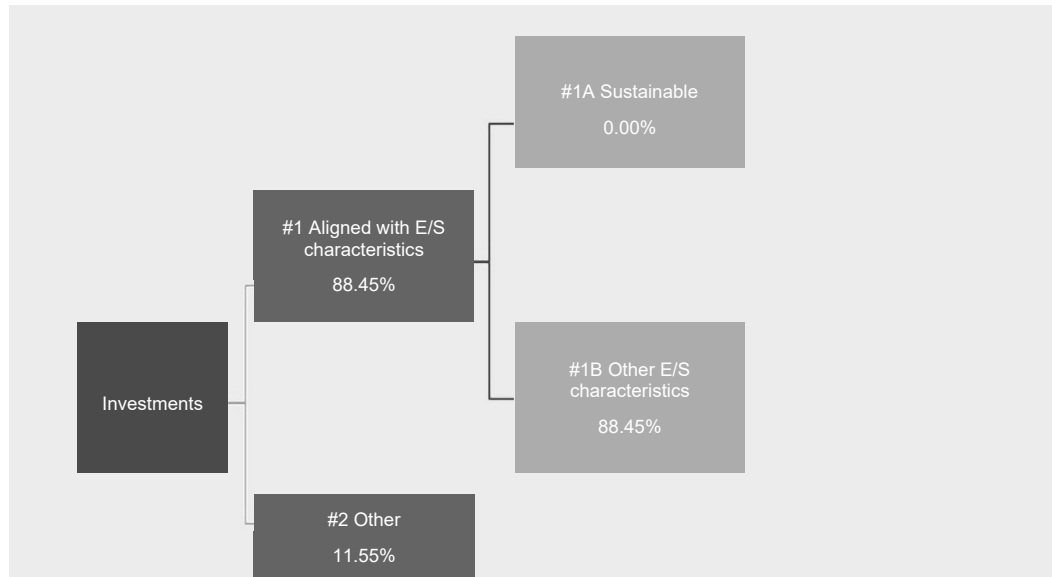

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

88.45% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (11.55%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities and undertakings for collective investment for liquidity management purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government bonds	88.31%
Top sub-sector	% of Assets
Government bonds	88.31%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

Not applicable.

- **What was the share of socially sustainable investments?**

Not applicable.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under ‘#2 Other’ was 11.55% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives and undertakings for collective investment in transferable securities, for which there were no minimum environmental or social safeguards.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**FRANKLIN
TEMPLETON**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> YES	<input type="radio"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 93.58%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment
<input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

To meet the sustainable investment objective, the Fund invested in companies that contribute towards climate change mitigation and adaptation as considered by the Paris Climate Agreement. In order to achieve the long-term global warming targets of the Paris Climate Agreement, the Fund pursued decarbonization through investments in solutions to reduce greenhouse gas emissions and in companies committed to aligning their own self-decarbonization trajectory with the 1.5-degree scenario.

The Fund did not use derivatives to attain its sustainable investment objective. Also, the Fund did not use a reference benchmark to attain its sustainable objective.

In this regard, as of 30th June 2024, 93.58% of the Fund’s assets contributed to the sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● **How did the sustainability indicators perform?**

The sustainable investment objective is considered as attained if:

1. The strategy invests in companies that reduce emissions, improve resource efficiency and limit the physical consequences of climate change. The Fund is invested in two main types of companies:

- **Solution providers:** More than 50% of the Fund is invested in companies with greater than 50% of revenues (or alternative metric such as assets) from directly or indirectly reducing emissions, resource use, climate related physical risk, e.g. renewable energy, energy efficiency, water and waste management, sustainable transportation, and sustainable forestry and agriculture.
- **Transitioning companies:** Up to 50% of the Fund is invested in companies with greater than 20% exposure to directly or indirectly reducing emissions, resource use, and/or climate related physical risk, and are transitioning to solutions providers or enabling solutions companies through adjacent products and services.

2. The strategy’s portfolio carbon impact is aligned with the Paris Climate Agreement. This is assessed using estimates of the avoided emissions resulting from climate solutions provided by companies in the strategy and the strategy’s carbon intensity trajectory.

