Report of the Board of Directors

The Board of Directors (the “Board”) of Franklin Templeton Investment Funds (“FTIF”, or the “Company”) is pleased to present the audited financial statements for the financial year ended 30 June 2025.

Board Composition

Name	Principal Occupation
Gregory E. Johnson	Executive Chairman FRANKLIN RESOURCES, INC.
Anouk Agnes	Independent Director
Mark G. Holowesko	Independent Director CEO and President HOLOWEKSI PARTNERS LTD
Joseph La Rocque	Independent Director
William C.P. Lockwood	Independent Director
Virginie Lagrange	Independent Director
Jed A. Plafker (<i>resigned on April 30, 2025</i>)	Executive Vice President Global Alliances and New Business Strategies FRANKLIN RESOURCES, INC.
Craig S. Tyle	Senior Legal Adviser FRANKLIN RESOURCES, INC.

Roles and Responsibilities of the Board

The responsibilities of the Board is governed by the Luxembourg law. With respect to the annual accounts of the Franklin Templeton Investment Funds (“FTIF” or the “Company”), the duties of the Directors are governed by the law of December 10, 2010 on, inter alia, the accounting and annual accounts of undertakings for collective investment and by the law of December 17, 2010, as amended, relating to undertakings for collective investment.

A management agreement between the Company and Franklin Templeton International Services S.à r.l. (the “Management Company”) sets out the matters over which the Management Company has authority under chapter 15 of the law December 17, 2010. This includes the investment management of the assets of the Company, the administration of the Company and the implementation of the Company’s distribution and marketing policies.

Prior to each Board meeting the Directors receive detailed and timely information allowing them to be prepared for the items under discussion during the meeting. For each quarterly meeting, as well as for any additional meeting where this could be relevant, the Board receives reports from, among the other contributors, the Management Company and the investment managers, as appropriate. Senior representatives for each function attend the Board meetings by invitation to enable the Directors to question the reports presented to them.

The Board has organized two sub-committees composed of Board members to enhance the level of governance and allow a more thorough and efficient review of the relevant materials and information.

The Board Operations, Valuation and Audit Committee (“BOVAC”) chaired by Ms. Lagrange is convened quarterly in conjunction with the meetings of the Board of the Directors of the Company. It receives materials, updates and insights from relevant internal and external functions, approves matters within its competences, and recommends approvals to the full Board of Directors where necessary. It reports back to the full Board of Directors at the quarterly full Board of Directors’ meeting.

Report of the Board of Directors (continued)

The Board Product Approval Committee (“BPAC”) chaired by Mr. Tyle is focused on matters relevant, or impacting shareholders, from a product standpoint. It is convened on an ad-hoc basis, it receives materials from internal and external relevant functions to instruct its decisions. It may approve matters within its competences and recommend approvals to the full Board of Directors where necessary. It reports back to the full Board of Directors at the next opportunity.

The Directors take decisions in the interest of the Company and its Shareholders, as a whole, and refrain from taking part in any deliberation or decision which may create a conflict of interest between their personal interests and those of the Company and its Shareholders.

The Prospectus and the Management Company’s policy on conflict of interest provide further details in this respect. the Management Company’s policy on conflict of interest is available at the following link:

[International Conflict of Interest Policy Overview¹](#)

The Board and its members can take independent professional advice at the Company’s expenses, where considered necessary.

THE FUND

At June 30, 2025 Franklin Templeton Investment Funds (“FTIF”, or the “Company”) had assets under management of USD 78.65 billion, up from USD 69.13 billion a year earlier.

The financial year was marked by the continued expansion of the range and depth of the Company’s offer, as detailed below. For more information on these events, please refer to Note 1.

Corporate Governance and ALFI Code of Conduct

The Board is responsible for monitoring that a high level of corporate governance is met and considers that the Company is committed to comply with the best practises and standards of the Luxembourg fund industry.

In that sense, the Board has adopted the ALFI Code of Conduct (the “Code”), which provides principles of good practice.

The Code is available at the following link:

[ALFI Code of Conduct²](#)

The Board confirms that in the course of the financial year in scope the Company has adhered to the principles of the Code and followed the recommendations provided therein.

The Board has actioned the improvements that were deemed appropriate as a result of the recurring annual review performed to ensure ongoing compliance with the Code.

Environmental Social Governance (“ESG”)

In accordance with Article 11(1) of Regulation (EU) 2019/2088, for financial products promoting environmental or social characteristics or having sustainable investments as their objective, the information on the environmental or social characteristics or sustainable investment is provided in the Additional Information section of the annual report.

Final Considerations

Thank you for investing with Franklin Templeton. Please be advised that the prospectus, the Key Information Documents (“KIDs”) or Key Investor Information Documents (“KIIDs”) and all Funds and share classes of FTIF may not be available in your jurisdiction.

If you have any queries, comments or suggestions about your investments with us please contact your financial adviser or your local Franklin Templeton office using the contact details on the last page of the report.

Report of the Board of Directors (continued)

Subsequent Events

Please refer to Note 31 for details of subsequent events after the year-end.

THE BOARD OF DIRECTORS
Luxembourg, July 2025

Report of the Investment Managers

Year to June 30, 2025

Global equities advanced during the 12 months ended 30 June 2025, despite episodes of significant volatility. Investors were generally optimistic about a soft landing for the global economy, supported by resilient growth in certain regions and monetary easing by major central banks, including the US Federal Reserve (Fed), the European Central Bank (ECB), the Bank of England (BoE) and the People's Bank of China. The Bank of Japan was an outlier, raising its benchmark rate several times during the 12-month period. Donald Trump's US presidential victory in November 2024 and potential expansionary fiscal policies boosted US equities during the fourth quarter, though concerns about his tariff plans affected global trade sentiment. During the first few months of 2025, global equities were pressured by concerns about US economic growth and trade policies. In early April, Trump's announcement of severe "reciprocal" US tariffs rattled equity markets around the world, though delayed tariff hikes later eased recession fears and led to a global equity market rally. The Israel-Iran conflict in June had minimal impact on global markets. On the economic front, global manufacturing activity showed mixed results, growing in some months and contracting in others, but ultimately ending the 12-month period in expansion territory. Global services activity consistently expanded during the period. In this environment, the MSCI All Country World Index of stocks posted a positive return in US-dollar terms for the 12 months under review. As measured by MSCI indexes in US-dollar terms, developed market equities slightly outpaced the global index and frontier market stocks significantly outperformed it, while emerging market equities modestly trailed it. In terms of investment style, growth stocks modestly outpaced their value counterparts during the 12-month period.

In Europe, stocks collectively advanced for the 12-month period, overcoming the decline seen during the second half of 2024 due to concerns about the economic outlook, earnings warnings, political turmoil in Germany and France, and Trump's tariff threats. European stocks gained strongly during the first quarter of 2025 amid signs of economic improvement, interest-rate cuts by the ECB and BoE, and optimism about a potential Russia-Ukraine ceasefire. Better-than-expected corporate earnings and increased fiscal budgets, notably in Germany, further supported sentiment. In early April, Trump's tariff announcements drove stocks lower, but they rallied as trade tensions eased. Progress in the trade negotiations between the United States and the European Union, along with a US-China tariff truce, boosted investor confidence. The eurozone's gross domestic product (GDP) grew in the first quarter of 2025 at the fastest sequential rate since the third quarter of 2022. Manufacturing activity in the currency bloc contracted during the 12-month period despite improving in the first half of 2025, while services activity expanded during most of the period. The ECB eased its monetary policy throughout the period, reducing the refinancing rate by 210 basis points (bps) to 2.15%. In the United Kingdom, GDP stalled in the third quarter of 2024 but grew sequentially in the following two quarters. The country's manufacturing activity contracted in June for nine consecutive months, while its services activity expanded during most of the 12-month period. The BoE lowered its key rate by 100 bps over four cuts to 4.25%.

US stocks collectively rose during the 12-month period, with major indexes reaching new record highs multiple times despite bouts of heightened volatility. Trump's presidential victory and the Republican Party's success in gaining a congressional majority led to optimism about a market-friendly administration. Consequently, US stocks rose significantly post-election in early November and through mid-December 2024, but gains were pared amid concerns about tariffs, trade relationships and inflation. During the first quarter of 2025, US stocks experienced substantial volatility amid worries about Trump's tariff policies and their impact on economic growth, inflation and the Fed's interest-rate path, along with concerns about a Chinese company's new artificial intelligence (AI) model. Trump's early-April "Liberation Day" announcement of significantly higher-than-expected tariffs on goods imported from nearly all countries led to fears of a recession and caused stocks to plunge. However, delays in tariff hikes, reduced recession fears, expectations of interest-rate cuts, easing geopolitical tensions and stronger-than-expected corporate earnings drove stocks higher, with the S&P 500 Index and the Nasdaq Composite Index ending the period at new record highs and the Dow Jones Industrial Average hovering near its all-time high. The Fed began lowering the federal funds target rate in September 2024 by 50 bps and followed up with two 25-bp cuts in November and December, down to a range of 4.25%–4.50%, but paused during the first half of 2025 as policymakers continued to monitor and evaluate the potential impact of tariff, immigration and tax policies. Annual inflation, as measured by the core personal consumption expenditures price index—which excludes food and energy prices and is the Fed's preferred gauge—cooled in April to the lowest level in more than four years but accelerated in May, remaining above the Fed's 2% long-run target. The country's GDP contracted in the first quarter of 2025 for the first time in three years, due largely to a significant rise in imports (which are a subtraction in the GDP calculation). Manufacturing activity contracted during most of the 12-month period, expanding only in January and February 2025 before contracting for four consecutive months. Meanwhile, except for a contraction in May, services activity expanded during most of the period.

In credit markets, sovereign bond yields were mixed over the period. The 10-year US Treasury note's yield fell 17 bps over the 12-month period to 4.23%. This was despite yields having increased between June and December 2024; some pullback in growth expectations for the United States may have supported the more recent move, which took place despite the Fed keeping rates on hold. However, eurozone government bond yields rose, including the yield on 10-year German Bunds, which ended the period 11 bps higher at 2.61%. This also contrasts to the second half of 2024, when eurozone yields fell. Much of the increase in European yields occurred after the announcement of expanded defence spending under the "ReArm Europe" Plan in March 2025, which raised some concern about fiscal expansion. The 10-year Japanese government bond yield ended June 2025 at 1.43%, 38 bps above its year-ago level, due to tighter monetary policy and a reduction of government support for bonds. Other developed market yields were mixed, as were emerging market yields, though most Asian yields fell within the latter group.

The global commodity complex posted a modest collective gain for the 12-month period, driven partly by strong price increases in natural gas, gold, silver, platinum and palladium, countered by significant declines in oil, iron ore, soybeans and sugar. The US dollar was a mild headwind during the second half of 2024 as it appreciated against a basket of its major currency counterparts, which made dollar-denominated commodities more expensive for most non-US buyers. However, the US dollar's weakness during the first half of 2025 bolstered dollar-denominated commodity prices. While precious metals and select industrial metals generally performed well during the 12-month period, oil and agricultural commodities were pressured by oversupply and concerns about weakening demand. Anticipated monetary policy easing and recovering industrial activity in some parts of the world bolstered metals in the latter part of the period, but ongoing trade tensions, geopolitical conflicts (including Iran and Israel) and supply surpluses continued to pose risks to energy and food commodities.

As we enter the second half of 2025, leading economic indicators have strengthened, suggesting resilient global growth, although some hard data has begun to weaken at the margins. Volatile US trade policy continues to fuel uncertainty, curtailing optimism towards equities despite our more positive outlook. In broad terms, we think that earnings growth expectations do not fully account for first- or second-order tariff effects, though we recognise the potential for growth in key areas such as AI. In fixed income, an improvement in some leading growth indicators offers support to credit, but we think spreads look tight enough to be considered "priced for perfection." Credit stress has marginally increased alongside higher borrowing costs, while bank lending standards have tightened in unison with tariff and inflation uncertainty. A recent uptick in geopolitical tensions could also impact inflation through higher energy prices, increasing interest-rate volatility.

THE INVESTMENT MANAGERS

July, 2025

Audit report

To the Shareholders of
FRANKLIN TEMPLETON INVESTMENT FUNDS

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of FRANKLIN TEMPLETON INVESTMENT FUNDS (the “Fund”) and of each of its sub-funds as at 30 June 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 30 June 2025;
- the statement of operations and changes in net assets for the year then ended;
- the schedule of investments as at 30 June 2025; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers Assurance, Société coopérative, 2 rue Gerhard Mercator, L-2182 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation ministérielle n°10181659)
R.C.S. Luxembourg B294273 - TVA LU36559370*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors;

- conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Templeton European Opportunities Fund, Templeton European Improvers Fund and Templeton European Small-Mid Cap Fund, where a decision to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

*Please refer to Note 1 for fund events.

The performance is based on the net asset values as calculated on the last business day of the year. Those net asset values reflect the market prices of the investments as of the last business day of the year. The performance is based on the change of the net asset value per share.

The Fund Performance disclosed in this table is the performance of the reference share class in base currency of the Fund.

Where Class A distribution "A (dis)" Shares are disclosed, the performance is calculated with all the income reinvested (total return). Information on other share classes is available on request.

[□] Unaudited figures.

¹ The launch date is for the Fund, however the reference share class launched at a later date.

² Fund performance prior to September 1996 excluded from calculation because a different portfolio allocation strategy was in use.

Information on other share classes is available on request. This report shall not constitute an offer or a solicitation of an offer to buy shares. Subscriptions are to be made on the basis of the current prospectus, where available the relevant Key Information Documents ("KIDs") or Key Investor Information Documents ("KIIDs"), a copy of the latest available audited annual report and, if published thereafter, the latest unaudited semi-annual report. The price of shares and income from them can go down as well as up and you may not get back the full amount that you invested. Past performance is no guarantee of future performance. Currency fluctuations may affect the value of investments.

Notes to Financial Statements

For the year ended June 30, 2025

Note 1 - The Company

Franklin Templeton Investment Funds ("FTIF" or the "Company") is a collective investment undertaking pursuant to Part I of the amended Luxembourg law of December 17, 2010 on undertakings for collective investment and qualifies as a société d'investissement à capital variable. The Company was incorporated in Luxembourg on November 6, 1990, for an undetermined period. At the date of this report, it offers shares in 82 sub-funds of the Company (the "Funds"). The Board of Directors of the Company may authorise the creation of additional Funds in future with different investment objectives.

The Company aims to provide investors with a choice of Funds investing in a wide range of transferable securities and other eligible assets on a worldwide basis and featuring a diverse array of investment objectives, including capital growth and income. The overall objective of the Company is to seek to minimise investment exposure through diversification and to provide Shareholders with the benefit of a portfolio managed by Franklin Templeton, according to its successful time-tested investment selection methods.

Fund Launches

Franklin Saudi Arabia Bond Fund launched on October 28, 2024.

Templeton Emerging Markets ex-China Fund launched on October 22, 2024.

Fund Closures

Franklin Emerging Market Sovereign Debt Hard Currency Fund was put into liquidation effective April 15, 2024 and closed with a final NAV on April 29, 2024. The remaining amount of cash at bank is USD 55,767 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin European Income Fund was put into liquidation effective November 6, 2020 and closed with a final NAV on November 13, 2020. The remaining amount of cash at bank is EUR 7,578 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin Global Aggregate Bond Fund was put into liquidation effective January 15, 2024 and closed with a final NAV on January 25, 2024. The remaining amount of cash at bank is USD 31,780 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin Global Small-Mid Cap Fund was put into liquidation effective January 11, 2021 and closed with a final NAV on January 18, 2021. The remaining amount of cash at bank is USD 235,052 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin K2 Long Short Credit Fund was put into liquidation effective April 30, 2021 and closed with a final NAV on May 14, 2021. The remaining amount of cash at bank is USD 116,961 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin NextStep Dynamic Growth Fund was put into liquidation effective November 27, 2023 and closed with a final NAV on December 5, 2023. The remaining amount of cash at bank is USD 2,273 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

Franklin NextStep Stable Growth Fund was put into liquidation effective November 27, 2023 and closed with a final NAV on December 5, 2023. The remaining amount of cash at bank is USD 4,931 as at June 30, 2025. The management company is monitoring the cash which will be used to cover costs linked to liquidation.

As of June 30, 2025, the above cash balances are still open and there is no Shareholder in the Funds. The cash accounts will be closed as soon as all invoices are paid. In case of remaining cash, the amount will be distributed to Shareholders that were still invested at closure.

Fund Merger

Franklin NextStep Balanced Growth Fund was merged into Franklin NextStep Moderate Fund on August 16, 2024.

- Franklin High Yield Fund: Share class was renamed from A (Mdis-pc) HKD to A (Mdis-Plus) HKD.
- Franklin High Yield Fund: Share class was renamed from A (Mdis-pc) USD to A (Mdis-Plus) USD.
- Franklin Strategic Income Fund: Share class was renamed from A (Mdis-pc) HKD to A (Mdis-Plus) HKD.
- Franklin Strategic Income Fund: Share class was renamed from A (Mdis-pc) SGD-H1 (hedged) to A (Mdis-Plus) SGD-H1 (hedged).
- Franklin Strategic Income Fund: Share class was renamed from A (Mdis-pc) USD to A (Mdis-Plus) USD.
- Franklin Strategic Income Fund: Share class was renamed from F (Mdis-pc) USD to F (Mdis-Plus) USD.
- Franklin U.S. Government Fund: Share class was renamed from A (Mdis-pc) HKD to A (Mdis-Plus) HKD.
- Franklin U.S. Government Fund: Share class was renamed from A (Mdis-pc) USD to A (Mdis-Plus) USD.
- Templeton Emerging Markets Dynamic Income Fund: Share class was renamed from A (Mdis-pc) HKD to A (Mdis-Plus) HKD.
- Templeton Emerging Markets Dynamic Income Fund: Share class was renamed from A (Mdis-pc) USD to A (Mdis-Plus) USD.

Effective September 20, 2024, the share classes listed below have been renamed:

- Franklin European Total Return Fund: Share class was renamed from S (acc) EUR to P2 (acc) EUR.
- Franklin European Total Return Fund: Share class was renamed from S (Ydis) EUR to P2 (Ydis) EUR.

Note 2 - Significant accounting policies**(a) General**

The financial statements are prepared in accordance with the regulations of the Grand Duchy of Luxembourg relating to investment funds under the going concern basis of accounting with the exception of Templeton European Opportunities Fund and Templeton European Improvers Fund which are scheduled to merge effective October 24, 2025 and Templeton European Small-Mid Cap Fund which is scheduled to merge effective January 16, 2026. Hence the financial statements for these sub-funds have been prepared on a liquidation basis. The application of the non-going concern basis of accounting has not led to material adjustments to the sub-funds published net asset value.

Note 2 - Significant accounting policies (continued)

(b) Investment in securities

Securities which are listed on a stock exchange or traded on any other organised market are valued at the last available price on such exchange or market which is normally the principal market for each security, and those securities dealt in on an over-the-counter market are valued in a manner as near as possible to that for quoted securities.

Securities not listed on any stock exchange nor traded on any organised market are valued at the last available price, or if such price is not representative of their fair value, they are valued prudently and in good faith on the basis of their reasonably foreseeable sales prices.

In accordance with the provisions of the current prospectus, Market Level Fair Valuation may be implemented to protect the interests of the Company's shareholders against market timing practices, as market timers may seek to exploit possible delays between the change in the value of a Fund's portfolio holdings and the Net Asset Value of the Fund's Shares in Funds that hold significant investments in foreign securities because certain foreign markets close several hours ahead of the US markets, and in Funds that hold significant investments in small-cap securities, high-yield (junk) bonds and other types of investments which may not be frequently traded.

The Company's directors are using several methods to reduce the risk of market timing. As at June 30, 2025, a Market Level Fair Valuation was applied to the following Funds:

Franklin Alternative Strategies Fund
Franklin Biotechnology Discovery Fund
Franklin Disruptive Commerce Fund
Franklin Diversified Balanced Fund
Franklin Diversified Conservative Fund
Franklin Diversified Dynamic Fund
Franklin Emerging Market Corporate Debt Fund
Franklin Emerging Markets Debt Opportunities Hard Currency Fund

The Company has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. In such circumstances, the price of such investment shall be adjusted in accordance with the procedures adopted, as determined by or under the direction of the Board of Directors.

During the accounting year under review, gains and losses on investment securities sold were computed on the average cost basis for all Funds with the exception of the Franklin High Yield Fund, the Franklin Income Fund, the Franklin U.S. Government Fund, the Templeton Asian Bond Fund and the Templeton BRIC Fund which were computed on the first-in, first-out basis.

During the accounting year under review, discounts and premiums were amortised to income over the year to maturity.

For mortgage-backed and other similar holdings with scheduled debt paydowns, the funds record accruals, based on their historical experience, for anticipated paydowns. Such accruals are recorded as a reduction or increase to the related holdings as disclosed on the Schedule of Investments and are included in the related unrealised appreciation/depreciation on investments shown on the "Statement of Operations and Changes in Net Assets".

Money market instruments are valued at market value.

On February 24, 2022, Russia began military operations in the sovereign territory of Ukraine. The current political and financial uncertainty surrounding Russia and Ukraine has increased market volatility and the economic risk of investing in securities in these countries and other impacted countries within the region. Due to the sanctions, actions by governments, developments in Ukraine itself and other circumstances, the Manager continues to assess the impact on valuation and liquidity and will take any potential actions needed, in accordance with the Funds' valuation policies and procedures. The Russian equity securities are priced at nil as at June 30, 2025.

Exposure within the sub-funds has been summarised as follows (exposure is limited to non-equity holdings as the equities have been fair valued at nil):

Note 2 - Significant accounting policies (continued)

(b) Investment in securities (continued)

Funds	As of	% Ukraine	% Russia	% Belarus	% Total Exposed
Franklin Emerging Market Corporate Debt Fund	30/06/2025	0.96%	0.00%	0.00%	0.96%
Franklin Emerging Markets Debt Opportunities Hard Currency Fund	30/06/2025	0.97%	0.43%	0.00%	1.40%

(c) Forward foreign exchange contracts

Forward foreign exchange contracts are valued at the forward rate applicable at the “Statement of Net Assets” date for the remaining period, until maturity. Gains or losses resulting from forward foreign exchange contracts are recognised in the “Statement of Operations and Changes in Net Assets”.

(d) Financial future contracts

The Company may enter into financial future contracts to gain exposure to market changes. A financial future contract is an agreement between two parties to buy or sell a security for a set price on a future date. Required initial margin deposits of cash or securities are maintained by a broker in a segregated account. Subsequent payments, known as variation margin, are made or received by the Company depending on the fluctuations in the value of the underlying securities. Such variation margin is accounted for as unrealised gains or losses until the contract is closed, at which time the gains or losses are reclassified to realised gains or losses. Realised and unrealised gains and losses are included in the “Statement of Operations and Changes in Net Assets”.

(e) Interest rate swap contracts

Interest rate swap contracts are used to hedge the risk of changes in interest rates and are agreements between two parties to exchange cash flows based on a notional principal amount. The net interest received or paid on interest rate swap contract agreements is accrued daily as interest income/expense.

Interest rate swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the “Statement of Operations and Changes in Net Assets”. When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of interest rate swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(f) Inflation swap contracts

An inflation swap contract is a bilateral agreement used to transfer inflation risk from one party to another through an exchange of cash flows.

Inflation swap contracts are marked to market daily based upon quotations from the market makers and the change, if any, is recorded as an unrealised gain or loss in the “Statement of Operations and Changes in Net Assets”. When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of inflation swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement. The funds had no exposure as at June 30, 2025.

(g) Cross currency swap contracts

A cross currency swap is an agreement between two parties to exchange interest payments and principals denominated in two different currencies. Cross currency swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the “Statement of Operations and Changes in Net Assets”.

Note 2 - Significant accounting policies (continued)**(g) Cross currency swap contracts (continued)**

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of cross currency swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement. The funds had no exposure as at June 30, 2025.

(h) Total return swap contracts

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains.

Total return swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

When the swap contract is terminated early, the Fund records a realised gain or loss equal to the difference between the current net present value and the executed net present value. Any outstanding interest accrual is recorded as either a net receivable or net payable.

The risks of total return swap contracts include changes in market conditions and the possible inability of the counterparty to fulfil its obligations under the agreement.

(i) Contracts for difference

Contracts for difference are contracts entered into between a broker and the Fund under which the parties agree to make payments to each other so as to replicate the economic consequences of holding a long or short position in the underlying security. Contracts for difference also mirror any corporate actions that take place.

Upon entering into contracts for difference, the Fund may be required to pledge to the broker an amount of cash and/or other assets equal to a certain percentage of the contract amount ("initial margin"). Subsequently, payments known as "variation margin" are made or received by the Fund periodically depending on fluctuations in the value of the underlying security.

The market value of CFDs is determined by the last known traded price on the exchange on which the underlying securities or assets are traded or admitted for trading. For underlying securities traded on markets closing after the time of the valuation, last known prices as of this time or such other time may be used.

Contracts for differences are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

(j) Credit default swap contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic payment for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual users.

Credit default swap contracts are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets". Any payment received or paid to initiate a contract is recorded as a liability or asset in the "Statement of Net Assets". When the swap contract is terminated early, the Fund records a realised gain or loss for any payments received or paid.

Note 2 - Significant accounting policies (continued)

(j) Credit default swap contracts (continued)

The risks of credit default swap contracts include unfavourable changes in interest rates, an illiquid secondary market and the possible inability of the counterparty to fulfil its obligations under the agreement, which may be in excess of the amount reflected in the "Statement of Net Assets".

(k) Option contracts

Options are contracts entitling the holder to purchase or sell a specified number of shares or units of a particular security at a specified price at any time until the contract-stated expiration date. Options purchased are recorded as investments; options written (sold) are recorded as liabilities. When the exercise of an option results in a cash settlement, the difference between the premium (original option value) and the settlement proceeds is accounted for as a realised gain or loss. When securities are acquired or delivered upon exercise of an option, the acquisition cost or sale proceeds are adjusted by the amount of the premium. When an option is closed, the difference between the premium and the cost to close the position is accounted for as a realised gain or loss. When an option expires, the premium is accounted for as a realised gain for options written or as a realised loss for options purchased.

The risks include price movements in the underlying securities, the possibility there may be an illiquid options market, or the inability of the counterparties to fulfil their obligations under the contract.

The Company writes options on securities, futures and interest rate swaps ("swaptions"). These options are settled in cash and subject the Company to unlimited risk of loss. The Company, however, is not subject to credit risk on written options as the counterparty has already performed its obligation by paying the premium at the inception of the contract.

The market values are recorded under "Option Contracts at Market Value" in the "Statement of Net Assets".

(l) Foreign exchange transactions

Transactions expressed in currencies other than each Fund's currency are translated into each Fund's currency at the exchange rates applicable on the transaction dates.

Assets and liabilities denominated in currencies other than each Fund's currency are translated into each Fund's currency at the appropriate exchange rates ruling at the year end. Gains and losses on foreign exchange transactions are recognised in the "Statement of Operations and Changes in Net Assets" in determining the results for the accounting year.

The reference currency of the Company as reflected in the financial statements is U.S. dollar. The principal exchange rates applied as at June 30, 2025 are as follows:

AED	3.6726	GHS	10.3500	NAD	17.7038	SEK	9.4609

The list of the currency abbreviations is available in note 29.

Note 2 - Significant accounting policies (continued)**(m) Mortgage dollar rolls**

In a mortgage dollar roll, a Fund sells mortgage-backed securities for delivery in the current month and simultaneously contracts to repurchase substantially similar (name, type, coupon, and maturity) securities on a specified future date. During the year between the sale and repurchase, the Fund foregoes principal and interest paid on the mortgage-backed securities. The Fund is compensated by the difference between the current sales price and the lower forward price for the future purchase, as well as by the interest earned on the cash proceeds of the initial sale.

Mortgage dollar rolls are marked to market daily based upon quotations from the market makers and the change in value, if any, is recorded as an unrealised gain or loss in the "Statement of Operations and Changes in Net Assets".

The difference between the current sales price and the lower forward price is treated as realised gain.

The market values are recorded under "Investment in mortgage dollar rolls at market value" or under "Open Short Positions on mortgage dollar rolls" in the "Statement of Net Assets".

(n) Income

Dividends are credited to income on their ex-dividend date. Interest income is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts, where applicable. Bank interest is credited to the funds upon receipt. Swap interest where applicable is recorded in accordance with the terms of the relevant swap deal. Sundry income are principally comprised of derivative income – net margin interest/price alignment on futures, options, accrual adjustments pertaining to consent fees.

(o) Securities lending

To the extent permitted in the relevant Fund's investment policy, a Fund may utilise, on a temporary basis, up to 50% of its assets for securities lending transactions. The volume of the securities lending transactions of each Fund shall be kept at an appropriate level or each Fund shall be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations and that these transactions do not jeopardise the management of each Fund's assets in accordance with its investment policy. The counterparties to securities lending transactions are selected following an initial analysis, and subsequent annual review thereafter, of financial statements, company announcements, credit ratings and other market information which includes general market movements. While there are no predetermined legal status, credit rating or geographical criteria applied in the selection of the counterparties, these elements are typically taken into account in the selection process. Loans will be secured continuously by collateral which must at least equal the value of the securities lent. Securities lending income is disclosed under the caption "Securities lending" in the "Statement of Operations and Changes in Net Assets". Any transaction expenses in connection with the loans are charged to the concerned Fund.

(p) Formation expenses

Formation expenses associated with the launch of the new Funds are expensed as incurred.

(q) Swing pricing

A Fund may suffer dilution of the net asset value per share due to investors buying or selling shares in a Fund at a price that does not reflect dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows.

To counter this dilution impact and to protect Shareholders' interests, a swing pricing mechanism may be adopted by the Company as part of its valuation policy.

The Fund operates a swing pricing mechanism which is applied when the total estimated capital activity (aggregate of estimated inflows and outflows) at a Fund level exceeds a pre-determined threshold, as determined as a percentage of the net assets of that Fund for the Valuation Day. Funds can operate a full swing pricing mechanism where the threshold is set to zero or a partial swing pricing mechanism where the threshold is greater than zero.

Note 2 - Significant accounting policies (continued)

(q) Swing pricing (continued)

Typically, such adjustment will increase the Net Asset Value per Share when there are net inflows into the Fund and decrease the Net Asset Value per Share when there are net outflows. The Net Asset Value per Share of each Share Class in a Fund will be calculated separately but any adjustment will, in percentage terms, affect the Net Asset Value per Share of each Share Class in a Fund identically. Swing pricing does not address the specific circumstances of each individual investor transaction.

The adjustments will seek to reflect the anticipated prices at which the Fund will be buying and selling assets as well as estimated transaction costs.

Investors are advised that the volatility of the Fund's Net Asset Value might not reflect the true portfolio performance as a consequence of the application of swing pricing.

The size of the adjustment impact is determined by factors such as the volume of transactions, the purchase or sale prices of the underlying investments and the valuation method adopted to calculate the value of such underlying investments of the Fund.

The swing pricing mechanism may be applied across all Funds of the Company. The extent of the price adjustment will be reset by the Company on a periodic basis to reflect an approximation of current dealing and other costs. Such adjustment may vary from Fund to Fund and under normal conditions will not exceed 2% of the original Net Asset Value per Share. The Board of Directors can approve an increase of this limit in case of exceptional circumstances, unusually large Shareholders trading activities, and if it is deemed to be in the best interest of Shareholders.

The Management Company mandates authority to the Swing Pricing Oversight Committee to implement and on a periodic basis review, the operational decisions associated with swing pricing. This committee is responsible for decisions relating to swing pricing and the ongoing approval of swing factors which form the basis of pre-determined standing instructions.

The price adjustment is available on request from the Management Company at its registered office.

On certain share classes, the Management Company may be entitled to a performance fee, where applicable, this will be based on the unswung NAV.

No swing pricing applied as at June 30, 2025.

During the year swing pricing adjustments affected the net asset value per share of the following Funds:

Franklin Diversified Balanced Fund
Franklin Diversified Conservative Fund
Franklin Emerging Market Corporate Debt Fund
Franklin Emerging Markets Debt Opportunities Hard Currency Fund
Franklin Flexible Alpha Bond Fund
Franklin Genomic Advancements Fund
Franklin Global Convertible Securities Fund
Franklin Gold and Precious Metals Fund
Franklin Intelligent Machines Fund
Franklin MENA Fund
Franklin Sealand China A-Shares Fund
Franklin Strategic Income Fund
Martin Currie UK Equity Income Fund
Templeton Asian Smaller Companies Fund
Templeton Emerging Markets Fund
Templeton Emerging Markets Smaller Companies Fund
Templeton Emerging Markets Sustainability Fund
Templeton European Improvers Fund
Templeton European Small-Mid Cap Fund
Templeton Frontier Markets Fund

Note 2 - Significant accounting policies (continued)**(q) Swing pricing (continued)**

Templeton Global Bond Fund
Templeton Global Leaders Fund

(r) Combined financial statements

The accounts of the Fund are expressed in U.S. dollar and the accounts of the sub-funds are kept in the currency of each sub-fund. The combined "Statement of Net Assets" and the combined "Statement of Operations and Changes in Net Assets" are the sum of the "Statement of Net Assets" and the "Statement of Operations and Changes in Net Assets" of each sub-fund converted into the currency of the Fund using exchange rates prevailing at year-end.

(s) Capital Stock Transactions – Recognition

Capital stock transactions, including subscriptions and redemptions, are recorded on a T+1 basis in the accounting records. As a result, these transactions are reflected up to the valuation day immediately preceding the Net Asset Value (NAV) date.

(t) Reverse Repurchase Agreements

A reverse repurchase agreement, often referred to as a "reverse repo," is a financial transaction in which one party purchases securities from another party with an agreement to sell them back later date. This transaction effectively allows the fund to lend cash to the counterparty, using the purchased securities as collateral, while earning interest income over the term of the agreement. The amounts lent in a reverse repo transaction are recorded in the Statement of Net Assets as a receivable under "Amounts receivable on reverse repurchase agreements" The income earned is recognised over the term of the agreement is included in the Statement of Operations and Changes in Net Assets under "Interest income on debt securities."

Note 3 - Cross Funds Investments

Some Funds may invest into shares of UCITS and other open and closed end UCIs which may include other Funds of Franklin Templeton Investment Funds. As at June 30, 2025, the following Funds held shares issued by another Fund of the Company.

		Investment in securities at market value as per Statement of Net Assets	Market value of Cross Funds investment	Investment in securities at market value after deduction of Cross Funds investments
	Currency			
Franklin Diversified Balanced Fund	EUR	147,701,409	1,312,990	146,388,419
Franklin Diversified Conservative Fund	EUR	56,308,854	1,063,684	55,245,170
Franklin Diversified Dynamic Fund	EUR	157,030,311	2,142,177	154,888,134
Franklin Flexible Alpha Bond Fund	USD	102,406,316	5,011	102,401,305
Franklin Global Multi-Asset Income Fund	EUR	94,187,719	3,026,931	91,160,788
Franklin NextStep Conservative Fund	USD	24,480,829	2,993,923	21,486,906
Franklin NextStep Growth Fund	USD	27,192,852	1,995,024	25,197,828
Franklin NextStep Moderate Fund	USD	73,166,703	6,652,989	66,513,714
Templeton Asian Growth Fund	USD	1,794,085,229	20,452,992	1,773,632,237
Templeton Emerging Markets Dynamic Income Fund	USD	97,723,248	3,283,739	94,439,509

The total combined net assets at year-end without Cross Funds investments would amount to USD 78,602,202,739.

Note 4 - Time deposits ("TDs")

As at June 30, 2025, the Company had the following cash on time deposits:

Note 15 - Investment management fees

The Management Company receives from the Company a monthly investment management fee equivalent to a certain percentage per annum (as detailed below) of each Fund's average daily net assets during the accounting year. When Funds invest in other Franklin Templeton funds, a management fee is not applied to the amounts invested. The following percentages apply in respect of the different Funds as at year end.

Note 15 - Investment management fees (continued)

The Investment Managers will be remunerated by the Management Company out of the investment management fee received from the Company.

No management fee is payable by an investor on the acquisition of Class X and Class Y shares, instead a fee is paid to the Investment Manager or affiliates under a separate agreement.

Note 16 - Performance fees

The Management Company may be entitled to receive from the net assets attributable to a share class an annual performance-based incentive fee (the "Performance Fee") which, if applicable, will be calculated and accrued daily and payable as of the end of each fiscal year.

The performance fee becomes due in the event of outperformance, that is, if the increase in the NAV during the relevant performance period (after deduction of any subscription and/or redemption fees levied) exceeds (i) the increase in the target benchmark over the same period and (ii) the applicable high water mark point as defined in the prospectus.

If Shareholders redeem all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallise on that dealing day and will then become payable.

For the purpose of the Performance Fee calculation:

High Water Mark is calculated by reference to (i) the initial launch price or (ii) the NAV as of the last valuation day which formed the basis of an accrual within the relevant performance period, for which a performance fee was paid, whichever is the higher. The high-water mark is the highest peak in value that an investment fund has reached. The high-water mark ensures the fund does not pay for recovery of past performance.

Note 16 - Performance fees (continued)

Target NAV is the High Water Mark adjusted by the daily target benchmark return, where the target benchmark is the applicable benchmark as indicated above and is expressed in the currency in which the relevant share class is denominated or hedged into.

Performance period refers to each fiscal year, except where a share class with a performance fee is launched during the fiscal year, in which case its first performance period will commence on the launch date. Please refer to the prospectus for more details.

The following performance fees apply in respect of the PF(Performance fee) shares during the year ended June 30, 2025.

Fund and Share Classes	Fund currency	Performance fees	Performance fees (amounts in Fund currency)	Percentage of average net assets	Target benchmark
Franklin Alternative Strategies Fund*					
A PF (acc) EUR-H1 (hedged)	USD	15%	–	–	Euro Short-Term Rate
A PF (Ydis) EUR-H1 (hedged)	USD	15%	–	–	Euro Short-Term Rate
I PF (acc) EUR-H1 (hedged)	USD	15%	–	–	Euro Short-Term Rate
I PF (Ydis) EUR-H1 (hedged)	USD	15%	–	–	Euro Short-Term Rate

S PF (acc) EUR-H1 (hedged)	USD	15%	195,090	0.03%	Euro Short-Term Rate

*Please refer to Note 1 for fund events.

Note 17 - Soft commission

Consistent with obtaining best execution, brokerage commissions on portfolio transactions for the Company may be directed by the Investment Managers to broker-dealers in recognition of research services furnished by them as well as for services rendered in the execution of orders by such broker-dealers.

The receipt of investment research and information and related services permits the Investment Managers to supplement their own research and analysis and makes available to them the views and information of individuals and research staffs of other firms.

Such services do not include travel, accommodation, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employee salaries or direct money payment, which are paid for directly by the Investment Managers.

Note 18 - Connected party transactions

Certain Directors of the Company are or may also be Officers and/or Directors of one or more of the various Investment Managers of the Funds, among others, Franklin Templeton Investments (Brasil) Ltd., Franklin Templeton Investments (Asia) Limited, Templeton Investment Counsel, LLC and Franklin Templeton Institutional, LLC. All transactions with connected parties were entered into in the ordinary course of business and under normal commercial terms. The investment management fees that are accrued by the Company in respect of the Management Company are detailed in note 15 to the financial statements.

There are no connected brokers in Franklin Templeton, and no transactions were entered into with connected brokers during the year ended June 30, 2025.

During the year ended June 30, 2025, the Company accrued administration and transfer agency fees and shares' maintenance and service charges in respect of Franklin Templeton International Services S.à r.l. as Management Company and Principal Distributor of the Funds.

Any investment in Cross Funds as defined in Note 3 or products issued by Franklin Templeton are made at normal market condition.

Note 19 - Taxation

Under current tax laws and practice, the Company is not liable in the Grand Duchy of Luxembourg to any taxes on income or on realised or unrealised capital gains.

Note 19 - Taxation (continued)

The Company is liable in the Grand Duchy of Luxembourg to a tax of 0.05% per annum, such tax being paid quarterly, and calculated on the net asset value of each Fund at the end of each relevant quarter (except the Franklin U.S. Dollar Short-Term Money Market Fund for which the rate is 0.01%). This tax is not applicable for the portion of the assets of a Fund invested in other undertakings for collective investment that have already been subject to such tax. Class I shares, Class J shares, Class P1 shares, Class X shares and Class Y shares may benefit from a reduced rate of 0.01% per annum if all shareholders of these share classes are institutional investors.

Investment income received or capital gains realised by the Company may be subject to tax in the countries of origin. All liabilities in respect of taxes payable on unrealised capital gains on investments are provided for as soon as there is a reasonable certainty that a liability will crystallise.

No stamp duty or other tax is payable in the Grand Duchy of Luxembourg on the issue of shares in the Company.

The Company is registered for Value Added Tax in the Grand Duchy of Luxembourg and subject to account for Value Added Tax in accordance with current laws.

Note 20 - Share classes

Class A shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00%, retained by the Principal Distributor, applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class AS shares: are offered in Singapore to CPF Investors as more fully described in the current prospectus of the Company. Class AS shares are offered at the applicable net asset value and are not subject to an entry charge. In addition, a maintenance charge of up to 0.40% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor.

