 JPGCPDH LX

Investment objective: To achieve, over a medium-term horizon (2 to 3 years), a return in excess of its cash benchmark from a portfolio of securities, globally, using derivatives where appropriate. The Sub-Fund seeks to have a volatility lower than two-thirds of the MSCI All Country World Index (Total Return Net).

#### Investment approach

- Uses an investment process based on macroeconomic research to identify global investment themes and opportunities.
- Flexible and focused approach to take advantage of global trends and changes through traditional and non-traditional assets.
- Fully integrated, risk management framework provides detailed portfolio analysis.

Policy www.jpmorgan.com/emea-privacy-policy

For additional information on the sub-fund's target market please refer to the Prospectus.

Risk Indicator - The risk indicator assumes you keep the product for

5 year(s). The risk of the product may be significantly higher if held for less than the recommended holding period.

The ongoing charge is the charge used in the EU PRIIPs KID. This charge represents the total cost of managing and operating the fund, including management fees, administrative costs, and other expenses (excluding transaction costs). The breakdown of costs are the max as detailed in the fund?s prospectus. For more detailed information, please refer to the fund's prospectus and the PRIIPs KID available on our website.

#### Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.

### Holdings information

Risk is the ex-ante standard deviation shown as a proportion of the total grouping ie: theme, region and asset class.

Bond/convertible bond exposure is re-weighted to 100%.

VaR is a means of measuring the potential loss to a Sub-Fund due to market risk and is expressed as themaximum potential loss at a 99% confidence level. The holding period for the purpose of calculating global exposure is one month.

### **Definitions**

NAV Net Asset Value of a fund's assets less its liabilities per Share. Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

**Annualised volatility** (%) measures the extent to which returns vary up and down over a given period.

**Sharpe ratio** performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