Avoided emissions are emissions that would have been released if a particular action or intervention had not taken place, which is why the Investment Manager refers to them as potentially avoided emissions. Emissions can be avoided through the use of a more efficient product or service, though this is conditional to consumer or market behavior.

The potentially avoided emissions significantly exceeded the scope 1, 2 and 3 emissions.

The portfolio carbon intensity is projected to maintain a downward trajectory, based on company commitments and historical trends.

*Please refer to the Fund's impact report for more details on calculation methodologies.

<https://www.franklintempleton.lu/download/en-lu/educational-material/d92b92b7-fbf5-4475-a00b-0edd483858ee/Templeton-global-climate-change-fund-quarterly-impact-report.pdf>

The table below includes the KPIs from June 30, 2024.

**Carbon Intensity and Avoided Emissions Intensity were changed to Weighted Average Intensity to better align with the calculation methodology for the Principal Adverse Impact indicators in SFDR Annex 1. Previously, Carbon Intensity reflected the sum of Fund's ownership share, based on percent of equity market cap held, of the issuers' emissions divided by the sum of the Fund's ownership share of the issuers' sales. Avoided Emissions Footprint and Carbon Footprint are expressed as tCO₂e/US\$1M EVIC. For June 30, 2023, this was reported as tCO₂e/US\$1M invested. The calculation methodology remained the same, but we wished to clarify this represented the proportion of Enterprise Value Including Cash (EVIC).

Sustainability KPI Name	Value
Proportion of Fund in solutions providers*	60.30%
Proportion of Fund in transitioning companies*	33.31%
Potentially Avoided Emissions Intensity (tCO ₂ e/US\$1M sales)	-24,481.50
Carbon Intensity – Scope 1 & 2 (tCO ₂ e/US\$1M sales)	167.33
Five-year Annual Carbon Intensity Reductions Achieved (tCO ₂ e/US\$1M sales)	-6.34%
% Companies with Quantitative Greenhouse Gas Emissions Reduction Targets	91.60%
Annual Carbon Reduction Target of Companies Invested (weighted average)	-3.42%
Potentially Avoided Emissions Footprint (tCO ₂ e/US\$1M EVIC)	-4,132.78
Carbon Footprint – Scope 1 & 2 (tCO ₂ e/US\$1M EVIC)	98.01
Carbon Footprint – Scope 3 (tCO ₂ e/US\$1M EVIC)	428.66
Renewable Energy Generated (MWh/US\$1M EVIC)	130.35

● ... And Compared to Previous Periods?

The Fund has slightly higher exposure to Sustainable Investments, due to lower cash. EU Taxonomy aligned revenues are slightly higher, due to a mix of increases at the individual company level and more companies reporting alignment.

The avoided emissions footprint and intensity are smaller than the prior period, mainly due to lower weights in companies with high avoided emissions. This is consistent with a smaller amount of Renewable Energy generated by portfolio holdings compared to the prior period. The amount of avoided emissions varies significantly by company, so small changes in portfolio allocations can result in significant changes in the Fund's overall avoided emissions.

The Fund's total carbon footprint is lower due to lower scope 3 emissions footprint. The Funds weighted average carbon intensity (scope 1&2&3) is also lower.

The weighted average carbon intensity (scope 1&2) of current holdings has been reduced by a greater amount over the past five years compared to the prior period. The weighted average Fund carbon reduction target has also increased compared to the prior year. The portion of the portfolio with carbon reduction targets also increased.