Class AX shares: are offered at the applicable net asset value, plus an entry charge of up to 5.75% (except for the Franklin Diversified Conservative Fund which has an entry charge of up to 5.00%) of the total amount invested varying per asset class. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value is deducted and paid to the Principal Distributor. This charge is accrued daily and is deducted and paid monthly to the Principal Distributor. A contingent deferred sales charge of up to 1.00% applies to certain redemptions on qualified investments of USD 1 million or more within 18 months after repurchase.

Class C shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of 1.00% if an investor redeems shares within one year of purchase. In addition, a maintenance charge of 1.08% per annum of the applicable average net asset value is deducted. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other party.

Class F shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of up to 0.50% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class F shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Class G shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of 0.10% per annum of the applicable average net asset value and a servicing charge of 1.00% per annum of the applicable average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class G shares will be automatically converted into Class A shares of the same Fund free of charge on the monthly scheduled conversion date fixed by the Management Company upon or following the expiry of 36 months after the date of their purchase.

Note 20 - Share classes (continued)

Class I shares: are offered to institutional investors as more fully described in the current prospectus of the Company. Purchases of Class I shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Class J shares: are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company. Purchases of Class J shares are not subject to an entry sales charge, nor a contingent deferred sales charge or any maintenance or servicing charges.

Class N shares: are subject to an entry charge of up to 3.00% of the total amount invested. In addition, a maintenance charge of up to 1.25% per annum of the applicable average net asset value is accrued daily and is deducted and paid monthly to the Principal Distributor. Class N shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class P1/ P2 shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class P1/ P2 shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Q shares: are not subject to an entry charge but are subject to a contingent deferred sales charge of up to 3.00% if an investor redeems shares within three years of purchase. In addition, a maintenance charge of 0.50% per annum of the average net asset value are applied. These charges are accrued daily and are deducted and paid monthly to the Principal Distributor and/or other parties. Class Q shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class S shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class S shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class W shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class W shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Class X shares: are not subject to an entry charge and no management fees will be payable by an investor on the acquisition of Class X shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class X shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Y shares: are not subject to an entry charge and no management, registrar, transfer, corporate, domiciliary or administration fees will be payable by an investor on the acquisition of Class Y shares (instead a fee is paid to the Investment Manager or affiliates under an agreement between the Investment Manager and the investor). Class Y shares are offered to institutional investors in certain limited circumstances as more fully described in the current prospectus of the Company.

Class Z shares: are not subject to an entry charge, contingent deferred sales charge nor any maintenance or servicing charge. Class Z shares may be offered in certain limited circumstances as more fully described in the current prospectus of the Company.

Accumulating shares (acc): do not distribute any dividends but the income attributable is reflected in the increased value of the shares. All other terms and conditions are the same as those which apply to distributing share classes.

Distributing shares: may have different frequencies. (Mdirc) & (Mdis) share classes distribute monthly, (Qdis) share classes distribute quarterly, (Bdis) share classes distribute bi-annually and (Ydis) share classes distribute annually.

Class dirc shares: are distributing share classes with the suffix "dirc" are offered as part of a currency hedged share class.

Class Plus shares*: are distribution share classes designed to offer, under normal market conditions, dividend distribution at a pre-determined annual percentage of the Net Asset Value per Share that is not linked to income or capital gains.

Note 20 - Share classes (continued)

Performance fee classes: are classes that are subject to performance fees and are denoted by the inclusion of "PF" in their names.

Hedged share classes: In respect of hedged share classes, the Company offers the following alternatives:

- H1: in order to reduce exchange rate fluctuations and return fluctuations, the base currency exposure of the Fund is hedged into the hedged share class alternative currency.

- H2: a hedging strategy is applied in order to reduce the risk of currency movements between the currency of the hedged share class and other material currencies of the securities and cash held by the Fund.

- H4: where currency controls imposed by a country's monetary authority prevent free movement of currency ("Restricted Currency"), another hedging methodology is used. The share class is denominated in the base currency of the Fund but hedges the Fund's base currency into a specified Restricted Currency for investors in that Restricted Currency.

*Please refer to Note 1 for share class events.

Note 21 - Directors Fees

For their role and services to the Board, the Independent Directors of the Board are remunerated an aggregate amount of EUR 350,000 per annum and an additional aggregate amount of EUR 30,000 per annum for membership and activities of the Board Committees. The rest of the Board members waive any right to remuneration.

Note 22 - Expenses reimbursement

On a daily basis, for share classes where the expenses are capped, the level of expenses is calculated and compared to the cap and where the level of expenses is higher than the cap, this difference is booked as a decrease of expense (the "waiver fees"). The performance fees do not form part of the capped expenses. On a monthly basis the waiver fees are deducted from the fees received by Franklin Templeton International Services S.à r.l.

The amount of waiver fees is disclosed as "Expenses reimbursement" in the "Statement of Operations and Changes in Net Assets".

Note 23 - Other Charges

Other expenses mainly consist of legal fees, registration & filing fees, paying agent fees, tax fees and miscellaneous fee/expense.

Note 24 - Statement of changes in the investment portfolio

A list, specifying for each Fund total purchases and sales transacted during the year under review, may be obtained, upon request, at the registered office of the Company.

Note 25 - Transaction costs

Transaction costs are costs incurred to acquire and dispose of financial assets or liabilities. They include fees and commissions paid to agents, brokers and dealers. During the year ended June 30, 2025, the Company incurred the following transaction costs:

Templeton Japan Fund*	JPY	12,053,745
Templeton Latin America Fund	USD	98,876
Templeton Sustainable Emerging Markets Local Currency Bond Fund*	USD	2

*Please refer to Note 1 for fund events.

#For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

Note 26 - Equalisation

The Funds use an accounting practice known as equalisation, by which a portion of the proceeds from issues and the costs of sale of shares, equivalent on a per share basis to the amount of undistributed net investment income on the date of the transaction, is credited or charged to undistributed income. As a result, undistributed net investment income per share is unaffected by issues or redemptions of shares. However, in respect of any Fund offering only Accumulation Shares, the Board of Directors and/or the Management Company reserves the right not to apply equalisation.

Note 27 - Total Expense Ratio

The Total Expense Ratio ("TER"), expressed as a percentage, represents how the total annualised expenses of each share class relate to the average net assets of each share class for the year ended June 30, 2025. The total expenses comprise the investment management fees, maintenance and service charges, the administration and transfer agency fees, the custodian fees and other expenses. However, TER does not include performance fees as summarised in the "Statement of Operations and Changes in Net Assets".

For share classes launched during the year, the TER is annualised.

Note 28 - Global Credit facility

The Company together with other European and U.S. registered investment funds managed by Franklin Templeton (individually, "Borrower"; collectively, "Borrowers"), entered into a joint syndicated senior unsecured credit facility totalling USD 2,995 million (Global Credit Facility) to provide a source of funds to the Borrowers for temporary and emergency purposes, including the ability, to meet future unanticipated or unusually large redemption requests.

Under the terms of the Global Credit Facility, the Company will, in addition to interest charged on any borrowings made by the company and other costs incurred by the Company, pay its share of fees and expenses incurred in connection with the implementation and maintenance of the Global Credit Facility, based upon its relative share of the aggregate net assets of all of the Borrowers, including an annual commitment fee based upon the unused portion of the Global Credit Facility.

During the financial year ended June 30, 2025, the Company did not use the Global Credit Facility.

Note 30 - Additional Information

Following the invasion of Ukraine by Russia and sanctions that followed, the Russian assets held by the Fund as of February 25, 2022 were segregated from the liquid assets of the Templeton Eastern Europe Fund and allocated to seven share classes newly created on November 11, 2022 (the "Restricted Share Classes"). Shares in such new classes listed below were allocated to shareholders on November 11, 2022 in a manner to reflect their respective percentage holdings in the Fund's total NAV as of February 25, 2022. The Restricted Share Classes are closed to all subscriptions, redemptions, and switches.

Restricted Share Classes - A (acc) EUR RC, A (acc) USD RC, A (Ydis) EUR RC, I (acc) EUR RC, N (acc) EUR RC, W (acc), EUR RC, X (acc) EUR RC.

Note 31 - Subsequent events

Fund Merger

- Templeton European Opportunities Fund and Templeton European Improvers Fund are scheduled to merge into Templeton European Insights Fund on October 24, 2025.

- Templeton European Small-Mid Cap Fund is scheduled to merge into Templeton European Insights Fund on January 16, 2026.

Fund Name Changes

- Franklin Global Income Fund renamed to Franklin Global Income and Growth Opportunities Fund effective from October 10, 2025.

- Martin Currie UK Equity Income Fund renamed to Clearbridge UK Equity Income Fund effective from September 30, 2025.

Note 31 - Subsequent events (continued)

Fund Name Changes (continued)

- Templeton Global Balanced Fund renamed to Templeton Global Value and Income Fund effective from July 16, 2025.
- Templeton Global Bond (Euro) Fund renamed to Templeton Sustainable Global Bond (Euro) Fund effective from September 30, 2025.

Distressed Securities

In line with the prospectus definition, distressed securities are to be understood as including defaulted securities, and securities that are being rated CCC or below by at least 2 ratings agencies, or if unrated, their equivalent and have a credit spread above 1,000 bps. However, with respect to securities with a credit spread higher than 1000 bps (irrespective of their credit rating), the Investment Manager will proceed to additional analyses and verifications notably based on the evolution of the security's credit spread and the rating provided by other credit agencies in order to assess whether this security should be requalified as a distressed security. This procedure is further described in the Management Company's risk management process.

The exposure to distressed securities as at June 30, 2025 is as follows:

Funds	Exposure in % of Net Assets
Franklin Emerging Market Corporate Debt Fund	2.21
Franklin Emerging Markets Debt Opportunities Hard Currency Fund	3.10
Franklin Global Convertible Strategies Fund	2.32
Franklin Gulf Wealth Bond Fund	3.74
Franklin High Yield Fund	2.01
Franklin Income Fund	0.94
Templeton Global High Yield Fund	1.18

Portfolio Turnover Ratio

The portfolio turnover ratio, expressed as a percentage, is equal to the total of purchases and sales of securities netted against the total value of subscriptions and redemptions, over average net assets of the Fund for the 12 months period. It is effectively a measure of how frequently a Fund buys or sells securities.

The portfolio turnover ratio calculation is not applicable to Liquid Reserve and Money Market Funds, as such a ratio is not relevant to such Funds due to the short-term nature of the investments.

Remuneration

Franklin Templeton International Services S.à r.l. (“FTIS”), as UCITS licensed management company (the “Management Company”) has a remuneration policy (the “Policy”) in place which applies to all UCITS funds (each a “UCITS” and together the “UCITS”) under its management. The Policy has been designed to discourage excessive risk taking, integrating in its performance management systems risk criteria specific to the business units it covers. The policy has a governance structure aimed at preventing internal conflicts of interest.

There are defined procedures in place for the creation, update, review and approval of the Policy as well as for communication and implementation of the Policy. Senior Management, Human Resources, Compliance and other functions are all involved in this process and the Policy is approved by Senior Management and the Board of Directors of the Management Company.

Fixed remuneration is defined as base salary plus other benefits which may include pension contributions, life assurance premiums or private medical insurance premiums. Levels of fixed remuneration are set with reference to job complexity, level of responsibility, performance and market benchmarking data. These levels are reviewed on a regular basis.

Variable remuneration is defined as annual bonuses, long term awards in the form of performance share grants or sales bonus payments. Levels of variable remuneration are set with reference to overall corporate and business unit performance as well as individual performance.

The full Policy is available at the registered office of the Management Company. Quantitative information relevant to the Franklin Templeton Investment Funds is outlined below.

Total amount of fixed remuneration paid by FTIS and its delegates during the year ended September 30, 2024 ^{*, **, ***}	€ 45,875,596
Total amount of variable remuneration paid by FTIS and its delegates during the year ended September 30, 2024 ^{*, **, ***}	€ 39,022,179
Number of staff of FTIS and in its delegates as at September 30, 2024	601
Total amount of compensation paid by FTIS and its delegates to Senior managers during the year ended September 30, 2024 ^{*, **, ***}	€ 22,475,009
Total amount paid by FTIS and its delegates to other members of staff who have a material impact on the profile of UCITS during year ended September 30, 2024 ^{*, **, ***}	€ –

**The total amount of compensation paid by FTIS has been allocated to FTIF based on its pro rata share of the average month end total net assets of the funds under management of FTIS for the year ended September 30, 2024.*

***The total amount of compensation paid by the FTIS delegates has been allocated to FTIF based on its pro rata share of the average month end total net assets of the funds under management of the FTIS delegates for the year ended September 30, 2024.*

****Delegates are Investment Management entities which are subject to regulatory requirements that are equally as effective as those under Article 69(3)(a) of the UCITS Directive.*

Audited annual report and unaudited semi-annual reports

The audited annual reports and unaudited semi-annual reports will be available on the local Franklin Templeton website, www.franklintempleton.lu or may be obtained, free of charge, on request at the registered office of the Company. They are only distributed to registered shareholders in those countries where local regulation so requires. The complete audited annual reports and unaudited semi-annual reports are available at the registered office of the Company.

**Appendix: Sustainable Finance Disclosure Regulation
(unaudited)**

Transparency of the promotion of environmental or social characteristics and of sustainable investment objectives in periodic reports

The Sustainable Finance Disclosure Regulation ((EU) 2019/2088, the “SFDR”) requires the Company to include a description in its periodic reports of the extent to which any Fund classified pursuant to Article 8 of the SFDR (an “Article 8 Fund”) has met its environmental or social characteristics or classified pursuant to Article 9 of the SFDR (an “Article 9 Fund”) has met its sustainable investment objective. The SFDR also empowers the European Banking Authority, the European Insurance and Occupational Pensions Authority and the European Securities and Markets Authority (collectively “ESAs”) to develop draft regulatory technical standards (“RTS”) to specify the information and presentation format in the periodic reports. The following SFDR Article 8 Fund’s and Article 9 Fund’s periodic disclosures have been prepared using the common set of sustainability disclosures or reporting requirements of the RTS which came into effect on 1 January 2023. The asset classifications in the following disclosures are based upon MSCI and may differ to the classification of the securities in the Schedule of Investments.

The disclosures for each classification are outlined as follows:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund encouraged at portfolio level minimum environmental, social and governance (the "ESG") standards by targeting a weighted average ESG score greater than i) the median MSCI ESG score of the investment universe; or ii) an MSCI ESG score of 5.25, whichever was higher, based on the long exposure in the portfolio of rated securities.

Thereby, the Fund promoted environmental and social characteristics which include inter alia actions to combat climate change, reduction of pollution and waste and/or human rights.

The investment universe was defined as all issuers with a current MSCI ESG score. Holdings without MSCI attributed ESG score did not contribute to the ESG score of the Fund or its investment universe.

In addition, the Fund implemented negative screens as part of its investment process.

In this regard, the Fund allocated 57.80% of its assets to investments aligned with the E/S characteristics during the reference period.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

- The weighted average MSCI ESG score of the portfolio; and
- The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions described in the Fund's pre-contractual disclosure.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The weighted average MSCI ESG score of the portfolio	6.36	6.22	6.00
The share of investee companies having exposure to, or ties with the excluded sectors and the additional exclusions	0.00	0.00	0.00

● **... And compared to previous periods?**

The weighted average MSCI ESG score of the portfolio has increased overtime, while the portfolio has maintained zero exposure to the investment companies in excluded sectors.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts (the "PAIs") were integrated into K2/D&S Management Co., L.L.C. (the "Investment Manager") proprietary scoring model, the ESG 360 Dashboard. This ESG modelling tool takes in position level scoring from MSCI ESG and produces sleeve and portfolio scores.

The following PAIs were considered in relation to the Fund:

- Exposure to companies active in the fossil fuel sector;
- Violations of United Nations Global Compact principles (the "UNGC Principles") and Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises; and
- Exposure to controversial weapons.

The Fund monitors exposure to companies active in fossil fuels sector and targets 0% long exposure to companies which generate more than 30% of their revenues from coal production or distribution.

The Fund committed to have less than 1% long exposure in the portfolio to equities and corporate credit that violated the UNGC Principles without positive perspective. The Fund limited exposure to equities and corporate credit that violated the UNGC Principles without positive perspective to 0.31%. Furthermore, the Fund considered Violations of UN Global Compact and OECD Guidelines as part of the assessment of investee companies good governance. The Investment Manager screened the long holdings to identify securities which failed the UNGC or OECD Guidelines. The Investment Manager engaged with the Investment Co-Managers to understand the investment proposition of the security which were flagged as violating UN Global Compact or OECD Guidelines and performed an assessment of the underlying company's governance. If it was determined that the security indeed had poor governance, the security was added to the Fund's restricted list, leading the Investment Manager to divest within 90 days.

The Fund limited exposure to controversial weapons to 0%.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The Fund did not make sustainable investments during the reference period.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

57.80% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (42.20%) was not aligned with E/S characteristics and consisted primarily of asset types and securities which were considered ineligible assets within the MSCI ESG Ratings methodology.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 42.20% and included asset types and securities that were considered ineligible assets within the MSCI ESG Ratings methodology. This included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), foreign exchange and foreign exchange derivatives, interest rate swaps and UCITs eligible commodities. In addition, the Fund invested in assets that are eligible under MSCI ESG Ratings methodology, but which are not covered for the purpose of calculating an overall Fund ESG score. These assets included structured credit and short derivative positions. Lastly, no environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy can be summarized as follows:

1. The Fund committed and succeeded to reach a weighted average ESG score greater than i) the median MSCI ESG score of the investment universe; or ii) an MSCI ESG score of at least 5.25, whichever is higher. If the Fund’s score fell below 5.25, the Investment Manager rebalanced across the Investment Co-Manager’s sleeves to achieve a Fund score of 5.25 or better within 90 days.

The weighted average MSCI ESG score of the portfolio was 6.36 (and the median MSCI ESG score of the investment universe was 5.55); and

2. the Fund excluded certain sectors and companies with respect to the following criteria:

- 0% exposure to controversial weapons;
- Less than 1% long exposure to securities which fail the UNGC Principles without positive perspective;
- Less than 5% long exposure to MSCI CCC-rated securities;
- The Fund targets 0% long exposure in aggregate to (i) companies which generate more than 5% of their revenues from tobacco production or distribution and (ii) companies which generate more than 30% of their revenues from coal production or distribution. At no time will this exposure exceed 1% of long positions, and should it exceed 0%, the positions in violation of these thresholds will be removed from the Fund by the end of the calendar month following the month in which the issue is identified by the Investment Manager.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Biotechnology Discovery Fund (the "Fund")

Legal Entity Identifier: 5493008KHPRSWVVRJG60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.20% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas ("GHG") emissions). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 97.22% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTI) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 34.20%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.22% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.78%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Health Care	97.22%
Top sub-sector	% of Assets
Biotechnology	79.95%
Pharmaceuticals	12.82%
Life Sciences Tools & Services	2.71%
Health Care Providers & Services	1.74%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

3.55%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

30.65%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.78% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Disruptive Commerce Fund (the "Fund")

Legal Entity Identifier: 25490026RAMGQGPEIA14

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="checkbox"/> YES	<input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions and water usage). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.76% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally very similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believes it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund engaged with investee companies, prioritizing those where relevant greenhouse gas emissions data indicates that engagement is most impactful, to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund remained committed to engaging with companies that lacked any gender diversity, but during the reporting period no company in the portfolio was identified as laggard in terms of board diversity. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded from its investments companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="checkbox"/> YES	<input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 72.53% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 94.00% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 7 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Number of companies in the portfolio which are in top half of the Fund's corporate investment universe, defined by MSCI All Country World Index ("Fund's Corporate Investment Universe") in terms of GHG emissions	144.00	141.00
Number of sovereigns in the portfolio which are in top third of the Fund's sovereign investment universe, defined as the Bloomberg Global Aggregate Index ("Fund's Sovereign Investment Universe"), in terms of GHG emissions	9.00	10.00
Number of companies in the portfolio which are in the worst decile of the Fund's Corporate Investment Universe, in terms of GHG emissions	7.00	5.00
Number of companies in the portfolio with female board representation below 10%	3.00	11.00
Number of companies the Investment Managers have engaged with	10.00	15.00

● **... And compared to previous periods?**

During the reference period, the Fund achieved the environmental and social characteristics outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, though declined slightly on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, decreased from ten to nine compared to the previous year; however, there was a meaningful increase in percentage terms.

Total new engagement activities were lower year-on-year, with an increase in engagements focused on GHG emissions and a decrease regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 13.23% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 7 engagements focused on initiatives to reduce GHG emissions and 3 engagements focused on strengthening board gender diversity.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Diversified Conservative Fund (the "Fund")

Legal Entity Identifier: 5493006BH1R540WJNR89

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 74.36% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 97.50% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 7 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

● **... And compared to previous periods?**

During the reference period, the Fund achieved the environmental and social objectives outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, though declined slightly on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, decreased from ten to nine compared to the previous year; however, there was a meaningful increase in percentage terms.

Total new engagement activities were lower year-on-year, with an increase in engagements focused on GHG emissions and a decrease regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

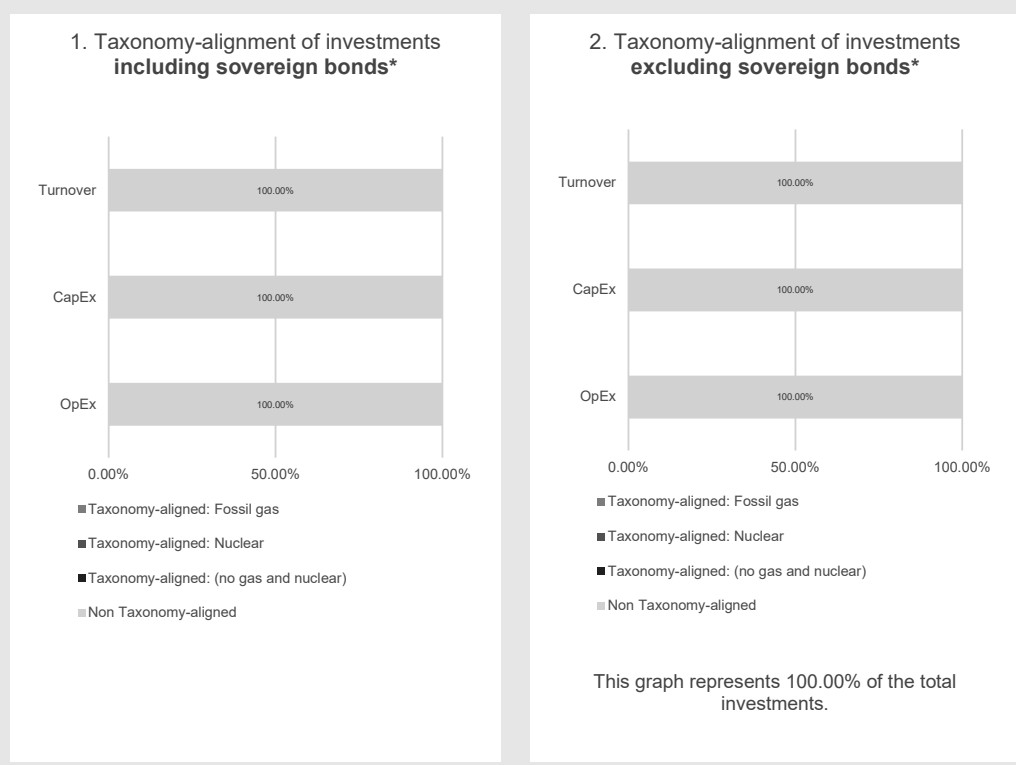

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 11.87% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 7 engagements focused on initiatives to reduce GHG emissions, and 3 engagements focused on strengthening board gender diversity.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Emerging Market Corporate Debt Fund (the “Fund”)

Legal Entity Identifier: 549300F1TXCRMRF8M59

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.28% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting all set environmental and social characteristics. The below presents the degree of success for each. The following characteristics:

- reduction of greenhouse gas emissions (GHG emissions) and facilitation of the development of sustainability-oriented financial markets in emerging economies, especially promoting transparent disclosure practices and issuance of securities with robust sustainability attributes:

In order to promote the reduction of GHG emissions, the Fund committed to engage with the issuers falling within the bottom 20% of their peer group, as determined by the proprietary tools, as measured by their greenhouse gas emissions and greenhouse gas intensity. As a part of this commitment, the Investment Managers initiated the engagement process with 16 issuers by e-mails and online meetings. During the engagement process the Investment Managers monitored the engaged position's emissions status and their efforts in meeting the presented targets.

The Fund refrained from investing in issuers whose exposure to fossil fuel extraction exceeded the Investment Managers' acceptable limit, as described in the Fund's pre-contractual disclosure: any company, which derives more than 5% of its revenue from thermal coal production is deemed not investable.

Additionally, the Fund invested in ESG themed bonds, which drives the demand for these instruments, influencing the development of sustainability-oriented financial markets in emerging economies.

The Investment Managers dispatched annual written communications to issuers, encouraging them to voluntarily report Principal Adverse Impact (PAI) indicators for year 2024 and is on target with their commitment to engage with issuers that were failing to disclose mandatory PAIs indicators for year 2025. Such reporting translates into increased market transparency, which is especially important in jurisdictions with weaker regulatory reporting requirements. In addition, to the committed GHG engagement and letters related to PAIs reporting, the Investment Managers conducted various engagements with issuers related to other topics, such as biodiversity and water management, amongst others.

- Fair and sound labour practices:

The Investment Managers observed the issuers against repeated and serious violations of the United Nations Global Compact (UNGC) principles, Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations (UN) Guiding Principles on Business and Human Rights, by monitoring factors including labour practices

and responsible corporate governance. In addition, Investment Managers monitored child labour violations. There were no issuers identified within the Fund that were potentially involved in such violations.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the E/S characteristics promoted performed as follows:

Sustainability KPI Name	Value
Percentage of the Fund's net assets invested in green bonds	10.83%
Percentage of the Fund's net assets invested in social bonds	0.00%
Percentage of the Fund's net assets invested in sustainability bonds	2.45%
Percentage of the Fund's net assets invested in sustainability-linked bonds, or Sustainable Development Goals (the "SDGs") bonds	4.94%
Percentage of the Fund's net assets invested in issuers falling under ESG exclusions	0.72%
The number of issuers with which the Investment Managers engage	40.00

● **... And compared to previous periods?**

In the current reference period that concluded on 30 June 2025, the Fund's average allocation into the ESG-themed bonds slightly decreased compared to the previous reference period. The ESG-themed bonds allocation as of 30 June 2024, stood at 18.78%, while as of 30 June 2025, it was 18.22%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 11.07%, while the average allocation increased to 13.28% in the fiscal year ending 30 June 2025. As of 30 June 2024, the average allocation of green bonds stood at 9.12%. Over the fiscal year ending 30 June 2025, this allocation increased to 10.83%. Similarly, for sustainability bonds, the average allocation as of 30 June 2024, was 1.95%, which also saw a rise to 2.45% throughout the fiscal year ending on 30 June 2025. Additionally, the average allocation of sustainability-linked bonds as of 30 June 2024, stood at 7.71%, and throughout the year it decreased resulting in the average allocation of 4.94% as of 30 June 2025.

At the end of the previous reference period, the fund had no exposure to, or tying with excluded sectors and additional exclusions. At the end of the current reference period, the fund had 0.72% exposure to, or tying with excluded sectors and additional exclusions. Considering that this event took place at the conclusion of the current reference period, the Investment Managers will proceed to divest from such security as soon as reasonably practicable. This action will be taken in the best interest of the Shareholders and in accordance with the binding date stipulated in the pre-contractual disclosure.

During both reference periods, the Investment Managers have been active in the field of sustainability engagement, with 93 issuers engaged in the previous reference period and 40 in the current reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, impact on biodiversity; or
- The development of a circular economy;

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport, pollution prevention and control and efficient buildings among others. Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

Power Finance Corporation Ltd. (PFC) has actively facilitated the financing of renewable energy assets in accordance with the "Eligible Projects" criteria outlined within its Green Bond Framework. Notably, PFC has played a pivotal role in supporting the growth of India's renewable energy sector by underwriting and disbursing funding for large-scale solar and wind installations with an aggregate installed capacity of 9,324 MW. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of production of renewable energy and reduction of greenhouse gas emissions.

Another example is the green bond issued by the Pakistan Water and Power Development Authority (WAPDA). WAPDA has advanced renewable energy finance through strategic hydropower development. The commissioning of the Tarbela Fourth Extension (T4) project has resulted in an estimated avoidance of 20 million tonnes of CO₂ equivalent (CO₂e) emissions, while the Dasu Hydropower Project (HPP) is projected to achieve a cumulative CO₂e avoidance of approximately 233 million tonnes. These initiatives underscore WAPDA's instrumental contribution to sustainable infrastructure development and emissions reduction. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of production of renewable energy and reduction of greenhouse gas emissions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary tools and qualitative research to ensure alignment with the Do No Significant Harm (the 'DNSH') principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

The "Investment Universe" was defined as primarily fixed and floating rate debt securities and debt obligations which were located in emerging market countries and/or deriving a significant proportion of their economic activity from developing or emerging countries.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining (quasi- and sub-sovereign) issuers in the universe according to their environmental performance including greenhouse gas emissions and intensity.

Another tool, ESG Credit App ranked the corporate issuers based on their greenhouse gases emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gas emission, the emitters historic trajectories, Science Based Targets initiative (SBTi) targets, etc.

Additionally, quasi- and sub-sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in green bond whose use of proceeds targeted the development of renewable energy sources, e.g. (solar, PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by quasi- and sub-sovereign entities, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investible, the Investment Managers did not invest or, if already invested, the Investment Managers divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Guiding thematic engagement; and
- Applying exclusions.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage with corporate issuers actively held by the Fund, which were considered as laggards and scored in the bottom 20% of the investment universe within their sector in terms of greenhouse gas emission and greenhouse gas intensity metrics, with the aim to improve the risk-management they apply in these areas. In addition,

the Investment Managers are on target with their commitment to engage with issuers that were failing to disclose mandatory PAIs indicators by sending yearly written requests.

Applying exclusions

The Fund considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions as detailed in the pre-contractual disclosure of the Fund.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

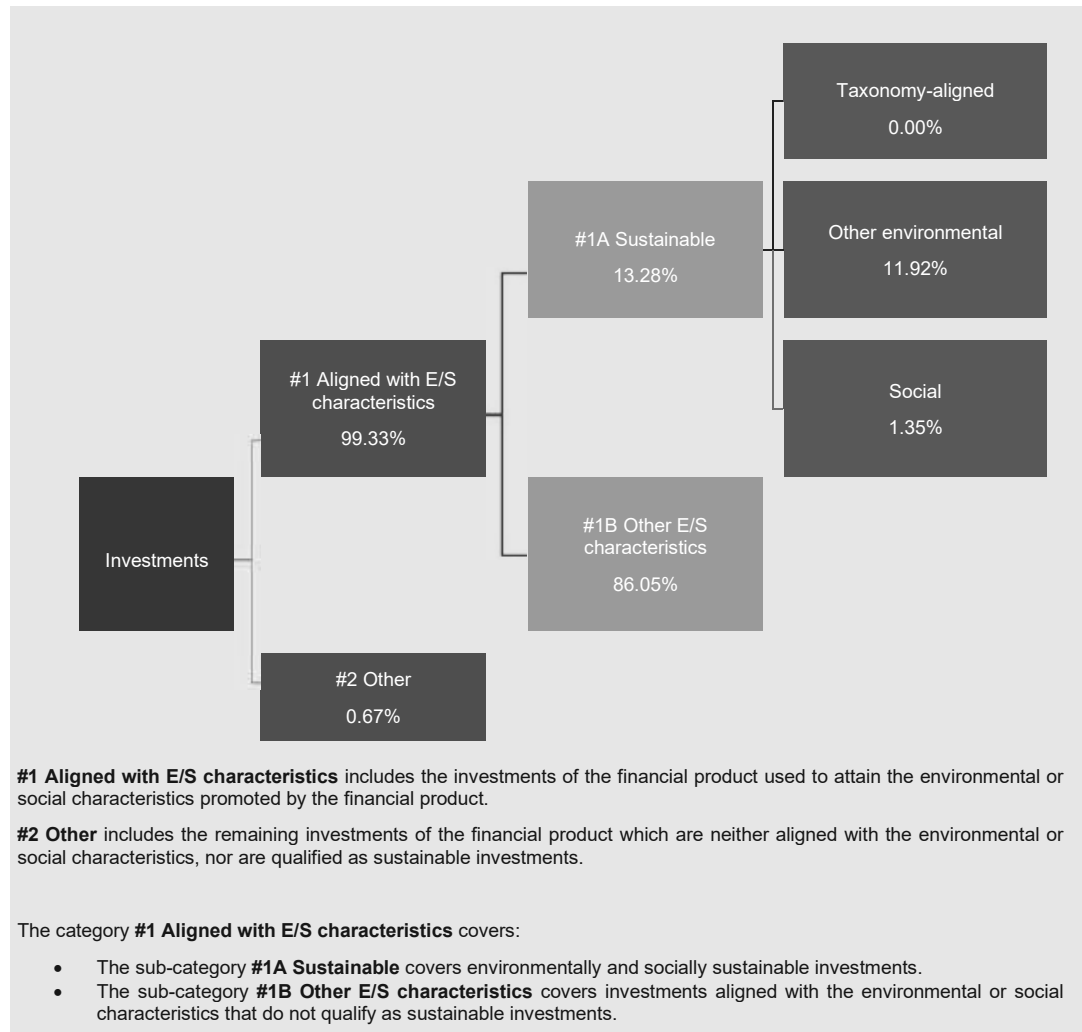

The proportion of sustainable investments was 13.28%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.33% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.67%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund, as well as derivatives held for hedging, efficient portfolio management or, on an ancillary basis, for investment purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.33% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 13.28% of its portfolio in sustainable investments.

● ***In which economic sectors were the investments made?***

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.92%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.35%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.67% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management purposes, or, on an ancillary basis, for investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.33% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders, among others. By employing these methods, the Fund has effectively attained its committed environmental and social characteristics.

The aforementioned actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were as follows:

1. The Fund allocated a portion of its net assets to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application), which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then included in an engagement process.
3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement. Engagement activities were conducted with issuers using a variety of methods including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Euro Government Bond Fund (the "Fund")

Legal Entity Identifier: 0YX4QFLYLSHIYAKFZJ30

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 89.64% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 46.75%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe.

The average GHG intensity of the investee countries (Principal Adverse Impact ("PAI") indicator 15) for the Fund was 191.55, while the benchmark was 177.85. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 236.26.

To further promote these characteristics, the Investment Manager engaged with various sovereign issuers to discuss the reduction of GHG emissions in their national economy.

(iii) biodiversity protection:

The Investment Manager has actively engaged with a range of sovereign issuers to emphasize the critical need for the conservation and protection of biodiversity, including engagements with SSA issuers. The Investment Manager, furthermore, has actively promoted best practices in biodiversity protection by investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Government Bond Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023

... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes types of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

As of 30 June 2024, the average allocation of green bonds stood at 46.81%. Over the fiscal year ending 30 June 2025, this allocation increased to 54.19%. Similarly, for social bonds, the average allocation as of 30 June 2024, was 5.66%, which also saw a rise to 6.40% throughout the fiscal year ending on 30 June 2025. The aforementioned bonds issued by sovereign issuer stood at 29.05%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 53.17%, while the average allocation increased to 89.64% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 23.76%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 46.75%.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2024, the average ESG score of the portfolio was 6.65 while the ESG average score of the investment universe was 6.39. Where throughout the fiscal year ending on 30 June 2025, the average ESG score of the portfolio was 6.72, while the average ESG score of the investment universe was 6.65.

At the end of the current and previous reference periods, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

During both reference periods, the Investment Manager has been active in the field of sustainability engagement, with 10 issuers engaged in the previous reference period and 16 in the current reference period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions.

Another example is a green bond issued by the Republic of Italy with a particularly interesting projects to shift freight transport from road to rail with sophisticated environmental design techniques. The Trento Railway Bypass Project aims to boost freight capacity along the Scandinavian-Mediterranean Corridor, primarily via an underground route. Its focus is on shifting freight from road to rail to cut CO₂ emissions and support sustainable logistics. The project features thorough environmental assessments, including noise, biodiversity, and landscape impacts, with strong mitigation measures like reusing 93% of excavated materials. Designed to complement local sustainability initiatives, the bypass is expected to reduce road traffic and emissions while aiding urban regeneration. Thanks to the proceeds to date, 3,074,000 tonnes of CO₂ per year have been avoided. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of greenhouse gas emissions.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers subject to social violations, which were excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,

or

- was deemed "Not Free" by Freedom House

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by governments, government-related entities and supranational entities and the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting the Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund invested in bonds issued by governments, government-related, and supranational issuers deemed by the Investment Manager to be Environmental Champions.

Environmental Champions were identified using a proprietary ESG ranking. The Energy and Environmental Transition Index (the "EETI") ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix.

Restricting the Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI were excluded from the Fund's portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions.

Across the entire portfolio (excluding liquid assets and derivatives used for hedging and efficient portfolio management purposes and as applicable to the asset class), The Fund also considered social violations for the purpose of applying specific ESG exclusions.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Bundesrepublik Deutschland Bundesanleihe 2.3% 02/15/2033 REG S	Government Bonds	8.15%	Germany

What was the proportion of sustainability-related investments?

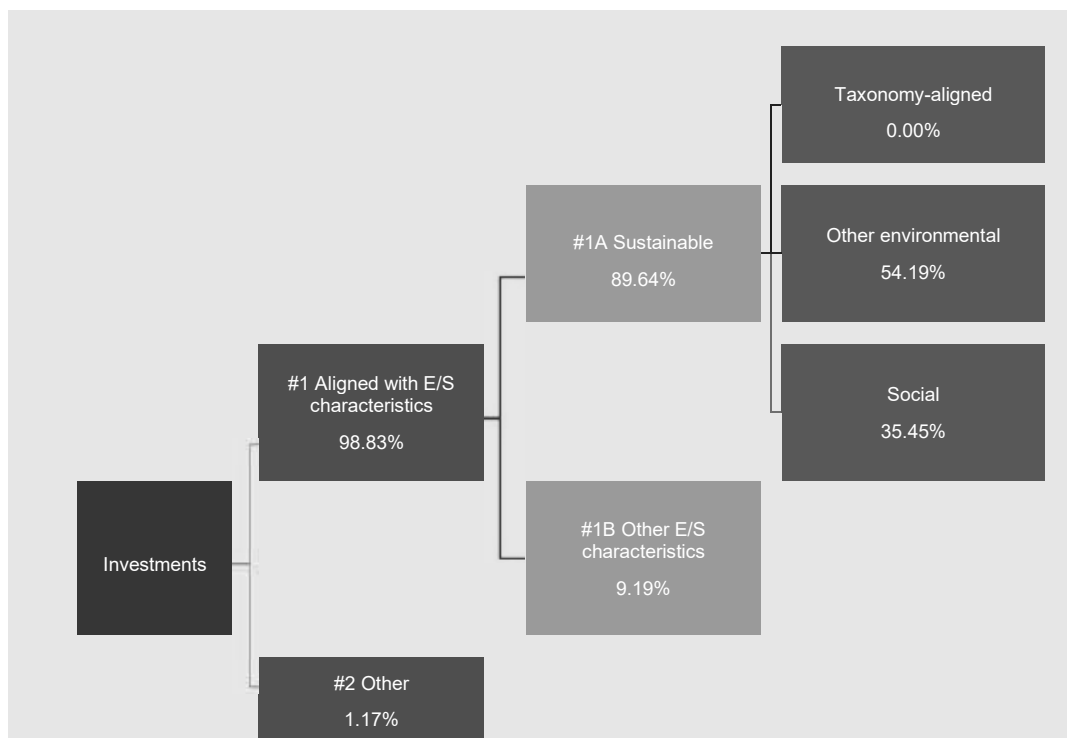

The proportion of sustainable investments was 89.64%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.83% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (1.17%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging and efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 89.64% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	98.83%	97.85%	99.07%
#2 Other	1.17%	2.15%	0.93%
#1A Sustainable	89.64%	53.17%	34.96%
#1B Other E/S characteristics	9.19%	44.68%	64.11%
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	54.19%	46.81%	31.52%
Social	35.45%	6.36%	3.44%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	96.62%
Financial Services	2.21%
Top sub-sector	% of Assets
Government Bonds	96.62%
Financial Services	2.21%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 54.19%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 35.45%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.17% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging and efficient portfolio management purposes.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Manager used proprietary ESG IT solutions (including the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.

3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

5. The Fund maintained its ESG score at Fund level higher than the ESG score of the investment universe throughout the entire fiscal year period described.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Euro High Yield Fund (the “Fund”)

Legal Entity Identifier: A3OFOMMYV8PYF37HFY49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.91% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An “Environmental Champion” is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund’s average allocation to Environmental Champions stood at 21.99%.

