**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

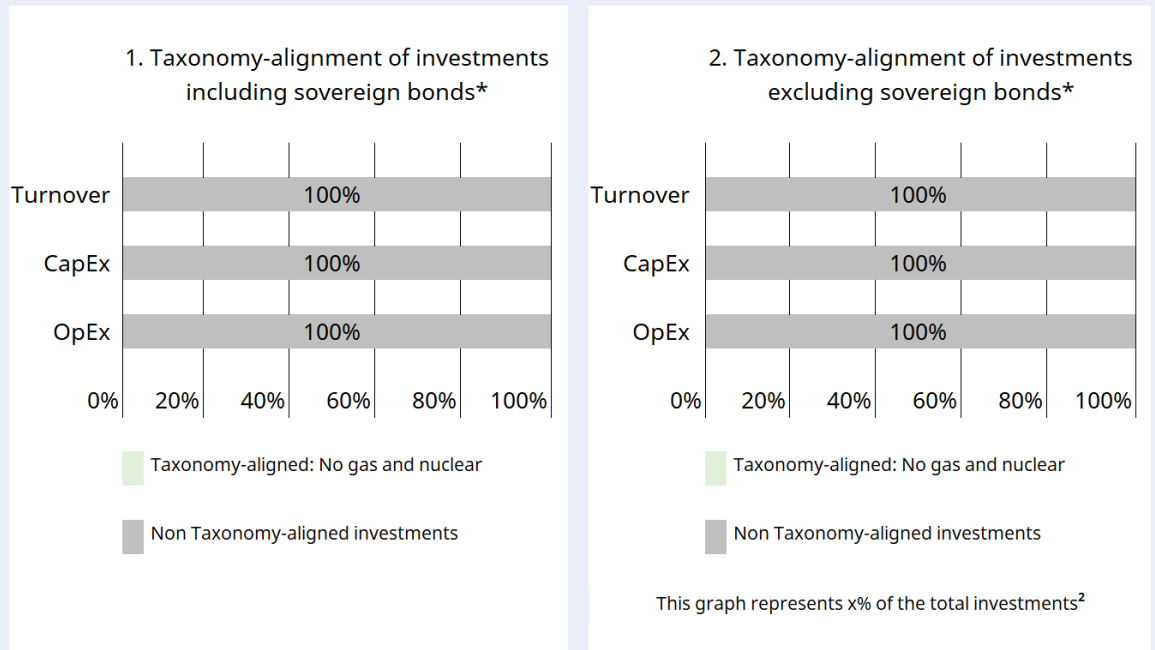

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 36%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Cities

**Legal Entity Identifier :** 1D8UMR1OQ0TSCJYQ0716

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 16 %</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 82%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators at an investee company level to measure its contribution to the Fund's sustainability objective. The Investment Manager used two stages concurrently to determine companies that contributed to the sustainability objective. Stage 1 utilises a quantitative process, the purpose is to highlight companies that own assets in the best city locations globally. The four proprietary databases filter for companies with assets in the most connected, innovative, and environmentally resilient locations so that the team could select companies that own the most economically productive assets across the strongest global cities.

There are four proprietary databases which are the foundation of the geospatial process:

- Economic impact score, ranking a location's economic growth.

- Innovation impact score, assessing levels of talent and innovation in a location.

- Transport impact score, ranking an asset's transport connectivity.

- Environmental impact score (EIS), assessing the physical risk to an asset, the well-being risk to humans and the policy response of the respective government.

Cities were scored based on the output of the above. These proprietary databases all worked in tandem with the 'Asset database' which scores assets owned by companies based on their locations within cities. These scores (the city score and the asset score) were aggregated to give a score for each company. Only those companies with the highest score in stage 1 of the process will be included.

Concurrently, in stage 2 the Investment Manager used a Schroders' proprietary tool which assessed and scored companies based on their treatment of key stakeholder categories, including customers, employees, the environment, local communities, regulators and governments, and suppliers.

Companies which did not score above a minimum threshold were deemed ineligible for selection for the Fund while the maximum investable into a company was driven by the key stakeholder score in Schroders' proprietary tool prior to other considerations.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

For example, the Fund invested in a European commercial real estate company with a global presence which is actively incorporating sustainable practices into its construction projects. Recognizing the significant environmental impact of building materials, the company is committed to reducing embodied carbon in its new developments. It has set ambitious targets to achieve net-zero emissions and is actively engaging with tenants and partners to minimize waste and promote a circular economy. By prioritizing sustainable construction and responsible resource management, the company aims to create a more sustainable future for its properties and the communities they serve.

The Investment Manager encouraged companies to join GRESB, a benchmark which has been set up specifically for the real estate sector. GRESB gives access to vital information about submitting member companies, such as, greenhouse gas emissions, energy or water use. This information can be carefully monitored and used to hold companies accountable for their actions. GRESB is used within the second stage of the investment process, over half of the company's scorecard is derived from GRESB metrics which allows the Investment Manager to gauge the performance credentials of each company's assets allowing it to append a risk score.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	98
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	98

### GHG reduction targets

This table details the percentage of equity holdings that had GHG reduction targets, a constituent of the Environmental part of the proprietary sustainability score.

Date	Equity Holdings (%)
31 Dec 2024	90
31 Dec 2023	89
31 Dec 2022	93

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

bribery matters.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through the Schroders proprietary tool, the scoring for which was used to screen the investment universe and to provide the maximum quantum that can be invested in each company. For example, in assessing an issuer's overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included. All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	29
Diversity and Inclusion	1
Corporate Governance	9
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 16% was invested in sustainable investments with an environmental objective and 82% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Real Estate	78.38
Real Estate	Equity Real Estate Investment Trusts (REITs)	15.89
Real Estate	Real Estate Management & Development	1.00
Cash	Cash	2.44
Communication Services	Telecommunication Services	2.29

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 16%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 82%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in real estate companies worldwide that contributed towards more environmentally resilient and innovative cities and infrastructure;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once a year. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance.
- During the reference period, the Investment Manager conducted 42 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change which includes building efficiency and emissions and corporate governance including remuneration and independence.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Climate Change Equity

**Legal Entity Identifier :** TA82RIONRIZRTKERSH09

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 69% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

Disclaimer: Certain information contained herein (the "Information") is sourced from/copyright of MSCI Inc., MSCI ESG Research LLC, or their affiliates ("MSCI"), or information providers (together the "MSCI Parties") and may have been used to calculate scores, signals, or other indicators. Reproduced by permission.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Fund's level of avoided emissions for the reference period was 173 tCO<sub>2</sub>e/\$M and the benchmark's level of avoided emissions for the reference period was 15 tCO<sub>2</sub>e/\$M. This means that the Fund's average level of avoided emissions during the reference period, based on quarterly-end data, was higher than the benchmark's average level of avoided emissions over the same period.

The Investment Manager invested 69% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

### • ...and compared to previous periods?

#### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	69
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	52

#### Avoided emissions

This table details the Fund's and benchmark's level of avoided emissions, year on year.

Period	Fund (tCO <sub>2</sub> e/\$M)	Benchmark (tCO <sub>2</sub> e/\$M)
Jan 2024 - Dec 2024	173	15
Jan 2023 - Dec 2023	202	34
Jan 2022 - Dec 2022	207	10

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

For 2022 the avoided emissions value was calculated as at the end of the reference period. From 2023 the value is calculated as an average based on quarter-end data.

## • **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in companies on the Carbon Underground 200 list or companies with significant exposure to fossil fuels defined as those with 5% or more of their revenues coming from fossil fuel extraction and production.

During the reference period, PAIs were also considered through integration in the investment process. The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies: PAI 1, 2 & 3. As part of our analysis, we considered how a firm manages its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company was adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Corporate Governance	12
Human Rights	8
Natural Capital and Biodiversity	3
Human Capital Management	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3 & PAI 4 from Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to confirm these targets are properly integrated into company remuneration policies. All PAI indicators are monitored via Schroders' PAI dashboard.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ALPHABET INCORPORATED CL A NPV	Information Technology	5.91	United States
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	5.77	United States
AMAZON.COM INCORPORATED USD0.01	Consumer Discretionary	4.94	United States
SCHNEIDER ELECTRIC SE EUR4	Industrial	3.71	United States
HITACHI LIMITED NPV	Information Technology	3.32	Japan
SWISS RE AG CHF0.10	Financial	3.31	United States
NEXTERA ENERGY INCORPORATED COMMON STOCK USD0.01	Utilities	2.26	United States
PRYSMIAN SPA EUR0.10	Industrial	2.25	Italy
VESTAS WIND SYSTEMS DKK0.2	Industrial	2.24	Denmark
LOWE'S COMPANIES INCORPORATED COMMON STOCK USD0.50	Consumer Discretionary	2.10	United States
CHROMA ATE INCORPORATED TWD10	Information Technology	2.06	Taiwan
LEGRAND SA EUR4	Industrial	2.06	France
UNION PACIFIC CORPORATION COMMON STOCK USD2.50	Industrial	1.96	United States
KROGER COMPANY (THE) COMMON STOCK USD1	Consumer Staples	1.86	United States
BAYERISCHE MOTOREN WERKE AG	Consumer Discretionary	1.84	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

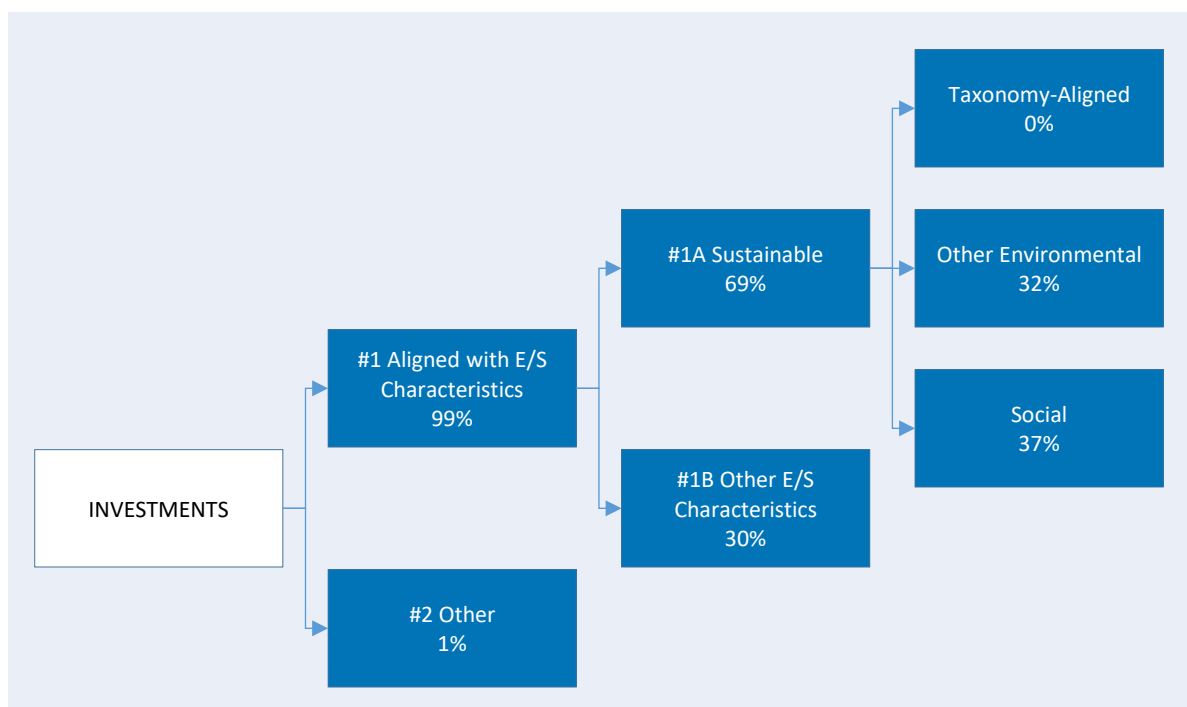

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall level of avoided emissions than the MSCI All Country World (Net TR) Index, and so the Fund's investments that were measured by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's overall level of avoided emissions (whether such individual investment had a high or low level). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data.

The Fund invested 69% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 37% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not covered by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's overall level of avoided emissions.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	31.16
Industrial	Transportation	3.48
Industrial	Commercial and Professional Services	1.71
Information Technology	Semiconductors & Semiconductor Equipment	7.13
Information Technology	Technology Hardware & Equipment	6.91
Information Technology	Software & Services	6.17
Consumer Discretionary	Consumer Discretionary Distribution & Retail	8.26
Consumer Discretionary	Consumer Durables & Apparel	4.25
Consumer Discretionary	Automobiles & Components	3.30
Communication Services	Media & Entertainment	5.91
Utilities	Utilities	5.87
Consumer Staples	Consumer Staples Distribution & Retail	3.20
Consumer Staples	Food, Beverage & Tobacco	1.74
Materials	Materials	4.35
Financial	Insurance	3.31
Financial	Financial Services	0.76
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.75
Cash	Cash	0.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 37%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments and derivatives that were not covered by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's overall level of avoided emissions.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the level of avoided emissions of the Fund when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Climate Leaders

**Legal Entity Identifier :** 549300VTE2QMTP9FYD10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund invested in companies that have set targets in relation to the decarbonisation of their business consistent with limiting climate change to 1.5°C warming or less under the Paris Agreement.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.2% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine

The Investment Manager invested 74% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	60

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	4.2	-2.1
Jan 2023 - Dec 2023	4.4	-2.9
Jan 2022 - Dec 2022	3.8	-4.6

## Decarbonisation targets consistent with 1.5 degrees warming

*Year on year, the Investment Manager monitored compliance with the characteristic to invest in companies that had set targets in relation to the decarbonisation of their business by reviewing the Fund's investments' specific scope 1 and 2 emissions reduction targets on a periodic basis.*

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels.
- The Fund did not invest in companies on the Carbon Underground 200 list or companies with significant exposure to fossil fuels defined as those with 5% or more of their revenues coming from fossil fuel extraction and production.

During the reference period, PAIs were also considered through the integration of the teams' sustainability assessment in our investment process. The Fund considered climate change criteria at the stock level as part of the sustainability assessment in the investment process over the period. This covered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

companies and energy consumption intensity per high impact climate sector investing in companies without carbon emission reduction initiatives (PAIs 1, 2, 3, 6 and PAI 4 from Annex 1 Table 2). As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as how the company plans to reduce its GHG emissions. No single metric determined the overall assessment of a company's climate profile. The Fund evaluated a variety of different metrics – from both internal and external data sources (including Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) were considered as part of our good governance framework using data from our internal proprietary tool.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3, 5, 6 & PAI 4 from Annex 1 Table 2, we are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions, including independent verification, and where targets are already set, to encourage integration of these targets into company remuneration policies.

For example, in reference to PAI 1, 2, 3, 5 and 6, we engaged with a company in the technology sector to encourage increased procurement of renewable energy for electricity use on premises. We also engaged with the same company on its plans to address scope 3 emissions by increasing supplier commitments to emissions reductions.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	25
Corporate Governance	20
Human Rights	19
Human Capital Management	5
Natural Capital and Biodiversity	5
Diversity and Inclusion	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	4.98	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that

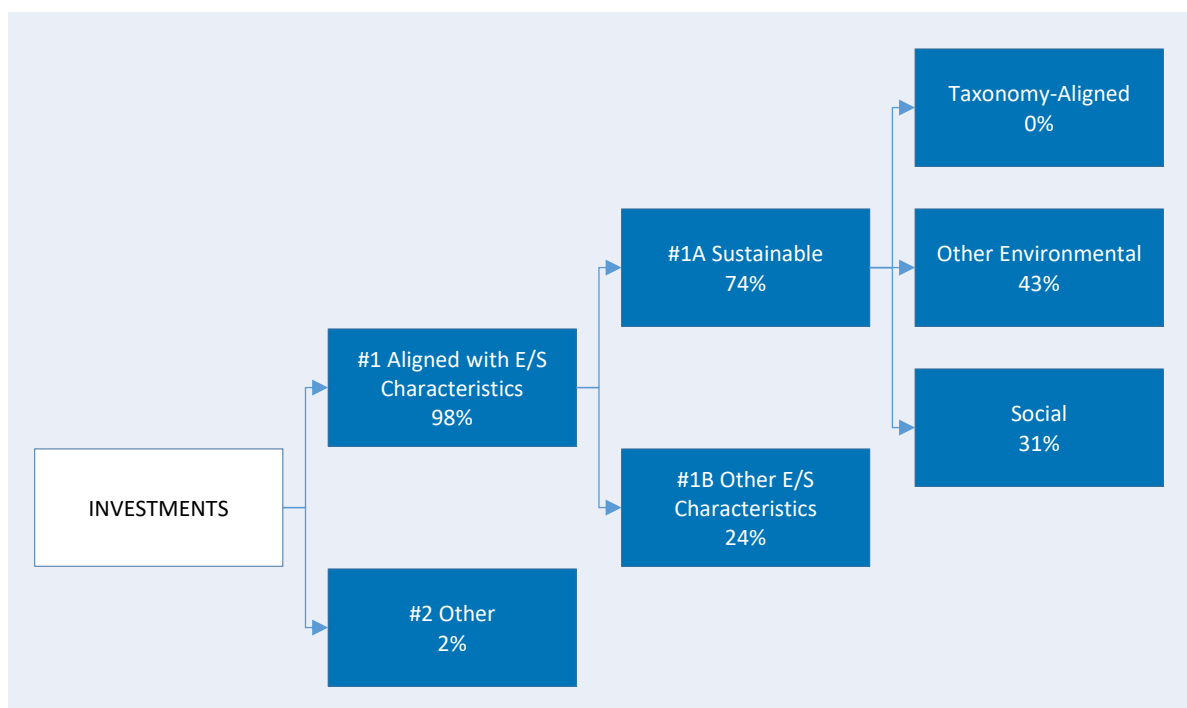

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 74% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 43% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	23.36
Information Technology	Semiconductors & Semiconductor Equipment	8.85
Information Technology	Technology Hardware & Equipment	5.92
Financial	Banking	7.04
Financial	Financial Services	4.05
Financial	Real Estate	2.16
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.34
Consumer Discretionary	Consumer Durables & Apparel	3.72
Consumer Discretionary	Automobiles & Components	2.61
Industrial	Capital Goods	10.56
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.32
Health Care	Health Care Equipment & Services	4.52
Industrial	Transportation	0.28
Consumer Staples	Household & Personal Products	3.62
Consumer Staples	Food, Beverage & Tobacco	2.89
Consumer Staples	Consumer Staples Distribution & Retail	1.49
Materials	Materials	2.80
Utilities	Utilities	2.76
Cash	Cash	1.70

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 43%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager considered the decarbonisation targets set by companies when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Disruption  
**Legal Entity Identifier :** 549300CM155Z70045B78

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.1% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 76% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	76
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	49

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	4.1	-2.1
Jan 2023 - Dec	4.0	-2.9
Jan 2022 - Dec	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of good governance, management quality and company strategy. During the reference period, PAI 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered relative to industry peers and poor performance issuers on these metrics / indicators received higher risk scores in our assessment and formed the basis of our engagement activities. All PAI indicators are monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate commitments and biodiversity targets related to PAIs 6,7 and 8. For example, in reference to PAI 7 (Activities negatively affecting biodiversity-sensitive areas), we engaged with a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

company in the consumer sector on its contribution to single-use plastic. Over the period, our engagements covered a range of topics and related to PAIs 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	28
Corporate Governance	17
Human Rights	16
Natural Capital and Biodiversity	4
Human Capital Management	4
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

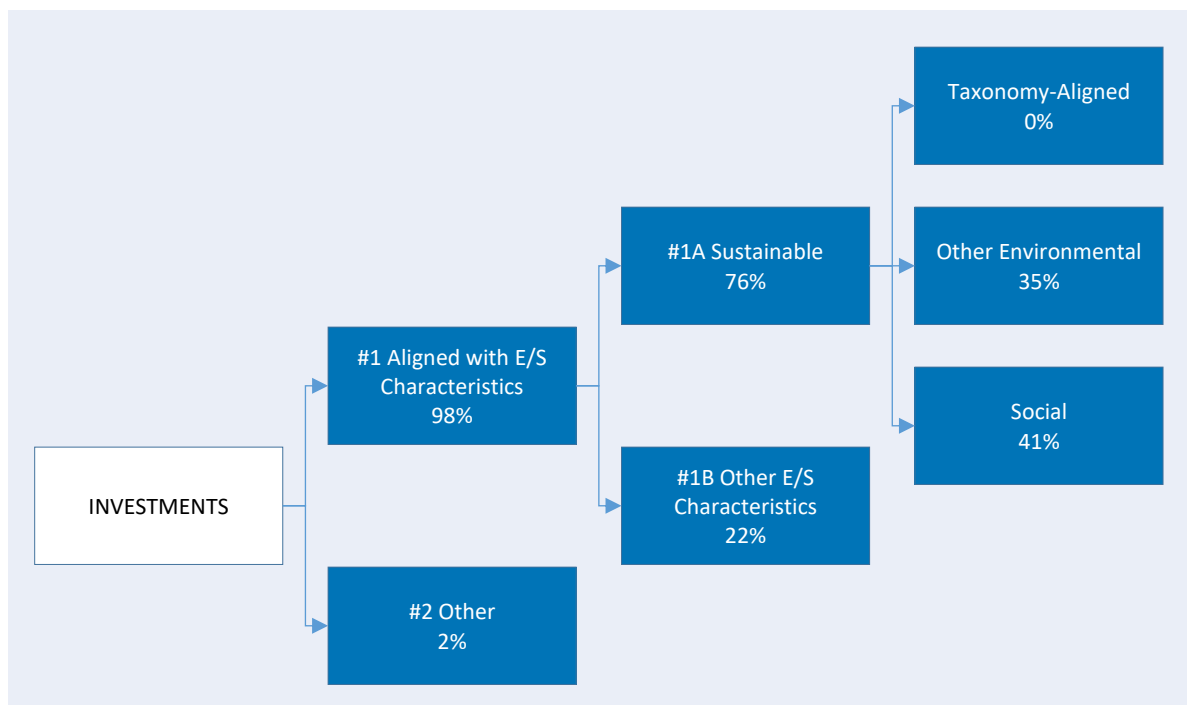

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 76% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	31.10
Information Technology	Semiconductors & Semiconductor Equipment	17.22
Information Technology	Technology Hardware & Equipment	7.77
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.63
Consumer Discretionary	Consumer Durables & Apparel	3.15
Consumer Discretionary	Automobiles & Components	1.81
Consumer Discretionary	Media & Entertainment	1.61
Consumer Discretionary	Consumer Services	0.26
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.75
Health Care	Health Care Equipment & Services	4.25
Industrial	Capital Goods	7.27
Industrial	Commercial & Professional Services	1.52
Industrial	Transportation	1.38
Financial	Financial Services	1.31
Financial	Real Estate	1.01
Financial	Banking	0.87
Cash	Cash	1.41
Communication Services	Media & Entertainment	1.09
Energy	Integrated Oil & Gas	0.94
Utilities	Utilities	0.87
Consumer Staples	Household & Personal Products	0.30
Consumer Staples	Food, Beverage & Tobacco	0.20
Materials	Materials	0.27

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 41%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Emerging Market Opportunities

**Legal Entity Identifier :** JU8KRPJWHOMRDHSKVI22

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.4% and the benchmark's sustainability score for the reference period was -3.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	62
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	52

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.4	-3.3
Jan 2023 - Dec 2023	0.4	-2.9
Mar 2022 - Dec 2022	0.5	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schrodgers proprietary tool is the main repository for the team’s ESG analysis. Schrodgers proprietary tools provide a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company’s performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schrodgers proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schrodgers proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schrodgers PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	40
Corporate Governance	13
Human Rights	10
Human Capital Management	6
Natural Capital and Biodiversity	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.76	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 17% was invested in sustainable investments with an environmental objective and 45% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	17.05
Information Technology	Software & Services	8.23
Information Technology	Technology Hardware & Equipment	7.02
Financial	Banking	12.05
Financial	Financial Services	5.16
Financial	Insurance	2.88
Financial	Real Estate	0.88
Consumer Discretionary	Consumer Discretionary Distribution & Retail	9.63
Consumer Discretionary	Automobiles & Components	5.21
Consumer Discretionary	Consumer Durables & Apparel	3.77
Consumer Discretionary	Consumer Services	0.53
Consumer Discretionary	Media & Entertainment	0.13
Industrial	Capital Goods	5.88
Industrial	Transportation	1.93
Industrial	Commercial & Professional Services	0.73
Materials	Materials	5.71
Cash	Cash	4.10
Energy	Oil & Gas Refining & Marketing	3.10
Energy	Oil & Gas Exploration & Production	0.95
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.84
Health Care	Health Care Equipment & Services	1.18
Consumer Staples	Food, Beverage & Tobacco	0.55
Consumer Staples	Consumer Staples Distribution & Retail	0.36
Communication Services	Media & Entertainment	0.62
Utilities	Utilities	0.53

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 17%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 45%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Emerging Markets Smaller Companies

**Legal Entity Identifier :** 549300F4FWZAJKH8YQ10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 72% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.6% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager invested 72% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	72
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	59

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	5.6	-2.5
Jan 2023 - Dec 2023	4.3	-1.3
Jan 2022 - Dec 2022	1.9	-2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schrodgers proprietary tool is the main repository for the team’s ESG analysis. Schrodgers proprietary tools provide a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company’s performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schrodgers proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schrodgers proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schrodgers PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	8
Climate Change	8
Diversity and Inclusion	3
Natural Capital and Biodiversity	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

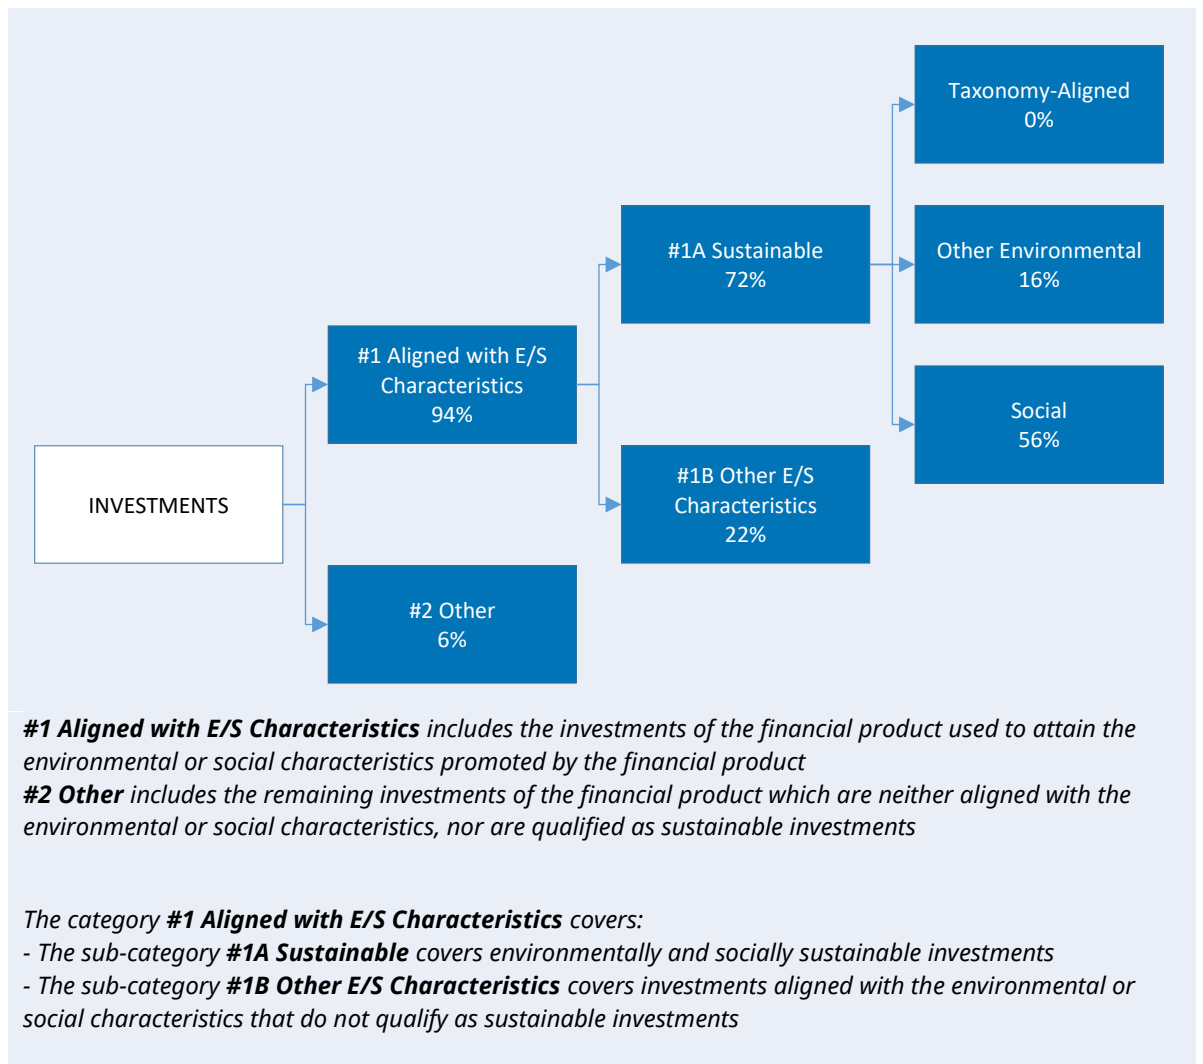

The Fund invested 72% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 16% was invested in sustainable investments with an environmental objective and 56% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Communication Services	Media & Entertainment	1.25
Cash	Cash	1.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 16%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 56%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Energy Transition

**Legal Entity Identifier :** 549300IS8ME9YA6EM043

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : 95%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested at least 75% of its assets in companies worldwide that generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies. The Fund also invested in other companies worldwide that generated a lower percentage of their revenue from these activities where the Investment Manager considered they are playing critical roles in the energy transition. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and warrants used with the aim of managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure or market share contributed to an environmental or social objective (as applicable). At least 75% of issuers generated at least 50% of their revenue from activities that contributed towards the global transition towards lower-carbon and more sustainable sources of energy. The Investment Manager manually added companies that met certain criteria with revenue exposure of below 50% to the Fund's investment universe. Compliance with the minimum percentage in sustainable investments was monitored daily via the Investment Manager's automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain percentage of their revenues capital expenditure, operating expenditure or market share from their main activity that is associated with specific energy transition activities: including (1) renewable energy equipment; (2) renewable energy generation; (3) transmission and distribution; (4) batteries, storage and other equipment; (5) hydrogen; (6) electrical equipment and energy; and (7) clean mobility.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings, publicly available corporate information as well as the Investment Manager's internal proprietary tools. The Investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Manager invested 47% of the portfolio in issuers classified as Best-in-class and 48% of the portfolio in issuers classified as Neutral. These figures were calculated as the average of the reference period based on quarter-end data. The Fund did not invest in any companies classified as Laggards during the reference period.