The table below includes the KPIs from June 30, 2023.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
Proportion of Fund in solutions providers*	60.30%	55.04%
Proportion of Fund in transitioning companies*	33.31%	37.74%

Sustainability KPI Name	Sustainability KPI historical comparison	
	2024	2023
	Value	Value
Potentially Avoided Emissions Intensity (tCO2e/US\$1M sales)	-24,481.50	-15,742.90
Carbon Intensity – Scope 1 & 2 (tCO2e/US\$1M sales)	167.33	172.70

Exposure to controversial weapons	Percentage of Fund invested	0.00%	91.68%	0.00%	87.03%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager used a combination of third-party global norms based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. The Fund also adhered to the following exclusions:

The Fund did not invest in fossil fuel producers, producers or distributors of controversial weapons (i.e., anti-personnel mines, nuclear weaponry, biological and chemical weaponry and cluster munitions) and companies that generated 5% or more of their revenues from tobacco, conventional weapons, firearms, coal power generation, oil-based power generation, nuclear power generation, alcohol, oil services, thermal coal refining, crude oil refining, genetic engineering or palm oil, and companies that generated 1% or more of their revenues from gambling or pornography.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators and two additional indicators in its management of the Fund. The two additional indicators were:

- Environmental: Investments in companies without carbon emission reduction initiatives; and
- Social: Lack of a human rights policy.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that do not observe the main international conventions (UNGC Principles, Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund assessed and sought to mitigate the sustainability adverse impacts of investment decisions, such as a negative impact on the environment or employee safety, forced labour or bribery. Companies' strategies to reduce the adverse impact and increase the positive impact of their activities were incorporated into the ESG assessment and ratings, which may have influenced investment decisions. The Investment Manager worked to engage in efforts to address and mitigate these impacts.

For all companies, the Fund applies specific criteria to the following PAIs:

Greenhouse gas intensity;

Board gender diversity;

Exposure to fossil fuels;

Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises; and

Exposure to controversial weapons.

- Greenhouse gas intensity

As per Fund policy, companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World benchmark, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. There were no companies meeting these criteria.

- Board gender diversity

As per Fund policy, companies with no females on the board are addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest.

All companies had at least one female on the board, as of June 30, 2024. In addition, the Fund had greater board gender diversity than the benchmark, MSCI All Country World Index, and a level greater than 33%.

- Exposure to fossil fuels

As per Fund policy, fossil fuel production activities were excluded, and companies that generated 5% or more of their revenues from oil services were excluded. The Fund also did not invest in companies that derived 5% of revenues or more from the generation of electricity from nuclear power, thermal coal or crude oil.

Among companies involved in power generation, the Investment Manager favored companies with greater consumption and production of renewable energy. No portfolio companies have been structurally increasing production or capacity of coal-based or nuclear-based energy. All companies involved in power generation were increasing production or capacity of renewable energy sources, or providing related dedicated equipment or services. All derived less than 50% of their revenues from electricity generation with a GHG intensity of more than 100 g CO₂e/kWh. They also met at least one of the following criteria:

* Have a SBTi target set at well-below 2°C or 1.5°C, or have a SBTi 'Business Ambition for 1.5°C' commitment

* Have emissions intensity aligned with 1.5°C target based on a science-based alignment assessment

* Derive less than 5% of its revenues from non-renewable power or heat generation.

* Derive more than 50% of its revenues or CapEx from economic activities included in the EU Taxonomy or contribute to environmental or sustainable objectives.

* Their carbon intensity was lower than 374 gCO₂/kWh in 2022, declining to 315 in 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund remained in compliance with its exclusion policy that prohibits investments in companies the Investment Manager considered to severely breach these international norms.

- Exposure to controversial weapons

The Fund remained in compliance with its exclusion policy that prohibits investments in cluster munitions, antipersonnel land mines and biological, chemical and nuclear weapons.

PAI indicators	Unit of measurement	Value	Coverage

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 93.58%, as of June 30, 2024.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

93.58% of the portfolio contributed to the sustainable investment objective of the Fund, as of June 30, 2024. The remaining portion (6.42%) did not contribute to the sustainable investment objective of the Fund and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging purposes.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	25.92%
Materials	23.42%
Information Technology	20.62%
Utilities	12.76%
Consumer Discretionary	6.03%
Financials	3.77%

Chemicals	5.90%
Banks	3.77%
Automobile Components	3.56%
Multi-Utilities	2.93%
Interactive Media & Services	2.71%
Independent Power & Renewable Electricity Producers	2.56%
Software	2.55%
Technology Hardware, Storage & Peripherals	2.54%
Automobiles	2.47%

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The Fund invested 12.31% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy as of June 30, 2024.