Moreover, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers’ acceptable limit (as described in the Fund’s pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the Fund’s average GHG intensity of the investee companies – Principal Adverse Impact (PAI) indicator 3 (Scope 1, 2 and 3 emissions) - was 597.29, while for the benchmark it was 905.24. The average Scope 1 + 2 GHG intensity for the Fund was 92.91, compared to 156.09 for the benchmark. Therefore, the portfolio’s GHG intensity—both in terms of total emissions and Scope 1+2 emissions—is lower than its benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

To further promote these environmental characteristics, the Investment Managers actively engaged with issuers to encourage reduction of GHG emissions.

(ii) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations (UN) Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

(iii) products and services without negative societal effects:

The Investment Managers included a negative screen and set of exclusions as part of the investment process to assess the investments toward to societal effects these could have. The issuers were screened toward protection of international human rights; no complicity in human rights violations; respect for freedom of association and the right to collective bargaining; elimination of forced labour; abolition of child labour; elimination of discrimination in respect of employment and occupation; working and/or standing up against corruption in all its forms; manufacture or distribute nuclear weapons or controversial weapons defined as anti-personnel mines, biological & chemical weaponry; or those that manufacture components intended for use in such weapons; manufacture conventional weapons; those that derive revenue from such products that exceeds the Investment Managers' threshold (5%); manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Managers' thresholds (5%); adhere to the bespoke list of gambling companies, that are set according to the bespoke gambling policy. The Investment Managers have monitored the issuers in respect to the abovementioned exclusions and confirmed that no security is breaching any of the specific factors on a pre-deal basis and during the time the security is a part of the portfolio.

In terms of related PAI metrics, the average violations of the UNGC Principles and OECD Guidelines (PAI indicator 10) of the Fund's portfolio indicated no violations recorded for the covered companies, compared to 0.01 for the benchmark. The average exposure to controversial weapons of investee companies (PAI indicator 14) indicated no exposure recorded for both the Fund and the benchmark. Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers considers stronger performance of both PAI indicators 10 and 14 compared to the benchmark as a favourable contribution towards promoting social characteristics.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark ICE BofA Euro High Yield Constrained. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators during the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

● ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

The Fund maintained its percentage allocation in sustainable investments with a slightly higher average allocation at the end of the current reference period.

As of 30 June 2024, the average allocation of green bonds stood at 9.90%. Over the fiscal year ending 30 June 2025, this allocation increased to 11.22%. For social bonds, the average allocation as of 30 June 2024, was 1.16%, which saw a slight decline to 1.04% throughout the fiscal year ending on 30 June 2025.

Overall, the percentage of investment in green, social and sustainable bonds at 30 June 2024 was 12.35%, while the average allocation increased to 12.91% in the fiscal year ending 30 June 2025.

As of 30 June 2024, the exposure to Environmental Champions was at 24.01%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 21.99%.

At the end of the current and previous reference periods, the Fund had no exposure to, or tying with excluded sectors and additional exclusions.

During both reference periods, the Investment Managers have been active in the field of sustainability engagement, with 118 issuers engaged in the previous reference period and 54 in the current reference period.

At the end of the current and previous reference periods the weighted average ESG score of the Fund was performing better than the weighted average ESG score of the investment universe. As of 30 June 2024, the average ESG score of the portfolio was 6.32, while the ESG average score of the investment universe was 5.85. Where throughout the fiscal year ending on 30 June 2025, the average ESG score of the portfolio was 6.49, while the average ESG score of the investment universe was 5.93. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

The sustainable investments supported these objectives by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, reduce GHG emissions, lower impact of economic activities on biodiversity, foster social cohesion, build good labour relations, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

The first example is the social bond issued by the Spanish multinational bank CaixaBank SA. Through the financing of projects aligned with the bond's framework, an estimated 10,341,912 individuals have reportedly benefited—gaining access to job support, education, healthcare services, and other essential resources. Bank financing is pivotal in fostering the growth of micro, small, and medium-sized businesses in Spain's most economically disadvantaged regions. By targeting areas in the bottom 30th percentile or those with high unemployment rates, this support helps uplift local economies. Through loans to NGOs and private social projects, these initiatives aim to create a more inclusive society. By enhancing access to public or subsidized healthcare services, emergency medical care, and disease control programs, as well as training professionals in these sectors, these efforts contribute to healthier communities. MicroBank's Family Microcredit program, updated annually based on economic indicators, stands out as a testament to empowering low-income families through tailored financial solutions. Through these concerted efforts, financing local social projects embodies a commitment to positive social change, fostering sustainable growth, and reducing disparities across various facets of society. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of tackling inequalities and fostering social cohesion, social integration, good labour relations; and investments in human capital, including disadvantaged communities.

Another example is a green bond issued by Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Fund, the company consulted over 500 individuals, whose insights were key in shaping the fund's criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Managers did not invest or, if already invested, the Investment Managers divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Guiding thematic engagement; and
- Applying exclusions

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using a proprietary ESG ranking:

- The ESG Credit App ranked corporate issuers based on their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gas emissions, emitters' historic trajectories, Science Based Targets initiative (SBTi) targets, etc.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 12.91%.

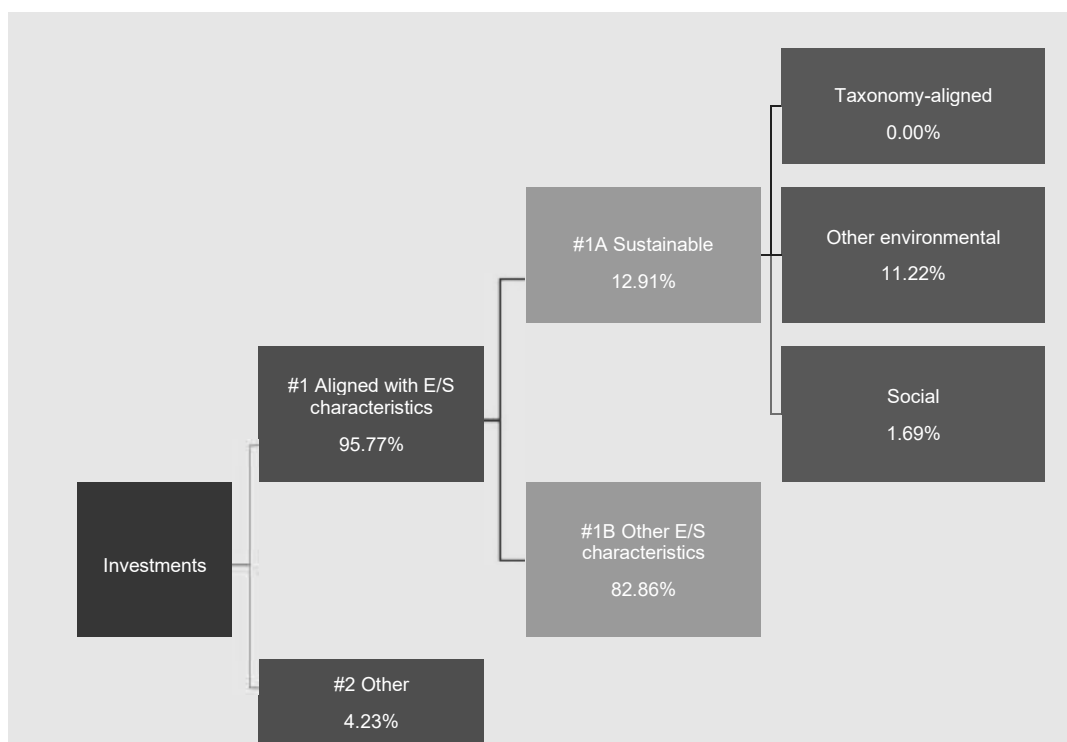

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.77% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (4.23%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), and derivatives held for hedging purposes, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 95.77% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 12.91% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	95.77%	96.34%	92.12%
#2 Other	4.23%	3.66%	7.88%

Machinery	2.04%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

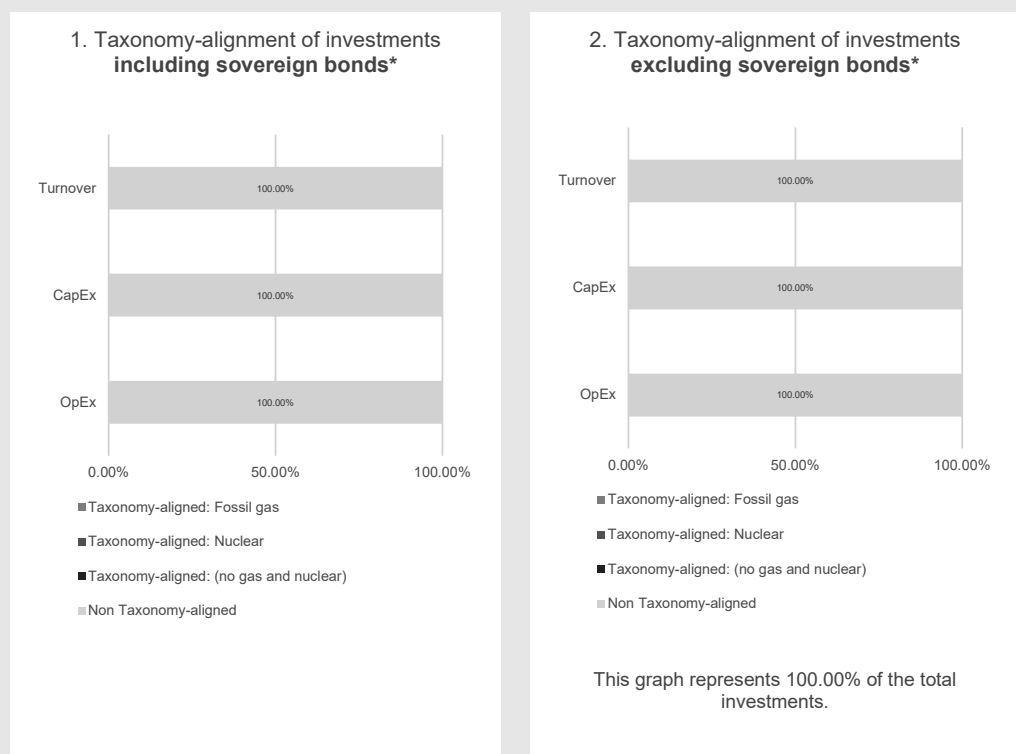

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.22%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.69%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 4.23% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives for hedging, efficient portfolio management purposes and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 95.77% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used a proprietary IT tool (the ESG Credit App), which identified the issuers determined as the so called Environmental Champions. Environmental Champions are defined as corporate issuers ranked within the top 20% of their peer industry group by the ESG Credit App
4. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
5. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and distribution of questionnaires as part of broader cross-sectional engagement. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.
6. The Fund maintained its ESG score at Fund level higher than the ESG score of the investment universe throughout the entire fiscal year period described.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin European Corporate Bond Fund (the “Fund”)

Legal Entity Identifier: 0JRKFOGJGO9U5HR6QY84

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.13% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An “Environmental Champion” is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund’s average allocation to Environmental Champions stood at 35.72%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers’ acceptable limit (as described in the Fund’s pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact (“PAI”) indicator 3) for the Fund was 476.42, while for the benchmark it was 791.17. The average Scope 1+ 2 GHG intensity for the Fund was 46.03, compared to 110.79 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in ‘use of proceeds’ instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 40.88%, compared to 40.27% for the benchmark. The average unadjusted gender pay gap (PAI indicator 12) of investee companies was 14.06% for the Fund and 13.80% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Managers view the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 15.50%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro-Aggregate: Corporates Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

Sustainability KPI Name	Sustainability KPI historical comparison

... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

During both reference periods, the Fund maintained its percentage allocation in sustainable investments, with a slightly lower average allocation at the end of the current reference period. As of 30 June 2024, the average exposure to green bonds was

28.98%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 27.00%. The average exposure to social bonds decreased from 5.97% in the previous reporting period to 5.89% at the end of the current period.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 35.91%, while the average allocation decreased to 33.13% in the fiscal year ending 30 June 2025. Despite the decline, the Investment Managers note that the average exposure to remains above 30%.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 30% of portfolio in sustainable investments as stipulated in precontractual disclosure.

As of 30 June 2024, the exposure to Environmental Champions was at 39.33%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 35.72%.

At the end of the current and previous reference periods, the fund had no exposure to, or tying with excluded sectors and additional exclusions.

The number of issuers that Investment Managers engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments.

The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as fostering social cohesion.

Next, Telia. Telia's smart public transport project exemplifies the green digital solution category that brings benefits to passengers, drivers, and operators. It's a comprehensive solution using the Telia IoT Edge onboard processor and a cloud-based platform to deliver a suite of digital services. These services aim to make public transport more efficient, sustainable, and user-friendly for all. A pioneering example funded under the umbrella is its "5G ride" project in Stockholm in collaboration with partners like Ericsson and Keolis, Telia deployed 5G connected autonomous electric minibuses. Telia's high-speed, low latency 5G network was crucial for enabling safe real-time communication between self-driving vehicles and a remote-control tower, demonstrating a key step towards future autonomous public transport systems. With the proceeds to date, 61,000 MWh of energy has been saved annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of greenhouse gas emissions.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuers from the investment universe.

Another tool, ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, Science Based Targets

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

initiative ("SBTi") targets. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments were aligned with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights. Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using proprietary ESG rankings: the ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data points such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi targets.

Restricting Fund's investable universe

Issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 33.13%

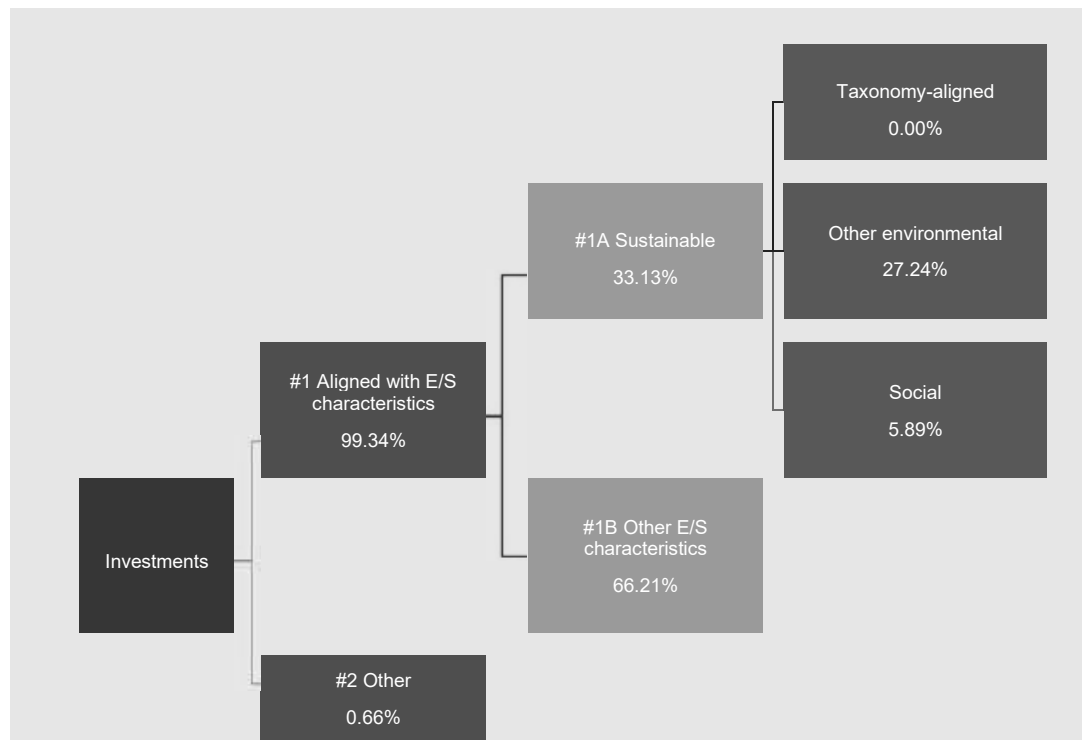

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.34% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.66%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.34% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 33.13% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.24%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 5.89%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.66% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund and derivatives held for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.34% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.
2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.
3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.
4. The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin European Social Leaders Bond Fund (the “Fund”)

Legal Entity Identifier:
254900RZI399MM1QMA22

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 96.09%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised social bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with a social objective. This objective was predominantly met by investing in social bonds, which constituted 90.43%. Through these investments, the Fund supported various positive social outcomes, such as, but not limited to, social cohesion, social integration, labour relations, and investments in economically or socially disadvantaged communities. The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 836 people benefiting from social projects, c. 424 people benefiting from access to healthcare services, c. 236 people benefiting from access to transport, c.76 people benefiting from access to water or sanitation, c.34 students benefiting from access to education c.33 people from underprivileged areas, c.10 people benefiting from access to power, as well as c.71 jobs saved or maintained per every million of Euro invested (data as of 31 Dec 2024).

The top five Sustainable Development Goals ("SDGs") to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 3 Good Health and Well-Being (71%), SDG 10 Reduced Inequalities (71%), SDG 8 Decent Work and Economic Growth (60%), SDG 1 No Poverty (60%), and SDG 4 Quality Education (54%) (as of 31 December 2024).

The first example is the social bond issued by the Spanish multinational bank CaixaBank SA. Through the financing of projects aligned with the bond's framework, an estimated 10,341,912 individuals have reportedly benefited—gaining access to job support, education, healthcare services, and other essential resources. Bank financing is pivotal in fostering the growth of micro, small, and medium-sized businesses in Spain's most economically disadvantaged regions. By targeting areas in the bottom 30th percentile or those with high unemployment rates, this support helps uplift local economies. Through loans to NGOs and private social projects, these initiatives aim to create a more inclusive society. By enhancing access to public or subsidized healthcare services, emergency medical care, and disease control programs, as well as training professionals in these sectors, these efforts contribute to healthier communities. MicroBank's Family Microcredit program, updated annually based on economic indicators, stands out as a testament to empowering low-income families through tailored financial solutions. Through these concerted efforts, financing local social projects embodies a commitment to positive social change, fostering sustainable growth, and reducing disparities across various facets of society. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of tackling inequalities and fostering social cohesion, social integration, good labour relations; and investments in human capital, including disadvantaged communities.

Another illustrative example is the social bond issued by the African Development Bank, a multilateral development finance institution dedicated to promoting economic development and social progress across the African continent. Through investments in both public and private sectors, the bank pursues its mission of alleviating poverty and improving living conditions in Africa's most vulnerable communities.

The bank's strategic agenda, encapsulated in the "High 5s" priorities, seeks to accelerate inclusive, rapid, and sustainable growth. By focusing on core areas such as energy, food security, industrialization, regional integration, and quality of life, these efforts aim to transform the lives of millions.

As a result of the initiatives supported by the bond, more than 10.5 million individuals have reportedly benefited. These outcomes include the creation of over 1,155,000 jobs and expanded access to digital technologies for more than 487,000 people, contributing to digital inclusion and economic empowerment.

Through this bond, the African Development Bank exemplifies how targeted financing can catalyse social progress, reduce inequality, and foster long-term resilience across African societies.

● **How did the sustainability indicators perform?**

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
	Value	Value	Value
The percentage of investments in social bonds	90.43%	93.60%	94.55%
The percentage of investments in other eligible bonds	5.66%	5.58%	3.34%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.90%

● **... And Compared to Previous Periods?**

Please note that due to a change in methodology in 2024, some sustainability indicators (social bonds and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to social bonds was 93.60%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 90.43%.

Overall, the percentage of investment in other eligible bonds on 30 June 2024 was 5.58%, while the average allocation increased to 5.66% in the fiscal year ending 30 June 2025.

Although the average percentage of investments in sustainable investments has declined, the Fund has maintained its commitment of investing at least 90% of portfolio in sustainable investments as stipulated in precontractual disclosure.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

Corporate issuers were monitored using the principal adverse impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Manager applied additional qualitative assessment (based on internal research or external second party opinion) of the issuers and the project's DNSH eligibility.

● **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

While assessing eligible bonds, the Investment Manager reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds and/or instruments issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Manager.

Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

Performing the DNSH test

The Investment Manager used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 96.09%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivative instruments used for hedging purposes was 3.91%.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 96.09% portion, where the Investment Manager has confirmed that such instruments are aligned with social sustainable objective of the Fund.

The Investment Manager ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits and for derivatives contracts meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund on continuous basis.

What actions have been taken to attain the sustainable investment objective during the reference period?

Over the reference period, the Investment Manager continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to social objectives, ensuring that investments avoided significant harm while their issuers adhere to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive social impacts. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated social objective into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Franklin European Total Return Fund (the "Fund")

Legal Entity Identifier: 4HIOY1ECMPB3YDFIY329

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 64.13% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 43.81%.

Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Manager's acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from unconventional oil and gas extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 397.28, while for the benchmark it was 778.56. The average Scope 1+2 GHG intensity for the Fund was 30.25, compared to 104.29 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries (PAI indicator 15) for the Fund was 208.34, while the benchmark was 184.56. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average in the previous year, when it stood at 245.36.

To further promote these characteristics, the Investment Manager engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Manager has actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment. In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 41.03%, compared to 39.87% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 15.12% for the Fund and 13.71% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager considers the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Manager views the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 15.48%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

● ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes types of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

For social bonds, the average allocation as of 30 June 2024, was 5.66%, which saw a rise to 6.09% throughout the fiscal year ending on 30 June 2025. While the average exposure to green bonds decreased from 41.27% in the previous reporting period to 38.90% at the end of the current period. The other forms of bonds considered as sustainable investments stood at 19.14%

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 47.55%, while the average allocation increased to 64.13% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 36.24%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 43.81%.

At the end of the current and previous reference periods, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

The number of issuers that the Investment Manager engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

Another example is a green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

Firstly, all issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify corporate issuers and sovereign issuers involved in harmful economic activities and/or controversies, which are excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Sovereign issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Another tool, ESG Credit App ranked the corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTi") certification. Corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,
- was deemed "Not Free" by Freedom House.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

For securities issued by corporate issuers, the sustainable investments were assessed for alignment with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

These guidelines and principles were not applicable to investment in securities issued by sovereign countries.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Manager did not invest or, if already invested, the Investment Manager divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Manager to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix; and
- The ESG Credit App ranked corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTI") certification

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions.

Across the entire portfolio (excluding liquid assets and derivatives used for hedging and efficient portfolio management purposes and as applicable to the asset class), the Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 64.13%.

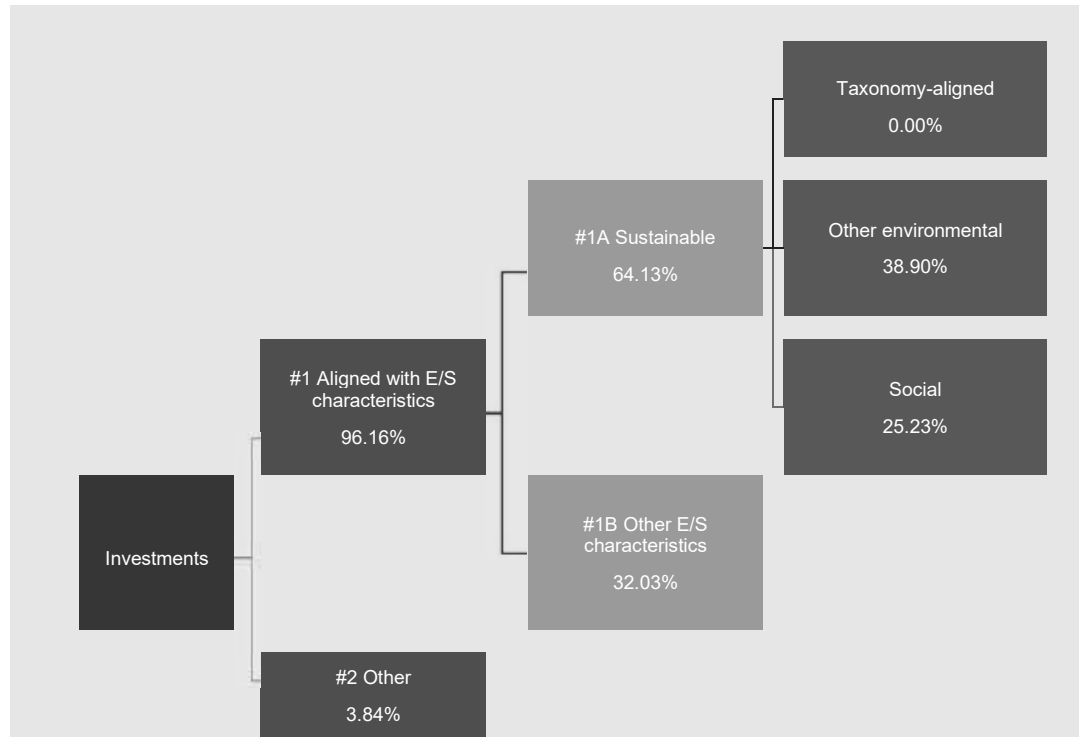

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.16% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (3.84%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging and efficient portfolio management purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 96.16% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 64.13% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	96.16%	98.60%	98.67%

Building Products	0.52%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 38.90%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 25.23%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 3.84% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging and efficient portfolio management purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 96.16% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe

3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Euro Short Duration Bond Fund (the “Fund”)

Legal Entity Identifier: 549300WUQJDZB0YA010

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.49% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Manager sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 43.22%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Manager's acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from unconventional oil and gas extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (Scope 1, 2, 3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 502.61, while for the benchmark it was 743.20. The average Scope 1+ 2 GHG intensity for the Fund was 42.83, compared to 75.57 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Manager regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries (PAI indicator 15) for the Fund was 189.59, while the benchmark was 182.89. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 217.61.

To further promote these characteristics, the Investment Manager engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Manager has actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Moreover, the Fund avoided investment in sovereign issuers that lacked a strong governance structure (based on World Bank governance indicators), were not a party to certain landmark international agreements, had not ratified or implemented key labour and human rights conventions, had been considered deficient in anti-money laundering and counter-terrorist financing measures, or scored poorly on Transparency International's Corruption Perceptions Index.

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Manager promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Manager supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 39.67 %, compared to 39.57% for the benchmark. The average unadjusted gender pay gap (PAI indicator 12) of investee companies was 14.68% for the Fund and 14.02% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Manager considers the stronger performance on PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. With respect to the PAI indicator 12, Investment Manager views the difference as tolerable, particularly given that this factor is subject to data quality. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 18.85%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Euro Aggregate (1-3Yr) Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represent the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous years.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023

● ... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, these are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund has notably increased its average allocation in sustainable investment compared to the previous reference period. This change primarily results from amendments to the Prospectus, in which the Fund increased its commitment to a minimum proportion of sustainable investments from 30% to 50%. Additionally, due to the amendments, the Fund now includes other forms of bonds (not use of proceeds bonds) issued by sovereign issuers meeting specific budgetary requirements outlined in the following section, when calculating the proportion of sustainable investment.

For social bonds, the average allocation as of 30 June 2024, was 5.76%, which increased to 5.78% throughout the fiscal year ending on 30 June 2025. While the average exposure to green bonds decreased from 32.83% in the previous reporting period to 26.23% at the end of the current period. The other forms of bonds considered as sustainable investments at 22.91%.

Overall, the percentage of investment in green, social and sustainable bonds as of 30 June 2024 was 38.65%, while the average allocation increased to 55.49% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 30.78%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 43.22%.

At the end of the previous reference period, the Fund had 0.16% exposure to issuers that failed under any of the ESG exclusions. Securities for which the percentage of revenue from the excluded sectors and/or additional exclusion rose above the limits required by the prospectus after the initial purchase triggered a plan to divest the securities in a timely manner, taking into account the best interests of Shareholders, and were sold.

At the end of the current reference period, the Fund had no exposure to issuers that failed under any of the ESG exclusions.

The number of issuers that the Investment Manager engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration and community development;
- Good labour relations;
- Social protection of the most vulnerable community members including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- Universal access to basic social infrastructure, quality education and healthcare; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Manager had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Manager also ensured that the frameworks of these bonds adhered to international standards. The Investment Manager also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. Finally, it was ensured that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transportation, supported community development, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

One example is the green bond issued by the energy company Ørsted. In 2024, projects financed by their green bond proceeds achieved a total renewable energy capacity of 13 GW. In addition to advancing scalable renewable energy solutions that generate green energy and reduce emissions across the asset life cycle, Ørsted is also delivering a net-positive impact on biodiversity and providing meaningful benefits to local communities through the deployment of its bond proceeds. One significant funded project is the launch of the Hornsea 3 Community Benefit Fund. Before launching the Community Benefit Fund, the company consulted over 500 individuals, whose insights were key in shaping its criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the Community Benefit Fund announced its first round of awards, distributing GBP 249,000 to 21 local organizations aimed at strengthening community well-being and resilience. Funded projects include educational initiatives, environmental conservation efforts, and programmes to improve public health and social well-being. With the proceeds to date, a total of 6,100,000 people have benefited from them. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the production of renewable energy, the reduction of greenhouse gas emissions, lower impact of economic activities on biodiversity as well as social integration and community development.

Next, Allied Irish Banks' AIB's Green Bond financing has played a key role in Ireland's Deposit Return Scheme (DRS), launched in February 2024 to support circular economy goals. It also helps to meet environmental targets under the Directive (EU) 2019/904 of the European Parliament and of the Council of 5 June 2019 on the reduction of the impact of certain plastic products on the environment ("EU Single-Use-Plastic Directive") and the national goal of collecting 90% of plastic drinks containers by 2029. The DRS adds a refundable deposit to drink containers, encouraging returns via Reverse Vending Machines (RVMs) installed in 180 Lidl's stores across the country. By September 2024, Lidl's contribution involved handling 100 million recurrent bottles and cans, issuing over €17 million back to customers. Nationally, the DRS saw more than 500 million containers returned, significantly advancing environmental targets. Thanks to the proceeds that have supported DRS project to date, 1,248 tonnes of waste per year have been treated/prevented. Investing in such a bond helped to contribute to the objective of the Fund's sustainable investment of the reduction of waste and the development of a circular economy.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle.

Firstly, all issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify corporate issuers and sovereign issuers involved in harmful economic activities and/or controversies, which are excluded by the Investment Manager from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the sovereign issuers in the universe based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix. Sovereign issuers falling within the bottom 20% of their peer groups based on the EETI were excluded from the investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Another tool, ESG Credit App ranked the corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Target initiative ("SBTI") certification. Corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Secondly, the Investment Manager considered the mandatory and other relevant PAI indicators of Table 1 of Annex I of the SFDR RTS, as applicable to the asset class and according to the Investment Manager's analysis, when assessing whether a sustainable investment might be causing potential harm. For investments in use of proceeds instruments, the Investment Manager assessed the potential for significant harm at the level of the projects funded and at the level of the issuer.

Additionally, where the Fund was proposing to consider as sustainable investments bonds issued by sovereign issuers which are not use of proceeds instruments, certain issuers were excluded to ensure compliance with the DNSH principle. In particular, the Investment Manager considered a range of factors including (but not limited to) whether the issuer:

- lacked a strong governance structure (based on World Bank governance indicators),
- was not a party to certain landmark international agreements,
- had not ratified or implemented key labour and human rights conventions,
- had been considered deficient in anti-money laundering and counter-terrorist financing measures,
- scored poorly on Transparency International's Corruption Perceptions Index,
-
- was deemed "Not Free" by Freedom House.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For securities issued by corporate issuers, the sustainable investments were assessed for alignment with the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights.

These guidelines and principles were not applicable to investment in securities issued by sovereign countries.

Alignment was monitored using data from a third-party data provider. Breaches identified by that service provider were flagged in the investment compliance system for subsequent investigation by the Investment Manager. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, the Investment Manager did not invest or, if already invested, the Investment Manager divested from such security as soon as reasonably possible, taking into account best interests of the Shareholders and at the latest within a period of six months under normal market conditions.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund invested in bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers based on factors such as, greenhouse gas emissions, energy intensity, protection of biodiversity, air pollution and renewable energy mix; and
- The ESG Credit App ranked corporate issuers based on greenhouse gas intensity (Scope 1 and Scope 2) time series and Science Based Targets initiative ("SBTI") certification

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

Across the entire portfolio (excluding liquid assets and derivatives used for hedging, efficient portfolio management and investment purposes and as applicable to the asset class), The Fund also considered UNGC violations exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, United Nations principles, and, where applicable, national law.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 55.49%.

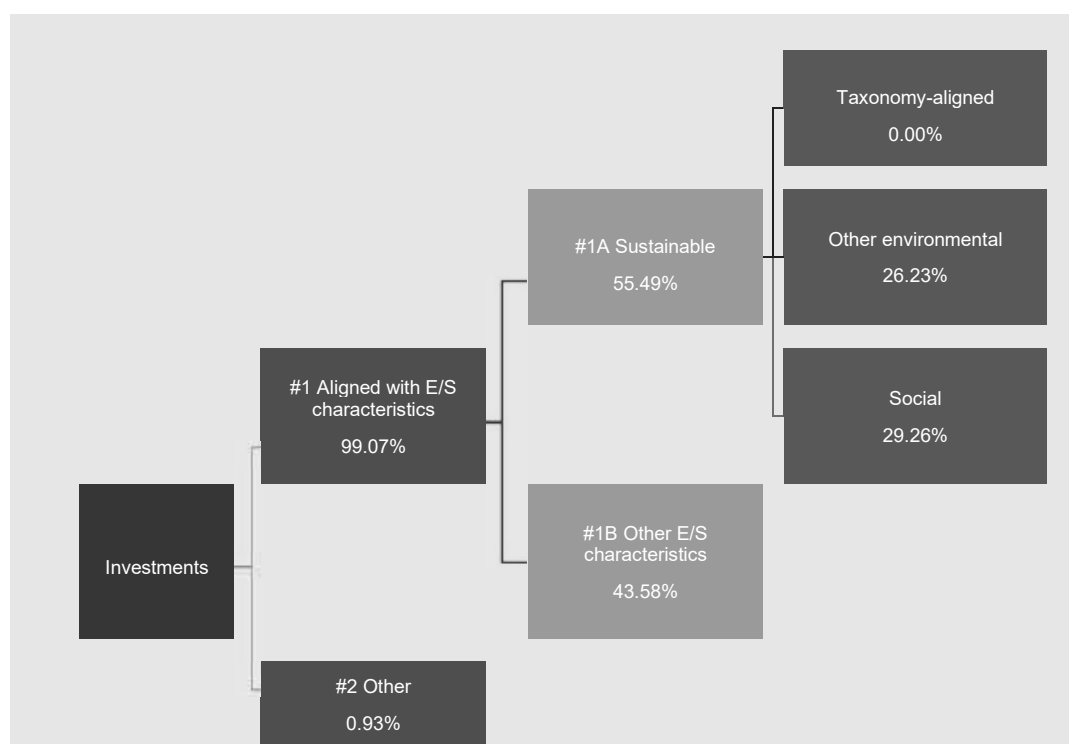

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.07% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (0.93%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and derivatives used for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 99.07% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 55.49% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

Automobile Components	0.55%
Independent Power & Renewable Electricity Producers	0.52%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.23%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 29.26%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.93% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 99.07% portion, where the Investment Manager has confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place with respect to (i) cash and other liquid assets and (ii) derivatives used for hedging and efficient portfolio management purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period, the Investment Manager continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included among others synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental or social impacts. Additionally, the Fund also invested in non-use of proceeds bonds issued by sovereign issuers in countries where, over the past five years, at least 50% of budgetary spending supported themes aligned with the objective of the Fund's sustainable investments, based on EUROSTAT data. These themes included, but were not limited to, pollution abatement, protection of biodiversity and landscape, environmental protection, housing development, community development, water supply, medical products, hospital services, public health services, education, sickness and disability, old age support, family and children, unemployment. The Investment Manager assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Manager used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.

3. The Fund applied the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Manager also assessed issuers' involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund's exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The Investment Manager is on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Manager actively incorporated environmental and/or social considerations into the Fund's sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled "How did the sustainability indicators perform?" reflects all outreach efforts undertaken by the Investment Manager. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Genomic Advancements Fund (the "Fund")

Legal Entity Identifier: 2549008AQJB3984XPF72

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, drug affordability and pricing, diversity and inclusion, employee satisfaction/well-being and/or environmental-related aspects (e.g., reduction of greenhouse gas ("GHG") emissions). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.36% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
The share of companies rated AAA by proprietary ESG methodology	Value 12.03%	Value 12.58%

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
The share of companies rated AA by proprietary ESG methodology	31.76%	27.37%
The share of companies rated A by proprietary ESG methodology	56.20%	60.05%
The share of companies rated B by proprietary ESG methodology	0.00%	0.00%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Health Care Providers & Services	2.86%
Chemicals	2.72%
Software	2.20%
Health Care Technology	0.99%
Health Care REITs	0.21%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

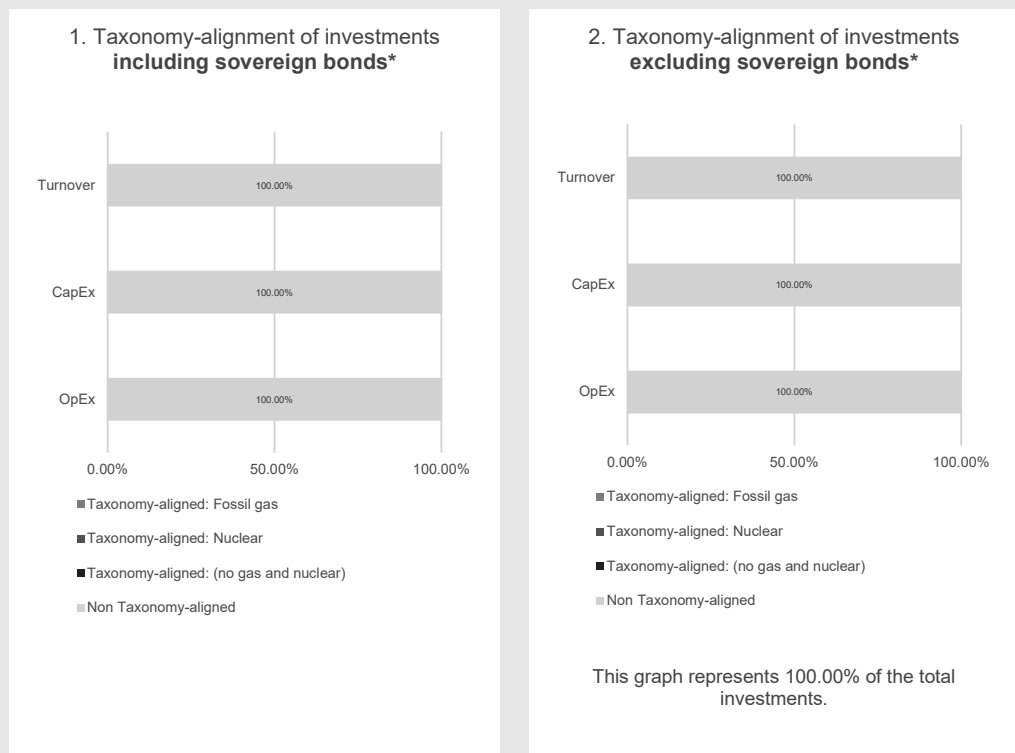

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.64% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective). For that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Global Corporate Investment Grade Bond Fund (the "Fund")

Legal Entity Identifier: 549300WDS73FHS1LLT86

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 15.63% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund has been successful in promoting its established environmental and social characteristics. The following list details the extent of achievement for each characteristic:

(i) reduction of greenhouse gas (GHG) emissions and (ii) energy conservation:

In order to promote energy conservation and the reduction of GHG emissions, the Investment Managers sought exposure to, what they termed, Environmental Champions. An "Environmental Champion" is an issuer ranked within the top 20% of its peer group based on certain environmental factors (for further details, please see the pre-contractual disclosure of the Fund). At the end of the reporting period, the Fund's average allocation to Environmental Champions stood at 33.67%. Moreover, issuers falling within the bottom 20% of their peer group by the proprietary tools were removed from the investable universe. Additionally, the Fund refrained from investing in issuers where exposure to fossil fuel extraction or energy production from fossil fuels exceeded the Investment Managers' acceptable limit (as described in the Fund's pre-contractual disclosure: e.g., any company, which derives more than 5% of its revenues from thermal coal extraction is deemed not investable).

Furthermore, during the reference period, the average GHG intensity (scope 1,2,3) of the investee companies (Principal Adverse Impact ("PAI") indicator 3) for the Fund was 598.02, while for the benchmark it was 1,054.26. The average Scope 1 + 2 GHG intensity for the Fund was 70.46, compared to 228.59 for the benchmark. Although the Fund does not commit to have a Fund level PAIs better than its benchmark, the Investment Managers regards stronger performance on PAI indicator 3 as favourable contribution towards promoting environmental characteristics.

The average GHG intensity of the investee countries for the Fund was 238.87, while the benchmark was 539.36. Overall, the Fund reduced the GHG intensity of its portfolio's investee countries compared to the average reported in the previous year, when it stood at 246.08.

To further promote these characteristics, the Investment Managers engaged with both sovereign and corporate issuers.

(iii) biodiversity protection:

In order to support biodiversity protection, the Fund avoided investments in issuers that had a negative impact on biodiversity sensitive areas. At the end of the reporting period, the Fund had 0% share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas (PAI indicator 7).

Additionally, the Investment Managers have actively promoted best practices in biodiversity protection. This has been achieved through various means, including conducting webinars, holding individual meetings, and investing in 'use of proceeds' instruments supporting biodiversity projects.

