Goldman Sachs Funds
Investment Adviser's Report
For the Period Ended 31 May 2026

Dear Shareholders:

Enclosed is the report for the six months ended 31 May 2026.

A. Market Review[1]

Macro

In the US, two monthly employment reports were disseminated concurrently in December due to the government shutdown that occurred earlier in October and November. Nonfarm payrolls increased by 64,000 in November, marginally exceeding forecasts. Conversely, payrolls decreased by 105,000 in October; however, this decline was largely influenced by a 162,000 reduction in federal government payrolls.

At the start of 2026, macroeconomic indicators for the US presented a generally encouraging picture, albeit with some nuances. The unemployment rate experienced a modest decline, moving from 4.5% to 4.4%, which suggests nascent signs of stabilisation within the labour market. Nonfarm payrolls, however, increased by 50,000, falling below both the 70,000 expectation and the previous month's gain of 56,000. On the inflation front, the core Consumer Price Index (CPI) delivered another downside surprise.

Escalating tensions between the US and Iran dominated headlines in February, culminating in US and Israeli strikes on Iran on the last day of February, followed by Iranian retaliation. This conflict fuelled strong concerns in energy markets, with oil prices reacting quickly to developments. Another significant development was the US Supreme Court's ruling against President Trump's reciprocal tariffs on 20 February 2026. However, President Trump quickly imposed a new 10% global tariff (under section 122 of the Trade Act of 1974) for 150 days to replace some of the emergency duties.

In March, the US-Iran conflict led to an upward revision of short-term inflation expectations, thereby necessitating projections for increased policy rates across most major developed economies. Investors reassessed the growth inflation mix for the global economy, leading to weaker equity markets and higher bond yields.

April revealed the US economy expanded at a 2% quarter-on-quarter annualised rate in Q1 2026, characterised by a divergence between moderate consumer spending (+1.6%) and a robust 6.2% surge in private investment. Conversely, the Euro Area saw a marginal 0.15% quarter-on-quarter preliminary growth, with outperformance in Germany and Spain offsetting stagnation in France.

While global economic activity remained largely resilient, the impact of surging energy costs was increasingly evident in headline inflation figures. In the US, headline CPI rose 0.87% in April month-on-month, driven by a 21% spike in energy goods, bringing the annual headline CPI rate to 3.3% year-on-year.

The US jobs report for April (released in May) surprised on the upside, with a 115,000 increase in payrolls, the first time since 2024 that payrolls have been above 100,000 in consecutive months. Nevertheless, continued uncertainty around the Middle East conflict weighed further on business surveys in Europe.

Monetary Policy

Amid a gradually increasing unemployment rate, the US Federal Reserve (the Fed), as anticipated, opted to reduce its policy rate by 25bps during its December FOMC meeting. A couple of FOMC members dissented during the December meeting, citing inflation persistently above the target level. The European Central Bank (ECB) maintained its policy rate, as widely anticipated. In the UK, the Bank of England (BoE) cut the policy rate by 25bps, as expected, with a vote split of 5-4.

The Federal Open Market Committee (FOMC) left policy rates unchanged in its January meeting. The post-meeting statement upgraded economic growth from ″moderate″ to ″solid″. Signs of improvement in growth coupled with around target inflation reinforced the ECB's stance that monetary policy was in a good place.

February saw investors dial back the likelihood of an H1 rate cut from the Fed as market started pricing in higher inflation from supply driven oil shock. By the end of February, the probability of a rate cut by the June meeting had fallen from 87% to 64%. In the Eurozone, inflation was reported at 1.7% and core inflation at 2.2%. The ECB also decided to keep its three key interest rates unchanged on 5 February, marking the fifth consecutive meeting with this outcome.

In March, the FOMC maintained the federal funds rate at 3.5%–3.75% at its March meeting. The Committee's Summary of Economic Projections (SEP) continued to signal one rate cut for 2026, while Chair Powell, in a moderated discussion at Harvard, emphasised a ″wait-and-see″ approach, noting that the Fed typically "looks through″ temporary oil price shocks as long as inflation expectations remain anchored. The European Central Bank also left rates unchanged, with staff projections revising 2026 inflation upward to 2.6% due to energy costs while lowering growth expectations to 0.9%.

The Fed, ECB, BoE and Bank of Japan (BoJ) all left rates unchanged in April, maintaining a wait-and-see approach to assess the impact of supply chain disruptions and higher energy prices on growth-inflation dynamics. However, unlike the FOMC and Bank of Canada (BoC), President Lagarde highlighted that the ECB's Governing Council had debated the decision to possibly hike.

May revealed the FOMC's April meeting minutes, which highlighted upside risks to inflation and the potential need for tighter monetary policy if inflation remains persistently above 2%. Most participants saw the recent labour market data as consistent with stabilisation but still judged risks to employment as skewed to the downside. In Asia, BoJ Summary of Opinion from April meeting signaled that most members pointed to the necessity of a rate hike. However, members were divided on the timing of hike.

Bond Markets

The US 10-year Treasury yield reached its peak on 12 December following the FOMC Meeting. It subsequently receded, concluding the month with a net increase of 13bps to 4.15%. The Japanese 10-year yield advanced by 25bps, extending a broader trend of increasing Japanese government bond yields observed throughout the year. Regarding European yields, the German 10-year yield rose by 16bps, while UK 10-year yields increased by 3bps.

In January, the US 10-year Treasury yield rose by 9 bps to 4.24%, climbing to its highest level since September 2025. JGB 10Y yield reached its highest since 1999, closing at 2.35% on 20 January as well, before ending the month at 2.24%. Global sovereign bonds generally delivered strong performance in February as yields fell across major markets. The US 10-year Treasury yield dipped below 4% with yields declining by 28bps. AI driven business model disruption and concern around private credit weighed on US credit market with spread widening across credit ratings.