The investments contributed only to the climate change mitigation objective. All other objectives were 0%.

The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy? ¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- Yes
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

This has not been calculated.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It increased to 12.31% as of June 30, 2024 from 11.30% in the prior period.

	Percentage of taxonomy-aligned investments including sovereign bonds	
	2024	2023
Turnover	12.31%	11.30%
CapEx	12.56%	10.45%
OpEx	9.18%	9.19%

	Percentage of taxonomy-aligned investments excluding sovereign bonds	
	2024	2023
Turnover	12.31%	11.30%
CapEx	12.56%	10.45%
OpEx	9.18%	9.19%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 81.27%, as of June 30, 2024.

● **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 0% as of June 30, 2024.

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 6.42% as of June 30, 2024 and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market Funds) held for liquidity purposes of the Fund as well as derivatives held for hedging purposes.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits met the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

For the avoidance of doubt, the Investment Manager ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

1. The Fund reduced the investment universe by more than 20% by excluding companies with the worst climate scores according to the Investment Manager’s proprietary methodology.

2. The Investment Manager utilized its proprietary rating system to identify companies they believe are good stewards of their impact on social and environmental development. ESG ratings have been assigned for Environmental factors, Social factors and Governance factors, which are weighted based on industry relevance to produce an overall ESG rating. They consisted of five levels from 1 (best) to 5 (worst). Below the Fund’s portfolio breakdown by the ESG rating (excluding the assets qualifying as #2 Not sustainable):

- 1: (exceptional) 8.11%
- 2: (above average) 76.09%
- 3: (average) 15.79%

4: (poor) 0.00%

5: 0.00%

The Fund is bound to maintain a weighted average ESG rating higher than the average ESG rating of the companies in the investment universe, defined as MSCI ACWI Investable Market Index (the "MSCI ACWI IMI"), based on the MSCI ESG Rating, measured numerically by the MSCI ESG score. As of June 30, 2024, the Fund's score of 7.67 exceeded the average for MSCI ACWI IMI of 5.36.

3. The Investment Manager continuously engaged with its portfolio companies. ESG engagement of the Investment Manager generally had one or more objectives:

- Develop insights into material financial, human and natural capital issues that could influence the Investment Manager's investment thesis
- Promote positive change that could lead to improved outcomes for shareholders and society

For more details on the Fund's engagement approach, please refer to the Stewardship & Sustainability Report. <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeg-sustainable-investing-report-en.pdf>

4. The Fund did not invest in companies in violation of its exclusion policies, as outlined in the pre-contractual disclosure of the Fund.

5. The Fund considered all 14 mandatory PAIs, and two additional PAIs as part of investment analysis which included indicators on energy and water efficiency, pollution and biodiversity.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Templeton Global Fund (the “Fund”)

Legal Entity Identifier: 549300ERVWDEEGCMRK51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.93% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, social impact (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity) as well as environmental impact (e.g., reduction of carbon emissions, waste management, natural resource conservation, energy use). The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favoring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.
- Committing to the exclusion of the bottom 20% of the Investment Universe based on ESG Score using the MSCI ESG Ratings Methodology

In this regard, the Fund allocated 95.08% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 63.93% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes as of 30 June 2024.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Value
Exposure to companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	63.93%
Number of investee companies with which the Investment Managers engage	48.00
Share of investee companies rated 1 (exceptional) by the Investment Managers' proprietary ESG methodology	3.00%
Share of investee companies rated 2 (above average) by the Investment Managers' proprietary ESG methodology	65.62%
Share of investee companies rated 3 (average) by the Investment Managers' proprietary ESG methodology	31.03%
Share of investee companies rated 4 (poor) by the Investment Managers' proprietary ESG methodology	0.36%
Weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	7.39
Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology	5.36
Proportion of companies in the Fund's portfolio providing employee satisfaction surveys	73.00%
Proportion of companies in the Fund's Universe providing employee satisfaction surveys	31.00%
Proportion of companies in the Fund's portfolio providing material non-compensation benefits	70.00%
Proportion of companies in the Fund's Universe providing material non-compensation benefits	50.00%
Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector	0.00%
Share of investee companies with no females on the board of directors	0.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental areas, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Industry relevant impact indicators are compared to peers and the broad investment universe to identify potentially significant positive and negative impacts. The Investment Manager identified pertinent and significant sustainability risks and used its own qualitative judgement when reviewing the PAIs indicator data, where available, to assess whether investments cause any significant harm.

