Goldman Sachs Funds Directors' Report

Corporate Governance Statement

Introduction

The Board of Directors (the "Board") of Goldman Sachs Funds (the "Fund") is committed to maintaining high standards of corporate governance and as such has adopted the principles set out in the Association of the Luxembourg Fund Industry ("ALFI") Code of Conduct Revision 2022 (the "Code") issued by ALFI in June 2022 which sets out principles of good governance.

The Board considers that the Fund has been in compliance with the principles of the Code in all material aspects for the year ended 30 November 2025. The Board undertakes an annual review of ongoing compliance with the principles of the Code.

The principles of the Code are set out below:

1. The Board should adopt clear and transparent standards of corporate governance;
2. The Board should have good professional standing and appropriate experience and use best efforts to ensure that it is collectively competent to fulfil its responsibilities;
3. The Board should act fairly and independently in the best interests of the investors;
4. The Board should act with due care and diligence in the performance of its duties;
5. The Board should ensure compliance with all applicable laws and regulations and with the Fund's constitutional documents;
6. The Board should ensure that investors are properly informed, are fairly and equitably treated, and receive the benefits and services to which they are entitled;
7. The Board should ensure that an effective risk management process and appropriate internal controls are in place;
8. The Board should identify and manage fairly and effectively, to the best of its ability, any actual, potential or apparent conflict of interest and ensure appropriate disclosure;
9. The Board should ensure that Shareholder rights are exercised in a considered way and in the best interests of the Fund;
10. The Board should ensure that the remuneration of the Board members is reasonable and fair and adequately disclosed;
11. The Board should integrate as appropriate sustainability standards and objectives including environmental, social and governance (ESG) criteria in its business model and operations.

Board Composition

The Board currently consists of two Independent Non-Executive Directors, three Executive Directors and one Non-Executive Director. The Board defines an Executive Director as someone who is employed by the Goldman Sachs Group, Inc. or any of its affiliates, and an Independent Non-Executive Director as someone who is free of any business, family or other relationship with the Fund or Goldman Sachs Group, Inc. or any of its affiliates.

Article 13 of the Fund's Articles of Incorporation in accordance with Luxembourg law, provides that Directors shall be elected by the shareholders at their annual general meeting for a period ending at the next annual general meeting and until their successors are elected.

Directors receive induction training upon appointment, as well as receive regular updates and briefings incorporating all relevant information regarding the Fund to facilitate the Director fulfilling his or her duties responsibilities as a Director. The Fund's policy is to encourage Directors to keep up to date with developments relevant to the Fund. The Directors have attended and will continue to attend updates and briefings run by

Goldman Sachs Funds Directors' Report

Goldman Sachs Group, Inc. or its affiliates. The Directors also receive regular briefings from, amongst others, auditors, investment specialists, risk specialists, depository and legal advisers regarding any proposed product developments, changes in laws or regulations and market practice that could affect the Fund.

In addition to the full Board of Directors there is an Audit Committee who are primarily responsible for overseeing the quality and integrity of the financial reporting process, along with a review of any external auditor's findings and review of compliance of legal and regulatory requirements that have a material effect on the financial statements. The Audit Committee will report to the full Board of Directors on a regular basis and will also identify any matters within its mandate which would require further action/attention by the Board.

Board Responsibilities

The Board meets at least quarterly and on an ad hoc basis as required. The Board is supplied with information in a timely manner and of a quality appropriate to enable it to discharge its duties. The Board reserves to itself decisions relating to the determination of investment policy and objectives, any change in investment strategy, entering into any material contracts, any change in board membership, any change of external auditor and any significant change in accounting policies or practices.

The Directors have access to the advice and services of external counsel and the resources of the Goldman Sachs Group, Inc. including, but not limited to, investment specialists, risk specialists and various infrastructure teams. Where necessary, in the furtherance of their duties, the Board and individual Directors may seek independent professional advice.

The Board is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Fund and to enable them to ensure that the financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds.

In fulfilment of this responsibility, the Board have appointed Goldman Sachs Asset Management B.V. ("GSAMBV") as its Management Company, which has delegated the administration of the adequate accounting records to State Street Bank International GmbH, Luxembourg Branch.

The Directors are also responsible for safeguarding the assets of the Fund and in fulfilment of this responsibility they have contracted the assets of the Fund to State Street Bank International GmbH, Luxembourg Branch (the "Depository") for safekeeping in accordance with the Prospectus and Articles of Association of the Fund. They are also responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Board exercises these functions, inter alia, to fulfil their responsibility of overseeing the management of the Fund and in their fiduciary duty to represent the interest of shareholders.

Remuneration

Ms. Grainne Alexander and Ms. Sophie Mosnier are independent Directors and have no executive function with the Investment Adviser or its affiliated companies. The Fund pays each independent Director an annual fee for their services as a Director of the Fund. For the year ended 30 November 2025, the total Directors' fees amounted to USD 117,966.

Mr. Jonathan Beinler, Mr. Dirk Buggenhout, Mr. Jan Jaap Hazenberg and Ms. Hilary Lopez are affiliated with the Investment Adviser and receive no compensation from the Fund.

Communication with Shareholders

The Board is responsible for convening the annual general meeting and all other general meetings of the Fund. Notice of general meetings is issued in accordance with the Articles of Incorporation of the Fund and notice of the annual general meeting is sent out at least 8 days in advance of the meeting.

The next Annual General Meeting of Shareholders will be held on 30 April 2026 and shareholders will be asked to consider the usual matters presented at such meeting including:

Goldman Sachs Funds Directors' Report

- Approval of the financial statements
- The approval of Directors fees
- The election or re-election of directors
- The election or re-election of the auditor

The proceedings of general meetings are governed by the Articles of Incorporation of the Fund.

Goldman Sachs Funds Investment Adviser's Report For the Year Ended 30 November 2025

Dear Shareholders:

Enclosed is the report for the year ended 30 November 2025.

A. Market Review¹

Macro

December was marked by mixed United States economic and labour market data against a backdrop of uncertainty about the incoming administration's trade policy. Chinese economic figures were generally weak.

A key event in January was newly elected President Trump's inauguration speech. Ahead of the event, market participants were worried about tariffs, but a lack of any concrete details led to short-term relief, helping risk assets. In February, major developed market central banks, excluding the Bank of Japan (BoJ), continued to point towards a gradual easing of interest rates even though inflation remained above target. In March, weaker United States activity data, especially business and consumer surveys, coupled with trade policy uncertainty weighed on risk sentiment. The United States Federal Reserve (Fed) revised its 2025 growth estimate down and inflation estimate up. In Europe, Germany launched a significant fiscal package to support growth and bolster national security.

Tariff-related news drove financial markets in April. On April 2, the Trump administration announced a 10% tariff on most trading partners coupled with country-specific reciprocal tariffs, which were higher than market expectations. On May 12, the Trump administration announced that the US and China had agreed to reduce tariffs, bringing US tariffs down from 145% to 30% and Chinese tariffs from 125% to 10%, which left US tariffs on Chinese imports at 30% and Chinese tariffs on US imports at 10%. This led economists to revise their growth expectations for both economies upwards. However, hard data in the US softened, with core retail sales, industrial production and core capital goods orders weaker than expected. While trade policy remained volatile, the Trump administration proceeded quickly on the fiscal policy front. The House passed the "One Big Beautiful Bill Act", which could boost US growth in 2026 but would likely keep deficits elevated. In June, US labour market data was sufficiently healthy to alleviate concerns about recession. This positive sentiment was bolstered by weaker inflation data, which heightened expectations about Fed rate cuts.

In July, US payroll data remained solid and consumer spending resilient, but core CPI edged up to 2.9%, suggesting tariffs were starting to have a limited impact on prices in some sectors. The US and Japan announced a trade deal during the month. Eurozone inflation eased modestly, while the Chinese economy showed continued signs of weakness. President Trump's latest round of tariffs took effect in August, with new rates on 90 countries including 39% on Switzerland and 50% on Brazil. There were signs of the US labour market weakening, with slower payroll increases and cooling wage pressures, while consumer confidence dipped and housing activity remained subdued. The Eurozone composite PMI rose to 51.1, its highest level in 15 months. Problems in the Chinese property market persisted, with authorities reacting by extending targeted measures for developers and easing some credit conditions. US economic data released in September generally pointed to strength, although there were further signs that the labour market was weakening. Inflation remained well above the Fed's 2% target. In Europe, French President Macron appointed Sébastien Lecornu as the country's new prime minister following the collapse of the government headed by François Bayrou, while Eurozone core CPI came in slightly higher than expected at 2.3% Year-over-Year (YoY).

The US government entered a partial shutdown on October 1 after lawmakers failed to reach an agreement on federal spending, resulting in the release of key economic data being delayed. There was optimism about US trade with China and India but concerns about the health of the regional banking system in the US. Israel declared a ceasefire in Gaza, while France's prime minister resigned after just 26 days in office, only to be reappointed a few days later. Sanae Takaichi, a proponent of proactive fiscal spending, became Japan's new prime minister. The US government shutdown finally ended on November 12, making it the longest-ever US shutdown at 43 days. Data released during the month suggested the labour market was softening and inflation, while still well above the Fed's 2% target, was not increasing markedly. UK core CPI fell to a six-month low of 3.4% YoY, while Chinese industrial production growth fell to 4.9% YoY, below expectations.

Monetary Policy

The Fed cut interest rates by 25bps in December but surprised the markets by adopting a more hawkish tone than previously. The European Central Bank (ECB) also cut by 25bps, as expected, whereas in the UK, the Bank of England (BoE) kept rates on hold at 4.75%.

2025 began with the ECB reducing its policy rate in January by 25bps to 2.75%, in line with expectations. As in 2024, the BoJ remained an outlier, hiking rates by 25bps to 0.5%. In the UK, the BoE cut by 25bps, as expected, at its February meeting. In March, the Fed left rates unchanged and signaled that it was in no rush to cut rates if the labour market was healthy.

In April, Fed Chair Powell noted that the Fed was well positioned to wait for greater clarity given the highly uncertain outlook. Across the border, the Bank of Canada held its policy rate at 2.75%, as widely anticipated. The ECB cut rates by 25bps, with the ECB Governing Council noting that the growth outlook had deteriorated

Goldman Sachs Funds Investment Adviser's Report For the Year Ended 30 November 2025

due to trade uncertainty. In May, the Fed kept rates unchanged, as did the BoJ. With no major surprises in inflation or labour market data, the Fed maintained its stance at its June meeting. In Europe, the highlight in June was the German budget draft proposal, which signaled a more frontloaded fiscal boost. Earlier in the month, the ECB cut its policy rate by 25bps.

The major central banks all kept their rates unchanged in July. The BoE cut rates by 25bps to 4.0% in August, as expected. The Fed kept rates unchanged but at Jackson Hole, Fed Chair Powell highlighted downside risks to employment while noting that the inflationary impact of tariffs was only likely to be temporary. In September, the Fed cut rates by 25bps to 4.00-4.25%, as widely expected. Chair Powell referred to the move as a "risk-management" cut in response to pressures on the labour market. The ECB, BoE, BoJ and People's Bank of China all kept rates on hold.

The Fed cut rates by another 25bps in October and announced that balance sheet run-off would end at the start of December, although Chair Powell's press conference was more hawkish than expected. The BoJ and ECB kept rates on hold. The BoE kept rates unchanged by a 5-4 vote in November. October's Federal Open Market Committee (FOMC) meeting minutes released in November made clear there were strongly differing views among participants about whether the Fed should cut rates again in December.

Bond Markets

The US 10Y yield shot up by 19bps in December after the Fed revealed that it planned to cut rates less in 2025 than had previously been expected. The yield spread between US Treasuries and German Bunds reached its widest level since 2019, reflecting diverging monetary policy stances in the US and Europe.

The US 10Y yield was unchanged in January, while a 25bps hike by the BoJ led to a 14bps increase in the Japanese 10Y yield. In February, the US 10Y yield fell by 34bps, with weaker growth data overshadowed by higher-than-expected inflation figures. The Japanese 10Y yield rose from 1.24% to 1.37%. In Europe, the UK 10Y yield was up by 5bps, whereas the German 10Y yield fell by 7bps. Yields generally rose in March, with the German 10Y yield shooting up by 36bps on the back of the German government's fiscal package announcement.

Rates were volatile in April, with the US 10Y sinking to a low of 3.98% on April 4 and spiking to 4.49% on April 11 – a 51bps move in a week. German, UK and Japanese 10Y yields were down by 29bps, 25bps and 17bps respectively. At the short end, the US 2Y yield fell by 30bps as markets priced in more rate cuts. The US 10Y yield was up by 24bps in May on positive risk sentiment coupled with elevated deficits in the US. This was closely followed by increases of 23bps in UK 10Y and 18bps in Japanese 10Y yields. German 10Y yields were up by a more modest 6bps. In June, the US 2Y and 10Y yields both fell by 19bps, mainly driven by lower-than-expected core inflation and dovish comments from some FOMC members.

The US 10Y yield rose by 12bps in July as the bond market digested trade developments and some encouraging US economic data. The 10Y Bund yield rose by the same amount, hitting its highest level since April at one stage but falling back afterwards. In August, the 10Y US Treasury yield was down by 15bps as market participants increasingly expected the Fed to cut rates based on dovish comments from Jerome Powell. By contrast, the German 10Y Bund yield edged up by 3bps, while the 10Y French yield surged to 3.51% after the country's prime minister announced a vote of confidence. The US 10Y Treasury yield fell by 7bps in September to end the month at 4.15%, having fallen to just above 4.0% around the middle of the month. It rebounded later on due to some solid economic data and the Fed's hawkish tone despite cutting rates. The 10Y German Bund yield was essentially flat, ending the month down just 1bp, while UK gilt yields rose on the back of a weak government bond auction and the high UK deficit.

In October, the US 10-year Treasury yield initially decreased by 20bps, reaching 3.95%, influenced by US-China trade tensions and lower-than-expected inflation figures. However, following the FOMC meeting and Fed Chair Powell's remarks pushing back against the certainty of another rate cut in 2025, yields subsequently rose. The US 10-year Treasury yield concluded the month at 4.1%, representing a decrease of 5bps for the entire month. The 10Y German Bund yield performed in line with its US counterpart, ending the month 8bps down. The 10Y US Treasury yield declined in November, ending the month at 4.0% after falling below the 4% threshold at one stage, influenced by a higher probability of a Fed rate cut in December. By contrast, the 10Y German Bund yield rose by 5bps and Japanese yields hit multi-decade highs after the country's announcement of its biggest fiscal package since the pandemic.

Equity Markets

US equities ended 2024 weakly, with the S&P 500 losing more than 2.5% in December on the back of mixed economic data and the Fed's unexpected hawkish pivot. Euro area equities also fell over the month, but Japan's TOPIX index rose by nearly 4% as a weaker yen boosted exporters.

Global equities got off to a strong start in 2025, largely led by strong performance from Euro area and US equities. In the US, technology stocks underperformed, mainly due to a sell-off on January 27 on news that DeepSeek, a Chinese artificial intelligence (AI) lab, had released an open-source reasoning model with performance comparable to that of OpenAI's O1 but at a fraction of the cost. As a result, market participants questioned the growth and profit potential of AI-related stocks. Weaker US activity data and policy uncertainty

**Goldman Sachs Funds
Investment Adviser's Report
For the Year Ended 30 November 2025**

soured risk sentiment in February. However, in Europe, improving earnings coupled with better-than-expected economic data resulted in Euro area equities rising. Weaker activity data in the US coupled with trade and fiscal policy uncertainty again weighed on US equities in March.

Global equities were essentially flat in April, with little dispersion across major markets. However, there was considerable intra-month volatility, with markets falling sharply early in the month due to the US tariff announcements. Amidst the uncertainty, on April 9 President Trump announced a 90-day pause on country-specific reciprocal tariffs, except those on China, to allow for negotiations. Global equities rallied in response. They rose further in May, buoyed by the de-escalation of trade tensions. Global equities also rose in June, with the S&P 500 hitting a new all-time high after its struggles earlier in the year.

Global equities rose in July on the back of strong corporate earnings, optimism about tariffs, some encouraging economic data in the US and President Trump stating that he believed firing Fed Chair Powell was unnecessary. US indices and the UK's FTSE 100 hit new record highs, although they fell towards the end of the month on the announcement of new reciprocal tariffs. August was another good month for the global equity markets amid optimism about Fed rate cuts, with major indices hitting multiple all-time highs. It was the same story of new all-time highs in September against a backdrop of the Fed cutting rates and continued enthusiasm about artificial intelligence. China's Hang Seng hit a two-year high on hopes of government stimulus for the economy.

Global equities posted further gains in October on the back of strong earnings from tech companies, signs that the US's relationship with China was improving and expectations of further rate cuts. Equities were rangebound in November, driven by volatility in the US labour market data, odds of a December rate cut in the US, and a mid-month correction driven by an unwind in tech stocks and risk-off sentiment.

Goldman Sachs Funds Investment Adviser's Report For the Year Ended 30 November 2025

B. Performance Overview (as at 30 November 2025)²

Goldman Sachs Asset Management International

December 2025

All index returns are shown with income re-invested and, in contrast to the Share Classes, without the deduction of any fees or expenses. Returns of the Share Classes are shown net of fees and expenses and after the reinvestment of dividends where applicable using month end NAVs. For Share Classes where performance is shown relative to the index, it is for comparative purposes only. Reference to these benchmarks does not imply that the Share Classes will achieve returns, volatility or other results similar to the benchmark.

Audit report

To the Shareholders of
Goldman Sachs Funds

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Goldman Sachs Funds (the “Fund”) and of each of its sub-funds as at 30 November 2025, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of assets and liabilities as at 30 November 2025;
- the statement of operations for the year then ended;
- the statement of changes in shareholders' equity for the year then ended;
- the schedule of investments as at 30 November 2025; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

PricewaterhouseCoopers Assurance, Société coopérative,
2 rue Gerhard Mercator, L-2182 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund’s use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds (except for Global Clean Energy Infrastructure Equity Portfolio, Global Real Estate Equity Portfolio and Sterling Credit Portfolio where an intention to liquidate exists) to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

Other matter

In addition to our responsibility to audit and express an opinion on the financial statements in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we have been requested by the Board of Directors of the Fund to express an opinion on the financial statements in accordance with generally accepted auditing standards in the United States of America as issued by the AICPA, in order to meet the requirements of Rule 206(4)-2 of the US Investment Advisors Act of 1940. We have reported separately in this respect on Page 17.

Report of Independent Auditors

To the Shareholders of **Goldman Sachs Funds**

Opinion

We have audited the accompanying financial statements of Goldman Sachs Funds and each of its sub-funds (the “Fund”), which comprise the statement of assets and liabilities, the schedule of investments as of 30 November 2025 and the related statement of operations and statement of changes in shareholders’ equity for the year then ended, including the related notes (collectively referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as of 30 November 2025, and the results of its operations and changes in its net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors’ Responsibilities for the Audit of the financial statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern for at least, but not limited to, twelve months from the end of the reporting period, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- exercise professional judgment and maintain professional skepticism throughout the audit;
- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed;
- evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by the Board of Directors of the Fund, as well as evaluate the overall presentation of the financial statements;

- conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Information

The Board of Directors of the Fund is responsible for the other information included in the annual report. The other information comprises the information included in the annual report, but does not include the financial statements and our auditors' report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Luxembourg, 12 March 2026

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

1 Organisation

Goldman Sachs Funds (the “Fund”) was incorporated on 5 November 1992 under the laws of the Grand Duchy of Luxembourg as a “Société d’Investissement à Capital Variable” (“SICAV”), for an unlimited period of time. The Fund is registered in accordance with the Law of 17 December 2010, as amended and has appointed Goldman Sachs Asset Management B.V. (“GSAMBV”) to be its Management Company. GSAMBV is authorised and regulated by the Dutch Authority for the Financial Markets (AFM), and is a wholly owned subsidiary of The Goldman Sachs Group, Inc.

Refer to Note 6 for details of functions the Management Company has delegated.

The Fund has appointed State Street Bank International GmbH, Luxembourg Branch (the “Depository”) to act as the Depository of the Fund’s assets.

As at 30 November 2025, the Fund is comprised of sixty different portfolios (“the Portfolios”).

As at 30 November 2025, the Fund offered shares in the Portfolios as detailed in Report of the Management Company I.

Please refer to Report of the Management Company II for Portfolios that were launched, merged or closed during the year.

Goldman Sachs India Equity Portfolio (the “India Equity Portfolio”) previously invested through a wholly-owned special purpose subsidiary Goldman Sachs India Limited (the “Subsidiary”), a private company incorporated in Mauritius with limited liability. The Subsidiary is administered by Intercontinental Trust Limited, based in Mauritius. Intercontinental Trust Limited has sub-delegated the administration function to State Street Bank International GmbH, Luxembourg Branch. The investments which were held by the Subsidiary for and on behalf of the India Equity Portfolio were transferred away from the Subsidiary for them to be then held directly by the India Equity Portfolio. The transfer was completed on 7 October 2021 (the “Transfer Date”) and as of 30 November 2025, no investment of the India Equity Portfolio is held through the Subsidiary.

The India Equity Portfolio’s continued ability to invest in India is dependent on it continuing to meet current and future requirements placed on foreign institutional investors by the Securities and Exchange Board of India. If the India Equity Portfolio (or the Investment Adviser) were to fail to meet applicable requirements in the future, the India Equity Portfolio would no longer be permitted to invest directly in Indian securities, may not be able to pursue its principal strategy and may be forced to liquidate.

As at 22 November 2022, the Subsidiary has appointed a liquidator and commenced the process of liquidation. It is not expected to cause any significant disruption to the operational activities of Goldman Sachs India Equity Portfolio. The final meeting of the liquidator was held on 23 February 2026 with dissolution expected in Q2 2026.

2 Investment Objective Policies

The primary investment objectives of the Portfolios are detailed in the Prospectus and in the relevant Supplements of the Prospectus.

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

3 Significant Accounting Policies

(a) Basis of Preparation of Financial Statements

The financial statements of the individual Portfolios are presented in their base currency while the Combined Total of all the Portfolios is presented in United States Dollars. The Board of Directors considers that the Portfolios' base currency most accurately represents the economic effects of the underlying transactions, events and conditions of the Portfolios.

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

The preparation of financial statements requires the Board of Directors to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Refer to the Statement of Assets and Liabilities and Note 4 where the Board of Directors was required to make certain estimates and assumptions to determine value. Actual results may differ from those estimates.

In accordance with the Prospectus, Shareholders' Equity as at 28 November 2025 reflect all capital and securities transactions received up until 27 November 2025 for all Portfolios of the Fund. By way of information, if the Fund had calculated the Shareholders' Equity solely with a view to publication, all the capital and securities transactions received up until 28 November 2025 would have been included in the Shareholders' Equity as at 28 November 2025.

(b) Investment Transactions, Related Investment Income and Operating Expenses

Realised gains and losses are based on the Weighted Average Cost Method. Dividend income and dividend expense are recorded on the ex-dividend date and interest income and interest expense are accrued over the life of the investment. Interest income includes accretion of market discount, original issue discounts and amortisation of premiums and is recorded into income over the life of the underlying investment. Interest income and dividend income are recognised on a gross basis before withholding tax, if any.

Operating expenses are recognised on an accrual basis.

(c) Transaction Costs

Transaction costs are recognised in the Statement of Operations as part of net change in unrealised gain/(loss) on investment securities and net realised gain/(loss) on investment securities. Depository based transaction costs are included in 'Depository fees' in the Statement of Operations.

Please refer to Note 14 for details of the Portfolios that incurred separately identifiable transaction costs.

Transaction costs for fixed income investments, forward currency contracts and other derivative contracts are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio.

(d) Financial Investment in Securities and Valuation

i. Recognition and Derecognition

The Portfolios recognise financial assets and financial liabilities on the date they become a party to the contractual provisions of the investment. Any gains and losses arising from changes in value of the financial assets or financial liabilities are recorded in the Statement of Operations.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Portfolio has transferred substantially all risks and rewards of ownership.

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles

The value of all securities and derivatives is determined according to the following policies:

(ii.1) Exchange Listed Assets and Liabilities

The value of exchange traded financial investments, including transferable securities admitted to an official exchange listing or dealt in on any other regulated market that operates regularly, which comprise Common Stocks, Bonds, Real Estate Investment Trusts, Rights, Warrants, Mutual Funds, Preferred Stocks, Options and Futures Contracts, are valued based upon quoted market prices at the period end date without any deduction for estimated future transaction costs.

(ii.2) Debt Securities

Debt securities, comprising Bonds, Non-Agencies Asset Backed Obligations and Agencies Asset Backed Obligations, are valued at mid or bid depending on fund methodology, by third party service providers without any deduction for estimated future transaction costs.

Included within debt securities are mortgage-backed security To Be Announced ("TBA") commitments. These commitments reflect future dated purchases and sales of agency Mortgage Backed Securities ("MBS"). Certain Portfolios use these forward commitments to efficiently manage exposure to MBS. In addition, certain Portfolios may enter into "Dollar Roll" transactions, principally using TBAs, in which the Portfolios commit to simultaneously sell and repurchase MBS for delivery in future months. The Portfolios must maintain liquid securities having a value not less than the repurchase price (including accrued interest) for such forward commitments. The market value of the securities that the Portfolios are committed to purchase may decline below the agreed upon purchase price of those securities.

When a debt security has been identified as being in default, the interest accrual on the defaulted security may be stopped, and upon confirmation from relevant parties, the amount receivable may be written off.

(ii.3) Certificates of Deposit and Money Market Investments

Certificates of Deposit, Time Deposits, Commercial Papers and Money Market Investments are valued at mid by third party service providers, or where such pricing service is unavailable, at amortised cost which approximates market value.

(ii.4) Shares in Collective Investment Schemes

The value of investments in open-ended investment funds, comprising Mutual Funds, are valued based upon the official net asset value per share ("NAV") as at the last available date as supplied by the funds, in accordance with the valuation policy of the applicable fund as outlined in its prospectus. In cases where the most recent available NAV is not deemed representative of their fair value, the valuation is determined by the valuer and any significant changes or events that may have occurred after the latest available NAV is considered.

As at year-end, there are no investments in Collective Investment Schemes that have been valued by the valuer.