(iv) alignment with the international business conduct principles and fundamental political freedoms:

Over the review period, the Fund maintained alignment with the international business conduct principles, observing the United Nations Global Compact (UNGC) principles, United Nations Guiding Principles on Business and Human Rights and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises. During the reference period, the Fund had 0% share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (PAI indicator 10). Overall, the Fund avoided investments in issuers that had not adhered to aforementioned standards.

On the sovereign side the Fund promoted alignment with the fundamental political freedoms. Accordingly, it refrained from investing in countries that are ranked as "Not Free" by the recognised think tank Freedom House. Additionally, the Fund avoided investments in issuers that are countries subject to social violations as referred in international treaties and conventions. During the reference period, the Fund had 0% share of investments in investee countries subject to social violations (absolute number), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law (PAI indicator 16).

Additionally, the Fund pursued a secondary objective of:

(v) responsible solid and water waste management and (vi) development of circular economy:

The Investment Managers promoted responsible solid and water waste management and development of circular economy through engagement and investment in 'use of proceeds' instruments with eligible projects, including but not limited to pollution prevention and control projects, sustainable water and wastewater management or eco-efficient and/or circular economy adapted products, production technologies and processes.

(vii) reduction of gender pay gap and/or increase of board gender diversity:

The Investment Managers supported the reduction of the gender pay gap and the enhancement of board gender diversity by engaging with companies and by investing in 'use of proceeds' instruments that funded initiatives promoting women's empowerment.

In terms of related PAI metrics, the average board gender diversity (PAI indicator 13) of the corporate part of the Fund's portfolio was 36.21%, compared to 36.18% for the benchmark. The average unadjusted gender pay gap of investee companies (PAI indicator 12) was 14.35% for the Fund and 15.05% for the benchmark.

Although the Fund is not committing to have a Fund level PAIs better than its benchmark, the Investment Managers consider stronger performance of both PAI indicator 12 and PAI indicator 13 compared to the benchmark as a favourable contribution towards promoting social characteristics. Additionally, the Fund has reduced the portfolio's average gender pay gap compared to the previous reporting period, where it stood at 17.25%.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

- Exposure to the principal adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Global Aggregate Credit Index. Please refer to the values displayed in the section "How did this financial product consider principal adverse impacts on sustainability factors?" which represents the performance of the indicators as of the reference period.
- Note: Benchmark PAI 1 or financed emissions is not comparable for benchmark analysis. There is calculation bias in the "investor stake" ratio (investment market value/ EVIC) as the inputs are from different data sources (Factset BDF and MSCI ESG), creating mismatch in valuation date as well as measurement unit mismatch.
- For PAI 6, in 2025, we implemented a more granular calculation methodology at the NACE sector level. As a result, coverage indicators are no longer comparable to those in previous year.

... And compared to previous periods?

Please note that due to a change in methodology in 2024, some sustainability indicators (Environmental Champions, percentage of investment in green, social and sustainable bonds and PAIs) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

In the current reference period that concluded on 30 June 2025, the Fund maintained its percentage allocation in sustainable investments, with a slightly higher average allocation at the end of the current reference period.

As of 30 June 2024, the average allocation of green bonds stood at 10.15%. Over the fiscal year ending 30 June 2025, this allocation increased to 14.17%. Similarly, for social bonds, the average allocation as of 30 June 2024, was 1.04%, which also saw a rise to 1.46% throughout the fiscal year ending on 30 June 2025. Regarding the sustainability bonds, the average allocation as of 30 June 2024 was 1.21% while as of 30 June 2025, the average allocation was 0%.

Overall, the percentage of investment in green, social and sustainable bonds on 30 June 2024 was 12.40%, while the average allocation increased to 15.63% in the fiscal year ending 30 June 2025.

During the reference period ending 30 June 2025, the Fund significantly increased its average allocation to Environmental Champions compared to the previous reference period. As of 30 June 2024, the average allocation to Environmental Champions stood at 27.92%, whereas throughout the fiscal year ending on 30 June 2025, the average allocation rose to 33.67%.

At the end of the previous reference period, the Fund had no exposure to, or tying with excluded sectors and additional exclusions.

By the close of the current reference period, the Fund had 1.44% exposure to, or tying with excluded sectors and additional exclusions. Considering that this event took place at the conclusion of the current reference period, the Investment Managers will proceed to divest from such security as soon as reasonably practicable. This action will be taken in the best interest of the Shareholders and in accordance with the binding date stipulated in the pre-contractual disclosure.

The number of issuers that the Investment Managers engaged with decreased compared to the previous reference period. Engagements are conducted through various channels, including one-on-one meetings, correspondence, roadshows, conferences, and surveys. In this reporting period, particular emphasis was placed on fostering meaningful dialogue with selected groups of issuers through more direct interactions, such as one-on-one meetings. This qualitative approach may account for the lower number of recorded engagements compared to the previous reporting cycle, which featured wider outreach methods like dedicated surveys.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested partially in sustainable investments. The objective of the sustainable investments was, amongst others, to fund and promote either:

- The efficient use of energy, raw materials, water, and land;
- The production of renewable energy;
- The reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- The development of a circular economy;
- Tackling inequalities and fostering social cohesion;
- Social integration;
- Good labour relations; or
- Investments in human capital, including disadvantaged communities.

This was achieved by investing in bonds where the Investment Managers had clearly defined the use of proceeds, ensuring they aligned with the stated objectives and were directed towards eligible environmental and/or social projects. The Investment Managers also ensured that the frameworks of these bonds adhered to international standards and that issuers did not significantly harm other environmental and social objectives, while demonstrating good governance practices.

These bonds have helped to deploy renewable energy, clean transport including electric vehicles, affordable housing, employment generation, among others.

Below are some examples of investments made by the Fund that have contributed to its sustainable investment objectives.

A prominent example is the green bond issued by Bank of Ireland; a leading Irish financial institution committed to supporting sustainable economic growth and the transition to a low-carbon economy. Through its lending activities and sustainable finance initiatives, the bank aims to finance and refinance projects that contribute not only to the transition to a low-carbon economy, but also to the development of sustainable infrastructure and cleaner urban environments.

This bond has contributed to achieving significant environmental results, including the avoidance of approximately 185,886 tonnes of CO₂ equivalent emissions, the addition of 1,672 megawatts of renewable energy capacity through newly constructed or rehabilitated facilities, and annual energy savings of 325,343 megawatt-hours.

By issuing this green bond, Bank of Ireland demonstrates how targeted sustainable financing can deliver measurable environmental impact while fostering the transition to a more sustainable and resilient economy.

Another striking example is the green bond issued by SUEZ, a leading French company specializing in water and waste management. The company is one of the global leaders in environmental services, particularly in drinking water and wastewater treatment, solid waste management, recycling, and circular economy solutions.

This bond has contributed to achieving significant environmental results, including the avoidance of approximately 3,456,968 tonnes of CO₂ equivalent emissions and the generation of 1,584,604 MWh of renewable energy annually. The initiatives supported by this financing have enabled the collection, treatment, and disposal of 6,257,093 tonnes of waste per year, benefiting more than 70 million people.

This green bond demonstrates how SUEZ leverages targeted sustainable financing to deliver measurable environmental benefits, enhance resource management, and improve quality of life, supporting the transition to a more sustainable and resilient future.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the "DNSH") principles across the portfolio.

All issuers were monitored using the Principal Adverse Impact Risk App (the "PAI Risk App"). The PAI Risk App used data from various third-party providers to identify issuers involved in harmful economic activities and/or controversies and exclude such issuers from the investment universe.

A second proprietary tool, the Energy and Environmental Transition Index (the "EETI"), ranked the remaining sovereign issuers in the universe according to their greenhouse gas emissions and intensity. Sovereign issuers falling within the bottom 20% of their peer groups based on EETI were excluded from the investment universe.

Another tool, ESG Credit App ranked corporate issuers by their greenhouse gasses emissions, emitters' historic trajectories, Science Based Targets initiative (SBTi) targets. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

When deploying funds to sustainable investments, the Investment Managers applied additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer's and of the projects' DNSH eligibility.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- Identifying best-in-class issuers;
- Restricting Fund's investable universe;
- Guiding thematic engagement; and
- Applying exclusions.

Identifying best-in-class issuers

The Fund sought exposure to bonds issued by corporates and sovereigns deemed by the Investment Managers to be Environmental Champions. Environmental champions were identified using two proprietary ESG rankings:

- The EETI ranked sovereign issuers using various references that included energy efficiency, natural capital conservation, renewable energy performance, including greenhouse gas intensity (emissions normalized by gross domestic product, CO₂e/GDP); and
- The ESG Credit App ranked corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various data references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi targets.

Restricting Fund's investable universe

Sovereign issuers falling within the bottom 20% of the investment universe based on the EETI and corporate issuers falling within the bottom 20% of the investment universe (i.e., climate laggards) based on the ESG Credit App were also excluded from the portfolio.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund considered UNGC violations, negative impact on biodiversity-sensitive areas and exposure to controversial weapons for the purpose of applying specific ESG exclusions as described in the investment strategy section.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

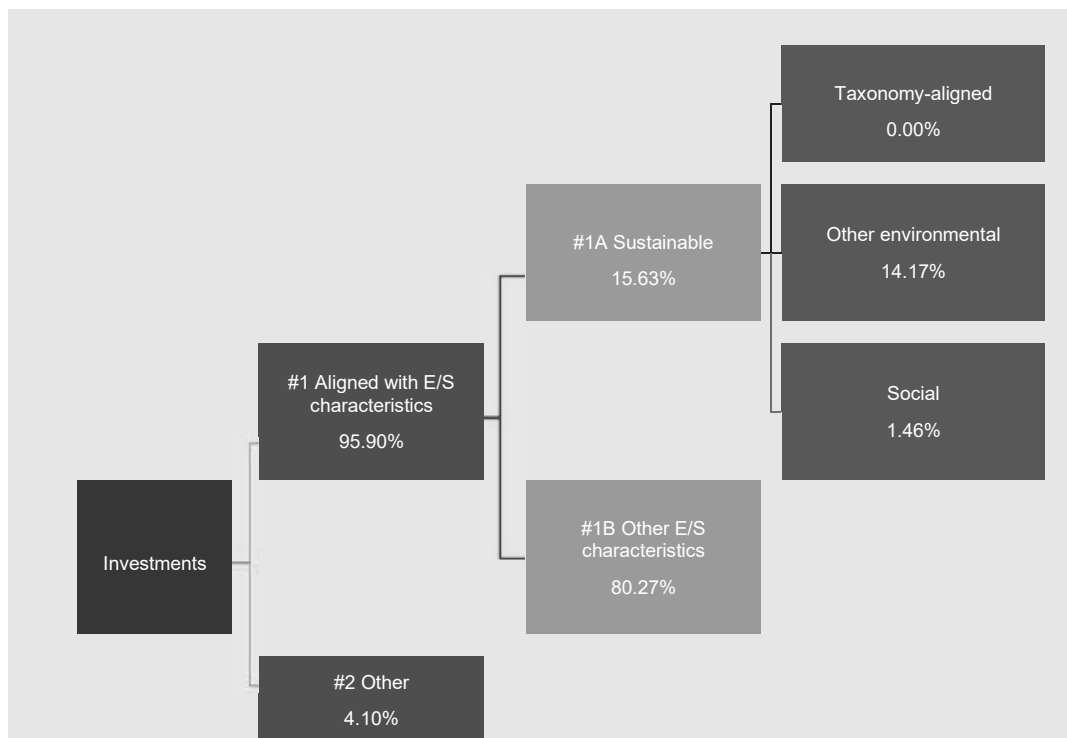

The proportion of sustainable investments was 15.63%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.90% of the Fund's portfolio was aligned with the environmental and/or social characteristics promoted by the Fund. The remaining portion (4.10%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as financial derivatives instruments for hedging, efficient portfolio management and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in 95.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund. The Fund invested 15.63% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	95.90%	95.37%
#2 Other	4.10%	4.63%
#1A Sustainable	15.63%	12.40%
#1B Other E/S characteristics	80.27%	82.97%
Taxonomy-aligned	N/A	N/A
Other environmental	14.17%	11.36%
Social	1.46%	1.04%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	36.40%
Health Care	12.91%
Communication Services	9.49%
Consumer Staples	9.10%
Utilities	8.72%
Industrials	4.88%

Biotechnology	2.32%
Food Products	2.31%
Government Bonds	2.18%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.17%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.46%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 4.10% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as derivatives held for hedging, portfolio management purposes, and investment purposes.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 95.90% portion, where the Investment Managers have confirmed that such instruments were aligned with environmental and/or social characteristics promoted by the Fund.

No minimum environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to meet the environmental and social characteristics promoted by the Fund, while complying with the binding elements of the investment strategy. These techniques, detailed below, included synthesis of IT applications, qualitative and quantitative analysis, and interactions with different stakeholders.

1. The Fund allocated its portion to sustainable investments via ‘use of proceeds’ instruments, financing projects that yield positive environmental or social impacts. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Investment Managers used proprietary ESG IT solutions (including the ESG Credit Application and the Energy and Environmental Transition Index (EETI)) which identified the issuers falling within the bottom 20% of their peer groups based on GHG emissions which are then excluded from the investment universe.

3. The Fund applied to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

4. The investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental and/or social considerations into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives. For clarity, the number of engagements disclosed in the section titled “How did the sustainability indicators perform?” reflects all outreach efforts undertaken by the Investment Managers. This includes both successful engagements and those that, despite reasonable efforts, did not yet result in a conclusive outcome.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Global Green Bond Fund (the “Fund”)

Legal Entity Identifier:
2549006AK218PYV09U02

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 97.30% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Fund's sustainable investment objective was to allocate capital into bonds adhering to a recognised green bond assessment framework and other eligible bonds or instruments that qualify as sustainable investments with an environmental objective. This objective was predominantly met by investing in green bonds, which constituted 97.30%. The proceeds from these investments were utilised to finance initiatives such as renewable energy deployment, energy efficiency, clean transportation, circular economy and green buildings. Additionally, proceeds from these investments also financed projects in relation to waste and wastewater treatments as well as environmentally sustainable management of living natural resources and land use.

The Fund has been successful in deploying capital for aforementioned expenditures which resulted in, among other outcomes, c. 654 tons of CO₂e avoided or reduced, c. 748 MWh of renewable energy produced, c. 287 m² of green buildings constructed or renovated, c.76 electric vehicles deployed, c. 10,990 m³ of water saved or treated and c 74 tons of waste prevented, collected and treated, reused, recycled or disposed per every million of Euro invested (data as of 31st Dec 2024).

The top five SDGs to which the Fund contributed through the investments in use-of-proceeds bonds (please note that each bond can contribute to the multiple SDGs) were: SDG 7 Affordable and Clean Energy (85%), SDG 13 Climate Action (78%), SDG 11 Sustainable Cities and Communities (78%), SDG 9 Industry, Innovation and Infrastructure (73%), and SDG 12 Responsible Consumption and production (59%) (as of 31 December 2024).

An example of the bond supporting the production of renewable energy, the efficient use of energy and the reduction of greenhouse gas emissions is the green bond issued by the Republic of Austria. One of the projects financed by the bond proceeds is the innovative thermal energy storage solution. This project funded by the Climate and Energy Fund is developing large-scale pit thermal energy storage to boost urban renewable heat supply. The pilot facility, with a 40,000 m³ capacity and plans to scale to 100,000 m³, stores surplus geothermal heat for winter use. This initiative represents a significant step towards meeting sustainability goals and reducing reliance on fossil fuels. By leveraging advanced thermal energy storage technologies, the project seeks to address seasonal variability in renewable energy availability, ensuring a consistent and sustainable heat supply throughout the year. Moreover, the integration of such storage systems into urban infrastructure can contribute to the development of resilient and energy-efficient cities. With the proceeds to date, 1,632,347 MWh of renewable energy has been produced annually and 1,281,883 tonnes of CO₂ per year have been avoided.

Furthermore, in support of the Fund's sustainable investment objective to support a low carbon future, the Investment managers engaged with portfolio investees regarding greenhouse gas emission reductions.

Another example of a bond supporting renewable energy development is the green bond issued in 2024 by Ørsted. Projects financed by the bond proceeds have contributed to achieving a total renewable energy capacity of 13 GW. Beyond advancing scalable renewable energy solutions that generate green energy and reduce emissions throughout the asset life cycle, Ørsted's bond proceeds also deliver a net-positive impact on biodiversity and provide tangible benefits to local communities.

One notable project funded is the launch of the Hornsea 3 Community Benefit Fund. Prior to its launch, Ørsted engaged with over 500 local stakeholders, whose feedback shaped the fund's criteria and focus on community buildings, activities, services, and environmental initiatives. In September 2024, the fund awarded GBP 249,000 to 21 local organizations aiming to enhance community well-being and resilience. Funded projects include educational programs, environmental conservation efforts, and initiatives to improve public health and social cohesion.

Investing in this green bond supports Ørsted's sustainable investment objectives by promoting renewable energy production, reducing greenhouse gas emissions, minimizing economic activities' impact on biodiversity, and fostering social integration and community development.

● **How did the sustainability indicators perform?**

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
	Value	Value	Value
The percentage of investments in green bonds	97.30%	99.54%	96.52%
The percentage of investments in other eligible bonds supportive of a low-carbon future or supportive of the Paris Climate Agreement. (This indicator was changed into "the percentage of investments in other eligible bonds and/or instruments qualifying as environmentally sustainable investments under SFDR and/or instruments qualifying as environmentally sustainable investments under SFDR in March 2024)	0.00%	0.00%	0.00%
The percentage of investments in issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%

● **... And Compared to Previous Periods?**

Please note that due to a change in methodology in 2024, some sustainability indicators (percentage of investment in green and other eligible bonds) only reflected values as at the last day of the end of the fiscal year (30 June 2023), whereas for 2024 data and beyond, they are based on the average of the quarter end.

During both reference periods, the Fund maintained a significant percentage allocation in sustainable investments, with a slightly lower average allocation at the end of the current reference period.

As of 30 June 2024, the average exposure to green bonds was 99.54%, while throughout the fiscal year ending on 30 June 2025, the average allocation decreased to 97.30%.

Although the average percentage of investments in sustainable investments has slightly declined, the Fund has maintained its commitment of investing at least 90% of the portfolio in sustainable investments as stipulated in precontractual disclosure.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Managers used a variety of tools and methods to ensure alignment with the Do No Significant Harm (the "DNSH") principle across the portfolio.

Corporate issuers were monitored using the Principal Adverse Impacts (the "PAIs") Risk App (the "PAI Risk App"). The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and excluded such issuer from the investment universe.

Additionally, sovereign issuers were subjected to tests based on their political liberties and/or corruption.

Finally, the Investment Managers applied additional qualitative assessment (based on internal research or external second party opinion) of the issuer's and the project's DNSH eligibility.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

While assessing eligible bonds, the Investment Managers reviewed and documented the materiality of both PAIs for the project and how the project's implementation affected the issuer's overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targeted the development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertained that financed projects reduced exposure to PAIs linked to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

For bonds and/or instruments issued by sovereign countries, the Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights were not applicable to such investments.

For bonds issued by corporate issuers, the sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment was monitored using data from a third-party data provider. Breaches identified by these service providers were flagged in the investment compliance system for subsequent investigation by the Investment Managers.

Where due diligence proved that the issuer was not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it was deemed un-investable.

How did this financial product consider principal adverse impacts on sustainability factors?

PAI indicators were considered for the purpose of:

- performing the DNSH test;
- guiding thematic engagement; and
- applying exclusions.

Performing the DNSH test

The Investment Managers used proprietary data tools and qualitative research to ensure alignment of bonds invested in with the DNSH principles across the portfolio using the PAIs indicators. Corporate issuers were monitored using the PAI Risk App. The PAI Risk App used data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies based on all mandatory PAIs and excluded such issuers from the investment universe. Additionally, sovereign issuers were subjected to tests based on their greenhouse gas emissions, political liberties and/or corruption.

Guiding thematic engagement

The Investment Managers are on target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considered UNGC violations, exposure to controversial weapons and activities negatively affecting biodiversity for the purpose of applying specific ESG exclusions. The Fund also excluded from its portfolio issuers subject to social violations as referred to in international treaties and conventions, such as but not limited to United Nations principles.

What were the top investments of this financial product?

Asset allocation
describes the share
of investments in
specific assets.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 97.30%.

What was the asset allocation?

97.30% of the Fund's portfolio contributed to the sustainable investment objective. The remaining portion (2.70%) did not contribute to such objective and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as derivatives used for hedging purposes. For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 97.30% portion, where the Investment Managers have confirmed that such instruments were aligned with social sustainable objective of the Fund.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

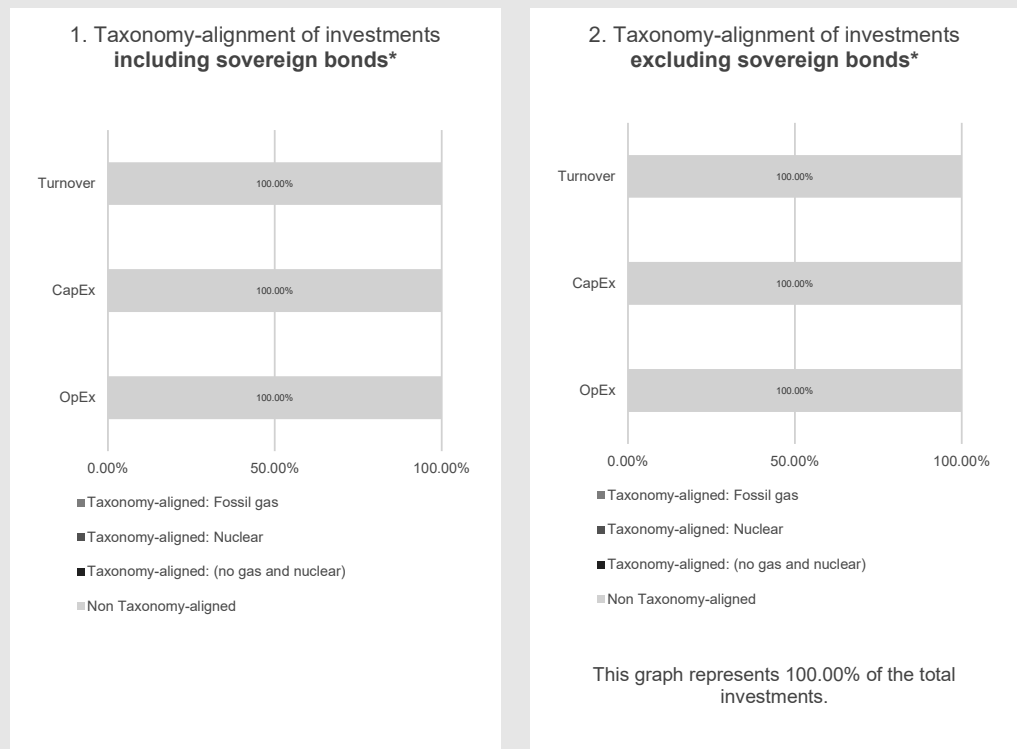

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 97.30%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

Consistent with its intentions, as set out in the Supplement, the Fund did not invest in sustainable investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The “#2 Not sustainable” investments included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day flow management and liquidity requirements of the Fund as well as derivative instruments used for hedging purposes was 2.70%.

For the avoidance of doubt, certain money market instruments, such as government T-Bills, were included in the 97.30% portion, where the Investment Managers have confirmed that such instruments are aligned with social sustainable objective of the Fund.

For derivatives, the Investment Managers determined what was the underlying asset and if applicable, subject this asset to all relevant ESG screenings depending on the underlying asset’s nature. For the avoidance of doubt, the Investment Managers ensured that the underlying asset of any derivatives used for efficient portfolio management qualified as a sustainable investment.

The Investment Managers applied minimum environmental and social safeguards by verifying that the counterparties used for placement of deposits and for derivatives contracts meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund on continuous basis.

What actions have been taken to attain the sustainable investment objective during the reference period?

Over this reference period the Investment Managers continued to deploy various actions and techniques to achieve the sustainable investment objective of the Fund, while adhering to the mandatory components of the investment strategy. These techniques, detailed below, involved a combination of qualitative and quantitative analysis of investments to ascertain their positive contribution to environmental objectives, ensuring that investments avoided significant harm while their issuers adhered to good governance practices. Additionally, they encompassed the use of IT applications and engagement with various stakeholders, among other methods.

1. The Fund allocated its portion to sustainable investments via 'use of proceeds' instruments, financing projects that yield positive environmental impacts. Additionally, the Fund invested in other eligible bonds deemed to be supportive of reducing and elimination carbon emissions and other environmental objectives. The Investment Managers assessed each security in accordance with the relevant criteria, ensuring that only verified bonds were classified as sustainable investments through a rigorous evaluation process.

2. The Fund adhered to the exclusions as set out in the pre-contractual disclosure. Using internal and third-party data providers, the Investment Managers also assessed issuers’ involvement in controversial business practices and/or adverse economic activities. This process ensured pre-trade exclusion of ineligible issuers and post-trade monitoring for any violation of the Fund’s exclusions, prompting timely divestment if needed and under the conditions specified in the pre-contractual disclosure of the Fund.

3. The investment Managers are on a target with their commitment to engage on a calendar year basis with 5% of holdings which were considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics. The Investment Managers actively incorporated environmental objective into the Fund’s sustainability strategy through a structured engagement process. Engagement activities were conducted with issuers using a variety of methods, including email correspondence, video conferencing, participation in roadshows, in-person meetings, and the distribution of questionnaires as part of broader cross-sectional initiatives.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Franklin Global Multi-Asset Income Fund (the “Fund”)

Legal Entity Identifier: 549300A75JSDJHNO0S41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted the reduction of greenhouse gas ("GHG") emissions and increase in board gender diversity in the Fund's portfolio through engagement with poor performers and positively tilting the portfolio towards stronger performers in terms of these metrics.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Throughout the reference period, the Fund successfully met the environmental and social characteristics it promoted by adhering to the binding elements mentioned in the prospectus. The Fund's exclusions were also adhered to over the period.

On average, over the reference period:

- 72.16% of the in-scope equity and corporate credit positions held by the Fund were ranked in the top 50% of their respective industry peer group (within MSCI All Country World Index) in terms of lowest GHG emissions.
- 93.7% of the sovereign debt securities held by the Fund were ranked in the top 33% of countries out of the Bloomberg Global Aggregate Index ranked by lowest GHG intensity

During the reference period:

- There were 4 holdings identified as underperformers (bottom 10% within their industry peer group) in respect of their GHG emissions. Engagement discussions were initiated with all.
- There were 3 holdings identified as underperformers (less than 10% female board representation) in respect of their board diversity. Engagement discussions initiated with all.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
Number of companies in the portfolio which are in top half of the Fund's corporate investment universe, defined by MSCI All Country World Index ("Fund's Corporate Investment Universe") in terms of GHG emissions	141.00	116.00
Number of sovereigns in the portfolio which are in top third of the Fund's sovereign investment universe, defined as the Bloomberg Global Aggregate Index ("Fund's Sovereign Investment Universe"), in terms of GHG emissions	10.00	9.00
Number of companies in the portfolio which are in the worst decile of the Fund's Corporate Investment Universe, in terms of GHG emissions	4.00	5.00
Number of companies in the portfolio with female board representation below 10%	3.00	3.00
Number of companies the Investment Managers have engaged with	6.00	7.00

● **... And compared to previous periods?**

During the reference period, the Fund achieved the environmental and social characteristics outlined in the prospectus by adhering to the established binding elements. Relative to the prior year, the Fund's performance with respect to key sustainability indicators remained consistent overall. As of the fiscal year ending 30 June 2025, the number of portfolio companies ranking in the top half of the Fund's corporate investment universe, as defined by the MSCI All Country World Index, for GHG emissions increased marginally in absolute terms, and stayed consistent on a percentage basis. For sovereign entities, the number positioned in the top third of the Fund's sovereign investment universe, as defined by the Bloomberg Global Aggregate Index, increased from nine to ten compared to the previous year, which also represented a meaningful increase in percentage terms.

Total new engagement activities were slightly lower year-on-year, with one less engagement focused on GHG emissions but stable numbers regarding female board representation. Ongoing dialogues also continued with previously identified engagement candidates, supplementing these new interactions.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 GHG emissions (for equities and corporate credit positions)
- Board gender diversity
- GHG intensity (for sovereigns)

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs are applicable to the widest range of the Fund's investments and represent the largest opportunity set for engagement.

- GHG emissions - The Investment Manager engaged with companies which were ranked in the bottom 10% in their industry peer group (within MSCI All Country World Index) regarding their scope 1 and scope 2 GHG emissions. In the portfolio construction phase, the Investment Manager also favoured companies and sovereign issuers with lower GHG emissions relative to their industry peers.
- Board gender diversity - The Investment Manager engaged with the investee companies which had less than 10% female representation on the board of directors.
- For all engagements, if a company does not demonstrate meaningful commitment and/or improvement over two years in relation to emissions reduction, the Investment Manager will divest as soon as practicably possible, taking due account of the interests of the Shareholders.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The portion of investments under “#2 Other” was 15.81% during the reference period and comprised of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds), collective investment schemes and securities issued by private companies on which PAI data is not available which are held for the purposes of investment and servicing the day-to-day requirements of the Fund. These may also include derivatives that were not linked to a single stock or bond and are not used to attain environmental or social characteristics promoted by the Fund. No minimum environmental and/or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To meet the environmental and social characteristics promoted by the Fund, the Investment Manager:

- Positively tilted the portfolio towards stronger performers in terms lowest GHG emissions (equities, corporate credit and sovereign positions). The binding elements of the investment strategy were met throughout the reference period.
- Engaged with issuers that were considered underperformers in respect of the PAIs outlined in the binding elements of the investment strategy (PAI 1 – Scope 1 & 2 GHG Emissions, PAI 13 – Board Gender Diversity). 3 engagements focused on initiatives to reduce GHG emissions, 2 engagements focused on strengthening board gender diversity and 1 engagement covered both issues.
- Adhered to the exclusions as set out in the prospectus regarding UNGC violations, controversial weapons, and all other business activities for which exclusions are in place.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.60% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI India Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	36.33%	33.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	45.14%	49.00%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	16.89%	15.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	45.87%	43.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	45.49%	47.70%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	7.00%	6.60%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	5.99	5.60
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.45	4.50

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 57.60%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.36% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.64%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 57.60% of its net assets in sustainable investments, all towards social objectives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

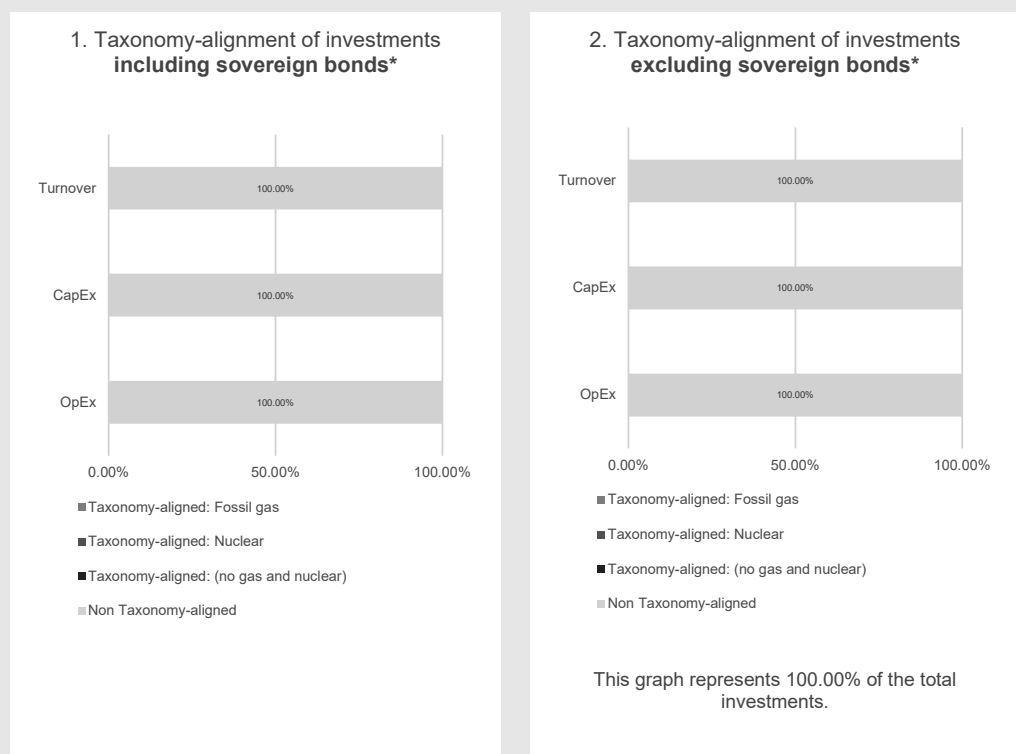

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 57.60% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.64% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Innovation Fund (the "Fund")

Legal Entity Identifier: 5493001D4005GUTY6W49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 38.09% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.46% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated AAA by proprietary ESG methodology	Value	Value	Value
	2.58%	6.62%	10.56%

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated AA by proprietary ESG methodology	59.12%	59.50%	61.13%
The share of companies rated A by proprietary ESG methodology	38.31%	33.88%	26.20%
The share of companies rated B by proprietary ESG methodology	0.00%	0.00%	2.11%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%	0.00%

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTI) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

10.99%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.54% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Intelligent Machines Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES NO

<ul style="list-style-type: none"> <input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00% 	<ul style="list-style-type: none"> <input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments
---	--

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 97.19% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
The share of companies rated AAA by proprietary ESG methodology	Value 6.24%	Value 11.01%

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
The share of companies rated AA by proprietary ESG methodology	52.20%	54.37%
The share of companies rated A by proprietary ESG methodology	41.55%	34.62%
The share of companies rated B by proprietary ESG methodology	0.00%	0.00%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Automobile Components	0.28%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

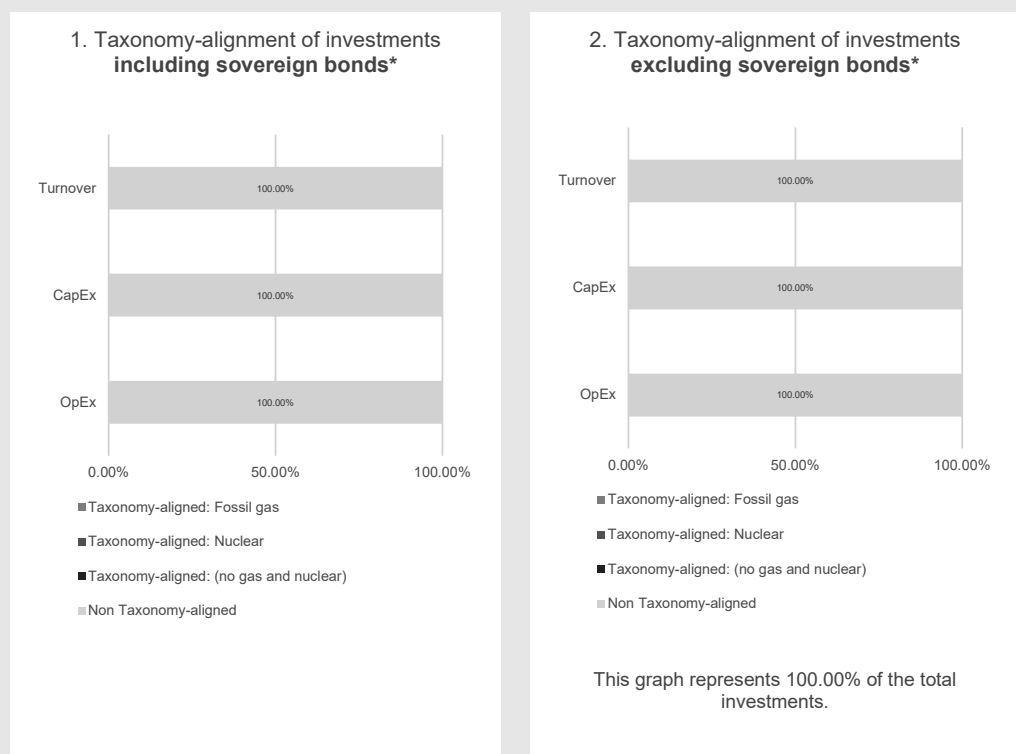

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.81% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Mutual European Fund (the "Fund")

Legal Entity Identifier: JJQ58E37C5M7D0I35584

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund include, among other things, the reduction of greenhouse gas ("GHG") intensity and board gender diversity. Since these commitments have been made, the Investment Manager attained these characteristics by:

- Maintaining lower portfolio GHG intensity (scope 1+2) compared to both the MSCI Europe Value Index (the "Benchmark") and MSCI All Country Europe Index (the "Investment Universe");
- Committing to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable; and
- Implementing negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the Fund's prospectus.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

- For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund's weighted GHG intensity (scope 1+2) was at least 20% below both the Benchmark and Investment Universe.
- The percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions as further detailed in section "What investment strategy does this financial product follow?" in the Fund's prospectus have been 0%.
- The percentage of the Fund's votes in favour of separation of the roles of CEO and Chair of the Board of Directors of the invested companies, when presented with the opportunity, has been 100%.
- The percentage of investments in companies that have less than one female director on the board of directors has been 0%, while also engaging with certain investee companies to promote Board diversification towards at least

two female directors, or 30% of the board, whichever is greater.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
Fund's weighted GHG intensity (scope 1+2), in percentage points, below the Benchmark (at least 20%)	50.52%	49.46%
Fund's weighted GHG intensity (scope 1+2), in percentage points, below the Investment Universe (at least 20%)	32.03%	26.57%
Percentage of investments in companies having exposure to, or ties with excluded sectors and/or with additional exclusions	0.00%	0.00%
Percentage of Fund's votes in favor of separation of the roles of CEO and Chair of the board of directors of the invested companies, when presented with the opportunity	100.00%	100.00%
Percentage of investments in companies that have less than one female director	0.00%	0.00%
Percentage of investments in companies with less than two or 30% female directors	3.03%	3.95%

● **... And compared to previous periods?**

The Fund was not aligned with Article 8 objectives throughout the full period of 2024, making comparisons with prior periods incomplete. However, the portfolio's sustainability indicators remain consistent with the Fund's commitments.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Greenhouse gas intensity
- Board gender diversity
- Controversial weapons

Greenhouse gas (GHG) intensity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund committed to maintaining a portfolio GHG intensity (scope 1+2), at least 20% below that of the Benchmark and of the Investment Universe, whichever was the lowest.

Board gender diversity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Investment Manager engaged with the investee companies to encourage a minimum of 2 females, or 30% of the board, whichever was greater, as a minimum board gender diversity threshold (below referred to as "2 or 30%" threshold). The Fund did not invest in companies which had no female directors. In cases where the company had at least one female director but did not meet the "2 or 30%" threshold, the Investment Manager has committed that it will engage with the company and may vote against key committee members unless the company was in the process of rectifying the shortcoming. Failure to achieve, or present a clear and credible plan to achieve, the "2 or 30%" threshold within 3 years from establishment of the position would result in divestment from this company as soon as practicably possible. Divestment would normally occur within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Controversial weapons

The Fund did not invest in companies that were involved in the production or distribution of controversial weapons.

What were the top investments of this financial product?

Percentage of investments in companies with less than two or 30% female directors	21.31%	26.50%

● **... And compared to previous periods?**

The Fund was not aligned with Article 8 objectives throughout the full period of 2024, making comparisons with prior periods incomplete. However, the portfolio's sustainability indicators remain consistent with the Fund's commitments.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Greenhouse gas intensity
- Board gender diversity
- Controversial weapons

Greenhouse gas (GHG) intensity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund committed to maintaining a portfolio GHG intensity (scope 1+2), at least 20% below that of the Benchmark and of the Investment Universe, whichever was the lowest.