The Fund also applied certain exclusions, including companies deriving direct revenue from fossil fuels, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within the exclusionary criteria.

• **...and compared to previous periods?**

**Sustainable investments**

*This table details the percentage of assets invested in sustainable investments, year on year.*

**Best-in-class**

*This table details the percentage of assets invested in Best-in-class and Neutral, year on year*

Period	Fund (%)	Period	Fund (%)
Jan 2024 - Dec 2024	95	Jan 2024 - Dec 2024	Best-in-class – 47 Neutral – 48
Jan 2023 - Dec 2023	93	Jan 2023 - Dec 2023	Best-in-class – 53 Neutral – 40
Jan 2022 - Dec 2022	92	Jan 2022 - Dec 2022	Best-in-class – 53 Neutral – 39

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager’s approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>. Firm-wide exclusions also apply to companies generating more than 20% of their revenue from thermal coal mining.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more ‘global norms’ thereby causing significant environmental or social harm; these companies comprise Schroders’ ‘global norms’ breach list. Schroders’ determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The ‘global norms’ breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund’s investment exclusions is to be found under “Sustainability-Related Disclosure” on The Fund’s webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions regarding:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Fossil fuels: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production). The Fund did not invest in any company directly involved in fossil fuels.

During the reference period, PAIs were also considered through the integration of the teams' proprietary sustainability assessment as part of the investment process. The Fund considered climate change criteria in its analysis as part of the 'environmental management' component of the stakeholder analysis. This covered greenhouse gas emissions, avoided emissions, carbon footprint and greenhouse gas intensity of investment companies: PAI 1, 2 and 3. As part of our analysis, we considered how a firm is managing its environmental footprint (including its impact on the climate), as well as its potential exposure to the effects of long-term climate change. While no single climate change metric determined the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schrodgers' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schrodgers' proprietary tool. All PAI indicators are monitored via Schrodgers' PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Human Rights	11
Corporate Governance	9

The engagements shown relate to engagements with companies and issuers.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3 and PAI 4 Annex 1 Table 2, we continued our climate change focussed engagements, and have engaged with companies across a number of industries and sub-sectors with the aim of encouraging companies to set clear and measurable emissions reduction targets for all three scopes of emissions that are aligned to SBTi and, where targets are already set, to ensure these targets are properly integrated into company remuneration policies. Our engagements also covered a range of topics most closely related to PAIs 10, 11 and PAI 14 from Annex 1 Table 3.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
VESTAS WIND SYSTEMS DKK0.2	Industrial	5.17	Denmark

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

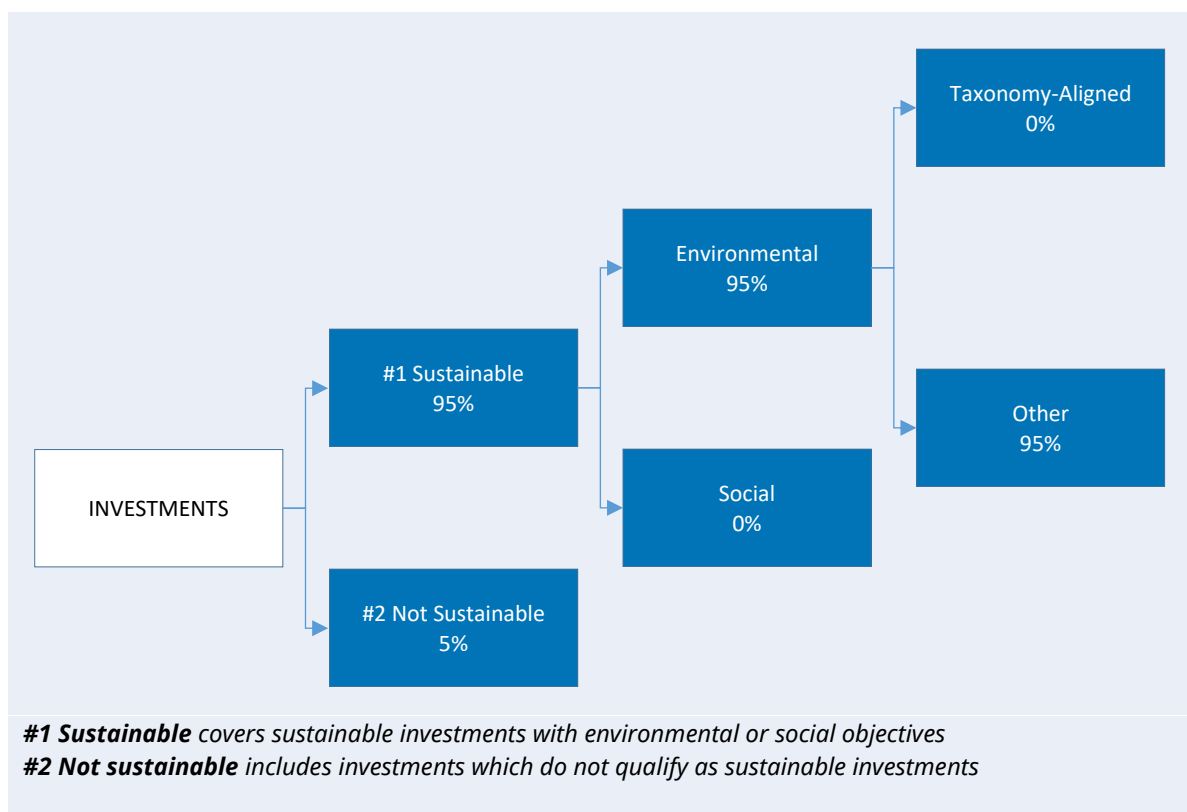

#1 Sustainable are investments in companies worldwide that generated a certain percentage of their revenue (for 75% of the assets of the Fund, at least 50%) from activities that contributed towards the global transition towards lower-carbon sources of energy, such as lower-carbon energy production, distribution, storage, transport and associated supply chain, material provider and technology companies or are playing critical roles in the energy transition.

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrials	Capital Goods	38.06
Utilities	Utilities	20.98
Information Technology	Semiconductors & Semiconductor Equipment	12.85
Materials	Materials	12.11
Information Technology	Technology Hardware & Equipment	6.27
Consumer Discretionary	Automobiles & Components	3.82
Industrials	Commercial and Professional Services	1.26
Cash	Cash	4.65

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## What was the share of socially sustainable investments?

There were no sustainable investments with a social objective.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and warrants used with the aim of managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in companies that generated a certain percentage of revenue from activities that contributed towards the global transition towards lower-carbon sources of energy;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance;
- During the reference period the Investment Manager conducted 37 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, human rights and corporate governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 10 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Equity Impact

**Legal Entity Identifier :** 6367002HMP4ST6LJGW14

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 49%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 51%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process is aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 10 January 2024 (launch date) to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a company's products and services were expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review. Indicative fund-level KPIs include: Number of customers/patients reached (#), Number of medical tests provided (#), MSMEs reached (#), Accessible loans provided (\$), CO2 avoided per annum (mtCO2e) and share of secondary raw materials used (%).

Once these steps were completed, the company and scorecard were then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

As at the end of the reference period, the companies in the Fund were aligned with the following five key impact areas; (1) 32% in inclusion; (2) 22% in health and wellness; (3) 15% in environment; (4) 21% in sustainable infrastructure; and (5) 10% in responsible consumption.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments not cause significant harm to any sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en/lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process (where data is available via Schroders PAI dashboard and via other external data sources) and some via engagement. Further details are provided below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs are considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporates several PAIs as a component of its scoring methodology. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Engagements covered a range of topics, including pollution and waste in the chemicals sector, and climate and net zero commitments for held companies within the technology sector. These engagements related to PAIs 7, 8 and 9 (Negative affects to biodiversity-sensitive areas, emissions to water and hazardous waste) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	15
Human Rights	12
Corporate Governance	11

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation**  
describes the share  
of investments in  
specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

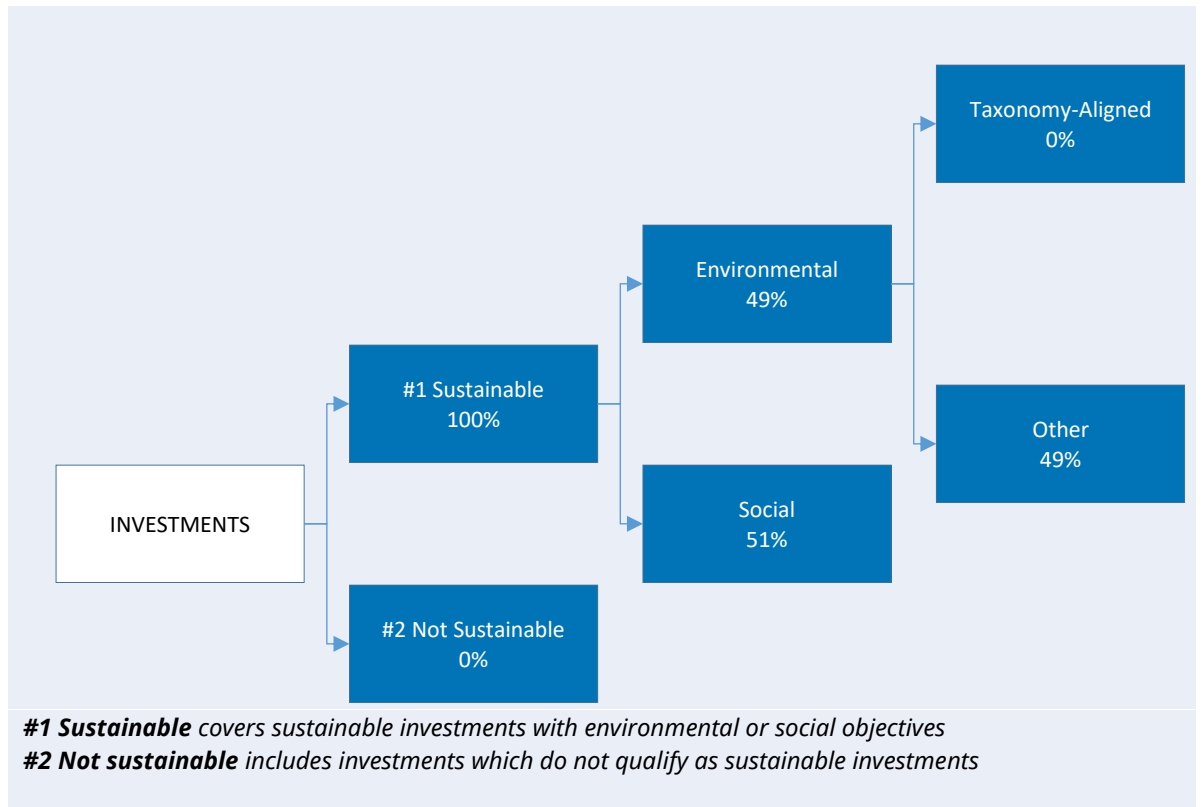

#1 Sustainable are investments in companies that contributed towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 49% was invested in sustainable investments with an environmental objective and 51% was invested in sustainable investments with a social objective.

#2 Not sustainable includes cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently, which were treated as neutral for sustainability purposes.

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipment	10.25
Information Technology	Software & Services	6.92
Information Technology	Semiconductors & Semiconductor Equipment	6.65
Industrial	Capital Goods	16.67
Industrial	Commercial & Professional Services	5.94
Health Care	Health Care Equipment & Services	11.56
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.79
Financial	Banking	5.26
Financial	Insurance	4.49
Financial	Real Estate	1.32
Financial	Financial Services	0.16
Materials	Materials	8.77
Consumer Discretionary	Media & Entertainment	2.37
Consumer Discretionary	Consumer Durables & Apparel	2.00
Cash	Cash	4.29
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.60
Consumer Staples	Food, Beverage & Tobacco	0.69
Consumer Staples	Consumer Staples Distribution & Retail	0.28

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

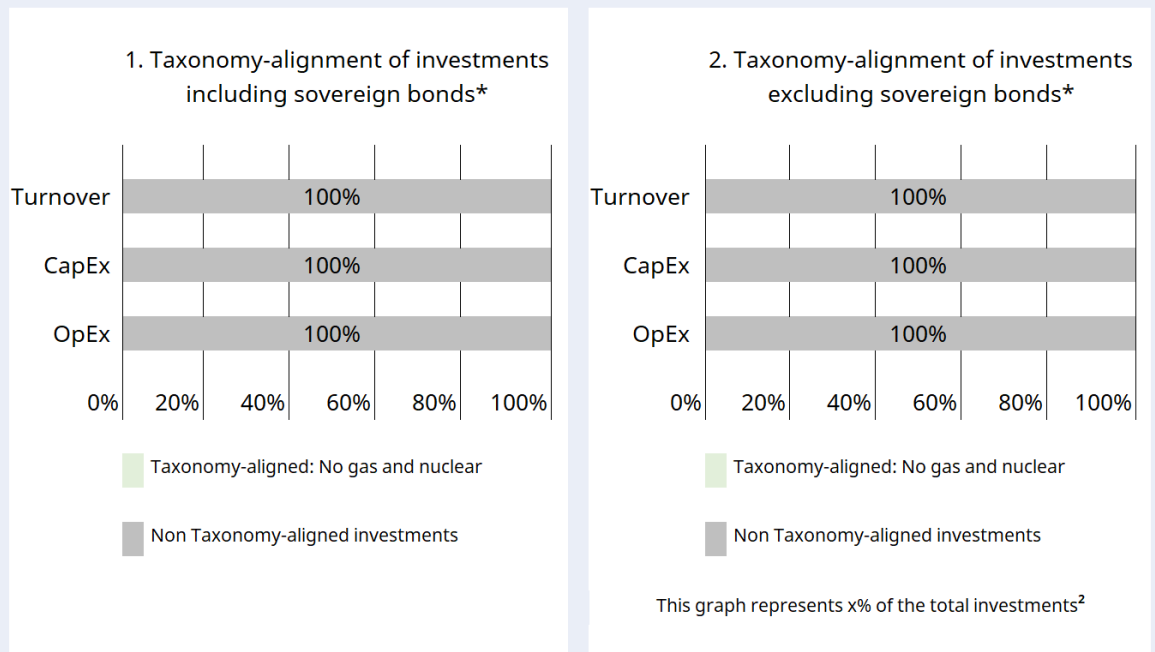

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 49%

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 51%.

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently, which were treated as neutral for sustainability purposes.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in sustainable investments, which were investments in companies worldwide that the Investment Manager expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- During the year the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focused on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe. A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies; and

# SFDR Periodic Report (continued)

Reference Period: 10 January 2024 - 31 December 2024

- In addition, the Investment Manager worked on a mass engagement project during the year which encouraged companies within the portfolio to set net zero emissions transition plans as well as an engagement programme to improve board gender diversity both of which will remain priorities into the next reference period.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Smaller Companies

**Legal Entity Identifier :** EENRPPPON8BRF9XDB514

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

- |  |  |
|--|--|
| <input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%                     | <input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments |
| <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy        | <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  |
| <input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%                             | <input checked="" type="checkbox"/> with a social objective  |
|  | <input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>  |

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.7% and the benchmark's sustainability score for the reference period was -0.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	58

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.7	-0.3
Jan 2023 - Dec 2023	2.0	-0.2
Jan 2022 - Dec 2022	1.1	-0.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers’ proprietary tool were used which incorporates several PAIs as a component of its scoring methodology. Schrodgers’ proprietary model which generates a single overall score and individual component scores that reflect the positive and negative social and environmental impacts of a company. For example, in assessing an issuer’s overall environmental score, factors related to PAIs 1, 2, and 3 were included in the SustainEx score. Our fundamental research has also played an important role in considering PAIs, from analysing company reports to meeting with management. For example, corporate governance structures and practises have been assessed as part of our fundamental research, related to PAIs 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. For example, we engaged with holdings around their approach to a net zero transition and setting emissions reduction targets. Other topics discussed with investee companies included board gender diversity, related to PAI 13. For example, we engaged with a company specifically around gender diversity, encouraging the company to increase the gender diversity of their board and provide

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the S&P Developed Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

# SFDR Periodic Report (continued)

## Reference Period: 1 January 2024 - 31 December 2024

Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

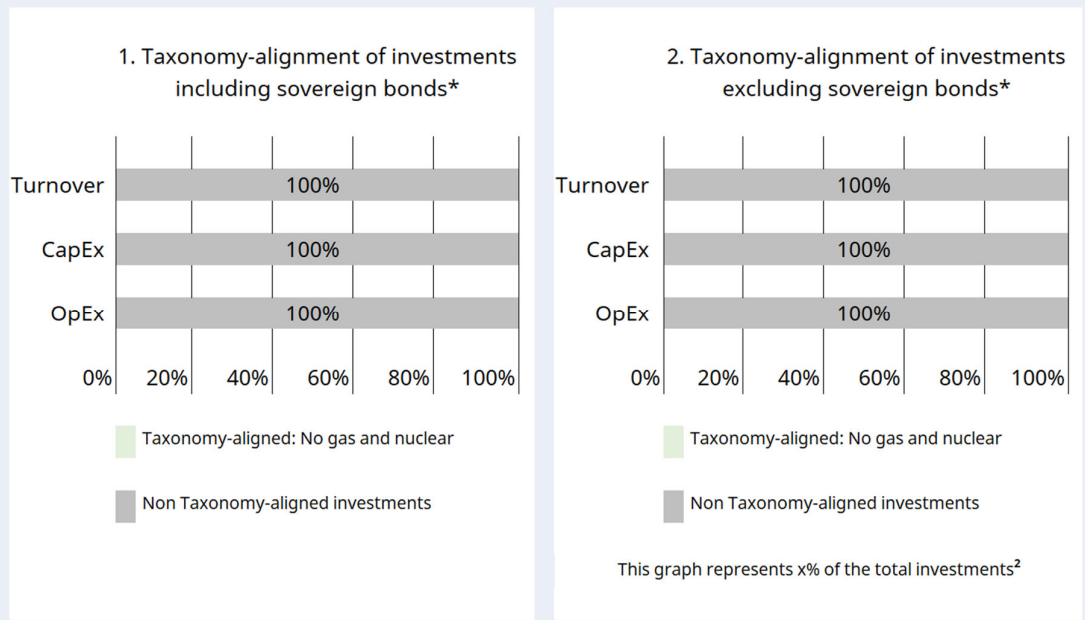

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 4 September 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Social Growth

**Legal Entity Identifier :** 636700VA6M8LZJROVD27

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 79% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 4 September 2024 (launch date) to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.4% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling four month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Sanitation

The Investment Manager invested 79% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Fund invested at least 50% of its assets in companies where at least 20% of the total revenues of such companies are derived from products or services that are helping, or are expected to help, people thrive within society. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the extent to which the total revenues of such companies are derived from products or services which are helping, or are expected to help, people thrive within society. To do this, the Investment Manager assessed companies' alignment to the relevant social-related UN SDGs, including those relating, but not limited to, essential infrastructure, health & wellness, and educational, professional and financial inclusion. In the production of the list of investments that meet the selection criteria for inclusion in the investment universe, the Investment Manager also assessed the score of each company as measured by Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

The sustainable investments have a social objective in so far as the Fund invests in companies worldwide where at least 20% of the total revenues of such companies are helping, or are expected to help, people thrive within society. The sustainable investments contribute to these objectives by providing products or services which are helping, or are expected to help, people thrive within society in areas related but not limited to essential infrastructure, health & wellness, and educational, professional and financial inclusion.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

sector revenue.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology, for example, in assessing an issuer’s overall social score, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were included. The Investment Manager evaluated a variety of different metrics, using both internal and external data sources, which determined whether a company adequately mitigated its societal risks.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including human rights and corporate governance.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Human Rights	1

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

Corporate Governance

1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

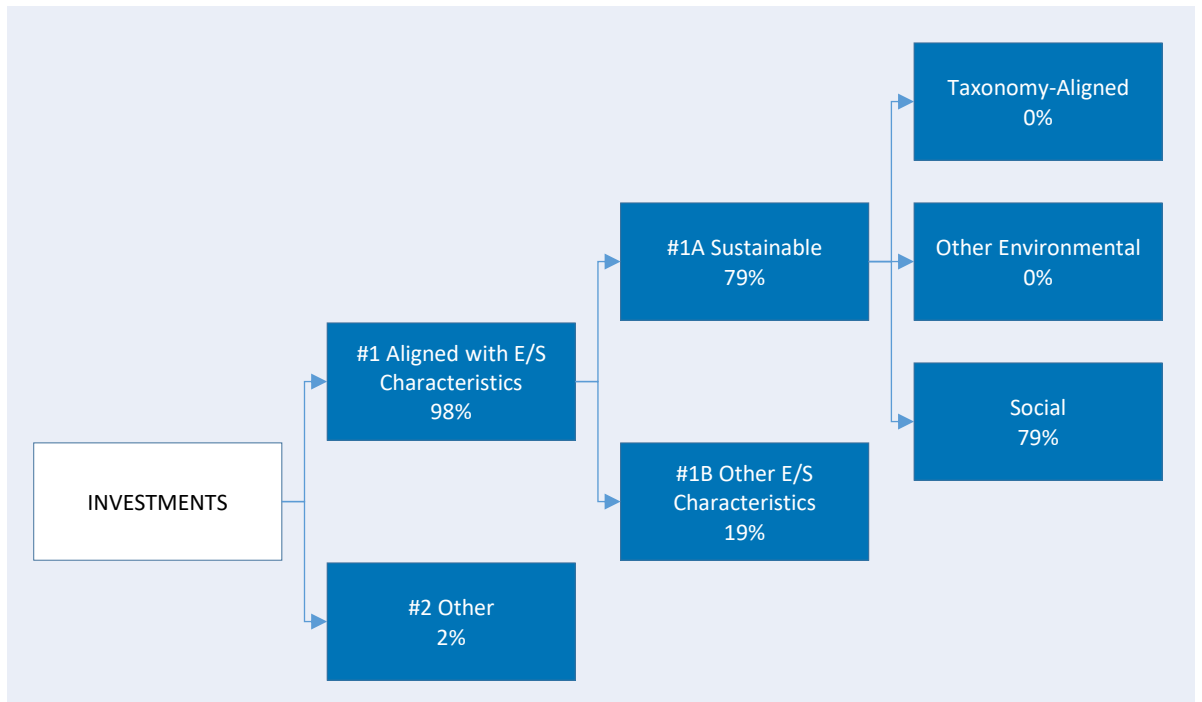

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 79% of its assets in sustainable investments, which are companies where at least 20% of the total revenues of such companies are derived from products or services that are helping, or are expected to help, people thrive within society.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Cash	Cash	1.64

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

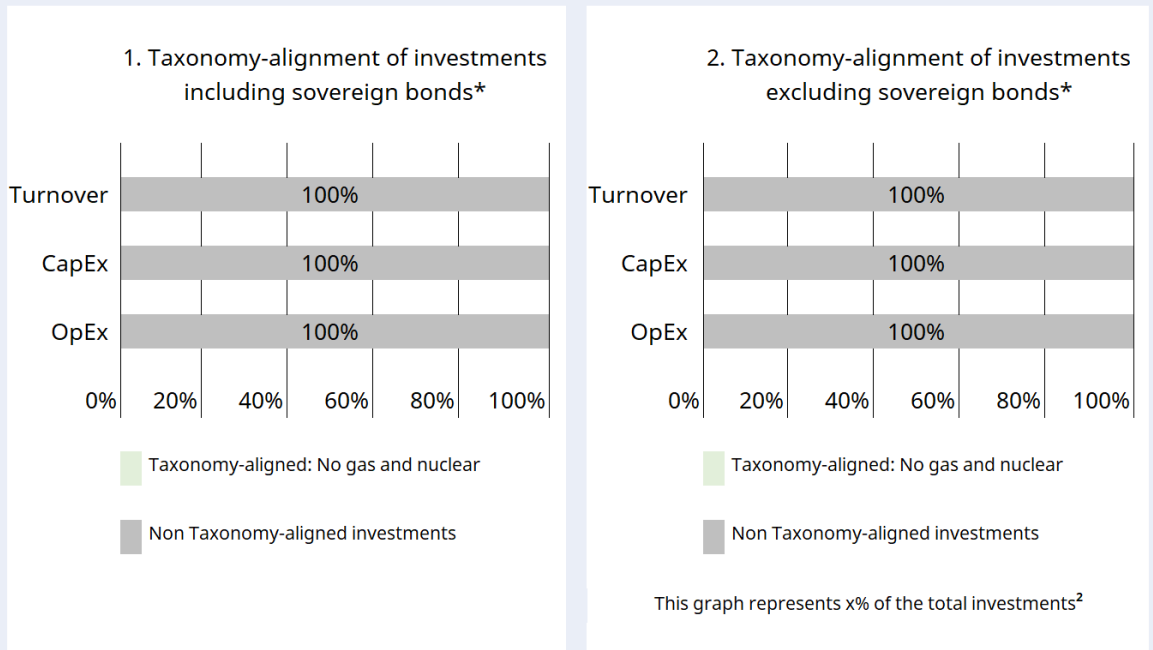

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

All sustainable investments made by the Fund had social objectives and so there were no sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

## • *What was the share of socially sustainable investments?*

All sustainable investments made by the Fund had social objectives.

## • *What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 4 September 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Food and Water

**Legal Entity Identifier :** 549300KTYV51C0X44G74

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 58%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 38%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling. All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 96% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental and/or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a minimum of 50% of their revenues from whose main activity is associated and are directly contributing to the provision of food and water. The Fund invested in companies involved in making the global food and water system more sustainable, as defined by companies driving positive change across at least one of the five key sustainability areas (GHG emissions, water usage, biodiversity, physical pollution and waste, and health and nutrition). The Investment Manager manually added companies that met certain criteria with revenue exposure below 50% to the Fund's investment universe. Examples of indicators used to assess sustainability included GHG emissions reduction targets, water usage assessments, records of environmental damage or water usage and product exposure to sustainable food and water solutions.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as biodiversity and deforestation targets, carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings, publicly available corporate information as well as the Investment Manager's internal proprietary tools. The Investment Manager invested 62% of the portfolio in issuers classified as Best-in-class and 34% of the portfolio in issuers classified as Neutral. These figures were calculated as the average of the reference period based on quarter-end data. The Fund did not invest in any companies classified as Laggards during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	94
Jan 2022 - Dec 2022	94

### Best-in-class

*This table details the percentage of assets invested in Best-in-class and Neutral, year on year*

Period	Fund (%)
Jan 2024 - Dec 2024	Best-in-class – 62 Neutral – 34
Jan 2023 - Dec 2023	Best-in-class – 60 Neutral – 34
Jan 2022 - Dec 2022	Best-in-class – 61 Neutral – 31

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## How were the indicators for adverse impacts on sustainability factors taken into account?

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

The Fund's exclusions:

- Fossil fuels: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions) were considered via the application of an exclusion screen where companies that are deemed by the Investment Manager to contribute significantly to climate change are excluded from the investible universe.

During the reference period, PAIs were also considered through integration in the investment process. The Fund considered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and activities negatively affecting biodiversity-sensitive areas (PAI 1, 2, 3 and 7) in its analysis as part of the 'environmental management' component of the stakeholder analysis. As part of our analysis, we consider how a firm is managing its environmental footprint (including its

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. While no single metric determines the overall assessment of a company's environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders' proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders' proprietary tool. All PAI indicators were monitored via Schroders' PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Natural Capital and Biodiversity	22
Climate Change	15
Human Rights	9
Corporate Governance	8
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers. The Investment Manager meets with companies on a regular basis to discuss market dynamics, company fundamentals and sustainability issues. Alongside these regular company engagements, where sustainability is usually discussed but not always the sole reason for contact, the Investment Manager also undertakes dedicated sustainability engagements in collaboration with our Sustainable Investment team. These engagements are dedicated solely to ESG issues. The number of engagements in the table above refer to the dedicated sustainability engagements where sustainability issues are either the entire focus of the company meeting or discussed for a significant portion of the meeting.