(ii.5) Derivatives

A derivative is an instrument whose value is derived from an underlying instrument, index reference rate or a combination of these factors. Derivative instruments may be privately negotiated contracts which are often referred to as over the counter ("OTC") derivatives or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments or commodities at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount.

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles (Continued)

(ii.5) Derivatives (Continued)

Derivative contracts are stated at market value and recognised as assets and liabilities in the Statement of Assets and Liabilities. Gains and losses resulting from the change in the market value are reflected in the Statement of Operations as a component of net change in unrealised gain/(loss). Realised gains or losses are recorded on termination or from periodic cash flow payments.

(ii.5) (a) Option Contracts

The Portfolios may enter into exchange traded and OTC option contracts with various counterparties. When the Portfolio purchases an option, an amount equal to market value which is based on the premium paid is recorded as an asset, the value of which is marked-to-market daily. When the Portfolio writes an option, an amount equal to market value which is based on the premium received by the Portfolio is recorded as a liability and is adjusted to the market value of the option written on each valuation date.

When options are closed, the difference between the premium and the amount paid or received, net of brokerage commissions, or the full amount of the premium if the option expires worthless, is treated as realised gain or loss. The exercise of an option written by the Portfolio could result in the Portfolio buying or selling a financial instrument at a price different from the current market value.

The fair value of an OTC contract is determined by using counterparty supplied valuations, an independent pricing service or valuation models which use market data inputs supplied by a third party pricing service, and is typically valued at mid. Exchange traded options are valued based on the exchange settlement/last sale prices, or, if the last settlement price is not available for any reason, at the midpoint of the bid and ask prices (or, in the absence of two-way trading, at the last bid price for long positions and the last ask price for short positions), or independent market quotes provided by a pricing service or counterparty.

(ii.5) (b) Futures Contracts

Futures contracts are contracts to buy or sell a standardised quantity of a specified commodity, security or index and are valued based on exchange settlement/last sale prices, last bid or ask prices on the exchange, or independent market quotes. Initial margin deposits, in either cash or securities, are required to trade in the futures market. Unrealised gains or losses on futures contracts are recognised to reflect the market value of the contracts and are included as a component of the unrealised gains or losses on the Portfolio's Statement of Operations. Variation margin is received or paid, depending on whether unrealised gains or losses are incurred. When the contract is terminated, the Portfolio will recognise a realised gain or loss equal to the difference between the value of the contract at the time it was entered into and the time it was closed.

(ii.5) (c) Swap Contracts

Swaps, comprising Interest Rate Swaps, Credit Default Swaps and Total Return Swaps, can be linked to any number of underlying investments and indices, and swap terms can vary greatly. Cash flows are exchanged based on the underlying. Upfront payments, which represent a risk premium, are amortised or accreted over the contract term. Swap agreements are carried at market value, typically valued at mid, and the value of the swap agreement is based on a counterparty provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. This collateral or margin is primarily denominated in base currency, and is paid from the custody account to the broker.

For the year ended 30 November 2025, all collateral in relation to total return swaps was pledged in the form of cash. Please refer to Note 13 for cash collateral information and to Report of the Management Company V for more information.

**Goldman Sachs Funds
Notes to the Financial Statements
For the Year Ended 30 November 2025**

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles (Continued)

(ii.5) Derivatives (Continued)

(ii.5) (c) Swap Contracts (Continued)

Total return swaps and more specifically OTC derivative transactions are entered into by the Portfolio under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

All returns from OTC derivative transactions will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

(ii.5) (d) Forward Foreign Currency Contracts

In a forward foreign currency contract, the Portfolio agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. Purchases and sales of forward foreign currency contracts having the same notional value, settlement date and counterparty and right to settle net are generally offset (which result in a net foreign currency position of zero with the counterparty) and any realised gains or losses are recognised.

Forward foreign currency contracts are valued at mid by third party pricing service providers.

(ii.5) (e) Covered Forward Mortgage Backed Securities

Covered forward mortgage backed securities represents TBA sales covered by long Federal National Mortgage Association positions, and are typically valued at mid.

(ii.6) All Securities and Derivatives

If a quoted market price is not available from a third party pricing service or a dealer, or a quotation is believed to be materially inaccurate, the market value of the investment is determined by using valuation techniques. Valuation techniques include the use of recent market transactions, reference to the current market value of another investment that is substantially the same, discounted cash flow analyses or any other techniques that provides a reliable estimate of prices obtained in actual market transactions. Such securities and derivatives shall be valued at their fair value as determined by the Valuer. Please refer to Note 4 for further details.

The investments have been valued in accordance with Luxembourg generally accepted accounting principles that may require the use of certain estimates and assumptions to determine value. Although these estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Refer to Note 4 for securities where the Valuer was used to determine fair value.

(e) Cash

Cash is valued at cost, which approximates market value.

(f) Due from/to Brokers

Due from brokers consists primarily of cash receivable for collateral from the Portfolios' clearing brokers and various counterparties. Due to brokers consists primarily of cash payable for collateral to the Portfolios' clearing brokers and various counterparties.

Due from/to broker balances are valued at cost, which approximates market value. Refer to Note 13 for further details.

Goldman Sachs Funds
Notes to the Financial Statements
For the Year Ended 30 November 2025

3 Significant Accounting Policies (Continued)

(g) Foreign Currency Translation

The books and records of all Portfolios are maintained in their base currency. Please refer to Report of the Management Company I for the base currency of each Portfolio. Transactions in foreign currencies are translated at the foreign currency exchange rate in effect at the date of the transaction. Assets and liabilities denominated in foreign currencies are translated into base currency at the foreign currency closing exchange rate in effect at the year end date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of assets and liabilities are recognised in the Statement of Operations. Foreign currency exchange gains or losses relating to investments, derivative financial investments, and all other foreign currency exchange gains or losses relating to monetary items, including cash and cash equivalents, are reflected in the net realised gain/(loss) or net change in unrealised gain/(loss) in the Statement of Operations.

(h) Expenses

Expenses incurred by the Fund that do not specifically relate to an individual Portfolio or Share Class of the Fund are allocated to the Portfolios based on an allocation basis that depends upon the nature of the charges. Expenses directly attributable to a Portfolio or Share Class are generally charged to that Portfolio or Share Class.

(i) "Snap" and "Close" Valuation

In the case of certain Portfolios, the Fund may decide to issue Share Classes which have different Valuation Points, termed "snap" and "close", where the "snap" Valuation Point takes a value at a time other than at market close and "close" takes the value based on market closing prices. In consequence, the net asset values and performance per share of such Share Classes are expected to differ from each other as a result of the application of different Valuation Points.

For the year ended 30 November 2025, such "snap" and "close" Share Classes as described above are applicable to:

- Japan Equity Partners Portfolio
- Japan Equity Portfolio
- Emerging Markets CORE[®] Equity Portfolio
- Global CORE[®] Equity Portfolio
- Global Small Cap CORE[®] Equity Portfolio
- US CORE[®] Equity Portfolio
- US Small Cap CORE[®] Equity Portfolio

The Statement of Assets and Liabilities, the Statement of Operations, the Statement of Changes in Shareholders' Equity and the Schedules of Investments have been presented using prices as of "snap" of all markets as of 30 November 2025. If the Schedules of Investments, the Statement of Assets and Liabilities, the Statement of Operations and the Statement of Changes in Shareholders' Equity were to be presented using the "close" prices, then the total market value and the Shareholders' Equity would vary as follows:

Portfolios	Currency	Market Value of Investments and Foreign Currencies including Unrealised Gain/(Loss) on Futures			Shareholders' Equity			
		Snap	Close	Variation	Snap	Close	Variation	Percentage Variation

3 Significant Accounting Policies (Continued)

(j) Income Equalisation Arrangements

Income equalisation arrangements may be applied in some or all of the Portfolios of the Fund. Where they are applied, these arrangements are intended to ensure that the income per share which is distributed or deemed distributed in respect of a distribution period is not affected by changes in the number of shares in issue during that period, and the amount of the first distribution received by a Shareholder in an impacted Portfolio following the purchase of shares in that Portfolio will represent partly participation in income received by the Portfolio and partly a return of capital (the "equalisation amount"). The equalisation amounts are included within the proceeds from shares issued and the payment for shares redeemed in the Statements of Changes in Shareholders' Equity.

(k) Swing Pricing

On any Business Day the Management Company in consultation with its appointed delegate, Goldman Sachs Asset Management International ("GSAMI") as Investment Adviser, in conformity with guidelines established by the Board of Directors, may determine to apply swing pricing (to include such reasonable factors as they see fit) to the net asset value per share. This method of net asset value calculation is intended to pass the estimated costs of underlying investment activity of the Portfolio to the active Shareholders by adjusting the net asset value of the relevant share and thus to protect the Portfolio's long-term Shareholders from costs associated with ongoing redemption and subscription activity. This is processed as a capital adjustment.

Swing pricing may take account of trading spreads on the Portfolio's investments, the value of any duties and charges incurred as a result of trading and may include an estimate of market impact. Where GSAMI, based on the prevailing market conditions and the level of subscriptions or redemptions requested by Shareholders or potential Shareholders in relation to the size of the relevant Portfolio, have determined for a particular Portfolio to apply swing pricing, the Portfolio's net asset value may be valued either on a bid or offer basis.

Because the determination of whether to value the Portfolio's net asset value on a bid or offer basis is based on the net transaction activity of the relevant day, Shareholders transacting in the opposite direction of the Portfolio's net transaction activity may benefit at the expense of the other Shareholders in the Portfolio. In addition, the Portfolio's net asset value and short-term performance may experience greater volatility as a result of swing pricing.

Investors should be aware that, the factor used to apply swing pricing ("swing factor") will under normal conditions not exceed 2% of the net asset value per share of the relevant Share Class of the Portfolio, unless otherwise stated in the relevant Supplement. Notwithstanding the above, where exceptional circumstances (including, but not limited to, widening bid offer spreads often as a result of high market volatility and/or illiquidity, exceptional market conditions market disruptions) the Management Company, in consultation with the Board of Directors, may decide, in the best interest of Shareholders and in respect of any particular Portfolio and on any Business Day, to apply a swing factor which is above 2%. Shareholders will be informed on such decision via a notice and/or a publication posted on www.gsam.com. The swing factor applied to individual Portfolios will be reviewed by the Investment Adviser on a periodic basis in order to verify their appropriateness in light of prevailing market conditions.

The reversal of the swing net asset calculation method presented in the Statement of Changes in Shareholders' Equity represents the reversal of the amount applied as at 30 November 2024.

Refer to the Statement of Assets and Liabilities and the Statement of Changes in Shareholders' Equity for the Portfolios that applied swing pricing as at 30 November 2025.

4 Valuation Determined by the Valuer

The Valuer is appointed by the Management Company. The Valuer also has direct responsibilities to the Board of Directors for certain valuation functions, which are ultimately reflected in the financial statements. The Valuer during the year ended 30 November 2025 was Goldman Sachs & Co. LLC and the valuation function was performed by Goldman Sachs Controllers Division ("Controllers").

Securities traded on certain Asia Pacific/Middle Eastern exchanges may utilise international equity adjusted prices provided by an independent third party pricing service in order to more accurately reflect the value of securities traded on markets which are closed at the valuation point.

The independent valuation service takes into account multiple factors including, but not limited to, movements in the securities markets, certain depositary receipts, futures contracts and foreign currency exchange rates that have occurred subsequent to the close of the foreign securities exchange. These investments are not included in the above table.

5 Taxation

Taxation – Luxembourg

The Fund is not liable for any Luxembourg tax on profits or income. However, the Fund is liable in Luxembourg to an annual subscription tax (taxe d'abonnement) of 0.05% per annum. The taxable basis of the subscription tax is the aggregate net assets of the Fund as valued on the last day of each quarter. This rate is however 0.01% per annum for each of the following:

- undertakings whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions;
- undertakings whose exclusive object is the collective investment in deposits with credit institutions; and
- individual compartments of undertakings for collective investment ("UCI") with multiple compartments referred to in the law dated 17 December 2010, as amended, as well as for individual classes of securities issued within a UCI or within a compartment of a UCI with multiple compartments, provided that the securities of such compartments or classes are reserved to one or more institutional investors.

Taxation – Belgium

The Fund may incur a liability to subscription tax at the rate of 0.0925% in respect of subscriptions made through intermediaries situated in Belgium to the extent that net shares are outstanding as of 31 December of the previous year.

Taxation – Subsidiary

The Governments of India and Mauritius signed a protocol on 10 May 2016 by virtue of which capital gains on all Indian investments made until 31 March 2017 would continue to be exempt from Indian tax under the India-Mauritius Treaty, irrespective of when they are sold. Short term capital gains arising on sale of equity shares sold on or after and from 1 April 2019 are taxable at the full capital gains tax rate as per the Indian tax

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

5 Taxation (Continued)

Taxation – Subsidiary (Continued)

laws. Long term capital gains were exempt up till March 2018 provided they were traded on the recognised stock exchange in India and suffered securities transaction tax. With effect from April 2018, these have been made taxable at the applicable rates provided under the India tax laws.

The investments which were held by the Mauritius Subsidiary were transferred to be held directly by the India Equity Portfolio - LUX entity. The transfer was completed on 7 October 2021 and as of 30 November 2025, no investment of the India Equity Portfolio is held through such Subsidiary. As at 22 November 2022, the Subsidiary has appointed a liquidator and commenced the process of liquidation. It is not expected to cause any significant disruption to the operational activities of Goldman Sachs India Equity Portfolio. The final meeting of the liquidator was held on 23 February 2026 with dissolution expected in Q2 2026.

Taxation – General

Each Portfolio may be subject to taxation on capital gains, interest and dividends in certain jurisdictions in which each Portfolio invests. It is the policy of each Portfolio to accrue for any such taxes on dividends and interest when the dividend is declared, interest is earned or capital gains are realised. At each valuation date, taxation on realised and unrealised appreciation of securities may be accrued for at statutory rates.

Prospective investors should consult their own taxation advisers regarding the tax implications of investing in the Fund in relation to their own individual circumstances as they may differ from the general statements that appear above.

6 Significant Agreements and Related Parties

Management Company

As outlined in Note 1, the Fund appointed GSAMBV, a wholly-owned subsidiary of The Goldman Sachs Group, Inc., as its Management Company.

The Portfolios pay the Management Company an annual fee which shall be accrued daily and generally paid monthly in arrears.

Investment Adviser and Investment Sub-Advisers

The Management Company has appointed GSAMI (the “Investment Adviser”), a related party to the Fund, as its delegate to provide portfolio management services.

GSAMI has entered into sub-delegation agreements with each of the following affiliated Investment Sub-Advisers:

- Goldman Sachs Asset Management LP
- Goldman Sachs Asset Management (Hong Kong) Ltd.
- Goldman Sachs Asset Management (India) Private Limited
- Goldman Sachs Asset Management (Singapore) Pte Ltd.
- Goldman Sachs Asset Management Co. Ltd.
- Goldman Sachs Hedge Fund Strategies LLC
- Goldman Sachs International

GSAMI has entered into sub-advisory agreements with each of the following external Investment Sub-Advisers (“the External Managers”):

Portfolios	External Managers*
Multi-Manager Dynamic World Equity Portfolio	Artisan Partners UK LLP Bell Asset Management Ltd. Eagle Capital Management LLC WCM Investment Management

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

6 Significant Agreements and Related Parties (Continued)

Investment Adviser and Investment Sub-Advisers (Continued)

* None of these investment advisers are an affiliate of GSAMI. As compensation for the services rendered under the Investment Advisory Agreement, GSAMI receives a fee, payable monthly, at an annual rate. A portion of the Investment Adviser's fees may be remitted to the Investment Sub-Adviser.

Expense Cap

GSAMI has voluntarily agreed to limit total expenses in respect of certain Portfolios and certain Share Classes. Therefore, to the extent that total ordinary expenses would exceed the expense cap, GSAMI has voluntarily agreed to bear any actual operating expenses that exceed any expense cap, either directly by waiving a portion of its fees or by reimbursement to the account of the relevant Share Class. The Investment Adviser may, in its sole discretion, designate which expenses of the Fund will be subject to any such expense cap imposed by the Investment Adviser. The expense cap does not include the GSAMI fee portion paid to external Investment Sub-Advisers. There is no guarantee that the existence or level of these expense caps will continue in the future and no obligation on the part of GSAMI to agree to limit total expenses in this way. In addition, the Portfolios are not obliged to reimburse GSAMI for prior financial year expense reimbursement, if any.

Details of advisory fee rates and the expense caps as at 30 November 2025 are detailed in Report of the Management Company I.

Performance Fees

GSAMI is entitled to a performance fee on certain Portfolios. For the Emerging Markets Total Return Bond Portfolio the performance fee accrues daily and is paid annually out of the assets attributable to each Share Class of the Portfolio. The performance fee is equal to 15% of the amount by which the Class NAV per share exceeds such Class' Benchmark Value per share, as defined within the Prospectus.

For the Global Strategic Macro Bond Portfolio the performance fee accrues daily and is paid annually out of the assets attributable to each Share Class of the Portfolios. The performance fee is equal to 10% of the amount by which the Class NAV per share exceeds such Class' Benchmark Value per share, as defined within the Prospectus.

There were no performance fees charged to other Share Classes of the mentioned Portfolios for the year ended 30 November 2025.

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

6 Significant Agreements and Related Parties (Continued)

Fees earned on other Goldman Sachs Funds

To the extent permitted by applicable law and the terms of the Prospectus, any Portfolio may invest all or some of its short term cash investments in any money market fund advised or managed by Goldman Sachs and may invest in other investment funds advised or managed by Goldman Sachs (together "Goldman Sachs Funds"). Subject to applicable law and the terms of the Prospectus, the Fund may be required to bear its proportionate share of any fees (including investment advisory and management fees) applicable to its investment in such investment funds.

For further details on investments into other Goldman Sachs Funds please refer to the Schedules of Investments.

All Portfolios invested in the Goldman Sachs Funds were invested in the non-investment advisory fee bearing share classes. As a result, for the year ended 30 November 2025, there were no investment advisory fees earned on each Portfolio's investment in the Goldman Sachs Funds.

Commissions

In the normal course of its operations, each Portfolio may enter into transactions on securities or futures contracts with the Goldman Sachs Funds or other Goldman Sachs affiliates (together "Goldman Sachs Affiliates").

For the year ended 30 November 2025, the following transactions were entered into with Goldman Sachs Affiliates with total brokerage commissions paid to Goldman Sachs Affiliates being split between commissions related to security transactions and futures contracts:

* Represents the cost of securities (excluding futures transactions and investments in the Goldman Sachs Liquid Reserves Funds) for transactions entered into with Goldman Sachs Affiliates.

** All portfolio futures transactions disclosed in this table were effected through Goldman Sachs.

*** Expressed in '000.

**** The amount used is calculated using the average exchange rate disclosed in Note 10.

For all the remaining Portfolios, there were no transactions with Goldman Sachs Affiliates, for the year ended 30 November 2025.

All such transactions, including those with Goldman Sachs Affiliates, were entered into in the ordinary course of business and on normal commercial terms.

Securities Lending

The securities lending agent is Goldman Sachs Agency Lending ("GSAL"), an affiliate of Goldman Sachs. Approved borrowers of GSAL may include Goldman Sachs International ("GSI"), an affiliate of the Investment Adviser, as well as other third parties. The Portfolios may lend portions of investments to third parties. In return, the Portfolios receive a fee that is negotiated for each transaction. The Portfolios receive G-10 (excluding Italy, Japan and the United States) government securities as collateral against the securities loaned. G-10 is made of eleven industrial countries (Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, Switzerland, the United Kingdom and the United States) which consult and co-operate on economic, monetary and financial matters. This collateral is maintained over the life of the loan for an amount not less than 105% of the value of lent securities, with any subsequent margin posted in the form of the aforementioned government securities or cash. In general, loans may be effected through the intermediary of prime financial institutions that specialise in such activities and in the way specified by them.

* Lendable assets are defined as the aggregate market value of equities and bonds held in the portfolio.

** Expressed in '000.

*** The amount used is calculated using the average exchange rate disclosed in Note 10.

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

6 Significant Agreements and Related Parties (Continued)

Administrator, Domiciliary Agent and Listing Agent

The Management Company has appointed State Street Bank International GmbH, Luxembourg Branch as the central administration agent of the Fund. The Fund has appointed State Street Bank International GmbH, Luxembourg Branch as its domiciliary and corporate agent, paying agent and as its listing agent in Luxembourg.

For its services as an Administrator, Domiciliary Agent and Listing Agent, State Street Bank International GmbH, Luxembourg Branch receives a fee payable monthly in arrears and calculated on the Monthly Average Net Assets of each Portfolio.

For its Financial Reporting Services, State Street Bank International GmbH, Luxembourg Branch receives a fixed fee per annum per Portfolio payable monthly in arrears.

Depository

The Fund has appointed State Street Bank International GmbH, Luxembourg Branch as Depository. For its services as Depository, State Street Bank International GmbH, Luxembourg Branch charges a fee which is a combination of a basis point charge on assets and transaction-based charge which is dependent on the country of transaction.

Distributor

The Fund has appointed the Management Company as principal distributor and the Management Company appoints sub-distributors and oversees them. GSAMBV may receive a portion of the sales charge imposed on the sale of Portfolio shares. Please see the table below which details the value of retained sales charges per Portfolio.

Portfolios	Currency	Retained Sales Charges
Emerging Markets Equity Portfolio	USD	9,462
Global Future Technology Leaders Equity Portfolio	USD	30,949
Global Future Generations Equity Portfolio	USD	30,664
India Equity Portfolio	USD	117,097
Japan Equity Portfolio*	JPY	57,340
Global CORE [®] Equity Portfolio	USD	419,605
Global Small Cap CORE [®] Equity Portfolio	USD	107,959
Asia High Yield Bond Portfolio	USD	1,311,168
Emerging Markets Corporate Bond Portfolio	USD	51,430
Global Securitised Income Bond Portfolio	USD	103,244
Global Multi-Asset Income Portfolio	USD	2,048,089
Total (in USD) **		4,613,544

* Expressed in '000

** The amount is calculated using the average exchange rates disclosed in Note 10.

For the year ended 30 November 2025, there were no retained sales charges for all other remaining Portfolios and there were no retained sales charges received by GSAMBV.

Please refer to the Prospectus for further details about distribution fees.

Out of its fees, the Distributor is responsible for remunerating third party sub-distributors.

Transfer Agent

The Management Company has appointed CACEIS Bank, Luxembourg Branch (the "Transfer Agent") to perform registrar and transfer agency functions in respect of the Fund pursuant to the Registrar and Transfer Agent Agreement between the Fund, the Management Company and the Transfer Agent.

Goldman Sachs Funds
Notes to the Financial Statements
For the Year Ended 30 November 2025

6 Significant Agreements and Related Parties (Continued)

Transfer Agent (Continued)

The day-to-day services provided to the Fund by the Transfer Agent include receiving and processing subscription and redemption orders, allotting and issuing shares and maintaining the shareholder register for the shares. The Transfer Agent is paid a fee, quarterly in arrears, out of the net assets of the Portfolios. The Transfer Agent's fee consists of both a fixed and variable fee.

The fixed portion consists of an annual charge for maintenance and shareholder account charges. Variable costs are determined by the level of transactions in each Portfolio.

Valuer

The Management Company has appointed Goldman Sachs & Co. LLC to act as the Valuer and the valuation function was performed by Controllers during the year ended 30 November 2025. Please also refer to Note 4.

8 Distributions

The Fund intends that substantially all the net investment income, if any, of each Portfolio will be declared as a dividend and paid at least annually to the Shareholders of the Distribution Share Classes of the Portfolios. Net capital and currency gains realised on each Portfolio's investments and/or capital attributable to certain Share Classes may also be distributed to Shareholders of certain Distribution Share Classes of the Portfolios.

Generally no distributions will be made in respect of the Accumulation Share Classes.

Please refer to the Prospectus for further details about distribution policies.

9 Financial Investments and Associated Risks

The Fund's investing activities expose it to various types of risks that are associated with the financial investments and markets in which it and its underlying Portfolios invest (the "Investment Risks"). The Board of Directors has appointed the Management Company to be responsible for, among other things, investment management and risk management. The Management Company has delegated certain investment management functions to the Investment Adviser.

The main types of financial risks which the Fund is exposed to are market risk, liquidity risk and credit risk. The Prospectus provides details of these and other types of risk some of which are additional to that information provided in these financial statements.

The risk management policies employed in relation to the Fund are outlined below.

**Goldman Sachs Funds
Notes to the Financial Statements
For the Year Ended 30 November 2025**

9 Financial Investments and Associated Risks (Continued)

(a) Market Risk

The potential for changes in the market value of the Fund's underlying Portfolios' investments is referred to as market risk. Commonly used categories of market risk include currency risk, interest rate risk and other price risk.

- (i) Currency risks may result from exposures to changes in spot prices, forward prices and volatilities of currency rates.
- (ii) Interest rate risks may result from exposures to changes in the level, slope and curvature of the various yield curves, the volatility of interest rates, mortgage prepayment speeds and credit spreads.
- (iii) Other price risks are the risk that the value of an investment will fluctuate as a result of changes in market prices other than those arising from currency risk and may result from exposures to changes in the prices and volatilities of individual equities, equity baskets, equity indices, and commodities.

The Fund's market risk strategy is driven by the Fund's underlying Portfolios' investment risk and return objectives.

Market risk is managed through the application of risk budgeting principles. The Investment Adviser determines an appropriate risk target, commonly referred to as Tracking Error, employing a risk budgeting framework.

(i) Currency Risk

The Fund may invest in financial investments and enter into transactions denominated in currencies other than its Portfolios' base currency. Consequently, the Fund may be exposed to risks that the exchange rate of its base currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Fund's assets or liabilities denominated in currencies other than the base currency.

When an investor invests into a Share Class which is in a different currency to the base currency of the Portfolio in which it invests, the currency risk of the investor will be different to the currency risk of the Portfolio.

(ii) Interest Rate Risk

The Fund may invest in fixed income securities and interest rate swaps contracts. Any change to relevant interest rates for particular securities may result in the Investment Adviser being unable to secure similar returns upon the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general, have the opposite effect. All fixed income securities and floating rate securities, together with their interest rate and maturity date are disclosed in the Schedule of Investments. The Fund may invest in instruments in desired currencies at fixed, floating and zero rates of interest.