In addition, the Fund applied exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, including with Fund holding Infineon Technologies, Albemarle and Veolia Environnement.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criterion as of 30 June 2024.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
ALPHABET INC.	Communication Services	4.68%	United States of America
HONDA MOTOR CO., LTD.	Consumer Discretionary	3.94%	Japan
Samsung Electronics Co., Ltd.	Information Technology	3.59%	South Korea
HCA HEALTHCARE, INC.	Health Care	3.49%	United States of America
VEOLIA ENVIRONNEMENT SA	Utilities	3.49%	France
UNITEDHEALTH GROUP INCORPORATED	Health Care	3.35%	United States of America
Signify N.V.	Industrials	3.30%	United States of America
ZIMMER BIOMET HOLDINGS, INC.	Health Care	3.26%	United States of America
THE WALT DISNEY COMPANY	Communication Services	3.11%	United States of America
FREEMPORT-MCMORAN INC.	Materials	3.07%	United States of America
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	2.94%	Taiwan
Adecco Group AG	Industrials	2.91%	Switzerland
DANONE SA	Consumer Staples	2.90%	France
T-MOBILE US, INC.	Communication Services	2.83%	United States of America
Infineon Technologies AG	Information Technology	2.68%	Germany

What was the proportion of sustainability-related investments?

