

HSBC Global Investment Funds - BRIC Equity

Share Class EC

As at 30 April 2020

Investment Aim

The Fund aims to provide long-term total return (meaning capital growth and income) by investing in shares from companies in Brazil, Russia, India and China (also known as BRICs). The Fund may invest in shares from companies in Hong Kong's special administrative region (SAR). In normal market conditions, at least 90% of the Fund's assets are invested in shares (or securities that are similar to shares) from companies that are based in, or carry out most of their business in, the above countries. There aren't restrictions on the market values of the companies held in the Fund. The Fund's maximum exposure to China A-shares and China B-shares is 50% of its assets. The Fund may invest up to 10% of its assets into other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the Prospectus and KIID.