(iii) Other Price Risk

Other price risk is the risk that the value of a financial investment will fluctuate as a result of changes in market prices, other than those arising from currency risk or interest rate risk whether caused by factors specific to an individual investment, its issuer or any factor affecting financial investments traded in the market.

The Fund's financial investments are carried at market value with market value changes recognised in the Statement of Operations, all changes in market conditions will directly affect Shareholders' Equity.

(b) Liquidity Risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Among other things liquidity could be impaired by an inability to access secured and/or unsecured sources of financing, an inability to sell assets or unforeseen outflows of cash or collateral or violations of counterparty or prime broker terms or covenants. This

Goldman Sachs Funds Notes to the Financial Statements For the Year Ended 30 November 2025

9 Financial Investments and Associated Risks (Continued)

(b) Liquidity Risk (Continued)

situation may arise due to circumstances outside of the Fund's control, such as a general market disruption or an operational problem affecting the Fund or third parties. Also, the ability to sell assets may be impaired if other market participants are seeking to sell similar assets at the same time.

The redemption of Shares of a Portfolio may be temporarily suspended, or deferred, by the Board of Directors or the Management Company on behalf of the Fund upon certain circumstances, and where it is deemed in the best interests of Shareholders.

As of 30 November 2025, the Fund participated in a USD 300,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other sub-funds of Goldman Sachs Funds II SICAV and Goldman Sachs Lux Investment Funds. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on a reference rate related to the drawn currency (Federal Funds Rate + 125bps). The facility also requires a fee to be paid by the Fund based on the amount of the commitment that has not been utilised. For the year ended 30 November 2025, the Fund did not have any borrowings under the facility.

(c) Credit Risk

Credit and counterparty risk is the risk that one party to a financial investment will cause a financial loss for the other party by failing to discharge an obligation.

Procedures have been adopted to reduce credit risk related to the Fund's dealings with counterparties. Before transacting with any counterparty, the Investment Adviser or its affiliates evaluate both credit-worthiness and reputation by conducting a credit analysis of the party, their business and reputation. The credit risk of approved counterparties is then monitored on an ongoing basis, including periodic reviews of financial statements and interim financial reports as needed.

(d) Additional Risks

(i) Sustainability Risk

Sustainability risk is defined in Article 3 of Regulation (EU) 2019/2088 (the "Sustainable Finance Disclosure Regulation") as an environmental, social or governance event or condition, that if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

Additional details of risks not disclosed in these Financial Statements can be found in the Prospectus.

10 Exchange Rates

The following exchange rates (against USD) were used to calculate the Combined Total, in the Statement of Assets and Liabilities, for the year ended 30 November 2025:

Currency	30-Nov-2025
1 Euro (EUR)	1.158451 USD
1,000 Japanese Yen (JPY)	6.400000 USD
1 United Kingdom Pound (GBP)	1.322951 USD

The following average exchange rates (against USD) were used to calculate the Combined Total, in the Statement of Operations and Statement of Changes in Shareholders' Equity (except for Shareholders' Equity at the start and end of the year) for the year ended 30 November 2025:

Currency	
1 Euro (EUR)	1.117915 USD
1,000 Japanese Yen (JPY)	6.694753 USD
1 United Kingdom Pound (GBP)	1.311496 USD

11 Commission Recapture

All Portfolios may direct trades, subject to obtaining best price and execution, to various brokers who have agreed to rebate a portion of the commissions generated. Such rebates are made directly to the applicable Portfolio as cash payments and are included in net realised gain and loss on investments in the Statement of Operations. For the year ended 30 November 2025, there were no commissions paid on securities in the program and reimbursed to the Portfolios.

12 Statement of Changes in each Portfolio

A Statement of Changes is available, free of charge, upon request from the registered office.

14 Transaction Costs

Transaction costs have been defined as broker commission fees, commission on futures contracts, market fees and taxes relating to purchase or sale of equity and investments in other funds. Depository based transaction costs are included in 'Depository fees' in the Statement of Operations.

Details of broker commissions with Goldman Sachs Affiliates can be found under Note 6 Significant Agreements and Related Parties – Commissions.

For the year ended 30 November, 2025, the following Portfolios incurred separately identifiable transaction costs:

Portfolios	Currency	Transaction Costs*	% of average Shareholders' Equity
Asia Equity Portfolio	USD	250,039	0.32%

* Transaction costs for fixed income investments, forward currency contracts and other derivative contracts are not separately identifiable. Portfolios that invest solely in those investments are not disclosed in the table above.

** Expressed in '000.

*** Total amount is calculated using the exchange rates disclosed in Note 10.

Note: benchmark returns, with the exception of taxes at times, do not incorporate transaction costs.

15 Commissions for Research and/or Execution

Certain Portfolios pay commission for execution only and/or execution and investment research. The commissions for execution are recognised in the settlement amount. The Fund did not otherwise enter into any third party commission arrangements for the year ended 30 November 2025.

16 Prospectus

As at 30 November 2025, the latest Prospectus of the Fund was issued in May 2025.

17 Currency Adjustment

In the Statement of Changes in Shareholders' Equity, the opening value of the Fund has been restated at the exchange rates ruling at 30 November 2024, and the combined figures have been calculated using the average exchange rates throughout the year. The resulting gain of USD 383,805,818 represents the movement in exchange rates between 1 December 2024 and 30 November 2025. This is a notional gain, which has no impact on the Net Asset Value of the individual Portfolios.

18 Cross Liabilities

In accordance with Luxembourg law, each Portfolio is "ring-fenced" and considered to constitute a single pool of assets and liabilities, so that the rights of Shareholders and creditors in relation to each Portfolio should be limited to the assets of that Portfolio.

19 Contingent Liabilities

There were no contingent liabilities as at 30 November 2025.

20 Subsequent Events

Since 30 November 2025, the following Portfolios were closed:

Portfolio	Currency	Close Date
Sterling Credit Portfolio	GBP	15 January 2026
Global Clean Energy Infrastructure Equity Portfolio	USD	02 March 2026
Global Real Estate Equity Portfolio	USD	02 March 2026

From 1 December 2025 to 10 March 2026, the following Portfolios had movements greater than 25% in Shareholders' Equity:

Portfolio	Currency	% Movement in AUM	% Movement in Performance
All China Equity Portfolio	USD	29.88%	2.63%
Global Equity Partners ESG Portfolio	USD	(48.26%)	(2.64%)
Japan Equity Partners Portfolio	JPY	(25.30%)	2.69%
Global Credit Portfolio (Hedged)	USD	32.28%	(4.07%)
US Mortgage Backed Securities Portfolio	USD	(25.53%)	1.45%

There were no other subsequent events to note.

21 Indemnifications

The Fund may enter into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts.

22 Approval of Financial Statements

The Board of Directors approved the Annual Financial Statements on 10 March 2026.

23 Supplemental Information

The Investment Adviser is subject to the Securities and Exchange Commission's amended Rule 206(4)-2 under the Investment Advisers Act of 1940 ("the Act"). The Investment Adviser has determined that they are required to provide the following information to all investors and has determined which Portfolios are to provide this information in accordance with the Act. The Investment Adviser has requested that the Board of Directors includes this information in the Board of Directors' financial statements.

The following is a summary of total return, expense and investment income results for the year ended 30 November 2025:

* Share Class launched during the year. Total Return has not been annualised.

¹ Total returns are calculated by dividing the change in the net asset value per share for the year by the net asset value per share at the beginning of the year. An individual shareholder's return may vary from these returns due to the timing of capital transactions.

² The expense and net investment income ratios are calculated for each group of shareholders taken as a whole. Under rules required for SEC 206(4)-2 this ratio does not include realised gains and losses in net investment income. The computation of such ratios based on the amount of income and expenses assessed to an individual shareholder's capital may vary from these ratios based on the timing of capital transactions.

³ Refer to Note 6 Significant Agreements and Related Parties for further details on expense waivers/reimbursement amounts.

⁴ Includes additional fee to Investment Adviser for fixed operating share classes.

Financial Assets and Financial Liabilities at Value

The three levels of the fair value hierarchy under the Accounting Standards Codification ("ASC") 820 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 – Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including but not limited to quoted prices for similar securities, interest rates, foreign exchange rates, volatility and credit risk spreads), either directly or indirectly;

Level 3 – Prices or valuations that require significant unobservable inputs (including the Valuer's assumptions in determining fair value measurement).

Notes to the Financial Statements
For the Year Ended 30 November 2025

23 Supplemental Information (Continued)

Financial Assets and Financial Liabilities at Value (Continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety shall be determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

24 Cross sub-fund investments

As at 30 November 2025, the total cross sub-fund investments amounted to USD 330,460,650 and therefore the total combined Net Asset at year-end without cross sub-fund investments would amount to USD 63,825,442,436.

25 Sustainable Finance Disclosure Regulation (“SFDR”)

The EU Sustainable Finance Disclosure Regulation (“SFDR”) (Regulation (EU) 2019/2088) has applied since 10 March 2021. Pursuant to Article 11 of SFDR (Transparency of the promotion of environmental or social characteristics and of sustainable investments in periodic reports), Goldman Sachs Asset Management B.V. is required to provide a description of the extent to which environmental or social characteristics have been met with reference to Portfolios providing disclosures pursuant to Article 8(1) of SFDR, and to the extent applicable, Article 9 of SFDR.

In addition, the EU Taxonomy Regulation (“Taxonomy Regulation”) (Regulation (EU) 2020/852) establishes a framework for identifying economic activities as environmentally sustainable within the European Economic Area and requires the Portfolios to additionally disclose whether the EU criteria for environmentally sustainable economic activities has been taken into account.

Please see this information disclosed for each of the Portfolios in the Report of the Management Company VI.

^(a) Refer to Note 6.

^(b) The Total Expense Ratio ("TER") expresses the sum of all costs, commissions and performance fees (excluding dealing commissions and market costs) charged on an ongoing basis to the Portfolios' assets (operating net expenses) taken retrospectively as a percentage of the Portfolios' assets, and is calculated using the following formula:

Total operating net expenses in CU* / Average portfolios' assets in CU* x 100 = TER %.

The TER is calculated for the Period from 01 December 2024 to 30 November 2025. TER's are annualised for Portfolios operating less than one year.

* CU = Currency units in the Portfolio's base currency.

^(c) Refer to Report of the Management Company II.

^(d) The expense cap does not include performance fees.

^(e) The expense cap does not include the GSAMI fee portion paid to external Sub-Investment Advisers.

The above expense ratios are an average throughout the year to 30 November 2025. The above Expense Caps represent the expense cap levels at year end 30 November 2025.

Goldman Sachs Funds
Report of the Management Company II—Portfolio Launches,
Closures and Mergers (Unaudited)
As at 30 November 2025

During the year, the following Portfolios were closed:

Portfolios	Currency	Close Date
Eurozone CORE [®] Equity Portfolio	EUR	22 April 2025

Goldman Sachs Funds
Report of the Management Company III—Calculation Method Used for Global Exposure (Unaudited)
For the Year Ended 30 November 2025

The Undertakings for Collective Investment in Transferable Securities (“UCITS”) IV directive, as amended, requires disclosure of how global exposure on financial derivatives investments are managed. There are three management approaches used:

- a) The Commitment Approach. This approach is generally for those Portfolios that hold less complex positions on financial derivatives investments and for the purposes of hedging or efficient portfolio management.
- b) Relative Value at Risk (“Relative VaR”) approach. This approach is generally for those Portfolios where it is possible to identify an appropriate reference benchmark. This method compares the global exposure of the Portfolio relative to that of a reference benchmark.
- c) Absolute Value at Risk (“Absolute VaR”) approach. This approach is generally for those Portfolios for which it is not appropriate or possible to determine a reference benchmark (for example, an absolute return portfolio).

The following sections indicate which approach is used for the Portfolios.

For Portfolios managed under a VaR approach, additional information is provided on the VaR model, being the VaR reference Portfolio / Benchmark, the regulatory VaR limit usage and the level of leverage reached.

I. Commitment Approach

The following Portfolios use the commitment approach for calculating global exposure:

Portfolio	
Asia Equity Portfolio	US Technology Opportunities Equity Portfolio
All China Equity Portfolio	Global Clean Energy Infrastructure Equity Portfolio
Emerging Markets Equity ESG Portfolio	Global Future Economic Security Equity Portfolio
Emerging Markets Equity Portfolio	Global Infrastructure Equity Portfolio
Emerging Markets Ex-China Equity Portfolio	Global Real Estate Equity Portfolio

Goldman Sachs Funds
Report of the Management Company III—Calculation Method Used for Global
Exposure (Unaudited)
For the Year Ended 30 November 2025

II. VaR Approach (Continued)

Portfolios	VaR approach	Regulatory Limit	VaR Limit Utilisation as % of Regulatory VaR Limit ¹			Reference Portfolio/ Benchmark	Model	Confidence Interval	Holding period	Observation period	Leverage ²
			Lowest	Highest	Average						
Absolute Return Tracker Portfolio	Absolute VaR	20% of NAV	18%	35%	27%	ICE BofA 3 month US T-Bill	Simulation Based VaR using two-day historical bootstrapping	99%	20 days	1 year	199%
Alternative Trend Portfolio	Absolute VaR	20% of NAV	9%	45%	25%	ICE BofA 3 month US T-Bill	Simulation Based VaR using two-day historical bootstrapping	99%	20 days	1 year	598%

¹ The utilisation percentage represents the lowest, highest and average proportion of the maximum limit used in the reporting period. For example a Portfolio with an average utilisation of 25% and a maximum limit of 200% (Relative VaR), represents an average VaR ratio (Portfolio VaR divided by benchmark VaR) of 50%. A Portfolio with an average utilisation of 25% and a maximum limit of 20% (Absolute VaR), represents an average Portfolio VaR of 5%.

² The sum of notionals approach for financial derivative instruments is used to determine the maximum expected Portfolio leverage. This calculation incorporates the Portfolio's financial derivative instruments, the reinvestment of collateral received (in cash) in relation to operations of efficient portfolio management and any use of collateral in the context of any other operation of efficient portfolio management, e.g. securities lending.

Goldman Sachs Funds Report of the Management Company IV—Management Company Annual Report Disclosures (Unaudited) For the Year Ended 30 November 2025

Remuneration during the reporting period

The following disclosures are made in accordance with the AIFMD (2011/61/EU) and UCITS Directive (2014/91/EU) and further guidance included in the ESMA Guidelines on sound remuneration policies under the AIFMD (3 July 2013/ESMA/2013/232) and UCITS Directive (14 October 2016/ESMA/2016/575). The full and detailed remuneration disclosure can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

Remuneration Programme Philosophy

Retention of talented employees is critical to executing the firm's business strategy successfully. Remuneration is, therefore, a key component of the costs the firm incurs to generate revenues, similar to the cost of goods sold or manufacturing costs in other industries.

The remuneration philosophy and the objectives of the remuneration programme for the firm are reflected in the Compensation Principles for The Goldman Sachs Group, Inc. ("GS Group"), as posted on the Goldman Sachs public website:

<http://www.goldmansachs.com/investor-relations/corporate-governance/corporate-governance-documents/compensation-principles.pdf>

Firmwide Compensation Frameworks

The Firmwide Performance Management and Incentive Compensation Framework, as amended from time to time ("Firmwide PM-IC Framework"), formalises the variable remuneration practices of the firm.

The primary purpose of this Firmwide PM-IC Framework is to assist The Goldman Sachs Group, Inc. ("the firm" or "Goldman Sachs Group") in assuring that its variable compensation programme does not provide "covered employees" (i.e., senior executives as well as other employees of the firm, who, either individually or as part of a group, have the ability to expose the firm to material amounts of risk) with incentives to take imprudent risks and is consistent with the safety and soundness of the firm.

In addition, the Goldman Sachs Asset Management BV Compensation Policy supplements the firm's remuneration programmes and frameworks in alignment with applicable local laws, rules and regulations.

No material changes were made to GSAM BV compensation policies during the year.

Remuneration Governance

The Board of Directors of Goldman Sachs Group (the "Group Board") oversees the development, implementation and effectiveness of the firm's global remuneration practices, and it generally exercises this responsibility directly or through delegation to the Compensation Committee of the Group Board (the "Board Compensation Committee").

The Board Compensation Committee recognises the importance of using a remuneration consultant that is appropriately qualified and is determined to be independent. The independence of the remuneration consultant is reviewed and confirmed annually by the Board Compensation Committee. For 2024, the Board Compensation Committee received the advice of a remuneration consultant from Frederic W. Cook & Co. ("FW Cook").

The GSAM BV Compensation Committee (the "GSAM BV Compensation Committee") operates in line with GS Group policies and practices. The GSAM BV Compensation Committee held 8 meetings in 2024 in fulfilment of these responsibilities.

The GSAM BV Supervisory Compensation Committee oversees the development and implementation of those remuneration policies and practices of GSAM BV that are required to supplement the global Compensation Policy of Goldman Sachs Group in accordance with applicable law and regulations.

The GSAM BV Supervisory Compensation Committee works alongside the GSAM BV Compensation Committee. The GSAM BV Supervisory Compensation Committee held 6 meetings in 2024 in fulfilment of these responsibilities.

Further information with regards to Remuneration Governance, the Board Compensation Committee, the GSAM BV Compensation Committee and the GSAM BV Supervisory Compensation Committee, can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

For the Year Ended 30 November 2025

Link between Pay and Performance

In 2024, annual remuneration for employees comprised fixed remuneration (including base salary) and variable remuneration. The firm's remuneration practices provide for variable remuneration determinations to be made on a discretionary basis. Variable remuneration is based on multiple factors and is not set as a fixed percentage of revenue or by reference to any other formula, consistent with the process outlined in the Firmwide PM-IC Framework. Firmwide performance is a key factor in determining variable remuneration.

The firm is committed to aligning variable remuneration with performance, across several financial and non-financial factors. These factors include business-specific performance (as applicable), along with the performance of the firm and the individual, over the past year, as well as over prior years.

Further information with regards to the Link between Pay and Performance can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

Selection and remuneration of Identified Staff

GSAM BV selects Identified Staff (staff whose professional activities have material impact on the risk profile of Goldman Sachs Asset Management) on the basis of both AIFMD and UCITS (being staff whose professional activities have a material impact on the Dutch licensed AIF(s), and/or the UCITS and/or GSAM BV, as applicable). AIFMD and UCITS Identified Staff are selected in accordance with ESMA guidelines 2013/232 and 2016/575. Under its selection methodology, GSAM BV considers the categories as detailed in the ESMA guidelines and conducts a review of employees who have a material impact and whose total remuneration takes them into the same remuneration bracket as senior managers and risk takers.

The applied selection methodology and selection criteria for GSAM BV Identified Staff were approved by the GSAM BV Compensation Committee.

Performance Measurement

Performance is measured at the firmwide, business, business unit, desk and individual level as applicable. Employees are evaluated annually as part of the performance review feedback process. The process reflects evaluation of employee objectives and performance focusing on matters including but not limited to teamwork and collaboration. Further information with regards to the Performance Measurement can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

Risk Adjustment

Prudent risk management is a hallmark of the firm's culture and sensitivity to risk and risk management are key elements in assessing employee performance and variable remuneration, including as part of the performance review feedback process noted above.

The firm takes risk, including conduct risk, into account both on an ex-ante and ex-post basis when setting the amount and form of variable remuneration for employees. As indicated in the Firmwide PM-IC Framework, different lines of business have different risk profiles that inform remuneration decisions. These include credit, market, liquidity, operational, reputational, legal, compliance and conduct risks.

Guidelines are provided to assist remuneration managers when exercising discretion during the remuneration process to promote appropriate consideration of the different risks presented by the firm's businesses. Further, to ensure the independence of control function employees, remuneration for those employees is not determined by individuals in revenue-producing positions but rather by the management of the relevant control function.

Consistent with prior years, for 2024 certain employees received a portion of their variable remuneration as an equity-based award that is subject to a number of terms and conditions that could result in forfeiture or recapture.

The GSAM BV Compensation Committee also reviewed the annual compensation-related risk assessment with respect to GSAM BV. Further information with regards to Risk Adjustment can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

For the Year Ended 30 November 2025

Structure of Remuneration

Fixed Remuneration

The firm has a global salary approach to ensure consistency in salary levels and to achieve an appropriate balance between fixed and variable remuneration.

Variable Remuneration

For employees with total remuneration and variable remuneration above specific thresholds, variable remuneration is generally paid in a combination of cash and equity-based remuneration. In general, the portion paid in the form of an equity-based award increases as variable remuneration increases and, for Identified Staff, is set to ensure compliance with the applicable rules of the AIFMD and UCITS Directive.

The variable remuneration programme is flexible to allow the firm to respond to changes in market conditions and to maintain its pay-for-performance approach. Variable remuneration is discretionary (even if paid consistently over a period of years).

Equity-based Remuneration

The firm believes that remuneration should encourage a long-term, firmwide approach to performance and discourage imprudent risk-taking. One way the firm achieves this approach is to pay a significant portion of variable remuneration in the form of equity-based remuneration that delivers over time, changes in value according to the price of GS Group shares of common stock and/or the performance of GSAM BV funds, and is subject to forfeiture or recapture. This approach encourages a long-term, firmwide focus because the value of the equity-based remuneration is realised with a dependency on long-term responsible behaviour and the financial performance of the firm.

To ensure continued alignment to the investment activities of GSAM BV, staff eligible for equity-based remuneration (including GSAM BV Identified Staff) are generally awarded both GS Group Restricted Stock Units ("RSUs") and Phantom Units under the Goldman Sachs Phantom Investment Plan ("GSAM BV Phantom Unit Plan"). Further information with regards to the Equity-based remuneration can be found on the website (<https://am.gs.com/en-nl/individual/creating-impact/policies-and-governance>).

Remuneration over 2024

Over 2024, GSAM BV has awarded a total amount of EUR 117.21 million to all employees. This amount consists of fixed remuneration¹ of EUR 86.96 million, and variable remuneration² of EUR 30.25 million. Per 31 December 2024 this concerned 709 employees and 5 board members of GSAM BV. The majority of employees spend their time on activities that are directly or indirectly related to the management of the funds. In total GSAM Netherlands awarded remuneration exceeding EUR 1 million to 2 employees.

From the above mentioned amounts, total remuneration for the board members is EUR 3.77 million, of which fixed remuneration is EUR 1.79 million and variable remuneration is EUR 1.98 million.

Remuneration paid or awarded for the financial year ended 31 December 2024 comprised fixed remuneration (salaries, allowances and director fees) and variable remuneration. Information of fixed remuneration and variable remuneration is not administered on fund level, resulting in the costs above to be disclosed on aggregated total management company level.

Aggregated fixed and variable remuneration over 2024 and 2023

The following tables show aggregate quantitative remuneration information for all GSAM BV Identified Staff selected on the basis of AIFMD and/or UCITs for the performance year 2024.

¹ Fixed remuneration per the fiscal year-end for contractual working hours. Fixed remuneration includes allowances, which includes elements such as holiday pay, and pension allowance and excludes benefits.

² Variable remuneration includes all payments processed through payroll per respectively January 2025 (performance year 2024) or January 2024 (performance year 2023) and all conditional and unconditional awards in relation to the respective performance year, including RSUs, GSAM BV Phantom Units (a reference to the allocated Funds is not available) and carried interest.

Aggregate of fixed and variable remuneration	3,766	15,673	3,012	14,996

Remuneration information third parties

GSAM BV has (partly) outsourced its portfolio management activities to third parties. For each of these parties a Portfolio Management Agreement (PMA) has been arranged. The PMA guarantees efficient and effective services in accordance with the set agreements with these third parties. The services offered by these third parties based on the PMA are evaluated annually by GSAM BV.

The transparency that GSAM BV maintains with regard to the applied remuneration policy also includes transparency regarding the remuneration policy of third parties who carry out portfolio management activities for GSAM BV. By doing this GSAM BV is aligned with the guidance from the European regulator (ESMA). GSAM BV annually requests information from third parties in order to be able to evaluate the services and information about the applied remuneration policy by the third party is included in this request.

The overview below provides information on the remuneration policy from the parties to whom Goldman Sachs Asset Management BV has (partly) delegated portfolio management activities for AIFs and UCITS.

This includes delegated portfolio management services provided by Goldman Sachs Asset Management International and Goldman Sachs Asset Management (Singapore) Pte. Ltd., for which the services have been considered on an AIF/UCITS by AIF/UCITS basis and an estimated split for each AIF/UCITS has been incorporated into the calculations below. The pro rata remuneration is calculated by dividing the assets managed by the delegated portfolio manager on behalf of the AIF(s)/UCITS managed by GSAM BV by the total (strategy) assets managed by the delegated portfolio manager.

Delegated portfolio management ³	Number of beneficiaries	Fixed pay	Variable pay	Total pay
Pro rata remuneration	376,6-381,6	USD 1.342.112,89	USD 359.033,68	USD 1.701.146,57

¹ Fixed remuneration per the fiscal year-end for contractual working hours. Fixed remuneration includes allowances, which includes elements such as holiday pay, and pension allowance and excludes benefits.

² Variable remuneration includes all payments processed through payroll per respectively January 2025 (performance year 2024) or January 2024 (performance year 2023) and all conditional and unconditional awards in relation to the respective performance year, including RSUs, GSAM BV Phantom Units (a reference to the allocated Funds is not available) and carried interest.

³ The delegated portfolio management services have been provided by Danske Bank A/S, Nomura Asset Management Co. Ltd, J.P. Morgan Asset Management, Irish Life Investment Management Limited, State Street Global Advisors UK, Triodos Investment Management B.V., Goldman Sachs Asset Management International and Goldman Sachs Asset Management (Singapore) Pte. Ltd. Where information for FY2024 was not available, FY2023 figures have been included.

Goldman Sachs Funds
Report of the Management Company V—Securities Financing Transactions
Regulation (“SFTR”) Disclosures (Unaudited)
For the Year Ended 30 November 2025

The Management Company is required to make available an Annual Report for the financial year for each of its Funds, containing certain disclosures as set out in Article 13 of the European Commission Regulation 2015/2365 on transparency of securities financing transactions and of reuse (the “Regulation”). The disclosures set out below are included to meet the requirements of the Regulation.

