

## HSBC Global Investment Funds

# ASIA PACIFIC EX JAPAN EQUITY HIGH DIVIDEND

Marketing communication | Monthly report 31 October 2025 | Share class EC

### Investment objective

The Fund aims to provide capital growth and income by investing in a portfolio of Asia-Pacific (excluding Japan) shares, while promoting environmental, social and governance (ESG) characteristics. The Fund aims to create a portfolio that has a dividend yield above its reference benchmark. The Fund qualifies under Article 8 of SFDR.

### Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 90% of its assets in shares (or securities similar to shares) of companies of any size that are based in, Asia-Pacific (excluding Japan) region. The fund invests in both developed markets and emerging markets. The Fund includes the identification and analysis of a company's environmental and social factors and corporate governance practices as an integral part of the investment decision making process. Companies considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund can invest up to 50% in China A and China B-shares, up to 10% in other funds, may invest in bank deposits and money market instruments for treasury purposes and up to 10% in Real Estate Investment Trusts. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Reference benchmark	6.6	6.3	5.4	5.5

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI. The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating. For more information, see MSCI ESG Ratings Methodology @<https://www.msci.com/esg-and-climate-methodologies>

## Risk Disclosure

- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

## Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. Any deviations with respect to the benchmark are monitored within a comprehensive risk framework, which includes monitoring at issuer, sector and country level. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