March saw the US 10-year Treasury yield increase by 48 bps as higher oil and energy prices stoked inflation concerns. However, yields subsequently declined so that the 10Y yield concluded the month at 4.31%, representing an increase of 35 bps for the entire month. Concurrently, Japanese 10-year yields increased too, and ended the month up 25 bps. In Europe, UK 10-year gilt yields saw a notable increase of 64 bps. German 10-year yields also experienced an increase, rising by 40 bps over the month.

Bond yields rose across most developed economies in April as elevated energy prices drove inflation expectations higher. The US 10-year Treasury yield increased by 8bps to 4.39% while the German 10Y yield was flat around 3%. Bond yields continued to rise in the first half of May across most developed economies as elevated energy prices drove inflation expectations higher, though there was some relief over the last few days of the month, driven by multiple reports suggesting that a US-Iran deal might be moving closer.

Equity Markets

Global equity markets experienced a modest appreciation in December. Emerging market equities outperformed developed markets, with Korean equities posting double-digit gains. Within developed markets, US large-cap equities remained flat, while Europe and Japan experienced gains.

Stocks started the year with volatile but strong performance globally as economic activity data continued to remain healthy across most economies, labour markets held up well, and inflation remained contained. Early in the month, the capture of Venezuelan President Nicolás Maduro by US forces raised questions about global oil supply, given Venezuela's vast reserves. While this caused some concern, the broader market reaction, outside of Venezuelan assets and certain US oil companies, remained limited.

February was a challenging month for tech stocks (software in particular), with the Magnificent 7 (-7.3%) posting its biggest decline since last March. Several factors contributed to that, but the release of various new AI tools played a key role. The US-Iran conflict, which commenced in late February and subsequently led to the closure of the Strait of Hormuz, precipitated a significant global equity sell-off in March. The resultant surge in energy prices, fuelled by concerns regarding energy infrastructure damage and supply disruptions via the Strait of Hormuz, fostered expectations of decelerated global economic growth and elevated inflationary pressures, particularly pronounced in European and Asian markets.

Equities across regions rallied in April the ceasefire of the Iran war brought some relief to the global markets with the Strait of Hormuz partially opening. The S&P 500 had its best monthly performance since November 2020, while the Philly semiconductor index had its best performance since February 2000, the month before the dot com bubble burst. Within EMs, Korean equities demonstrated significant outperformance

In May, equities across regions again showed decent performance amid prevailing uncertainty around a US-Iran deal and re-opening of the Strait of Hormuz. In the US, the technology sector emerged as the top performer, appreciating by 20% on the back of strong Q1 earnings growth, while energy and utilities sectors were the weakest.

Goldman Sachs Asset Management International

June 2026

All index returns are shown with income re-invested and, in contrast to the Share Classes, without the deduction of any fees or expenses. Returns of the Share Classes are shown net of fees and expenses and after the reinvestment of dividends where applicable using month end NAVs. For Share Classes where performance is shown relative to the index, it is for comparative purposes only. Reference to these benchmarks does not imply that the Share Classes will achieve returns, volatility or other results similar to the benchmark.

Goldman Sachs Funds
Notes to the Financial Statements
For the Period Ended 31 May 2026

1 Organisation

Goldman Sachs Funds (the "Fund") was incorporated on 5 November 1992 under the laws of the Grand Duchy of Luxembourg as a "Société d'Investissement à Capital Variable" ("SICAV"), for an unlimited period of time. The Fund is registered in accordance with the Law of 17 December 2010, as amended and has appointed Goldman Sachs Asset Management B.V. ("GSAMBV") to be its Management Company. GSAMBV is authorised and regulated by the Dutch Authority for the Financial Markets (AFM), and is a wholly owned subsidiary of The Goldman Sachs Group, Inc.

Refer to Note 6 for details of functions the Management Company has delegated.

The Fund has appointed State Street Bank International GmbH, Luxembourg Branch (the "Depositary") to act as the Depositary of the Fund's assets.

As at 31 May 2026, the Fund is comprised of fifty-seven different portfolios ("the Portfolios").

As at 31 May 2026, the Fund offered shares in the Portfolios as detailed in Report of the Management Company I.

Please refer to Report of the Management Company II for Portfolios that were launched, merged or closed during the period.

Goldman Sachs India Equity Portfolio (the "India Equity Portfolio") previously invested through a wholly-owned special purpose subsidiary Goldman Sachs India Limited (the "Subsidiary"), a private company incorporated in Mauritius with limited liability. The Subsidiary is administered by Intercontinental Trust Limited, based in Mauritius. Intercontinental Trust Limited has sub-delegated the administration function to State Street Bank International GmbH, Luxembourg Branch. The investments which were held by the Subsidiary for and on behalf of the India Equity Portfolio were transferred away from the Subsidiary for them to be then held directly by the India Equity Portfolio. The transfer was completed on 7 October 2021 (the "Transfer Date") and as of 31 May 2026, no investment of the India Equity Portfolio is held through the Subsidiary.

The India Equity Portfolio's continued ability to invest in India is dependent on it continuing to meet current and future requirements placed on foreign institutional investors by the Securities and Exchange Board of India. If the India Equity Portfolio (or the Investment Adviser) were to fail to meet applicable requirements in the future, the India Equity Portfolio would no longer be permitted to invest directly in Indian securities, may not be able to pursue its principal strategy and may be forced to liquidate.