I. Global Data

Please refer to Note 6 Securities lending for details on the amount of securities lent expressed as an absolute amount, as a proportion of total lendable assets and as a proportion of the Shareholders’ Equity.

Please refer to the different Schedule of Investments for details on the amount of Total Return Swap (“TRS”) as an absolute amount and as a proportion of the Shareholders’ Equity.

II. Concentration Data

Absolute Return Tracker Portfolio	USD	EUR	48,300	(51,848,666)	(51,800,366)

¹ Total return swaps are typically traded under ISDA master agreements (“ISDAs”) which govern various types of swap and FX transactions executed between the Portfolio and each swap counterparty. Under the ISDAs, collateral is calculated daily on an aggregate, net basis across all transactions and therefore, a portion of such collateral is related to derivative transactions which are not in scope for SFTR.

* Expressed in '000

Please refer to Note 6 Securities lending for details on the quality of the non-cash collateral received.

The following information has been provided in accordance with Article 11 of Regulation (EU) 2019/2088 (the “**Sustainable Finance Disclosure Regulation**” or “**SFDR**”). For Portfolios of Goldman Sachs Asset Management (“GSAM”) that promoted environmental and/or social characteristics during the reference period, information has been made available via the SFDR regulatory technical standards (RTS) (2022/1288) template.

The following disclosures are presented in alignment to the annual reporting period, unless otherwise stated below or within the periodic disclosure.

All data presented within the periodic disclosures is unaudited and is not subject to assurance provided by the Fund’s auditor or a review by a third party.

For this reference period, the calculations are based on the average figure using periodic snapshots, such that the figures are representative of the reference period for which they relate to. Where Portfolios have closed mid-reference period, the calculations have been taken as of the last quarter-end before closure date.

The periodic disclosures refer to a combination of sector and sub-sector classifications using information from both proprietary sources and third-party data providers.

Percentage of assets disclosed in the periodic disclosures may not agree to the schedule of investments in the annual report, primarily due to accrued interests and differences in aggregation methodology of investments.

Periodic disclosure for Portfolios that are not subject to Article 8 or Article 9 of SFDR:

Portfolios	SFDR Category	Taxonomy Regulation
Global Future Economic Security Equity Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Goldman Sachs Funds
Report of the Management Company VI—Sustainable Finance Disclosure Regulation
(“SFDR”) Disclosures (Unaudited)
As at 30 November 2025

Find below an overview of how Article 6 (Positive) and Article 6 (Negative) differ:

Article 6 (Negative)

The Manager does not specifically consider sustainability risks in its investment decision making; however it may have regard to relevant sustainability events or conditions and their potential detrimental impact on specific investments of the Account from time to time.

Article 6 (Positive)

Sustainability risk is defined in the Sustainable Finance Disclosure Regulation as an environmental, social or governance event or condition, that could cause an actual or a potential material negative impact on the value of your portfolio or specific investments that we manage or advise on. The universe of sustainability risks is broad; however examples include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.

Certain GSAM discretionary offerings may be exposed to different sustainability risks from time to time, depending on their investment strategy, asset classes and geographic focus (among other considerations). The Manager may integrate sustainability risks in its investment decision making process through the consideration of certain environmental, social and governance indicators. Sustainability risks may be considered as part of the investment or advisory process as appropriate, by reference to the investment strategy of the Account, alongside other ESG indicators to assess their potential impact on the quality of a particular investment. The Manager may utilise proprietary and/or third-party data and research to assess and monitor sustainability risks that are relevant to the Account.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Asia Equity Portfolio

Legal entity identifier:

CKMUZP6Q1OT0UD6LTF80

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.12% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporate Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

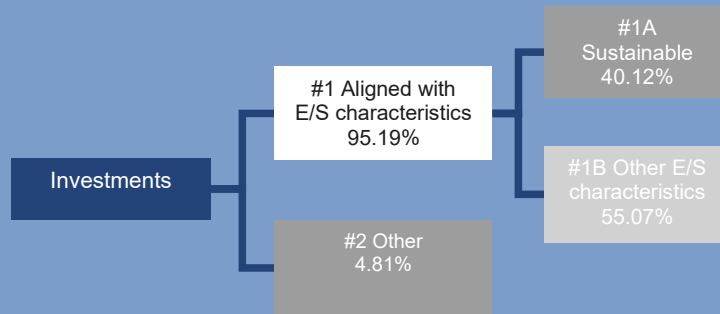

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED	Information Technology	9.93%	TW
TENCENT HOLDINGS LIMITED	Communication Services	8.54%	CN
SAMSUNG ELECTRONICS CO., LTD.	Information Technology	5.45%	KR
KWEICHOW MOUTAI CO., LTD.	Consumer Staples	5.20%	CN

HDFC BANK LIMITED	Financials	2.26%	IN
MEITUAN	Consumer Discretionary	1.91%	CN

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	2.14%
	Margin	0.06%
Communication Services	Media & Entertainment	12.63%
	Telecommunication Services	1.46%
Consumer Discretionary	Consumer Durables & Apparel	8.91%

	Semiconductors & Semiconductor Equipment	12.02%
	Software & Services	2.29%
Materials	Materials	3.07%
MUTUAL FUND	MONEY MARKET	1.11%
Real Estate	Real Estate Management & Development	0.17%
Utilities	Utilities	0.11%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

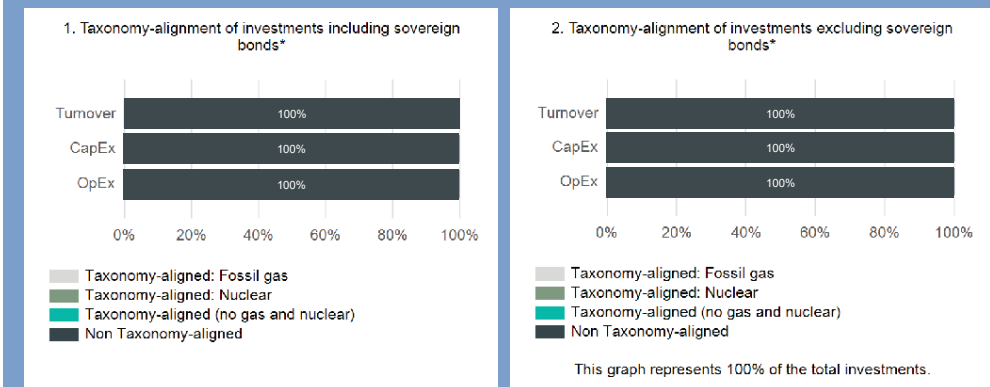

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs All China Equity Portfolio

Legal entity identifier:

RGLP4Y9Q3N58H4PRSO69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.33%
COMMON	EQCORP	0.03%
Communication Services	Media & Entertainment	13.85%
	Telecommunication Services	0.72%
Consumer Discretionary	Consumer Durables & Apparel	3.28%
	Automobiles & Components	4.04%

MUTUAL FUND	MONEY MARKET	1.30%
Real Estate	Real Estate Management & Development	1.40%
Utilities	Utilities	1.85%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

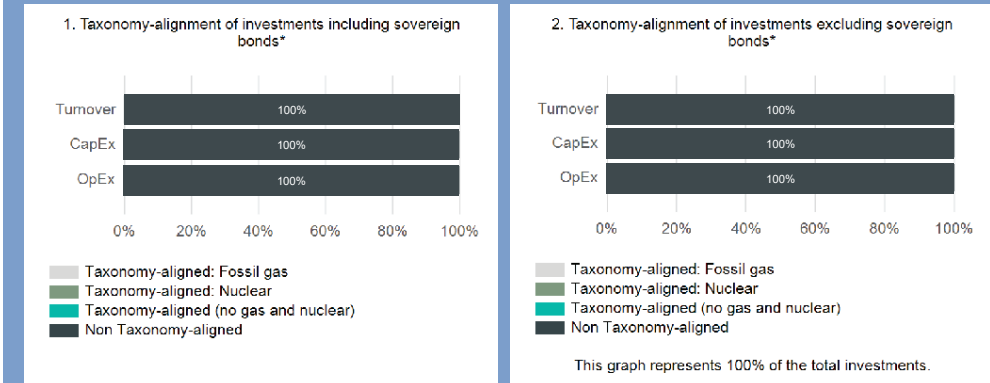

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Emerging Markets Equity ESG Portfolio

Legal entity identifier:

549300X3GRYC64HK5Y96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __% 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 45.90% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.15%
COMMON	ETF	0.09%
Communication Services	Media & Entertainment	11.21%
	Telecommunication Services	0.98%
Consumer Discretionary	Consumer Durables & Apparel	2.67%
	Automobiles & Components	3.19%
	Consumer Services	4.20%
	Consumer Discretionary Distribution & Retail	6.10%
Consumer Staples	Food, Beverage & Tobacco	3.39%
	Consumer Staples Distribution & Retail	2.14%

Financials	Financial Services	2.25%
	Insurance	4.77%
	Banks	18.47%
Health Care	Health Care Equipment & Services	2.11%
	Pharmaceuticals, Biotechnology & Life Sciences	2.78%
Industrials	Transportation	0.25%
	Capital Goods	2.81%
Information Technology	Technology Hardware & Equipment	10.07%
	Semiconductors & Semiconductor Equipment	14.84%
	Software & Services	1.70%
Materials	Materials	1.30%
MUTUAL FUND	MONEY MARKET	0.70%
Real Estate	Real Estate Management & Development	1.30%
	Equity Real Estate Investment Trusts (REITs)	0.40%
Utilities	Utilities	1.10%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

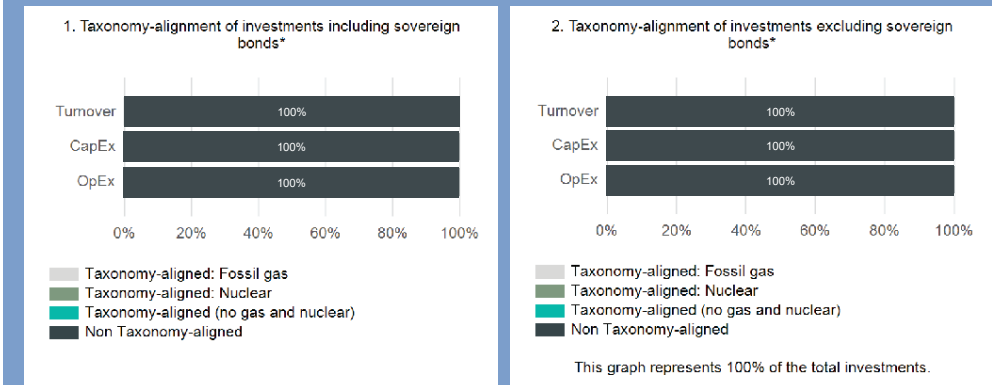

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Emerging Markets Equity Portfolio

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __% 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 41.22% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

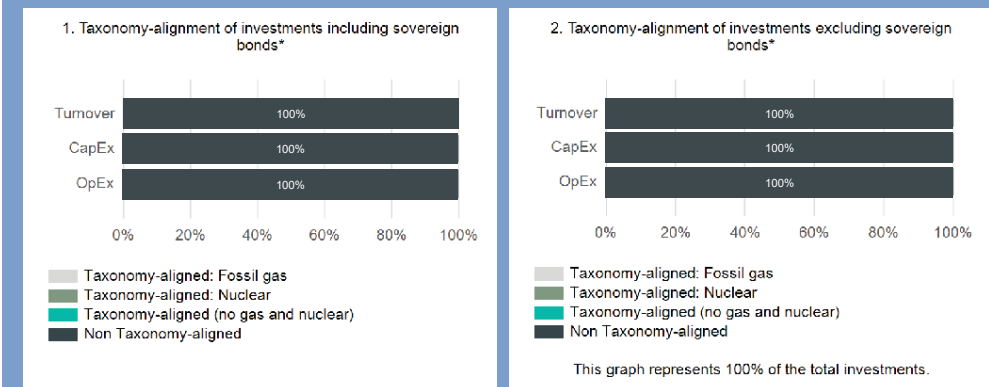

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Goldman Sachs Emerging Markets Ex-China Equity Portfolio

Legal entity identifier:

549300C3SYD1VG21ES96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 32.14% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	N/A	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

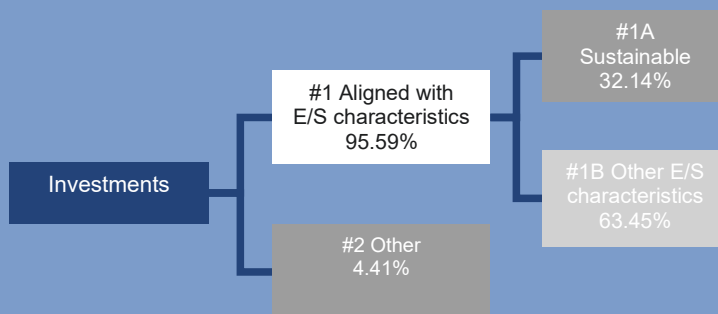

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED	Information Technology	9.20%	TW

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.88%
COMMON	ETF	0.11%
Communication Services	Media & Entertainment	1.49%
	Telecommunication Services	3.03%
Consumer Discretionary	Consumer Durables & Apparel	2.76%
	Automobiles & Components	2.19%
	Consumer Services	3.10%
	Consumer Discretionary Distribution & Retail	3.30%
Consumer Staples	Household & Personal Products	0.66%
	Food, Beverage & Tobacco	2.74%

Real Estate	Real Estate Management & Development	1.22%
	Equity Real Estate Investment Trusts (REITs)	0.46%
Utilities	Utilities	0.35%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

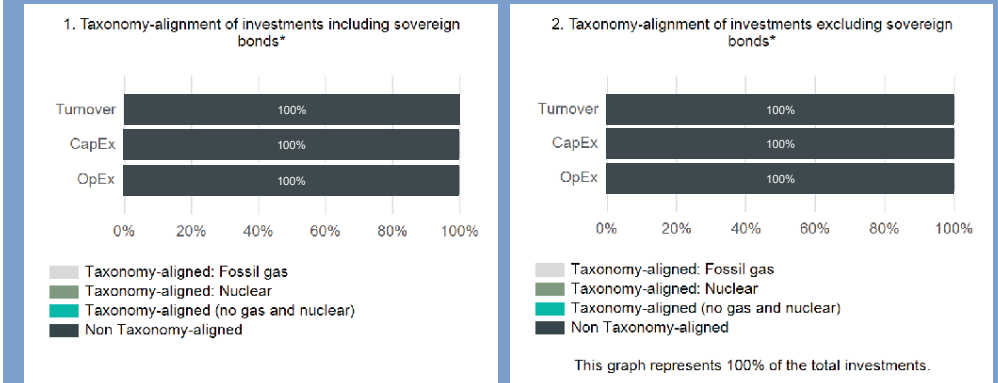

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for financial products referred to in Article 9 (1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 92.24% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective: 6.76%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio sought to create positive environmental impact by investing in companies that the Investment Advisor considered to be sustainable investments and which provided solutions that drove environmental sustainability, by virtue of their alignment to key themes associated with solving environmental problems. The key themes were represented by companies that, in the Investment Adviser's view, provided, invested in or helped creating products, services or technologies in areas including but not limited to:

- Clean Energy: present in areas such as solar energy, wind energy, bioenergy, energy storage, grid services and carbon sequestration.
- Resource Efficiency: present in areas such as electric and autonomous vehicles, sustainable manufacturing, logistics and smart cities.
- Sustainable Consumption: present in areas such as agriculture, food, tourism and fashion.
- Circular Economy: present in areas such as recycling and reuse, waste management and single-use substitution.
- Water Sustainability: present in areas such as water treatment, water distribution and desalination.

The performance of these characteristics are measured by the following performance indicators:

- Percentage of companies in the Portfolio demonstrating material alignment to one or more of the key themes according to the Investment Adviser's assessment.
- Aggregate contribution of companies held in the Portfolio to environmental impact key performance indicators.
- Companies in the Portfolio determined to meet the Investment Adviser's sustainable impact revenue threshold.

Additionally, the Portfolio has not invested in companies that were, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;

- for-profit prisons;
- civilian firearms;
- gambling;
- controversial weapons (including nuclear weapons).

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the sustainable investment objective of the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the investment objective of the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Companies demonstrating material alignment to one or more of the key themes <i>(as outlined above)</i>	Not applicable	100	100	100	%
Clean Energy	Not applicable	180	203	407	Gigawatts (GW) of renewable energy capacity installed
Resource Efficiency	Not applicable	1 billion	1.2 billion	1.4 billion	Metric tons of CO2e avoided
Sustainable Consumption	Not applicable	755,000	255,738	62,074	Metric tons of waste reduced
Circular Economy	Not applicable	44 million	45 million	45.9 million	Metric tons of material recycled
Water Sustainability	Not applicable	4 million	4.6 million	9.0 million	Megaliters of water saved or treated
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenues from excluded activities	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles.	Not applicable	0	0	0	%
Companies meeting the sustainable impact revenue threshold	Not applicable	100	100	100	%

DISCLAIMER: All metrics subject to change and pending potential publication in Annual Fund Impact Report.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser’s Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors (“PAIs”) set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio’s investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser’s assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management’s proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity-sensitive areas • Emissions to water • Hazardous waste and radioactive waste ratio

Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

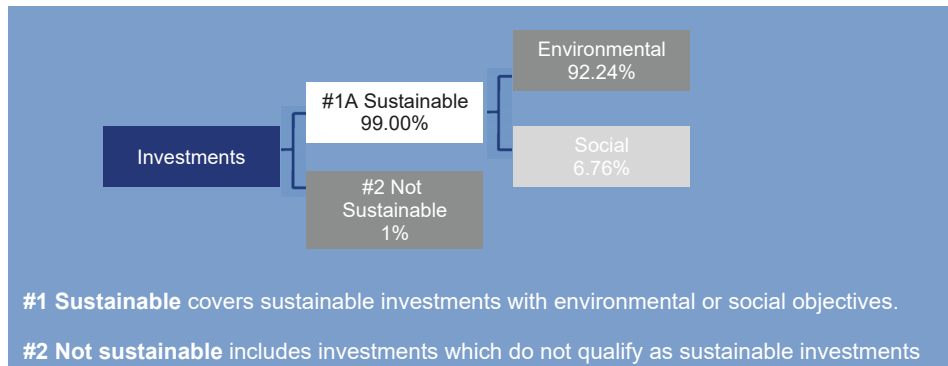

Largest investments	Sector	% of Assets	Country
IBERDROLA, S.A.	Electricity, gas, steam and air conditioning supply	5.44%	ES
WASTE MANAGEMENT, INC.	Water supply; sewerage, waste management and remediation activities	5.31%	US
ENEL - SPA	Electricity, gas, steam and air conditioning supply	4.94%	IT

INFINEON TECHNOLOGIES AG	Manufacturing	2.70%	DE

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	Sub Sector	% of Assets
Cash	Cash	0.66%
Construction	Civil engineering	1.36%
	Specialised construction activities	2.34%
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	15.00%
Information and communication	Computer programming, consultancy and related activities	2.31%
	Publishing activities	3.74%
Manufacturing	Manufacture of chemicals and chemical products	5.79%
	Manufacture of computer, electronic and optical products	13.16%
	Manufacture of electrical equipment	16.70%
	Manufacture of fabricated metal products, except machinery and equipment	3.49%
	Manufacture of food products	3.23%
	Manufacture of machinery and equipment n.e.c.	6.20%
	Manufacture of motor vehicles, trailers and semi-trailers	3.94%
	Manufacture of paper and paper products	3.74%
	Manufacture of rubber and plastic products	0.84%
Mining and quarrying	Other mining and quarrying	1.20%
Professional, scientific and technical activities	Architectural and engineering activities; technical testing and analysis	5.60%
Water supply; sewerage, waste management and remediation activities	Sewerage	2.21%
	Waste collection, treatment and disposal activities; materials recovery	8.14%
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade, except of motor vehicles and motorcycles	0.34%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

To comply with the EU Taxonomy, the criteria for fossil gas include

limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

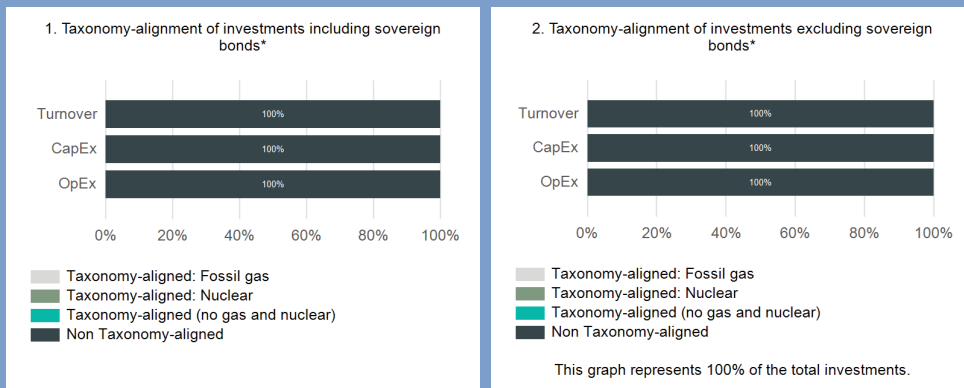

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 6.76%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "not sustainable" were cash and cash equivalents for liquidity purposes, permitted funds (such as ETFs) that themselves make disclosures pursuant to art 8 or 9 of SFDR for the purposes of cash management and derivatives for hedging purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Adviser has taken actions to ensure that the sustainable investment objective of the Portfolio was met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___% 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.95% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

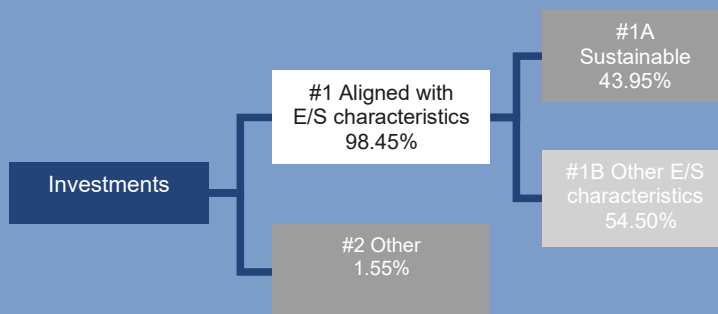

Largest investments	Sector	% Assets	Country
JPMORGAN CHASE & CO.	Financials	3.70%	US
MICROSOFT CORPORATION	Information Technology	3.14%	US

MORGAN STANLEY	Financials	1.94%	US
XCEL ENERGY INC.	Utilities	1.91%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.31%
Communication Services	Media & Entertainment	0.94%
	Telecommunication Services	3.39%
Consumer Discretionary	Consumer Durables & Apparel	0.73%
	Consumer Services	2.29%
	Consumer Discretionary Distribution & Retail	1.83%
Consumer Staples	Household & Personal Products	1.89%
	Food, Beverage & Tobacco	3.33%

Information Technology	Technology Hardware & Equipment	1.61%
	Semiconductors & Semiconductor Equipment	6.51%
	Software & Services	6.30%
Materials	Materials	3.68%
MUTUAL FUND	MONEY MARKET	1.25%
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.71%
Utilities	Utilities	7.72%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

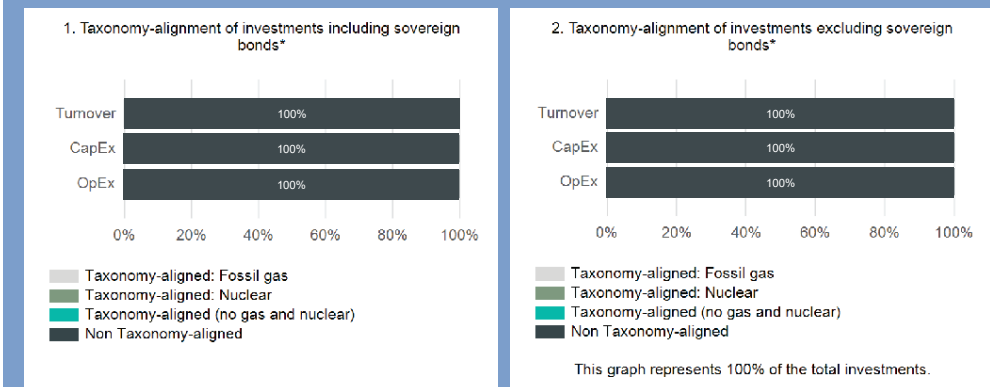

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Global Equity Partners ESG Portfolio

Legal entity identifier:

XJ4W67KLBN1KI4MPJ694

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __% 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 53.34% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

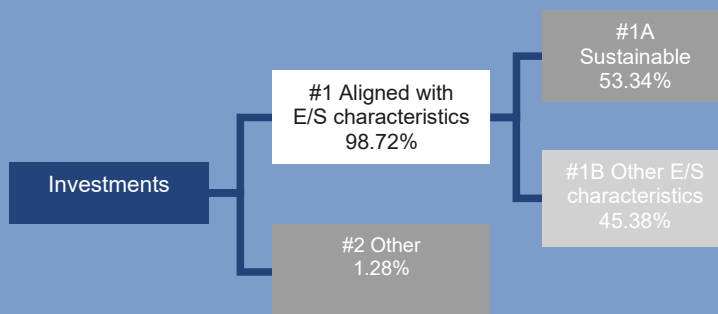

Largest investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

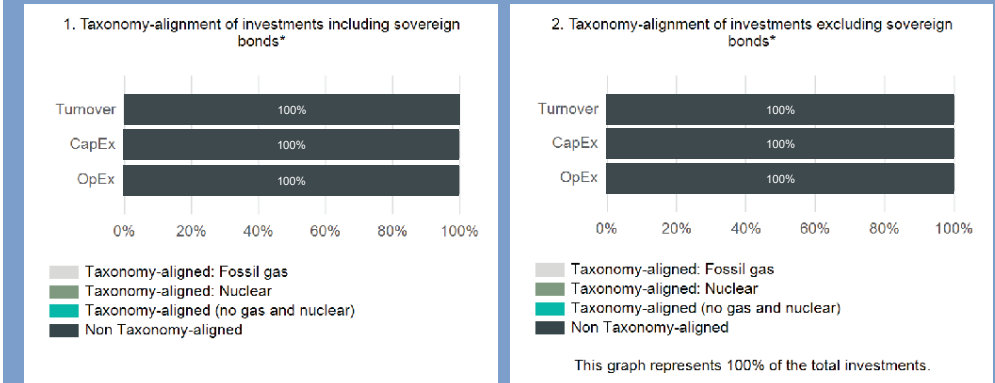

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___% 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.88% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