During the reference period, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3, 7 and PAI 4 from Annex 1 Table 2, we continued to engage with companies around two specific areas, deforestation, and climate change. For deforestation, we took a multi-tiered approach and used a scorecard to assess companies' exposure to deforestation risks. We aim to raise awareness, share best practices, and increase transparency alongside using best efforts to eliminate commodity-driven deforestation activities from the fund's portfolio by the end of 2025. Our second key focus was to engage with companies across a number of industries and sub-sectors where the carbon intensity was very high and/or the business model was threatened by climate change. Through our engagement efforts, we aimed to encourage companies to set clear and measurable emissions reduction targets for all three scopes of emissions that were aligned to SBTi and, where targets were already set, to ensure these targets are properly integrated into company remuneration policies. All PAI indicators are monitored via Schroders' PAI dashboard.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

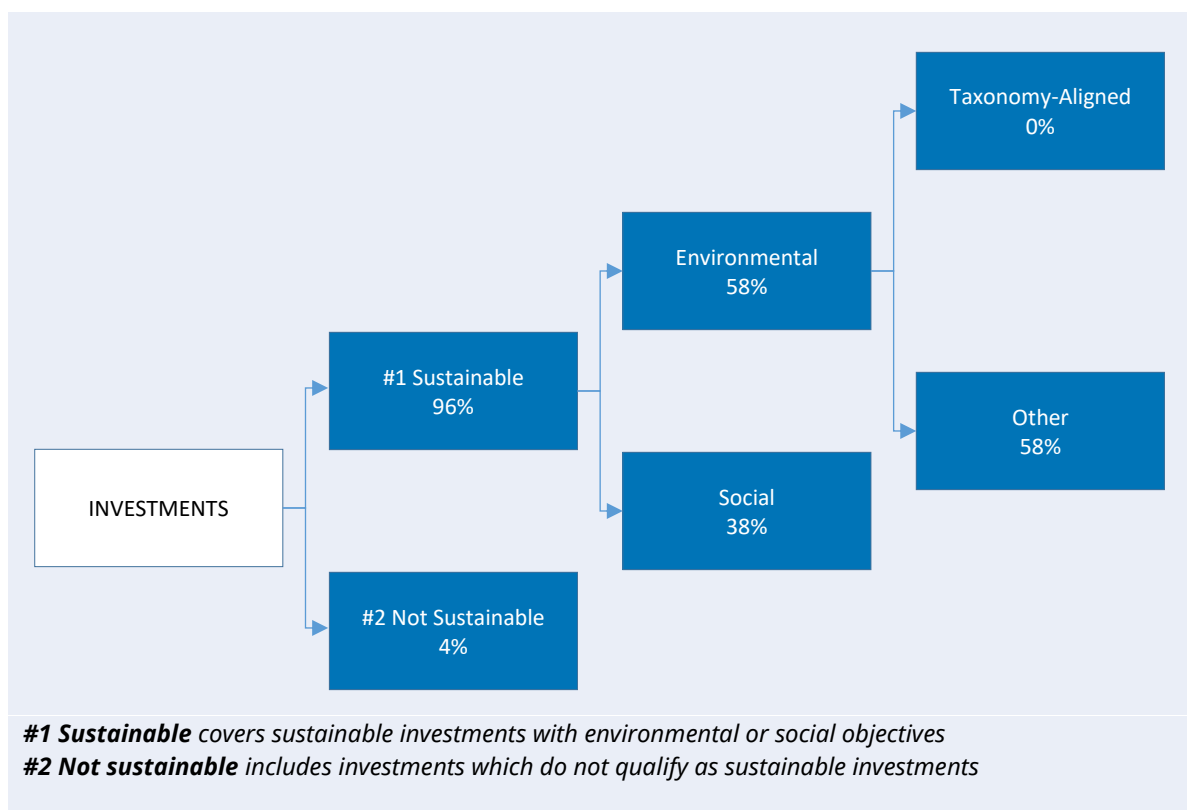

#1 Sustainable are investments in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund invested 96% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 58% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Materials	Materials	35.90
Consumer Staples	Food, Beverage & Tobacco	30.29
Industrials	Capital Goods	13.04
Consumer Staples	Consumer Staples Distribution & Retail	12.36
Consumer Staples	Household & Personal Products	2.71
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.05
Cash	Cash	3.66

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

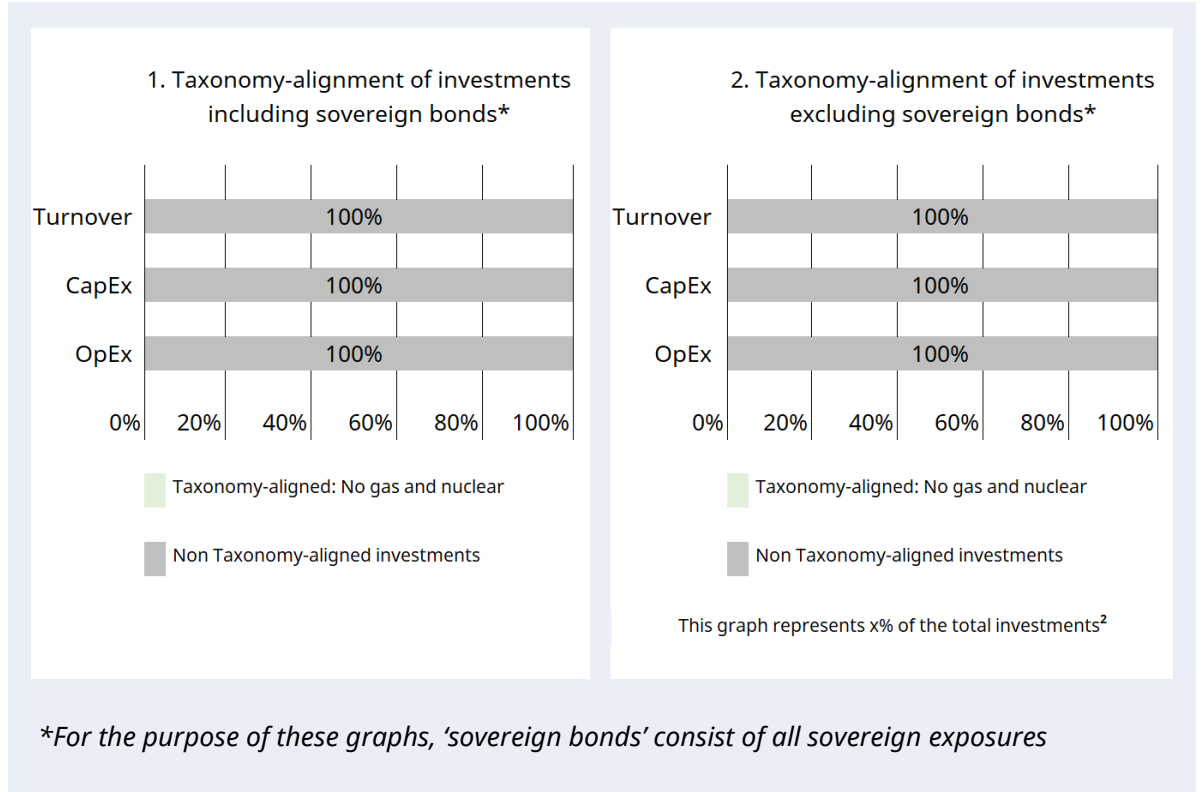

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 58%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 38%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in companies worldwide that the Investment Manager expected to contribute towards the provision of sustainable food and water including water management, agricultural equipment, agricultural inputs, food production, processing, packaging and distribution, food and water retail and recycling;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager engaged with issuers held in the portfolio and on average aimed to meet or speak with company management once every six months. During these meetings sustainability topics were regularly discussed alongside business trends and financial performance;
- During the reference period the Investment Manager conducted 57 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to climate change, natural capital and biodiversity, human capital management, human rights, and corporate governance.
- In particular the Investment Manager engaged with companies that have the greatest exposure to commodity-driven deforestation. In line with firm wide policies the Fund is seeking to eliminate commodity-driven deforestation activities from the Fund's portfolio by 2025.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Growth

**Legal Entity Identifier :** 0NL750Z6XT6U5506U359

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.2% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 74% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	66
Aug 2022 - Dec 2022	59

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.2	-2.1
Jan 2023 - Dec 2023	4.3	-2.9
Jan 2022 - Dec 2022	4.1	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration of these metrics in our analysis of companies’ stakeholder relationships which is central to our stock selection for this fund. As part of the investment process, output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies’ sustainability characteristics. For example, PAIs 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management quality and company strategy. During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics / indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intense industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe. All PAI indicators are monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies across a number of sectors on climate commitments and biodiversity targets related to PAI 1, 2, 3 and PAI 4 from Annex 1 Table 2. We also engaged with a number of companies domiciled in Japan on Human Capital Management.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Corporate Governance	13
Human Rights	12
Diversity and Inclusion	4
Human Capital Management	4
Natural Capital and Biodiversity	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.80	United States

BOOKING HOLDINGS INCORPORATED COMMON STOCK USD0.008	Consumer Discretionary	2.55	United States
SALESFORCE INCORPORATED	Information Technology	2.55	United States
MASTERCARD INCORPORATED CLASS A COMMON STOCK USD0.0001	Information Technology	2.54	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

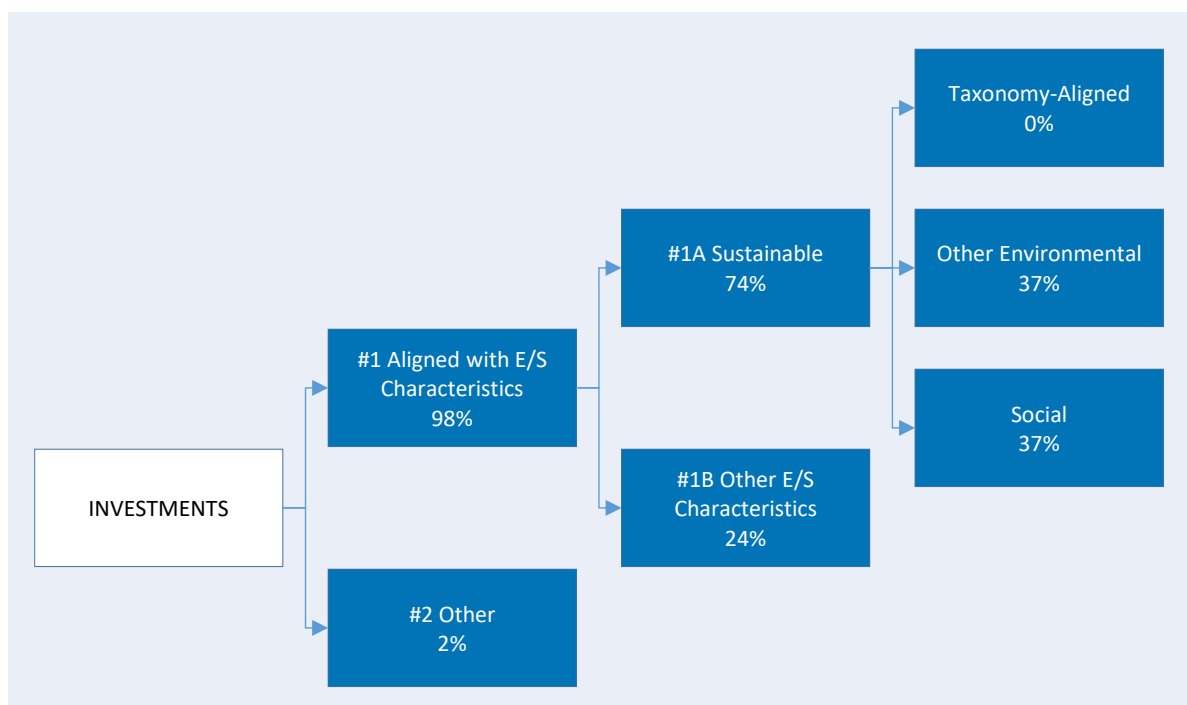

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 74% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 37% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	26.51
Information Technology	Semiconductors & Semiconductor Equipment	10.26
Information Technology	Technology Hardware & Equipment	6.49
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.52
Health Care	Health Care Equipment & Services	6.05
Industrial	Capital Goods	10.11
Industrial	Commercial & Professional Services	2.35
Consumer Discretionary	Consumer Discretionary Distribution & Retail	8.00
Consumer Discretionary	Media & Entertainment	2.86
Consumer Discretionary	Consumer Durables & Apparel	1.31
Financial	Banking	7.09
Financial	Financial Services	0.80
Financial	Insurance	0.64
Consumer Staples	Food, Beverage & Tobacco	3.17
Consumer Staples	Consumer Staples Distribution & Retail	2.53
Consumer Staples	Household & Personal Products	0.34
Materials	Materials	1.63
Cash	Cash	1.32

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 37%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Value

**Legal Entity Identifier :** 549300F4GDD1IL4MMG90

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 86% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.2% and the benchmark's sustainability score for the reference period was -1.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 86% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	86
Jan 2023 - Dec 2023	79
Aug 2022 - Dec 2022	78

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	4.2	-1.9
Jan 2023 - Dec 2023	3.0	-2.9
Jan 2022 - Dec 2022	4.0	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment via the sustainability framework that sits at the heart of the investment process. This framework uses a “triple lens” approach that uses Schrodgers’ proprietary tools, external third-party data and qualitative on-desk analysis to incorporate several PAIs in our sustainability analysis of each stock. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 13 (Board gender diversity) was included as part of a company’s overall governance assessment and we considered the ratio of female to male board members in investee companies, expressed as a percentage of all board members.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with several Japanese investee companies on gender diversity at board level and discussed appropriate progress that they should be making and what our expectations are, related to PAI 13. We also engaged with several companies on biodiversity, related to PAI 7 involving discussions around anti-microbial resistance (AMR).

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	21
Human Rights	16
Climate Change	16
Natural Capital and Biodiversity	13
Diversity and Inclusion	7
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
HENKEL AG AND CO KGAA NPV (BEARER)	Consumer Staples	3.81	Germany

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 86% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 43% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Consumer Discretionary	Media & Entertainment	9.47
Consumer Discretionary	Consumer Durables & Apparel	7.57
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.56
Consumer Discretionary	Automobiles & Components	0.64
Financial	Banking	10.44
Financial	Insurance	6.37
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.85
Health Care	Health Care Equipment & Services	5.10
Information Technology	Software & Services	5.87
Information Technology	Technology Hardware & Equipment	4.37
Information Technology	Semiconductors & Semiconductor Equipment	2.64
Communication Services	Telecommunication Services	11.28
Consumer Staples	Consumer Staples Distribution & Retail	5.98

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Consumer Staples	Household & Personal Products	3.81
Industrial	Commercial & Professional Services	4.22
Industrial	Transportation	1.71
Real Estate	Equity Real Estate Investment Trusts (REITs)	2.60
Cash	Cash	1.51

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 43%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 43%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund invested at least 75% of its assets in healthcare and medical related companies worldwide that the Investment Manager considered contributed towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach. The Fund invested in other companies in industries adjacent to healthcare or healthcare related services. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 94% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager assessed a company's contribution to the UN SDGs, by identifying companies with a material or accelerating exposure to activities that contributed to better healthcare outcomes or adjacencies such as fitness and wellbeing that are increasingly recognised as contributors to long-term health. A company's assessment considered a number of factors, including, but not limited to, the percentage of healthcare-related activities

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributing to revenues and R&D spend or implied in the company valuation.

At the end of the reference period, 94% of the Fund was invested into companies with alignment to the SDGs, of this 87% of the portfolio was aligned to SDG 3 Good Health and Wellbeing.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	94
Jan 2023 - Dec 2023	95
Jan 2022 - Dec 2022	92

### UN SDG 3 alignment

*This table details the Fund's estimated UN SDG 3 alignment, year on year.*

Period	UN SDG	Fund (%)
Jan 2024 - Dec 2024	3	87
Jan 2023 - Dec 2023	3	85
Jan 2022 - Dec 2022	3	89

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data. The 2022 alignment percentage was calculated based on holdings at the end of the reference period using the version of our proprietary tool as at February 2023. From 2023 the alignment percentage represents the average over the reference period, based on quarter-end data.

From 1 January 2023, the Fund disclosed under Article 8 (prior to that date it disclosed under Article 9).

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund invested at least 75% of its assets in healthcare and medical related companies worldwide that contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach.

## • How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in our investment process. As a thematic fund orientated towards the provision of healthcare products and services, we paid particular attention to those indicators considered material to companies operating in these industries, specifically PAI 6 (Energy consumption intensity per high impact climate sector), 8 (Emissions to water), and 9 (Hazardous waste and radioactive waste ratio). PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered using data from our internal proprietary tool.

In addition, Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 8, 9 and PAI 4 from Annex 1 Table 2 were included as part of a company's overall environmental score. These PAIs, amongst others, were embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 was also considered as part of our assessment of good governance, management quality and company strategy. During the reference period, PAIs 2 and PAI 4 from Annex 1 Table 2 were considered relative to industry peers and poor performance issuers on these metrics/ indicators received higher risk scores in our assessment and formed the basis of our engagement activities.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with a number of investee companies on climate commitments related to PAI 1 and PAI 4 from Annex 1 Table 2. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Human Rights	9
Corporate Governance	7
Climate Change	6
Diversity and Inclusion	3
Natural Capital and Biodiversity	1
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ELI LILLY AND COMPANY COMMON STOCK NPV	Health Care	6.53	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The percentage represents the average invested in sustainable investments during the reference period, based on quarter-end data.

#1A Sustainable are investments in healthcare and medical related companies worldwide that were

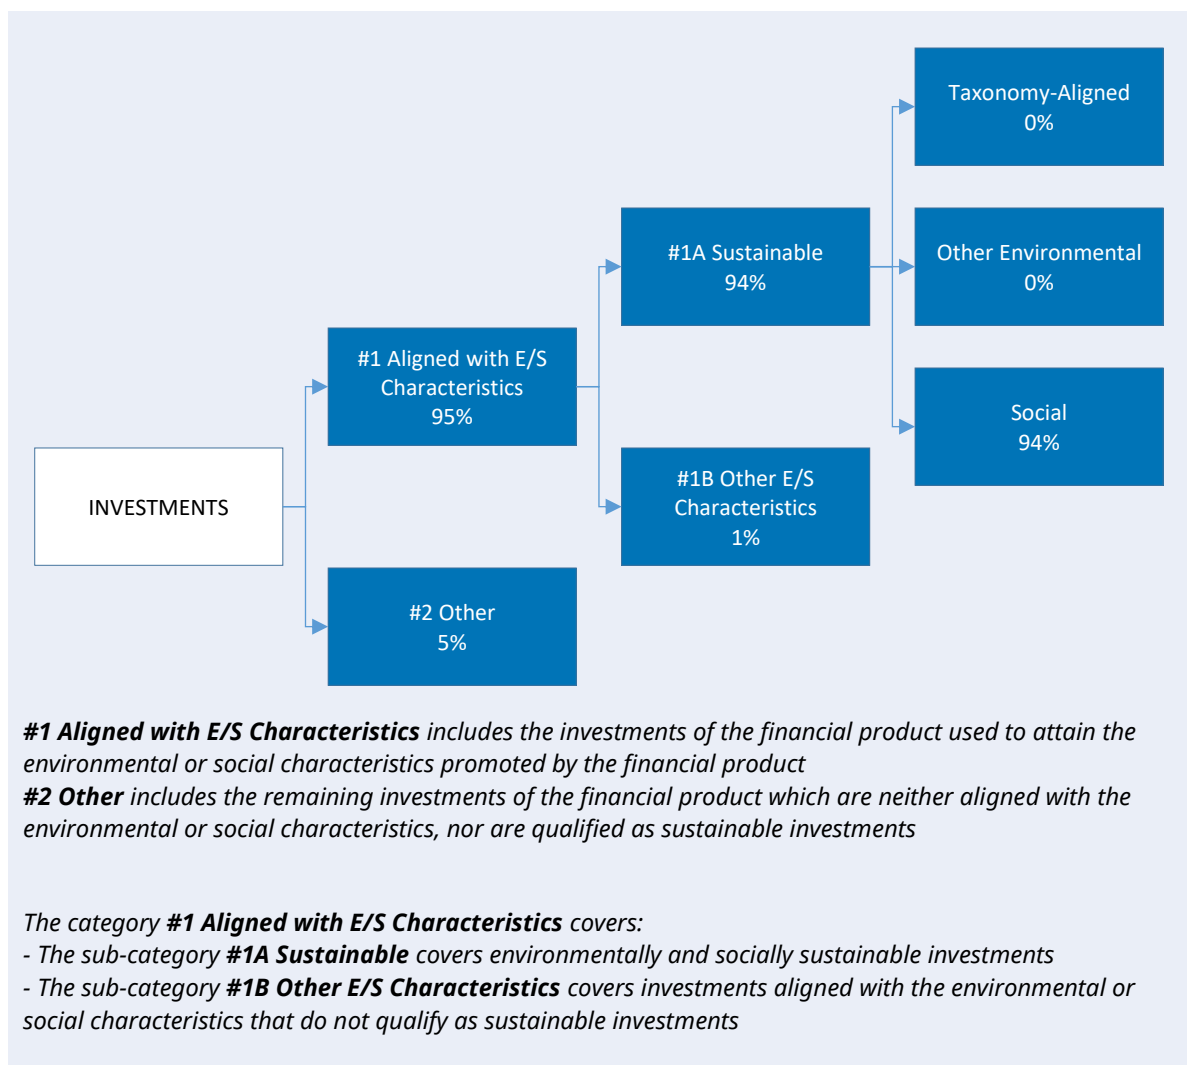

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

expected to contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach.

All the sustainable investments had a social objective.

#2 Other includes cash, which was treated as neutral for sustainability purposes and investments in companies in industries adjacent to healthcare or healthcare related services.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	58.97
Health Care	Health Care Equipment & Services	35.63
Cash	Cash	4.36
Consumer Staples	Consumer Staples Distribution & Retail	0.60
Information Technology	Technology Hardware & Equipment	0.44

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

## • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

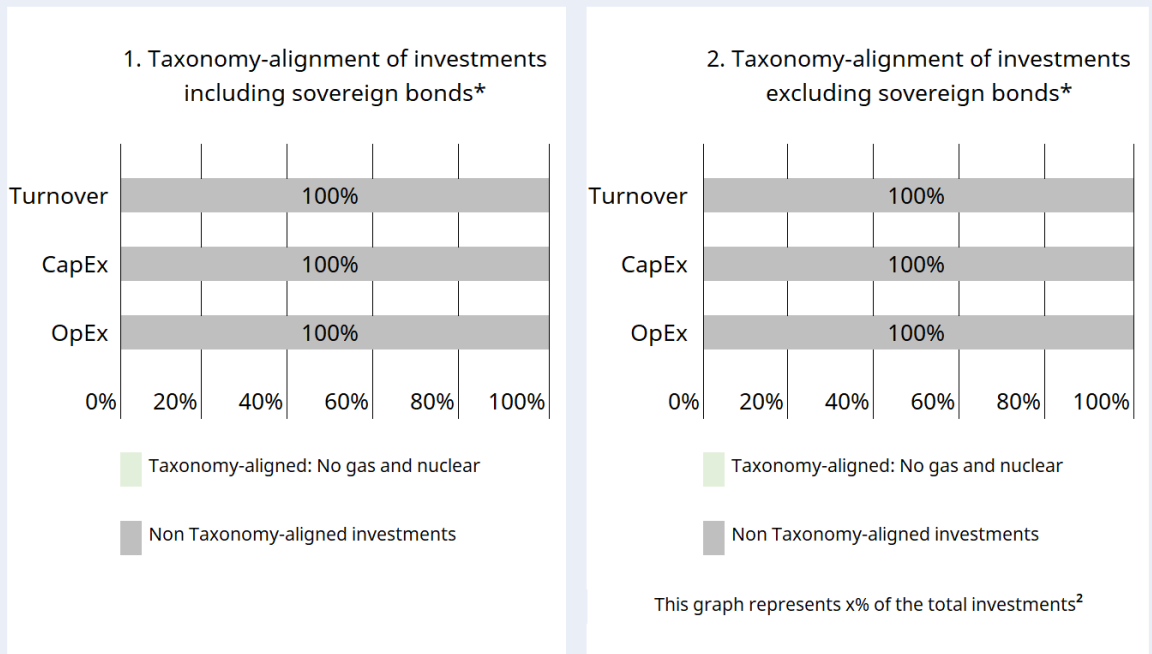

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

All sustainable investments made by the Fund had social objectives and so there were no sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

All sustainable investments made by the Fund had social objectives.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Fund invested at least 75% of its assets in healthcare and medical related companies worldwide that contribute towards the advancement of one or more of the UN SDGs by promoting growth in healthcare provision and medical treatments and improving healthcare standards using an innovation-led approach;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

As an example we engaged with a major pharmaceutical company who reaffirmed their commitment to urgent healthcare challenges, notably antimicrobial resistance (AMR). They highlighted full internal compliance with AMR Alliance and Wastewater API standards, underscored antibiotic stewardship, and addressed activist investor interventions that shaped the company's leadership and strategy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Indian Equity

**Legal Entity Identifier :** EBELRBOUMD6RMWOVEX67

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -6.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	70

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.0	-6.2
Jan 2023 - Dec 2023	3.3	-5.3

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	9
Human Rights	4

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Diversity and Inclusion	3
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
HDFC BANK LIMITED INR1	Financial	6.38	India
ICICI BANK LIMITED SPONSORED ADR (EACH REPRESENTS 2 ORDINARY INR10)	Financial	5.83	India

SBI LIFE INSURANCE COMPANY LIMITED NPV	Financial	2.20	India
FORTIS HEALTHCARE LIMITED INR10	Health Care	2.16	India
NHPC LTD INR10	Utilities	2.14	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

Asset allocation

• *What was the asset allocation?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

describes the share of investments in specific assets.