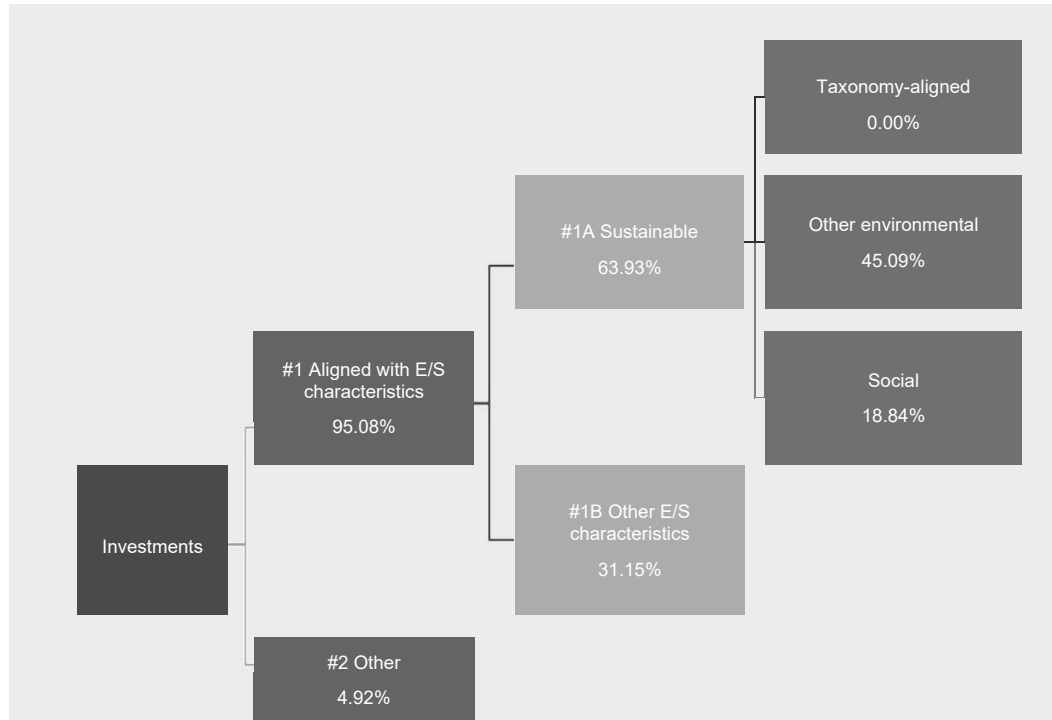

The proportion of sustainable investments was 63.93% as of 30 June 2024.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.08% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund as of 30 June 2024. The remaining portion (4.92%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 63.93% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Information Technology	16.86%
Health Care	14.93%
Communication Services	14.11%
Industrials	12.84%
Materials	10.41%
Consumer Discretionary	9.83%
Financials	7.73%
Consumer Staples	3.92%
Utilities	3.49%
Energy	2.30%
Top sub-sector	% of Assets
Semiconductors & Semiconductor Equipment	9.92%
Health Care Providers & Services	6.84%
Metals & Mining	5.20%
Interactive Media & Services	4.68%
Electrical Equipment	4.33%
Automobiles	3.94%
Food Products	3.92%
Household Durables	3.66%
Technology Hardware, Storage & Peripherals	3.59%
Multi-Utilities	3.49%
Banks	3.32%
Health Care Equipment & Supplies	3.26%
Entertainment	3.11%
Software	2.95%
Professional Services	2.91%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 45.09% as of 30 June 2024.

● **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 18.84% as of 30 June 2024.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 4.92% as of 30 June 2024 and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. One company held as of 30 June 2024 scored a 4, and we engaged the company to encourage improvements in labor practices causing the poor rating;
- The Fund excluded the bottom 20% of the Investment Universe based on the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund maintained a weighted average ESG rating of 7.39, higher than the average ESG rating of the companies in the Investment Universe, 5.36, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Templeton Growth (Euro) Fund (the "Fund")

Legal Entity Identifier: B81LB6PNE1N7LG54PJ98

**FRANKLIN
TEMPLETON**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 38.34% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favoring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.

In this regard, the Fund allocated 95.59% of its assets to investments aligned with E/S characteristics as of 30 June 2024.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 38.34% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes as of 30 June 2024.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Value
Exposure to companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	38.34%
Number of investee companies with which the Investment Manager engages	64.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	61.96%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	37.09%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	1.05%
Percent of companies held that are ranked in the worst quintile and greater than half the weighted average carbon intensity of MSCI All Country World and have no emission reduction target.	0.00%
Weighted average base ESG score of the portfolio as measured by MSCI ESG Rating Methodology	7.27
Average ESG score of the Fund's Investment Universe as measured by MSCI ESG Rating Methodology	5.39
Share of investee companies with no females on the board of directors	0.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Industry relevant impact indicators are compared to peers and the broad investment universe to identify potentially significant positive and negative impacts. The Investment Manager identified pertinent and significant sustainability risks and used its own qualitative judgement when reviewing the PAIs indicator data, where available, to assess whether investments cause any significant harm.

In addition, the Fund applied exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, including with Fund holdings Infineon Technologies, Albemarle and Bank of America.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2024.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2024.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is - 2023-07-01 - 2024-06-30.

Largest investments	Sector	% of Assets	Country
ROLLS-ROYCE HOLDINGS PLC	Industrials	3.93%	United Kingdom
ALPHABET INC.	Communication Services	3.46%	United States
Samsung Electronics Co., Ltd.	Information Technology	2.75%	South Korea
TARGET CORPORATION	Consumer Staples	2.71%	United States
MICRON TECHNOLOGY, INC.	Information Technology	2.68%	United States
UNION PACIFIC CORPORATION	Industrials	2.57%	United States
UNITEDHEALTH GROUP INCORPORATED	Health Care	2.56%	United States
THE TJX COMPANIES, INC.	Consumer Discretionary	2.51%	United States
BP P.L.C.	Energy	2.40%	United Kingdom
UNILEVER PLC	Consumer Staples	2.37%	United Kingdom
THE WALT DISNEY COMPANY	Communication Services	2.37%	United States
BANK OF AMERICA CORPORATION	Financials	2.25%	United States
MEDTRONIC PUBLIC LIMITED COMPANY	Health Care	2.22%	United States
BAE SYSTEMS PLC	Industrials	2.21%	United Kingdom
AMAZON.COM, INC.	Consumer Discretionary	2.16%	United States

What was the proportion of sustainability-related investments?