Goldman Sachs India Limited (the "Subsidiary") appointed a liquidator on 22 November 2022 and commenced the process of liquidation. The final meeting of the liquidator was held on 23 February 2026, and the Subsidiary has now been formally dissolved. The liquidation and dissolution of the Subsidiary did not result in any significant disruption to the operational activities of Goldman Sachs India Equity Portfolio.

3 Significant Accounting Policies

(a) Basis of Preparation of Financial Statements

The financial statements of the individual Portfolios are presented in their base currency while the Combined Total of all the Portfolios is presented in United States Dollars. The Board of Directors considers that the Portfolios' base currency most accurately represents the economic effects of the underlying transactions, events and conditions of the Portfolio.

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

The preparation of financial statements requires the Board of Directors to make estimates and assumptions that may affect the amounts reported in the financial statements and accompanying notes. Refer to the Statement of Assets and Liabilities and Note 4 where the Board of Directors was required to make certain estimates and assumptions to determine value. Actual results may differ from those estimates.

In accordance with the Prospectus, Shareholders' Equity as at 29 May 2026 reflect all capital and securities transactions received up until 28 May 2026 for all Portfolios of the Fund. By way of information, if the Fund had calculated the Shareholders' Equity solely with a view to publication, all the capital and securities transactions received up until 29 May 2026 would have been included in the Shareholders' Equity as at 29 May 2026.

(b) Investment Transactions, Related Investment Income and Operating Expenses

Realised gains and losses are based on the Weighted Average Cost Method. Dividend income and dividend expense are recorded on the ex-dividend date and interest income and interest expense are accrued over the life of the investment. Interest income includes accretion of market discount, original issue discounts and amortisation of premiums and is recorded into income over the life of the underlying investment. Interest income and dividend income are recognised on a gross basis before withholding tax, if any.

Operating expenses are recognised on an accrual basis.

(c) Transaction Costs

Transaction costs are recognised in the Statement of Operations as part of net change in unrealised gain/(loss) on investment securities and net realised gain/(loss) on investment securities. Depositary based transaction costs are included in 'Depositary fees' in the Statement of Operations.

Transaction costs for fixed income investments, forward currency contracts and other derivative contracts are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio.

(d) Financial Investment in Securities and Valuation

i. Recognition and Derecognition

The Portfolios recognise financial assets and financial liabilities on the date they become a party to the contractual provisions of the investment. Any gains and losses arising from changes in value of the financial assets or financial liabilities are recorded in the Statement of Operations.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Portfolio has transferred substantially all risks and rewards of ownership.

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles

The value of all securities and derivatives is determined according to the following policies:

(ii.1) Exchange Listed Assets and Liabilities

The value of exchange traded financial investments, including transferable securities admitted to an official exchange listing or dealt in on any other regulated market that operates regularly, which comprise Common Stocks, Bonds, Real Estate Investment Trusts, Rights, Warrants, Mutual Funds, Preferred Stocks, Options and Futures Contracts, are valued based upon quoted market prices at the period end date without any deduction for estimated future transaction costs.

(ii.2) Debt Securities

Debt securities, comprising Bonds, Non-Agencies Asset Backed Obligations and Agencies Asset Backed Obligations, are valued at mid or bid depending on fund methodology, by third party service providers without any deduction for estimated future transaction costs.

Included within debt securities are mortgage-backed security To Be Announced ("TBA") commitments. These commitments reflect future dated purchases and sales of agency Mortgage Backed Securities ("MBS"). Certain Portfolios use these forward commitments to efficiently manage exposure to MBS. In addition, certain Portfolios may enter into "Dollar Roll" transactions, principally using TBAs, in which the Portfolios commit to simultaneously sell and repurchase MBS for delivery in future months. The Portfolios must maintain liquid securities having a value not less than the repurchase price (including accrued interest) for such forward commitments. The market value of the securities that the Portfolios are committed to purchase may decline below the agreed upon purchase price of those securities.

When a debt security has been identified as being in default, the interest accrual on the defaulted security may be stopped, and upon confirmation from relevant parties, the amount receivable may be written off.

(ii.3) Certificates of Deposit and Money Market Investments

Certificates of Deposit, Time Deposits, Commercial Papers and Money Market Investments are valued at mid by third party service providers, or where such pricing service is unavailable, at amortised cost which approximates market value.

(ii.4) Shares in Collective Investment Schemes

The value of investments in open-ended investment funds, comprising Mutual Funds, are valued based upon the official net asset value per share (″NAV″) as at the last available date as supplied by the funds, in accordance with the valuation policy of the applicable fund as outlined in its prospectus. In cases where the most recent available NAV is not deemed representative of their fair value, the valuation is determined by the valuer and any significant changes or events that may have occurred after the latest available NAV is considered.

As at period-end, there are no investments in Collective Investment Schemes that have been valued by the valuer.

(ii.5) Derivatives

A derivative is an instrument whose value is derived from an underlying instrument, index reference rate or a combination of these factors. Derivative instruments may be privately negotiated contracts which are often referred to as over the counter ("OTC") derivatives or they may be listed and traded on an exchange. Derivative contracts may involve future commitments to purchase or sell financial instruments or commodities at specified terms on a specified date, or to exchange interest payment streams or currencies based on a notional or contractual amount.

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles (Continued)

(ii.5) Derivatives (Continued)

Derivative contracts are stated at market value and recognised as assets and liabilities in the Statement of Assets and Liabilities. Gains and losses resulting from the change in the market value are reflected in the Statement of Operations as a component of net change in unrealised gain/(loss). Realised gains or losses are recorded on termination or from periodic cash flow payments.

(ii.5) (a) Option Contracts

The Portfolios may enter into exchange traded and OTC option contracts with various counterparties. When the Portfolio purchases an option, an amount equal to market value which is based on the premium paid is recorded as an asset, the value of which is marked-to-market daily. When the Portfolio writes an option, an amount equal to market value which is based on the premium received by the Portfolio is recorded as a liability and is adjusted to the market value of the option written on each valuation date.

