

HSBC Global Investment Funds - Brazil Bond

Share Class AC

As at 30 April 2020

Investment Aim

The Fund invests for total return (meaning capital growth and income) by investing in a diversified portfolio of bonds. These include investment-grade securities and non-investment grade securities (which carry more risk). These securities are issued/guaranteed by the Brazilian government, government agencies and supranational bodies in Brazil as well as Brazilian companies.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. This fund invests predominantly in one geographic area; therefore any decline in the economy of this area may affect the prices and value of the underlying assets. The value of the underlying assets is strongly affected by interest rate fluctuations and by changes in the credit ratings of the underlying issuer of the assets. The fund can invest in sub investment grade bonds, which may produce a higher level of income than investment grade bonds, but carry increased risk of default on repayment. Stock market investments should be viewed as a medium to long term investment and should be held for at least five years. For a full list of risks, please refer to the Prospectus and KIID.