Board gender diversity

For the portion of the Fund's portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Investment Manager engaged with the investee companies to encourage a minimum of 2 females, or 30% of the board, whichever was greater, as a minimum board gender diversity threshold (below referred to as "2 or 30%" threshold). The Fund did not invest in companies which had no female directors. In cases where the company had at least one female director but did not meet the "2 or 30%" threshold, the Investment Manager has committed to engage with the company and may vote against key committee members unless the company was in the process of rectifying the shortcoming. Failure to achieve, or present a clear and credible plan to achieve, the "2 or 30%" threshold within 3 years from establishment of the position would result in divestment from this company as soon as practicably possible. Divestment would normally occur within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Controversial weapons

The Fund did not invest in companies that were involved in the production or distribution of controversial weapons.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.44% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.56%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) as well as securities held for diversification purposes which were involved in special situations, such as merger arbitrage and stressed or distressed credit.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

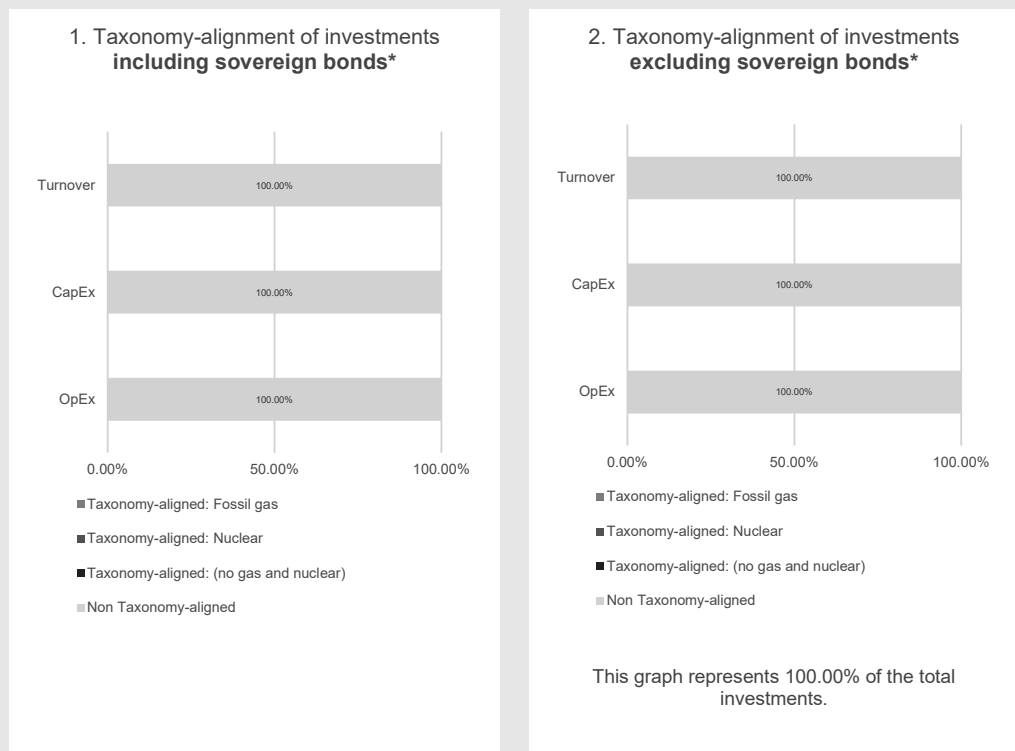

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 2.56% and included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund as well as securities held for diversification purposes which were involved in special situations, including merger arbitrage, stressed and distressed debt issuers. No minimum environmental or social safeguards were put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

For the portion of the Fund’s portfolio aligned with the environmental and/or social characteristics promoted by the Fund, the Fund has:

- Maintained at least a 20% lower portfolio GHG intensity (scope 1+2) compared to both Benchmark and the Investment Universe;
- Implemented negative screens to avoid certain controversial practices as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the precontractual disclosure of the Fund's prospectus;
- Avoided investment in companies without at least one female board director and committed to engage with certain investee companies to promote gender diversity, notably female representation, on the board of directors, where applicable;
- Voted to separate the roles of CEO and Chair of the Board of Directors of the investee companies, when presented the opportunity.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Sustainable Global Growth Fund (the “Fund”)

Legal Entity Identifier: W1CUI8HZMLU8JOVYZS28

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.20% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social (“E/S”) characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental impact (e.g., carbon emissions). The Investment Manager sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the “ESG”) profile, as captured by its proprietary ESG methodology. As part of its proprietary ESG methodology, the Investment Manager also uses binding criteria for the selection of portfolio securities.

The Fund allocated 98.59% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager’s proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager’s analysis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Weighted average MSCI ESG rating of the fund	8.00
Weighted average MSCI ESG rating of the MSCI World Index	5.38
Share of the companies in the portfolio that gain and maintain Science Based Target Initiative (“SBTI”)	57.20%
The share of companies in the portfolio that disclose environmental data through Carbon Disclosure Project (“CDP”) on an annual basis.	84.39%

Sustainability KPI Name	Value
The share of companies in the portfolio that have a board of directors with a minimum of 30% female representation	71.76%
The share of companies in the portfolio that have developed and are tracking an employee satisfaction or employee engagement survey	80.98%
The share of companies in the portfolio having exposure to ESG-based exclusions, with a commitment of strict adherence to the said exclusions.	0.00%

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund were in equity securities issued by companies which:

- derived at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals ("UN SDGs") (source: MSCI); or
- gained and maintained SBTi approved carbon emission reduction targets and were thus considered as contributing to fighting against climate change.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments caused significant harm to any sustainable investment objective.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion were not invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Exceptions could only be made after formal review of alleged violations was carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or determined that the company made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observed international conventions.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- board gender diversity;
- exposure to controversial weapons; and
- Violation of the UNGC Principles.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believed that these PAIs are applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to encourage them to establish and commit to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up the scale of committing to align with net zero targets, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believes this helps them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and to engage with companies that are laggards relative to their industry peers.

At the time of new investments for the above PAIs, the Investment Manager baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, are aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund's initial commitment was to engage with all companies that lack any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement. If a decision to divest occurred, divestment normally occurred within a period of one month, unless market conditions such as limitations on liquidity required a longer divestment period taking into account Shareholders' best interests.

Finally, the Fund was committed to excluding investments in companies that produced or distributed controversial weapons or who failed to comply with the UNGC Principles without positive outlook for remediation.

More information on how the Fund considered its PAIs may be found in the annual report of the Company.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-11-18 - 2025-06-30.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 18.52%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 38.68%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.41% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The portfolio had a weighted average MSCI ESG rating above the weighted average MSCI ESG rating of the benchmark (MSCI World Index).

The fund used engagement to encourage certain companies to meet environmental and/or social characteristics during the reference period. Engagement was also used to acquire information to determine if companies were meeting environmental and/or social characteristics.

The Fund also applied specific ESG-based exclusions and did not invest in companies which according to the Investment Manager’s analysis:

- violated the UNGC Principles or the Organization for OECD Guidelines for Multinational Enterprises (without positive perspective for improvement)
- derived 10% or more of their revenues from the production and/or distribution of weapons;
- were involved in the production, distribution, or wholesale trading of dedicated and/or key components of controversial weapons (i.e., antipersonnel mines, biological and chemical weaponry and cluster munitions);
- were involved in the manufacture, distribution, or wholesale trading of tobacco or tobacco products;
- derived 15% or more of their revenues from nuclear power generation.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin Technology Fund (the "Fund")

Legal Entity Identifier: 549300P9XZCZFA3DI319

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.55% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, cybersecurity and data privacy, support of human capital and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 98.46% of its assets to investments aligned with the E/S characteristics.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics promoted.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated AAA by proprietary ESG methodology	Value	Value	Value
	10.35%	10.18%	11.72%

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated AA by proprietary ESG methodology	55.75%	53.08%	52.80%
The share of companies rated A by proprietary ESG methodology	33.90%	36.74%	34.05%
The share of companies rated B by proprietary ESG methodology	0.00%	0.00%	1.44%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%	0.00%

● **... And compared to previous periods?**

The performance of the sustainability indicators was consistent with the prior period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTI) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
NVIDIA CORP	Information Technology	9.21%	United States
MICROSOFT CORP	Information Technology	8.22%	United States

INTUIT INC	Information Technology	2.03%	United States

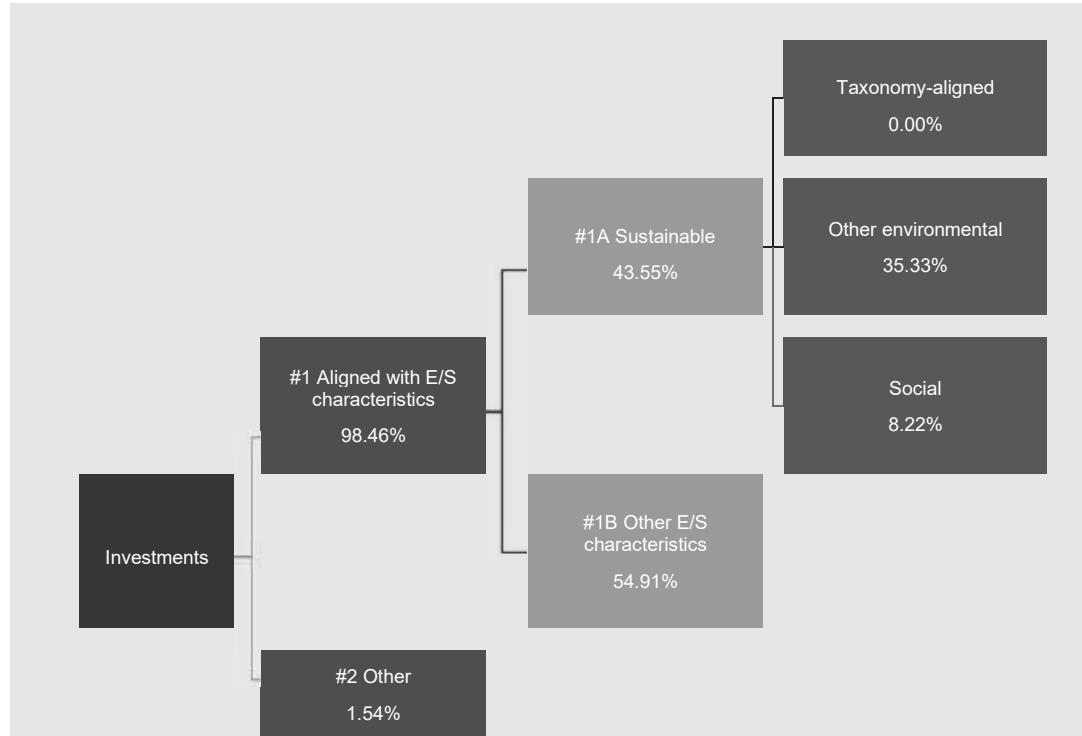

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 43.55%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.46% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.54%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) not aligned with the promoted characteristics.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

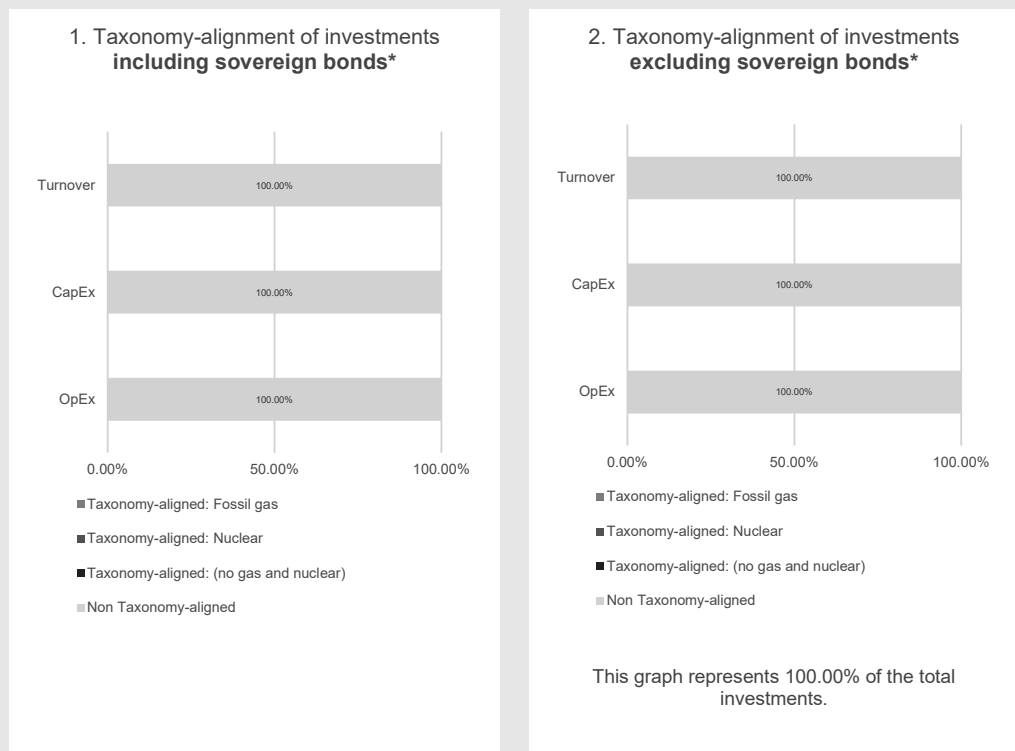

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

35.33%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

8.22%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 1.54% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Franklin U.S. Opportunities Fund (the "Fund")

Legal Entity Identifier: YWFJZZO29TGGRF43SH58

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.67% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social ("E/S") characteristics promoted by the Fund were specific to each company and industry in which the Fund operated. These characteristics consisted of inter alia, support of human capital, diversity and inclusion, employee satisfaction and/or environmental-related aspects (e.g., carbon emissions, water usage, and e-waste). Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by excluding certain issuers and sectors considered by the Investment Manager as harmful for the society while favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology.

The Fund allocated 99.16% of its assets to investments aligned with E/S characteristics.

How did the sustainability indicators perform?

The Fund successfully met the E/S characteristics it promoted by not owning companies rated B under the Investment Manager's proprietary criteria, as well as avoiding excluded companies as identified through the Investment Manager's analysis.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated AAA by proprietary ESG methodology	7.45%	10.44%	12.74%
The share of companies rated AA by proprietary ESG methodology	53.57%	50.93%	56.20%
The share of companies rated A by proprietary ESG methodology	38.99%	38.64%	30.14%

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of companies rated B by proprietary ESG methodology	0.00%	0.00%	0.93%
The share of companies having exposure to, or tying with excluded sectors and additional exclusions	0.00%	0.00%	0.00%

... And compared to previous periods?

The performance of the sustainability indicators were largely consistent with the prior period. The portfolio's allocation to the highest rated names (AAA) declined slightly due to the closure of some positions in AAA names in favour of increasing positions in AA rated securities. These moves were driven by assessments of risk/reward and relative valuation, rather than ESG concerns.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund are in equity securities issued by companies which derive at least 25% of their revenues from products or services that address at least one of the 17 United Nations Sustainable Development Goals (UN SDGs) (source: MSCI and internal assessment); or gain and maintain Science Based Target Initiative (SBTi) approved carbon emission reduction targets or equivalent and are thus considered as contributing to fighting against climate change.

The Fund's sustainable investments tended to be either those with carbon reduction plans, or those supporting SDG 3 – Good Health and Well Being.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager uses a combination of third-party (MSCI) Do No Significant Harm ("DNSH") test, United Nations Global Compact (UNGC) compliance test, Principal Adverse Impacts (PAI) considerations, and other ESG factors deemed material by the Investment Manager and which are embedded in the Investment Manager's fundamental research and proprietary ESG analysis to review if investments cause significant harm to any sustainable investment objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion will not be invested in companies that, according to MSCI, do not observe the main international conventions (UNGC principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights). Exceptions can only be made after formal review of alleged violations has been carried out and where the Investment Manager either disagrees with the conclusion that the company is complicit in violations of the principles of such conventions or has determined that the company has made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following principal adverse impacts (the "PAIs"):

- Scope 1 and Scope 2 greenhouse gas emissions;
- Scope 1+2 and material Scope 3 greenhouse gas emissions intensity; and
- Board gender diversity.

The consideration of the specified PAIs was tied to the Fund's fundamental investment analysis as well as the Fund's ESG assessment of investee companies. The Investment Manager believes that these PAIs were applicable to the widest range of the Fund's investments and represented the largest opportunity set for engagement.

With regards to greenhouse gas emissions, the Investment Manager was committed to engage with the investee companies to ensure they were establishing and committing to greenhouse gas emissions reductions plans, that are in accord with science based long term goals of net-zero emissions by 2050. The Investment Manager worked with companies to move them up to the scale of committing to align with net zero targets, aligning their emissions with net zero, being aligned to achieve net zero, and reaching net zero emissions. While the Investment Manager understood that, in the short-term, absolute emissions may increase for some companies as they work on transition plans, therefore, the consideration of greenhouse gas emission intensity helped the Investment Manager to monitor that overall companies' greenhouse gas emissions were trending in a direction aligned with greenhouse gas emissions reductions over time.

With regards to board gender diversity, the Investment Manager was committed to engage with the investee companies to ensure their boards are representative of the customers they serve as the Investment Manager believed this helped them to better understand their consumer base, create better products, and ultimately be more efficient companies. Initially, the Investment Manager worked to identify companies that did not have board gender diversity and set time-based thresholds for drafting a plan to increase board gender diversity. The Investment Manager believed it is reasonable to increase the acceptable level of board gender diversity over time and engaged with companies that were laggards relative to their industry peers.

For the above PAIs, the Investment Manager initially baselined the portfolio and investee companies and looked to drive improvement on both fronts over time through engagement. The Fund was engaged with investee companies to set and follow science-based emissions reductions targets and sought to follow a portfolio coverage approach, with increasing weight in companies that have achieved net zero greenhouse gas emissions, were aligned with net zero or are aligning. The goal for the portfolio is to achieve 100% in these categories by 2040. For board gender diversity, the Fund engaged with all companies that lacked any gender diversity with an expectation for them to develop at minimum a plan to increase board gender diversity within 18 months. The Investment Manager intends to increase the expectations of board gender diversity over time. Consequences of a lack of improvement on these measures for investee companies eventually include divestment if the Investment Manager does not see a path for improvement.

Finally, the Fund excluded companies that produce or distribute controversial weapons or who failed to comply with the United Nations Global Compact Principles (the "UNGC Principles") without positive outlook for remediation.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

8.90%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 0.84% and included liquid assets held for the purposes of servicing the day-to-day requirements of the Fund. It also includes investments for which there is insufficient data for them to be considered ESG-related investments. Due to the neutral nature of the asset, no minimum safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through its ESG analysis, the Investment Manager identified companies that would be excluded under the binding criteria and avoided investing in them. The Fund did not invest in companies that, according to the Investment Manager’s analysis:

- Seriously violate the UNGC Principles (without positive perspective) - for that purpose, the Fund did not invest in companies which the Investment Manager assessed as fail under the UNGC Principles;
- Generate more than 10% of revenue from the production and/or distribution of weapons;
- Are involved in the production, distribution or wholesale trading of dedicated and/or key components of banned weapons (i.e., antipersonnel mines, biological and chemical weaponry, cluster munitions and nuclear weapons);
- Manufacture tobacco or tobacco products or those that derive more than 5% of their revenue from such products;
- Generate more than 10% of their revenue from thermal coal extraction or coal-based power generation.

For companies where engagement was applicable related to specific PAIs the Investment Manager initiated engagements, encouraging, amongst others, companies to set targets for emissions reductions in line with the Paris Agreement or to improve the gender diversity of the board. The Investment Manager believes that given the timeframe from engagement companies should have additional time to begin implementing improvement plans before undertaking additional steps, including divestment.

Finally, the Investment Manager did make use of its proprietary ESG rating methodology. This rating assigned to issuers by the Investment Manager comprises four grades: AAA (best in class/very good), AA (good), A (fair) and B (needs improvement). Based on this proprietary framework, the Fund did not invest in companies that were rated B.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton All China Equity Fund (the "Fund")

Legal Entity Identifier: 254900LVVE1QC2PFO824

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.98% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China All Shares 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	19.78%	19.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	56.10%	55.10%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	22.15%	21.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	17.04%	20.20%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	37.78%	42.60%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	43.20%	33.40%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	5.57	4.80
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	3.77	3.20

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
TENCENT HOLDINGS LTD	Communication Services	9.50%	China
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	7.56%	China
Xiaomi Corp	Information Technology	6.64%	China
Meituan	Consumer Discretionary	4.71%	China
CHINA CONSTRUCTION BANK CORP	Financials	4.38%	China
KWEICHOW MOUTAI CO LTD	Consumer Staples	3.67%	China
Focus Media Information Technology Co Ltd	Communication Services	3.60%	China
CHINA YANGTZE POWER CO LTD	Utilities	3.06%	China
Trip.Com Group Ltd	Consumer Discretionary	2.80%	China
BYD CO LTD	Consumer Discretionary	2.74%	China
Jiangsu Hengrui Pharmaceuticals Co Ltd	Health Care	2.71%	China

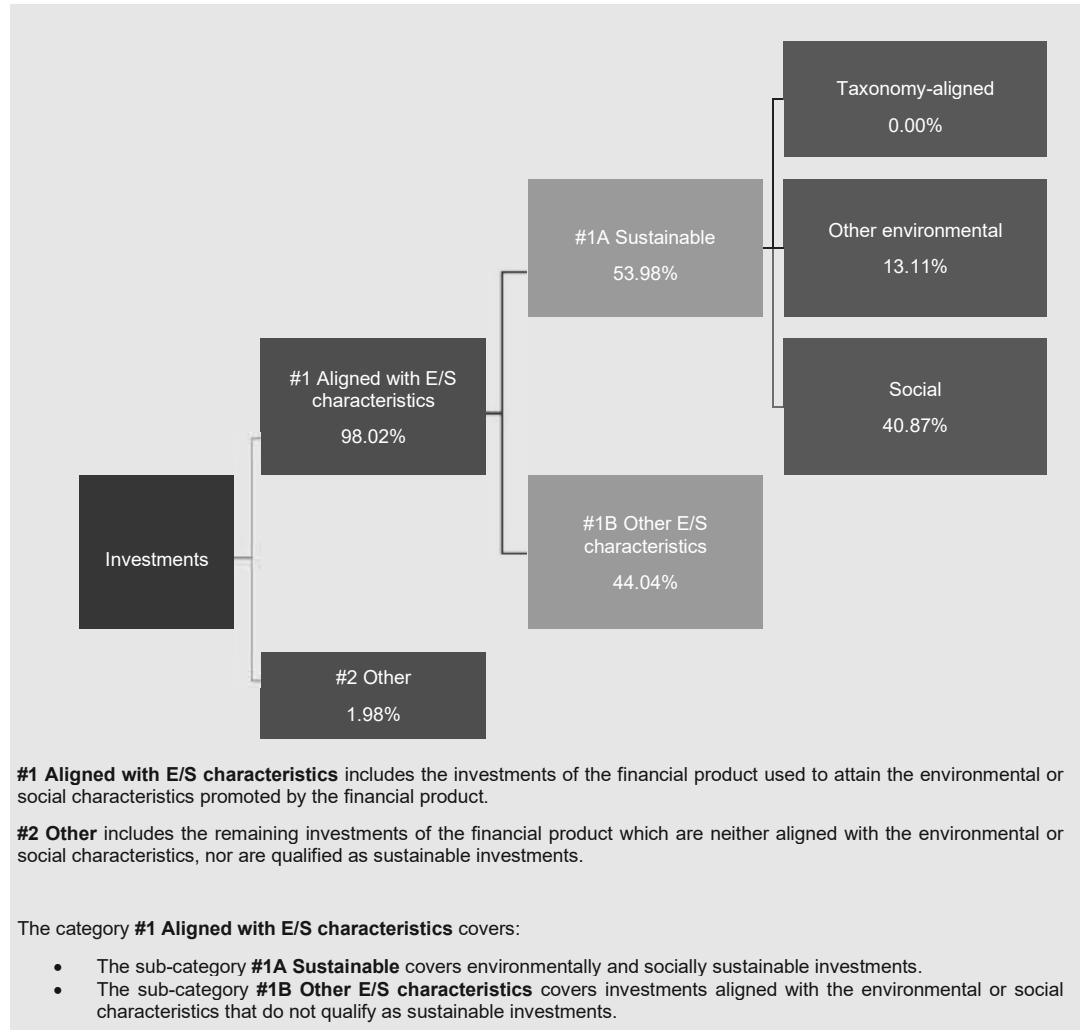

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 53.98%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

98.02% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.98%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 53.98% of its net assets in sustainable investments, with a 13.11% allocation of net assets towards environmental objectives and 40.87% towards social objectives.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	98.02%	96.21%
#2 Other	1.98%	3.79%
#1A Sustainable	53.98%	55.00%
#1B Other E/S characteristics	44.04%	41.21%
Taxonomy-aligned	N/A	N/A
Other environmental	13.11%	9.00%
Social	40.87%	46.00%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Consumer Discretionary	36.35%
Communication Services	16.16%
Financials	9.75%
Information Technology	9.55%
Industrials	7.90%
Consumer Staples	7.51%
Health Care	3.23%
Utilities	3.06%
Materials	1.98%
Energy	1.55%
Real Estate	0.97%
Top sub-sector	% of Assets
Hotels, Restaurants & Leisure	10.42%
Interactive Media & Services	9.75%
Broadline Retail	9.71%
Technology Hardware, Storage & Peripherals	6.64%
Banks	6.64%
Electrical Equipment	6.02%
Beverages	5.36%
Automobiles	5.20%
Media	3.91%
Household Durables	3.90%
Insurance	3.11%
Independent Power & Renewable Electricity Producers	3.06%
Pharmaceuticals	2.71%
Electronic Equipment, Instruments & Components	2.69%
Entertainment	2.50%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 13.11% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 40.87% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.98% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Asian Bond Fund (the "Fund")

Legal Entity Identifier: M2HMB6S3E6TLVJDI1L40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 61.68 and the investment universe average base ESG score was 50.85 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In this regard, the Fund allocated 94.24% of its assets to investments aligned with the E/S characteristics. This included currency-related derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators performed as anticipated.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%
Share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%	N/A	N/A
The ESG score difference between the Fund's portfolio and the investment universe	10.83	9.33	7.25

... And compared to previous periods?

The values were in line with previous periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points

Social violations by the investee countries were monitored as part of the Investment Manager's proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country

Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government Bonds	94.24%
Top sub-sector	% of Assets
Government Bonds	94.24%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 5.76% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own any corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.40% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI All Country Asia ex-Japan 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

● How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	28.94%	22.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	54.32%	61.60%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	14.83%	13.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	42.53%	37.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	44.90%	43.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	10.66%	16.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	6.32	6.50
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.46	4.00

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD	Information Technology	9.78%	Taiwan, Province Of China
TENCENT HOLDINGS LTD	Communication Services	7.08%	China
ICICI BANK LTD	Financials	6.01%	India
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	4.41%	China
AIA GROUP LTD	Financials	4.29%	Hong Kong
SAMSUNG ELECTRONICS CO LTD	Information Technology	3.97%	South Korea
HDFC BANK LTD	Financials	3.69%	India
Eternal Ltd	Consumer Discretionary	3.05%	India

Contemporary Amperex Technology Co Ltd	Industrials	2.60%	China
Meituan	Consumer Discretionary	2.40%	China

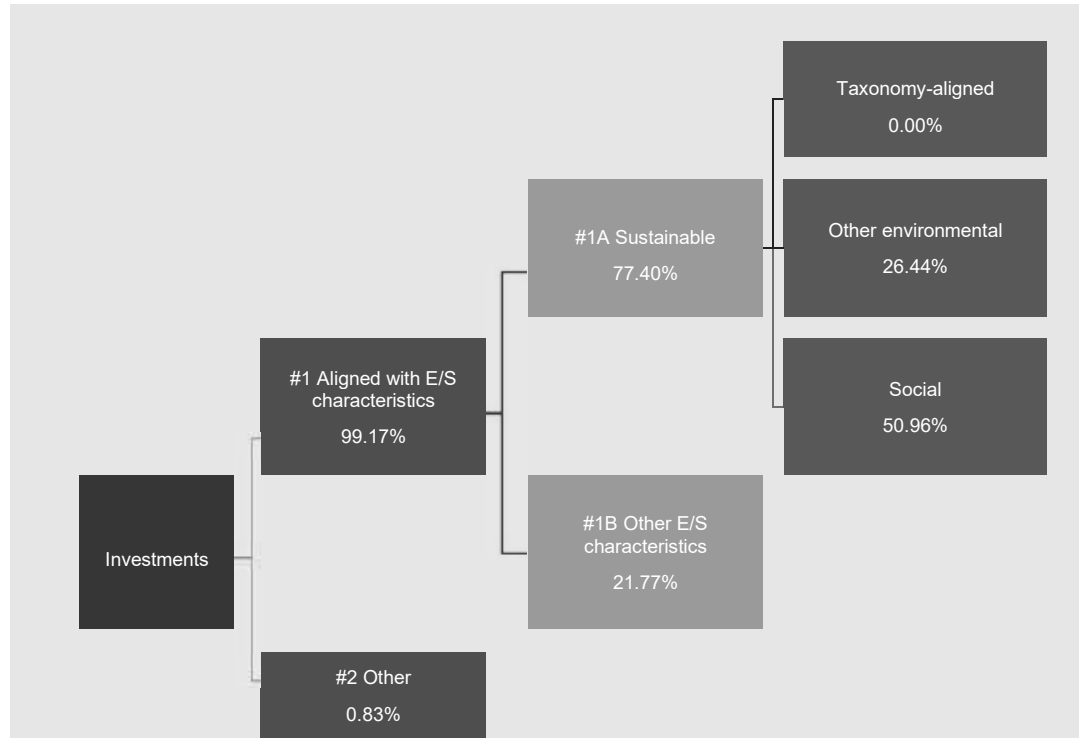

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 77.40%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.17% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (0.83%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 77.40% of its net assets in sustainable investments, with a 26.44% allocation of net assets towards environmental objectives and 50.96% towards social objectives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	99.17%	98.80%
#2 Other	0.83%	1.20%
#1A Sustainable	77.40%	79.50%
#1B Other E/S characteristics	21.77%	19.30%
Taxonomy-aligned	N/A	N/A
Other environmental	26.44%	31.80%
Social	50.96%	47.70%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	27.45%
Consumer Discretionary	23.77%
Information Technology	21.70%
Communication Services	7.08%
Industrials	5.49%
Consumer Staples	4.82%

Materials	2.09%
Real Estate	1.23%
Utilities	0.78%
Energy	0.54%
Top sub-sector	% of Assets
Banks	17.18%
Semiconductors & Semiconductor Equipment	14.77%
Hotels, Restaurants & Leisure	13.00%
Interactive Media & Services	7.08%
Insurance	6.73%
Technology Hardware, Storage & Peripherals	4.49%
Broadline Retail	4.41%
Automobiles	3.66%
Electrical Equipment	2.60%
Beverages	2.51%
Capital Markets	2.47%
Health Care Providers & Services	2.19%
Machinery	1.87%
Electronic Equipment, Instruments & Components	1.81%
Pharmaceuticals	1.79%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 26.44% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 50.96% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 0.83% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Asian Smaller Companies Fund (the "Fund")

Legal Entity Identifier: 549300X9Z86X9W62RI64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 55.59% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	12.70%	12.30%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	53.36%	55.00%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	29.48%	28.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	10.26%	8.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	47.36%	49.80%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	37.92%	38.30%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-bribery matters.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex 1 of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
BAJAJ HOLDINGS & INVESTMENT LTD	Financials	6.07%	India

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 55.59%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.54% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.46%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 55.59% of its net assets in sustainable investments, with a 12.61% allocation of net assets towards environmental objectives and 42.98% towards social objectives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	95.54%	96.20%
#2 Other	4.46%	3.80%
#1A Sustainable	55.59%	52.60%
#1B Other E/S characteristics	39.95%	43.60%
Taxonomy-aligned	N/A	N/A
Other environmental	12.61%	13.80%
Social	42.98%	38.80%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Information Technology	23.45%
Financials	21.71%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 12.61% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 42.98% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 4.46% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton China A-Shares Fund (the "Fund")

Legal Entity Identifier: 5493009XRQ09Z4RT5K40

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.31% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the

Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favours issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China A Onshore Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	28.68%	33.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	34.66%	37.90%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	32.66%	20.60%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	13.34%	18.80%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	24.58%	36.20%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	58.08%	36.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	5.74	4.80
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	3.09	2.50

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement are considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
CHINA CONSTRUCTION BANK CORPORATION	Financials	9.45%	China
Midea Group Co., Ltd.	Consumer Discretionary	6.92%	China
China Merchants Bank Co., Ltd.	Financials	5.45%	China

Focus Media Information Technology Co., Ltd.	Communication Services	4.33%	China
Yantai China Pet Foods Co Ltd	Consumer Staples	4.11%	China

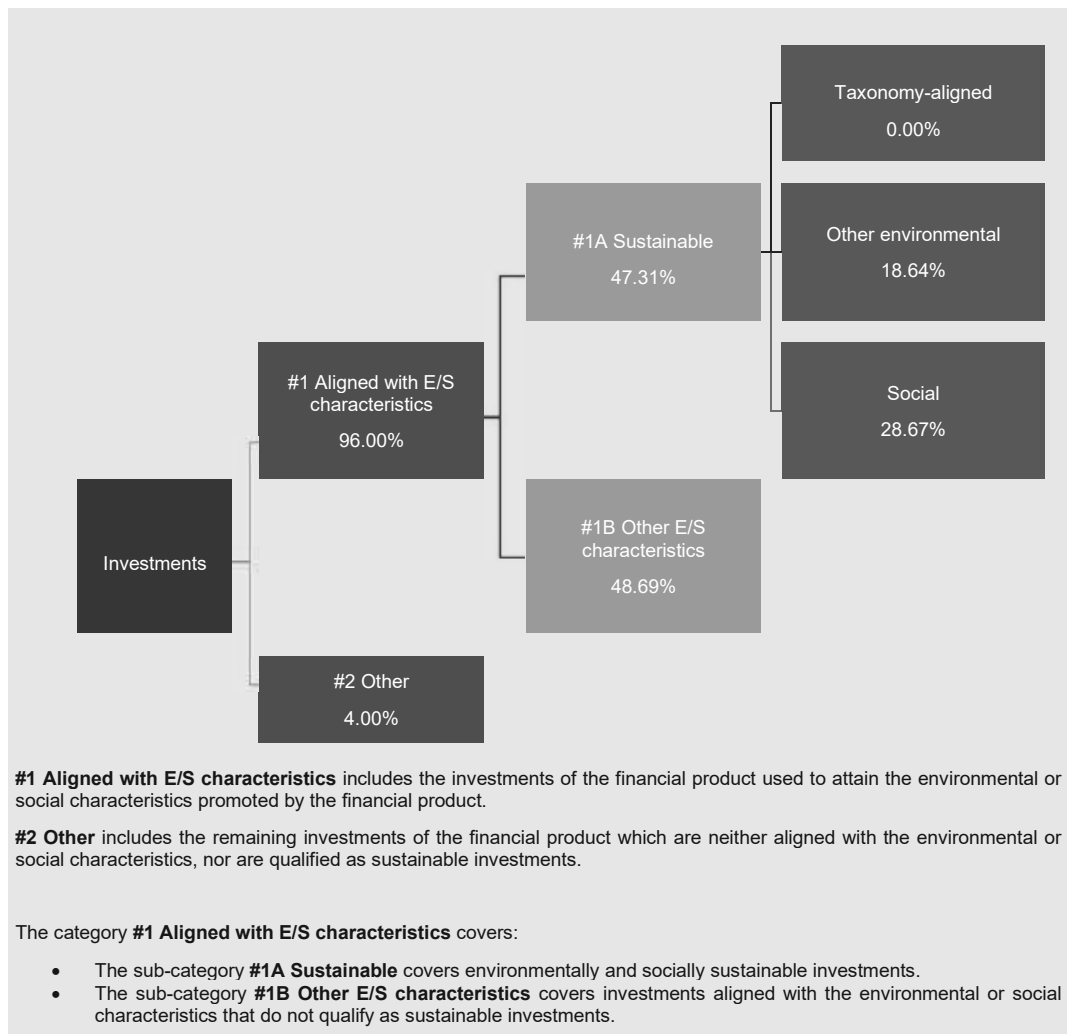

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 47.31%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.00% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.00%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 47.31% of its net assets in sustainable investments, with a 18.64% allocation of net assets towards environmental objectives and 28.67% towards social objectives.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	96.00%	91.87%
#2 Other	4.00%	8.13%
#1A Sustainable	47.31%	49.00%
#1B Other E/S characteristics	48.69%	42.87%
Taxonomy-aligned	N/A	N/A
Other environmental	18.64%	19.90%
Social	28.67%	29.10%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	22.60%
Consumer Discretionary	18.21%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 18.64% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 28.67% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 4.00% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton China Fund (the "Fund")

Legal Entity Identifier: 5493007JAWIPTL7FSK86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.07% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI China 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	18.15%	18.20%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	58.34%	54.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	20.49%	23.10%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	15.36%	19.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	37.42%	38.40%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	44.19%	38.30%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	5.55	4.90
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	3.77	3.20

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Tencent Holdings Limited	Communication Services	9.49%	China
Alibaba Group Holding Limited	Consumer Discretionary	9.15%	Hong Kong

Focus Media Information Technology Co., Ltd.	Communication Services	3.12%	China

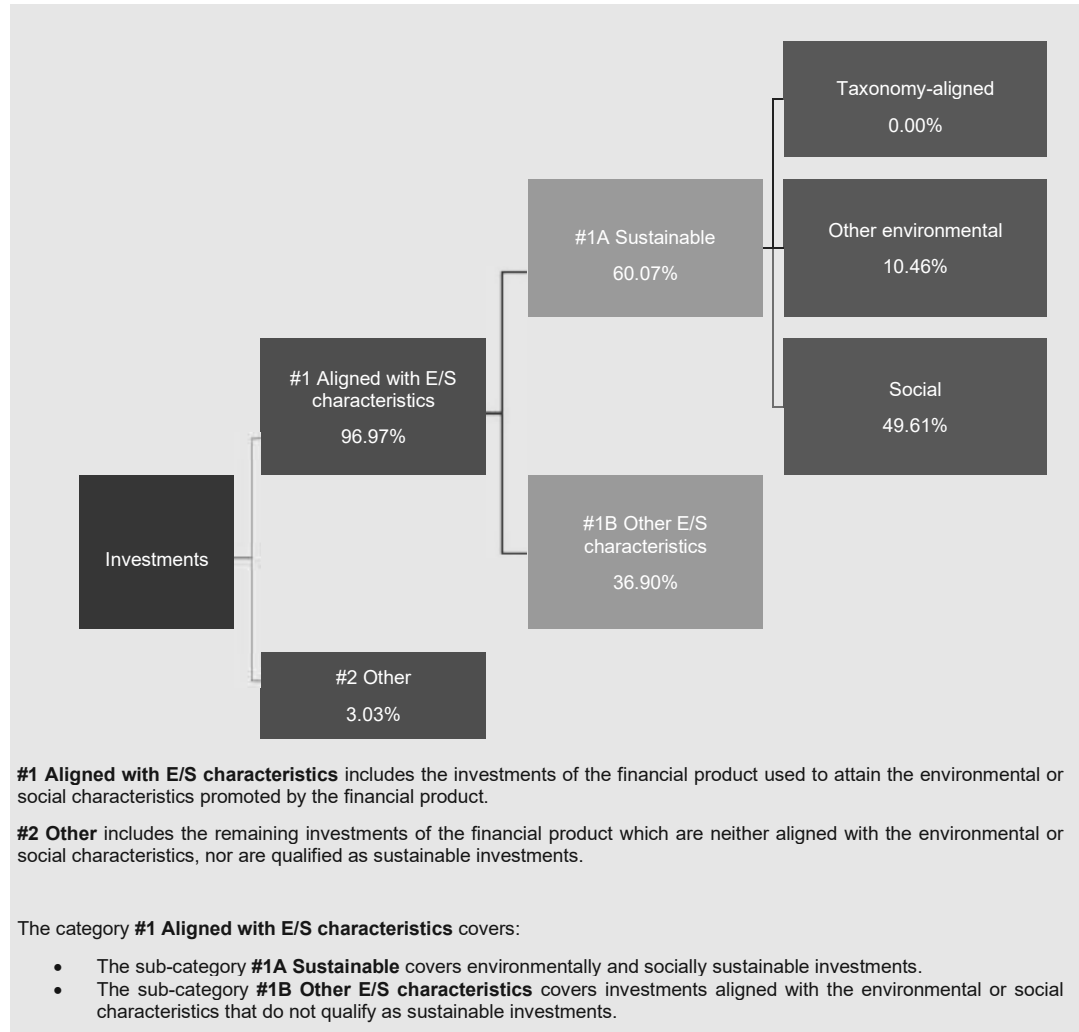

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 60.07%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.97% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.03%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 60.07% of its net assets in sustainable investments, with a 10.46% allocation of net assets towards environmental objectives and 49.61% towards social objectives.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	96.97%	95.78%
#2 Other	3.03%	4.22%

Household Durables	1.99%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 10.46% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 49.61% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 3.03% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Bond Fund (the "Fund")

Legal Entity Identifier: HEP77YQWMX55OZ6FJE32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") attained these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings to exclude them from the Fund's investment universe dedicated to corporate bonds;
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");

- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio were constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 50.55 and the investment universe average base ESG score was 49.02 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promotes.