When options are closed, the difference between the premium and the amount paid or received, net of brokerage commissions, or the full amount of the premium if the option expires worthless, is treated as realised gain or loss. The exercise of an option written by the Portfolio could result in the Portfolio buying or selling a financial instrument at a price different from the current market value.

The fair value of an OTC contract is determined by using counterparty supplied valuations, an independent pricing service or valuation models which use market data inputs supplied by a third party pricing service, and is typically valued at mid. Exchange traded options are valued based on the exchange settlement/last sale prices, or, if the last settlement price is not available for any reason, at the midpoint of the bid and ask prices (or, in the absence of two-way trading, at the last bid price for long positions and the last ask price for short positions), or independent market quotes provided by a pricing service or counterparty.

(ii.5) (b) Futures Contracts

Futures contracts are contracts to buy or sell a standardised quantity of a specified commodity, security or index and are valued based on exchange settlement/last sale prices, last bid or ask prices on the exchange, or independent market quotes. Initial margin deposits, in either cash or securities, are required to trade in the futures market. Unrealised gains or losses on futures contracts are recognised to reflect the market value of the contracts and are included as a component of the unrealised gains or losses on the Portfolio's Statement of Operations. Variation margin is received or paid, depending on whether unrealised gains or losses are incurred. When the contract is terminated, the Portfolio will recognise a realised gain or loss equal to the difference between the value of the contract at the time it was entered into and the time it was closed.

(ii.5) (c) Swap Contracts

Swaps, comprising Interest Rate Swaps, Credit Default Swaps and Total Return Swaps, can be linked to any number of underlying investments and indices, and swap terms can vary greatly. Cash flows are exchanged based on the underlying. Upfront payments, which represent a risk premium, are amortised or accreted over the contract term. Swap agreements are carried at market value, typically valued at mid, and the value of the swap agreement is based on a counterparty provided price, third party pricing service or valuation model. The model considers various inputs including the market value of the underlying, the risks associated with the underlying and the specific terms of the contract. In connection with these agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. This collateral or margin is primarily denominated in base currency, and is paid from the custody account to the broker.

For the period ended 31 May 2026, all collateral in relation to total return swaps was pledged in the form of cash. Please refer to Note 13 for cash collateral information and to Report of the Management Company III for more information.

3 Significant Accounting Policies (Continued)

(d) Financial Investment in Securities and Valuation (Continued)

ii. Value Measurement Principles (Continued)

(ii.5) Derivatives (Continued)

(ii.5) (c) Swap Contracts (Continued)

Total return swaps and more specifically OTC derivative transactions are entered into by the Portfolio under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Portfolio and a counterparty that governs OTC derivative transactions (including total return swaps) entered into by the parties.

All returns from OTC derivative transactions will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

(ii.5) (d) Forward Foreign Currency Contracts

In a forward foreign currency contract, the Portfolio agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. Purchases and sales of forward foreign currency contracts having the same notional value, settlement date and counterparty and right to settle net are generally offset (which result in a net foreign currency position of zero with the counterparty) and any realised gains or losses are recognised.

Forward foreign currency contracts are valued at mid by third party pricing service providers.

(ii.5) (e) Covered Forward Mortgage Backed Securities

Covered forward mortgage backed securities represents TBA sales covered by long Federal National Mortgage Association positions, and are typically valued at mid.

(ii.6) All Securities and Derivatives

If a quoted market price is not available from a third party pricing service or a dealer, or a quotation is believed to be materially inaccurate, the market value of the investment is determined by using valuation techniques. Valuation techniques include the use of recent market transactions, reference to the current market value of another investment that is substantially the same, discounted cash flow analyses or any other techniques that provides a reliable estimate of prices obtained in actual market transactions. Such securities and derivatives shall be valued at their fair value as determined by the Valuer. Please refer to Note 4 for further details.

The investments have been valued in accordance with Luxembourg generally accepted accounting principles that may require the use of certain estimates and assumptions to determine value. Although these estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Refer to Note 4 for securities where the Valuer was used to determine fair value.

(e) Cash

Cash is valued at cost, which approximates market value.

(f) Due from/to Brokers

Due from brokers consists primarily of cash receivable for collateral from the Portfolios' clearing brokers and various counterparties. Due to brokers consists primarily of cash payable for collateral to the Portfolios' clearing brokers and various counterparties.

Due from/to brokers balances are valued at cost, which approximates market value. Refer to Note 13 for further details.

3 Significant Accounting Policies (Continued)

(g) Foreign Currency Translation

The books and records of all Portfolios are maintained in their base currency. Please refer to Report of the Management Company I for the base currency of each Portfolio. Transactions in foreign currencies are translated at the foreign currency exchange rate in effect at the date of the transaction. Assets and liabilities denominated in foreign currencies are translated into base currency at the foreign currency closing exchange rate in effect at the period end date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of assets and liabilities are recognised in the Statement of Operations. Foreign currency exchange gains or losses relating to investments, derivative financial investments, and all other foreign currency exchange gains or losses relating to monetary items, including cash and cash equivalents, are reflected in the net realised gain/(loss) or net change in unrealised gain/(loss) in the Statement of Operations.

(h) Expenses

Expenses incurred by the Fund that do not specifically relate to an individual Portfolio or Share Class of the Fund are allocated to the Portfolios based on an allocation basis that depends upon the nature of the charges. Expenses directly attributable to a Portfolio or Share Class are generally charged to that Portfolio or Share Class.