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 12% was invested in sustainable investments with an environmental objective and 53% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	19.62
Financial	Financial Services	4.45
Financial	Insurance	2.20
Financial	Real Estate	1.25
Industrial	Capital Goods	16.88
Industrial	Transportation	2.60
Consumer Discretionary	Automobiles & Components	5.69
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.18
Consumer Discretionary	Consumer Services	1.84
Consumer Discretionary	Consumer Durables & Apparel	1.69
Consumer Staples	Food, Beverage & Tobacco	4.91
Consumer Staples	Household & Personal Products	3.13
Consumer Staples	Consumer Staples Distribution & Retail	0.07
Information Technology	Software & Services	7.84
Health Care	Health Care Equipment & Services	3.88
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	3.16
Energy	Oil & Gas Refining & Marketing	6.15
Utilities	Utilities	4.22
Utilities	Gas Utilities	0.83
Communication Services	Telecommunication Services	3.59
Materials	Materials	2.60
Cash	Cash	-0.77

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 12%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 53%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

No investments were included in #2 Other.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Indian Opportunities

**Legal Entity Identifier :** 549300ISB6Y5VVS1WQ05

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.8% and the benchmark's sustainability score for the reference period was -6.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	61
Jan 2023 - Dec 2023	62

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.8	-6.2
Jan 2023 - Dec 2023	2.0	-6.2

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	9
Human Rights	2

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Natural Capital and Biodiversity	1
Corporate Governance	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2024 to 31 Dec 2024

Largest Investments	Sector	% Assets	Country
TATA CONSULTANCY SERVICES LIMITED INR1	Information Technology	5.12	India
TORRENT POWER LIMITED INR10	Utilities	4.97	India
HDFC BANK LIMITED INR1	Financial	4.43	India
BAJAJ FINANCE LIMITED INR2	Financial	3.54	India
AVENUE SUPERMARTS LIMITED NPV	Consumer Staples	3.40	India

NESTLE INDIA LTD INR1	Consumer Staples	2.19	India
SUNDARAM FINANCE LIMITED INR10	Financial	2.17	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## Asset allocation

describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI India (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 7% was invested in sustainable investments with an environmental objective and 54% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	11.71
Financial	Financial Services	10.63
Financial	Real Estate	1.47
Financial	Insurance	0.65
Consumer Discretionary	Automobiles & Components	9.34
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.75
Consumer Discretionary	Consumer Services	1.69
Consumer Discretionary	Consumer Durables & Apparel	1.03
Industrial	Capital Goods	10.65
Industrial	Transportation	1.56
Industrial	Commercial & Professional Services	0.09
Information Technology	Software & Services	10.53
Information Technology	Semiconductors & Semiconductor Equipment	0.14
Information Technology	Technology Hardware & Equipment	0.13
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	7.84
Health Care	Health Care Equipment & Services	2.71
Consumer Staples	Food, Beverage & Tobacco	3.63
Consumer Staples	Consumer Staples Distribution & Retail	3.40
Materials	Materials	6.26
Utilities	Utilities	5.10
Communication Services	Telecommunication Services	3.14
Cash	Cash	2.34
Energy	Oil & Gas Refining & Marketing	1.00
Real Estate	Real Estate Management & Development	0.14
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 7%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 54%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Japanese Opportunities

**Legal Entity Identifier :** GGI5GYUNQ0FQ074VII96

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 51% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.4% and the benchmark's sustainability score for the reference period was -2.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 51% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	51
Jan 2023 - Dec 2023	48
Sep 2022 - Dec 2022	44

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.4	-2.6
Jan 2023 - Dec 2023	0.2	-3.2
Jan 2022 - Dec 2022	0.3	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schrodgers proprietary tools. The analysts’ views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors. All PAI indicators are monitored via Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

gender diversity, related to PAI 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	13
Corporate Governance	9
Natural Capital and Biodiversity	5
Diversity and Inclusion	5
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
SUMITOMO MITSUI FINANCIAL GROUP INCORPORATED NPV	Financial	4.01	Japan
T&D HOLDINGS INCORPORATED NPV	Financial	3.44	Japan
ITOCHU CORPORATION NPV	Industrial	2.89	Japan
ORIX CORPORATION NPV	Financial	2.62	Japan
TOYOTA INDUSTRIES CORPORATION JPY50	Consumer Discretionary	2.53	Japan
TOKIO MARINE HOLDINGS INCORPORATED NPV	Financial	2.42	Japan
C. UYEMURA & CO LTD NPV	Materials	2.14	Japan
NICHIAS CORPORATION NPV	Industrial	2.09	Japan

FUKUOKA FINANCIAL GROUP INCORPORATED NPV	Financial	1.78	Japan
NEXON COMPANY LIMITED NPV	Information Technology	1.76	Japan
TAKEUCHI MANUFACTURING COMPANY LIMITED NPV	Industrial	1.74	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

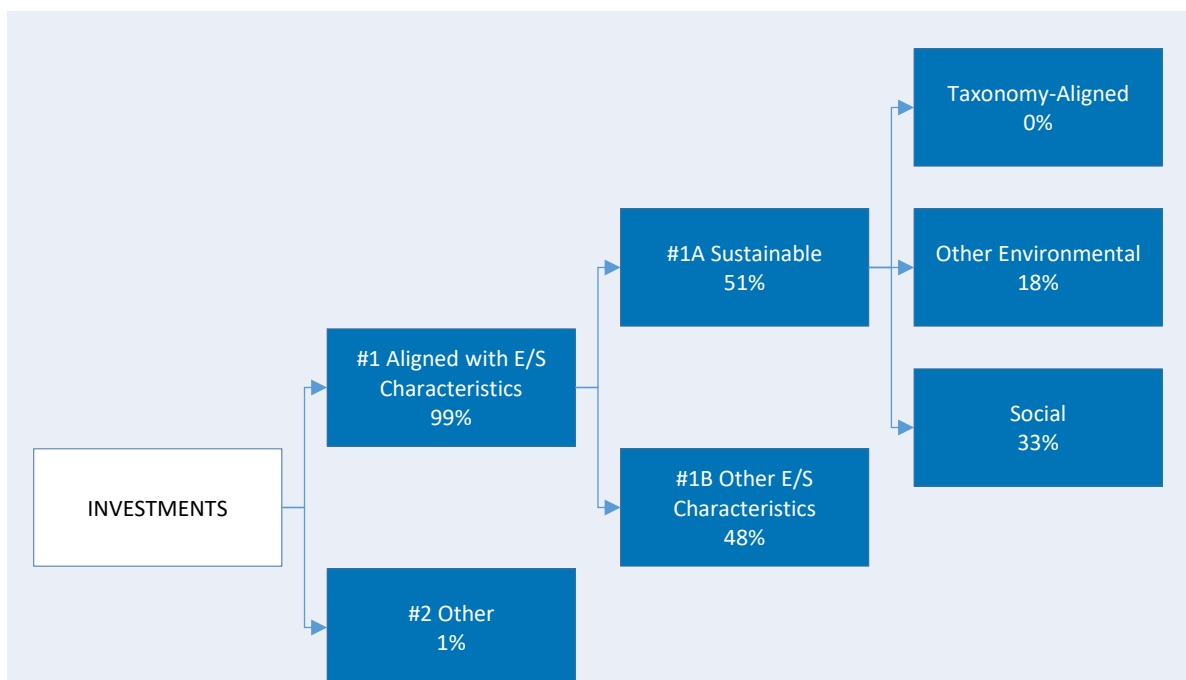

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section (TOPIX) (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 51% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	21.73
Industrial	Commercial & Professional Services	1.39
Industrial	Transportation	1.31
Consumer Discretionary	Automobiles & Components	13.65
Consumer Discretionary	Consumer Durables & Apparel	3.76
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.65
Consumer Discretionary	Consumer Services	0.10
Financial	Banking	6.39
Financial	Insurance	5.95
Financial	Financial Services	3.63
Financial	Real Estate	3.27
Information Technology	Software & Services	5.49
Information Technology	Semiconductors & Semiconductor Equipment	4.03
Information Technology	Technology Hardware & Equipment	3.63
Materials	Materials	8.88
Materials	Industrial Gases	1.62
Health Care	Health Care Equipment & Services	2.46
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.86
Consumer Staples	Consumer Staples Distribution & Retail	3.07
Consumer Staples	Food, Beverage & Tobacco	0.73
Communication Services	Telecommunication Services	2.30
Cash	Cash	1.19
Cash	Margin Cash	0.01
Energy	Oil & Gas Refining & Marketing	0.93

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 33%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Japanese Smaller Companies

**Legal Entity Identifier :** S39CY7QBBMJNLVU5NJ44

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### The EU Taxonomy

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -1.0%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Sanitation
- Water Access

The Investment Manager invested 57% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	57
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	53

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.6	-1.0
Jan 2023 - Dec 2023	1.7	-1.2
Jan 2022 - Dec 2022	1.7	-1.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schrodgers proprietary tools. The analysts’ views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors. All PAI indicators are monitored via Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board gender diversity, related to PAI 13.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	7
Climate Change	4
Diversity and Inclusion	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Jan 2024 to 31 Dec 2024

Largest Investments	Sector	% Assets	Country
HAMAKYOREX COMPANY LIMITED NPV	Industrial	2.65	Japan
MARUWA COMPANY LIMITED NPV	Information Technology	2.37	Japan
NIPPON AQUA COMPANY LIMITED NPV	Industrial	2.14	Japan
TRUSCO NAKAYAMA CORPORATION NPV	Industrial	2.13	Japan
DAINICHISEIKA COLOR AND CHEMICALS MANUFACTURING COMPANY LIMITED NPV	Materials	2.10	Japan
AI HOLDINGS CORPORATION NPV	Information Technology	2.01	Japan
FUKUSHIMA GALILEI CO LTD NPV	Industrial	2.01	Japan
METAWATER COMPANY LIMITED NPV	Industrial	2.01	Japan
TAKARA STANDARD CO LTD	Industrial	1.94	Japan
NIFCO INCORPORATED NPV	Consumer Discretionary	1.92	Japan
OBARA GROUP INCORPORATED NPV	Industrial	1.92	Japan
KONISHI COMPANY LIMITED NPV	Materials	1.91	Japan
SHINKO INDUSTRIES LIMITED NPV	Industrial	1.90	Japan
SEPTENI HOLDINGS COMPANY LIMITED NPV	Consumer Discretionary	1.88	Japan
NITTOKU ENGINEERING CO LTD	Industrial	1.88	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sources.

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

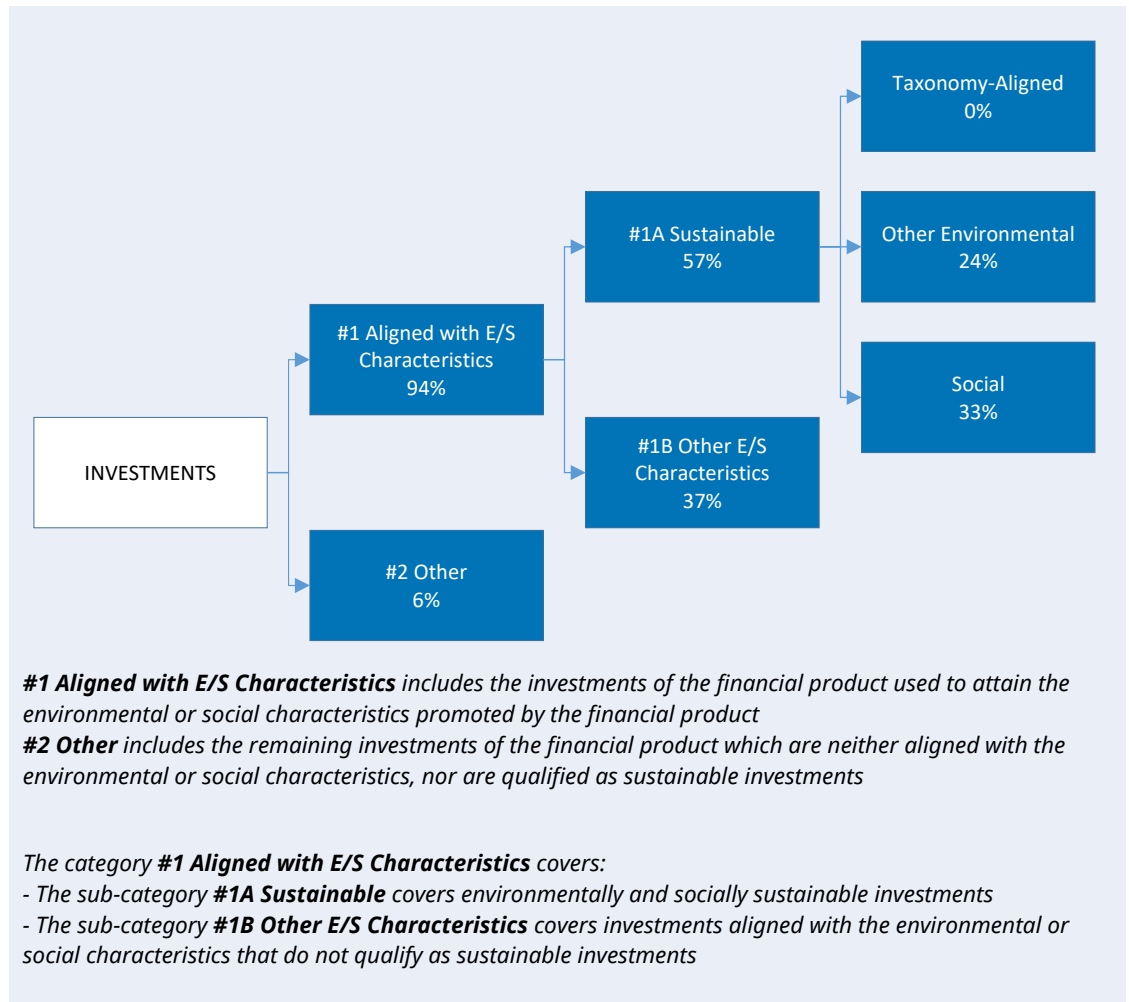

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the Russell Nomura Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 57% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	26.58
Industrial	Commercial & Professional Services	6.71
Industrial	Transportation	2.82
Information Technology	Software & Services	12.47
Information Technology	Technology Hardware & Equipment	8.29
Information Technology	Semiconductors & Semiconductor Equipment	5.80
Consumer Discretionary	Media & Entertainment	3.50
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.95
Consumer Discretionary	Consumer Services	2.27
Consumer Discretionary	Consumer Durables & Apparel	2.21
Consumer Discretionary	Automobiles & Components	1.92
Materials	Materials	10.54
Financial	Financial Services	3.87
Financial	Real Estate	2.12
Financial	Banking	2.12
Cash	Cash	3.09
Health Care	Health Care Equipment & Services	1.31
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.35
Communication Services	Media & Entertainment	0.91
Communication Services	Telecommunication Services	0.16

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

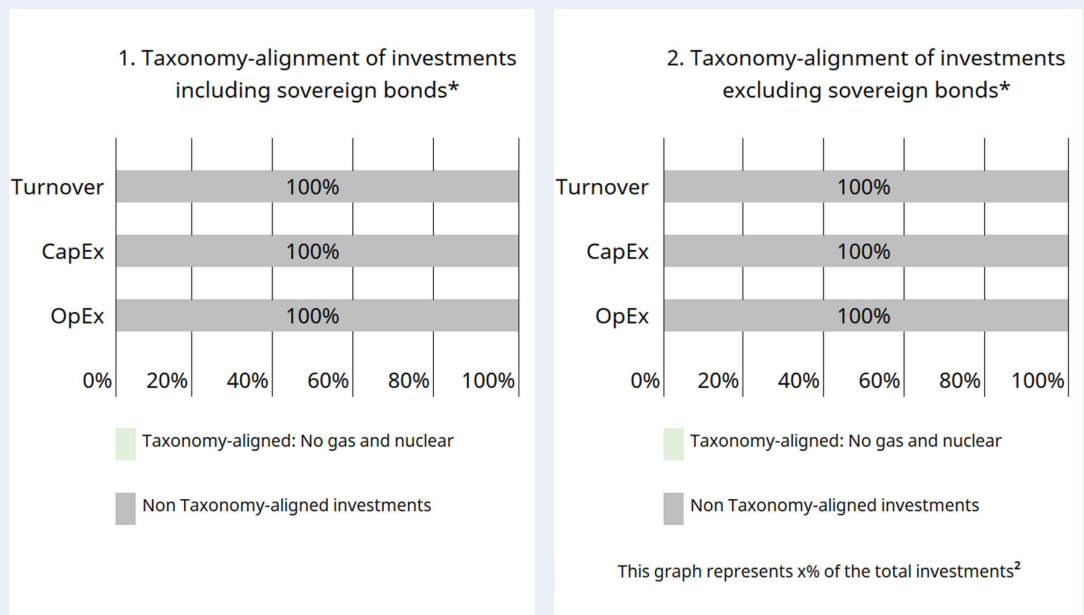

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 33%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

### Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Nordic Micro Cap  
**Legal Entity Identifier :** 549300LG1HXZURKG0379

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 88% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.2% and the benchmark's sustainability score for the reference period was 0.8%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 88% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	88
Jan 2023 - Dec 2023	89
Aug 2022 - Dec 2022	88

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.2	0.8
Jan 2023 - Dec 2023	2.9	0.7
Mar 2022 - Dec 2022	2.5	0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 92%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Micro Cap (Net TR) Index and so the Fund's investments that

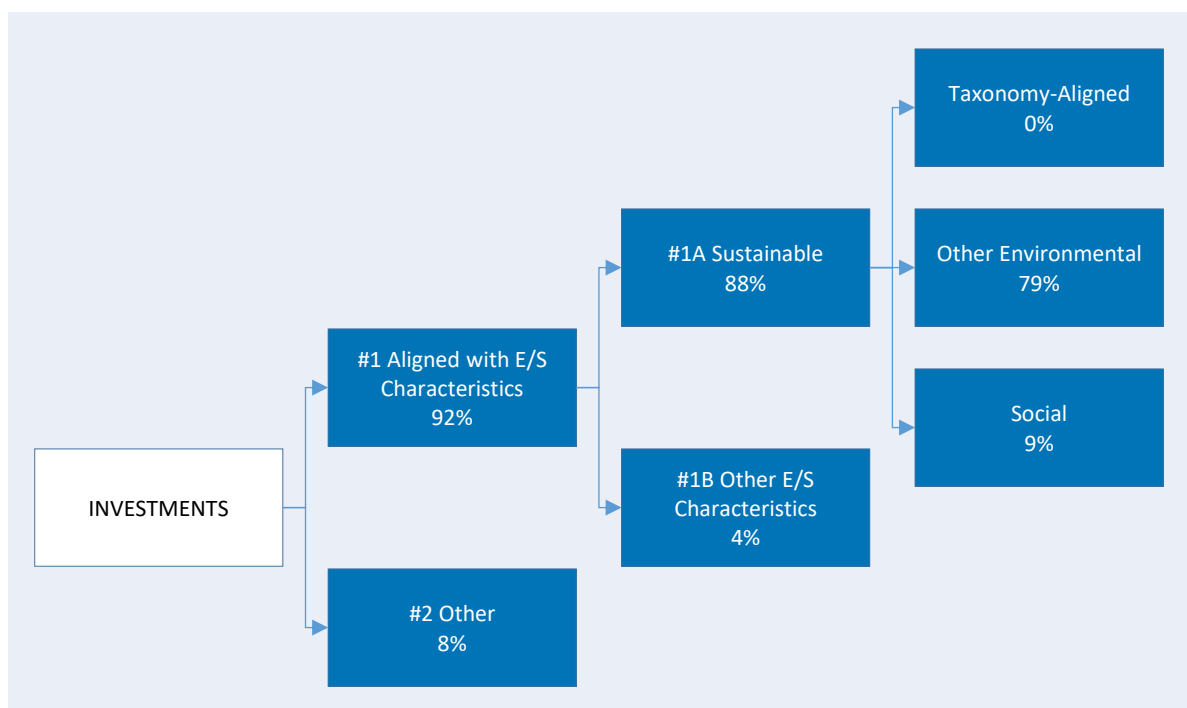

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 88% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 79% was invested in sustainable investments with an environmental objective and 9% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	24.94
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	14.33
Information Technology	Software & Services	22.19
Information Technology	Technology Hardware & Equipment	14.04
Industrial	Capital Goods	8.65
Industrial	Commercial & Professional Services	1.31
Cash	Cash	4.90
Consumer Discretionary	Consumer Durables & Apparel	2.98
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.40
Consumer Discretionary	Media & Entertainment	0.02
Communication Services	Media & Entertainment	3.93
Materials	Materials	1.20
Consumer Staples	Household & Personal Products	0.11

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 79%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 9%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Nordic Smaller Companies

**Legal Entity Identifier :** 5493006ZHNOXP7Z2DS89

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 87% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.7% and the benchmark's sustainability score for the reference period was -0.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Training

The Investment Manager invested 87% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	87
Jan 2023 - Dec 2023	85
Aug 2022 - Dec 2022	83

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.7	-0.6
Jan 2023 - Dec 2023	2.6	-1.9
Jan 2022 - Dec 2022	1.7	-2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
Dynavox Group AB	Information Technology	4.23	Sweden
EMBLA MEDICAL HF	Health Care	3.53	Iceland
VAISALA OYJ SERIES 'A' NPV	Information Technology	3.39	Finland
AFRY AB-B SHS SEK5	Industrial	3.13	Sweden
ALK-ABELLO CLASS B DKK10	Health Care	2.87	Denmark
QT GROUP	Information Technology	2.82	Finland
NORDNET SEK0.005	Financial	2.73	Sweden
NOLATO AB-B SHS SEK0.5	Industrial	2.71	Sweden
Fagerhult Group AB SEK0.57	Industrial	2.53	Sweden
BIOTAGE AB SEK1.28	Health Care	2.48	Sweden
CELLAVISION AB	Health Care	2.34	Sweden
BIOGAIA CLASS B SEK0.2	Health Care	2.24	Sweden
BOOZT AB	Consumer Discretionary	2.22	Sweden
KNOW IT AB SEK1	Information Technology	2.16	Sweden
GUBRA DKK1	Health Care	2.05	Denmark

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the MSCI Nordic Smaller Companies (Net TR) Index and so the Fund's

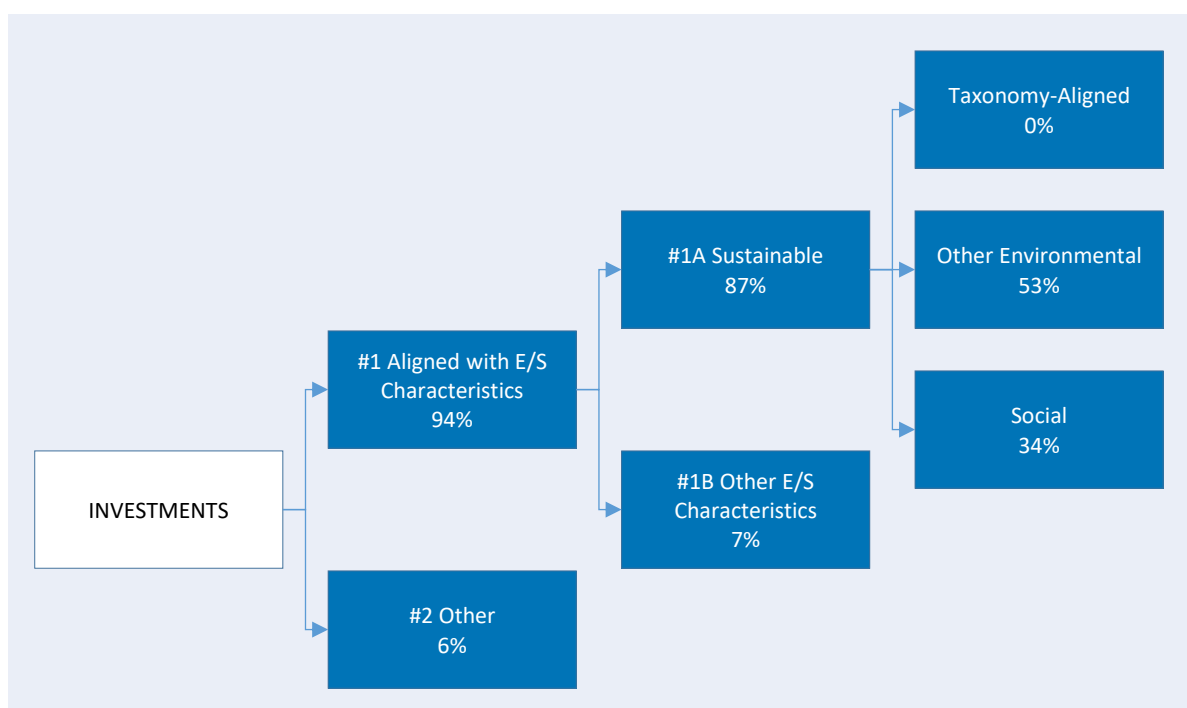

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 87% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 53% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	18.61
Health Care	Health Care Equipment & Services	12.09
Information Technology	Software & Services	13.59
Information Technology	Technology Hardware & Equipment	10.00
Information Technology	Semiconductors & Semiconductor Equipment	0.38
Industrial	Capital Goods	14.60
Industrial	Commercial & Professional Services	6.30
Industrial	Transportation	1.02
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.42
Consumer Discretionary	Consumer Durables & Apparel	2.75
Consumer Discretionary	Media & Entertainment	1.29
Consumer Discretionary	Automobiles & Components	1.03
Cash	Cash	4.36
Financial	Financial Services	2.73
Consumer Staples	Food, Beverage & Tobacco	1.99
Consumer Staples	Consumer Staples Distribution & Retail	0.19
Communication Services	Media & Entertainment	2.10
Materials	Materials	1.55

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 53%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Smart Manufacturing

**Legal Entity Identifier :** 549300DYPXYJ7UC4NK03

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.1% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Water Access

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	59

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.1	-2.1
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-0.6	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer’s overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer’s overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their commitment to mitigating climate change, which relates to PAIs 1, 2 and 3. All PAI indicators were monitored via Schrodgers’ PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	9
Climate Change	8

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Human Rights	3
Human Capital Management	3
Diversity and Inclusion	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
MICROSOFT CORPORATION COMMON STOCK USD0.0000125	Information Technology	6.37	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

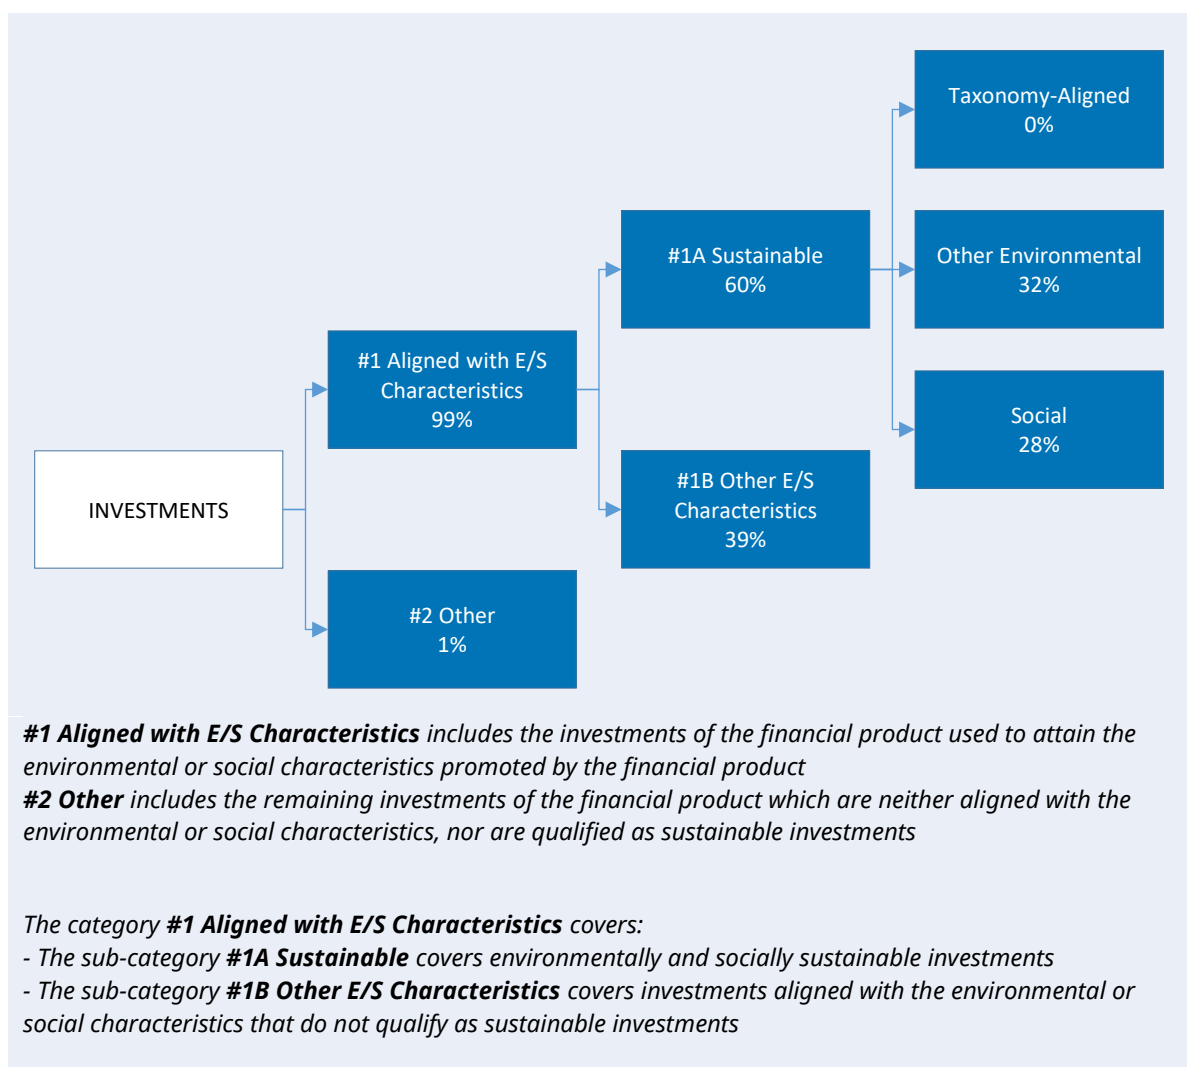

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	48.75
Industrial	Commercial & Professional Services	1.99
Industrial	Transportation	1.84
Information Technology	Technology Hardware & Equipment	14.80
Information Technology	Software & Services	13.51
Information Technology	Semiconductors & Semiconductor Equipment	7.38
Consumer Discretionary	Consumer Durables & Apparel	4.00
Materials	Industrial Gases	1.71
Materials	Materials	1.54
Health Care	Health Care Equipment & Services	2.38
Cash	Cash	1.15
Financial	Financial Services	0.97

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Asian Equity

**Legal Entity Identifier :** 549300B7ECKLDTN5I839

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.8% and the benchmark's sustainability score for the reference period was -2.4%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 74% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	61

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.8	-2.4
Jan 2023 - Dec 2023	4.1	-2.6
Jan 2022 - Dec 2022	4.0	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	33
Corporate Governance	11

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Human Rights	7
Natural Capital and Biodiversity	5
Diversity and Inclusion	4
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.54	Taiwan
TENCENT HOLDINGS LIMITED HKD0.00002	Information Technology	4.46	China
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	3.70	South Korea

HDFC BANK LIMITED INR1	Financial	1.65	India
MAKEMYTRIP LTD INR0.0005	Consumer Discretionary	1.57	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sources.

