

HSBC Global Investment Funds - Asian Currencies Bond

Share Class AC

As at 30 April 2020

Investment Aim

The Fund invests for long term total return (meaning capital growth and income) by investing in a diversified portfolio of fixed income securities and cash. These include investment-grade securities (rated as such by a credit ratings agency), non-investment grade securities and other similar securities. The Fund will invest primarily in securities issued in the Asian markets, and at least 70% of its assets will be denominated in Asian currencies. The Fund can also invest up to 30% in securities in other currencies, including developed and emerging markets. Up to 15% of the Fund's net assets may be invested in onshore Chinese bonds with up to 10% rated below Investment Grade. The Fund may invest up to 10% of its assets in collective investment schemes and 10% of its net assets in convertible securities (bonds that convert to equities). See the Prospectus for a full description of the investment objectives and derivative usage.

Risk Disclosure

It is important to remember that the value of investments can go down as well as up and you may not get back the amount originally invested. Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up. Investments in emerging markets are by their nature higher risk and potentially more volatile than those inherent in some established markets. The value of the underlying assets is strongly affected by interest rate fluctuations and by changes in the credit ratings of the underlying issuer of the assets. The fund can invest in sub investment grade bonds, which may produce a higher level of income than investment grade bonds, but carry increased risk of default on repayment. Stock market investments should be viewed as a medium to long term investment and should be held for at least three years. For a full list of risks, please refer to the Prospectus and KIID.