(i) ″Snap" and "Close" Valuation

In the case of certain Portfolios, the Fund may decide to issue Share Classes which have different Valuation Points, termed "snap" and "close", where the "snap" Valuation Point takes a value at a time other than at market close and "close" takes the value based on market closing prices. In consequence, the net asset values and performance per share of such Share Classes are expected to differ from each other as a result of the application of different Valuation Points.

For the period ended 31 May 2026, such "snap" and "close" Share Classes as described above are applicable to:

- Japan Equity Partners Portfolio
- Japan Equity Portfolio
- Emerging Markets CORE® Equity Portfolio
- Global CORE® Equity Portfolio
- Global Small Cap CORE® Equity Portfolio
- US CORE® Equity Portfolio
- US Small Cap CORE® Equity Portfolio

The Statement of Assets and Liabilities, the Statement of Operations, the Statement of Changes in Shareholders' Equity and the Schedules of Investments have been presented using prices as of "snap" of all markets as of 31 May 2026. If the Schedules of Investments, the Statement of Assets and Liabilities, the Statement of Operations and the Statement of Changes in Shareholders' Equity were to be presented using the "close" prices, then the total market value and the Shareholders' Equity would vary as follows:

		Market Value of Investments and Foreign Currencies including Unrealised Gain/(Loss) on Futures			Shareholders' Equity			
Portfolios	Currency	Snap	Close	Variation	Snap	Close	Variation	Percentage Variation
Japan Equity Partners Portfolio*	JPY	396,344,607	396,490,578	145,971	406,186,230	406,332,201	145,971	0.04%

(j) Income Equalisation Arrangements

Income equalisation arrangements may be applied in some or all of the Portfolios of the Fund. Where they are applied, these arrangements are intended to ensure that the income per share which is distributed or deemed distributed in respect of a distribution period is not affected by changes in the number of shares in issue during that period, and the amount of the first distribution received by a Shareholder in an impacted Portfolio following the purchase of shares in that Portfolio will represent partly participation in income received by the Portfolio and partly a return of capital (the "equalisation amount"). The equalisation amounts are included within the proceeds from shares issued and the payment for shares redeemed in the Statements of Changes in Shareholders' Equity.

(k) Swing Pricing

On any Business Day the Management Company in consultation with its appointed delegate, Goldman Sachs Asset Management International ("GSAMI") as Investment Adviser, in conformity with guidelines established by the Board of Directors, may determine to apply swing pricing (to include such reasonable factors as they see fit) to the net asset value per share. This method of net asset value calculation is intended to pass the estimated costs of underlying investment activity of the Portfolio to the active Shareholders by adjusting the net asset value of the relevant share and thus to protect the Portfolio's long-term Shareholders from costs associated with ongoing redemption and subscription activity. This is processed as a capital adjustment.

Swing pricing may take account of trading spreads on the Portfolio's investments, the value of any duties and charges incurred as a result of trading and may include an estimate of market impact. Where GSAMI, based on the prevailing market conditions and the level of subscriptions or redemptions requested by Shareholders or potential Shareholders in relation to the size of the relevant Portfolio, have determined for a particular Portfolio to apply swing pricing, the Portfolio's net asset value may be valued either on a bid or offer basis.

Because the determination of whether to value the Portfolio's net asset value on a bid or offer basis is based on the net transaction activity of the relevant day, Shareholders transacting in the opposite direction of the Portfolio's net transaction activity may benefit at the expense of the other Shareholders in the Portfolio. In addition, the Portfolio's net asset value and short-term performance may experience greater volatility as a result of this swing pricing.

Investors should be aware that, the factor used to apply swing pricing ("swing factor") will under normal conditions not exceed 2% of the net asset value per share of the relevant Share Class of the Portfolio, unless otherwise stated in the relevant Supplement. Notwithstanding the above, where exceptional circumstances (including, but not limited to, widening bid-offer spreads often as a result of high market volatility and/or illiquidity, exceptional market conditions or market disruptions) the Management Company, in consultation with the Board of Directors, may decide, in the best interest of Shareholders and in respect of any particular Portfolio and on any Business Day, to apply a swing factor which is above 2%. Shareholders will be informed of such decision via a notice and/or a publication posted on www.gsam.com. The swing factor applied to individual Portfolios will be reviewed by the Investment Adviser on a periodic basis in order to verify their appropriateness in light of prevailing market conditions.

4 Valuation Determined by the Valuer

The Valuer is appointed by the Management Company. The Valuer also has direct responsibilities to the Board of Directors for certain valuation functions, which are ultimately reflected in the financial statements. The Valuer during the period ended 31 May 2026 was Goldman Sachs & Co. LLC and the valuation function was performed by Goldman Sachs Controllers Division ("Controllers").

The following table sets forth the assets where the Valuer was used to determine the fair value as at 31 May 2026:

Securities traded on certain Asia Pacific/Middle Eastern exchanges may utilise international equity adjusted prices provided by an independent third party pricing service in order to more accurately reflect the value of securities traded on markets which are closed at the valuation point.

The independent valuation service takes into account multiple factors including, but not limited to, movements in the securities markets, certain depositary receipts, futures contracts and foreign currency exchange rates that have occurred subsequent to the close of the foreign securities exchange. These investments are not included in the above table.

5 Taxation

Taxation – Luxembourg

The Fund is not liable for any Luxembourg tax on profits or income. However, the Fund is liable in Luxembourg to an annual subscription tax (taxe d'abonnement) of 0.05% per annum. The taxable basis of the subscription tax is the aggregate net assets of the Fund as valued on the last day of each quarter. This rate is however 0.01% per annum for each of the following:

- undertakings whose exclusive object is the collective investment in money market instruments and the placing of deposits with credit institutions;
- undertakings whose exclusive object is the collective investment in deposits with credit institutions; and
- individual compartments of undertakings for collective investment ("UCI") with multiple compartments referred to in the law dated 17 December 2010, as amended, as well as for individual classes of securities issued within a UCI or within a compartment of a UCI with multiple compartments, provided that the securities of such compartments or classes are reserved to one or more institutional investors.

