Credit Market	Liquidity Interest rate	Currency
---------------	-------------------------	----------

Outcomes to the Shareholder *Potential impact of the risks above*

Loss	Volatility	Failure to meet the Sub-Fund's objective.
Shareholders could lose some or all of their money.	Shares of the Sub-Fund will fluctuate in value.	

General Disclosures

Before investing, obtain and review the current prospectus (available in English), Key Information Document (KID) (available in English) and any applicable local offering document. These documents, as well as the sustainability-related disclosures, the annual and semi-annual reports and the articles of incorporation, are available free from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at www.jpmmam.ch.

A summary of investor rights is available in French at <https://am.jpmmorgan.com/ch-fr/droits-des-investisseurs>. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings.

JPMorgan Asset Management (Switzerland) LLC herewith informs investors that with respect to its distribution activities in and from Switzerland it receives commissions pursuant to Art. 34 para. 2bis of the Swiss Collective Investment Schemes Ordinance dated 22 November 2006. These commissions are paid out of the management fee as defined in the fund documentation. Further information regarding these commissions, including their calculation method, may be obtained upon written request from JPMorgan Asset Management (Switzerland) LLC, Dreikönigstrasse 37, 8002 Zurich.

This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.

To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmmorgan.com/emea-privacy-policy. For additional information on the sub-fund's target market please refer to the Prospectus.

Risk Indicator - The risk indicator assumes you keep the product for 5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are

the max as detailed in the fund's prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

Dividend income shown is gross of any applicable tax.

Holdings information

On 02/07/12 the base currency of the Sub-Fund was changed from Euro (EUR) to US Dollars (USD).

Maturity Date refers to the maturity/reset date of the security. For those securities whose reference coupon rate is adjusted at least every 397 days, the date of the next coupon rate adjustment is shown.

Unrated onshore Chinese bond issues may be deemed investment grade to the extent that their issuers hold an international investment grade rating by at least one independent international rating agency.

The yield displayed is in the base currency of the Sub-Fund. Actual share class yields may differ from the displayed yield due to currency effects.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as the maximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share.

Correlation measures the strength and direction of the relationship

between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary

up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.

Tracking error (%) measures how much a fund's returns deviate from those of the benchmark. The lower the number the closer the fund's historic performance has followed its benchmark.

Information ratio measures if a manager is outperforming or underperforming the benchmark and accounts for the risk taken to achieve the returns. A manager who outperforms a benchmark by 2% p.a. will have a higher IR than a manager with the same outperformance but who takes more risk.