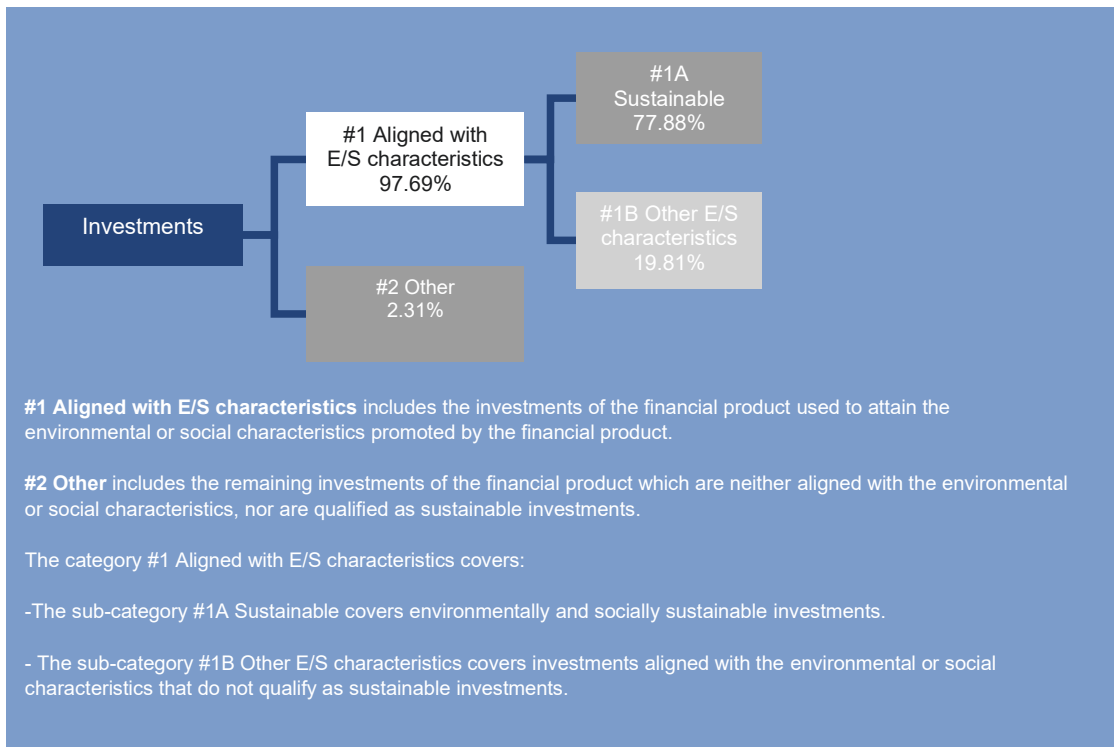

Largest investments	Sector	% Assets	Country
ELI LILLY AND COMPANY	Health Care	9.16%	US
BOSTON SCIENTIFIC CORPORATION	Health Care	8.23%	US
ABBOTT LABORATORIES	Health Care	5.40%	US
INTUITIVE SURGICAL, INC.	Health Care	5.25%	US
ASTRAZENECA PLC	Health Care	4.64%	GB
INSULET CORPORATION	Health Care	4.58%	US
ABBVIE INC.	Health Care	4.40%	US
LONZA GROUP AG	Health Care	3.14%	CH
UNITEDHEALTH GROUP INCORPORATED	Health Care	3.07%	US
ARGENX SE	Health Care	2.99%	NL

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.50%
Health Care	Health Care Equipment & Services	39.64%
	Pharmaceuticals, Biotechnology & Life Sciences	58.05%
MUTUAL FUND	MONEY MARKET	0.81%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

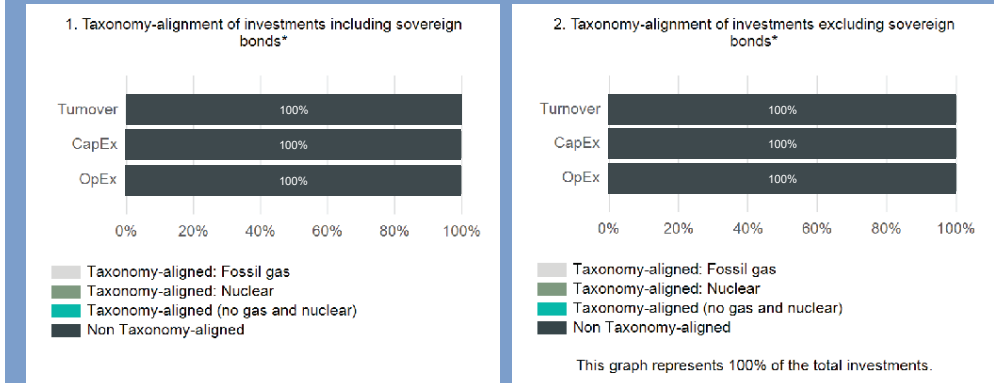

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy'?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

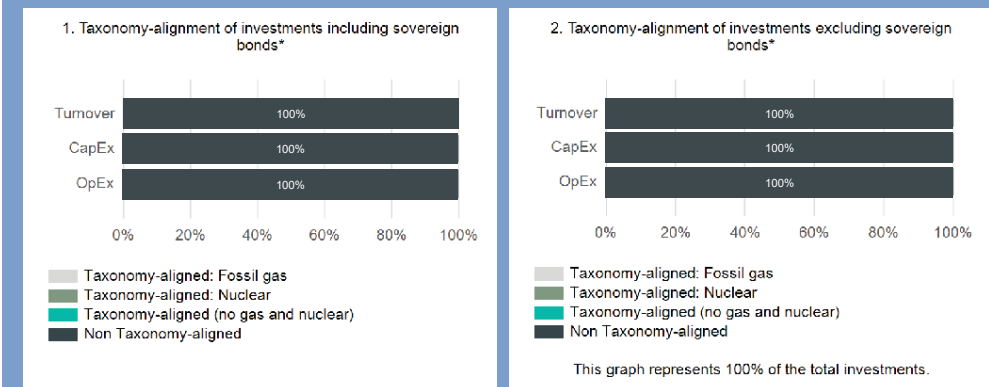

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Global Future Generations Equity Portfolio

Legal entity identifier:

51PP0DXJPE9LQF5J3Z56

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 42.72% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

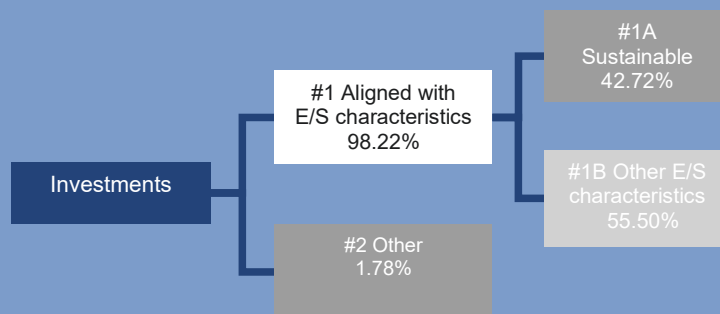

Largest investments	Sector	% Assets	Country
APPLE INC.	Information Technology	8.88%	US
NVIDIA CORPORATION	Information Technology	7.52%	US
AMAZON.COM, INC.	Consumer Discretionary	7.33%	US

META PLATFORMS, INC.	Communication Services	4.13%	US
MASTERCARD INCORPORATED	Financials	3.95%	US
NETFLIX, INC.	Communication Services	3.81%	US
ALPHABET INC.	Communication Services	3.70%	US
TJX COMPANIES, INC. (THE)	Consumer Discretionary	2.74%	US
SPOTIFY TECHNOLOGY S.A.	Communication Services	2.70%	SE
ELI LILLY AND COMPANY	Health Care	2.53%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.09%
Communication Services	Media & Entertainment	22.67%
	Telecommunication Services	1.72%
Consumer Discretionary	Consumer Services	5.97%
	Consumer Durables & Apparel	5.70%
	Consumer Discretionary Distribution & Retail	12.72%
Consumer Staples	Household & Personal Products	2.56%
	Food, Beverage & Tobacco	2.02%
Financials	Financial Services	5.63%
Health Care	Health Care Equipment & Services	0.71%

	Pharmaceuticals, Biotechnology & Life Sciences	2.53%
Industrials	Commercial & Professional Services	1.57%
Information Technology	Semiconductors & Semiconductor Equipment	17.33%
	Technology Hardware & Equipment	9.64%
	Software & Services	3.59%
Materials	Materials	1.31%
MUTUAL FUND	MONEY MARKET	1.33%
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.47%
Utilities	Utilities	1.45%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

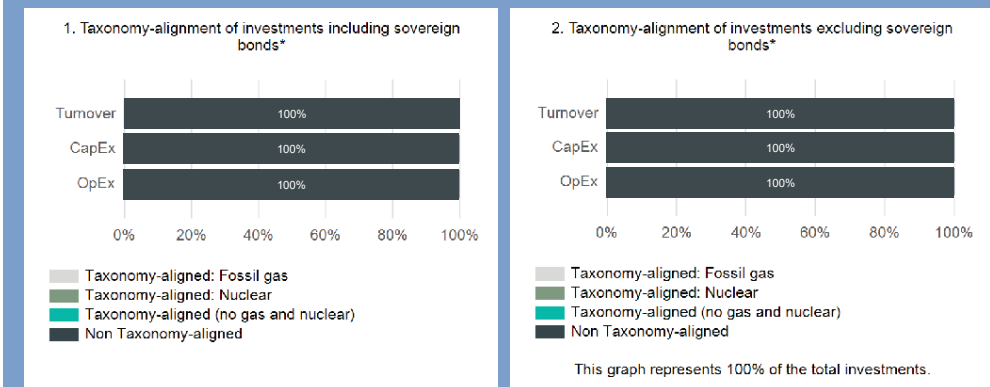

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.03% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.75%
	Margin	0.01%
COMMON	EQCORP	0.19%
Communication Services	Media & Entertainment	1.18%
	Telecommunication Services	2.63%
Consumer Discretionary	Consumer Durables & Apparel	5.42%
	Automobiles & Components	8.05%
	Consumer Services	2.93%
	Consumer Discretionary Distribution & Retail	3.01%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

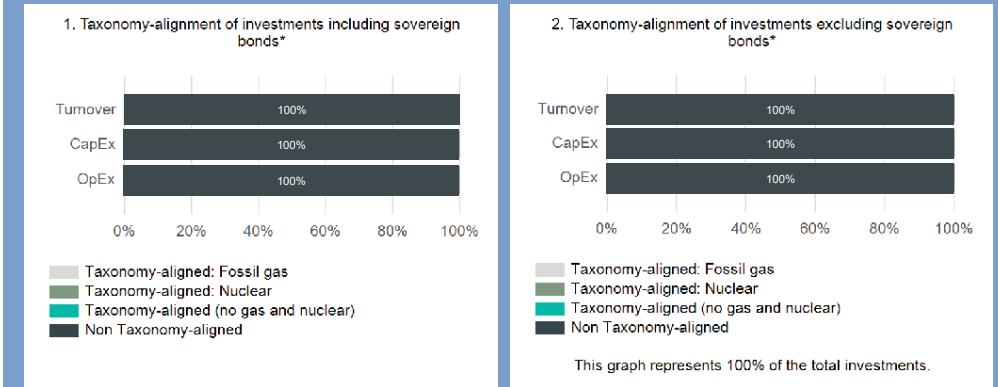

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Japan Equity Partners Portfolio

Legal entity identifier:

222100KE2XKF435ISW04

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.08% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

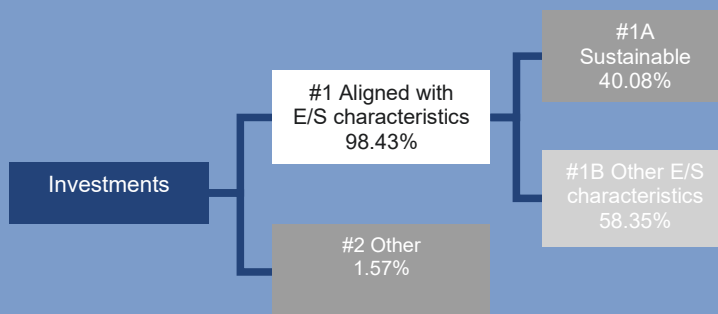

Largest investments	Sector	% Assets	Country
SONY GROUP CORPORATION	Consumer Discretionary	6.87%	JP
MITSUBISHI UFJ FINANCIAL GROUP, INC.	Financials	6.33%	JP

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.28%
	Margin	0.07%

Information Technology	Semiconductors & Semiconductor Equipment	4.98%
	Technology Hardware & Equipment	5.41%
	Software & Services	8.75%
Materials	Materials	4.00%
MUTUAL FUND	MONEY MARKET	0.22%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

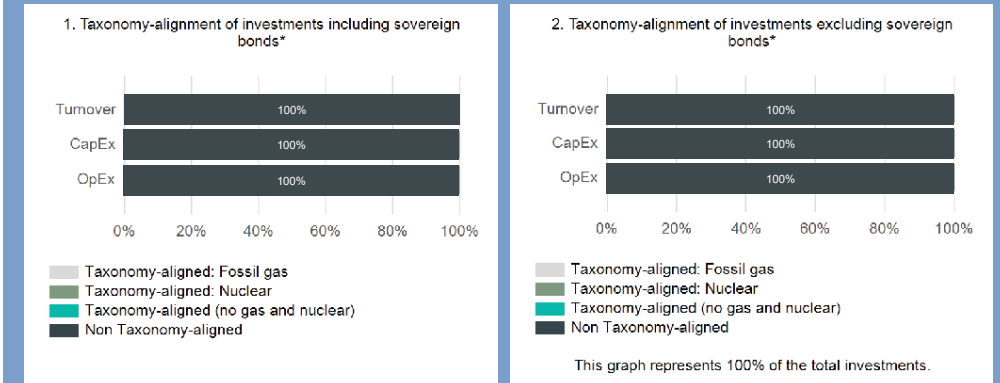

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.19% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

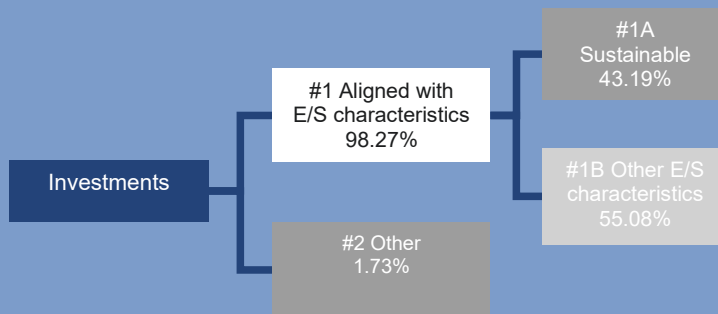

Largest investments	Sector	% Assets	Country
MITSUBISHI UFJ FINANCIAL GROUP, INC.	Financials	5.21%	JP
TOYOTA MOTOR CORPORATION	Consumer Discretionary	4.95%	JP
SONY GROUP CORPORATION	Consumer Discretionary	4.94%	JP

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.47%
	Margin	-0.21%
Communication Services	Media & Entertainment	2.85%
	Telecommunication Services	1.96%
Consumer Discretionary	Consumer Durables & Apparel	6.75%
	Automobiles & Components	7.47%
	Consumer Services	1.12%
	Consumer Discretionary Distribution & Retail	4.14%
Consumer Staples	Household & Personal Products	0.78%

MUTUAL FUND	MONEY MARKET	0.47%
Real Estate	Real Estate Management & Development	2.48%
Utilities	Utilities	1.20%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

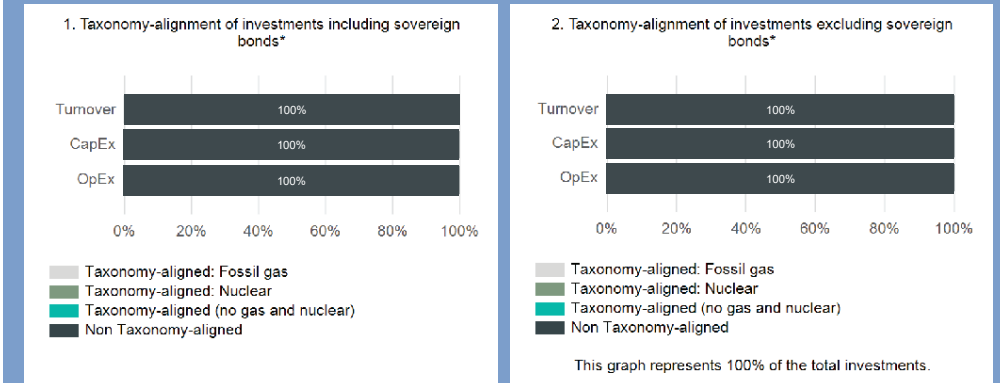

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs US Equity ESG Portfolio

Legal entity identifier:
04N6BH2GW8URDY0AK302

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 49.47% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity sensitive areas • Emission to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

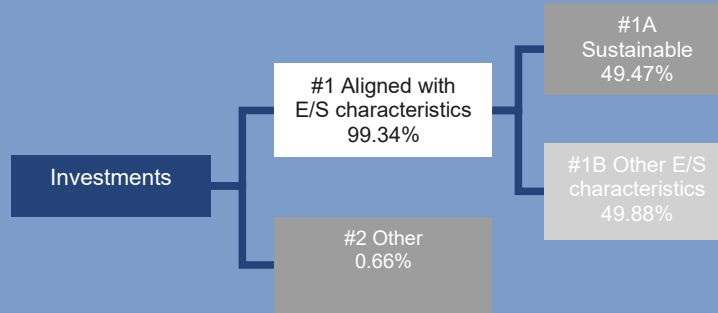

Largest investments	Sector	% Assets	Country
MICROSOFT CORPORATION	Information Technology	6.90%	US

NEXTERA ENERGY, INC.	Utilities	2.35%	US
GE VERNOVA INC.	Industrials	2.34%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets

	Software & Services	11.45%
Materials	Materials	4.64%
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.61%
Utilities	Utilities	2.35%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

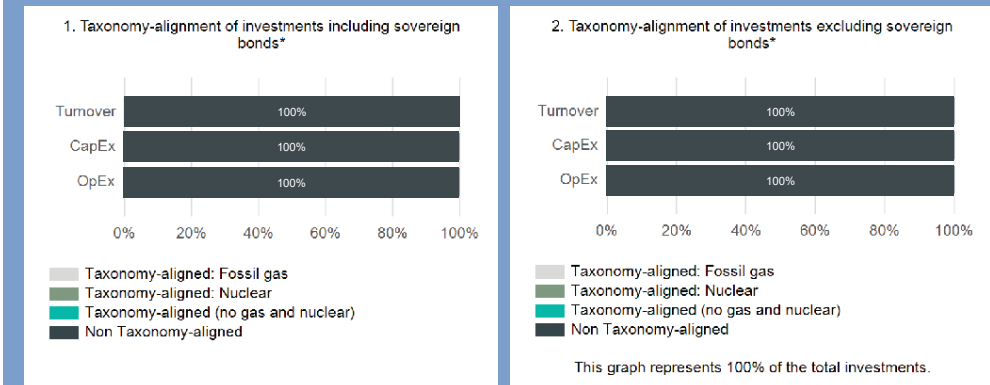

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 22.60% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

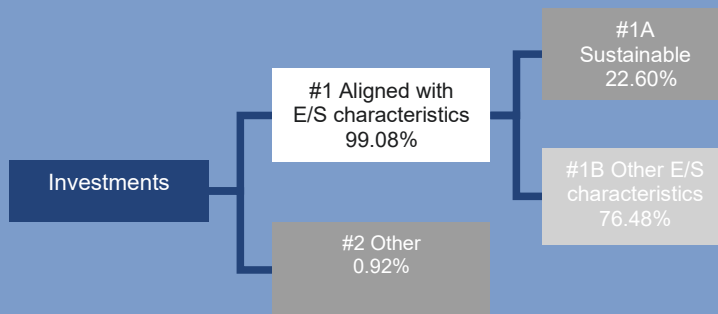

Largest investments	Sector	% Assets	Country
SPX CORPORATION	Industrials	2.08%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.03%
Communication Services	Media & Entertainment	0.27%
Consumer Discretionary	Consumer Durables & Apparel	3.74%
	Automobiles & Components	3.11%
	Consumer Services	1.79%
	Consumer Discretionary Distribution & Retail	3.48%

MUTUAL FUND	MONEY MARKET	0.59%
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.21%
	Real Estate Management & Development	1.01%
Utilities	Utilities	0.96%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

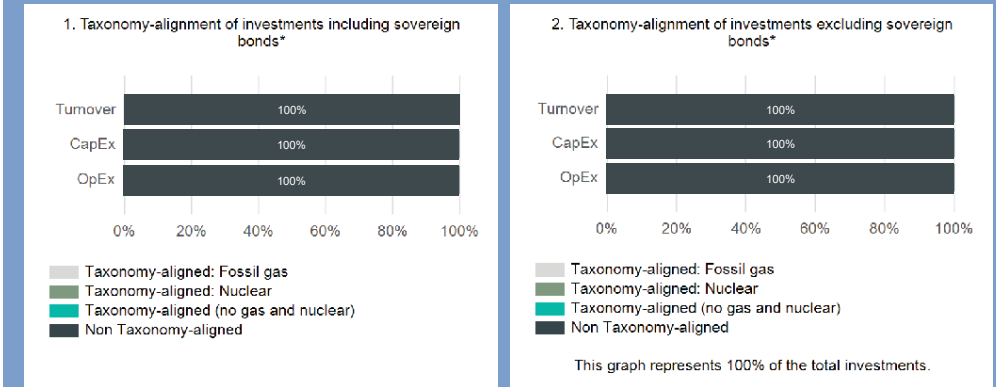

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team’s engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team’s thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs US Technology Opportunities Equity Portfolio

Legal entity identifier:

549300RRPU78GTR0W045

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.52% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

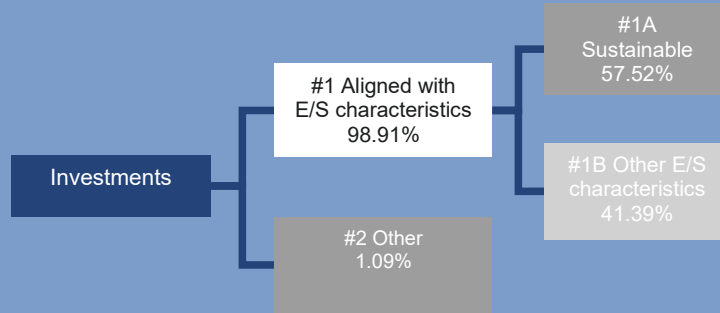

Largest investments	Sector	% Assets	Country
NVIDIA CORPORATION	Information Technology	9.05%	US
MICROSOFT CORPORATION	Information Technology	8.48%	US
APPLE INC.	Information Technology	7.38%	US
META PLATFORMS, INC.	Communication Services	6.82%	US
ALPHABET INC.	Communication Services	5.76%	US
AMAZON.COM, INC.	Consumer Discretionary	5.55%	US
BROADCOM INC.	Information Technology	4.32%	US
NETFLIX, INC.	Communication Services	3.14%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

-The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.97%
Communication Services	Media & Entertainment	16.54%
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.79%
	Consumer Services	0.71%
Financials	Financial Services	5.94%
Information Technology	Semiconductors & Semiconductor Equipment	25.77%
	Software & Services	31.28%
	Technology Hardware & Equipment	10.88%
MUTUAL FUND	MONEY MARKET	0.12%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

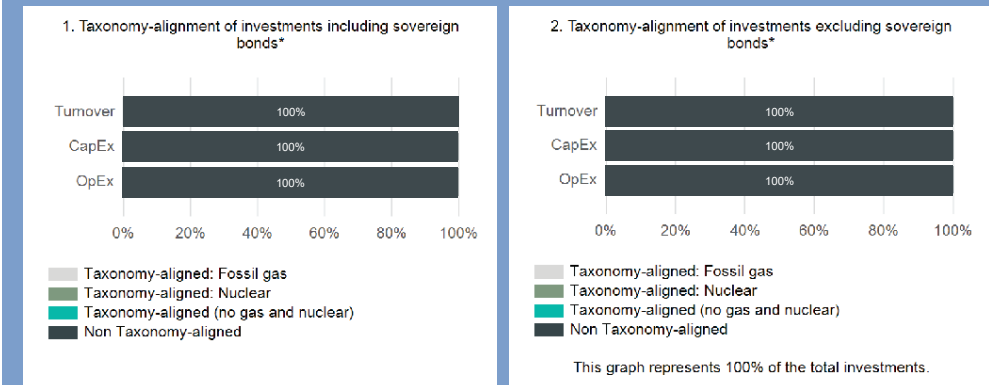

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for financial products referred to in Article 9 (1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 98.46% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

The Portfolio sought to create positive environmental impact by investing in renewable energy companies that the Investment Advisor considered to be sustainable investments and which contributed to the decarbonisation of the economy by generating, producing, transmitting, and/or distributing renewable energy.

Renewable energy companies referred to companies that:

- were in the S&P Global Clean Energy Index, the Eagle Global Renewables Infrastructure Index or
- had at least 50% of their assets, income, earnings, sales or profits committed to, or derived from, any segment of the clean energy value chain, which would included the following:
 - (i) Energy producers/manufacturers included companies that are engaged in the manufacturing and development of clean energy technology, including solar panels, wind turbines, batteries and fuel cells.
 - (ii) Clean energy infrastructure companies included companies that primarily own, operated and in some cases developed clean energy and storage assets (solar, wind, hydro, biofuels, hydrogen, biomass, etc.).
 - (iii) Energy users included companies that are enabling increased or more efficient consumption of renewable energy/electricity by various end-use sectors (residential, commercial, industrial, transport).