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 74% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 26% was invested in sustainable investments with an environmental objective and 48% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Banking	16.02
Financial	Insurance	4.93
Financial	Financial Services	2.20
Financial	Real Estate	0.85
Information Technology	Semiconductors & Semiconductor Equipment	16.29
Information Technology	Software & Services	5.20
Information Technology	Technology Hardware & Equipment	0.45
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.27
Consumer Discretionary	Consumer Durables & Apparel	4.74
Consumer Discretionary	Consumer Services	2.08
Consumer Discretionary	Automobiles & Components	1.99
Health Care	Health Care Equipment & Services	7.26
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.16
Industrial	Capital Goods	5.12
Industrial	Commercial & Professional Services	2.13
Industrial	Transportation	0.22
Utilities	Utilities	5.96
Communication Services	Telecommunication Services	4.71
Communication Services	Media & Entertainment	0.53
Materials	Materials	3.81
Consumer Staples	Consumer Staples Distribution & Retail	1.22
Consumer Staples	Household & Personal Products	0.70
Consumer Staples	Food, Beverage & Tobacco	0.40
Cash	Cash	1.59
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.17

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 48%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

**Product Name :** Schroder ISF Sustainable Global Growth and Income

**Legal Entity Identifier :** 549300UPXPBL5GB7UE22

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.3% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	55

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	2.3	-2.1
Jan 2023 - Dec	2.3	-2.9
Jan 2022 - Dec	1.7	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration of these metrics in our analysis of companies’ stakeholder relationships which is central to our stock selection for this fund. As part of the investment process, output from our proprietary stakeholder framework was used which incorporates several PAIs as a component of our evaluation of companies’ sustainability characteristics. For example, PAIs 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental assessment. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of Good Governance, management quality and company strategy. During the reference period, PAI 7 (Activities negatively affecting biodiversity-sensitive areas) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered and poor performance issuers on these metrics/ indicators frequently contributed to companies being deemed uninvestible for this strategy. In carbon-intense industries, our assessment of PAI 6 and PAI 4 from Annex 1 Table 2 were important contributors to our overall evaluation and inclusion in our investible universe. All PAI indicators are monitored via Schrodgers’ PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies across a number of sectors on climate commitments and biodiversity targets related to PAI 1, 2, 3 and PAI 4 from Annex 1 Table 2. We also engaged with a number of companies domiciled in Japan on Human Capital Management.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	27
Corporate Governance	14
Human Rights	14
Natural Capital and Biodiversity	8
Diversity and Inclusion	7
Human Capital Management	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the

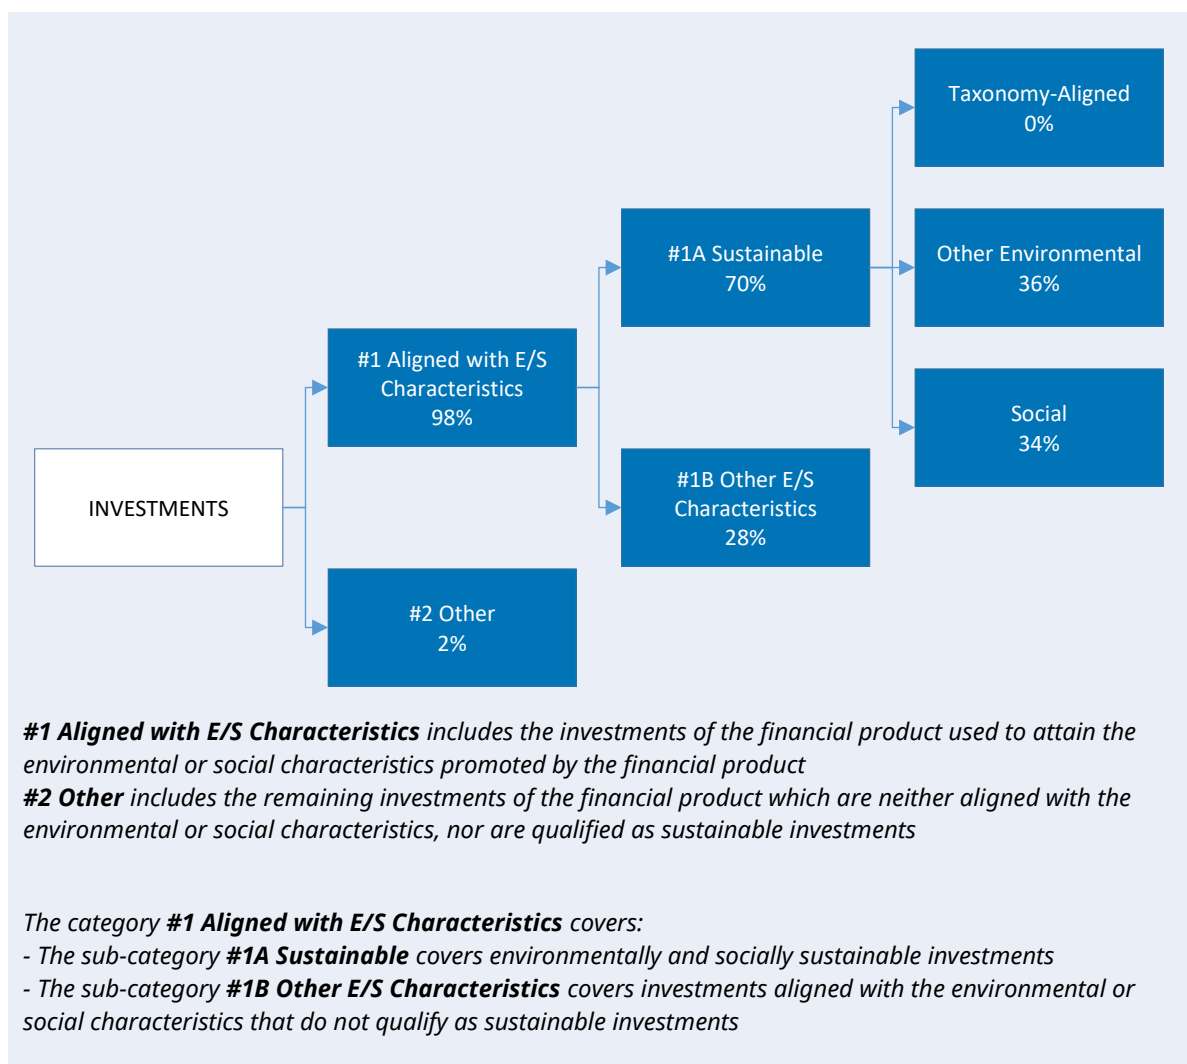

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

reference period, based on quarter-end data.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 36% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	24.52
Information Technology	Semiconductors & Semiconductor Equipment	10.68
Information Technology	Technology Hardware & Equipment	3.34
Financial	Banking	12.39
Financial	Financial Services	4.00
Financial	Insurance	1.81
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.77
Consumer Discretionary	Media & Entertainment	2.46
Consumer Discretionary	Automobiles & Components	1.24
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.59
Health Care	Health Care Equipment & Services	2.37
Industrial	Capital Goods	9.51
Consumer Staples	Household & Personal Products	3.15
Consumer Staples	Food, Beverage & Tobacco	2.91
Materials	Materials	1.77
Cash	Cash	1.68
Utilities	Utilities	1.52
Communication Services	Telecommunication Services	0.30

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

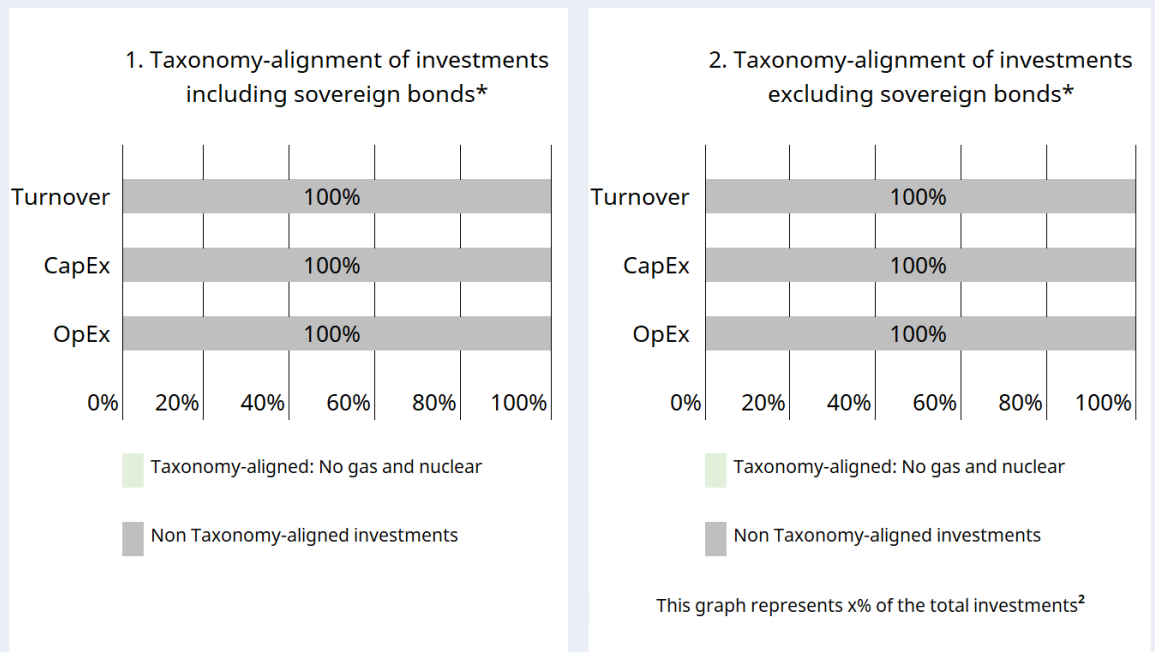

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Infrastructure

**Legal Entity Identifier :** 549300LQDLCTMJKBFO18

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 65%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 34%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute towards the development of global sustainable infrastructure such as sustainable infrastructure assets including regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 99% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager assessed whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls. The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager used several sustainability indicators at an investee company level to measure its contribution to the Fund's sustainability objective. The Fund focused on companies principally involved in more sustainable regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure and avoided less sustainable and lower growth oil & gas infrastructure, roads, airports and port activities.

The Investment Manager used a revenue alignment to UN SDGs including UN SDG 6 (Clean Water and Sanitation), UN SDG 7 (Affordable and Clean Energy), UN SDG 9 (Industry, Innovation and Infrastructure), UN SDG 11 (Sustainable Cities and Communities), UN SDG 12 (Responsible Consumption and Production) and UN SDG 13 (Climate Action) using a Schrodgers' proprietary tool as well as the proportion of capital expenditure which contributes to environmental objectives using company reports as well as desk and third party estimates.

In addition, the Investment Manager reviewed both company specific and overall portfolio externalities using another Schrodgers' proprietary tool and the portfolio and constituent holdings were also reviewed against external third party ESG ratings.

### • *...and compared to previous periods?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

As this is our first reporting period, this question is not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments not cause significant harm to any sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

PAIs were also considered through integration in the investment process. Further details are provided below:

- Emissions and emissions intensity (PAI 1-3) were a particular focus, both absolute and relative to the benchmark. Science based targets, temperature alignment, environmentally contributing capex and emissions intensity (g CO<sub>2</sub>/KWh for power generation) were assessed via various data sources.
- Schroders’ proprietary tools incorporate several PAIs as a component of their scoring methodology. In assessing an issuer’s overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 (Greenhouse gas emissions) were included. In assessing an issuer’s overall social score, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were included.
- PAIs were considered using the proprietary tools as part of analyst coverage of companies. In addition, the issuers’ scores and the aggregate impact on the portfolio were considered by the fund managers as part of portfolio construction.
- While individual PAI data was reviewed on an adhoc basis, the entire portfolio and investible universe was reviewed on at least a quarterly basis which can result in some changes to the investible universe (new inclusions and exclusions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. All PAI indicators were monitored via Schroders’ PAI

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

dashboard.

During the reference period, we actively participated in a number of working groups and were co-lead managers for company engagement within the CA100+/IIGCC/Ceres collaborative engagement framework. The main PAIs that were engaged on are carbon related (PAIs 1-4), energy intensity (PAIs 5-6), environmental impact (PAIs 7-10) and human rights (PAI 14). We have also participated in working groups with other collaborative investor initiatives such as The Investor Forum's water working group (PAI 8). We also engaged with NGOs and environmental and economic regulators with regard to carbon emissions (PAIs 1-4) and environmental impacts (PAIs 7-10).

Where issuers were flagged owing to lack of data availability for any PAIs, the Investment Manager engaged with issuers where the primary focus is to improve reporting.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme:

Engagement Theme	# Issuers
Climate Change	50
Corporate Governance	10
Natural Capital and Biodiversity	7
Human Rights	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainability investment objective are summarised below.

#1 Sustainable are investments in companies worldwide that the Investment Manager expects to contribute towards the development of global sustainable infrastructure.

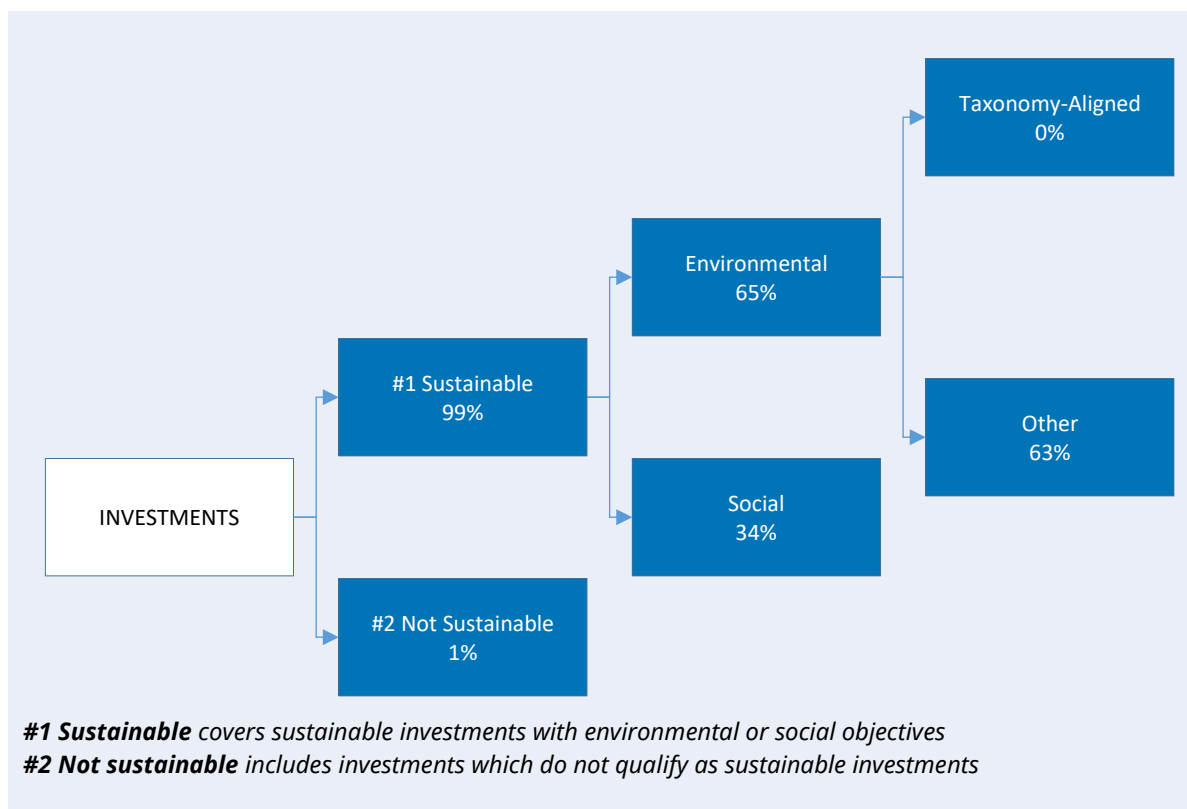

The Fund invested 99% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 65% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. This percentage represents the average of the reference period, based on quarter-end data.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

were cash, money market investments and derivatives used to reduce risk (hedging) and manage the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Utilities	Utilities	65.95
Industrial	Transportation	22.42
Financial	Real Estate	7.80
Communication Services	Telecommunication Services	3.14
Cash	Cash	0.69

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 65%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies worldwide that the Investment Manager expected to contribute towards the development of global sustainable infrastructure such as sustainable infrastructure assets including regulated energy utilities, renewable energy, water and waste utilities, rail and communications infrastructure;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies; and
- During 2024 the Investment Manager conducted 69 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to decarbonisation and executive compensation. In particular the Investment Manager engaged with companies to understand how companies would fulfil their net zero and renewable energy commitments.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Multi-Factor Equity

**Legal Entity Identifier :** 5493007XNHSEG8Q50Z18

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained:

- i) a higher overall sustainability score; and
- ii) at least a 50% lower carbon intensity score, relative to the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system

This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

Carbon intensity is a measure of a portfolio's exposure to carbon-intensive companies. It is expressed as the carbon emissions per million dollars of revenue and displayed as tons CO<sub>2</sub>e / \$M revenue. The carbon intensity is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.6% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- High Salaries
- Innovation
- Medicine
- Water Access

The Fund's carbon intensity score for the reference period was 53 CO<sub>2</sub>e/\$M and the benchmark's carbon intensity score for the reference period was 119 CO<sub>2</sub>e/\$M. This means that the Fund's average carbon intensity score over the reference period was at least 50% lower than the benchmark's average carbon intensity score over the same period, based on quarterly-end data, using data from a third party provider.

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	68
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	49

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	4.6	-2.1
Jan 2023 - Dec 2023	5.1	-2.9
Jan 2022 - Dec 2022	3.3	-4.6

### Carbon intensity score

This table details whether the fund maintained at least a 50% lower carbon intensity score, relative to the benchmark, year on year

Period	Fund (CO <sub>2</sub> e/\$M)	Benchmark (CO <sub>2</sub> e/\$M)
Jan 2024 - Dec 2024	53	119
Jan 2023 - Dec 2023	56	214
Jan 2022 - Dec 2022	72	159

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

For 2022 the carbon intensity value was calculated as an average over the last three months of the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

reference period. From 2023 the value is calculated as an average based on quarter-end data.

**• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Multinational Enterprises) and Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Companies that derived revenues above certain thresholds from activities related to thermal coal were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology and all PAI indicators were monitored through our dedicated PAI dashboard. Our proprietary sustainability framework, which is applied within our Fund's quantitative investment process, considered several key aspects:

- Greenhouse Gas Emissions: We assessed the emissions of investment companies, including their carbon footprint, to evaluate their impact on climate change. This is related to PAIs 1, 2, 3, and 4.
- Fossil Fuel Sector Exposure: We analysed the exposure of companies to the fossil fuel sector, considering their involvement in activities related to fossil fuels. This is related to PAIs 1, 2, 3, and 4.
- Biodiversity and Environmental Impact: We evaluated activities that have a negative impact on biodiversity-sensitive areas, as well as emissions to water and hazardous waste. These factors are related to PAIs 7, 8, and 9.
- Gender Pay Gap and Board Diversity: We considered the unadjusted gender pay gap and the diversity of boards within the companies we invest in. These aspects are related to PAIs 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. Other topics discussed with investee companies included board gender diversity, related to PAI 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	76
Corporate Governance	40
Human Rights	37
Natural Capital and Biodiversity	25
Diversity and Inclusion	17
Human Capital Management	12

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

During the reference period the top 15 investments were:

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
APPLE INCORPORATED COMMON STOCK NPV	Information Technology	4.90	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

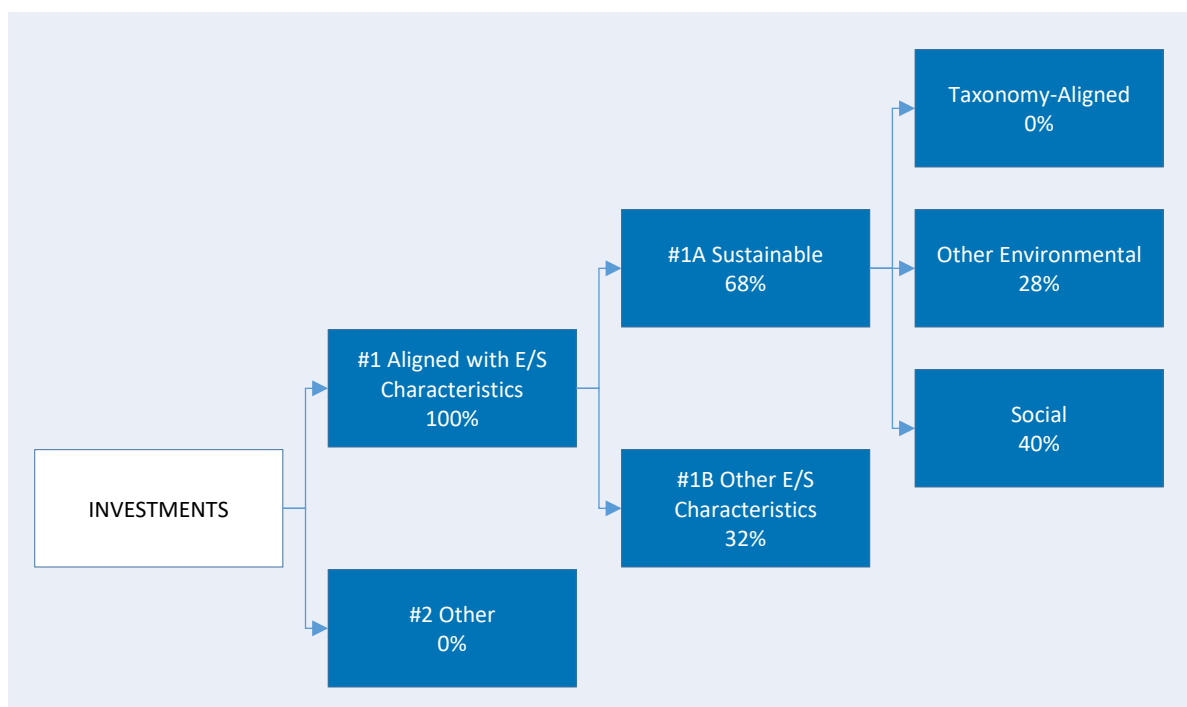

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 40% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	17.39
Information Technology	Technology Hardware & Equipment	9.33
Information Technology	Semiconductors & Semiconductor Equipment	7.73
Financial	Insurance	5.19

Communication Services	Telecommunication Services	0.65
Cash	Cash	0.42
Cash	Margin Cash	0.02
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.09

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

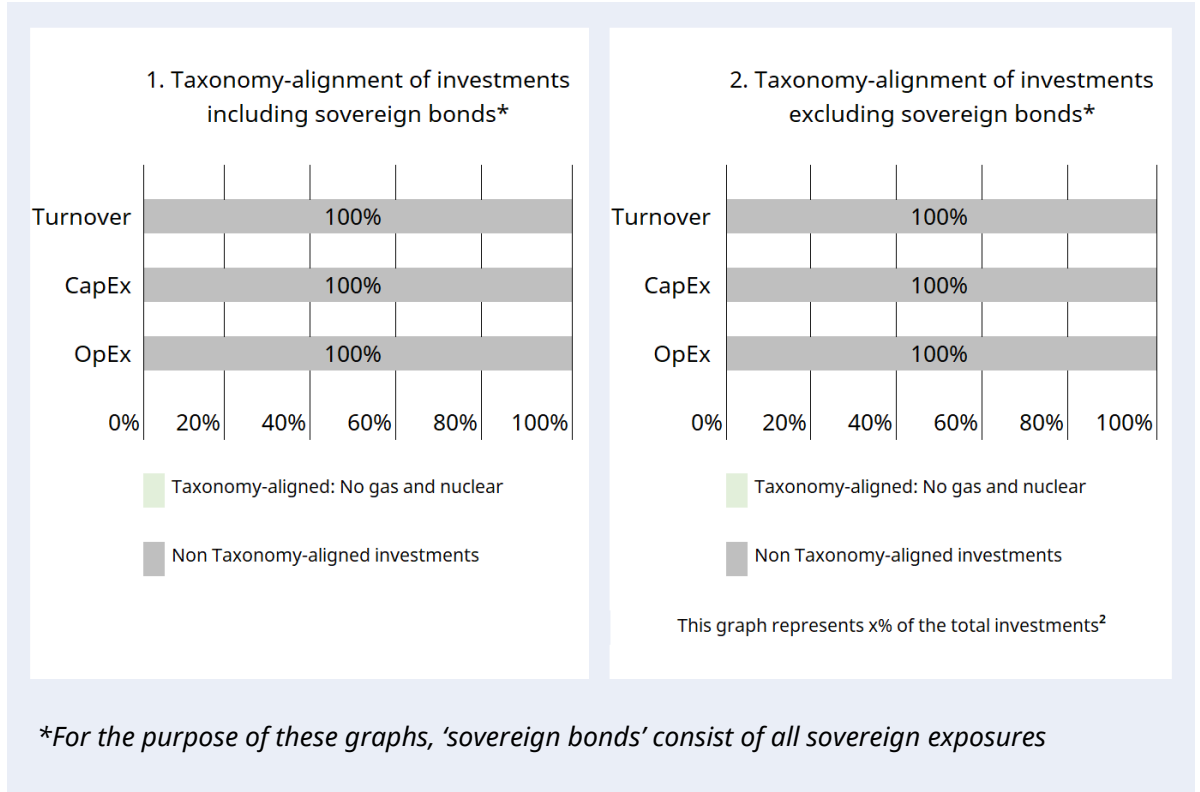

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 40%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score and carbon intensity of the Fund and of individual investments when selecting the assets held by the Fund;
- The Investment Manager utilised a Schroders' proprietary tool to help assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Swiss Small & Mid Cap Equity

**Legal Entity Identifier :** VBUW7DMTWG11EOSYCC70

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 1.8%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	73
Jan 2023 - Dec 2023	81
Aug 2022 - Dec 2022	79

### Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2024 - Dec 2024	1.8
Jan 2023 - Dec 2023	3.0
Jan 2022 - Dec 2022	3.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schrodgers’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered Climate commitments for held companies within the Utilities sector. These engagements related to PAIs 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

### Engagement Theme

### # Issuers

GALENICA SANTE LIMITED NPV 144A	Health Care	2.68	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data.

