Key risks

The Sub-Fund is subject to **Investment risks** and **Other associated risks** from the techniques and securities it uses to seek to achieve its objective. The table on the right explains how these risks relate to each other and the **Outcomes to the Shareholder** that could affect an investment in the Sub-Fund. Investors should also read [Risk Descriptions](#) in the Prospectus for a full description of each risk.

Investment risks <i>Risks from the Sub-Fund's techniques and securities</i>		
Techniques	Securities	
Derivatives	Contingent convertible bonds	- Unrated debt
Hedging	Debt securities	Emerging markets
	- Below investment grade debt	
Other associated risks <i>Further risks the Sub-Fund is exposed to from its use of the techniques and securities above</i>		
Credit Liquidity	Currency Market	Interest rate
Outcomes to the Shareholder <i>Potential impact of the risks above</i>		
Loss	Volatility	Failure to meet the Sub-Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Sub-Fund will fluctuate in value.	

General Disclosures

Before investing, obtain and review the current prospectus, Key Information Document (KID) and any applicable local offering document. These documents, as well as the sustainability-related disclosures, the annual and semi-annual reports and the articles of incorporation, are available in English free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at [www.jpnam.lu](http://www.jpnam.lu). A summary of investor rights is available in English at <https://am.jpmorgan.com/lu/investor-rights>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings. This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date. To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy [www.jpmorgan.com/emea-privacy-policy](http://www.jpmorgan.com/emea-privacy-policy) For additional information on the sub-fund's target market please refer to the Prospectus. Risk Indicator - The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period. The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are the max as detailed in the fund's prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website. Performance information Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation. Indices do not include fees or operating expenses and you cannot invest in them. The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy. Prior to 01/01/16 the benchmark was BofA Merrill Lynch Euro Non-Financial High Yield Constrained Index (Total Return Gross). Holdings information Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown. Positions with a AAA rating refer to cash assets only. The yield displayed is in the base currency of the Sub-Fund. Actual share class yields may differ from the displayed yield due to currency effects. VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month. Information Sources Fund information, including performance calculations and other data, is provided by J.P. Morgan Asset Management (the marketing name for the asset management businesses of JPMorgan Chase & Co. and its affiliates worldwide). All data is as at the document date unless indicated otherwise. © 2025 Morningstar. All Rights Reserved. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Benchmark source: The index data referenced herein is the property of Merrill Lynch, Pierce, Fenner & Smith Incorporated (BofAML) and/or its licensors and has been licensed for use by JP Morgan Chase Bank N.A. BofAML and its licensors accept no liability in connection with its use. Issuer JPMorgan Asset Management (Europe) S.à r.l., 6, route de Trèves, L-2633 Senningerberg, Luxembourg. B27900, corporate capital EUR 10.000.000. Definitions NAV Net Asset Value of a fund's assets less its liabilities per Share. Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction. Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%. Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments. Annualised volatility (%) measures the extent to which returns vary up and down over a given period. Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken. Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark. Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