The performance of these characteristics are measured by the following performance indicators:

- Percentage of companies with at least 50% of their assets, income, earnings, sales or profits committed to, or derived from, any segment of the clean energy value chain.
- Spilt between % of companies in the Portfolio that were considered to be energy producers / manufacturers, those that were considered to be clean energy infrastructure companies and those that were considered to be energy users.
- Aggregate contribution of companies held in the Portfolio to environmental impact key performance indicators.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the sustainable investment objective of the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the investment objective of the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Carbon Intensity <i>(in relation to the Reference Portfolio/Benchmark)</i>	N/A	Portfolio: 1,637.65 Benchmark: 3,213.05	{1 Dec 2023 - 25 Nov 2025}: Portfolio: 1,538.5 Benchmark: 3,213.05	N/A	Tons CO2e per \$M Sales
Out-of-index companies in the Portfolio with at least 50% of their assets, income, earnings, sales or profits committed to, or derived from, any segment of the clean energy value chain	N/A	N/A	{25 Nov 2024- 30 Nov 2025}: 16.57	10.61	%
Energy producers/manufacturers:	N/A	N/A	{25 Nov 2024- 30 Nov 2025}: 20.21	29.27	%
Clean energy infrastructure companies	N/A	N/A	{25 Nov 2024- 30 Nov 2025}: 50.14	70.74	%
Energy users	N/A	N/A	{25 Nov 2024- 30 Nov 2025}: 29.65	0.00	%
Contribution of companies to environmental impact key performance indicators	N/A	N/A	{25 Nov 2024- 30 Nov 2025}: N/A	384.37	Gigawatts (GW) of renewable energy capacity installed

DISCLAIMER: All metrics subject to change and pending potential publication in Annual Fund Impact Report.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management’s proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity-sensitive areas • Emissions to water • Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

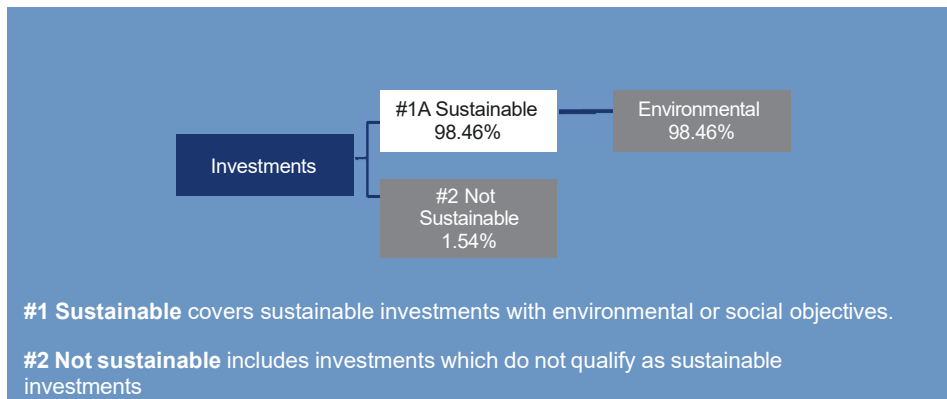

Largest investments	Sector	% of Assets	Country
SSE PLC	Electricity, gas, steam and air conditioning supply	7.35%	GB
IBERDROLA, S.A.	Electricity, gas, steam and air conditioning supply	6.15%	ES
EDP, S.A.	Electricity, gas, steam and air conditioning supply	6.14%	PT
FIRST SOLAR, INC.	Manufacturing	5.67%	US
ORMAT TECHNOLOGIES, INC.	Electricity, gas, steam and air conditioning supply	4.87%	US
TERNA - RETE ELETTRICA NAZIONALE SOCIETA PER AZIONI	Electricity, gas, steam and air conditioning supply	4.60%	IT
NATIONAL GRID PLC	Electricity, gas, steam and air conditioning supply	4.58%	GB
NORTHLAND POWER INC	Electricity, gas, steam and air conditioning supply	4.26%	CA
HYDRO ONE LIMITED	Electricity, gas, steam and air conditioning supply	4.17%	CA
CLEARWAY ENERGY, INC.	Electricity, gas, steam and air conditioning supply	3.91%	US

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

In which economic sectors were the investments made?

Sector	Sub Sector	% of Assets
Cash	Cash	1.55%
Common	EQCORP	0.87%
Construction	Civil engineering	1.39%
Electricity, gas, steam and air conditioning supply	Electricity, gas, steam and air conditioning supply	68.89%
Financial and insurance activities	Financial service activities, except insurance and pension funding	3.70%
Manufacturing	Manufacture of chemicals and chemical products	0.15%

Manufacturing	Manufacture of computer, electronic and optical products	12.20%
	Manufacture of electrical equipment	2.51%
	Manufacture of food products	1.76%
	Manufacture of machinery and equipment n.e.c.	5.49%
	Manufacture of other non-metallic mineral products	1.47%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

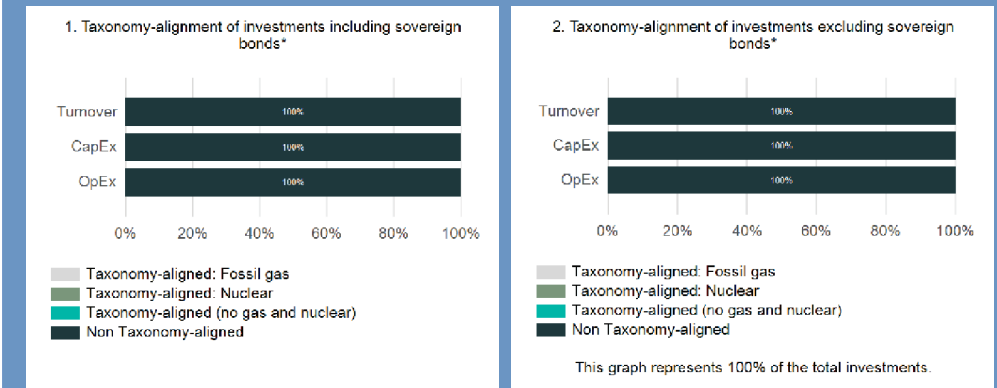

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of socially sustainable investments?

Whilst this Portfolio has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “not sustainable” were cash and cash equivalents for liquidity purposes, permitted funds (such as ETFs) that themselves make disclosures pursuant to art 8 or 9 of SFDR for the purposes of cash management and derivatives for hedging purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Adviser has taken actions to ensure that the sustainable investment objective of the Portfolio was met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared to the reference sustainable benchmark?

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.11% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

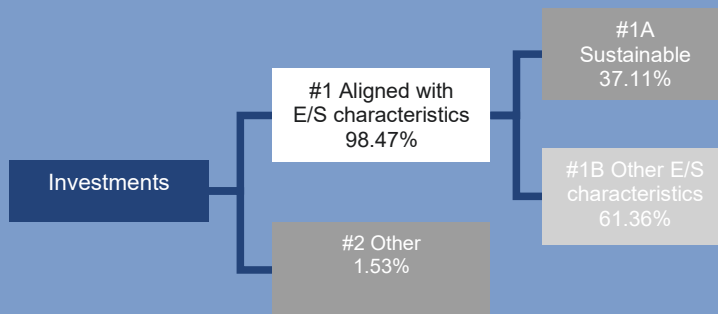

Largest investments	Sector	% Assets	Country
NEXTERA ENERGY, INC.	Utilities	5.98%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	0.75%
Communication Services	Telecommunication Services	1.99%
Energy	Energy	14.57%
Industrials	Transportation	23.38%
	Capital Goods	2.54%
MUTUAL FUND	MONEY MARKET	0.66%
Real Estate	Equity Real Estate Investment Trusts (REITs)	6.13%
Utilities	Utilities	49.98%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

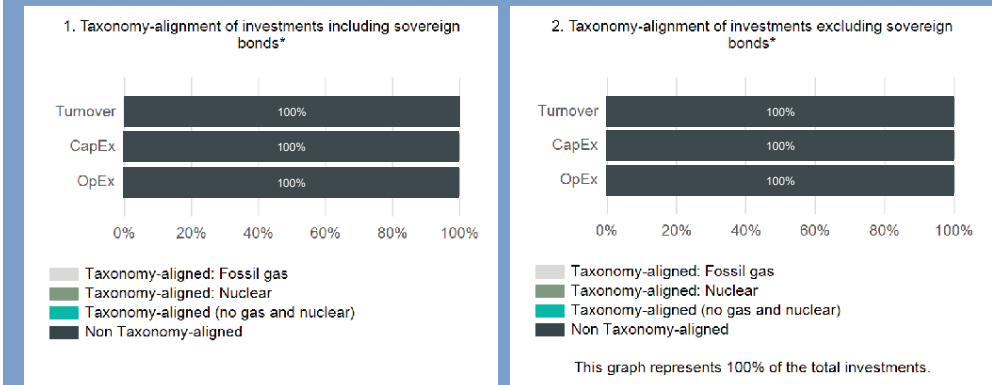

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Global Real Estate Equity Portfolio

Legal entity identifier:

222100X932LRT37OP014

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 71.42% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

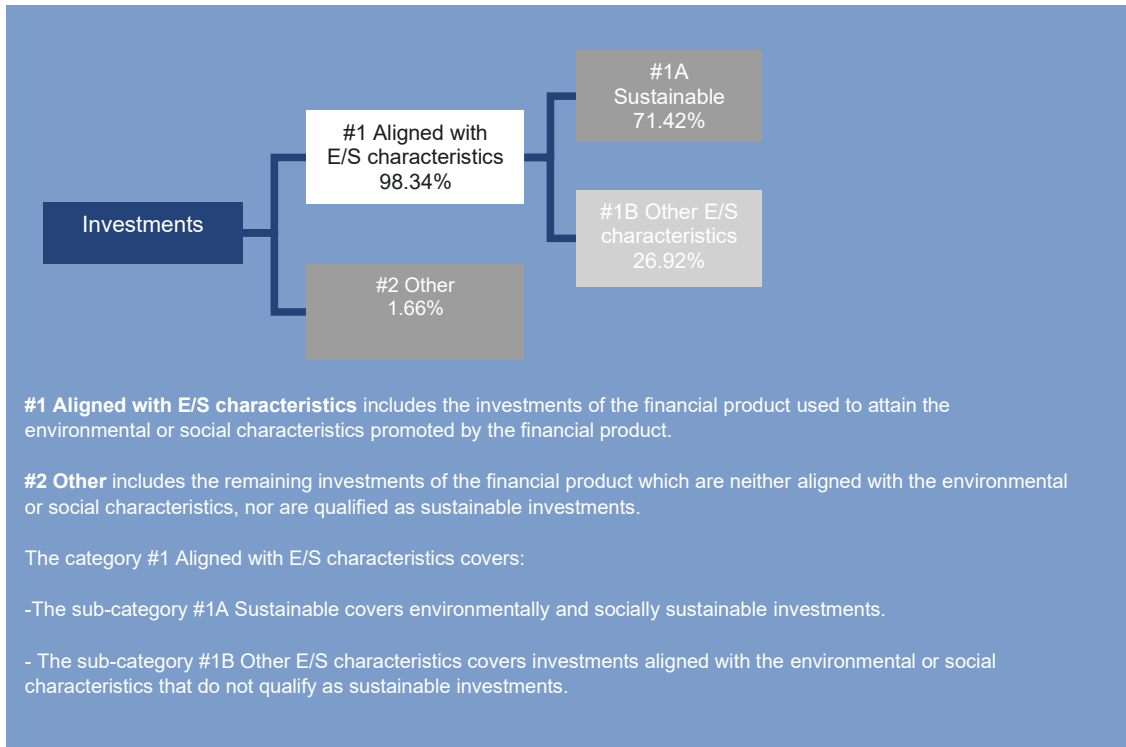

Largest investments	Sector	% Assets	Country
PROLOGIS, INC.	Real Estate	7.02%	US
WELLTOWER, INC.	Real Estate	6.58%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.36%
Communication Services	Telecommunication Services	0.95%
Consumer Discretionary	Consumer Services	0.57%
MUTUAL FUND	MONEY MARKET	0.29%
Real Estate	Equity Real Estate Investment Trusts (REITs)	83.35%
	Real Estate Management & Development	13.47%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

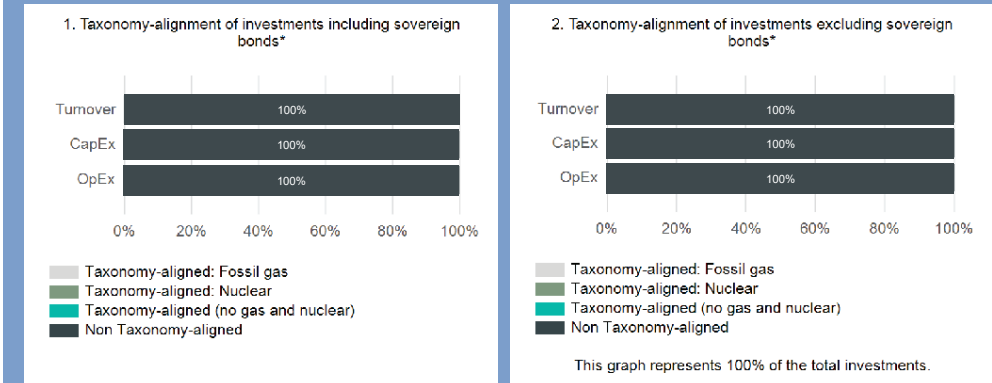

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies in the Portfolio the Investment Adviser believes to be violating the United Nations Global Compact ten principles (%)	N/A	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity sensitive areas
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact Principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Number of incidents of discrimination • Excessive CEO pay ratio

	Real Estate Management & Development	3.78%
Utilities	Utilities	26.49%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

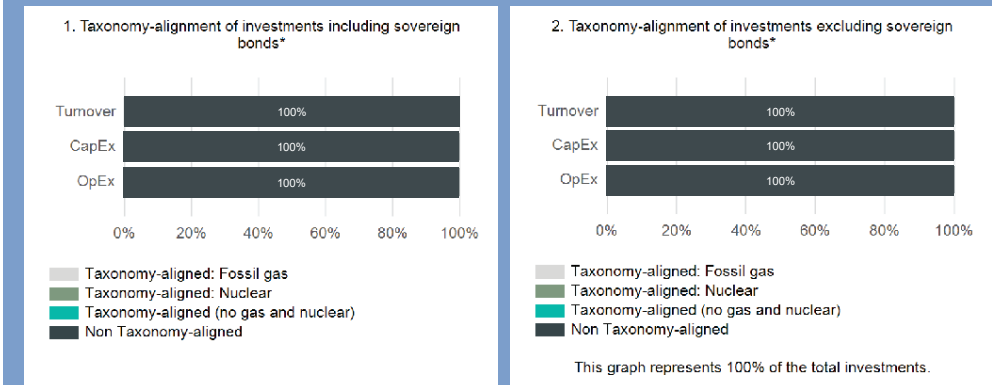

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management and other issuers for which data is lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 114 Benchmark: 153	Portfolio: 119.2 Benchmark: 152.5	Portfolio: 84.73 Benchmark: 136.81	Portfolio: 73.64 Benchmark: 120.68	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 2,178 Benchmark: 6,278	Portfolio: 3004.0 Benchmark: 8379.4	Portfolio: 880.32 Benchmark: 9469.89	Portfolio: 773.61 Benchmark: 5103.66	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

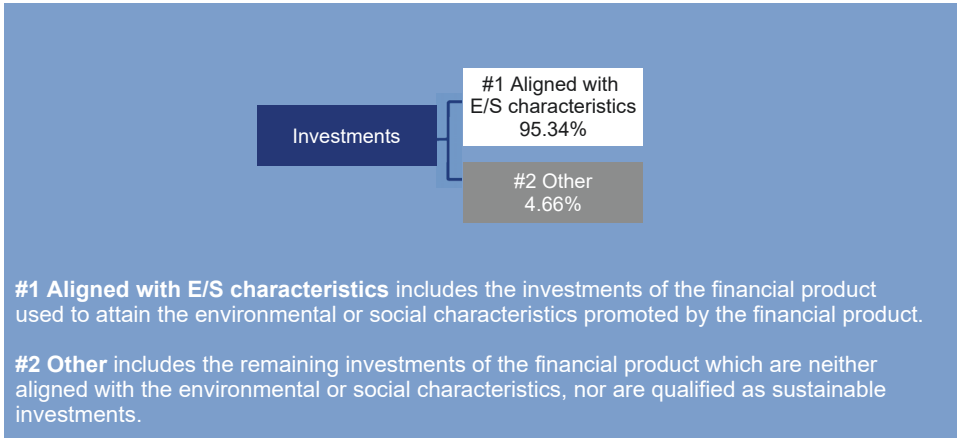

Largest investments	Sector	% of Assets	Country

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

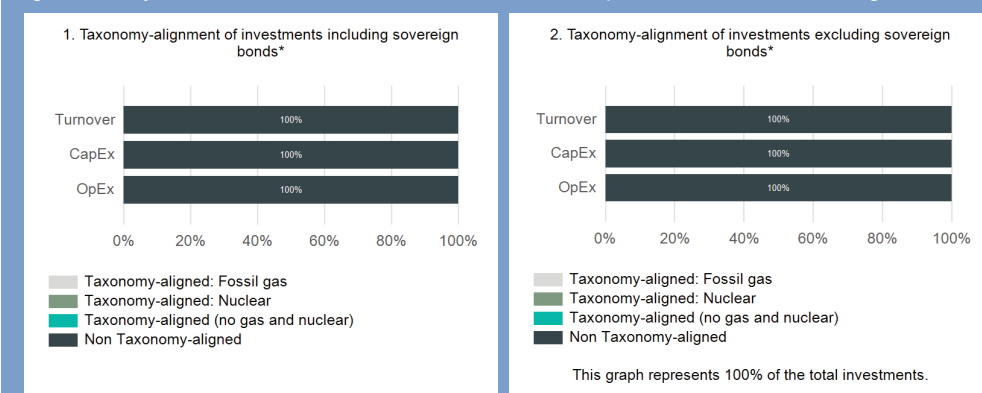

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 151.1 Benchmark: 154.6	Portfolio: 98.36 Benchmark: 123.86	Portfolio: 79.27 Benchmark: 114.96	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 1935.6 Benchmark: 11258.9	Portfolio: 803.82 Benchmark: 9416.22	Portfolio: 649.07 Benchmark: 3,613.62	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	N/A	N/A	0	%
Companies violating the United Nations Global Compact's ten principles	N/A	N/A	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

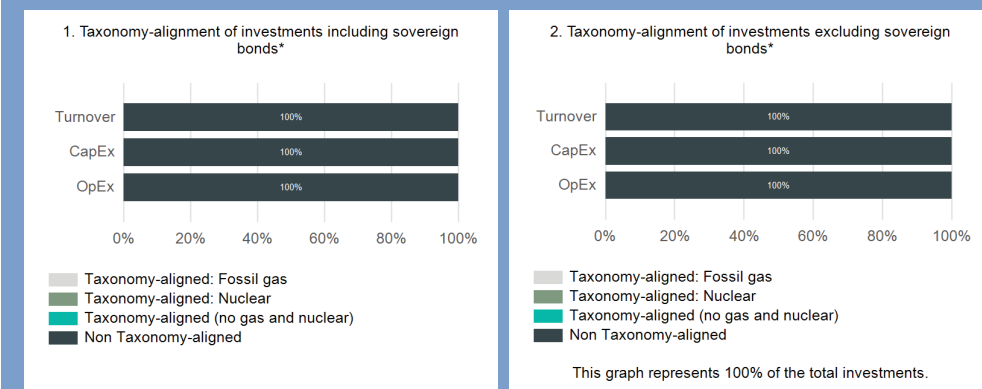

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 100 Benchmark: 135	Portfolio: 115.1 Benchmark: 124.0	Portfolio: 89.50 Benchmark: 116.52	Portfolio: 80.09 Benchmark: 110.50	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 1,873 Benchmark: 2,498	Portfolio: 1426.0 Benchmark: 2063.2	Portfolio: 826.82 Benchmark: 1636.14	Portfolio: 1,140.10 Benchmark: 1,403.80	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade, except of motor vehicles and motorcycles	3.73%
	Wholesale and retail trade and repair of motor vehicles and motorcycles	0.02%
	Wholesale trade, except of motor vehicles and motorcycles	0.02%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

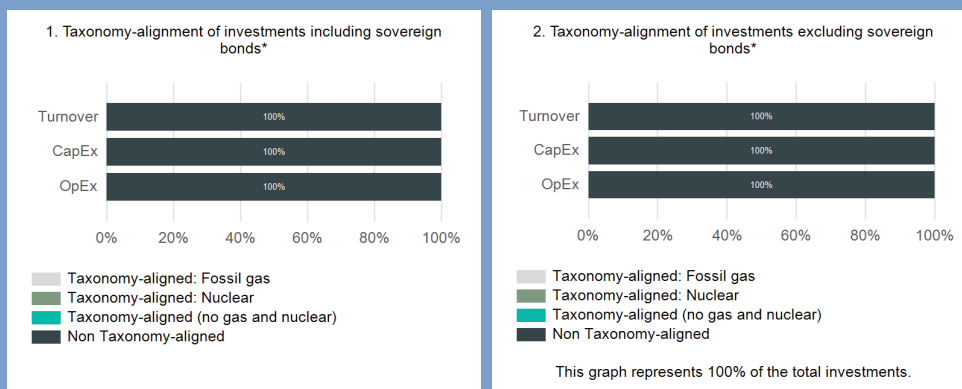

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

As the Portfolio closed on 22 April 2025, therefore the reference period for the purpose of this periodic disclosure is 1 November 2024 - 28 February 2025.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	February 28, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 96 Benchmark: 128	Portfolio: 79.8 Benchmark: 117.7	Portfolio: 58.52 Benchmark: 95.56	Portfolio: 71.31 Benchmark: 104.63	tonnes CO2e per \$mn market cap

Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: as at 28 Feb 2025

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

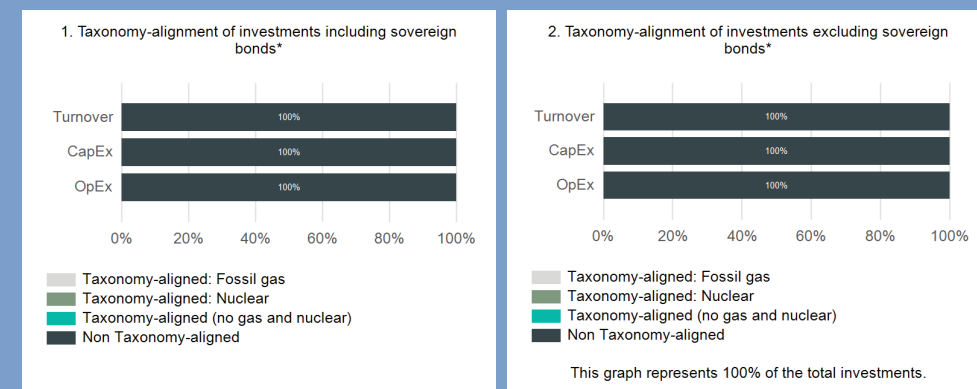

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

In fossil gas

In nuclear energy

No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	February 28, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 52 Benchmark: 69	Portfolio: 64.3 Benchmark: 69.3	Portfolio: 44.66 Benchmark: 57.29	Portfolio: 33.63 Benchmark: 50.09	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 1,060 Benchmark: 1,400	Portfolio: 725.7 Benchmark: 1366.5	Portfolio: 664.12 Benchmark: 1131.81	Portfolio: 693.33 Benchmark: 988.64	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

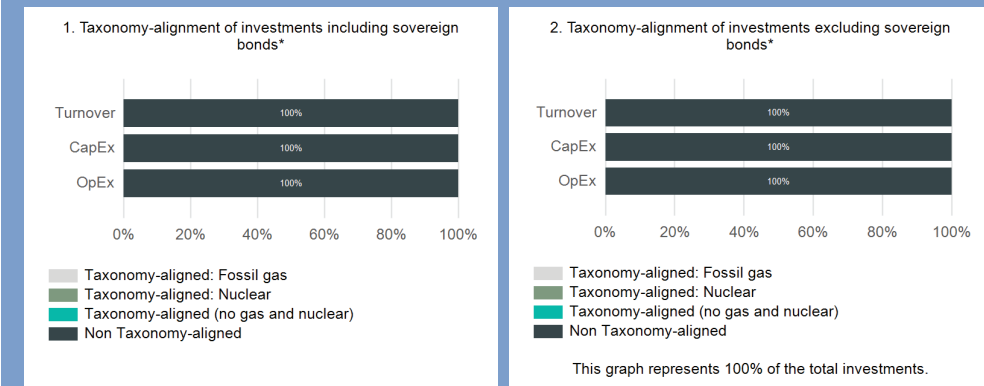

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

green investments made by investee companies, e.g. for a transition to a green economy.
 - operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 73 Benchmark: 100	Portfolio: 77.7 Benchmark: 105.6	Portfolio: 54.91 Benchmark: 82.66	Portfolio: 57.42 Benchmark: 75.72	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 3,354 Benchmark: 4,598	Portfolio: 2241.7 Benchmark: 4483.4	Portfolio: 913.74 Benchmark: 3603.36	Portfolio: 1,356.43 Benchmark: 3,028.75	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

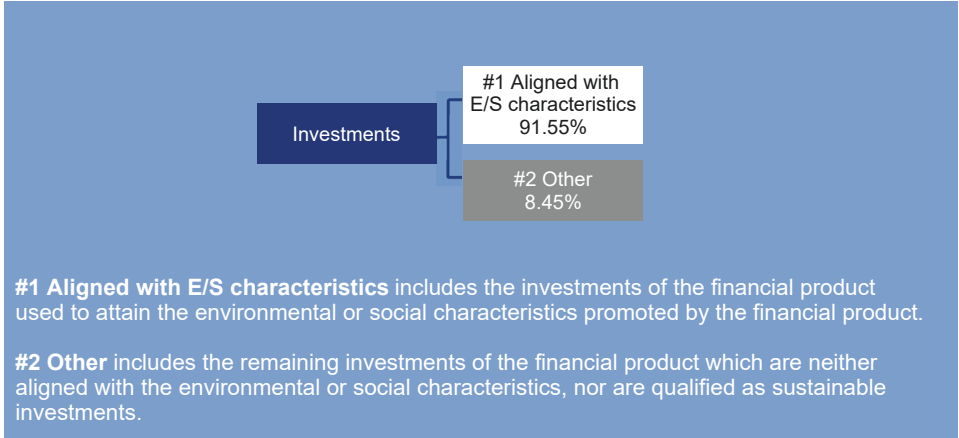

Largest investments	Sector	% of Assets	Country
UNIVERSAL HEALTH SERVICES, INC.	Human health and social work activities	0.81%	US
SCOUT24 SE	Information and communication	0.76%	DE
ANTERO RESOURCES CORPORATION	Mining and quarrying	0.75%	US