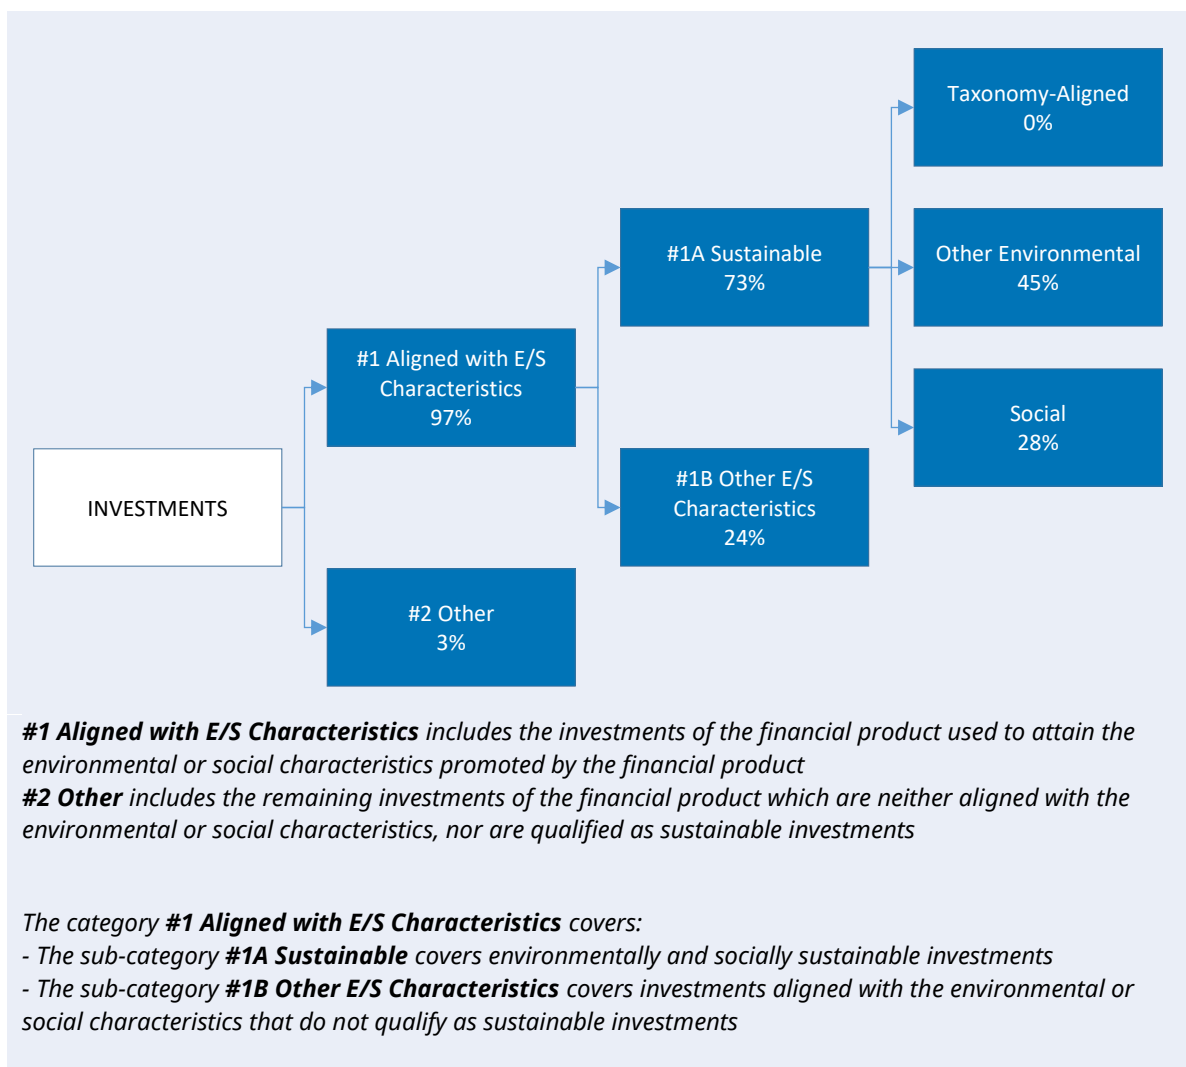

The Fund invested 73% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 45% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	27.15
Industrial	Commercial & Professional Services	2.15
Financial	Financial Services	9.41
Financial	Insurance	7.00
Financial	Banking	2.27
Financial	Real Estate	1.80
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	12.88
Health Care	Health Care Equipment & Services	5.40
Consumer Staples	Food, Beverage & Tobacco	10.43
Information Technology	Technology Hardware & Equipment	6.72
Information Technology	Software & Services	1.66
Information Technology	Semiconductors & Semiconductor Equipment	0.84
Consumer Discretionary	Consumer Durables & Apparel	5.59
Consumer Discretionary	Media & Entertainment	0.03
Materials	Materials	3.13
Utilities	Utilities	2.70
Cash	Cash	0.85

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 45%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 28%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Small & Mid-Cap Equity

**Legal Entity Identifier :** 9NVHRLTYJON1ZJWFO660

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 58% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.7% and the benchmark's sustainability score for the reference period was -0.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 58% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	58
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.7	-0.7
Jan 2023 - Dec 2023	1.5	-1.5
Aug 2022 - Dec 2022	1.4	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 6. In reference to PAI 12 and 13, we engaged with a company in the financial sector. All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	15

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Climate Change	4
Human Rights	3
Diversity and Inclusion	2
Human Capital Management	2
Natural Capital and Biodiversity	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ARAMARK COMMON STOCK USD0.01	Consumer Discretionary	2.41	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the S&P Mid Cap 400 Lagged (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

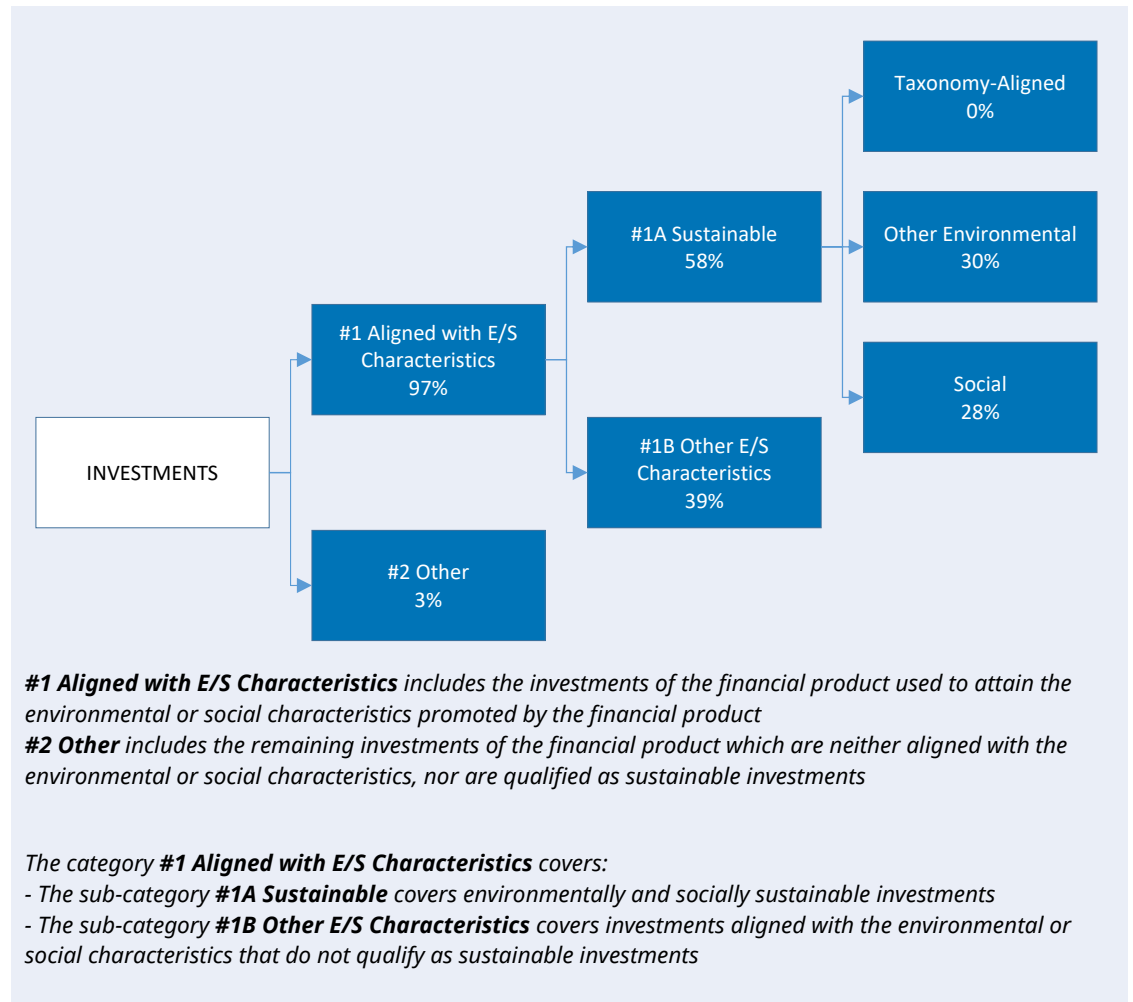

The Fund invested 58% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Technology Hardware & Equipment	10.92
Information Technology	Software & Services	8.41
Information Technology	Semiconductors & Semiconductor Equipment	4.25

Utilities	Utilities	1.09
Utilities	Gas Utilities	0.73
Consumer Staples	Food, Beverage & Tobacco	1.31

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas                       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover**  
reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

### What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

### Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Smaller Companies Impact

**Legal Entity Identifier :** RHJGQ85DVCNQT8OGL26

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 31%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 66%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. The Fund invested in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributes to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a company's products and services are expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review.

Once these steps were completed, the company and scorecard were then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

As at the end of the reference period, the companies in the Fund were aligned with the following four key impact areas; (1) 42% in health and wellness; (2) 26% in inclusion and diversity; (3) 20% in sustainable infrastructure; and (4) 12% in responsible consumption and production.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	97
Jan 2023 - Dec 2023	93
Aug 2022 - Dec 2022	95

### Key impact areas

This table details the alignment with the following four key impact areas, year on year.

Period	(1) Health and wellness	(2) Inclusion and diversity	(3) Sustainable infrastructure	(4) Responsible consumption
Jan 2024 - Dec 2024	42%	26%	20%	12%
Jan 2023 - Dec 2023	41%	23%	18%	18%
Aug 2022 - Dec 2022	37%	22%	29%	12%

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC)

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

countries subject to social violations).

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. We reviewed the PAI data in the PAI dashboard on a monthly basis during the reference period and flagged adverse impacts of PAIs relevant to our strategy which may be of concern.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 6. In reference to PAI 12 and 13, we engaged with a company in the financial sector. All PAI indicators are monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	9
Human Rights	3
Natural Capital and Biodiversity	2
Climate Change	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

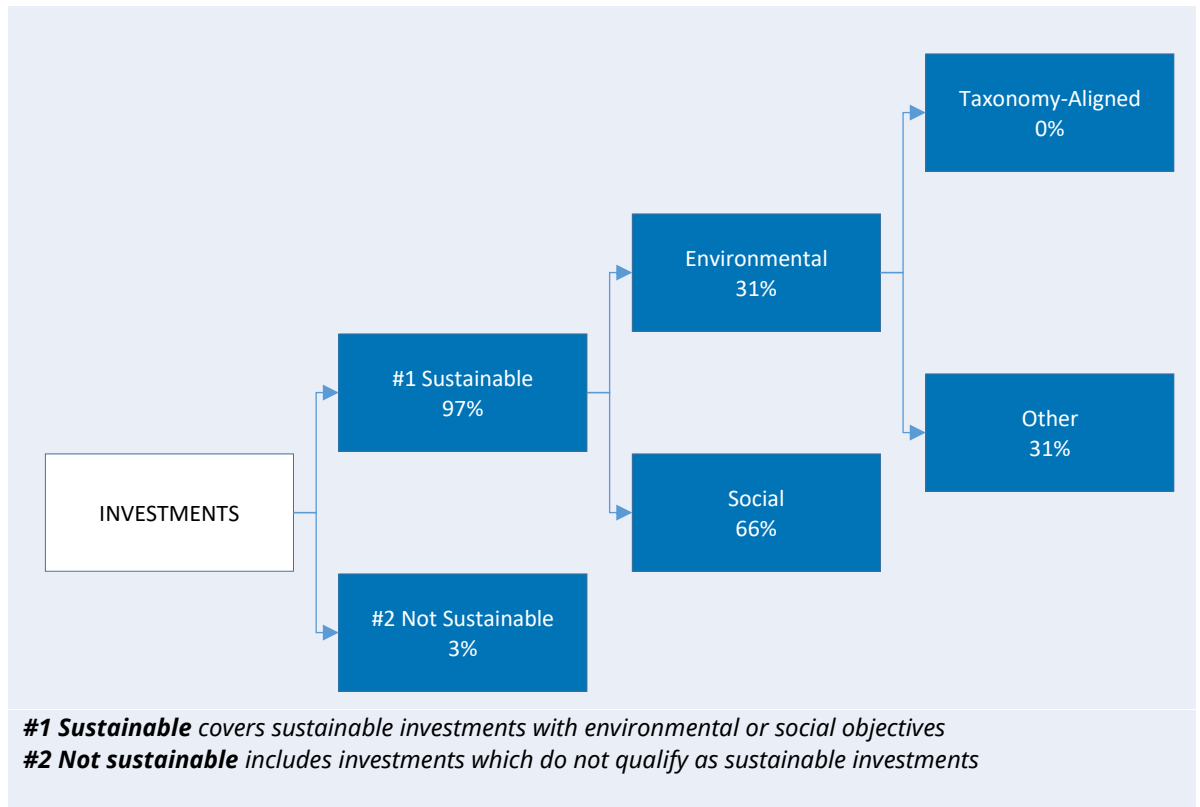

#1 Sustainable are investments in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 31% was invested in sustainable investments with an environmental objective and 66% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	14.71
Information Technology	Technology Hardware & Equipment	11.08
Information Technology	Semiconductors & Semiconductor Equipment	3.85
Health Care	Health Care Equipment & Services	14.53
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	8.83
Industrial	Commercial & Professional Services	8.78
Industrial	Capital Goods	7.03

Financial	Banking	4.31
Financial	Insurance	3.64
Financial	Real Estate	1.81
Cash	Cash	4.11
Consumer Discretionary	Consumer Durables & Apparel	2.71
Consumer Staples	Food, Beverage & Tobacco	2.69
Utilities	Utilities	1.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## • **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 66%.

## • **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in small-sized US companies that the Investment Manager expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs, and to deliver returns to shareholders over the long term;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- The Investment Manager divested from a recruitment company because their Diversity, Equity & Inclusion division was not communicating separate results meaning the Investment Manager could not track this metric; and
- The Investment Manager engaged with a sustainable timber company on the role that the company plays in upholding and expanding industry leading sustainable forestry practices. This prompted engagement with multiple stakeholders including the forest certification entity, ESG rating providers and a paper packaging company also held in the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global Core

**Legal Entity Identifier :** DKBB2F7UTNGYHT4AM790

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.2% and the benchmark's sustainability score for the reference period was -1.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	46

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.2	-1.9
Jan 2023 - Dec 2023	0.7	-2.9
Jan 2022 - Dec 2022	-1.2	-4.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies’ transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	114
Corporate Governance	49
Human Rights	49
Natural Capital and Biodiversity	34
Human Capital Management	24
Diversity and Inclusion	17

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 100%. The Fund maintained a higher overall sustainability score than the MSCI World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 33% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

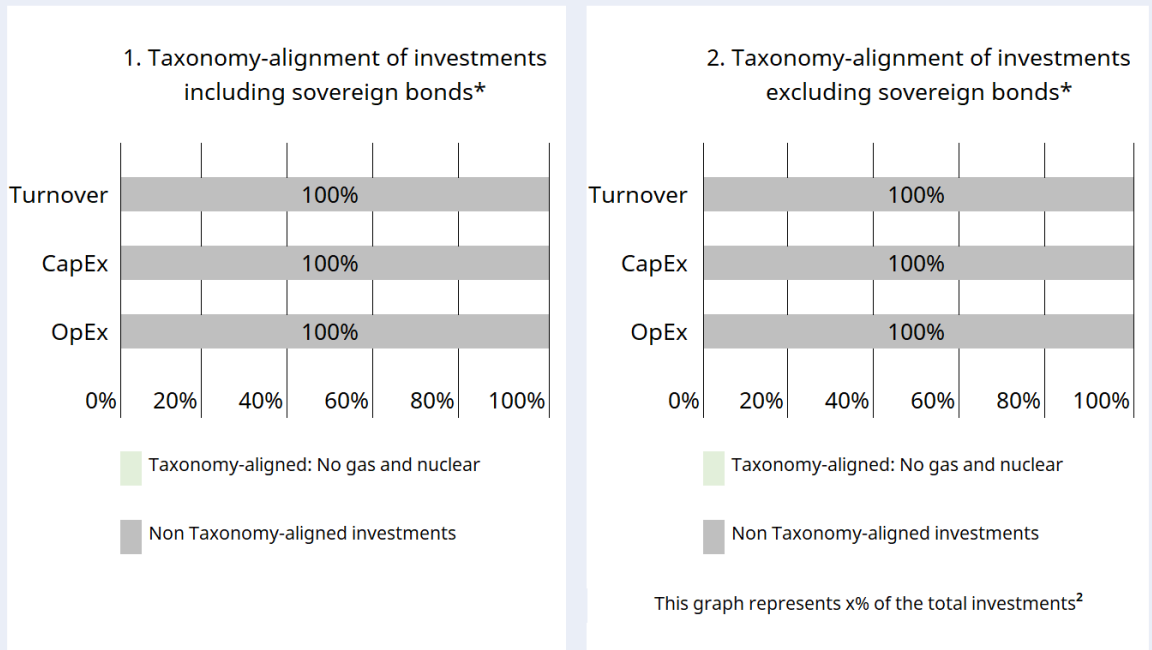

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 33%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

whether the financial product attains the environmental or social characteristics that they promote.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global ESG

**Legal Entity Identifier :** 549300Z3MJ4K5RFG8R15

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.8% and the benchmark's sustainability score for the reference period was -2.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	58

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.8	-2.9
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	1.9	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies’ transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	94
Corporate Governance	50
Human Rights	41
Natural Capital and Biodiversity	26
Human Capital Management	21
Diversity and Inclusion	15

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 31% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	10.58

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 32%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global ESG ex Fossil Fuels

**Legal Entity Identifier :** 5493006C79R4D3IXSD97

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World ex Energy (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.9% and the benchmark's sustainability score for the reference period was -1.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Water Access

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	64
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	60

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.9	-1.9
Jan 2023 - Dec 2023	1.9	-2.7
Jan 2022 - Dec 2022	2.4	-4.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund's quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies' transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	81
Corporate Governance	47
Human Rights	40
Natural Capital and Biodiversity	24
Human Capital Management	20
Diversity and Inclusion	15

The engagements shown relate to engagements with companies and issuers.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC World ex Energy (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 64% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	10.72
Information Technology	Semiconductors & Semiconductor Equipment	9.19

Cash	Margin Cash	0.04
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.65
Real Estate	Real Estate Management & Development	0.06
Cash Equivalents	Treasury Bills	0.22

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

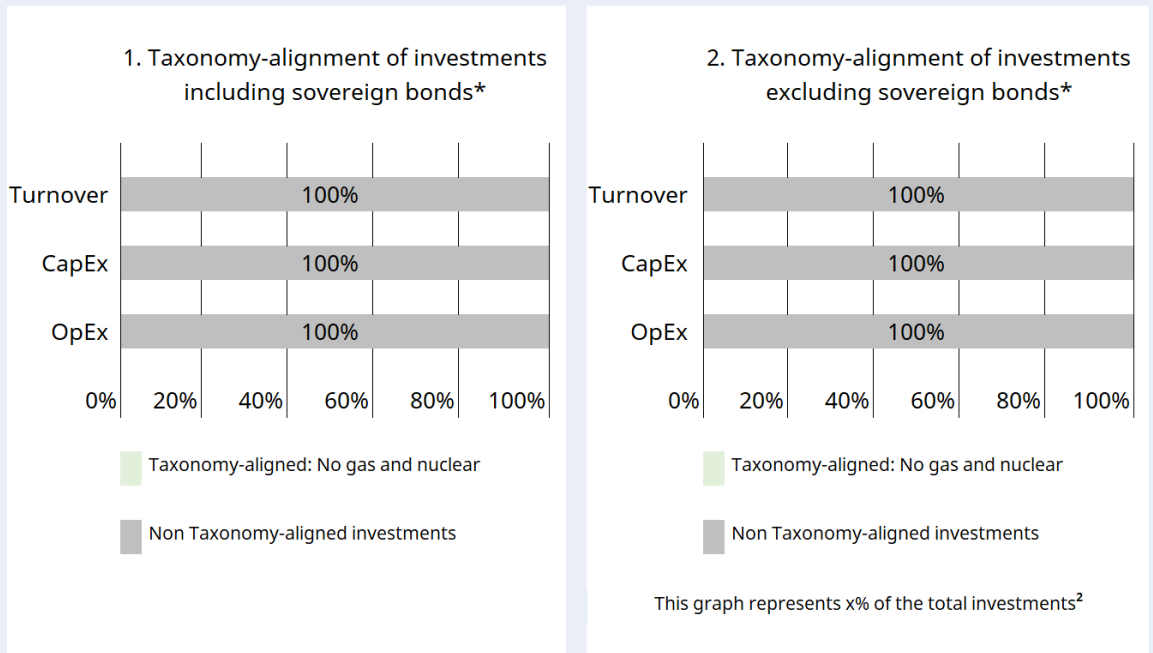

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx)  
reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 32%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF QEP Global Quality  
**Legal Entity Identifier :** AOE3GPC0XP7JH5DJTH02

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	57

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.5	-2.1
Jan 2023 - Dec 2023	1.0	-2.9
Jan 2022 - Dec 2022	-0.5	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies’ transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	78
Human Rights	44
Corporate Governance	38
Natural Capital and Biodiversity	25
Human Capital Management	21
Diversity and Inclusion	17

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall

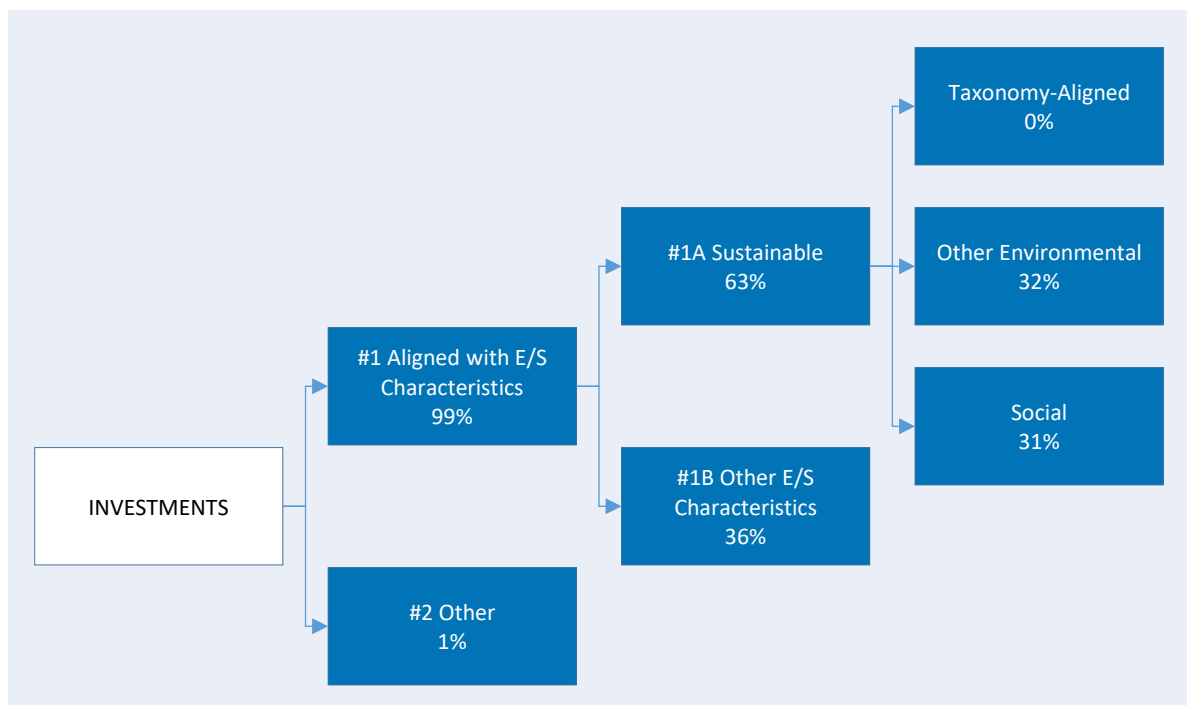

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability score than the MSCI AC World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 32% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	9.79
Information Technology	Semiconductors & Semiconductor Equipment	8.95
Information Technology	Tech Hardware & Equipment	5.24
Financials	Financial Services	5.69
Financials	Banks	5.54
Financials	Insurance	4.91
Industrials	Capital Goods	8.31
Industrials	Commercial & Professional Services	4.28
Industrials	Transportation	1.19
Health Care	Pharma, Biotech & Life Sciences	8.94
Health Care	Health Care Equipment & Services	3.76
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.43
Consumer Discretionary	Consumer Services	1.75
Consumer Discretionary	Autos & Components	1.29
Consumer Discretionary	Consumer Durables	1.14
Consumer Staples	Household & Personal Prod	3.12
Consumer Staples	Food, Beverage & Tobacco	2.82
Consumer Staples	Consumer Staples Distribution & Retail	1.69
Communication	Media & Entertainment	5.61
Communication	Telecom	1.45
Energy	Energy	4.16
Materials	Materials	3.04
Utilities	Utilities	1.42
Cash	Cash	0.80
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.68

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 32%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 31%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

financial product attains the environmental or social characteristics that they promote.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Emerging Markets ex. China Synergy

**Legal Entity Identifier :** 54930047EQ4A8M663C94

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China (NDR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.1% and the benchmark's sustainability score for the reference period was -4.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Water Access

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	54
Jan 2023 - Dec 2023	53

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.1	-4.1
Jan 2023 - Dec 2023	-1.6	-3.4

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/professional/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies’ transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	30
Corporate Governance	13
Diversity and Inclusion	6
Human Rights	5
Natural Capital and Biodiversity	4
Human Capital Management	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.66	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

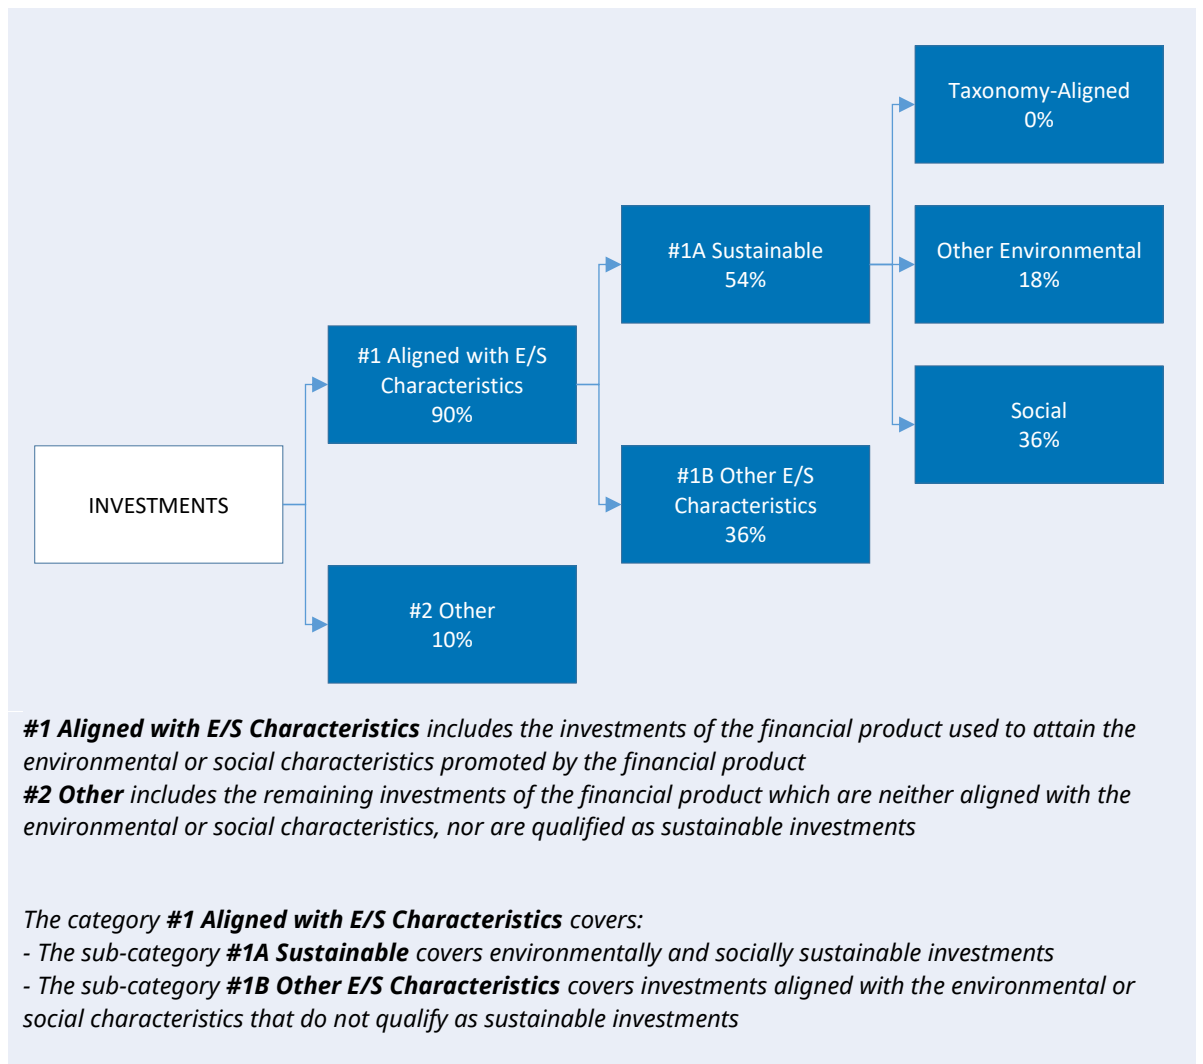

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex. China (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.31
Information Technology	Tech Hardware & Equip	10.18
Information Technology	Software & Services	3.28

Health Care	Pharma, Biotech & Life Sciences	2.38
Health Care	Health Care Equipment & Services	1.98
Materials	Materials	2.79
Utilities	Utilities	1.74
Real Estate	Real Estate Management & Development	1.17
Cash	Cash	0.96
Cash Equivalents	Treasury Bills	0.72

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

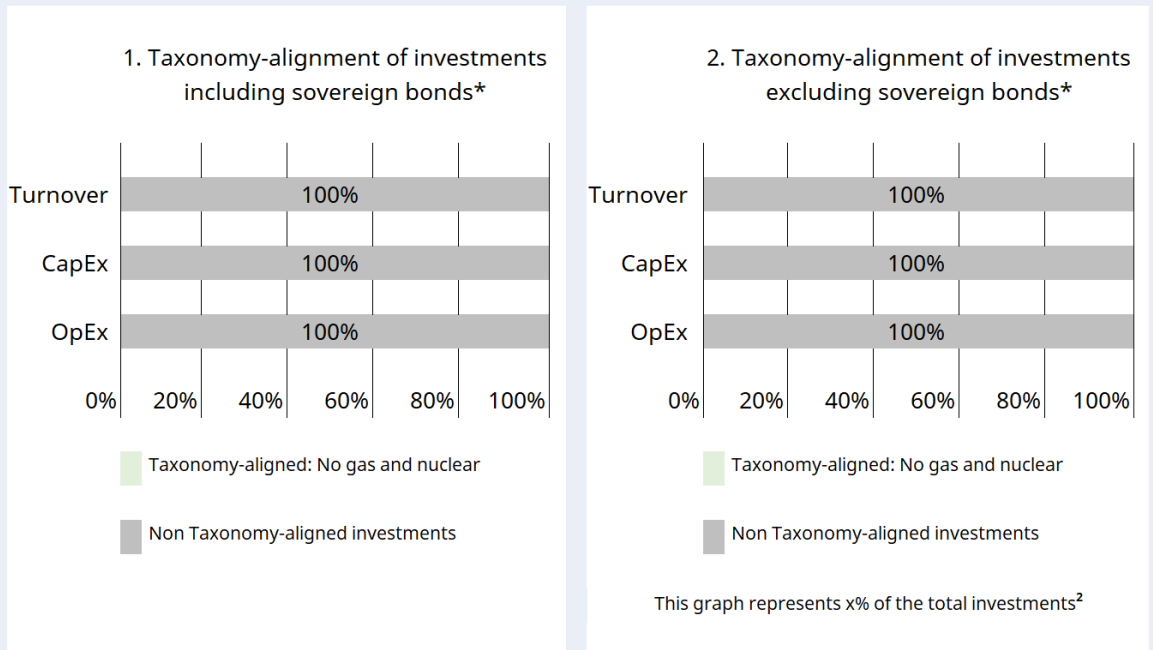

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 36%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (NDR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -3.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Water Access

