Performance

Indexed value (until 30-11-2024) - Source: Robeco

Performance

Based on transaction prices, the fund's return was -0.60%.

The fund showed a small outperformance versus the benchmark (MSCI EM) in November with country allocation marginally contributing to performance and stock selection marginally detracting from the performance. The active overweights in Hungary, Turkey and the UAE contributed to the performance, as did the underweight position in China. The overweight in Indonesia and South Korea and the underweights in India, Malaysia and the Middle East detracted from performance. Stock selection detracted the most in Taiwan and China and contributed the most in India and the UAE. Stock-wise, India contributed the most with strong performers such as Infosys, HDFC Bank and Mahindra & Mahindra, all significant overweight positions in the fund. Mahanagar Gas, SK hynix and Alibaba detracted the most.

Market development

The MSCI EM Index declined 0.9% in November, underperforming versus the MSCI World Index which rose 7.5%. The emerging region faced headwinds from the Trump presidency, increased tariff threats, and a strengthening US dollar. Trump's threats of imposing 25% tariffs on Canada and Mexico along with a 10% increase for China, have further dented already depressed EM investor sentiment. The US dollar gained an additional 1.7% in November, adding pressure to the EM universe. EMEA was the strongest region, while Latin America showed the weakest performance last month. Most large EMs underperformed, with Indonesia, Brazil and South Korea showing the worst performance. Turkey and Hungary were the best-performing markets. Energy was the best-performing sector, followed by communication services, industrials and financials. Materials, utilities and consumer staples underperformed the most. All EM currencies fell against the US dollar, with the Brazilian real and the Hungarian forint depreciating more than 3%. EM equities recorded large outflows in November, USD 17 billion, after positive flows in October.

Expectation of fund manager

Within a global macroeconomic context, emerging markets are relatively well positioned. The inflation environment is benign in many EM countries, and there is ample room for interest rate cuts. Some central banks in Latin American countries, China, and Indonesia, among others, have already started to cut rates. Economic growth in emerging markets is holding up well. In China, although the property sector remains weak, the economy is growing at a rate of close to 5%, supported by substantial stimulus packages. Emerging equity markets' valuations are very attractive relative to the developed markets, with discounts of around 30% based on earnings multiples. Earnings growth in recent years has been disappointing, but it recovered in 2024 with an expected growth of around 24%.

Top 10 largest positions

Our top positions comprise a combination of IT, consumer discretionary and financials. Alibaba Group is the largest e-commerce company in China. Samsung Electronics is the well-known global IT brand from South Korea. Taiwan Semiconductor (TSMC) is a key supplier to global IT hardware producers. The portfolio holds Ping An Insurance from China and HDFC Bank and ICICI Bank from India as the largest positions in financials. Naspers is a South African internet company, with a large equity stake in Tencent. Infosys is one of the world's leading IT services companies from India. Finally, India's Mahindra & Mahindra is one of the largest four wheeler manufacturers in the country and Taiwan's Hon Hai Precision is one of the largest electronic manufacturing services companies in the world.

Changes

The performance was achieved under circumstances that no longer apply. Up to 31 December 2007, the benchmark was the IFC Composite-Index (EUR).

Sector allocation

The main overweight sectors are financials, consumer discretionary and information technology. Together with valuations that are attractive, we expect positive earnings growth for these sectors. Conversely, consumer staples, communication services, energy and healthcare are the largest underweight positions compared to the benchmark.

Sector allocation		Deviation index
Financials	27.5%	3.7%
Information Technology	26.6%	3.2%
Consumer Discretionary	19.7%	6.4%
Communication Services	5.1%	-4.2%
Industrials	4.9%	-1.9%
Real Estate	4.2%	2.6%
Utilities	3.1%	0.4%
Materials	3.1%	-3.0%
Energy	2.9%	-1.8%
Consumer Staples	1.8%	-3.1%
Not Classified	0.6%	0.6%
Health Care	0.5%	-3.0%

Country allocation

Emerging markets in Asia in general, and South Korea, Indonesia and Vietnam in particular, are favored over those in emerging Europe, Middle East and Africa (EMEA). We are underweight in some smaller Asian markets such as Malaysia, the Philippines and Thailand. We prefer domestic exposure in countries such as China and India over the export sectors. In Latin America, we are only overweight in Mexico. Among the EMEA countries, the fund holds overweight positions in Greece, Hungary, Poland, South Africa, and the UAE. It has no position in the Czech Republic, and underweight positions in the Middle East.

Country allocation		Deviation index
China	22.9%	-4.1%
Taiwan	17.7%	-1.2%
India	17.7%	-2.2%
Korea	14.2%	4.5%

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

The following sections display the ESG-metrics for this fund along with short descriptions. For more information please visit the sustainability-related disclosures. The index used for all sustainability visuals is based on MSCI Emerging Markets Index (Net Return, EUR).