Taxation – Belgium

The Fund may incur a liability to subscription tax at the rate of 0.0925% in respect of subscriptions made through intermediaries situated in Belgium to the extent that net shares are outstanding as of 31 December of the previous year.

Taxation – Subsidiary

The Governments of India and Mauritius signed a protocol on 10 May 2016 by virtue of which capital gains on all Indian investments made until 31 March 2017 would continue to be exempt from Indian tax under the India-Mauritius Treaty, irrespective of when they are sold. Short term capital gains arising on sale of equity shares sold on or after and from 1 April 2019 are taxable at the full capital gains tax rate as per the Indian tax laws. Long term capital gains were exempt up till March 2018 provided they were traded on the recognised stock exchange in India and suffered securities transaction tax. With effect from April 2018, these have been made taxable at the applicable rates provided under the India tax laws.

5 Taxation (Continued)

Taxation – Subsidiary (Continued)

The investments which were held by the Mauritius Subsidiary were transferred to be held directly by the India Equity Portfolio - LUX entity. The transfer was completed on 7 October 2021 and as of 31 May 2026, no investment of the India Equity Portfolio is held through such Subsidiary. As at 22 November 2022, the Subsidiary has appointed a liquidator and commenced the process of liquidation. It is not expected to cause any significant disruption to the operational activities of Goldman Sachs India Equity Portfolio. The final meeting of the liquidator was held on 23 February 2026 with dissolution expected in Q2 2026.

Taxation – General

Each Portfolio may be subject to taxation on capital gains, interest and dividends in certain jurisdictions in which each Portfolio invests. It is the policy of each Portfolio to accrue for any such taxes on dividends and interest when the dividend is declared, interest is earned or capital gains are realised. At each valuation date, taxation on realised and unrealised appreciation of securities may be accrued for at statutory rates.

Prospective investors should consult their own taxation advisers regarding the tax implications of investing in the Fund in relation to their own individual circumstances as they may differ from the general statements that appear above.

6 Significant Agreements and Related Parties

Management Company

As outlined in Note 1, the Fund appointed GSAMBV, a wholly-owned subsidiary of The Goldman Sachs Group, Inc., as its Management Company.

The Portfolios pay the Management Company an annual fee which shall be accrued daily and generally paid monthly in arrears.

Investment Adviser and Investment Sub-Advisers

The Management Company has appointed GSAMI (the "Investment Adviser"), a related party to the Fund, as its delegate to provide portfolio management services.

GSAMI has entered into sub-delegation agreements with each of the following affiliated Investment Sub-Advisers:

- Goldman Sachs Asset Management LP
- Goldman Sachs Asset Management (Hong Kong) Ltd.
- Goldman Sachs Asset Management (India) Private Limited
- Goldman Sachs Asset Management (Singapore) Pte Ltd.
- Goldman Sachs Asset Management Co. Ltd.
- Goldman Sachs Hedge Fund Strategies LLC
- Goldman Sachs International

GSAMI has entered into sub-advisory agreements with each of the following external Investment Sub-Advisers ("the External Managers"):

Portfolios	External Managers*
Multi-Manager Dynamic World Equity Portfolio	Artisan Partners UK LLP Bell Asset Management Ltd. Eagle Capital Management LLC WCM Investment Management

* None of these investment advisers are an affiliate of GSAMI. As compensation for the services rendered under the Investment Advisory Agreement, GSAMI receives a fee, payable monthly, at an annual rate. A portion of the Investment Adviser's fees may be remitted to the Investment Sub-Adviser.

6 Significant Agreements and Related Parties (Continued)

Expense Cap

GSAMI has voluntarily agreed to limit total expenses in respect of certain Portfolios and certain Share Classes. Therefore, to the extent that total ordinary expenses would exceed the expense cap, GSAMI has voluntarily agreed to bear any actual operating expenses that exceed any expense cap, either directly by waiving a portion of its fees or by reimbursement to the account of the relevant Share Class. The Investment Adviser may, in its sole discretion, designate which expenses of the Fund will be subject to any such expense cap imposed by the Investment Adviser. The expense cap does not include the GSAMI fee portion paid to external Investment Sub-Advisers. There is no guarantee that the existence or level of these expense caps will continue in the future and no obligation on the part of GSAMI to agree to limit total expenses in this way. In addition, the Portfolios are not obliged to reimburse GSAMI for prior financial year expense reimbursement, if any.

Details of advisory fee rates and the expense caps as at 31 May 2026 are detailed in Report of the Management Company I.

Performance Fees

GSAMI is entitled to a performance fee on certain Portfolios. For the Emerging Markets Total Return Bond Portfolio the performance fee accrues daily and is paid annually out of the assets attributable to each Share Class of the Portfolio. The performance fee is equal to 15% of the amount by which the Class NAV per share exceeds such Class' Benchmark Value per share, as defined within the Prospectus.

For the Global Strategic Macro Bond Portfolio the performance fee accrues daily and is paid annually out of the assets attributable to each Share Class of the Portfolios. The performance fee is equal to 10% of the amount by which the Class NAV per share exceeds such Class' Benchmark Value per share, as defined within the Prospectus.

For all the remaining Portfolios, there were no transactions with Goldman Sachs Affiliates, for the period ended 31 May 2026.

All such transactions, including those with Goldman Sachs Affiliates, were entered into in the ordinary course of business and on normal commercial terms.