In that regard, the Fund allocated 94.30% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency-related derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
	Value	Value	Value
The shares of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%
The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%	N/A	N/A
The ESG score difference between the Fund's portfolio and the investment universe	1.53	4.48	0.73

● **... And compared to previous periods?**

The values were in line with previous periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of the Investment Manager's proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESGI"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

The Fund effectively held 0% in corporate bonds over the reference period.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

Largest investments	Sector	% of Assets	Country
Uruguay Government International Bond	Government Bonds	9.31%	Uruguay
MALAYSIA GOVT	Government Bonds	8.90%	Malaysia
ECUADOR REPUBLIC OF	Government Bonds	7.12%	Ecuador
SOUTH AFRICA REPUBLIC OF	Government Bonds	7.06%	South Africa
Kazakhstan Government Bond - MEUKAM	Government Bonds	6.84%	Kazakhstan
TITULOS DE TESORERIA B	Government Bonds	6.33%	Colombia
INTERNATIONAL BANK RECON & DEV	Government Bonds	5.09%	United States

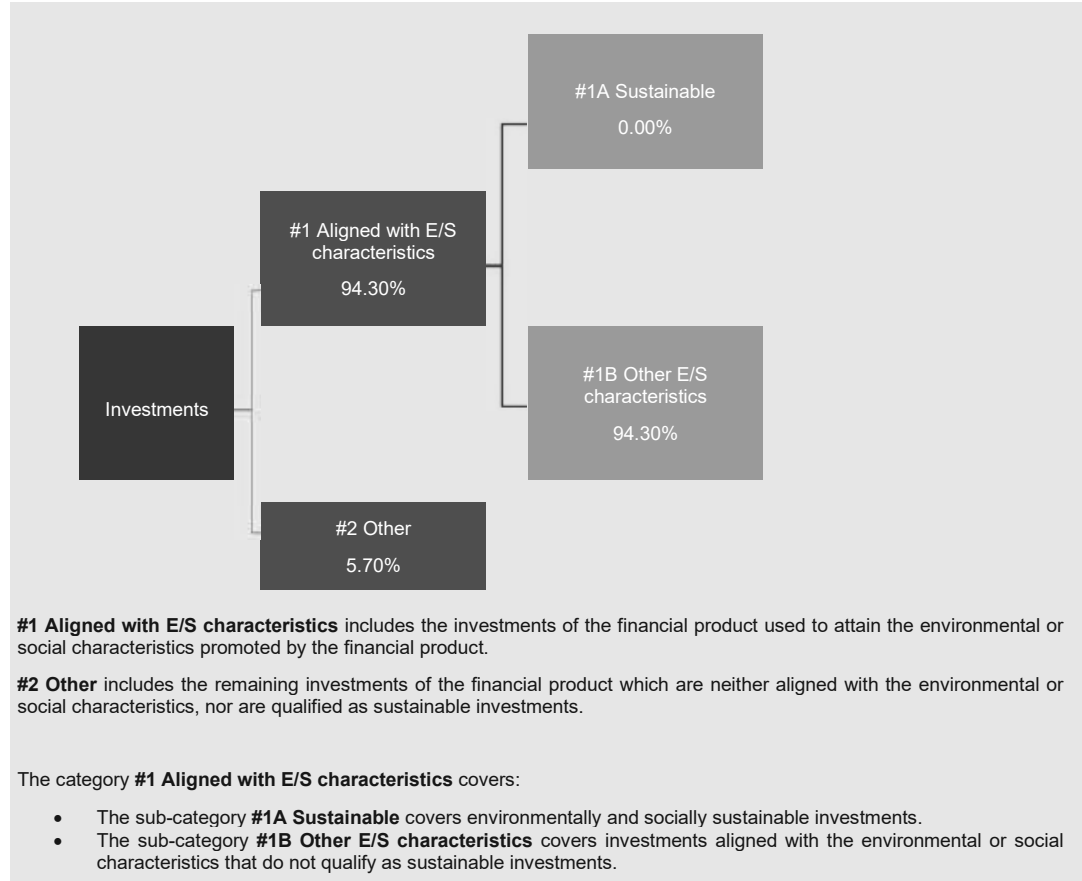

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

94.30% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (5.70%) includes liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	94.30%	94.63%	93.99%
#2 Other	5.70%	5.37%	6.01%
#1A Sustainable	N/A	N/A	N/A
#1B Other E/S characteristics	94.30%	94.63%	93.99%
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	94.28%
Communication Services	0.01%
Top sub-sector	% of Assets
Government Bonds	94.28%
Wireless Telecommunication Services	0.01%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 5.70% and consisted of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivative.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund effectively held 0% in corporate bonds over the reference period.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets ex-China Fund (the "Fund")

Legal Entity Identifier: 254900RZ0VV5XKE48T32

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 85.63% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI Emerging Markets ex China 10/40 Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Sustainability KPI Name	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	35.33%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	52.45%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	10.12%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	25.32%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	48.68%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	23.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	6.58
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	5.23

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was only made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-10-22 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.31%	Taiwan, Province Of China
NASPERS LIMITED	Consumer Discretionary	5.14%	South Africa
HDFC BANK LIMITED	Financials	4.57%	India

HYUNDAI MOTOR COMPANY	Consumer Discretionary	2.07%	South Korea

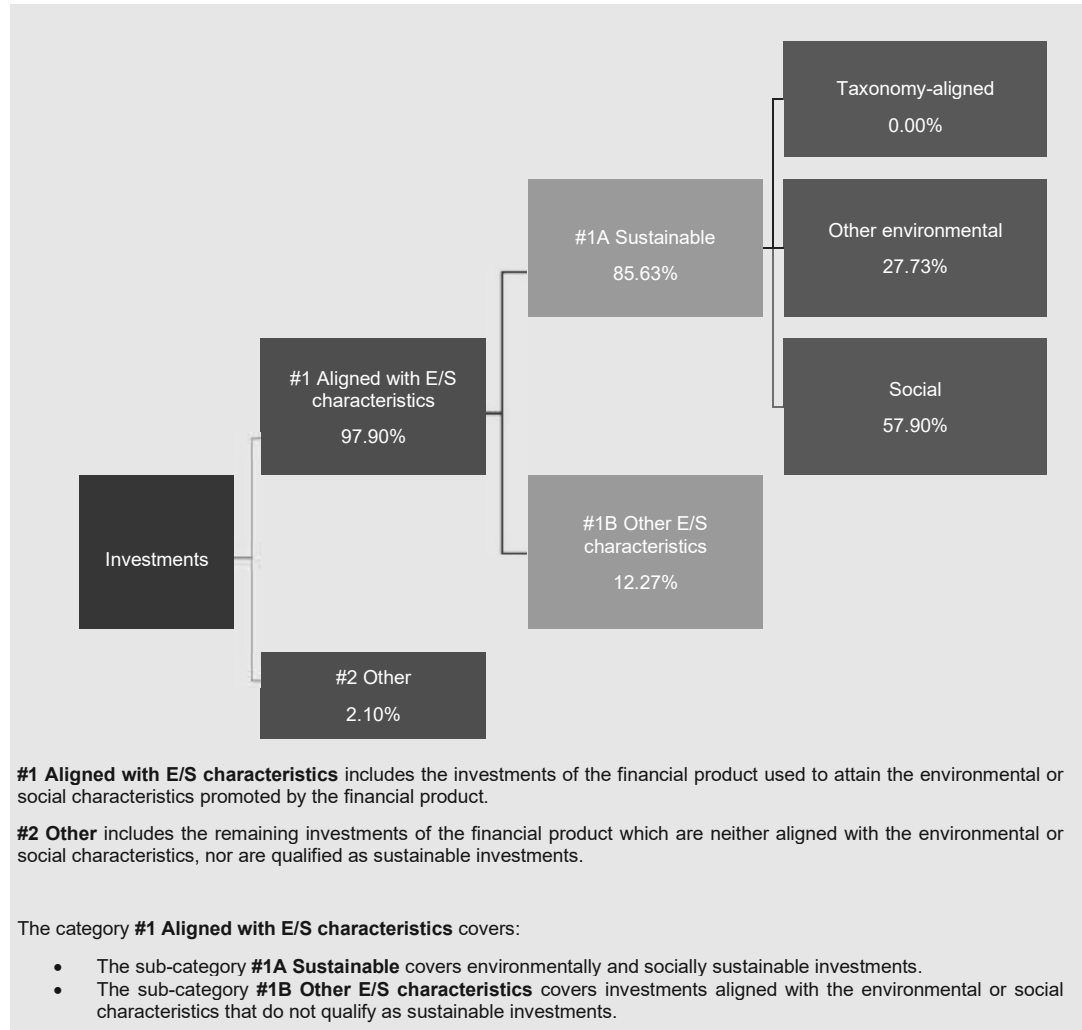

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 85.63%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.90% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.10%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 85.63% of its net assets in sustainable investments, with a 27.73% allocation of net assets towards environmental objectives and 57.90% towards social objectives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Financials	30.16%
Information Technology	29.78%
Consumer Discretionary	11.57%
Industrials	5.44%
Health Care	4.34%
Consumer Staples	4.13%

Industrial Conglomerates	2.56%
Oil, Gas & Consumable Fuels	2.26%
Consumer Finance	2.16%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 27.73% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 57.90% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 2.10% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Fund (the "Fund")

Legal Entity Identifier: 549300N1D1LWXSXW8XY56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.75% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology,
- Committing to have an ESG score at Fund level higher than the MSCI ESG score of the Fund's benchmark (MSCI Emerging Markets Index), referenced in Appendix F to the Prospectus ("the Benchmark"),
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund also maintained a weighted average ESG score higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology. Finally, the Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

2. The weighted average base ESG score of the portfolio and average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology.

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	25.82%	22.80%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	60.11%	59.50%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	12.34%	13.90%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	26.31%	28.40%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	43.01%	35.80%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	28.93%	32.00%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%
The weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	6.49	6.40
The average ESG score of the Benchmark, as measured by MSCI ESG Rating Methodology	4.53	4.10

● **... And compared to previous periods?**

For comparisons to previous periods, please refer to the table provided in the previous question.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights. An exception was made in one case after a formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions. As a result, and per the Investment Manager's analysis, the Fund's sustainable investments were aligned with these principles.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises. An exception was made in one case after formal review of alleged violations had been carried out and where the Investment Manager either disagreed with the conclusion that the company was complicit in violations of the principles of such

conventions or had determined that the company had made and implemented positive changes deemed satisfactory to appropriately address the deficiency/violation. The severity of the violation, response, frequency, and nature of the involvement were considered in making a judgement on whether the company observes international conventions.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	9.99%	Taiwan, Province Of China
ICICI BANK LIMITED	Financials	5.08%	India
Prosus N.V.	Consumer Discretionary	4.77%	Netherlands

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 82.75%.

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

98.26% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.74%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes is not aligned with the promoted characteristics. Furthermore, the Fund invested 82.75% of its net assets in sustainable investments, with a 27.83% allocation of net assets towards environmental objectives and 54.91% towards social objectives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	98.26%	96.25%
#2 Other	1.74%	3.75%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 27.83% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 54.91% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 1.74% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes and are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund maintained a weighted average ESG score of the Fund higher than the average ESG score of the Benchmark, as measured using the MSCI ESG Ratings Methodology;
- The Fund applied ESG exclusions further described in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Smaller Companies Fund (the "Fund")

Legal Entity Identifier: 5493006EW07Y7KY7V319

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: 0.00%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.99% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund varied by the composition of the portfolio as they are specific to each company or industry the Fund invests in. These characteristics, for example, included the reduction of greenhouse gas emissions, resource efficiency, waste prevention and recycling, pollution prevention and control, good labour standards, fair wages, diversity and gender balance, health & safety practices, or alignment with the international business conduct principles. Templeton Asset Management Ltd. (the "Investment Manager") attained these characteristics by:

- Favouring issuers with a proprietary score of 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology.
- Implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" of the pre-contractual disclosure of the Fund.

Over the period, the issuers owned in the Fund all scored a 1 (appropriate) or better for their environmental, social and governance (the "ESG") profile, as captured by the Investment Manager's proprietary ESG methodology. The Fund, according to the Investment Manager's analysis, did not breach any of the listed ESG exclusions.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund. The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

How did the sustainability indicators perform?

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted were:

1. The share of investee companies rated 3 (Strong), 2 (Good), 1 (Appropriate), and 0 (Poor) by the Investment Manager's proprietary ESG methodology;

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary E&S methodology	15.02%	12.60%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary E&S methodology	52.57%	51.90%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary E&S methodology	30.06%	32.80%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary E&S methodology	0.00%	0.00%
The share of investee companies rated 3 (Strong) by the Investment Manager's proprietary G methodology	8.44%	6.10%
The share of investee companies rated 2 (Good) by the Investment Manager's proprietary G methodology	48.71%	48.70%
The share of investee companies rated 1 (Appropriate) by the Investment Manager's proprietary G methodology	40.48%	42.50%
The share of investee companies rated 0 (Poor) by the Investment Manager's proprietary G methodology	0.00%	0.00%

● **... And compared to previous periods?**

Compared to the previous periods, the sustainability indicators were generally similar.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investments was to contribute to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas (3 social and 3 environmental) linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments contributed to this objective by ensuring a company's net revenue attributable to the sustainable activities (six outcome areas) were above a predetermined applicable threshold. The Investment Manager applies a "pass-fail approach" in determining whether an investment is sustainable, considering a position fully sustainable to the extent that the net revenues (or other relevant metrics such as loan book for financial companies) generated from sustainable activities across the six positive outcome areas at the level of the relevant issuer exceeds a predetermined threshold. Please refer to What was the proportion of sustainability-related investments? to view the asset allocation of sustainability-related investments over the period.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sustainable investments, the Do No Significant Harm (the "DNSH") assessment was integrated into the strategy through ESG minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Manager examined negative externalities by screening for severe environmental and social controversies through third party ESG data provided by MSCI. All sustainable investments passed the ESG minimum standards set for DNSH i.e. they do not exhibit severe environmental or social controversies that have not been resolved or without a positive forward-looking view. Additionally, absence of severe negative environmental or social externalities were captured and formed part of Investment Manager's assessment of the issuer.

Lastly, the Investment Manager (i) applied exclusions as further described in the investment strategy section of the Prospectus and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performed this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis for its sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund's sustainable investments portion did not invest in companies that, according to MSCI, did not observe the main international conventions United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund specifically considered the following PAIs:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies;
- Violations of UNGC Principles and OECD Guidelines; and
- Exposure to controversial weapons.

As part of research process, the Investment Manager adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Manager takes a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Manager and defined below, the Investment Manager monitored and engaged with these companies to encourage them to set adequate emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold is set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified companies where further analysis was required. On these names, the Investment Managers have conducted deeper research and contacted the company to understand further their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises

The Fund did not invest in companies that, according to MSCI, do not observe UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Manager's controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
BAJAJ HOLDINGS & INVESTMENT LTD	Financials	5.72%	India
FPT CORP	Information Technology	3.91%	Vietnam
INTERNATIONAL CONTAINER TERMINAL SERVICES INC	Industrials	3.57%	Philippines

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 59.99%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.64% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.36%) was not aligned with the promoted characteristics and consisted primarily of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes. Furthermore, the Fund invested 59.99% of its net assets in sustainable investments, with a 11.14% allocation of net assets towards environmental objectives and 48.85% towards social objectives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	97.64%	97.27%
#2 Other	2.36%	2.73%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The Fund invested in 11.14% sustainable investments with an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Fund invested in 48.85% sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 2.36% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes as well as derivatives held for hedging and/or efficient portfolio management purposes that are not aligned with the promoted characteristics. No minimum environmental and/or social safeguards had been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy were monitored through the reference period by the investment team and investment compliance. These were not at the discretion of the Investment Manager and can be summarised as follows:

- The Fund excluded companies rated 0 (poor) under proprietary ESG methodology;
- The Fund applied ESG exclusions further described in the section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Emerging Markets Sustainability Fund (the "Fund")

Legal Entity Identifier:
549300OLKEOOKH5MEX70

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> YES	<input type="radio"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 36.93% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 58.87%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Fund had a sustainable investment objective in accordance with Article 9 of the Sustainable Finance Disclosure Regulation (the "SFDR"). In its implementation of the Fund's environmental, social, governance ("ESG") process, Franklin Templeton Investment Management Limited and Templeton Asset Management Limited (the "Investment Managers") pursued the sustainable investment objective by investing in companies located or having their principal business activities in developing or emerging nations and which contributed to a positive social and/or environmental outcome. The Fund measured the attainment of the sustainable investment objective through its exposure to companies contributing to positive social and/or environmental outcome areas, using its proprietary ESG ratings system further described in the Fund's pre-contractual disclosure. The Fund also ensured that its sustainable investments did not cause significant harm to any environmental or social sustainable investment objective. As part of its investment decision making process, the Fund's ESG process used binding criteria for the selection of underlying assets and applied specific ESG exclusions.

In this regard, using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period, 95.80% of the Fund's assets contributed to the sustainable investment objective.

The six positive outcome areas, being 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

Breakdown of Fund measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

Portfolio Breakdown by alignment assessment (%)

- 50%+ of revenues: 85.79
- 25-49% of revenues: 10.02
- 10-24% of revenues: 0.0

- 0-9% of revenues: 0.0
- Cash: 4.20

Portfolio breakdown by internal ESG rating (%)

- AAA: 27.40
- AA: 54.86
- A: 13.54
- BBB: 0.00
- BB: 0.00
- B: 0.00
- CCC: 0.00
- Cash: 4.20

The Fund did not use derivatives to attain its sustainable investment objective. Additionally, the Fund did not use a reference benchmark to attain its sustainable investment objective.

● **How did the sustainability indicators perform?**

The sustainability indicators used to measure the attainment of the sustainable investment objective are:

1. exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security; and
2. exposure to companies with alignment to the United Nations Sustainable Development Goals ("UN SDGs").

Below is a breakdown of the portfolio's investments measured using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period.

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.02
- Wellbeing: 16.00
- Decent Work: 28.85

Environmental

- Healthy Ecosystems: 0.00
- Climate Stability: 36.45
- Resource Security: 0.48

Cash: 4.20

2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.55
- SDG 3: Good Health and Well-Being, 12.41
- SDG 7: Affordable and Clean Energy, 2.00
- SDG 8: Decent Work and Economic Growth, 24.06
- SDG 9: Industry, Innovation, and Infrastructure, 31.25
- SDG 10: Reduced Inequalities, 12.80
- SDG 11: Sustainable Cities and Communities, 0.27
- SDG 12: Responsible Consumption and Production, 0.48
- SDG 13: Climate Action, 7.98
- Cash: 4.20

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
	Value	Value	Value
Exposure to companies contributing to positive social and/or environmental outcome areas across Basic Needs, Wellbeing, Decent Work, Healthy Ecosystems, Climate Stability, and Resource Security	95.80%	95.60%	95.48%
Exposure to companies with alignment to the UN SDGs.	95.80%	95.60%	95.48%

● **... And Compared to Previous Periods?**

Here is a comparison of this year's average figures vs. last year's figures:

1. Portfolio breakdown by contribution to positive outcome area (%):

Social

- Basic Needs: 14.02 (14.3)
- Wellbeing: 16.00 (13.4)

- Decent Work: 28.85 (27.5)

Environmental

- Healthy Ecosystems: 0.0 (0.0)
- Climate Stability: 36.45 (39.6)
- Resource Security: 0.48 (0.8)

Cash: 4.20 (4.5)

2. Portfolio breakdown by alignment to the UN SDGs (%):

- SDG 1: No Poverty, 4.55 (4.9)
- SDG 3: Good Health and Well-Being, 12.41 (12.8)
- SDG 7: Affordable and Clean Energy: 2.00 (0.0)
- SDG 8: Decent Work and Economic Growth, 24.06 (22.2)
- SDG 9: Industry, Innovation, and Infrastructure, 31.25 (33.7)
- SDG 10: Reduced Inequalities, 12.80 (10.0)
- SDG 11: Sustainable Cities and Communities, 0.27 (0.0)
- SDG 12: Responsible Consumption and Production, 0.48 (0.8)
- SDG 13: Climate Action, 7.98 (11.2)
- Cash: 4.20 (4.4)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Do No Significant Harm ("DNSH") assessment has been integrated into the strategy through environmental, social and governance ("ESG") minimum standards. These minimum standards have been adhered to throughout the year.

The Investment Managers examined negative externalities by screening for severe environmental and social controversies through third party Environmental, Social and Governance data provided by MSCI). All stocks had to pass the ESG minimum standards set for DNSH i.e., they did not exhibit severe environmental or social controversies that had not been resolved or without a positive forward-looking view. Additionally, negative externalities were captured and formed part of the Fund's Intentionality pillar assessment as defined below to ensure there were no severe negative environmental or social externalities.

Lastly, as part of their DNSH test for the Fund, the Investment Managers (i) applied exclusions and (ii) integrated principal adverse impacts (the "PAIs") into the research process.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they are relevant for the investments contemplated by the Fund and other data points deemed by the Investment Managers as proxies for adverse impact. The Investment Managers performed this analysis at the level of each sustainable investment with the relevance and materiality of the PAI indicators varying across investments. There were no issuers over year that were deemed to be in breach of these indicators according to the Investment Managers' analysis and hence all holdings qualified sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact Principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the United Nations (the "UN") Guiding Principles on Business and Human Rights).

How did this financial product consider principal adverse impacts on sustainability factors?

As part of the research process, the Investment Managers adopted a materiality-based approach to assessing PAIs through their assessment of ESG issues. Such assessment considered third party data vendors, company reports, and own engagement with management teams. The Investment Managers took a sector-relative approach to the relevance of the PAI indicators which can vary by company and industry. In addition, there were explicit considerations of the PAIs at a portfolio level as follows:

- Greenhouse gas emissions and greenhouse gas intensity of investee companies

For companies that have a greenhouse gas intensity that exceeded a threshold deemed acceptable by the Investment Managers and defined below, the Investment Managers monitored and engaged to encourage the company to adequately set emission reduction targets and manage their greenhouse gas emissions and/or intensity accordingly.

This threshold has been set at the average greenhouse gas intensity of the Fund's benchmark. The data has been reviewed on a quarterly basis and includes each company's scope 1+2 greenhouse gas emissions.

Here, the data has identified three companies where further analysis was required. On these three names, the Investment Managers have conducted deeper research and continued to dialogue with each company to further understand their carbon management strategy from a forward-looking perspective.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund did not invest in companies that do not observe the main international conventions. Except for cases referred to in section above (where exceptions can be made following the Investment Manager's further analysis), if MSCI has deemed a company in violation of UNGC Principles, the Fund did not invest in the company.

This condition was met.

- Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons, and biological weapons)

In accordance with the Investment Managers' controversial weapons policy, the Fund did not invest in companies that are producers or distributors of such weapons.

This condition was met.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING CO LTD	Information Technology	9.20%	Taiwan, Province Of China
ICICI BANK LTD	Financials	5.48%	India
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	5.27%	China

Software	1.70%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

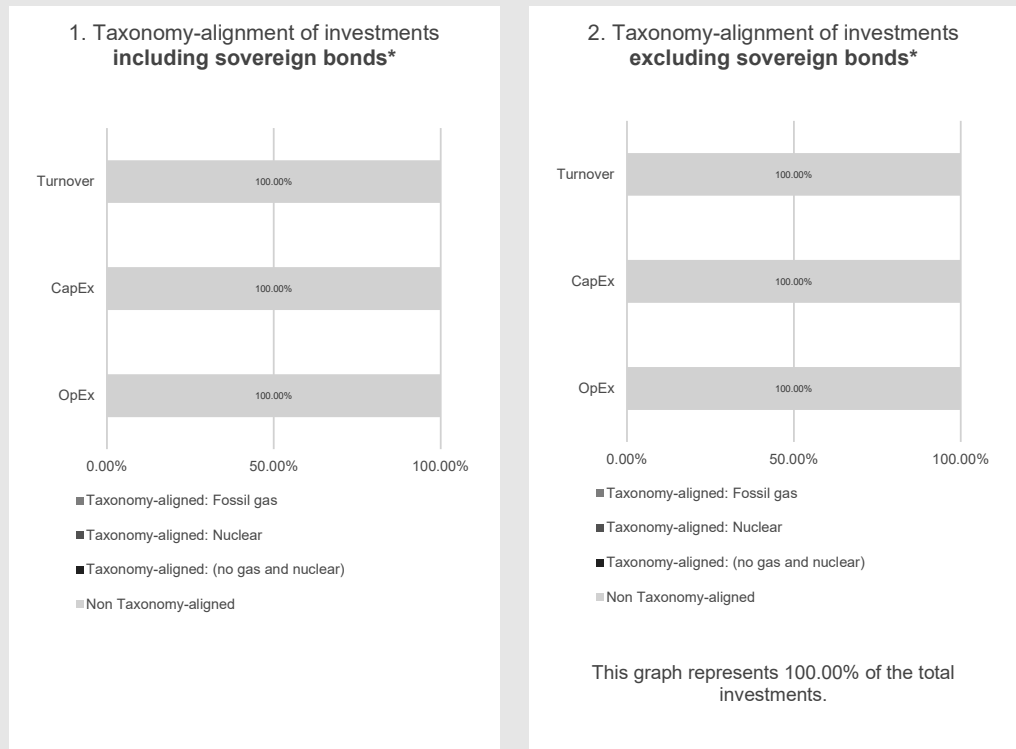

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?

The Fund committed to a minimum 25% of sustainable investments with an environmental objective aligned with the SFDR. Using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period, 36.93% of the portfolio was invested in companies with sustainable environmental objectives that are

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

not aligned with EU Taxonomy. These investments could be aligned with the Taxonomy Regulation, but the Investment Managers are not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

For avoidance of doubt, all companies in the portfolio are required to meet either a social or environmental sustainable objective under sustainable investment definition of SFDR. The allocation has been disclosed in this report.

What was the share of socially sustainable investments?

The Fund committed to a minimum 25% of sustainable investments with a social objective. Using an average taken from 30/9/2024, 31/12/2024, 31/3/2025 and 30/6/2025 quarterly snapshots over the fiscal year period, 58.87% of the portfolio is invested in companies that are socially sustainable investments, across the three social positive outcome areas.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Not sustainable” was 4.20% and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes of the Fund.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards do not affect the delivery of the sustainable investment objectives of the Fund on a continuous basis.

What actions have been taken to attain the sustainable investment objective during the reference period?

The binding elements of the investment strategy can be summarized as follows:

1. the Fund only invested in companies which (i) scored a minimum percentage of net contribution on the “Alignment Pillar”, and (ii) scored an A or above on the combined 3-pillar ESG assessment; and

2. the Fund did not invest in companies which according to the Investment Managers' analysis:

- Repeatedly and/or seriously violate the UNGC Principles, without positive perspective;
- Manufacture or distribute nuclear weapons or controversial weapons defined as anti-personnel mines, biological & chemical weaponry, depleted uranium, and cluster munitions or those that manufacture components intended for use in such weapons. Companies that derive more than 5% revenue from any other weapons will also be excluded;
- Manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds 5%;
- Derive more than 5% of their revenue from thermal coal extraction or unconventional oil & gas extraction;
- Derive more than 5% of their revenue from gambling or adult entertainment;
- Which appears as excluded on the Norges Bank Investment Management (NBIM) exclusion list.

Ensuring the binding elements have been applied to portfolio selection and monitoring, the Fund has been able to attain its sustainable investment objective.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Templeton European Improvers Fund (the "Fund")

Legal Entity Identifier: 549300I9QGXC4U81ZY46

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 62.46% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, environmental positive outcomes (e.g., reduction of greenhouse gas emissions, waste management, natural resource conservation, energy use) as well as social positive outcomes (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity).

The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good and improving environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 97.09% of its assets to investments aligned with E/S characteristics.

Each company holding was assigned a measurable improvement target, whose achievement will contribute to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The Fund also has a minimum allocation of 15% of its portfolio to sustainable investments with an environmental objective and 5% of its portfolio to sustainable investments with a social objective. Each sustainable investment is contributing to one of the above positive outcome areas.

The Fund also has a minimum allocation of 1% to sustainable investments with an environmental objective aligned with the EU Taxonomy, which is included in the minimum 15% allocation to sustainable investments with an environmental objective.

In this regard, the Fund allocated 62.46% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental and social outcomes, and the Fund's EU Taxonomy alignment was 7.03%.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund. No reference benchmark has been designated with the purpose of attaining the environmental or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	62.46%	55.00%
Number of investee companies with which the Investment Manager engages	41.00	42.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	1.30%	4.58%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	66.97%	70.02%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	31.72%	25.40%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%	0.00%
Share of investee companies rated 5 (poor) by the Investment Manager's proprietary ESG methodology	0.00%	N/A
Percentage of investee companies with greenhouse gas intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of MSCI Europe Index.	1.84%	0.00%
Percent of companies held that had no females on the board (weighted average = 42%)	0.00%	0.00%
Percent of companies held that have emissions reduction targets	100.00%	100.00%
Percent of companies held that have implemented a human rights policy	100.00%	100.00%
Weighted average percent of women in the workforce	36.28%	36.00%
Percentage of investee companies held conducting employee satisfaction surveys	100.00%	94.00%
Percentage of investee companies held providing non-compensation benefits	100.00%	74.00%

● **... And compared to previous periods?**

The Fund has slightly higher exposure to sustainable investments aligned with UN SDGs. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative. Other indicators were similar to the prior period.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments of the Fund also contributed to the environmental objectives of the EU Taxonomy Regulation.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting this criterion as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage them to set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting these criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
SSE PLC	Utilities	4.43%	United Kingdom
CNH INDUSTRIAL NV	Industrials	3.90%	United Kingdom
VEOLIA ENVIRONNEMENT SA	Utilities	3.76%	France
Sanofi SA	Health Care	3.59%	France
STANDARD CHARTERED PLC	Financials	3.52%	United Kingdom
SWISS RE AG	Financials	3.31%	Switzerland
ING GROEP NV	Financials	3.29%	Netherlands

LLOYDS BANKING GROUP PLC	Financials	2.76%	United Kingdom
REXEL SA	Industrials	2.72%	France
BP PLC	Energy	2.70%	United Kingdom

What was the proportion of sustainability-related investments?

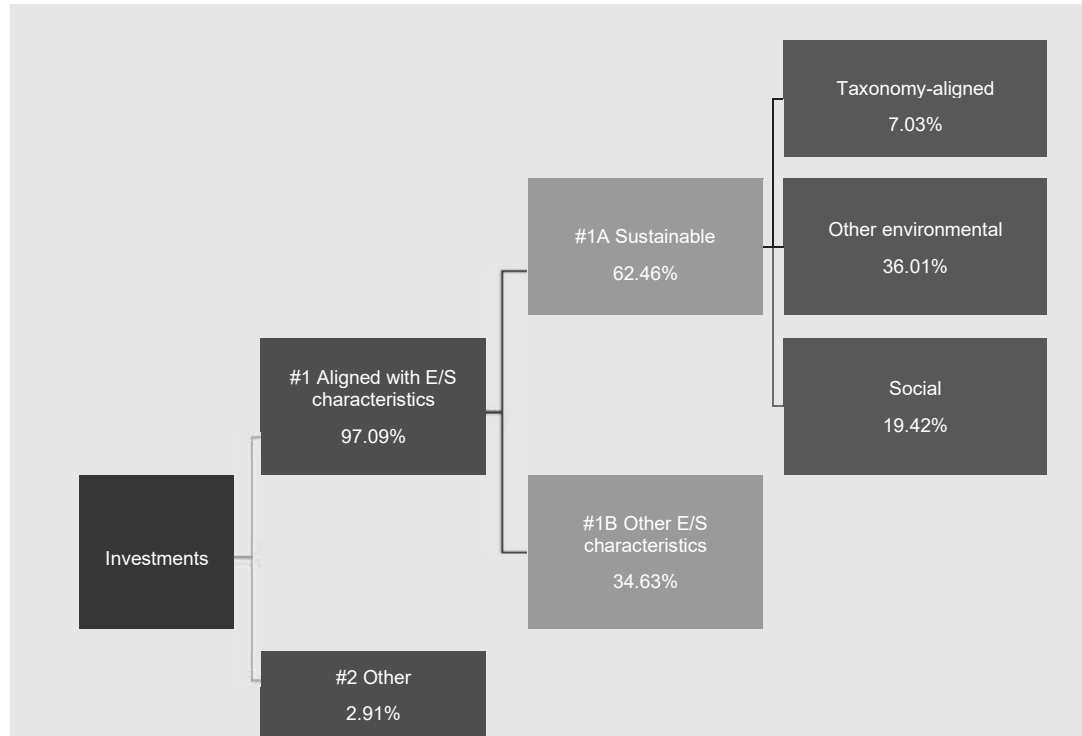

The proportion of sustainable investments was 62.46%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.09% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.91%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 62.46% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	97.09%	96.21%
#2 Other	2.91%	3.79%
#1A Sustainable	62.46%	69.11%
#1B Other E/S characteristics	34.63%	27.10%
Taxonomy-aligned	7.03%	6.71%
Other environmental	36.01%	48.64%
Social	19.42%	13.76%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	20.49%
Financials	15.34%
Consumer Discretionary	11.29%
Health Care	10.19%
Consumer Staples	8.87%
Utilities	8.19%
Information Technology	7.06%
Materials	6.75%
Energy	5.71%
Communication Services	3.20%
Top sub-sector	% of Assets
Banks	9.57%
Machinery	6.39%
Oil, Gas & Consumable Fuels	5.71%
Semiconductors & Semiconductor Equipment	5.66%
Pharmaceuticals	5.44%
Textiles, Apparel & Luxury Goods	4.73%
Electric Utilities	4.43%
Metals & Mining	4.20%
Multi-Utilities	3.76%
Insurance	3.31%
Diversified Telecommunication Services	3.20%
Personal Care Products	3.19%
Household Durables	2.97%
Consumer Staples Distribution & Retail	2.88%
Health Care Equipment & Supplies	2.85%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 7.03% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with very small contributions to water, circular economy, and pollution prevention. The Taxonomy-alignment of the investments mentioned above has not been subject to an assurance provided by an auditor or a third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- Yes
- No

What was the share of investments made in transitional and enabling activities?

This has not been calculated.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage aligned with the EU Taxonomy increased slightly from the prior year.

	Percentage of taxonomy-aligned investments including sovereign bonds	
	2025	2024
Turnover	7.03%	6.71%
CapEx	9.66%	8.82%
OpEx	7.16%	5.12%

	Percentage of taxonomy-aligned investments excluding sovereign bonds	
	2025	2024
Turnover	7.03%	6.71%
CapEx	9.66%	8.82%
OpEx	7.16%	5.12%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 36.01%.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 19.42%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 2.91% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology, subject to the active engagement of those companies to drive an improvement in the scoring to a 3 within a three-year timeframe. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies reporting a deterioration in the targeted KPI. Failure to report an improvement within two full years after the first publication of the KPI deterioration will result in divestment. There were no prior reference periods to measure improvement, as this Fund adopted its current policies in 2025;
- The Fund committed to divest from companies that make no progress against sustainability KPIs over a three-year period. There were no prior reference periods to measure improvement;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” of the pre-contractual disclosure of the Fund.

The Fund committed to conduct engagement with a minimum of 50% of the portfolio, measured both in number of names and in AuM. During the past year, The Investment Manager engaged with 13 holdings, or 32% of equity assets under management (as of 30 June 2025) to influence positive change related to sustainability issues. The Investment Manager also conducted engagements for change or to develop insights during the year across 38 holdings representing 92% of equity assets under management (as of 30 June 2025). The latter included discussions to confirm the Fund’s improvement targets were appropriate and consistent with the company’s strategy.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton European Insights Fund (the "Fund")

Legal Entity Identifier: 549300CMJWP941Z22112

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.91% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, environmental positive outcomes (e.g., reduction of greenhouse gas emissions, waste management and natural resource conservation, energy use) as well as social positive incomes (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity). The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good and improving environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 98.09% of its assets to investments aligned with E/S characteristics.

Each company holding was assigned a measurable improvement target, whose achievement will contribute to positive environmental or social outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The Fund also has a minimum allocation of 15% of its portfolio to sustainable investments with an environmental objective and 5% of its portfolio to sustainable investments with a social objective. Each sustainable investment is contributing to one of the above positive outcome areas.

The Fund also has a minimum allocation of 1% to sustainable investments with an environmental objective aligned with the EU Taxonomy, which is included in the minimum 15% allocation to sustainable investments with an environmental objective.

In this regard, the Fund allocated 57.91% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to environmental (33.02%) and social (19.72%) outcomes, and the Fund's EU Taxonomy alignment was 5.17%.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	57.91%
Number of investee companies with which the Investment Manager engages	41.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	1.31%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	66.96%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	31.73%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology	0.00%
Percentage of investee companies with GHG Intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of MSCI Europe	1.81%
Percentage of investee companies with no females on the board of directors	0.00%
Percentage of investee companies with emissions reduction targets	100.00%
Percentage of investee companies having implemented a human rights policy	100.00%
Weighted average percent of women in the workforce	36.28%
Percentage of investee companies conducting employee satisfaction surveys	100.00%
Percentage of investee companies providing non-compensation benefits	100.00%

... And compared to previous periods?

Not applicable as there were no prior reference periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

The sustainable investments of the Fund also contributed to the environmental objectives of the EU Taxonomy Regulation.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest within a 6-month period. There were no companies meeting this criterion as of 30 June 2025. The one holding with GHG intensity in the bottom quintile and above half the benchmark level has established emissions reduction targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage them to set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will take all reasonable means to divest within a 6-month period. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-06-25 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
NOVO NORDISK A/S	Health Care	4.63%	Denmark
SSE PLC	Utilities	4.62%	United Kingdom
CNH Industrial N.V.	Industrials	3.75%	United Kingdom

SMITH & NEPHEW PLC	Health Care	2.69%	United Kingdom
Euronext N.V.	Financials	2.68%	The Netherlands
VINCI SA	Industrials	2.64%	France
THALES SA	Industrials	2.62%	France

What was the proportion of sustainability-related investments?

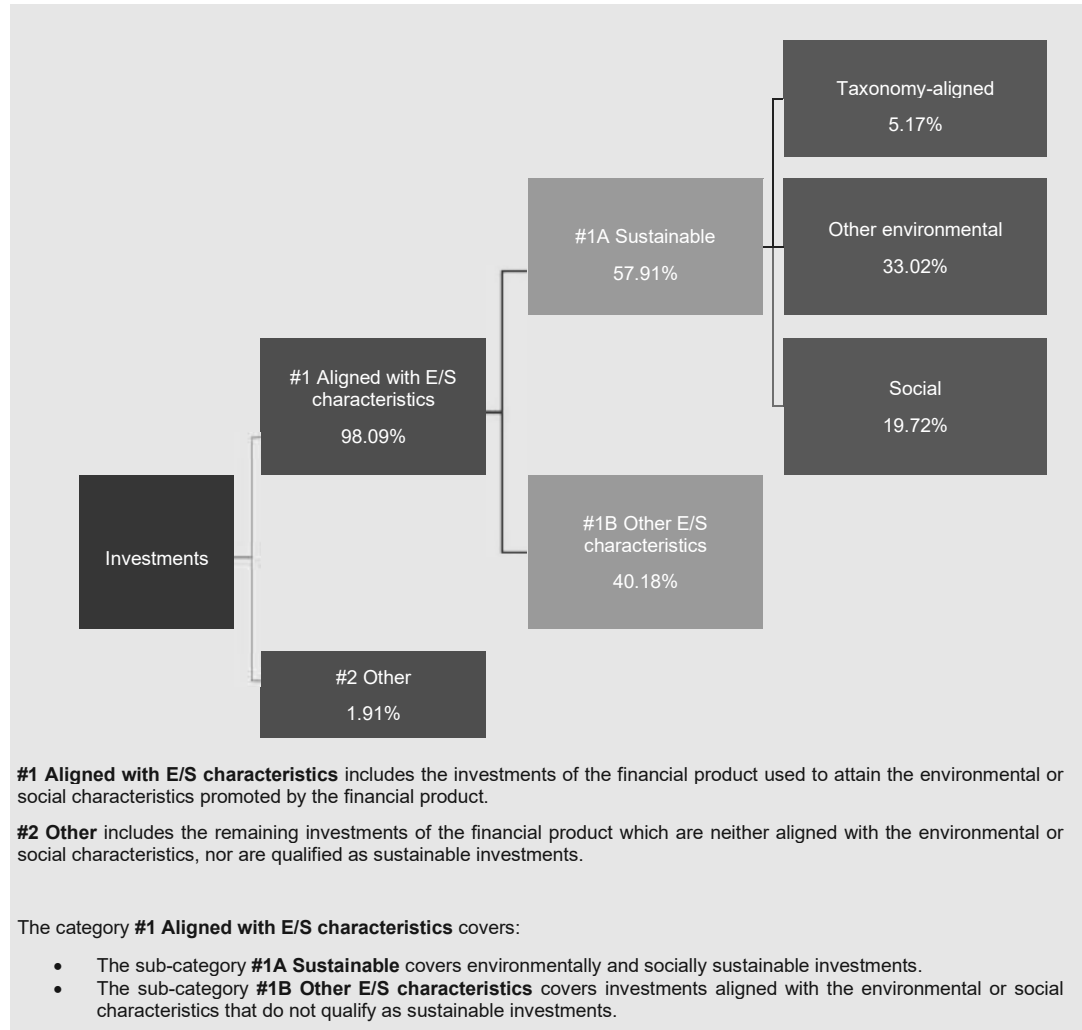

The proportion of sustainable investments was 57.91%.

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

98.09% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (1.91%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 57.91% of its portfolio in sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	22.08%
Financials	16.34%
Health Care	11.73%
Consumer Discretionary	10.72%
Consumer Staples	8.59%
Information Technology	7.43%
Materials	6.95%
Utilities	6.14%
Energy	5.61%
Communication Services	2.50%
Top sub-sector	% of Assets
Banks	9.08%
Pharmaceuticals	7.47%
Semiconductors & Semiconductor Equipment	7.43%
Oil, Gas & Consumable Fuels	5.61%
Machinery	5.25%
Textiles, Apparel & Luxury Goods	4.89%
Electric Utilities	4.62%
Capital Markets	4.31%
Aerospace & Defense	4.27%
Health Care Equipment & Supplies	4.25%
Personal Care Products	3.53%
Electrical Equipment	3.48%
Insurance	2.95%
Consumer Staples Distribution & Retail	2.92%
Construction & Engineering	2.64%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 5.17% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with very small contributions to water, circular economy, and pollution prevention. The Taxonomy-alignment of the investments mentioned above has not been subject to an assurance provided by an auditor or a third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- Yes
 No

What was the share of investments made in transitional and enabling activities?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Not applicable.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 33.02%.