	Wholesale trade, except of motor vehicles and motorcycles	1.35%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

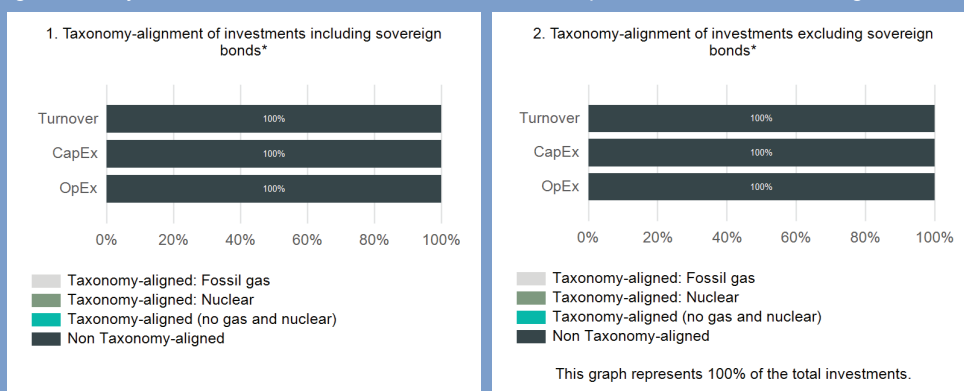

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs US CORE Equity Portfolio

Legal entity identifier:
TFB7XDFM7T6YD60TDK75

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 36 Benchmark: 48	Portfolio: 43.4 Benchmark: 48.2	Portfolio: 22.22 Benchmark: 40.37	Portfolio: 27.83 Benchmark: 35.15	tonnes CO2e per \$mn market cap

Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

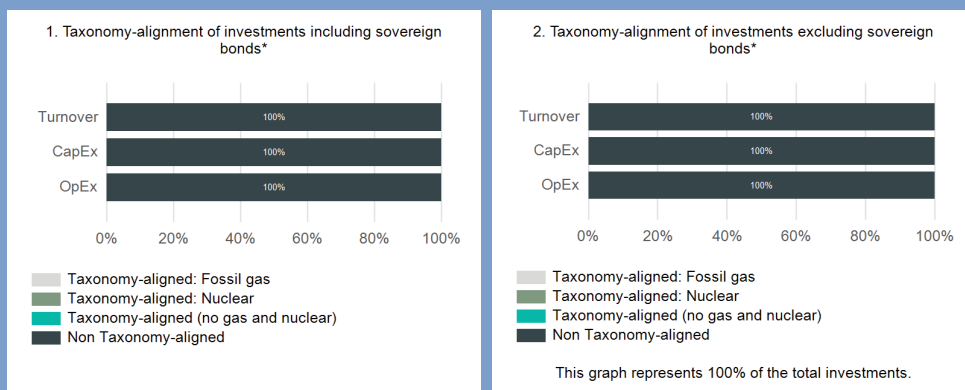

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

856
 *Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs US Small Cap CORE Equity Portfolio

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

The performance of this characteristic is measured by the following: Level of blended and embedded emissions of the Portfolio and the Reference Portfolio/Benchmark.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Blended emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 81 Benchmark: 111	Portfolio: 70.1 Benchmark: 127.5	Portfolio: 52.04 Benchmark: 98.77	Portfolio: 59.91 Benchmark: 96.90	tonnes CO2e per \$mn market cap
Embedded emissions <i>(in relation to the Reference Portfolio/Benchmark)</i>	Portfolio: 5,630 Benchmark: 9,959	Portfolio: 2888.3 Benchmark: 10194.6	Portfolio: 546.52 Benchmark: 7417.66	Portfolio: 2,275.85 Benchmark: 6,443.72	tonnes CO2e per \$bn market cap
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria. The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Investments in companies without carbon emission reduction initiatives • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Natural species and protected areas • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Incidents of discrimination • Excessive CEO pay ratio

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

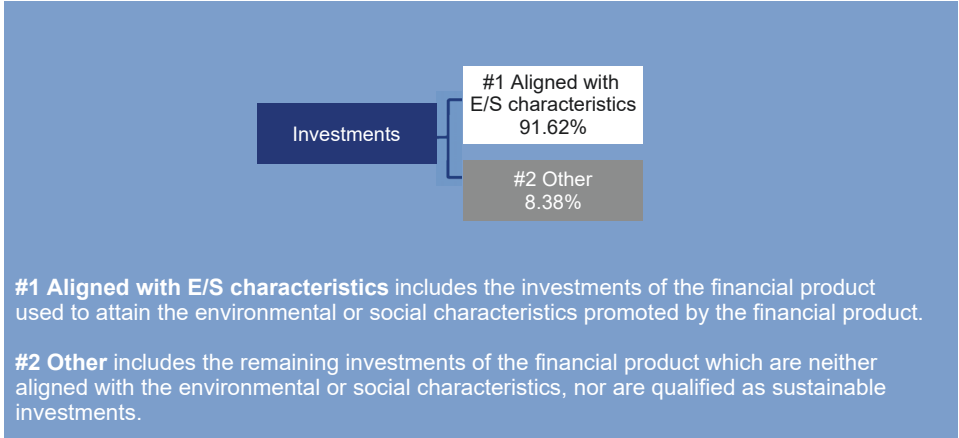

Largest investments	Sector	% of Assets	Country
FABRINET	Manufacturing	0.76%	KY

	Wholesale trade, except of motor vehicles and motorcycles	1.47%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas
- In nuclear energy

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

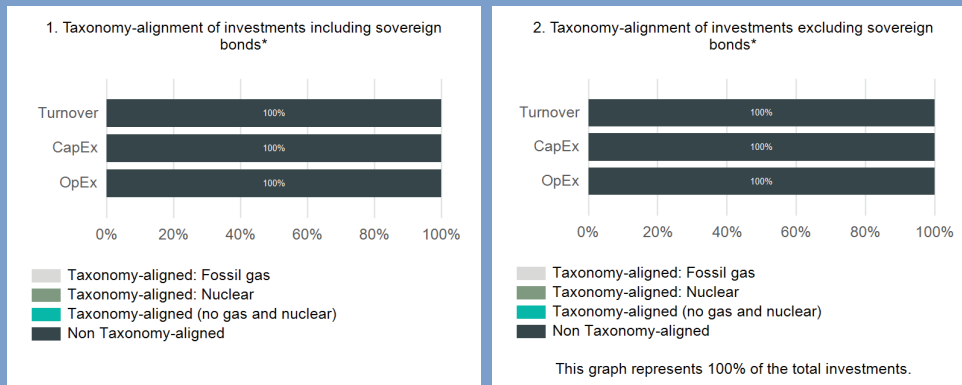

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of minimum inclusion criteria based on ESG ratings during the reference period as set forth below.

Additionally, the screening process for the Portfolio generally included issuers that have a minimum ESG rating of greater than 1 according to the Investment Manager's propriety internal scoring system and/or sourced from an external data vendor as applicable (which may include government, corporate, sovereign, supranational and agency issuers, as applicable), however the Fund may have exposure of up to 10% in issuers with an ESG rating less or equal to 1.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating less than or equal to 1.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0.4	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Unadjusted gender pay gap

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

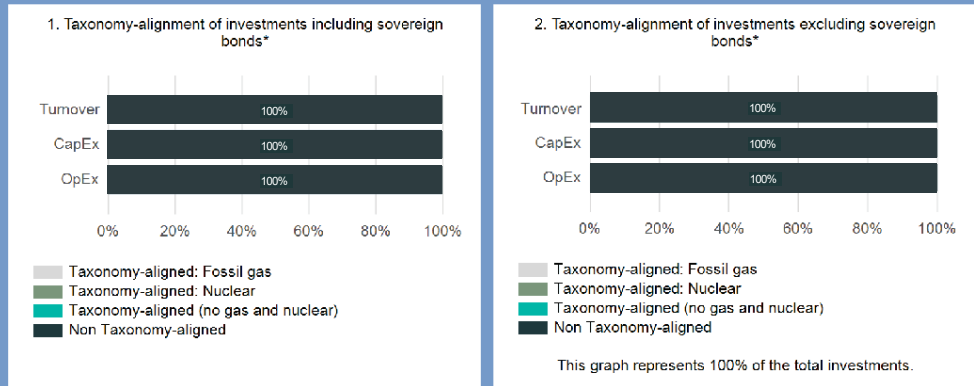

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	873			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Emerging Markets Corporate Bond Portfolio

Legal entity identifier:
6EFNU7Y95P5CW3M6T106

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of minimum inclusion criteria based on ESG ratings during the reference period as set forth below.

The screening process for the Portfolio generally included issuers that have a minimum ESG rating of greater than 1 according to the Investment Manager's propriety internal scoring system and/or sourced from an external data vendor as applicable (which may include government, corporate, sovereign, supranational and agency issuers, as applicable), however the Fund may have exposure of up to 10% in issuers with an ESG rating less or equal to 1.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating less than or equal to 1.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0	0.71	0.30	0.01

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Unadjusted gender pay gap
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-

	bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws
--	---

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets

SOVEREIGN	DOMESTIC	0.55%
SUPRANATIONAL	SUPRANATIONAL	0.28%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

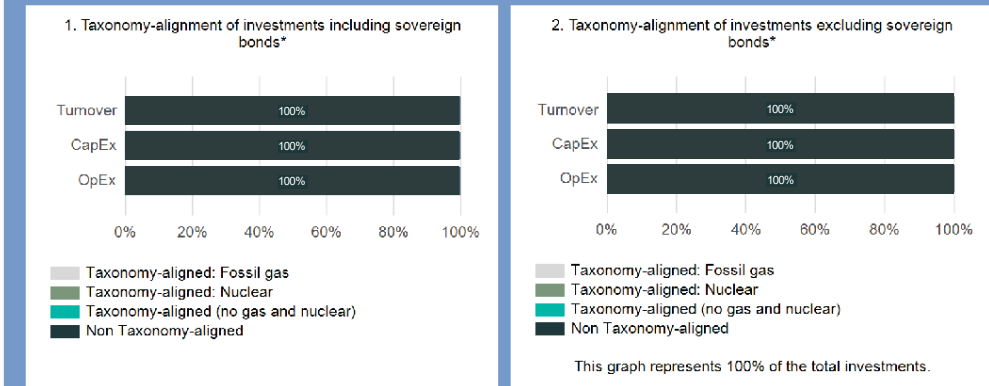

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	882			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process during the reference period as set forth below (the "ESG Criteria"). This consisted of: (i) minimum inclusion criteria based on ESG ratings and(ii) portfolio level targets as set forth below.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The screening process for the Portfolio generally included issuers that have a minimum ESG rating of greater than 1 according to the Investment Manager's propriety internal scoring system and/or sourced from an external data vendor as applicable (which may include government, corporate, sovereign, supranational and agency issuers, as applicable), however the Fund may have exposure of up to 10% in issuers with an ESG rating less or equal to 1.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating less than or equal to 1.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Percentage of issuers with an ESG rating less than or equal to 1 (%)	2.59	3.23	1.40	0.20
Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark)	Portfolio: 2.44 Benchmark: 2.44	Portfolio: 2.46 Benchmark: 2.45	Portfolio: 2.43 Benchmark: 2.34	Portfolio: 2.4 Benchmark: 2.27

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Emerging Markets Debt Local Portfolio

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark)	Portfolio: 2.7 Benchmark: 2.62	Portfolio: 2.76 Benchmark: 2.6	Portfolio: 2.54 Benchmark: 2.33	Portfolio: 2.46 Benchmark: 2.25

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Activities negatively affecting biodiversity sensitive areas
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Water usage and recycling • Natural species and protected areas • Deforestation

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
UNITED MEXICAN STATES	EMERGING MARKETS	12.22%	MX
FORWARD MALAYSIAN RINGGET	DERIVATIVES	11.49%	MY

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

MUTUAL FUND	MONEY MARKET	7.07%
SUPRANATIONAL	SUPRANATIONAL	3.78%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

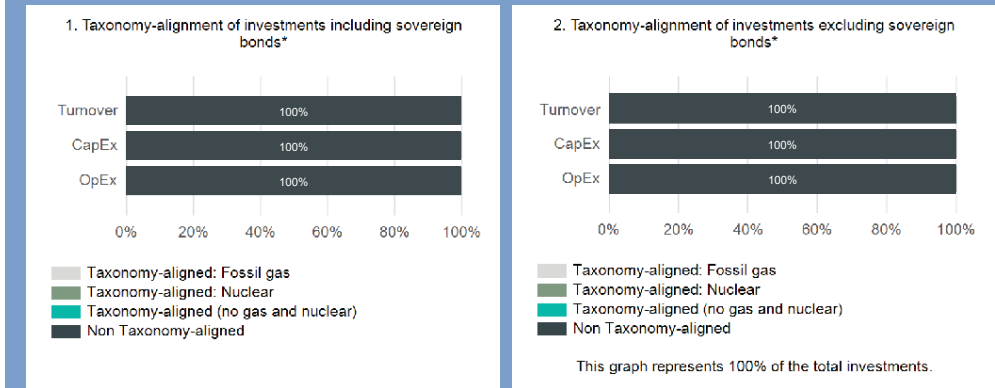

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change(“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	898			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark)	Portfolio: 2.27 Benchmark: 2.21	Portfolio: 2.31 Benchmark: 2.22	Portfolio: 2.25 Benchmark: 2.12	Portfolio: 2.35 Benchmark: 2.19

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

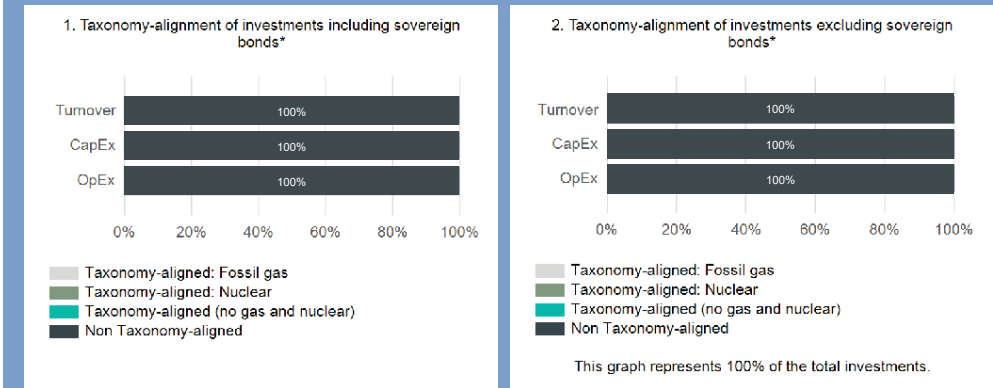

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change(“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	906			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

Additionally, the screening process for the Portfolio generally included issuers that have a minimum ESG rating of greater than 1 according to the Investment Manager's propriety internal scoring system and/or sourced from an external data vendor as applicable (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 8 Benchmark: 15	Portfolio: 8.41 Benchmark: 15.16	Portfolio: 6.84 Benchmark: 14.02	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 393 Benchmark: 683	Portfolio: 377.05 Benchmark: 734.14	Portfolio: 312.10 Benchmark: 620.56	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress

	<ul style="list-style-type: none"> • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

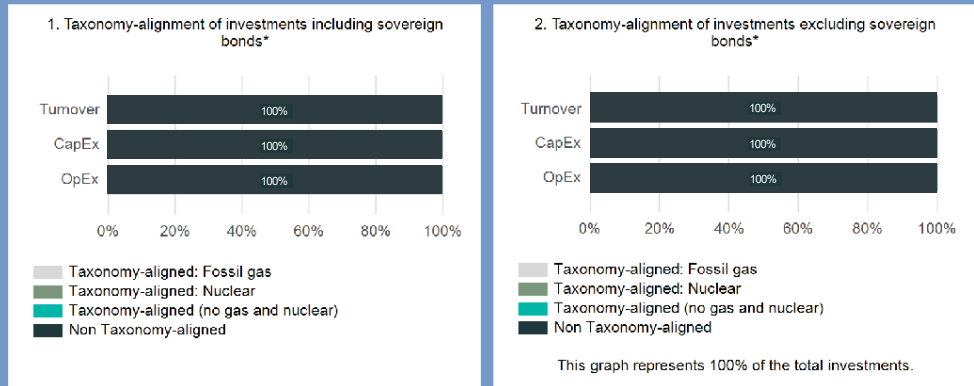

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	916			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Euro Short Duration Bond Plus Portfolio

Legal entity identifier:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark)	Portfolio: 0 Benchmark: 0.5:	Portfolio: 0.3 Benchmark: 0.5	Portfolio: 0.40 Benchmark: 0.48	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 42 Benchmark: 74	Portfolio: 36.18 Benchmark: 68.69	Portfolio: 43.70 Benchmark: 63.80	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress

	<ul style="list-style-type: none"> • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

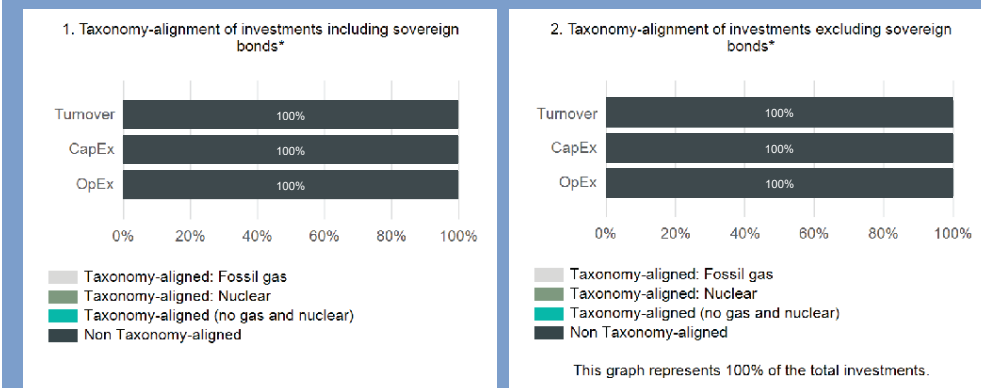

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change(“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	927			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Product name:

Goldman Sachs Europe High Yield Bond Portfolio

Legal entity identifier:

549300LJPZ8FPFQBHO96

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Over the reference period, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Corporate and sovereign issuers with an ESG rating of less than or equal to 1 (%)	0	0	0	N/A
Companies violating the United Nations Global Compact's ten principles	0	0	0	N/A
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 2.5 Benchmark: 3.5	Portfolio: 2.33 Benchmark: 3.88	Portfolio: 2.96 Benchmark: 5.19	N/A
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 135 Benchmark: 212	Portfolio: 121.51 Benchmark: 192.57	Portfolio: 99.36 Benchmark: 145.05	N/A
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0	0	0	0

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress

	<ul style="list-style-type: none"> • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.69%
	Margin	0.26%
COMMON	EQCORP	0.10%
CONVERTIBLE	EQCORP	0.42%
CORP	FIN	14.03%

	UTIL	5.32%
DERIVATIVES	SWAP	0.07%
	FORWARD	0.03%
EMERGING MARKETS	CORP	2.29%
MUTUAL FUND	MONEY MARKET	2.47%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

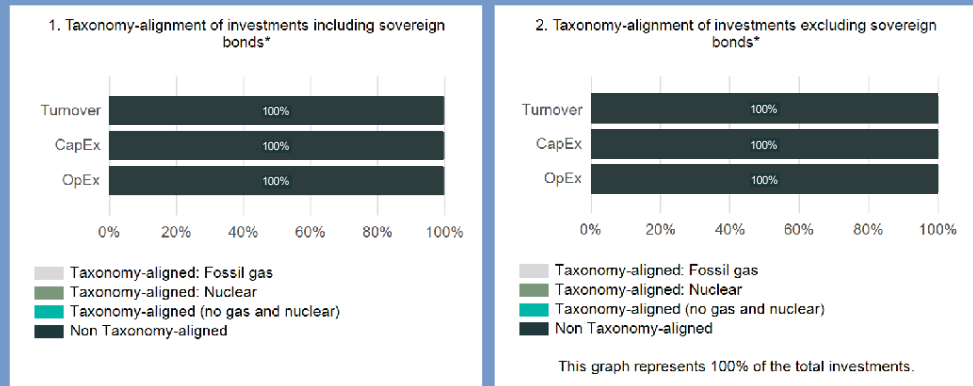

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	937			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Global Income Bond Portfolio

Legal entity identifier:
5493006PHV61PBKO2666

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of these characteristics is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/ Benchmark.

The performance of these characteristics is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025

Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0	0	0.28
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark)	Portfolio: 181.00 Benchmark: 305.00	Portfolio: 181.00 Benchmark: 305.00	Portfolio: 131.62 Benchmark: 153.36	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

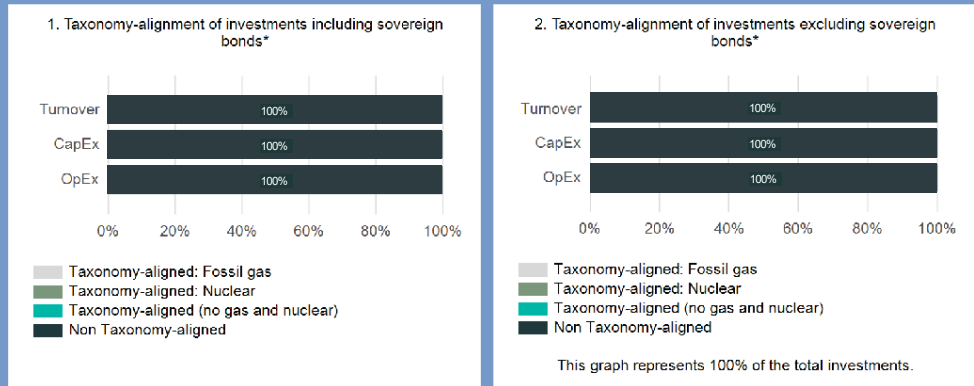

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	946			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) portfolio level targets as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn)).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser 's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Portfolio committed to a minimum of 10% sustainable investments. The Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser 's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	N/A	N/A	N/A	0
	950			

Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 2.6 Benchmark: 2.8	Portfolio: 2.6 Benchmark: 2.8	Portfolio: 1.53 Benchmark: 1.78	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	N/A	N/A	N/A	0
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 126.6 Benchmark: 225	Portfolio: 55.35 Benchmark: 75.80	Portfolio: 106.87 Benchmark: 199.71	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Unadjusted gender pay gap
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

Largest investments	Sector	% Assets	Country
FORWARD US DOLLAR	DERIVATIVES	30.48%	US
BANK OF AMERICA CORPORATION	CORP	2.47%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
CASH	CASH	1.40%
	Margin	0.88%

	CORP	1.52%
LOCAL GOVERNMENT	DOMESTIC	0.08%
MUTUAL FUND	MONEY MARKET	2.46%
SOVEREIGN	DOMESTIC	1.88%
SUPRANATIONAL	SUPRANATIONAL	0.01%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

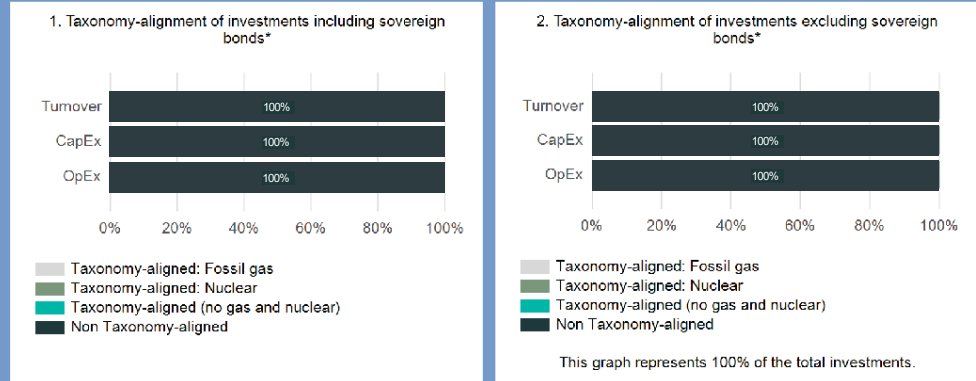

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO₂e/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 0.1 Benchmark: 1.0	Portfolio: 0.24 Benchmark: 0.95	Portfolio: 0.49 Benchmark: 0.81	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 68.5 Benchmark: 168.2	Portfolio: 94.96 Benchmark: 163.19	Portfolio: 100.78 Benchmark: 153.36	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% Assets
AGENCY	FOREIGN	0.88%
	DOMESTIC	0.34%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

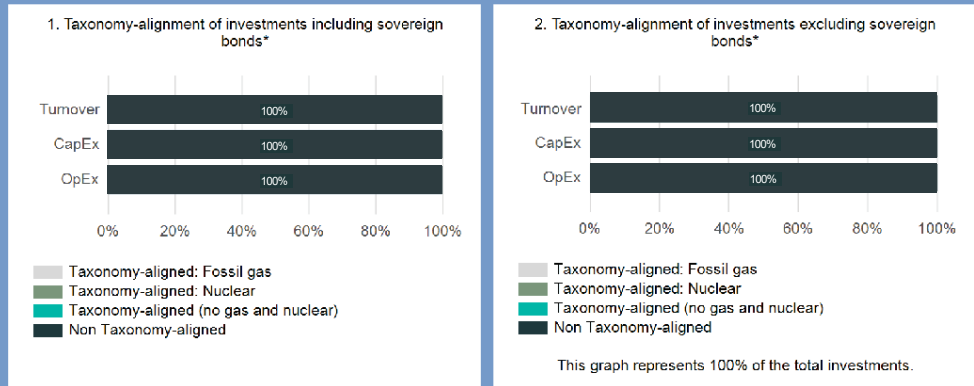

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	967			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 0.8 Benchmark: 1.0	Portfolio: 0.72 Benchmark: 0.95	Portfolio: 0.70 Benchmark: 0.81	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 73.3 Benchmark: 168.2	Portfolio: 66.37 Benchmark: 163.19	Portfolio: 58.03 Benchmark: 153.36	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

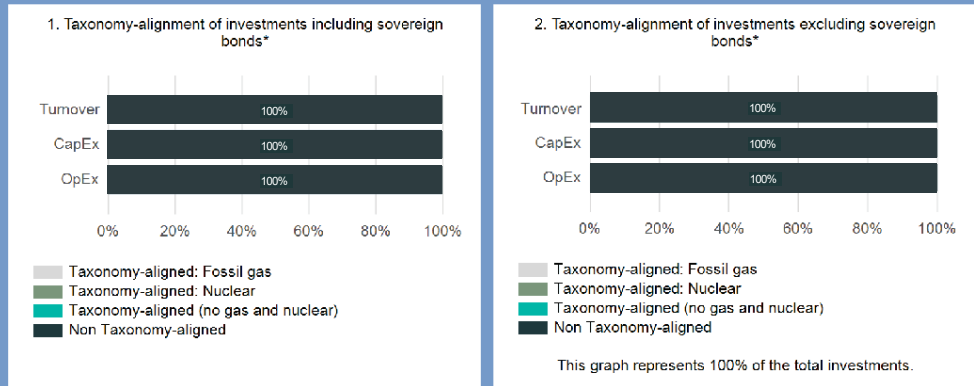

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	977			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) portfolio level targets.

