

HSBC Global Investment Funds

GLOBAL EQUITY CLIMATE SOLUTIONS

Marketing communication | Monthly report 28 February 2026 | Share class EC

Investment objective

The Fund aims to provide long term capital growth and income by investing in companies that may benefit from the transition to a low carbon economy, thereby promoting environmental, social and governance (ESG) characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. The Fund will invest at least 80% of its assets in shares (or securities similar to shares) of companies of any size that are based in both developed markets and emerging markets, with revenue exposure to climate transition themes. Companies considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund can invest up to 20% in China A and China B-shares, up to 10% in Real Estate Investment Trusts and may also invest up to 10% in other funds. See the Prospectus for a full description of the investment objectives, climate transition themes, excluded activities and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Share Class Details

Key metrics

Reference benchmark	6.7	6.4	5.3	5.8

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI. The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating. For more information, see MSCI ESG Ratings Methodology @<https://www.msci.com/esg-and-climate-methodologies>

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.