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Engagement

Robeco distinguishes between three types of engagement.

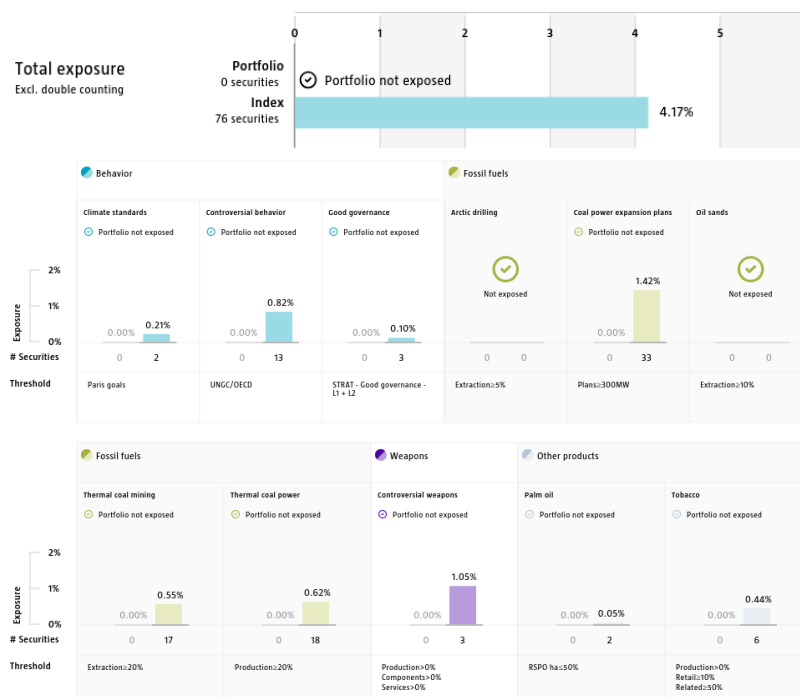

Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	43.33%	26	111
Environmental	13.64%	8	39
Social	17.55%	8	24
Governance	7.94%	7	27
Sustainable Development Goals	8.18%	4	13
Voting Related	0.31%	1	1
Enhanced	0.37%	2	7

Exclusions

The Exclusions charts display the degree of adherence to exclusion applied by Robeco. For reference, index exposures are shown beside that of the portfolio. Thresholds are based on revenues unless otherwise indicated. For more information about the exclusion policy and which level applies, please refer to the Exclusion Policy and Exclusion List available on Robeco.com.

Investment policy

Robeco Emerging Markets Equities is an actively managed fund that invests in stocks in emerging countries across the world. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. Given that emerging economies are growing faster than developed countries and have stronger balance sheets for governments, companies and households. The fund selects investments based on top-down country analysis and bottom-up stock ideas. The focus is on companies with a sound business model, solid growth prospects and reasonable valuation.

The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and engagement.

The Sub-fund is actively managed and uses the Benchmark for asset allocation purposes. However, although securities may be components of the Benchmark, securities outside the Benchmark may be selected too. The Sub-fund can deviate substantially from the weightings of the Benchmark. The Management Company has discretion over the composition of the portfolio subject to the investment objectives. The Sub-fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on countries and sectors) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the environmental, social and governance characteristics promoted by the Sub-fund.

Fund manager's CV

Wim-Hein Pals is Head of the Robeco Emerging Markets Equity team and Lead Portfolio Manager of the Global Emerging Markets Core strategy. Previously, he was Portfolio Manager Emerging European and African equities and Portfolio Manager Emerging Asian equities. Wim-Hein started his career in the investment industry at Robeco in 1990. Previously, he worked for Robeco as an investment strategist focusing on North America and Emerging Markets since 2005. Before joining Robeco in 2005, he worked for Credit Suisse First Boston as an Investment Banking Analyst, focusing on the transport and logistics sector. He started his career in the financial industry in 1998. Cornelis holds a Master's in Economics from Erasmus University Rotterdam and is a CFA® charterholder.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Fiscal treatment of investor

The fiscal consequences of investing in this fund depend on the investor's personal situation. For private investors in the Netherlands real interest and dividend income or capital gains received on their investments are not relevant for tax purposes. Each year investors pay income tax on the value of their net assets as at 1 January if and inasmuch as such net assets exceed the investor's tax-free allowance. Any amount invested in the fund forms part of the investor's net assets. Private investors who are resident outside the Netherlands will not be taxed in the Netherlands on their investments in the fund. However, such investors may be taxed in their country of residence on any income from an investment in this fund based on the applicable national fiscal laws. Other fiscal rules apply to legal entities or professional investors. We advise investors to consult their financial or tax adviser about the tax consequences of an investment in this fund in their specific circumstances before deciding to invest in the fund.

Sustainability images