The screening process for the Portfolio generally excluded government and corporate issuers that have the lowest two categories of ESG ratings according to the Investment Adviser's proprietary internal scoring system provided, however, the Portfolio may have exposure of up to 30% in such government and corporate issuers.

The performance of these characteristics is measured by the following: Corporate and sovereign issuers with an ESG rating of less than or equal to 2.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of these characteristics is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of these characteristics is measured by the following:

Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO₂e/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	N/A	N/A	N/A	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 4.7 Benchmark: 5.7	Portfolio: 5.05 Benchmark: 5.62	Portfolio: 4.13 Benchmark: 5.55	N/A
Percentage of issuers with an ESG rating of less than or equal to 1(%)	N/A	N/A	N/A	1.72
Corporate and sovereign issuers with an ESG rating of less than or equal to 2	8.5	6.34	3.68	N/A
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO _{2e} /Sales (\$mn))	Portfolio: 209.7 Benchmark: 314.2	Portfolio: 218.38 Benchmark: 298.83	Portfolio: 177.65 Benchmark: 260.31	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Unadjusted gender pay gap • Board gender diversity
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address

	<p>breaches of standards of anti-corruption and anti-bribery</p> <ul style="list-style-type: none"> • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

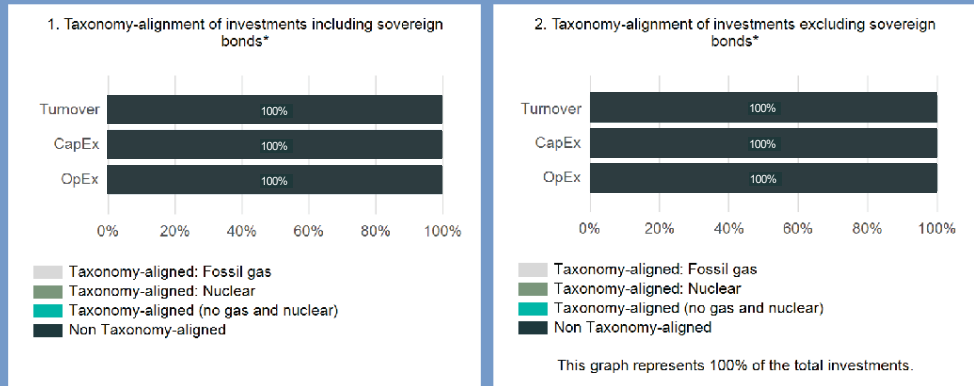

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	987			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);

- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	N/A
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0.52	0.55	0.88

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

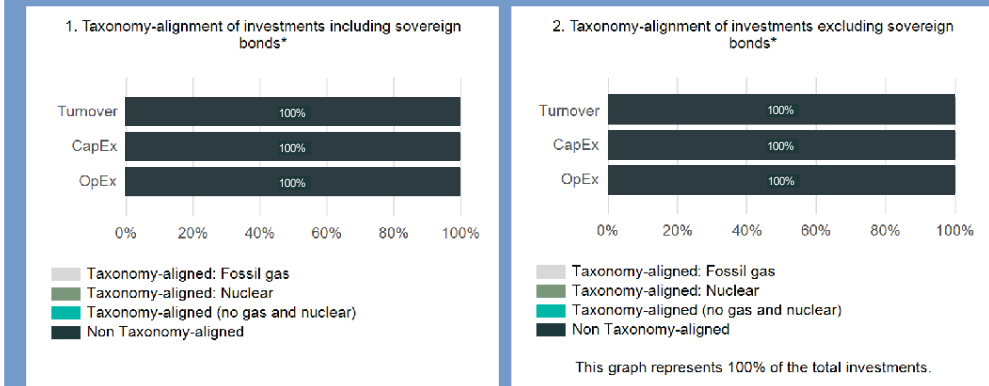

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	997			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Portfolio committed to a minimum of 10% sustainable investments. The Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0

Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 0.95 Benchmark: 1.37	Portfolio: 1.04 Benchmark: 1.27	Portfolio: 0.77 Benchmark: 1.35	N/A
Percentage of companies violating the United Nations Global Compact's ten principles	0	0	0	0
Percentage of issuers with an ESG rating less than or equal to 1. (%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 61 Benchmark: 81	Portfolio: 55.35 Benchmark: 75.80	Portfolio: 45.34 Benchmark: 64.12	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Goldman Sachs Asset Management's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Goldman Sachs Asset Management's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress • Land degradation, desertification, soil sealing • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst this Portfolio has made sustainable investments, it did not take into account the EU criteria for environmentally sustainable economic activities within the meaning of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

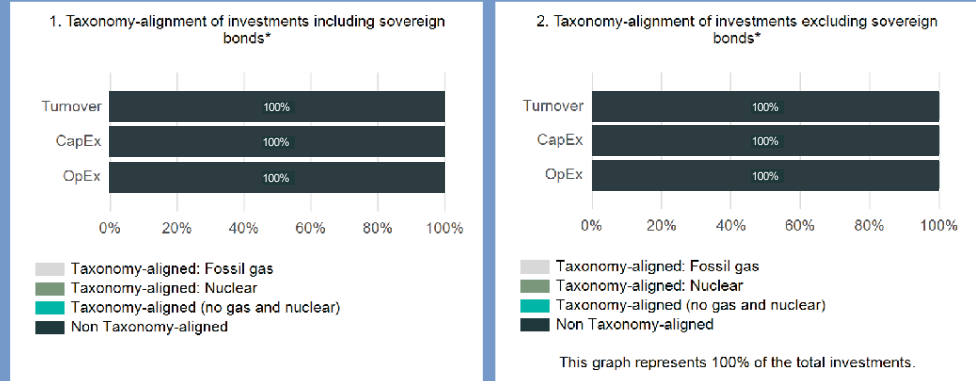

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not commit to any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%.

As noted above, whether investments made by this product were sustainable investments is determined by reference to the Goldman Sachs Asset Management’s Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs US Dollar Short Duration Bond Portfolio

549300KUIWPQGOJ05Y80

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of these characteristics is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/ Benchmark.

The performance of these characteristics is measured by the following:

Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (%)	0	0	0	0
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 0.3 Benchmark: 0.6	Portfolio: 0.29 Benchmark: 0.48	Portfolio: 0.19 Benchmark: 0.45	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1 (%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 89.1 Benchmark: 133.9	Portfolio: 80.55 Benchmark: 135.98	Portfolio: 65.85 Benchmark: 123.06	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector • Emission to water
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Investments in companies without water management policies • Exposure to areas of high water stress • Land degradation, desertification, soil sealing

	<ul style="list-style-type: none"> • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness • Insufficient whistleblower protection • Lack of anti-corruption and anti-bribery • Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery • Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

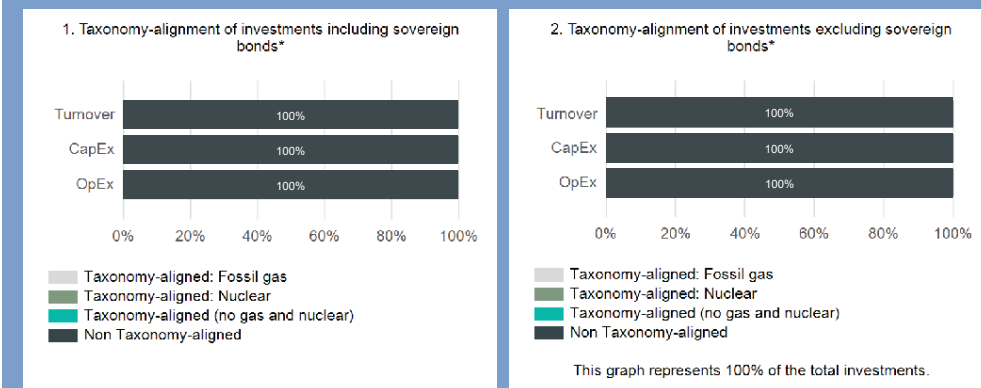

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change(“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	1019			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The performance of this characteristic is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025

Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark) (%)	Portfolio: 0.40 Benchmark: 0.60	Portfolio: 0.43 Benchmark: 0.57	Portfolio: 0.34 Benchmark: 0.43	N/A
Percentage of companies violating the United Nations Global Compact ten principles (%)	0	0	0	0
Percentage of issuers with an ESG rating of less than or equal to 1(%)	0	0	0	0
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 166.0 Benchmark: 253.4	Portfolio: 153.13 Benchmark: 254.69	Portfolio: 141.95 Benchmark: 236.34	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

Largest investments	Sector	% Assets	Country
FEDERAL HOME LOAN MORTGAGE CORPORATION	COLLATERALIZED	10.08%	US
UNITED STATES DEPARTMENT OF THE TREASURY	SOVEREIGN	9.66%	US

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

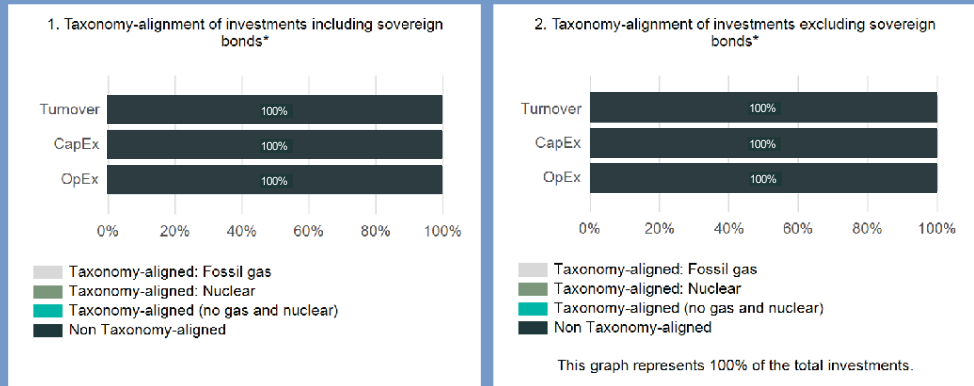

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	1029			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser’s Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.11% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by making no direct investments in transferable securities of companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons;
- production or sale of tobacco;
- adult entertainment;
- for-profit prisons;
- production or sale of civilian firearms;
- extraction of Arctic oil and gas;
- extraction of oil sands;
- extraction, and/or generation of thermal coal;
- gambling-related business activities;
- production and/or distribution of palm oil;
- predatory lending.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities as outlined above).

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

The Portfolio has limited exposure to issuers in which it is directly invested with carbon intensity above a level the Investment Adviser deems appropriate.

The performance of this characteristic is measured by the following: Percentage of direct investments in companies exceeding carbon emissions scope 1 and 2 intensity score (as outlined above).

Additionally, the Portfolio promoted certain environmental and social characteristics by investing in directly held securities and in a portion of assets in certain Permitted Funds disclosing under Article 8 or 9 SFDR managed by an entity affiliated to the Investment Advisor.

The performance of this characteristic is measured by the following: Percentage of investments in directly held securities and in Permitted Funds disclosing under Article 8 or 9 SFDR.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	N/A	N/A	0	0	%
Companies violating the United Nations Global Compact's ten principles	N/A	N/A	0	0	%
Direct investments in companies exceeding carbon emissions scope 1 and 2 intensity score <i>(as outlined above)</i>	N/A	N/A	0	0	%
Investments in directly held securities and in Permitted Funds disclosing under Article 8 or 9 SFDR	78.8	78.4	82.5	84.62	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser’s Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors (“PAIs”) set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio’s investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser’s assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management’s proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector • Share of non-renewable energy consumption and production • Energy consumption intensity per high impact climate sector • Activities negatively affecting biodiversity-sensitive areas • Emissions to water • Hazardous waste and radioactive waste ratio

Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity • Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
-----------------------	--

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 - 30 Nov 2025

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

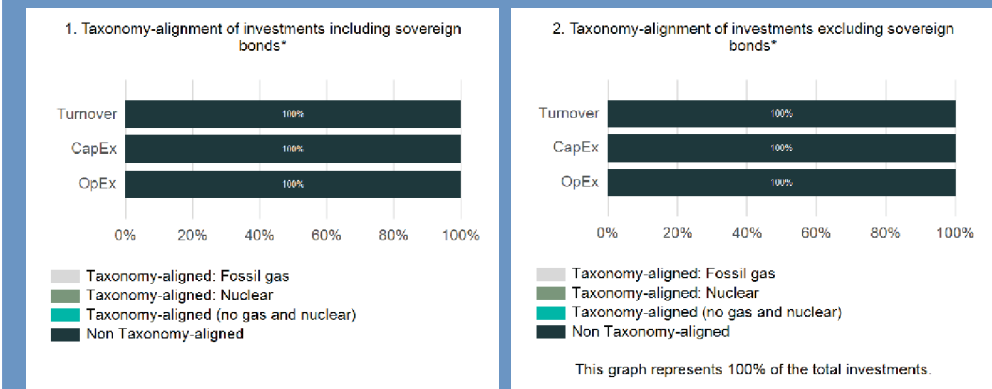

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?*

- Yes
- In fossil gas In nuclear energy
- No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “other” include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds. These investments were typically limited in their use within the long term asset allocation to strategies in which application of ESG policies are not possible (such as alternatives). Other exposure may have also arisen for either efficient portfolio management purposes, such as equitizing cash flows or expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Global Multi-Asset Conservative Portfolio

Legal entity identifier:
5493004KBHAXAZ0SNNZ43

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Portfolio has promoted certain environmental and social characteristics by investing a portion of assets in certain Permitted Funds that: incorporate revenue-based exclusionary thresholds (including, but not limited to, tobacco, gambling, for profit prisons, civilian firearms, weapons, nuclear weapons, controversial weapons, coal extraction, coal generation, and Arctic oil and gas), and/or promote certain ESG themes, and/or environmental and social characteristics including, but not limited to, climate risk, governance, and employee matters.

The performance of this characteristic is measured by the following: Percentage of Net assets allocated to Permitted Funds.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Net assets allocated to Permitted Funds	45.3	70.7	72.7	73.86	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> • GHG emissions • Carbon footprint • GHG intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Board gender diversity
Non-Mandatory Climate PAIs	<ul style="list-style-type: none"> • Emissions of inorganic pollutants • Emissions of air pollutants • Investments in companies without carbon emission reduction initiatives • Water usage and recycling • Land degradation, desertification, soil sealing • Investments in companies without sustainable land/agriculture practices • Deforestation
Non-Mandatory Social PAI	<ul style="list-style-type: none"> • Rate of accidents • Number of days lost to injuries, accidents, fatalities or illness

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds which did not apply environmental, social and governance considerations as part of their investment policy (article 6). These investments may be used broadly as part of the long term asset allocation as well as efficient portfolio management purposes, including equitizing cash flows and expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

	MUTUAL FUND	39.50%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

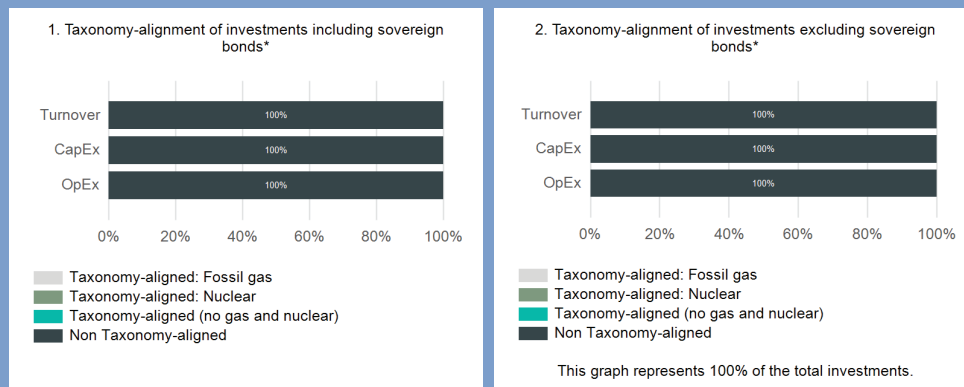

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds which did not apply environmental, social and governance considerations as part of their investment policy (article 6). These investments may be used broadly as part of the long term asset allocation as well as efficient portfolio management purposes, including equitizing cash flows and expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Emerging Markets Total Return Bond Portfolio

Legal entity identifier:
549300VH5ELIKINLO832

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

The performance of this characteristic is measured by the following: Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
Environmental score (E-score) (in relation to the Reference Portfolio/Benchmark)	Portfolio: 2.46 Benchmark: 2.21	Portfolio: 2.47 Benchmark: 1.9	Portfolio: 2.48 Benchmark: 2.16	Portfolio: 2.37 Benchmark: 1.92

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

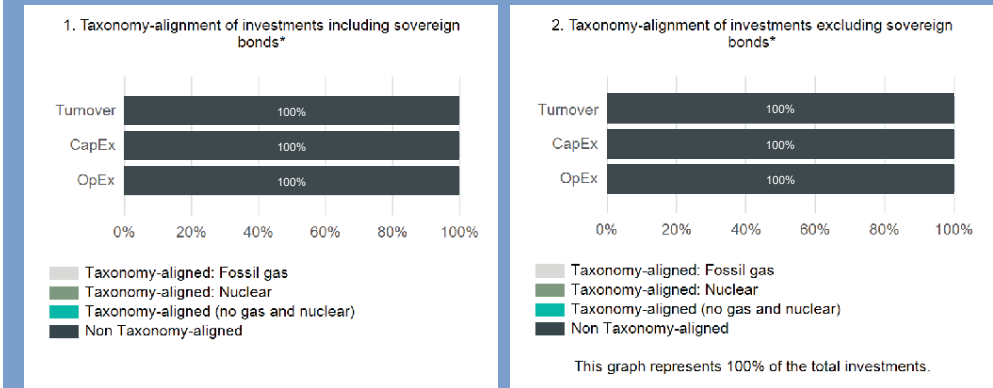

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change(“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	1056			

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the table below (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

- Yes
- In fossil gas In nuclear energy
- No

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

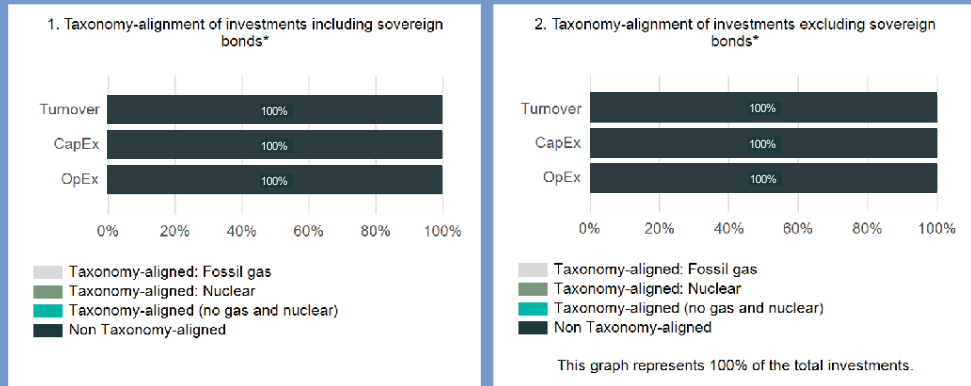

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	1066			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> Yes	<input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: _% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: _%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

From 1 December 2024 - 20 May 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria"). This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- production or sale of civilian firearms.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The performance of these characteristics is measured by the following:

The performance of these characteristics is measured by the following: Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark).

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

The performance of these characteristics is measured by the following: Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO_{2e}/Sales (\$mn)).

From 21 May 2025 - 30 November 2025, the Investment Adviser implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") This consisted of: (i) exclusionary screens; (ii) minimum inclusion criteria based on ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (thermal coal and oil sands);
- production of tobacco.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system and/or sourced from an external data vendor as applicable of less than or equal to 1 (which may include government, corporate, sovereign, supranational and agency issuers, as applicable).

The performance of this characteristic is measured by the following: Percentage of issuers with an ESG rating of less than or equal to 1.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025

Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark) (TCO2e/Sales (\$mn))	Portfolio: 64.0 Benchmark: 168.2	Portfolio: 58.56 Benchmark: 163.19	Portfolio: 58.50 Benchmark: 153.36	N/A

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI CATEGORY	PAI
Mandatory Climate PAI	<ul style="list-style-type: none"> • Green house gas emissions • Carbon footprint • Green house gas intensity of investee companies • Exposure to companies active in the fossil fuel sector
Mandatory Social PAI	<ul style="list-style-type: none"> • Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises • Unadjusted gender pay gap • Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAI	<ul style="list-style-type: none"> • Emissions to inorganic pollutants • Emissions of air pollutants • Investing in companies without carbon emission reduction initiatives • Water usage and recycling • Deforestation

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Dec 2024 – 30 Nov 2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy aligned	N/A	N/A	N/A	N/A
	1076			

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were securities such as cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Investment Adviser's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Investment Adviser has engaged with corporate issuers in this Portfolio that the Investment Adviser believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Investment Adviser is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Investment Adviser has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Investment Adviser is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Investment Adviser believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective ?	
<input checked="" type="radio"/> Yes	<input type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: __% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective: __%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach that incorporates Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consisted of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Portfolio has adhered to the ESG Criteria by making no investments in companies that were, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenue from the following activities:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.

The performance of this characteristic is measured by the following: Percentage of companies invested in that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above).

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The performance of this characteristic is measured by the following: Percentage of companies violating the United Nations Global Compact's ten principles.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. The performance of the sustainability indicators can be found in the below table (See section "...and compared to previous periods").

Over the reference period, the sustainability indicators have performed in line with the environmental and/or social characteristics promoted by the Portfolio.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities <i>(as outlined above)</i>	0	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	<ul style="list-style-type: none"> Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	<ul style="list-style-type: none"> Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any “sustainable investments” within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

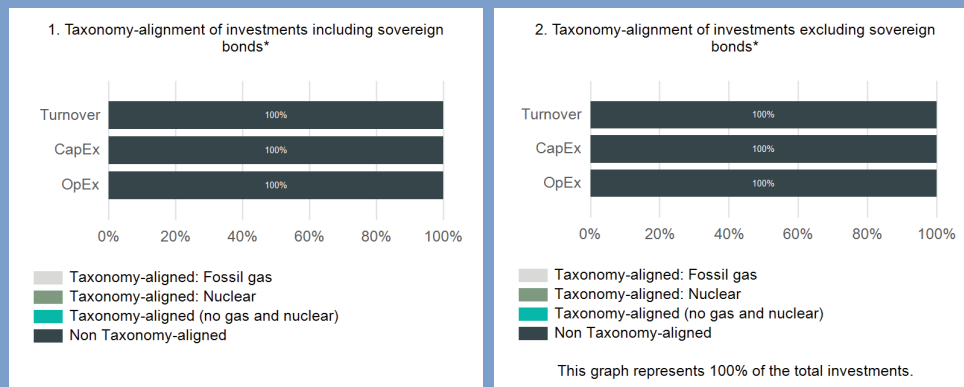

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

as a share of:
 - **turnover** reflecting the share of revenue from green activities of investee companies.
 - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

EU Taxonomy Alignment	November 30, 2022	November 30, 2023	November 30, 2024	November 30, 2025
% EU Taxonomy Aligned	N/A	N/A	N/A	N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it did not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives and cash, allocated at the discretion of the underlying managers. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the investee companies represented in the multi-managed Portfolio was a key part of the investment process. Given the multi-manager Portfolio nature, the Investment Adviser assessed the level of active engagement the external managers had with underlying portfolio companies on ESG issues as reflected in each manager's stewardship resources, activities, and reports. On an annual basis a due diligence questionnaire was sent to underlying managers which included questions focused on engagement activities and their results.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Goldman Sachs Funds Additional Information (Unaudited)

Offering Documents

This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the Fund and does not constitute an offer to buy shares in the Fund. Prior to an investment, prospective investors should carefully read the latest Key Information Document (KID) as well as the offering documentation, including but not limited to the Fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KID and latest annual/semi-annual report are available free of charge from the Fund's paying and information agent and/or from your financial adviser.

Distribution of Shares

Shares of the Fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the Fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

Investment Advice and Potential Loss

Financial advisers generally suggest a diversified portfolio of investments. The Fund described herein does not represent a diversified investment by itself. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them. **An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.**

Past performance does not guarantee future results, which may vary. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of principal may occur.

Index Benchmarks

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

Confidentiality

No part of this material may, without Goldman Sachs' prior written consent, be (i) copied, photocopied or duplicated in any form, by any means, or (ii) distributed to any person that is not an employee, officer, director, or authorised agent of the recipient.

Important information for Swiss Investors