Securities Lending

The securities lending agent is Goldman Sachs Agency Lending ("GSAL"), an affiliate of Goldman Sachs. Approved borrowers of GSAL may include Goldman Sachs International ("GSI"), an affiliate of the Investment Adviser, as well as other third parties. The Portfolios may lend portions of investments to third parties. In return, the Portfolios receive a fee that is negotiated for each transaction. The Portfolios receive G-10 (excluding Italy, Japan and the United States) government securities as collateral against the securities loaned. G-10 is made of eleven industrial countries (Belgium, Canada, France, Germany, Italy, Japan, the Netherlands, Sweden, Switzerland, the United Kingdom and the United States) which consult and co-operate on economic, monetary and financial matters. This collateral is maintained over the life of the loan for an amount not less than 105% of the value of lent securities, with any subsequent margin posted in the form of the aforementioned government securities or cash. In general, loans may be effected through the intermediary of prime financial institutions that specialise in such activities and in the way specified by them.

Collateral received by Portfolios in the form of G-10 (excluding Italy, Japan and the United States) government securities or cash, denominated in their respective currencies, is held by the appointed tri-party collateral manager in segregated accounts.

The following summarises the securities lent as at 31 May 2026 and the income earned by each Portfolio and the fees earned by Securities Lending Agent that is part of the Securities Lending program:

8 Distributions

The Fund intends that substantially all the net investment income, if any, of each Portfolio will be declared as a dividend and paid at least annually to the Shareholders of the Distribution Share Classes of the Portfolios. Net capital and currency gains realised on each Portfolio's investments and/or capital attributable to certain Share Classes may also be distributed to Shareholders of certain Distribution Share Classes of the Portfolios.

Generally no distributions will be made in respect of the Accumulation Share Classes.

Please refer to the Prospectus for further details about distribution policies.

9 Financial Investments and Associated Risks

The Fund's investing activities expose it to various types of risks that are associated with the financial investments and markets in which it and its underlying Portfolios invest (the "Investment Risks"). The Board of Directors has appointed the Management Company to be responsible for, among other things, investment management and risk management. The Management Company has delegated certain investment management functions to the Investment Adviser.

The main types of financial risks which the Fund is exposed to are market risk, liquidity risk and credit risk. The Prospectus provides details of these and other types of risk some of which are additional to that information provided in these financial statements.

The risk management policies employed in relation to the Fund are outlined below.

(a) Market Risk

The potential for changes in the market value of the Fund's underlying Portfolios' investments is referred to as market risk. Commonly used categories of market risk include currency risk, interest rate risk and other price risk.

(i) Currency risks may result from exposures to changes in spot prices, forward prices and volatilities of currency rates.

(ii) Interest rate risks may result from exposures to changes in the level, slope and curvature of the various yield curves, the volatility of interest rates, mortgage prepayment speeds and credit spreads.

9 Financial Investments and Associated Risks (Continued)

(a) Market Risk (Continued)

(iii) Other price risks are the risk that the value of an investment will fluctuate as a result of changes in market prices other than those arising from currency risk and may result from exposures to changes in the prices and volatilities of individual equities, equity baskets, equity indices, and commodities.

The Fund's market risk strategy is driven by the Fund's underlying Portfolios' investment risk and return objectives.

Market risk is managed through the application of risk budgeting principles. The Investment Adviser determines an appropriate risk target, commonly referred to as Tracking Error, employing a risk budgeting framework.

(i) Currency Risk

The Fund may invest in financial investments and enter into transactions denominated in currencies other than its Portfolios' base currency. Consequently, the Fund may be exposed to risks that the exchange rate of its base currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Fund's assets or liabilities denominated in currencies other than the base currency.

When an investor invests into a Share Class which is in a different currency to the base currency of the Portfolio in which it invests, the currency risk of the investor will be different to the currency risk of the Portfolio.

(ii) Interest Rate Risk

The Fund may invest in fixed income securities and interest rate swaps contracts. Any change to relevant interest rates for particular securities may result in the Investment Adviser being unable to secure similar returns upon the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general, have the opposite effect. All fixed income securities and floating rate securities, together with their interest rate and maturity date are disclosed in the Schedule of Investments. The Fund may invest in instruments in desired currencies at fixed, floating and zero rates of interest.

(iii) Other Price Risk

Other price risk is the risk that the value of a financial investment will fluctuate as a result of changes in market prices, other than those arising from currency risk or interest rate risk whether caused by factors specific to an individual investment, its issuer or any factor affecting financial investments traded in the market.

The Fund's financial investments are carried at market value with market value changes recognised in the Statement of Operations, all changes in market conditions will directly affect Shareholders' Equity.

(b) Liquidity Risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Among other things liquidity could be impaired by an inability to access secured and/or unsecured sources of financing, an inability to sell assets or unforeseen outflows of cash or collateral or violations of counterparty or prime broker terms or covenants. This situation may arise due to circumstances outside of the Fund's control, such as a general market disruption or an operational problem affecting the Fund or third parties. Also, the ability to sell assets may be impaired if other market participants are seeking to sell similar assets at the same time.

The redemption of Shares of a Portfolio may be temporarily suspended, or deferred, by the Board of Directors or the Management Company on behalf of the Fund upon certain circumstances, and where it is deemed in the best interests of Shareholders.

As of 31 May 2026, the Fund participated in a USD 300,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other sub-funds of Goldman Sachs Funds II SICAV and Goldman Sachs Lux Investment Funds. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on a reference

(b) Liquidity Risk (Continued)

rate related to the drawn currency (Federal Funds Rate + 125 bps). The facility also requires a fee to be paid by the Fund based on the amount of the commitment that has not been utilised. For the period ended 31 May 2026, the Fund did not have any borrowings under the facility.