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	55
Aug 2022 - Dec 2022	51

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.0	-3.3
Jan 2023 - Dec 2023	1.5	-2.9
Jan 2022 - Dec 2022	2.8	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. Within the proprietary sustainability framework applied within the Fund’s quantitative investment process, the following aspects were taken into account:

- Greenhouse gas emissions, greenhouse gas intensity of investment companies (including carbon footprint), exposure to companies active in the fossil fuel sector: PAI 1, 2, 3 and 4.
- Activities negatively affecting biodiversity sensitive areas, emissions to water, hazardous waste: PAI 7, 8 and 9.
- Unadjusted gender pay gap, board diversity: PAI 12 and 13.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, engagements were carried out across a range of holdings. Investee companies were engaged with on the subject of climate change, where we sought to understand a range of companies’ transition to net zero and the strategies and policies in place to manage decarbonisation efforts. These engagements relate to PAI 1, 2, 3, 4, 5 and 6. All PAI indicators were monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	42
Corporate Governance	19
Human Rights	9
Natural Capital and Biodiversity	6
Diversity and Inclusion	6
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.67	Taiwan
TENCENT HOLDINGS LIMITED HKD0.00002	Communication	5.32	China

AXIS BANK LIMITED INR2	Financials	0.72	India

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

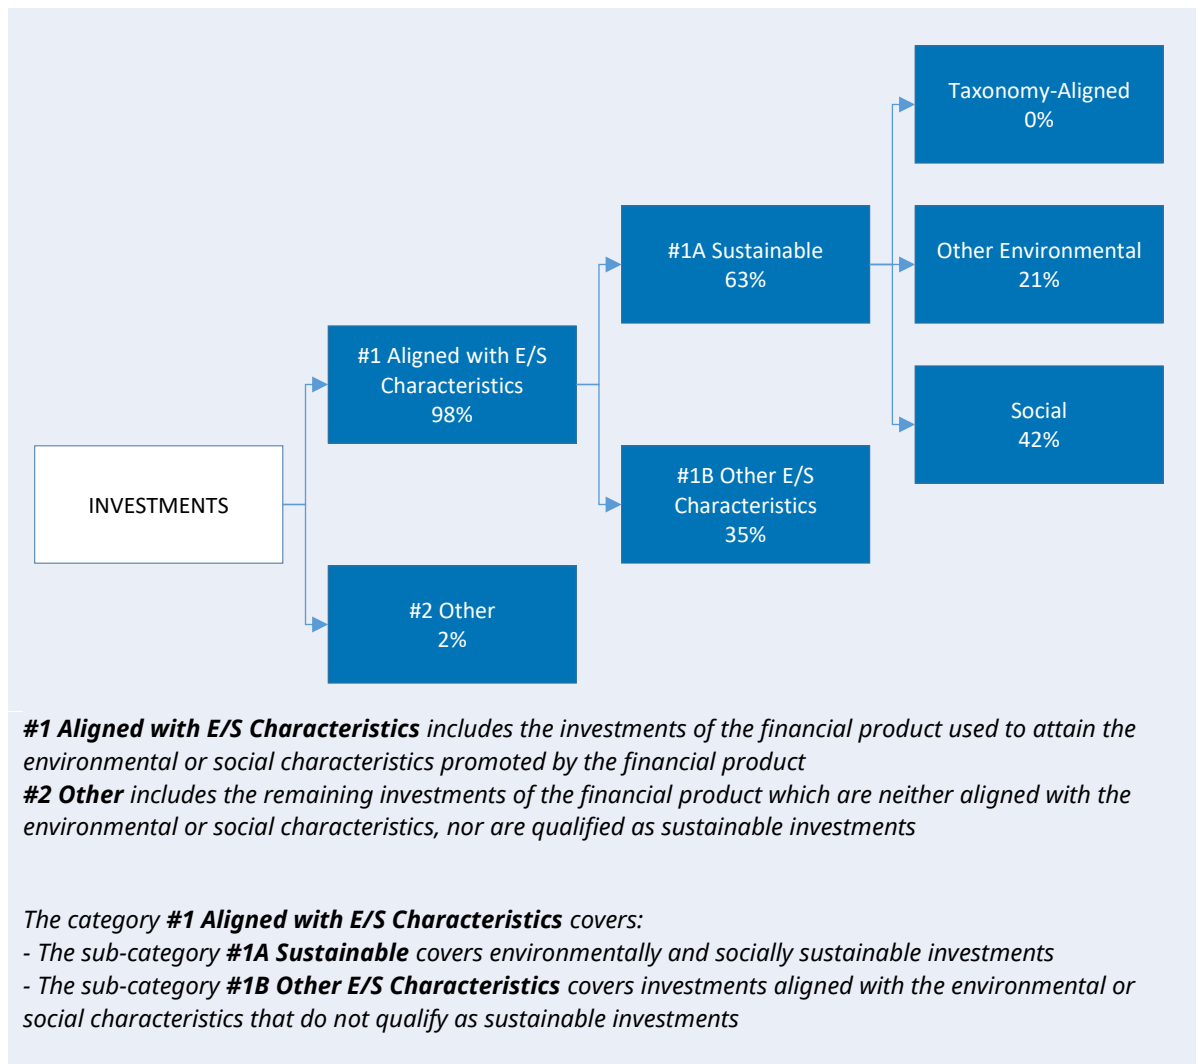

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 42% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	13.33
Information Technology	Tech Hardware & Equipment	9.83
Information Technology	Software & Services	2.62
Financials	Banks	19.46
Financials	Insurance	3.04
Financials	Financial Services	1.43
Consumer Discretionary	Consumer Discretionary Distribution & Retail	4.52
Consumer Discretionary	Autos & Components	3.63
Consumer Discretionary	Consumer Services	2.99
Consumer Discretionary	Consumer Durables	2.01
Communication	Media & Entertainment	7.67
Communication	Telecom	3.32
Industrials	Capital Goods	3.52
Industrials	Transportation	2.64
Industrials	Commercial & Professional Services	0.34
Consumer Staples	Food, Beverage & Tobacco	2.71
Consumer Staples	Household & Personal Prod	1.88
Consumer Staples	Consumer Staples Distribution & Retail	0.37
Health Care	Pharma, Biotech & Life Sciences	2.36
Health Care	Health Care Equipment & Services	1.96
Energy	Energy	3.35
Materials	Materials	2.05
Utilities	Utilities	1.48
Real Estate	Real Estate Management & Development	1.26
Cash	Cash	0.86
Cash Equivalents	Treasury Bills	0.79
Collective Investments	Exchange Traded Funds	0.62

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

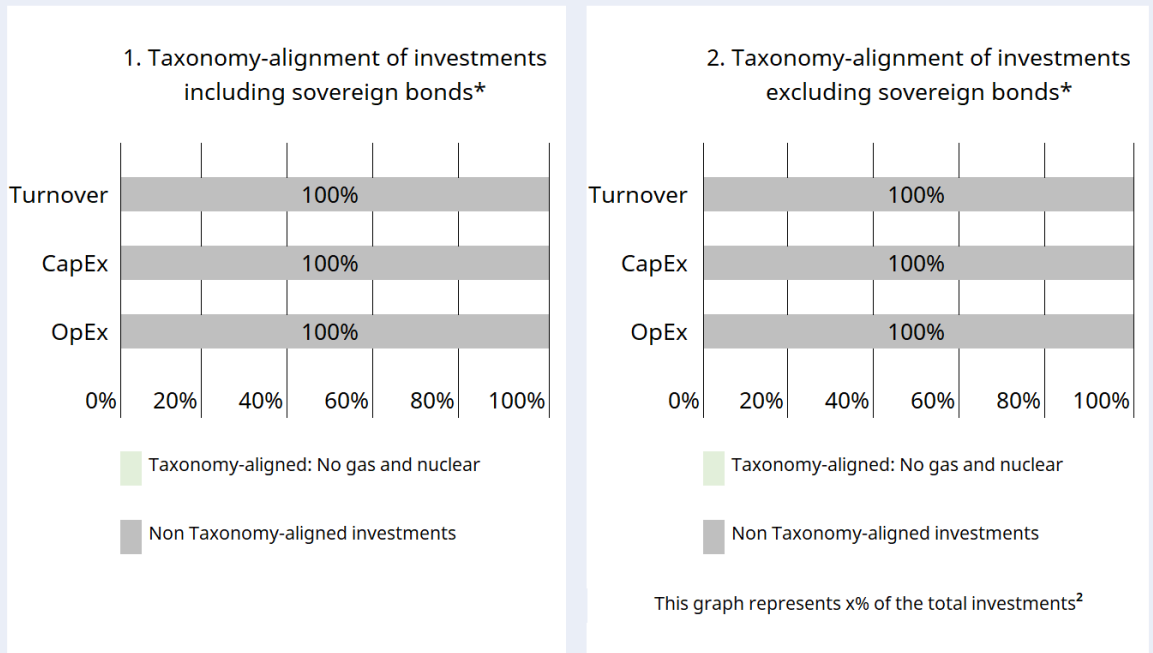

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 42%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 15 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Dynamic Income  
**Legal Entity Identifier :** 6367003LO6P8ZSCB6R06

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 15 January 2024 (launch date) to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -1.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

- Power Provision

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• **...and compared to previous periods?**

As this is our first reporting period, this question is not applicable.

• **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse**

• **How did the sustainable investments that the financial product partially made not cause**

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

**impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## ***significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies

During the reference period, PAIs were also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considered PAIs in the following way:

- Schrodgers’ proprietary tool, which was used as part of screening the investment universe and provided a maximum that could be invested in each company, incorporated several PAIs as a component of its scoring methodology. In assessing an issuer’s overall environmental score, PAIs 1, 2 and 3 (Greenhouse gas emissions) were included. In assessing an issuer’s overall social score, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were included.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager’s own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schrodgers Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity). All PAI indicators are monitored via Schrodgers PAI dashboard.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

During the reference period, we engaged with a major technology company, with a particular focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives emphasized their commitment to reducing climate and emissions impacts, acknowledging the challenges posed by energy use in buildings and the carbon footprint of data centre construction. They also discussed their advocacy for energy policy changes and efforts to enhance renewable energy capacity. On responsible AI, the representatives highlighted safety measures, product review processes, and regulatory compliance, ensuring their products meet responsible AI standards. Specific processes for sensitive use cases and rigorous contracts for enterprise customers were also mentioned, along with tools to identify potential risks in AI products.

In addition, there was a further engagement with a Swiss multinational holding healthcare company. We gained valuable insights into the company's approach to several key sustainability challenges. The company is proactively addressing antimicrobial resistance (AMR) by enhancing patient diagnostics and reducing broad-spectrum antibiotic use, alongside supporting global health security through an AMR surveillance programme. Acknowledging potential business risks, the company is leveraging diagnostics as opportunities in AMR management. They also ensure manufacturing partners adhere to strict environmental standards to combat antimicrobial effluents. On climate action, they submitted targets to the Science Based Targets initiative, including new short-term 2029 and 2045 net zero goals, though certain supply chain emissions will require offsetting. They plan to report in line with the Task Force on Climate-related Financial Disclosures (TCFD) from 2025 and view climate-driven health challenges, like malaria, as business opportunities. In terms of access and health equity, they are addressing limitations highlighted by their performance in the Access to Medicine (ATM) Index, particularly in diagnostics access for emerging markets. They are also advancing clinical trial diversity, responding to guidance from the FDA. Next steps involve advocating for more comprehensive ESG reporting to better reflect their ongoing efforts in these areas

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	139
Corporate Governance	68
Human Rights	61
Natural Capital and Biodiversity	38
Human Capital Management	23
Diversity and Inclusion	22

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the MSCI World Index (USD), MSCI Emerging Market Index (USD), Bloomberg Global Aggregate Corporate Bond Index (USD), Bloomberg Global High Yield excl CMBS & EMD 2% Index (USD), ICE BofA US Treasury Index (USD), JPM GBI Emerging Market Index - EM Local (USD), JPM EMBI Index EM Hard Currency (USD), FTSE Global Convertible Bonds Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a

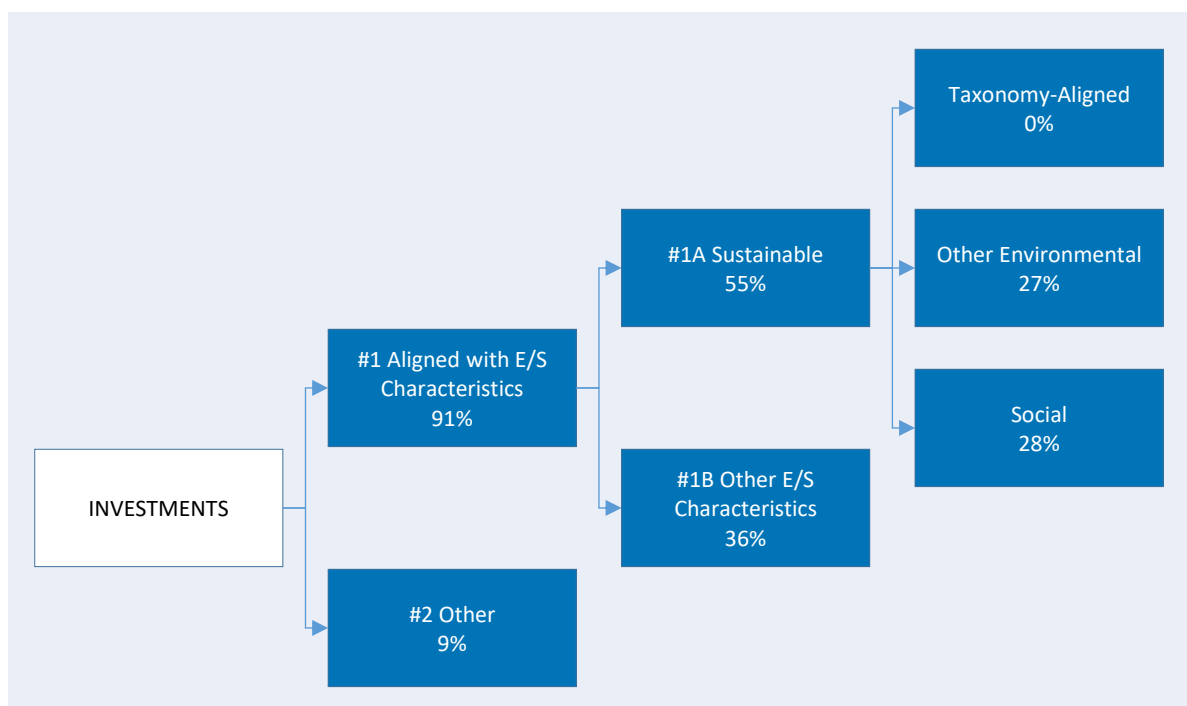

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 55% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	4.76
Industrial	Capital Goods	4.60
Industrial	Telecommunications	3.11
Industrial	Leisure	3.05
Industrial	Healthcare	3.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

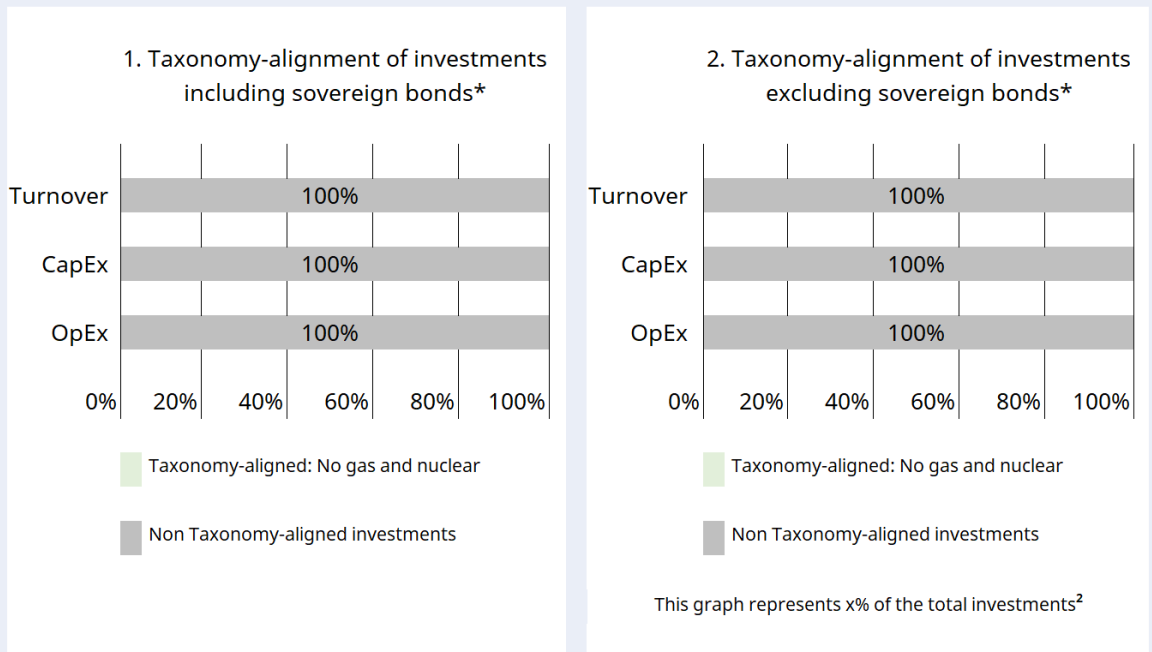

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers’

# SFDR Periodic Report (continued)

Reference Period: 15 January 2024 - 31 December 2024

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics*

# SFDR Periodic Report (continued)

## Environmental and/or social characteristics

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective:** \_\_%

It promoted E/S characteristics, but **did not make any sustainable investments**

### The EU Taxonomy

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.1% and the benchmark's sustainability score for the reference period was -3.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Water Access

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	47
Jan 2023 - Dec 2023	36
Aug 2022 - Dec 2022	38

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.1	-3.6
Jan 2023 - Dec 2023	-0.9	-3.3
Jan 2022 - Dec 2022	-0.9	-3.5

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on

## • How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to investing in issuers that do not cause significant harm to any environmental or social sustainable investment objective includes the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Firm-wide investment exclusions apply to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and a list of those companies that are excluded is available at <https://www.schroders.com/en/sustainability/activeownership/group-exclusions/>.
- Firm-wide exclusions also apply to companies generating more than 20% of their revenue from thermal coal mining.
- The Fund excludes companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excludes companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may be applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company cannot be categorised as a sustainable investment.
- The Fund may also apply certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on the Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager’s own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity). All PAI indicators are monitored via Schroders PAI dashboard.

During the reference period, we engaged with a Chinese hotel management company with the primary topic of discussion the company’s approach to managing climate change, specifically their ability to establish specific, measurable emission reduction targets that align with national decarbonisation goals. We also conveyed our interest in understanding the challenges the company encounters in setting these targets. The company’s progress towards these climate objectives influences our voting decisions at AGMs and is integrated into our research tools for evaluating corporate sustainability, which, in turn, informs our investment decisions. In addition,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

there was a further engagement with a manufacturer of electric vehicles and battery systems. The engagement aimed to encourage better disclosure on supply chain sourcing and management. It focused on various governance aspects, particularly in relation to supply chain management and labour practices. Discussions centred around the company's use of suppliers, due diligence processes, and regular audits to ensure ethical labour practices. The company has implemented robust systems for traceability within its supply chains and employs third-party audits for verification. Furthermore, it is committed to transparency, sharing detailed audit findings with customers and collaborating with suppliers to address any issues identified. Additional safeguards, such as a whistleblowing hotline, have been integrated, and the company actively communicates with regulatory bodies to maintain the integrity of its supply chains.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	58
Human Rights	18
Corporate Governance	16
Natural Capital and Biodiversity	8
Diversity and Inclusion	7
Human Capital Management	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

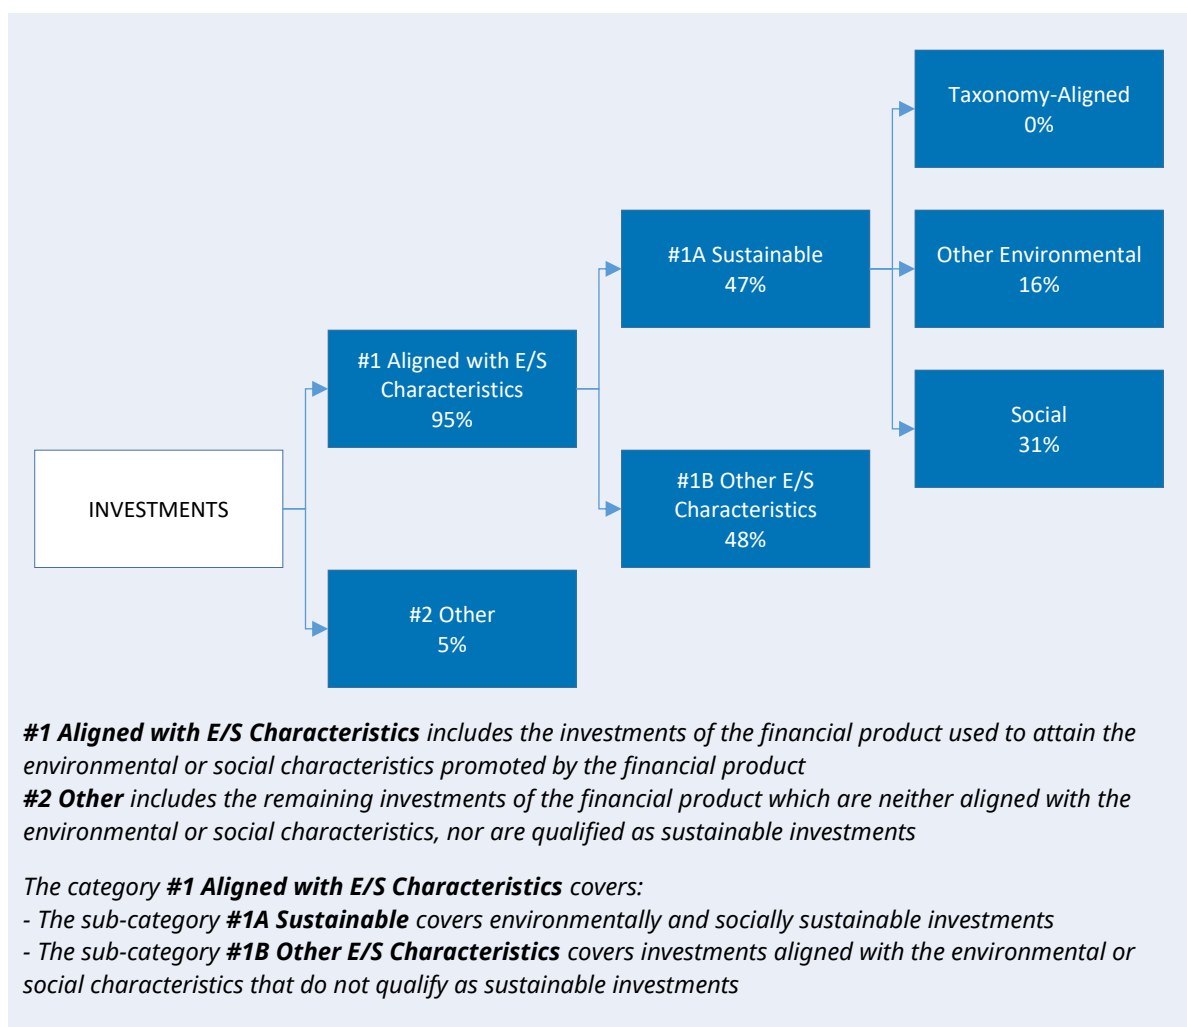

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the 50% MSCI Emerging Market Index (USD), 16.7% JPM EMBI Index EM Hard Currency (USD), 16.7% JPM GBI Emerging Market Index - EM Local (USD), 16.7% JPM CEMB Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	5.50
Industrial	Transportation	2.71
Industrial	Retail	2.66
Industrial	Capital Goods	2.62

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

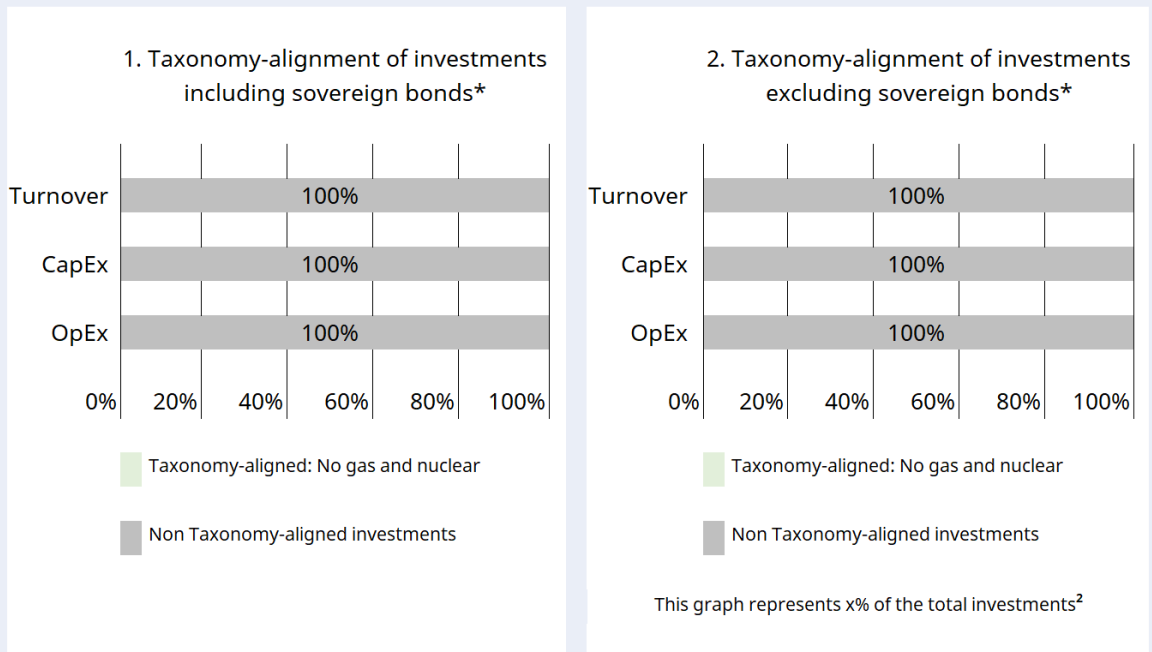

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics*

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Diversified Growth

**Legal Entity Identifier :** UILX05PRFETP7OQYCX05

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Power Provision

- Socio-Political Stability

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	73
Jan 2023 - Dec 2023	37
Aug 2022 - Dec 2022	47

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.0	-2.5
Jan 2023 - Dec 2023	2.0	-3.5
Jan 2022 - Dec 2022	1.8	-3.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

From 1 March 2023, the Fund could invest up to 100% of its assets in open ended investment Funds including other Schroder Funds. As a result, due to our calculation methodology the figures are lower for this year as they may not take into account investments in other Funds.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Where appropriate PAIs were also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considered PAIs in the following way:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

The investment team monitored all PAI indicators via Schroders' PAI dashboard.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	234
Corporate Governance	110
Human Rights	81
Natural Capital and Biodiversity	63
Diversity and Inclusion	27
Human Capital Management	38

The engagements shown relate to engagements with companies and issuers.

During the reference period there was an engagement with an American multinational technology conglomerate. The engagement touched upon environmental, social, and governance matters, with specific focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives highlighted their commitment to climate and emissions reductions, albeit acknowledging challenges in achieving these, particularly in relation to energy use in buildings and the carbon impact of data centre construction. Efforts to advocate for changes to energy policy and improve renewable energy capacity were also discussed. On the topic of responsible AI, the representatives discussed safety measures, product review processes, and regulatory compliance. They also highlighted the company's efforts to ensure that their products meet responsible AI standards, with specific processes in place for sensitive use cases and rigorous contracts for enterprise customers. Furthermore, they mentioned that tools are used to identify potential risks in their AI products.