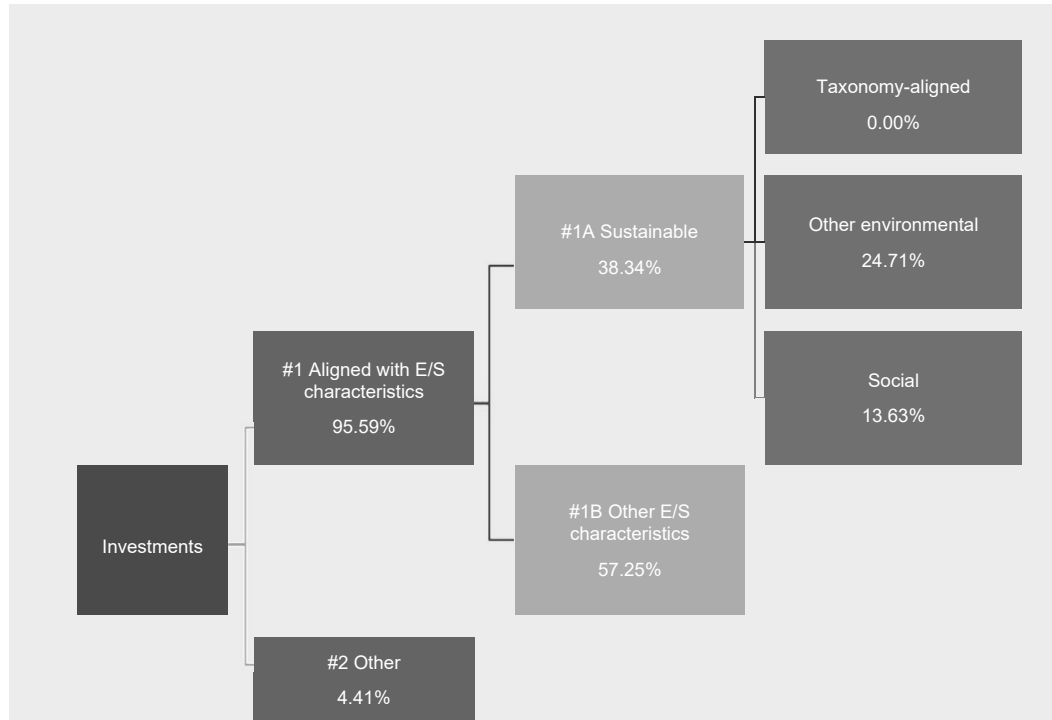

The proportion of sustainable investments was 38.34% as of 30 June 2024.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.59% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund as of 30 June 2024. The remaining portion (4.41%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 38.34% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Discretionary	18.31%
Industrials	17.31%
Information Technology	13.01%
Health Care	11.53%
Consumer Staples	10.07%
Financials	8.16%
Communication Services	7.76%
Energy	5.71%
Materials	2.63%
Utilities	0.34%
Top sub-sector	% of Assets
Aerospace & Defense	8.54%
Semiconductors & Semiconductor Equipment	6.51%
Banks	5.73%
Oil, Gas & Consumable Fuels	5.71%
Health Care Providers & Services	4.04%
Hotels, Restaurants & Leisure	3.92%
Specialty Retail	3.67%
Consumer Staples Distribution & Retail	3.56%
Automobile Components	3.55%
Interactive Media & Services	3.46%
Software	3.20%
Technology Hardware, Storage & Peripherals	2.75%
Life Sciences Tools & Services	2.65%
Pharmaceuticals	2.62%
Ground Transportation	2.57%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 - In fossil gas
 - In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 24.71% as of 30 June 2024.

 **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 13.63% as of 30 June 2024.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 4.41% as of 30 June 2024 and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. One company held as of 30 June 2024 scored a 4, and we engaged the company to encourage improvements in labour practices causing the poor rating;
- The Fund maintained a weighted average ESG rating of 7.27 as of 30 June 2024, higher than the average ESG rating of the companies in the Investment Universe, 5.36, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2024 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

 **How did this financial product perform compared to the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