(c) Credit Risk

Credit and counterparty risk is the risk that one party to a financial investment will cause a financial loss for the other party by failing to discharge an obligation.

Procedures have been adopted to reduce credit risk related to the Fund's dealings with counterparties. Before transacting with any counterparty, the Investment Adviser or its affiliates evaluate both credit-worthiness and reputation by conducting a credit analysis of the party, their business and reputation. The credit risk of approved counterparties is then monitored on an ongoing basis, including periodic reviews of financial statements and interim financial reports as needed.

(d) Additional Risks

(i) Sustainability Risk

Sustainability risk is defined in Article 3 of Regulation (EU) 2019/2088 (the "Sustainable Finance Disclosure Regulation") as an environmental, social or governance event or condition, that if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

Additional details of risks not disclosed in these Financial Statements can be found in the Prospectus.

11 Commission Recapture

All Portfolios may direct trades, subject to obtaining best price and execution, to various brokers who have agreed to rebate a portion of the commissions generated. Such rebates are made directly to the applicable Portfolio as cash payments and are included in net realised gain and loss on investments in the Statement of Operations. For the period ended 31 May 2026, there were no commissions paid on securities in the program and reimbursed to the Portfolios.

12 Statement of Changes in each Portfolio

A Statement of Changes is available, free of charge, upon request from the registered office.

14 Commissions for Research and/or Execution

Certain Portfolios pay commission for execution only and/or execution and investment research. The commissions for execution are recognised in the settlement amount. The Fund did not otherwise enter into any third party commission arrangements for the period ended 31 May 2026.

15 Prospectus

As at 31 May 2026, the latest Prospectus of the Fund was issued in April 2026.

16 Currency Adjustment

In the Statement of Changes in Shareholders' Equity, the opening value of the Fund has been restated at the exchange rates ruling at 30 November 2025, and the combined figures have been calculated using the average exchange rates throughout the period. The resulting loss of USD 40,949,282 represents the movement in exchange rates between 1 December 2025 and 31 May 2026. This is a notional loss, which has no impact on the Net Asset Value of the individual Portfolios.

17 Cross Liabilities

In accordance with Luxembourg law, each Portfolio is "ring-fenced" and considered to constitute a single pool of assets and liabilities, so that the rights of Shareholders and creditors in relation to each Portfolio should be limited to the assets of that Portfolio.

18 Contingent Liabilities

There were no contingent liabilities as at 31 May 2026.

19 Subsequent Events

Since 31 May 2026 there is a firm intention to close the Goldman Sachs Global Infrastructure Equity Portfolio with expected closure date on 30 July 2026.

From 1 June 2026 to 20 July 2026, the following Portfolios had movements greater than 25% in Shareholders' Equity:

Portfolio	Currency	% Movement in AUM	% Movement in Performance
US Small Cap CORE® Equity Portfolio	USD	129.28%	1.34%
Global Dynamic Bond Plus Portfolio	USD	30.86%	(0.04%)

There were no other subsequent events to note.

20 Indemnifications

The Fund may enter into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts.

21 Approval of Financial Statements

The Board of Directors approved the Unaudited Semi-Annual Financial Statements on 20 July 2026.

22 Cross sub-fund investments

As at 31 May 2026, the total cross sub-fund investments amounted to USD 306,810,653 and therefore the total combined Net Asset at period-end without cross sub-fund investments would amount to USD 72,232,427,393.

[a] Refer to Note 6.

[b] The Total Expense Ratio (″TER″) expresses the sum of all costs, commissions and performance fees (excluding dealing commissions and market costs) charged on an ongoing basis to the Portfolios' assets (operating net expenses) taken retrospectively as a percentage of the Portfolios' assets, and is calculated using the following formula:
Total operating net expenses in CU* /Average portfolios' assets in CU* x 100 = TER %.
The TER is calculated for the Period from 1 December 2025 to 31 May 2026. TER's are annualised for Portfolios operating less than one year.
* CU = Currency units in the Portfolio's base currency.

[c] Refer to Report of the Management Company II.

[d] The expense cap does not include performance fees.

[e] The expense cap does not include the GSAMI fee portion paid to external Sub-Investment Advisors.

The above expense ratios are an average throughout the period to 31 May 2026. The above Expense Caps represent the expense cap levels at period end 31 May 2026.

[1] Total return swaps are typically traded under ISDA master agreements ("ISDAs") which govern various types of swap and FX transactions executed between the Portfolio and each swap counterparty. Under the ISDAs, collateral is calculated daily on an aggregate, net basis across all transactions and therefore, a portion of such collateral is related to derivative transactions which are not in scope for SFTR.

For details on settlement and clearing on SFT and total return swaps please refer to Note 3(d)(ii.5)(c) Swap Contracts and Note 6 Securities lending.

Collateral is permitted for re-use in certain asset classes as disclosed in the Prospectus. An appropriate cash benchmark is a reliable proxy to estimate returns on the re-use of this collateral.

As detailed in Note 3(c) transaction costs for TRS are not separately identifiable.

Offering Documents

This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the Fund and does not constitute an offer to buy shares in the Fund. Prior to an investment, prospective investors should carefully read the latest Key Information Document (KID) as well as the offering documentation, including but not limited to the Fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KID and latest annual/semi-annual report are available free of charge from the Fund's paying and information agent and/or from your financial adviser.

Distribution of Shares

Shares of the Fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the Fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

Investment Advice and Potential Loss

Financial advisers generally suggest a diversified portfolio of investments. The Fund described herein does not represent a diversified investment by itself. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them. **An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.**

Past performance does not guarantee future results, which may vary. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of principal may occur.

Index Benchmarks

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.