 **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 19.72%.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Other” was 1.91% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology, subject to the active engagement of those companies to drive an improvement in the scoring to a 3 within a three-year timeframe. No company(s) held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. The one holding with GHG intensity in the bottom quintile and above half the benchmark level has established emissions reduction targets validated by the Science Based Targets initiative. No other companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies reporting a deterioration in the targeted KPI, and to divest from companies who make no progress against sustainability KPIs over a three-year period. The Fund completed its first year tracking targeted KPI, and companies reporting a deterioration are now subject to engagement. The Fund will report on the results of this engagement next year;

The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton European Opportunities Fund (the "Fund")

Legal Entity Identifier: 549300E2K4E8O6FKNS31

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.91% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 97.41% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 28.91% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective. No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	28.91%	12.96%
Number of investee companies with which the Investment Manager engages	41.00	35.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	1.33%	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	66.90%	61.31%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	31.76%	38.69%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%	0.00%
Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector	1.83%	0.00%
Percentage of investee companies with no females on the board of directors	0.00%	0.00%

... And compared to previous periods?

The Fund increased its exposure to companies aligned with the United Nations Sustainable Development Goals over the period.

One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs") are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used a combination of third-party global norms-based screening including UN Global Compact (UNGC) compliance, third party controversy scores, assessment of PAI and other material environmental, social, and governance factors, which were embedded in the Investment Manager's fundamental research and proprietary ESG ratings process to review if investments cause significant harm to any sustainable investment objective. In addition, the Fund applied exclusions that further reduce the likelihood of issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to Controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic. <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeq-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
PAYPOINT PLC	Financials	4.23%	United Kingdom
CNH INDUSTRIAL NV	Industrials	3.48%	United Kingdom

GREGGS PLC	Consumer Discretionary	1.91%	United Kingdom

What was the proportion of sustainability-related investments?

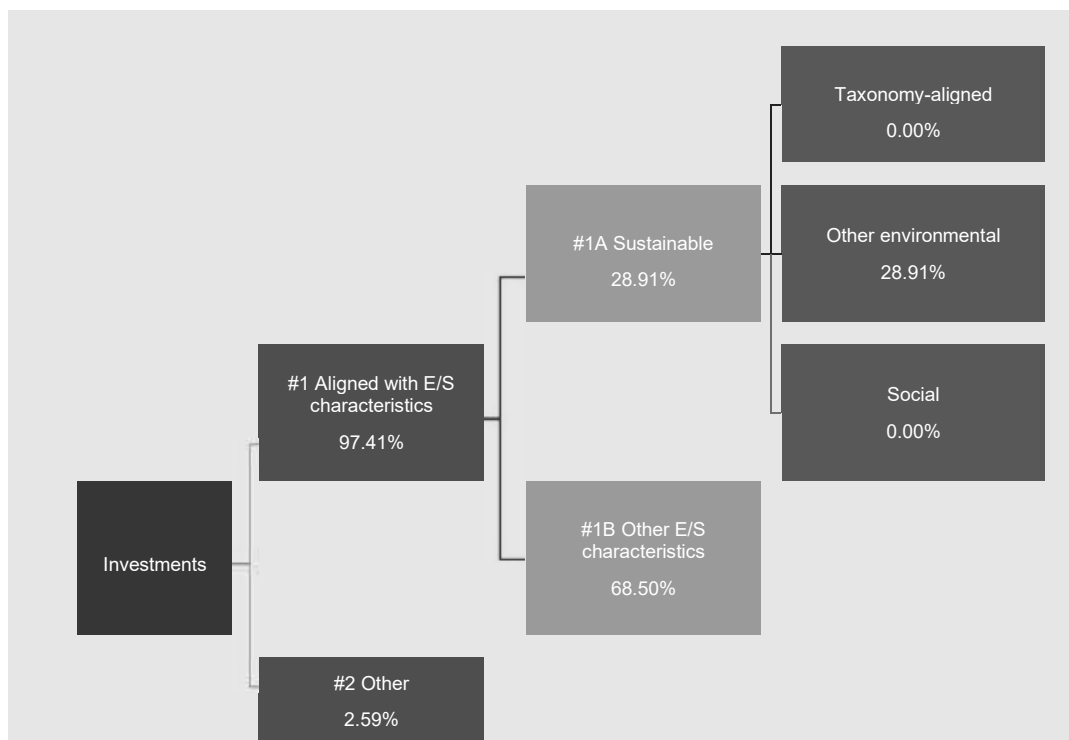

The proportion of sustainable investments was 28.91%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

97.41% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (2.59%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging and/or efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 28.91% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	97.41%	95.18%
#2 Other	2.59%	4.82%
#1A Sustainable	28.91%	12.96%
#1B Other E/S characteristics	68.50%	82.22%
Taxonomy-aligned	N/A	N/A
Other environmental	28.91%	12.96%
Social	N/A	N/A

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 28.91%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 0%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 2.59% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton European Small-Mid Cap Fund (the "Fund")

Legal Entity Identifier: 549300U3RRXWK6GSP710

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 16.63% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.

In this regard, the Fund allocated 96.63% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The three positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), are:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 16.63% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes.

The Fund does not commit to a minimum allocation of its portfolio to sustainable investments with a social objective.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

● How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	16.63%	13.29%
Number of investee companies with which the Investment Manager engages	38.00	32.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	0.00%	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	54.49%	42.55%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	45.51%	57.45%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%	0.00%
Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology	0.00%	N/A
Share of investee companies with greenhouse gas intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of the MSCI Europe Small-Mid Cap Index	6.98%	0.00%
Share of investee companies with no females on the board of directors	0.00%	0.00%
Share of investee companies having emission reduction targets	96.96%	N/A

... And compared to previous periods?

The Fund has increased its exposure to companies that are aligned to the United Nations Sustainable Development Goals.

6.98% of the Fund's equity weight was invested in companies with GHG intensity in the bottom 20% of their industry and greater than half the benchmark intensity. Each company has a quantitative emissions reduction target, two of which are validated by the Science Based Targets initiative. In addition, one company, representing 3.04% of the equity weight, has no emissions reduction target. The company is in the health care sector and has very low GHG intensity (<3 tons per million Euros in sales) and has committed to transition to 100% renewable energy across all its industrial sites by 2027.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive social and/or environmental outcomes. The three positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental areas, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and

Resource Security (preservation of natural resources through efficient and circular use).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic.

<https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tqeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. 6.98% of the Fund was invested in companies with GHG intensity in the bottom 20% of their industry and greater than half the benchmark intensity. Each company has a quantitative emissions reduction target, two of which are validated by the Science Based Targets initiative..

- Board gender diversity
- Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025.
- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
ROLLS-ROYCE HOLDINGS PLC	Industrials	3.86%	United Kingdom
EURONEXT NV	Financials	3.72%	Netherlands
DIASORIN SPA	Health Care	3.22%	Italy
Allfunds Group Plc	Financials	3.16%	United Kingdom
PAYPOINT PLC	Financials	3.10%	United Kingdom
LOOMIS AB	Industrials	3.07%	Sweden
DUERR AG	Industrials	3.04%	Germany
DASSAULT AVIATION SA	Industrials	2.89%	France
REXEL SA	Industrials	2.86%	France
FIELMANN GROUP AG	Consumer Discretionary	2.72%	Germany

RICHTER GEDEON NYRT	Health Care	2.52%	Hungary
GREGGS PLC	Consumer Discretionary	2.46%	United Kingdom
Barratt Redrow PLC	Consumer Discretionary	2.36%	United Kingdom

What was the proportion of sustainability-related investments?

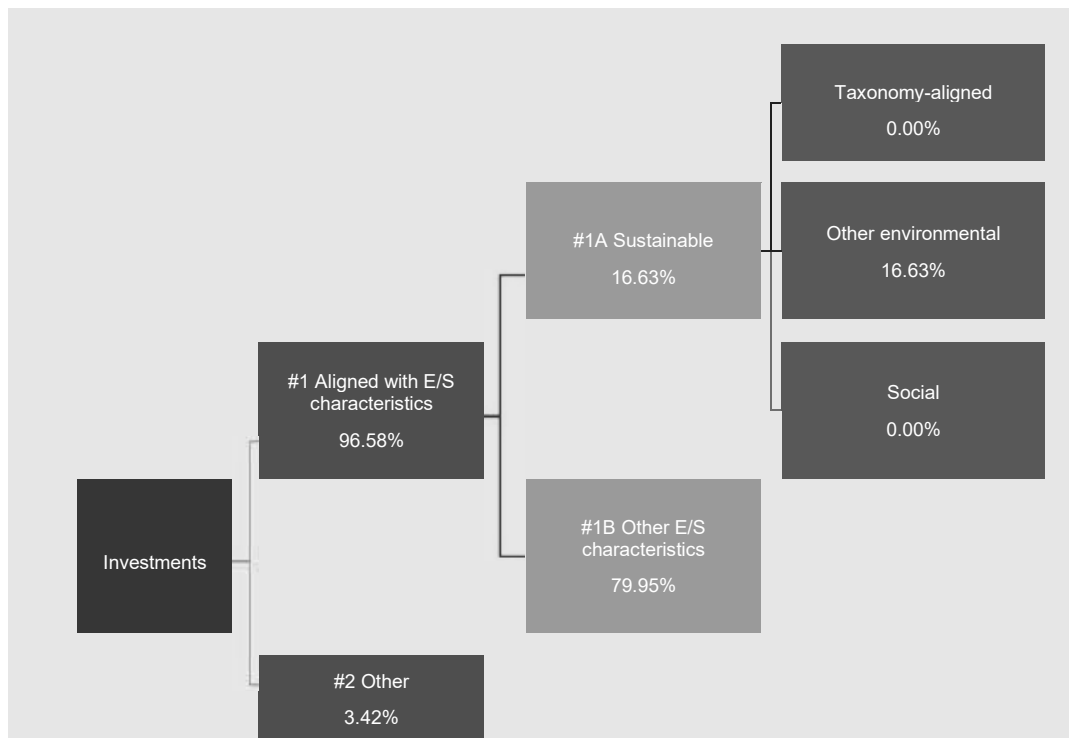

The proportion of sustainable investments was 16.63%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

96.58% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (3.42%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 16.63% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	96.58%	92.60%
#2 Other	3.42%	7.40%
#1A Sustainable	16.63%	13.29%
#1B Other E/S characteristics	79.95%	79.31%
Taxonomy-aligned	N/A	N/A
Other environmental	16.63%	13.29%
Social	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Industrials	33.35%
Consumer Discretionary	16.26%
Financials	13.70%
Health Care	9.86%
Materials	5.02%
Information Technology	4.40%
Real Estate	3.90%
Energy	3.58%
Consumer Staples	3.51%
Utilities	1.77%
Communication Services	1.23%
Top sub-sector	% of Assets
Capital Markets	9.08%
Aerospace & Defense	8.70%
Commercial Services & Supplies	7.48%
Health Care Equipment & Supplies	6.24%
Specialty Retail	5.24%
Machinery	4.92%
Trading Companies & Distributors	4.02%
Household Durables	3.92%
Chemicals	3.86%
Oil, Gas & Consumable Fuels	3.58%
Cash and Cash Equivalents	3.42%
Professional Services	3.41%
Financial Services	3.10%
Textiles, Apparel & Luxury Goods	2.58%
Pharmaceuticals	2.52%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 16.63%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 0%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 3.42% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for the placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No companies held as of 30 June 2025 scored a 4;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI Europe Small-Mid Cap Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Global Bond (Euro) Fund (the "Fund")

Legal Entity Identifier: GVEB5FR7K0S8BJ1KRI44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 9.88% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds of the Fund's portfolio was constructed by supranational issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental and/or social outcomes by investing at least 5% of its portfolio in green bonds, where the use of proceeds has been specified by the issuer and verified by a third party or Franklin Advisers, Inc. (the "Investment Manager"), to benefit underlying environmental projects.

The Fund's weighted average base ESG score was 63.50 and the investment universe average base ESG score was 53.92 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 92.43% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency and interest rate-related derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%
The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%	N/A	N/A
The ESG score difference between the Fund's portfolio and the investment universe; and	9.58	6.81	3.34
The percentage of investments in green bonds.	9.88%	9.92%	10.28%

● **... And compared to previous periods?**

The values were in line with previous periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund invested 9.88% of its portfolio in green bonds, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

-----**How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

-----**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
NOTA DO TESOURO NACIONAL NTN F	Government Bonds	9.58%	Brazil
TITULOS DE TESORERIA B	Government Bonds	9.36%	Colombia
MALAYSIA GOVT	Government Bonds	8.52%	Malaysia
INTERNATIONAL BANK RECON & DEV	Government Bonds	7.64%	United States
PANAMA REPUBLIC OF	Government Bonds	5.51%	Panama
OMAN GOVERNMENT INTERNATIONAL BOND	Government Bonds	5.43%	Oman
POLAND REPUBLIC OF	Government Bonds	5.43%	Poland

What was the proportion of sustainability-related investments?

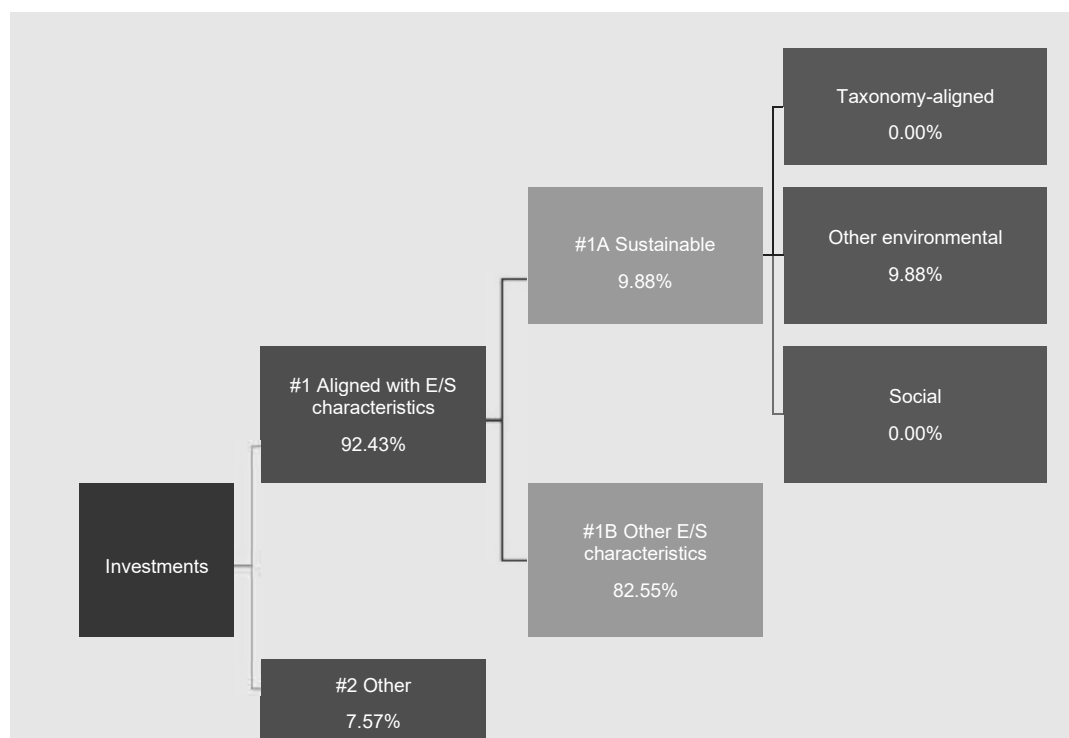

The proportion of sustainable investments was 9.88%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

92.43% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (7.57%) included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 9.88% of its portfolio in sustainable investments over the reference period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	92.43%	89.42%	94.22%
#2 Other	7.57%	10.58%	5.78%
#1A Sustainable	9.88%	9.92%	10.28%
#1B Other E/S characteristics	82.55%	79.50%	83.94%
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	9.88%	9.92%	10.28%
Social	N/A	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	92.43%
Top sub-sector	% of Assets
Government Bonds	92.43%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

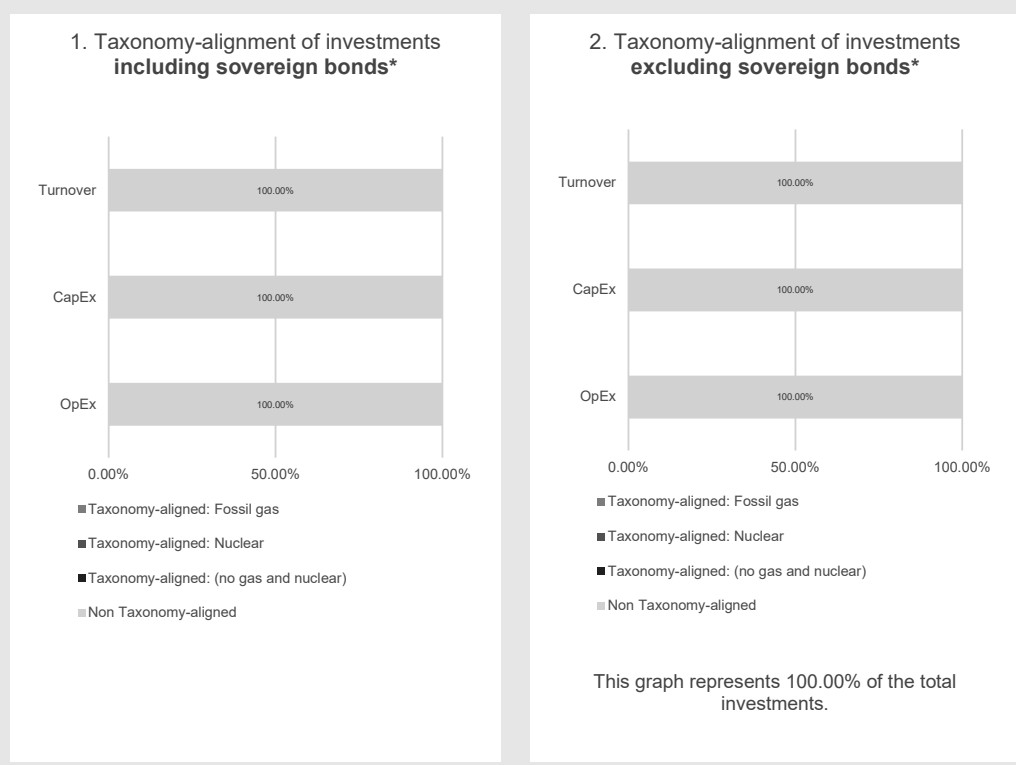

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy Regulation, 9.88% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 7.57% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds;
- The Fund invested more than 5% of the portfolio (9.88%) in green bonds qualifying as sustainable investments; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio is higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Templeton Global Bond Fund (the "Fund")

Legal Entity Identifier: 5SLKA4UT9B55J80BUH41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, by using a proprietary environmental, social and governance (the "ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio was constructed based on the universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- With no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in euro or US dollar and did not have a local custodian entity meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universe dedicated to the supranational bonds of the Fund's portfolio was constructed by issuers that had MSCI ESG ratings.

The Fund's weighted average base ESG score was 62.71 and the investment universe average base ESG score was 53.92 over the reference period.

No reference benchmark was designated to attain the environmental and/or social characteristics promoted.

In this regard, the Fund allocated 84.02% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency and interest rate-related derivatives.

● **How did the sustainability indicators perform?**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as anticipated.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%
The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%	0.00%	N/A
The ESG score difference between the Fund's portfolio and the investment universe	8.80	11.20	10.44

● **... And compared to previous periods?**

The values were in line with previous periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

Not applicable.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries were monitored as part of Franklin Advisers, Inc. (the "Investment Manager")'s proprietary environmental, social and governance (the "ESG") index, the Templeton Global Macro ESG Index (the "TGM-ESG"), where the Investment Manager reviewed institutional strength, social cohesion and stability, and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash and derivatives, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
NOTA DO TESOURO NACIONAL NTN F	Government Bonds	10.32%	Brazil
MALAYSIA GOVT	Government Bonds	8.70%	Malaysia
INDIA GOVERNMENT BOND	Government Bonds	7.92%	India
TITULOS DE TESORERIA B	Government Bonds	6.58%	Colombia
SOUTH AFRICA REPUBLIC OF	Government Bonds	5.77%	South Africa
TREASURY CORP OF VICTORIA	Agencies	5.71%	Australia
United States Treasury Note/Bond	Government Bonds	4.69%	United States
PANAMA REPUBLIC OF	Government Bonds	4.64%	Panama

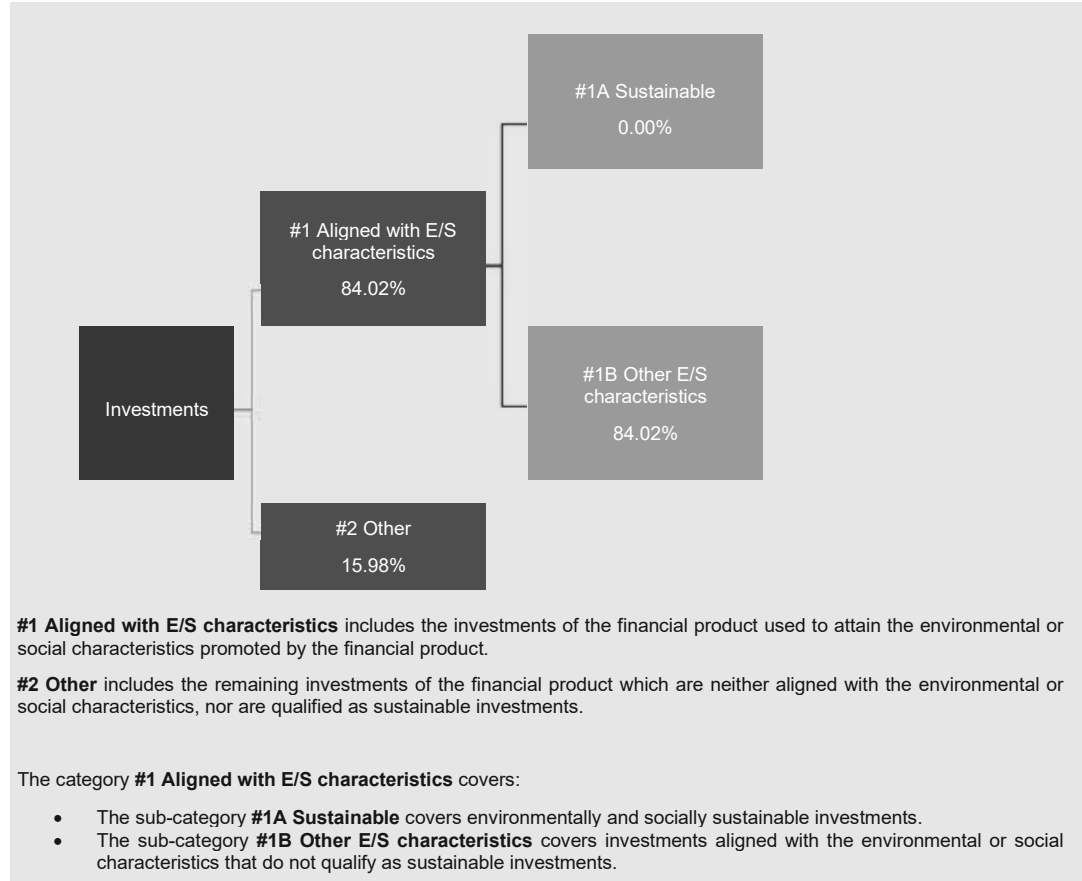

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

84.02% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (15.98%) was not aligned with the promoted characteristics and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, could not be aligned with the environmental and/or social characteristics promoted by the Fund.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	84.02%	88.45%	89.66%
#2 Other	15.98%	11.55%	10.34%
#1A Sustainable	N/A	N/A	N/A

Taxonomy-aligned	N/A	N/A	N/A
Other environmental	N/A	N/A	N/A
Social	N/A	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash and derivatives, were:

Top sector	% of Assets
Government Bonds	84.02%
Top sub-sector	% of Assets
Government Bonds	84.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 15.98% and consisted of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives. No minimum environmental and/or social safeguards have been put in place.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund’s investment universe dedicated to sovereign bonds; and
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> YES	<input type="checkbox"/> NO
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 96.47% <ul style="list-style-type: none"> <input checked="" type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investment <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

To meet the sustainable investment objective, the Fund invested in companies that contribute towards climate change mitigation and adaptation as considered by the Paris Climate Agreement. In order to achieve the long-term global warming targets of the Paris Climate Agreement, the Fund pursued decarbonization through investments in solutions to reduce greenhouse gas emissions and in companies committed to aligning their own self-decarbonization trajectory with the 1.5-degree scenario.

The Fund did not use derivatives to attain its sustainable investment objective. Also, the Fund did not use a reference benchmark to attain its sustainable objective.

In this regard, 96.47% of the Fund's assets contributed to the sustainable investment objective.

● **How did the sustainability indicators perform?**

The sustainable investment objective is considered as attained if:

1. The strategy invests in companies that reduce emissions, improve resource efficiency and limit the physical consequences of climate change. The Fund is invested in two main types of companies:

- **Solution providers:** More than 50% of the Fund is invested in companies with greater than 50% of revenues (or alternative metric such as assets) from directly or indirectly reducing emissions, resource use, climate related physical risk, e.g. renewable energy, energy efficiency, water and waste management, sustainable transportation, and sustainable forestry and agriculture.
- **Transitioning companies:** Up to 50% of the Fund is invested in companies with greater than 20% of revenues to directly or indirectly reducing emissions, resource use, and/or climate related physical risk, and are transitioning to solutions providers or enabling solutions companies through adjacent products and services.

2. The strategy's portfolio carbon impact is aligned with the Paris Climate Agreement. This is assessed using estimates of the avoided emissions resulting from climate solutions provided by companies in the strategy and the strategy's carbon intensity trajectory.

Avoided emissions are emissions that would have been released if a particular action or intervention had not taken place, which is why the Investment Manager refers to them as potentially avoided emissions. Emissions can be avoided through the use of a more efficient product or service, though this is conditional to consumer or market behaviour.

The potentially avoided emissions significantly exceeded the scope 1, 2 and 3 emissions.

The portfolio carbon intensity is projected to maintain a downward trajectory, based on company commitments and historical trends.

*Please refer to the Fund's impact report for more details on calculation methodologies.

<https://www.franklintempleton.lu/download/en-lu/educational-material/d92b92b7-fbf5-4475-a00b-0edd483858ee/Templeton-global-climate-change-fund-quarterly-impact-report.pdf>

**Carbon Intensity and Avoided Emissions Intensity were changed to Weighted Average Intensity to better align with the calculation methodology for the Principal Adverse Impact indicators in SFDR Annex 1. Previously, Carbon Intensity reflected the sum of Fund's ownership share, based on percent of equity market cap held, of the issuers' emissions divided by the sum of the Fund's ownership share of the issuers' sales. Avoided Emissions Footprint and Carbon Footprint are expressed as tCO₂e/US\$1M EVIC. For June 30,2023, this was reported as tCO₂e/US\$1M invested. The calculation methodology remained the same, but we wished to clarify this represented the proportion of Enterprise Value Including Cash (EVIC).

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
	Value	Value	Value

● ... And Compared to Previous Periods?

The Fund has slightly higher exposure to Sustainable Investments, due to lower cash. EU Taxonomy aligned revenues are higher, due to increases in reported alignment compared to the prior year.

The avoided emissions footprint and intensity are smaller than the prior period, due to lower estimated avoided emissions from holdings (energy efficiency solutions having a smaller impact due to lower carbon intensity of power generation in respective markets) and due to lower weights in companies with high avoided emissions. The latter is also consistent with a smaller amount of Renewable Energy generated by portfolio holdings compared to the prior period. The amount of avoided emissions varies significantly by company, so small changes in portfolio allocations can result in significant changes in the Fund's overall avoided emissions.

The Fund's total carbon footprint is lower due to lower scope 3 emissions footprint. The Funds weighted average carbon intensity (scope 1&2&3) is also lower.

The weighted average carbon intensity (scope 1&2) of current holdings has been reduced by a greater amount over the past five years compared to the prior period. The weighted average Fund carbon reduction target has also increased compared to the prior year. The portion of the portfolio with carbon reduction targets also increased.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators and two additional indicators in its management of the Fund. The two additional indicators were:

- Environmental: Investments in companies without carbon emission reduction initiatives; and
- Social: Lack of a human rights policy.

The Investment Manager performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that do not observe the main international conventions (UNGC Principles, Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund assessed and sought to mitigate the sustainability adverse impacts of investment decisions, such as a negative impact on the environment or employee safety, forced labour or bribery. Companies' strategies to reduce the adverse impact and increase the positive impact of their activities were incorporated into the ESG assessment and ratings, which may have influenced investment decisions. The Investment Manager worked to engage in efforts to address and mitigate these impacts.

For all companies, the Fund applies specific criteria to the following PAIs:

Greenhouse gas intensity;

Board gender diversity;

Exposure to fossil fuels;

Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises; and

Exposure to controversial weapons.

- Greenhouse gas intensity

As per Fund policy, companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World benchmark, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. There were no companies meeting these criteria.

- Board gender diversity

As per Fund policy, companies with no females on the board are addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest.

All companies had at least one female on the board, as of 30 June 2025. In addition, the Fund had greater board gender diversity than the benchmark, MSCI All Country World Index, and a level greater than 33%. The percent of women on board as of 30 June 2025 was 34.1%

- Exposure to fossil fuels

As per Fund policy, fossil fuel production activities were excluded, and companies that generated 5% or more of their revenues from oil services were excluded. The Fund also did not invest in companies that derived 5% of revenues or more from the generation of electricity from nuclear power, thermal coal or crude oil.

Among companies involved in power generation, the Investment Manager favoured companies with greater consumption and production of renewable energy. No portfolio companies have been structurally increasing production or capacity of coal-based or nuclear-based energy. All companies involved in power generation were increasing production or capacity of renewable energy sources or providing related dedicated equipment or services. All derived less than 50% of their revenues from electricity generation with a GHG intensity of more than 100 g CO₂e/kWh. They also met at least one of the following criteria:

- * Have a SBTi target set at well-below 2°C or 1.5°C, or have a SBTi 'Business Ambition for 1.5°C' commitment
- * Have emissions intensity aligned with 1.5°C target based on a science-based alignment assessment
- * Derive less than 5% of its revenues from non-renewable power or heat generation.
- * Derive more than 50% of its revenues or CapEx from economic activities included in the EU Taxonomy or contribute to environmental or sustainable objectives.
- * Their carbon intensity was lower than 374 gCO₂/kWh in 2022, declining to 315 in 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund remained in compliance with its exclusion policy that prohibits investments in companies the Investment Manager considered to severely breach these international norms.

- Exposure to controversial weapons

The Fund remained in compliance with its exclusion policy that prohibits investments in cluster munitions, antipersonnel land mines and biological, chemical and nuclear weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is 2024-07-01 – 2025-06-30.

Trading Companies & Distributors	3.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund invested 15.27% of its net assets in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The investments contributed primarily to the climate change mitigation objective, along with contributions to water, circular economy, and pollution prevention, of well below 1% each.

The Taxonomy-alignment have not been subject to an assurance provided by an auditor or a third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy.

As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Will the compliance of the above percentage of taxonomy-alignment be subject to an assurance provided by an auditor or a third-party?

- Yes
- No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

This has not been calculated.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

It increased to 15.27% from 12.31% in the prior period.

	Percentage of taxonomy-aligned investments including sovereign bonds		
	2025	2024	2023
Turnover	15.27%	12.31%	11.30%
CapEx	20.23%	12.56%	10.45%
OpEx	15.80%	9.18%	9.19%

	Percentage of taxonomy-aligned investments excluding sovereign bonds		
	2025	2024	2023
Turnover	15.27%	12.31%	11.30%
CapEx	20.23%	12.56%	10.45%
OpEx	15.80%	9.18%	9.19%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU taxonomy?**

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 81.20%.

● **What was the share of socially sustainable investments?**

The proportion of socially sustainable investments was 0%

● **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

The proportion of investments under “#2 Not sustainable” was 3.53% and comprised of investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market Funds) held for liquidity purposes of the Fund. The Fund did not make use of derivatives during the reporting period.

The Investment Manager applied minimum environmental and social safeguards by verifying that the counterparties used for the placement of deposits met the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

The limited proportion of investments under “#2 Not sustainable” and the applicable minimum safeguards did not affect the delivery of the sustainable investment objectives of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

1. The Fund reduced the investment universe by more than 20% by excluding companies with the worst climate scores according to the Investment Manager’s proprietary methodology.

2. The Investment Manager utilized its proprietary rating system to identify companies they believe are good stewards of their impact on social and environmental development. ESG ratings have been assigned for Environmental factors, Social factors and Governance factors, which are weighted based on industry relevance to produce an overall ESG rating. They consisted of five levels from 1 (best) to 5 (worst). Below the Fund’s portfolio breakdown by the ESG rating (excluding the assets qualifying as #2 Not sustainable):

- 1: (exceptional) 4.64%
- 2: (above average) 77.35%
- 3: (average) 18.01%
- 4: (poor) 0.00%
- 5: 0.00%

3. The Fund is bound to maintain a weighted average ESG rating higher than the average ESG rating of the companies in the investment universe, defined as MSCI ACWI Investable Market Index (the “MSCI ACWI IMI”), based on the MSCI ESG Rating, measured numerically by the MSCI ESG score. As of June 30, 2025, the Fund’s score of 7.70 exceeded the average for MSCI ACWI IMI of 5.54.

4. The Investment Manager continuously engaged with its portfolio companies. ESG engagement of the Investment Manager generally had one or more objectives:

- Develop insights into material financial, human and natural capital issues that could influence the Investment Manager's investment thesis
- Promote positive change that could lead to improved outcomes for shareholders and society

For more details on the Fund's engagement approach, please refer to the Stewardship & Sustainability Report. <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

5. The Fund did not invest in companies in violation of its exclusion policies, as outlined in the pre-contractual disclosure of the Fund.

6. The Fund considered all 14 mandatory PAIs, and two additional PAIs as part of investment analysis which included indicators on energy and water efficiency, pollution and biodiversity.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Not applicable.

Templeton Global Fund (the “Fund”)

Legal Entity Identifier: 549300ERVWDEEGCMRK51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 58.36% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, social impact (diversity, equity and inclusion, health and wellbeing, good human capital management practices, board gender diversity) as well as environmental impact (e.g., reduction of carbon emissions, waste management, natural resource conservation, energy use). The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.
- Committing to the exclusion of the bottom 20% of the Investment Universe based on ESG Score using the MSCI ESG Ratings Methodology

In this regard, the Fund allocated 95.33% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 37.43% of its assets to environmentally sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive environmental outcomes. The Fund also allocated 20.93% of its assets to socially sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive social outcomes.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
	Value	Value
Percentage of the portfolio invested in companies with alignment to the selected United Nations Sustainable Development Goals (the "UN SDGs")	58.36%	63.93%
Number of investee companies with which the Investment Managers engage	32.00	48.00
Share of investee companies rated 1 (exceptional) by the Investment Managers' proprietary ESG methodology	0.00%	3.00%
Share of investee companies rated 2 (above average) by the Investment Managers' proprietary ESG methodology	73.18%	65.62%
Share of investee companies rated 3 (average) by the Investment Managers' proprietary ESG methodology	26.82%	31.03%
Share of investee companies rated 4 (poor) by the Investment Managers' proprietary ESG methodology	0.00%	0.36%
Share of investee companies rated 5 (unacceptable) by the Investment Managers' proprietary ESG methodology	0.00%	N/A
Weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	7.16	7.39
Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology	5.54	5.36
Percentage of investee companies in the Fund's portfolio providing employee satisfaction surveys	88.95%	73.00%
Percentage of companies in the Fund's Universe providing employee satisfaction surveys	59.43%	31.00%
Percentage of investee companies in the Fund's portfolio providing material non-compensation benefits	91.21%	70.00%
Percentage of companies in the Fund's Universe providing material non-compensation benefits	46.91%	50.00%
Percentage of investee companies with GHG Intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of the MSCI All Country World Index	2.88%	N/A
Share of investee companies with no females on the board of directors	0.00%	0.00%
Share of investee companies having emissions reduction targets	97.39%	N/A

... And compared to previous periods?

The Fund continued to attain the environmental and social characteristics promoted, exceeding minimum criteria. Alignment with SDGs declined compared to last year due to an increase in industries considered to have more of a neutral impact on SDGs.

One holding has GHG Intensity in the bottom quintile of their industry and greater than half the level of MSCI All Country World Index. Such companies are required to establish emissions reduction targets. The company does have a target to achieve net zero by 2050 or sooner, which was validated by the Science Based Targets initiative.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive social and/or environmental outcomes. The six positive outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental areas, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Managers used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic, <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. 2.88% of assets were invested in Companies meeting this criterion, and the company has established emissions reduction targets.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

What was the proportion of sustainability-related investments?

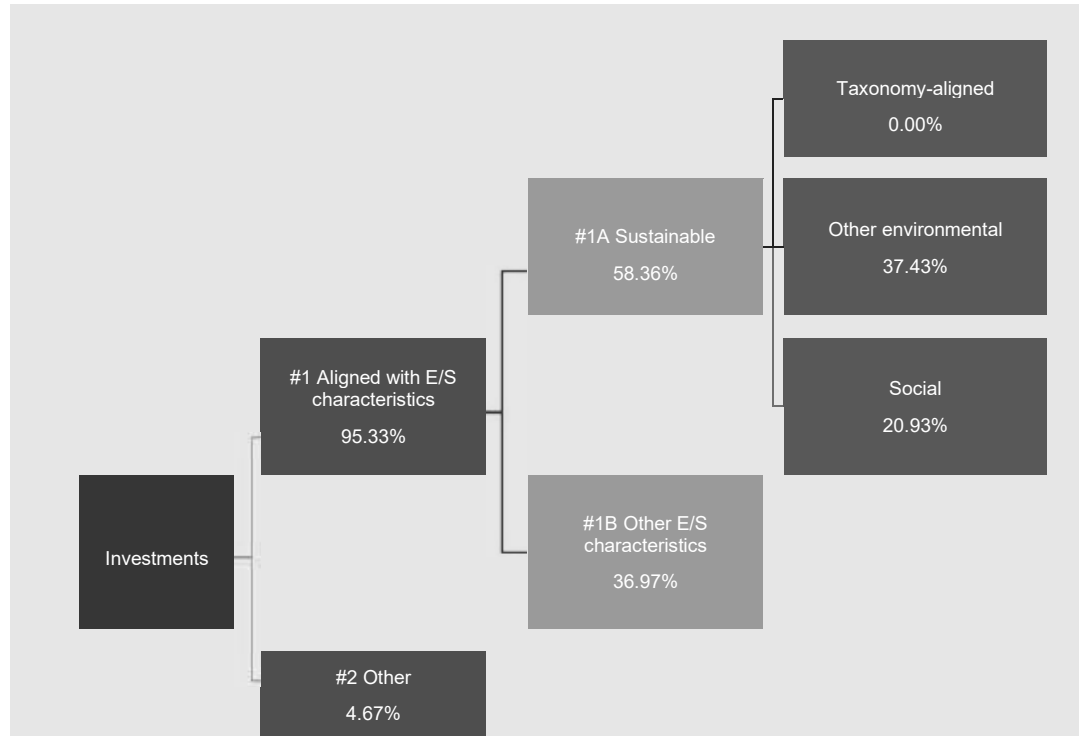

The proportion of sustainable investments was 58.36%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

95.33% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.67%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 58.36% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
	Proportion of Investments	Proportion of Investments
#1 Aligned with E/S characteristics	95.33%	95.08%
#2 Other	4.67%	4.92%
#1A Sustainable	58.36%	63.93%
#1B Other E/S characteristics	36.97%	31.15%
Taxonomy-aligned	N/A	N/A
Other environmental	37.43%	45.09%
Social	20.93%	18.84%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 37.43%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 20.93%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 4.67% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes. The Fund did not make use of derivatives during the reporting period.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Managers, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. No company held as of 30 June 2025 scored a 4;
- The Fund excluded the bottom 20% of the Investment Universe based on the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund maintained a weighted average ESG rating of 7.12, which is higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. 2.88% of assets were invested in Companies meeting this criterion, and the company has established emissions reduction targets. No other companies held as of 30 June 2025 met this criterion
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Global Leaders Fund (the "Fund")

Legal Entity Identifier: 549300F2SVSQKV30T396

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 45.94% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.

In this regard, the Fund allocated 95.49% of its assets to investments aligned with E/S characteristics, 33.80% of its assets to sustainable investments with an environmental objective, and 12.14% to sustainable investments with a social objective. The Fund converted to Article 8 status on 26 June 2025.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities. Companies in the bottom quintile of their industry sector on GHG intensity all have established quantitative emissions reduction targets, and most have targets validated by the Science Based Targets initiative. The Fund was converted to Article 8 status as of May 2025.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Value
Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	45.94%
Number of investee companies with which the Investment Manager engages	43.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	2.70%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	62.27%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	35.03%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector	21.63%
Weighted average base ESG score of the portfolio as measured by MSCI ESG Rating Methodology	6.54
Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology	5.54
Share of investee companies with no females on the board of directors	0.00%
Share of investee companies having emissions reduction targets	97.82%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?**

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World Index, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. There were no companies meeting this criterion as of 30 June 2025. Companies in the bottom quintile of their industry sector on GHG intensity all have established quantitative emissions reduction targets, and most have targets validated by the Science Based Targets initiative.

The Fund targeted decreasing greenhouse gas intensity and emissions reduction targets, engaging with companies to encourage them to align their business models with science based long term goals of net-zero emissions, set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-06-26 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
MICROSOFT CORPORATION	Information Technology	7.47%	United States
NVIDIA CORPORATION	Information Technology	6.31%	United States
AMAZON.COM, INC.	Consumer Discretionary	6.04%	United States
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	4.89%	Taiwan
SAFRAN SA	Industrials	3.98%	France
ROLLS-ROYCE HOLDINGS PLC	Industrials	3.40%	United Kingdom
META PLATFORMS, INC.	Communication Services	3.36%	United States
Airbus SE	Industrials	3.13%	Netherlands
SALESFORCE, INC.	Information Technology	3.05%	United States
WELLS FARGO & COMPANY	Financials	2.99%	United States
HCA HEALTHCARE, INC.	Health Care	2.86%	United States
SAP SE	Information Technology	2.77%	Germany

What was the proportion of sustainability-related investments?

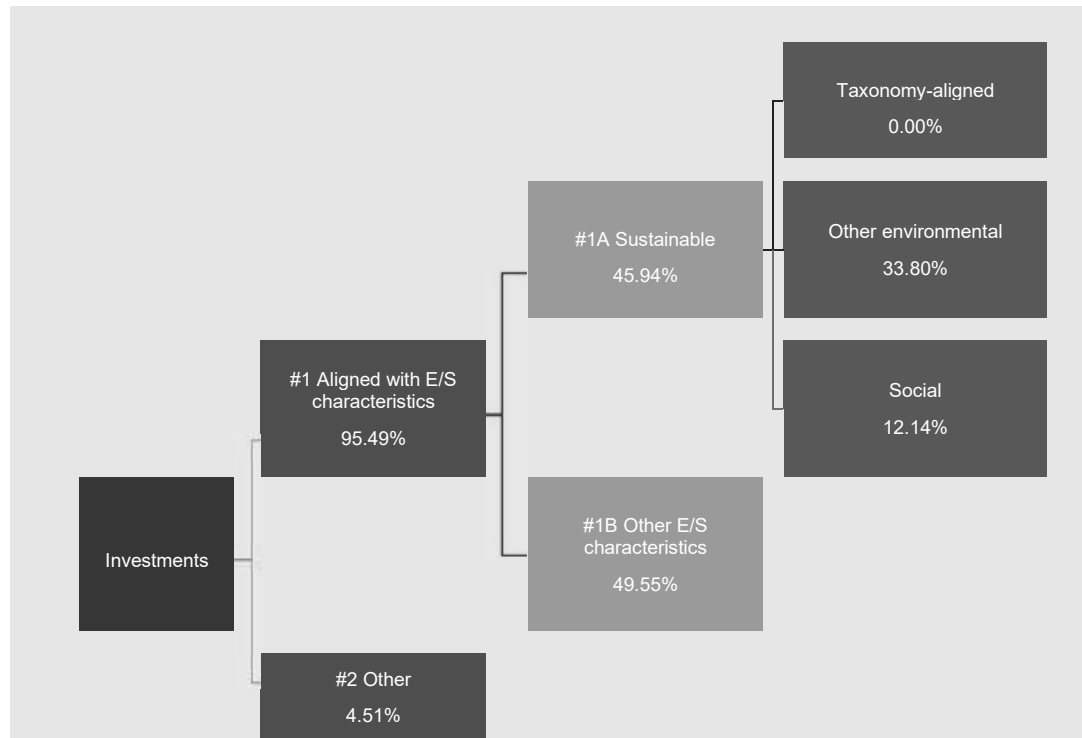

The proportion of sustainable investments was 45.94%

Asset allocation
describes the share of
investments in specific
assets.

What was the asset allocation?

95.49% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (4.51%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives used for hedging, efficient portfolio management and investment purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 45.94% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Information Technology	28.31%
Industrials	20.38%
Financials	11.57%
Consumer Discretionary	11.40%
Communication Services	11.20%
Health Care	7.34%
Materials	3.88%
Consumer Staples	0.94%
Energy	0.48%
Top sub-sector	% of Assets
Software	15.40%
Semiconductors & Semiconductor Equipment	12.90%
Aerospace & Defense	11.53%
Interactive Media & Services	8.90%
Broadline Retail	6.04%
Banks	6.02%
Pharmaceuticals	3.51%
Industrial Conglomerates	3.43%
Textiles, Apparel & Luxury Goods	3.27%
Capital Markets	3.26%
Health Care Providers & Services	2.86%
Construction Materials	2.43%
Construction & Engineering	2.40%
Diversified Telecommunication Services	2.29%
Financial Services	2.28%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 33.80%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 12.14%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 4.51% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging, efficient portfolio management and investment purposes.

The Investment Manager applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. 0 companies held as of 30 June 2025 scored an overall 4;
- The Fund maintained a weighted average ESG rating of 6.54, higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI All Country World (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Global Total Return Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

<input type="radio"/> YES	<input checked="" type="radio"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective: 0.00% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: 0.00%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics which include:

- for sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- for corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. (the "Investment Manager") sought to attain these characteristics by using a proprietary environmental, social and governance ("ESG") index, the Templeton Global Macro-ESG Index (the "TGM-ESGI") to:

- screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reach 10% of the Fund's investment universe dedicated to sovereign bonds; and
- commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager sought to attain these characteristics by using MSCI ESG ratings to:

- screen out corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings and exclude them from the Fund's investment universe dedicated to corporate bonds; and
- commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio has been constructed based on a universe of sovereign issuers with historic data of bond issuance in the given geographical region, and excluding issuers from countries:

- with no current debt outstanding;
- recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- which do not have any debt in issuance denominated in euro or US dollar and does not have a local custodian entity

- meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- any country where foreign ownership of sovereign bonds is not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of investment universes dedicated to supranational and corporate bonds of the Fund's portfolio was constructed by issuers that have MSCI ESG ratings.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics that the Fund promotes.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The sustainability indicators performed as anticipated.

Sustainability KPI Name	Value
The share of sovereign issuers having exposure to, or ties with the sectors and the additional exclusions	0.00%
The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%
The ESG score difference between the Fund's portfolio and the investment universe	6.43

● **... And compared to previous periods?**

Not applicable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Not applicable.

-----**How were the indicators for adverse impacts on sustainability factors taken into account?**

Not applicable.

-----**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are considered for corporate issuers:

violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;

For Sovereigns:

- exposure to controversial weapons; and
- revenues from fossil fuels

for corporate bonds:

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises
- Exposure to controversial weapons

Revenues from fossil fuels

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2025-05-21 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Kerajaan Malaysia	Government Bonds	10.70%	Malaysia

Estados Unidos Mexicanos	Government Bonds	4.60%	Mexico
Republic of Kazakhstan	Government Bonds	4.56%	Kazakhstan

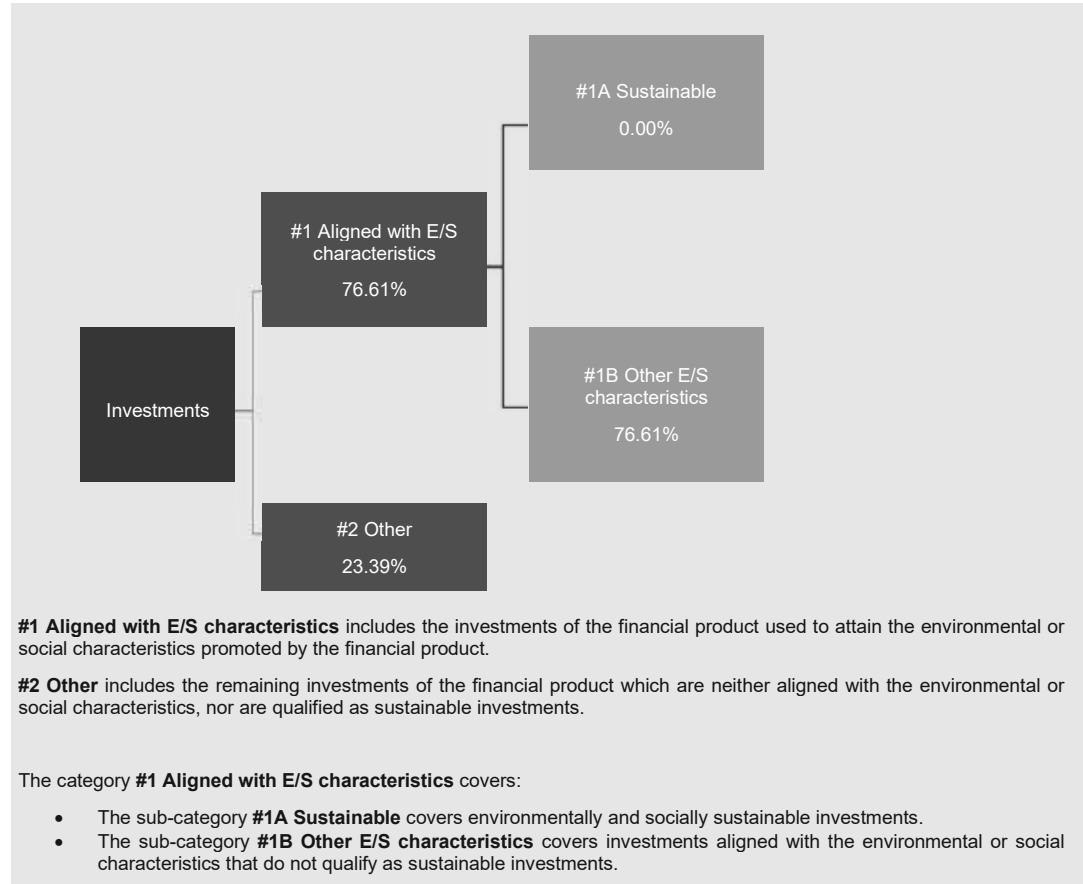

What was the proportion of sustainability-related investments?

The proportion of sustainable investments was 0%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

76.61% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (23.39%) was not aligned with the promoted characteristics and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives.

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government Bonds	76.60%
Top sub-sector	% of Assets
Government Bonds	76.60%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

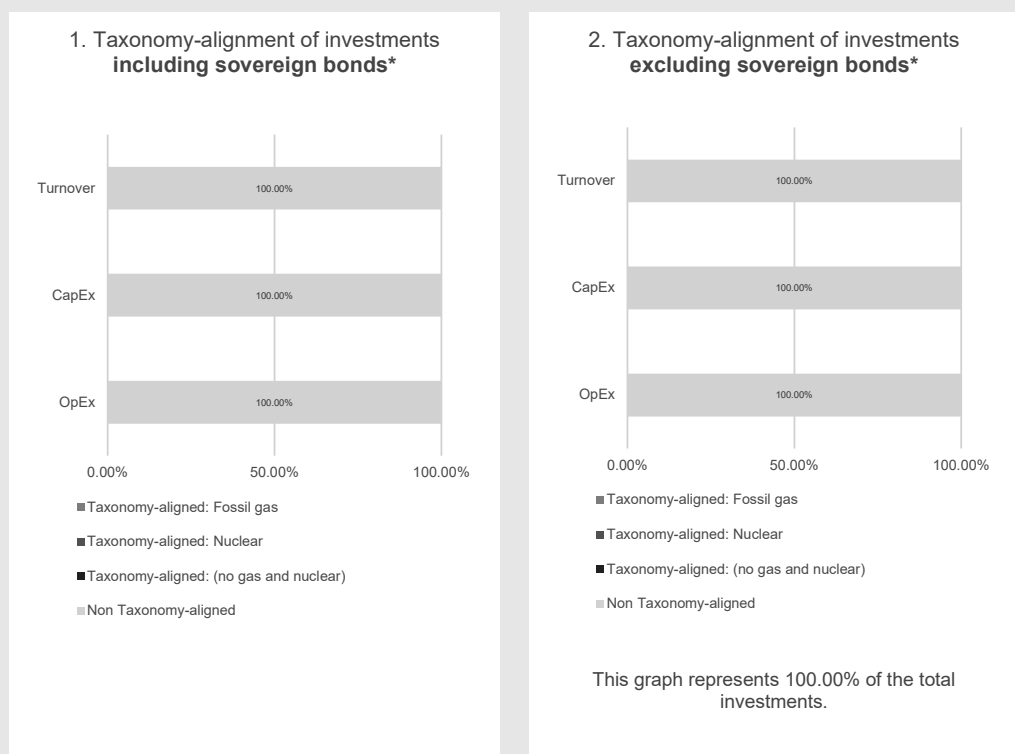

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

Not applicable.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under ‘#2 Other’ was 23.39% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives, for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, can be summarized as follows:

- the exclusion of countries and issuers that are subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC are excluded from the Fund’s investment universe;
- the exclusion of government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reach 10% of the Fund’s investment universe dedicated to sovereign bonds;
- the exclusion of corporate debt of issuers that are in the bottom 10% based on MSCI ESG ratings;
- the commitment to have a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- the commitment to have a weighted average base ESG score of the corporate bonds in the Fund’s portfolio higher than the average base ESG score of the investment universe dedicated to corporate bonds.

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESGI’s environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe was excluded.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Growth (Euro) Fund (the "Fund")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.84% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Managers sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Managers as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' Investment Universe, defined as MSCI All Country World Investable Market Index.

In this regard, the Fund allocated 94.79% of its assets to investments aligned with E/S characteristics.

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental or social outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

In this regard, the Fund allocated 46.84% of its assets to sustainable investments by investing in companies that demonstrate positive sustainable contribution to positive social and environmental outcomes.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Managers promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Sustainability KPI historical comparison	
	2025	2024
Value	Value	Value
Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	46.84%	38.34%
Number of investee companies with which the Investment Manager engages	61.00	64.00
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	2.29%	0.00%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	66.78%	61.96%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	30.93%	37.09%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%	1.05%
Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology	0.00%	N/A
Percentage of investee companies with greenhouse gas intensity (scope 1+2) score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of MSCI All Country World Index.	1.99%	0.00%
Weighted average base ESG score of the portfolio as measured by MSCI ESG Rating Methodology	6.96	7.27
Average ESG score of the Fund's Investment Universe as measured by MSCI ESG Rating Methodology	5.54	5.39
Share of investee companies with no females on the board of directors	0.00%	0.00%
Share of investee companies having emissions reduction targets	98.21%	N/A

... And compared to previous periods?

The Fund increased its exposure to companies aligned to the United Nations Sustainable Development Goals. One holding had GHG intensity in the bottom quintile of its industry sector. The company has established emissions reduction targets validated by the Science Based Targets initiative. In addition, one holding, representing 1.79% of the equity weight, does not have emissions reduction targets, though it has very low carbon intensity of <4 tons per million Euros in sales.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

The sustainable investments of the Fund comprised equity securities issued by companies which contributed, through their products or services, to positive environmental outcomes. The six positive environmental outcome areas, which contribute to the United Nations Sustainable Development Goals ("UN SDGs"), and include 3 social and 3 environmental, are:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);
- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Industry relevant impact indicators are compared to peers and the broad investment universe to identify potentially significant positive and negative impacts. The Investment Managers identified pertinent and significant sustainability risks and used its own qualitative judgement when reviewing the PAIs indicator data, where available, to assess whether investments cause any significant harm.

In addition, the Fund applied exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Managers took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

The Investment Managers performed an analysis at the level of each sustainable investment. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments and were not deemed eligible for the Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines for Multinational Enterprises;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

The Fund targeted decreasing greenhouse gas intensity by engaging with companies to encourage set emission reduction targets and disclose their climate change strategies. Please refer to the Templeton Global Equity Group Stewardship & Sustainability Report for examples of engagement on this topic. <https://franklintempletonprod.widen.net/content/0v61urf9ld/pdf/tgeg-sustainable-investing-report-en.pdf>

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index, (cumulatively), on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In the event of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria as of 30 June 2025. One holding had GHG intensity in the bottom quintile of its industry sector and emissions intensity greater than half that of the benchmark. The company has established emissions reduction targets validated by the Science Based Targets initiative.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Managers will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting this criteria as of 30 June 2025.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
MICROSOFT CORPORATION	Information Technology	4.11%	United States
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	3.04%	Taiwan, Province Of China

What was the proportion of sustainability-related investments?

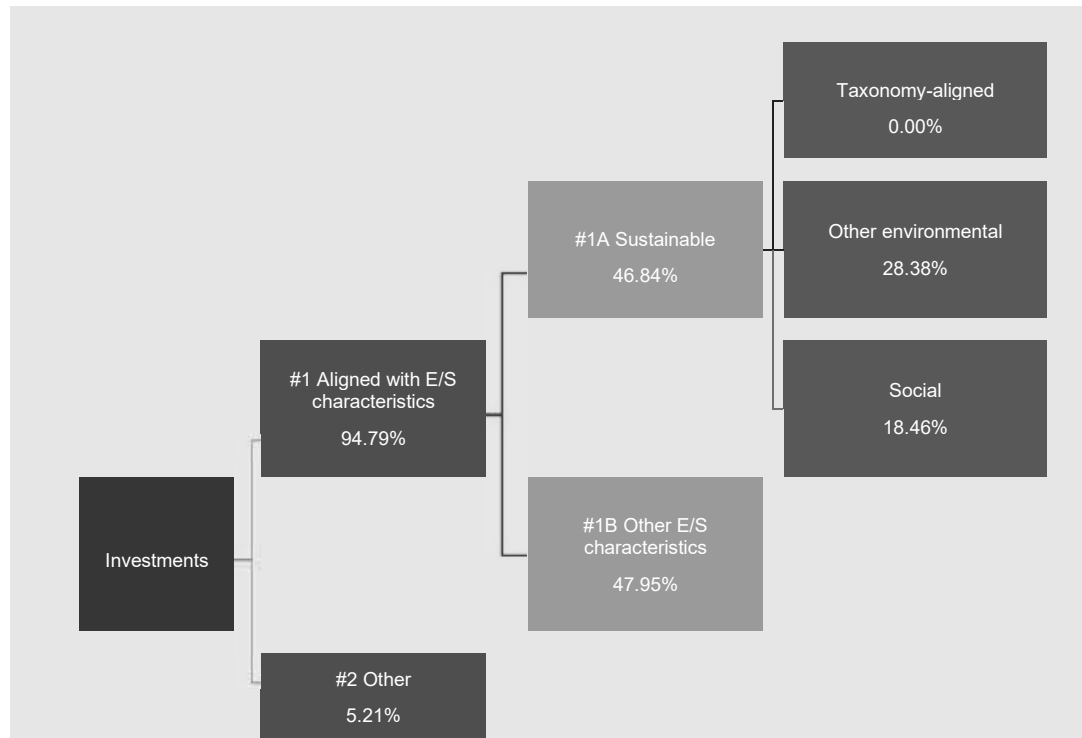

The proportion of sustainable investments was 46.84%

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

94.79% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund. The remaining portion (5.21%) was not aligned with the promoted characteristics and consisted of liquid assets held for liquidity purposes of the Fund and derivatives held for hedging and efficient portfolio management purposes.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 46.84% of its portfolio in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison	
	2025	2024
#1 Aligned with E/S characteristics	94.79%	95.59%
#2 Other	5.21%	4.41%
#1A Sustainable	46.84%	38.34%
#1B Other E/S characteristics	47.95%	57.25%
Taxonomy-aligned	N/A	N/A
Other environmental	28.38%	24.71%
Social	18.46%	13.63%

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Information Technology	20.38%
Financials	17.49%
Industrials	17.03%

Machinery	2.62%
Capital Markets	2.58%
Broadline Retail	2.53%
Financial Services	2.44%
Technology Hardware, Storage & Peripherals	2.19%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
 In fossil gas In nuclear energy
 No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of sustainable investments with an environmental objective that were not Taxonomy-aligned was 28.38%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The proportion of socially sustainable investments was 18.46%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under “#2 Other” was 5.21% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes, as well as derivatives used for hedging and/or efficient portfolio management purposes.

The Investment Managers applied minimum environmental safeguards by verifying that the counterparties used for derivative transactions and placement of deposits meet the EU Taxonomy Safeguards, as assessed by MSCI. Counterparties not meeting such criteria were not used by the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Managers, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. The Fund maintained a weighted average ESG rating of 6.96 as of 30 June 2025, higher than the average ESG rating of the companies in the Investment Universe, 5.54, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the MSCI ACWI Index (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Japan Fund (the "Fund")

Legal Entity Identifier: 549300H6F1GJEA2FHZ64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.49% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund consisted of, inter alia, the reduction of greenhouse gas ("GHG") emissions and gender diversity. The Investment Manager sought to attain these characteristics by:

- Excluding certain issuers and sectors considered by the Investment Manager as harmful for the society,
- Favouring issuers with a good environmental, social and governance (the "ESG") profile, as captured by its proprietary ESG methodology,
- Engaging with issuers which are considered as underperformers in terms of specific ESG metrics.
- Committing to have an ESG score at Fund level higher than the average ESG score of companies in the Funds' benchmark, which also represents its Investment Universe, defined as the Tokyo Stock Price Index (TOPIX).

In this regard, the Fund allocated 93.29% of its assets to investments aligned with E/S characteristics, 20.63% of its assets to sustainable investments with an environmental objective, and 6.86% to sustainable investments with a social objective.

Derivatives have not been used to attain environmental and social characteristics promoted by the Fund.

No reference benchmark has been designated with the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform?

The sustainability indicators performed as expected. The Fund exceeded its minimum share of sustainable investments, and the Investment Manager promoted environmental and social characteristics through its engagement activities.

The following sustainability indicators were used to measure the attainment of the environmental and/or social characteristics promoted by the Fund:

Sustainability KPI Name	Value
Percentage of the portfolio invested in companies with alignment to the United Nations Sustainable Development Goals (the "UN SDGs")	27.49%
Number of investee companies with which the Investment Manager engages	29.00

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Share of investee companies rated 1 (exceptional) by the Investment Manager's proprietary ESG methodology	3.21%
Share of investee companies rated 2 (above average) by the Investment Manager's proprietary ESG methodology	60.20%
Share of investee companies rated 3 (average) by the Investment Manager's proprietary ESG methodology	36.59%
Share of investee companies rated 4 (poor) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies rated 5 (unacceptable) by the Investment Manager's proprietary ESG methodology	0.00%
Share of investee companies with GHG Intensity score in the bottom 20% of their industry sector and greater than half the weighted average carbon intensity of the TOPIX	2.05%
Weighted average base ESG score of the portfolio, as measured by MSCI ESG Rating Methodology	7.14
Average ESG score of the Fund's Investment Universe, as measured by MSCI ESG Rating Methodology	5.55
Share of investee companies with no females on the board of directors	0.00%

● **... And compared to previous periods?**

Not applicable as there were no prior reference periods.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments of the Fund contributed to positive social and/or environmental outcome areas across one or more of the six following positive outcome areas linked to the United Nations Sustainable Development Goals (the "UN SDGs"):

Social Outcome Areas:

- Basic Needs (goods and services known to contribute significantly to development);
- Wellbeing (enhanced health, education, justice, and equality of opportunity for all);
- Decent Work (creation of secure, socially inclusive jobs and working conditions for all);

Environmental Outcome Areas:

- Healthy Ecosystems (maintenance of ecologically sound landscapes and seas for people and nature);
- Climate Stability (solutions to curb the Earth's temperature rise); and
- Resource Security (preservation of natural resources through efficient and circular use).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager used proprietary methodologies and qualitative research to ensure alignment with the Do No Significant Harm (DNSH) principle.

In addition, the Fund applied ESG exclusions that further reduce the likelihood for issuers causing significant harm to be invested by the Fund.

----- **How were the indicators for adverse impacts on sustainability factors taken into account?**

When assessing compliance of the Fund's sustainable investments with the DNSH principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS") as well as any of the optional indicators from Table 2 and 3 that are deemed to be relevant.

----- **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

The Fund did not invest in companies that, according to MSCI, do not observe the main international conventions (United Nations Global Compact principles (the "UNGC Principles"), Organisation for Economic Cooperation and Development (the "OECD") Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Specific thresholds and criteria for the following PAIs were considered by the Fund:

- Greenhouse gas intensity;
- Board gender diversity;
- Violations of UNGC or OECD Guidelines;
- Exposure to controversial weapons.
 - Greenhouse gas intensity

Companies scoring in the bottom quintile vs peers, and with a level greater than half that of the TOPIX, on the PAI of greenhouse gas intensity Scope 1 and 2 were to be addressed through engagement, with a requirement to establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. In case there is no improvement after 3 years, the Investment Manager takes all reasonable means to divest. 2.05% of assets were invested in Companies meeting this criterion, and these companies have established emissions reduction targets.

The Fund targeted decreasing greenhouse gas intensity and emissions reduction targets, engaging with companies to encourage them to align their business models with science based long term goals of net-zero emissions, set emission reduction targets and disclose their climate change strategies.

- Board gender diversity

Companies with no females on the board were to be addressed through engagement, with a requirement to add a female board member over a 3-year timeframe. In case of no improvement after 3 years, the Investment Manager will look to make use of a wide range of options, from voting against management at shareholder's meetings to selling the shares. There were no companies meeting these criteria.

- Violations of UNGC Principles or OECD Guidelines for Multinational Enterprises

The Fund excluded from its portfolio investments in companies which had been involved in violations of UNGC Principles or OECD Guidelines for Multinational Enterprises.

- Exposure to controversial weapons

The Fund excluded from its portfolio investments in companies involved in the manufacture or selling of cluster munitions, antipersonnel land mines, biological and chemical weapons.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is - 2025-05-21 - 2025-06-30.

The largest investments of this Fund during the reference period, excluding cash, were:

Largest investments	Sector	% of Assets	Country
EBARA CORPORATION	Industrials	7.06%	Japan
Mizuho Financial Group, Inc.	Financials	5.86%	Japan
RYOHIN KEIKAKU CO., LTD.	Consumer Discretionary	5.40%	Japan
IHI Corporation	Industrials	4.97%	Japan

The proportion of investments under “#2 Other” was 6.71% and included investments in liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for liquidity purposes.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded companies scoring 5 according to the Investment Manager’s proprietary ESG methodology;
- The Fund committed to engage with companies scoring 4, according to the Investment Manager’s proprietary ESG methodology. no company held scored a 4;
- The Fund maintained a weighted average ESG rating of 7.14, higher than the average ESG rating of the companies in the Investment Universe, 5.55, as measured by the ESG Score using the MSCI ESG Ratings Methodology;
- The Fund applied the ESG exclusions as further detailed in section “What investment strategy does this financial product follow?” in the Fund’s pre-contractual disclosure.
- The Fund committed to engage with companies scoring in the bottom quintile vs peers, and with a level greater than half that of the TOPIX (cumulatively) on greenhouse gas intensity (Scope 1 and 2) with a requirement to make improvements or establish an emissions reduction target or move out of the bottom quintile over a 3-year timeframe. 2.05% of assets were invested in Companies meeting this criterion, and these companies have established emissions reduction targets. No other companies held as of 30 June 2025 met this criterion;
- The Fund committed to engage with companies with no females on the board of directors, with a requirement to add a female board member over a 3-year timeframe. No companies held as of 30 June 2025 met this criterion.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Templeton Sustainable Emerging Markets Local Currency Bond Fund (the "Fund")

Legal Entity Identifier: 549300JZLKKHCV5C9G20

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Did this financial product have a sustainable investment objective?

YES

- It made **sustainable investments with an environmental objective: 0.00%**
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective: 0.00%**

NO

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.26% of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted broad environmental and/or social characteristics, which varied by composition of the portfolio and inter alia included:

- For sovereign issuers: actions around resource insecurity, extreme weather risk, unsustainable environmental practices, social cohesion & stability, infrastructure, health security, labour, human capital and demographics, and
- For corporate issuers: actions around climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition, and social opportunities.

In relation to sovereign issuers in its portfolio, Franklin Advisers, Inc. and Templeton Asset Management Limited (the "Investment Managers") attained these characteristics by using a proprietary environmental, social and governance ("ESG") rating methodology, the Templeton Global Macro ESG Index (the "TGM-ESGI") to:

- Screen out government bonds of the poorest performing countries in each of the ESG categories until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds; and
- Commit to a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio to be higher than the average base ESG score of the investment universe dedicated to sovereign bonds.

In relation to corporate issuers in its portfolio, the Investment Manager attained these characteristics by using MSCI ESG ratings to:

- Screen out corporate debts of issuers that are in the bottom 10% based on MSCI ESG ratings and excluded them from the Fund's investment universe dedicated to corporate bonds; and
- Commit to a weighted average base ESG score of the corporate issuers in the Fund's portfolio to be higher than the base ESG score of the investment universe dedicated to corporate bonds.

The portion of the investment universe dedicated to sovereign bonds of the Fund's portfolio had been constructed based on a universe of sovereign issuers with historic data of bond issuance, and excluding issuers from countries:

- with no current debt outstanding;
- Recorded as sanctioned by the United States Office of Foreign Assets Control (the "US OFAC"), the European Union (the "EU") or the United Nations (the "UN");
- Which did not have any debt in issuance denominated in Euro or US dollar and did not have a local custodian entity

- meeting the legal and regulatory requirements applicable to the Fund and its custody partners; and
- Any country where foreign ownership of sovereign bonds was not permitted or not reasonably practicable due to legal or regulatory restrictions.

The portion of the investment universe dedicated to supranational bonds and corporate bonds of the Fund's portfolio was constructed by issuers that have MSCI ESG ratings.

In addition, the Fund promoted positive environmental and/or social outcomes by investing a minimum of 50% of its net assets in sustainable investments, all of which were use of proceeds bonds issued by sovereign issuers, with a minimum of 25% in green bonds.

The Fund's weighted average base ESG score was 55.33 and the investment universe average base ESG score was 49.02 over the reference period.

The Fund did not use a reference benchmark to which it aligned the environmental and/or social characteristics that the Fund promoted.

In this regard, the Fund allocated 86.89% of its assets to investments aligned with the E/S characteristics over the reference period. This included currency-related derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The sustainability indicators performed as anticipated. Note that the Fund increased its minimum commitments in sustainable investments to 50%, with a minimum of 25% in green bonds in June 2025. Although the quarterly averages were less than the new minimums, they were over 50% and 25%, respectively, as at 30 June 2025.

Sustainability KPI Name	Sustainability KPI historical comparison		
	2025	2024	2023
The share of sovereign issuers and companies having exposure to, or ties with the sectors and the additional exclusions	0.00%	0.00%	0.00%
The share of sovereign issuers subject to social violations deemed to have severe/very severe adverse impact	0.00%	N/A	N/A
The ESG score difference between the Fund's portfolio and the investment universe	6.31	7.62	7.87
The percentage of investments in green bonds	18.38%	10.01%	15.97%
The percentage of investments in use of proceeds bonds other than green bonds	4.71%	N/A	N/A

... And compared to previous periods?

The values were in line with previous periods.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested 18.38% of its portfolio in green bonds over the reference period, where the use of proceeds had been specified by the issuer, and verified by a third party or the Investment Manager, to benefit underlying environmental projects such as but not limited to:

- The efficient use of energy, raw materials, water and land;
- The production of renewable energy;
- The reduction of waste, greenhouse gas emissions and lower impact of economic activities on biodiversity; and
- The development of circular economy.

The Fund also invested in social bonds, where the use of proceeds has been specified by the issuer to benefit underlying social objectives such as but not limited to:

- tackling inequalities and fostering social cohesion;
- social integration and community development;
- good labour relations;
- social protection of the most vulnerable community members, including but not limited to excluded and/or marginalized populations and/or communities, women and/or sexual and gender minorities, aging populations and vulnerable youth;
- universal access to basic social infrastructure, quality education and healthcare; or

investments in human capital, including disadvantaged communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

For sovereign issuers, the relevant principal adverse impacts (the "PAIs") on social violations were assessed through a proprietary responsibility index that incorporated indicators on global cooperation, human rights, and civil liberties among others. For every sustainable investment targeted by the Investment Manager, an assessment of the materiality of PAIs to the underlying investment was made, documented and the probability of adverse impact was estimated. After this assessment, the Investment Manager determined whether an investment had no, low, moderate, severe or very severe adverse impact. The Investment Manager did not make investments that fell in the severe/very severe category.

How were the indicators for adverse impacts on sustainability factors taken into account?

When assessing compliance of the Fund's investments with the Do No Significant Harm principles, the Investment Manager took into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards ("RTS"), to the extent they were relevant for the investments contemplated by the Fund and other data points deemed by the Investment Manager as proxies for adverse impact. Issuers deemed to be in breach of these indicators did not qualify as sustainable investments. While assessing eligible green bonds, the Investment Manager reviewed and documented the materiality of PAIs for the project.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The sustainable investments in the Fund's portfolio were solely bonds issued by sovereign countries or supranational organisations. The Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were not applicable to such investments.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

During the period, the following principal adverse impacts (the "PAIs") were considered for sovereign and supranational issuers:

- Greenhouse gas emissions; and
- Social violations.

Greenhouse gas emissions of the investee countries were monitored through greenhouse gas intensity Scope 1 data points.

Social violations by the investee countries, were monitored as part of the TGM-ESGI, where the Investment Manager reviewed institutional strength, social cohesion and stability and income equality among others. This is in addition to explicitly excluding countries subject to international sanctions, including those imposed by the UN, EU or US OFAC.

The following PAIs are normally considered for corporate issuers:

- Violations of the United Nations Global Compact principles (the "UNGC Principles") or Organisation for Economic Co-operation and Development (the "OECD") Guidelines for Multinational Enterprises;
- Exposure to controversial weapons; and
- Revenues from fossil fuels.

However, the Fund did not invest in corporate bonds over the reference period.

What were the top investments of this financial product?

The largest investments of this Fund during the reference period, excluding cash, were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is - 2024-07-01 - 2025-06-30.

Largest investments	Sector	% of Assets	Country
Arab Republic of Egypt	Government Bonds	8.57%	Egypt
Republic of India	Government Bonds	8.20%	India
Republica de Colombia	Government Bonds	6.84%	Colombia
Rzeczpospolita Polska	Government Bonds	5.94%	Poland
Republica Federativa do Brasil	Government Bonds	5.16%	Brazil
Republic of Namibia	Government Bonds	4.66%	Namibia
Sultanate of Oman	Government Bonds	4.06%	Oman
International Bank for Reconstruction and Development	Government Bonds	3.90%	United States
Kerajaan Malaysia	Government Bonds	3.83%	Malaysia

What was the proportion of sustainability-related investments?

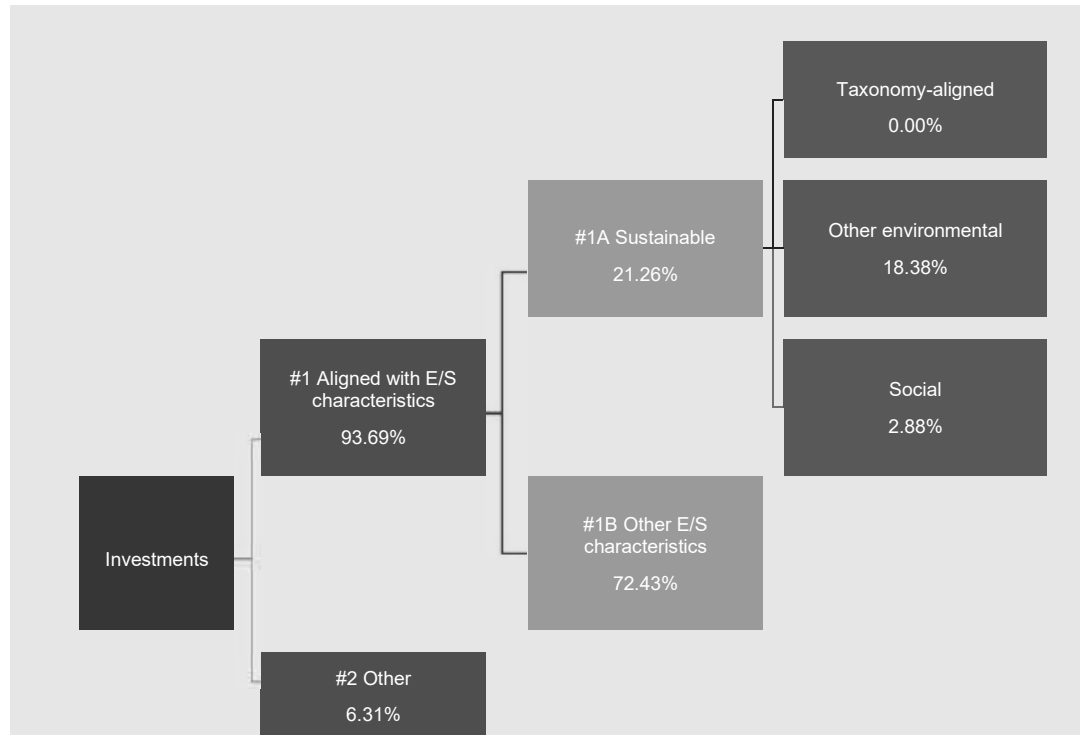

The proportion of sustainable investments was 21.26%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

93.69% of the Fund's portfolio was aligned with the E/S characteristics promoted by the Fund over the reference period. The remaining portion (6.31%) included liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives that, by their nature, cannot be aligned with the environmental and/or social characteristics promoted by the Fund.

Out of the Fund's portfolio segment which was aligned with the promoted environmental and/or social characteristics, the Fund invested 21.26% of its portfolio in sustainable investments over the reference period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investment Category	Asset Allocation historical comparison		
	2025	2024	2023
#1 Aligned with E/S characteristics	93.69%	93.51%	92.15%
#2 Other	6.31%	6.49%	7.85%
#1A Sustainable	21.26%	10.01%	15.97%
#1B Other E/S characteristics	72.43%	83.50%	76.18%
Taxonomy-aligned	N/A	N/A	N/A
Other environmental	18.38%	10.01%	15.97%
Social	2.88%	N/A	N/A

● ***In which economic sectors were the investments made?***

The top sectors and sub-sectors of this Fund during the reference period, excluding cash, were:

Top sector	% of Assets
Government Bonds	93.69%
Top sub-sector	% of Assets
Government Bonds	93.69%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

- Yes
- In fossil gas In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

Not applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the**

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

In line with its investment strategy, namely, the Fund's commitment to make a minimum proportion 'sustainable investments' with an environmental objective as per the SFDR art. 2(17) that do not qualify as environmentally sustainable under the EU Taxonomy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives –see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Regulation, 18.38% of the Fund was comprised of 'sustainable investments' with an environmental objective that do not qualify as environmentally sustainable under the EU Taxonomy over the reference period.

Note that the Fund increased its minimum commitments to environmental objectives to 25% in June 2025. Although the quarterly average was less than the new minimum, it was over 25% as at 30 June 2025.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 2.88%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The proportion of investments under '#2 Other' was 6.31% and consisted of liquid assets held for the purposes of servicing the day-to-day requirements of the Fund and/or to serve as collateral for derivatives for which there were no minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The binding elements of the investment strategy, which were not at the discretion of the Investment Manager, and that have been employed in order to meet the environmental and/or social characteristics can be summarized as follows:

- The Fund excluded countries and issuers that were subject to international economic sanctions, including sanctions imposed by the UN, the EU or the US OFAC;
- The Fund excluded government bonds of the poorest performing countries in each of the ESG categories based on current proprietary country scores until the exclusions reached 10% of the Fund's investment universe dedicated to sovereign bonds;
- The Fund excluded corporate debt of issuers that were in the bottom 10% based on MSCI ESG ratings;
- The Fund invested more than 25% of the portfolio in green bonds qualifying as sustainable investments over the reference period; - Note that the Fund increased its minimum commitments to environmental objectives to 25% in June 2025. Although the quarterly average of 18.38% was less than the new minimum, it was over 25% as at 30 June 2025.
- The Fund achieved a weighted average base ESG score of the sovereign bonds (including supranational bonds and also the notional value of net long positions in related derivatives) in the Fund's portfolio higher than the average base ESG score of the investment universe dedicated to sovereign bonds; and
- The Fund did not own corporate bonds over the reference period

For the purpose of restricting the investment universe, exclusions based on countries subject to international sanctions were applied first. The exclusion of countries with the weakest ESG scores was applied to the remaining investment universe.

Exclusions of the weakest scoring countries occurred sequentially, beginning with the removal of the poorest scoring country according to TGM-ESG's environmental score, then the country within the remaining universe with the weakest social score, and finally the country with the weakest governance score was removed. This process was repeated until 10% of the universe had been excluded.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