In addition, there was a further engagement with a Swiss multinational holding healthcare company. We gained valuable insights into the company's approach to several key sustainability challenges. The company is proactively addressing antimicrobial resistance (AMR) by enhancing patient diagnostics and reducing broad-spectrum antibiotic use, alongside supporting global health security through an AMR surveillance programme. Acknowledging potential business risks, they are leveraging diagnostics as opportunities in AMR management. They also ensures manufacturing partners adhere to strict environmental standards to combat antimicrobial effluents. On climate action, they submitted targets to the Science Based Targets initiative, including new short-term 2029 and 2045 net zero goals, though certain supply chain emissions will require offsetting. They plan to report in line with the Task Force on Climate-related Financial Disclosures (TCFD) from 2025 and view climate-driven health challenges, like malaria, as business opportunities. In terms of access and health equity, they are addressing limitations highlighted by their performance in the Access to Medicine (ATM) Index, particularly in diagnostics access for emerging markets. They are also advancing clinical trial diversity, responding to guidance

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

from the FDA. Next steps involve advocating for more comprehensive ESG reporting to better reflect their ongoing efforts in these areas.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

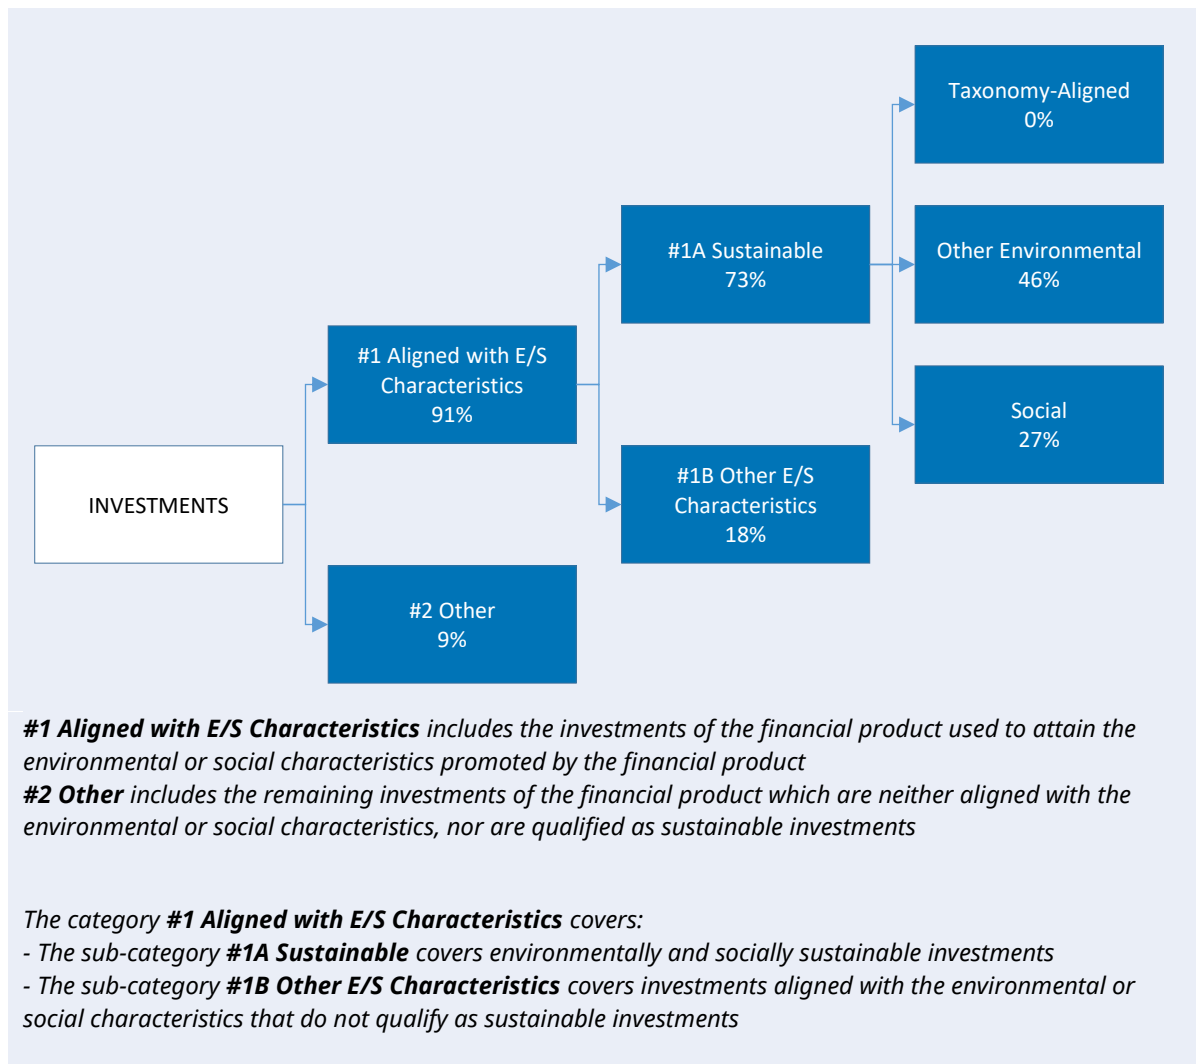

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 73% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 27% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Reference Period: 1 January 2024 - 31 December 2024

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 27%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Multi-Asset Balanced

**Legal Entity Identifier :** N7RNP3PDV1GDWKYBBM36

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR), FTSE Global Convertible Bonds Index (hedged to EUR), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -1.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine

- Water Access

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	59

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.0	-1.7
Jan 2023 - Dec 2023	1.6	-1.8
Jan 2022 - Dec 2022	2.0	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

communities through telecommunication services;

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity). All PAI indicators are

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

monitored via Schroders PAI dashboard.

During the reference period there was an engagement with an American multinational technology conglomerate. The engagement touched upon environmental, social, and governance matters, with specific focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives highlighted their commitment to climate and emissions reductions, albeit acknowledging challenges in achieving these, particularly in relation to energy use in buildings and the carbon impact of data centre construction. Efforts to advocate for changes to energy policy and improve renewable energy capacity were also discussed. On the topic of responsible AI, the representatives discussed safety measures, product review processes, and regulatory compliance. They also highlighted the company's efforts to ensure that their products meet responsible AI standards, with specific processes in place for sensitive use cases and rigorous contracts for enterprise customers. Furthermore, they mentioned that tools are used to identify potential risks in their AI products.

In addition, there was a further engagement with a Swiss multinational holding healthcare company. We gained valuable insights into the company's approach to several key sustainability challenges. The company is proactively addressing antimicrobial resistance (AMR) by enhancing patient diagnostics and reducing broad-spectrum antibiotic use, alongside supporting global health security through an AMR surveillance programme. Acknowledging potential business risks, they are leveraging diagnostics as opportunities in AMR management. They also ensures manufacturing partners adhere to strict environmental standards to combat antimicrobial effluents. On climate action, they submitted targets to the Science Based Targets initiative, including new short-term 2029 and 2045 net zero goals, though certain supply chain emissions will require offsetting. They plan to report in line with the Task Force on Climate-related Financial Disclosures (TCFD) from 2025 and view climate-driven health challenges, like malaria, as business opportunities. In terms of access and health equity, they are addressing limitations highlighted by their performance in the Access to Medicine (ATM) Index, particularly in diagnostics access for emerging markets. They are also advancing clinical trial diversity, responding to guidance from the FDA. Next steps involve advocating for more comprehensive ESG reporting to better reflect their ongoing efforts in these areas.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	108
Corporate Governance	53
Human Rights	50
Natural Capital and Biodiversity	23
Human Capital Management	20
Diversity and Inclusion	16

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 85%. The Fund maintained a higher overall sustainability score than the MSCI World Index (hedged to EUR), MSCI Emerging Market Index (hedged to EUR), Barclays Global Aggregate Corporate Bond Index (hedged to EUR), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to EUR), ICE BofA US Treasury Index (hedged to EUR), JPM GBI Emerging Market Index - EM Local (hedged to EUR), JPM EMBI Index EM Hard Currency (hedged to EUR),

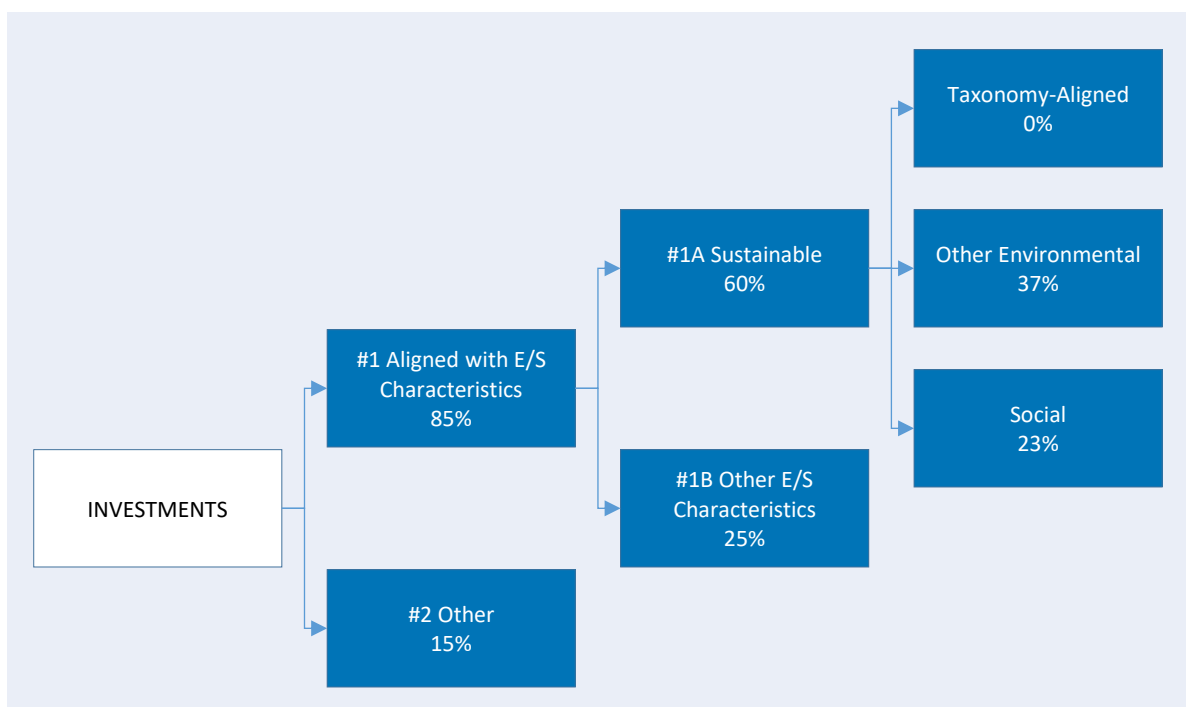

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

FTSE Global Convertible Bonds Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 37% was invested in sustainable investments with an environmental objective and 23% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Cash Equivalents	Treasury Bills	17.72
Financial	Banking	8.53
Financial	Financial Services	7.34
Financial	Insurance	0.78

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

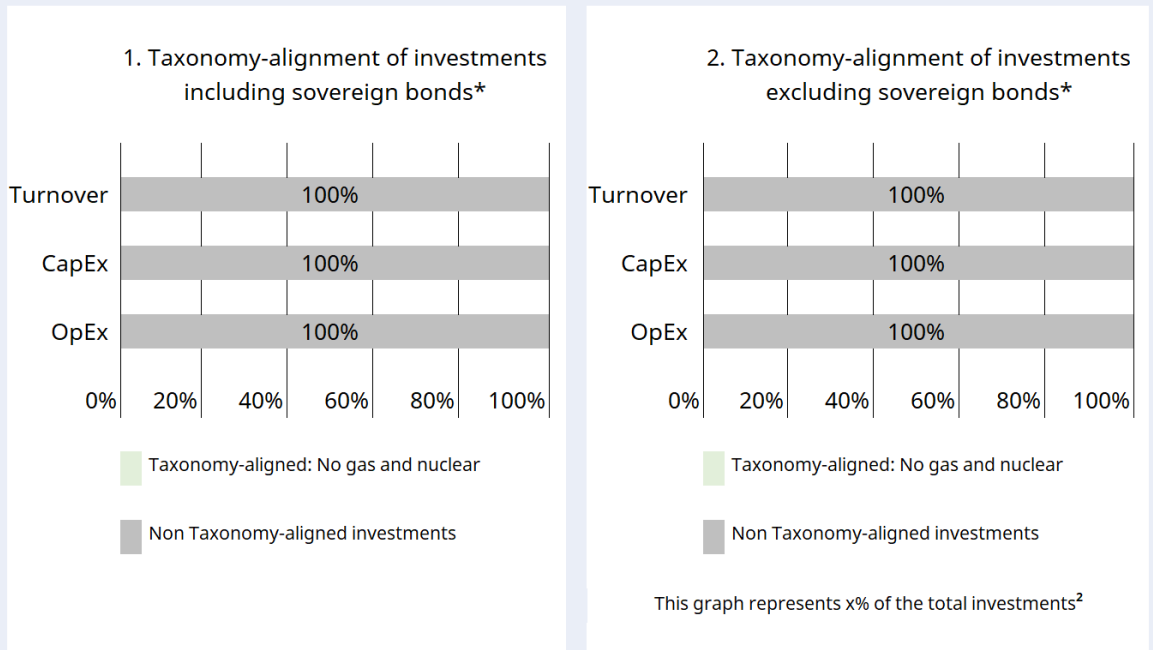

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 37%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 23%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Multi-Asset Income

**Legal Entity Identifier :** 9P2R2H6H0KS8FL2XQC82

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 53% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.4% and the benchmark's sustainability score for the reference period was -2.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Innovation
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 53% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	53
Jan 2023 - Dec 2023	45
Aug 2022 - Dec 2022	42

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.4	-2.9
Jan 2023 - Dec 2023	0.5	-4.1
Jan 2022 - Dec 2022	0.4	-4.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Where appropriate PAIs were also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considered PAIs in the following way:

- Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAIs 1, 2 and 3 were included. In assessing an issuer's overall social score, PAIs 12 and 13 were included.

The investment team monitored all PAI indicators via Schroders' PAI dashboard.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

During the reference period, we engaged with a major technology company, with a particular focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives emphasized their commitment to reducing climate and emissions impacts, acknowledging the challenges posed by energy use in buildings and the carbon footprint of data centre construction. They also discussed their advocacy for energy policy changes and efforts to enhance renewable energy capacity. On responsible AI, the representatives highlighted safety measures, product review processes, and regulatory compliance, ensuring their products meet responsible AI standards. Specific processes for sensitive use cases and rigorous contracts for enterprise customers were also mentioned, along with tools to identify potential risks in AI products.

Additionally, we engaged with a Spanish multi-national fashion retailer to explore their approach to Just Resilience and support for workers in the supply chain facing physical climate risks and associated human rights issues. While the company's disclosures indicate an awareness of the need for resilience, they are still in the early stages of understanding supplier physical risks and their impact on people. The company's proximity sourcing may reduce exposure to Southeast Asian garment manufacturing hubs, but it remains unclear how they assess risks at the supplier level. The company does not yet fully integrate human rights adaptation measures in line with Just Resilience principles, relying instead on local legislation compliance. The company engages with trade unions to identify key issues for workers and plans to expand its disclosure on physical risk assessment and value at risk in future reports. Although concrete examples were lacking, it appears that the company is beginning to address these concerns, and future engagements can help share best practices to support their progress.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	152
Corporate Governance	70
Human Rights	64
Natural Capital and Biodiversity	44
Diversity and Inclusion	26
Human Capital Management	25

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

FN MA5216 6% 01 Dec 2053	Securitized	0.38	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

Asset allocation

• *What was the asset allocation?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

describes the share of investments in specific assets.

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 40% Barclays Global Aggregate Corporate Bond Index (USD) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 53% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 26%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

### Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Target Return

**Legal Entity Identifier :** 549300HN4V7MFDKU097

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.0% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- High Salaries

- Medicine

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	67
Jan 2023 - Dec 2023	43
Aug 2022 - Dec 2022	43

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	1.0	-2.5
Jan 2023 - Dec	1.3	-3.4
Aug 2022 - Dec	1.4	-3.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments within the portfolio.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 4 and 5.

During the reference period, PAIs were also considered through integration in the investment process. Greenhouse gas emissions, carbon footprint, Greenhouse gas intensity: PAI 1, 2 and 15. At the portfolio level, the Fund considered the above PAIs within their asset class valuations and return forecasts. The team incorporate climate risk in their top-down asset allocation decisioning, applying climate change adjustments to their forecasts. Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

During the reference period, there was an engagement with a Brazilian health services company held

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

by one of the underlying managers in the Fund on the topics of gender diversity and board diversity. There was concern about lack of female representation and independence of committees. Management noted that there is no formal gender diversity policy, however, the company expects higher management levels naturally to become more diverse as they already have high diversity in mid-management levels and that should mature to higher levels in the mid-term.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	87
Corporate Governance	44
Human Rights	39
Natural Capital and Biodiversity	19
Diversity and Inclusion	15
Human Capital Management	15

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall

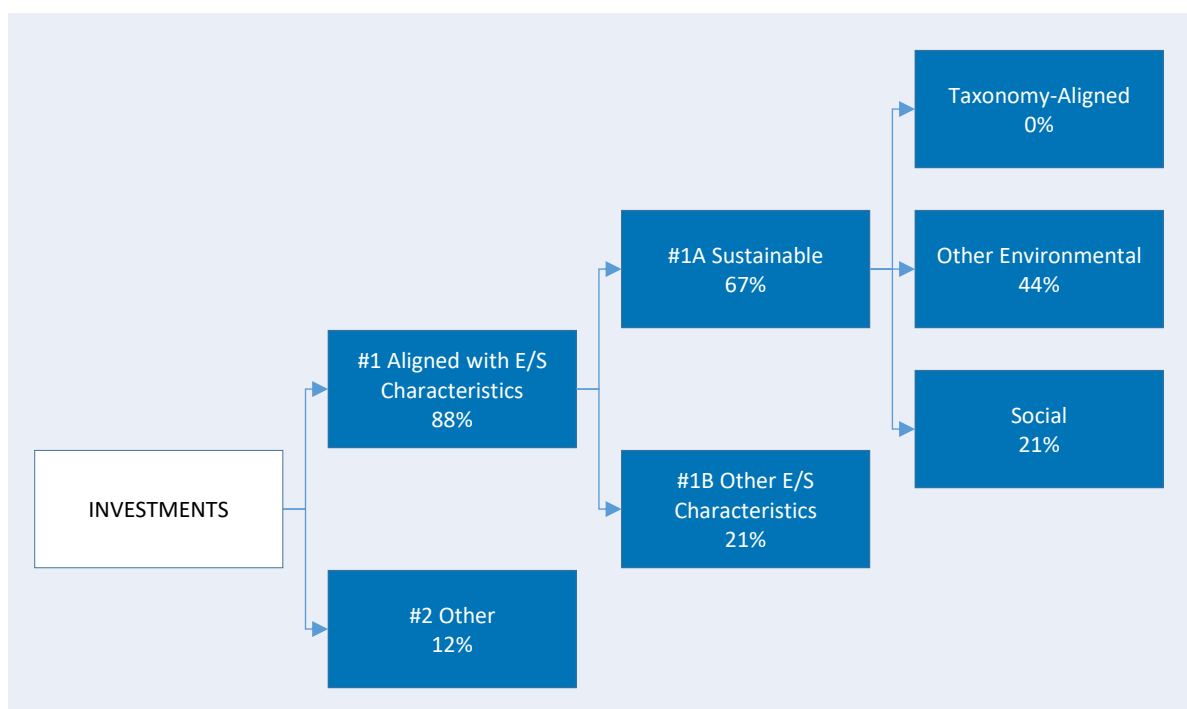

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability score than the MSCI World Index (hedged to USD), MSCI Emerging Market Index (unhedged), Bloomberg Global Aggregate Corporate Bond Index (hedged to USD), Bloomberg Global High Yield excl. CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (unhedged) and JPM EMBI Index EM Hard Currency (hedged to USD) and so the Fund's investments that were scored by Schrodgers' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schrodgers' proprietary sustainability tool.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 44% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schrodgers' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schrodgers' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Collective Investments	Unit Trusts	33.35
Collective Investments	Other	2.76

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

Taxonomy-aligned: No gas and nuclear

Non Taxonomy-aligned investments

2. Taxonomy-alignment of investments excluding sovereign bonds\*

Taxonomy-aligned: No gas and nuclear

Non Taxonomy-aligned investments

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 44%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Multi-Asset Growth and Income

**Legal Entity Identifier :** D57GRPRBLPPG0AOY4K34

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -1.0%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 56% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	56
Jan 2023 - Dec 2023	48
Aug 2022 - Dec 2022	49

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.5	-1.0
Jan 2023 - Dec 2023	0.5	-1.1
Jan 2022 - Dec 2022	-0.3	-1.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Where appropriate PAIs were also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considered PAIs in the following way:

- Schroders' proprietary tool, which is used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall environmental score, PAIs 1, 2 and 3 were

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

included. In assessing an issuer's overall social score, PAIs 12 and 13 were included. The investment team monitored all PAI indicators via Schroders' PAI dashboard.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

During the reference period, we engaged with a major technology company, with a particular focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives emphasized their commitment to reducing climate and emissions impacts, acknowledging the challenges posed by energy use in buildings and the carbon footprint of data centre construction. They also discussed their advocacy for energy policy changes and efforts to enhance renewable energy capacity. On responsible AI, the representatives highlighted safety measures, product review processes, and regulatory compliance, ensuring their products meet responsible AI standards. Specific processes for sensitive use cases and rigorous contracts for enterprise customers were also mentioned, along with tools to identify potential risks in AI products. Additionally, we engaged with a Spanish multi-national fashion retailer to explore their approach to Just Resilience and support for workers in the supply chain facing physical climate risks and associated human rights issues. While the company's disclosures indicate an awareness of the need for resilience, they are still in the early stages of understanding supplier physical risks and their impact on people. The company's proximity sourcing may reduce exposure to Southeast Asian garment manufacturing hubs, but it remains unclear how they assess risks at the supplier level. The company does not yet fully integrate human rights adaptation measures in line with Just Resilience principles, relying instead on local legislation compliance. The company engages with trade unions to identify key issues for workers and plans to expand its disclosure on physical risk assessment and value at risk in future reports. Although concrete examples were lacking, it appears that the company is beginning to address these concerns, and future engagements can help share best practices to support their progress.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	133
Corporate Governance	60
Human Rights	49
Natural Capital and Biodiversity	26
Diversity and Inclusion	17
Human Capital Management	17

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (USD), 30% Barclays Global High Yield excl CMBS & EMG 2% index (USD), 30% FTSE Convertible Global Focus index (USD) and 10% Barclays Global Aggregate Bond Index (USD) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end

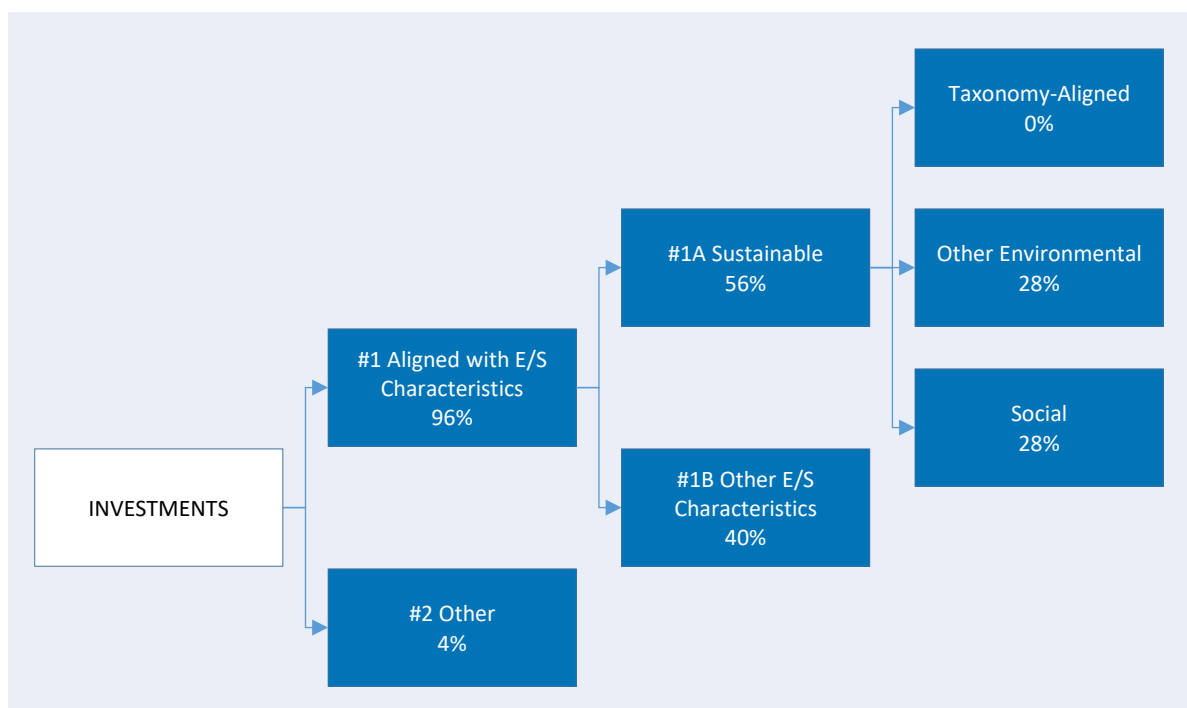

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 56% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 28% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	12.53
Industrial	Leisure	5.99
Industrial	Capital Goods	5.60
Industrial	Healthcare	4.08
Industrial	Basic Industry	3.46
Industrial	Retail	2.42
Industrial	Telecommunications	2.29

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 28%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Multi-Asset Total Return

**Legal Entity Identifier :** 549300NT1L407KR1IF71

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 69% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than a bespoke asset-weighted blend of MSCI World Index (hedged to USD), MSCI Emerging Market Index (hedged to USD), Barclays Global Aggregate Corporate Bond Index (hedged to USD), Barclays Global High Yield excl CMBS & EMD 2% Index (hedged to USD), ICE BofA US Treasury Index (hedged to USD), JPM GBI Emerging Market Index - EM Local (hedged to USD), JPM EMBI Index EM Hard Currency (hedged to USD), FTSE Global Convertible Bonds Index (hedged to USD), based on the Investment Manager's rating system. The component benchmarks (which are each respectively a broad market index) are not reference benchmarks for the purposes of the environmental and social characteristics promoted by the Fund. The blend evolved during the reference period in line with the actual asset allocation of the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.5% and the benchmark's sustainability score for the reference period was -2.2%.

In each case the sustainability score is calculated as a notional percentage as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine

The Investment Manager invested 69% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	69
Sep 2023 - Dec 2023	31

### Sustainable score

*This table details the percentage of assets invested in sustainable score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.5	-2.2
Sep 2023 - Dec 2023	0.6	-3.0

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- Firm-wide exclusions also applied to companies that derived revenues above certain thresholds from activities related to tobacco and thermal coal, especially tobacco production, tobacco value chain (suppliers, distributors, retailers, licensors), thermal coal mining and coal fired power generation.
- The Fund also applied certain other exclusions.
- Further information on all of the Fund's exclusions is to be found on the Fund's webpage, accessed via <https://www.schroders.com/en/lu/private-investor/gfc>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

## Climate Change

PAIs 1, 2, 3, 4, 5, 6 and PAI 4 in Table 2 relate to the Engagement Blueprint theme of Climate Change. Details of our Engagement Blueprint can be found here: ([Link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf](https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf)). We engage to understand how companies are responding to the challenges climate change may pose to their long-term financial position. Through our engagement activity we seek to understand different areas, such as the speed and scale of emission reduction targets and steps being taken to meet climate goals.

## Biodiversity and Natural Capital

PAIs 7, 8 and 9 align to the Engagement Blueprint theme of Biodiversity and Natural Capital. We recognise the importance of all companies assessing and reporting on their exposure to natural

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

capital and biodiversity risk. We focus our engagement on improving disclosure around a number of themes such as deforestation and sustainable food and water.

## Human Rights

PAIs 10 and 14 relate to the Engagement Blueprint theme of Human Rights. There is increasing pressure on the role that businesses can and should play to respect human rights. We understand the higher operational and financial risks, and the reputational risk that human rights controversies cause. Our engagement focuses on three core stakeholders: workers, communities and customers.

## Human Capital Management

PAIs 11, 12 and 13 align to the Engagement Blueprint theme of Human Capital Management. We identify human capital management as a priority issue for engagement, noting that people in an organisation are a significant source of competitive advantage and that effective human capital management is essential to drive innovation and long-term value creation. We also recognise a number of links between high standards of human capital management and the achievement of the Sustainable Development Goals (SDGs). Our engagement activities address themes such as health and safety, corporate culture and investment into the workforce.

## Diversity and Inclusion

PAIs 12 and 13 relate to the Engagement Blueprint theme of Diversity and Inclusion. Improving disclosure on board diversity and the gender pay gap are two of the priority objectives outlined in our Engagement Blueprint. We request that companies implement a policy that requires each board vacancy to consider at least one or more diverse candidates. Our engagement approach also addresses diversity of the executive management, the workforce and in the value chain.

## Corporate Governance

PAIs 12, 13 and PAI 4 in Table 3 align to the Engagement Blueprint theme of Corporate Governance. We engage with companies to seek to ensure businesses act in the best interest of shareholders and other key stakeholders. We also recognise that, in most cases, in order to see progress and performance on other material Environmental, Social and Governance (ESG) issues, strong governance structures need to first be in place. We therefore engage on a number of corporate governance aspects such as executive remuneration, boards and management, and strategy.

### ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) – applied to Sustainable Investments.
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the investment manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions) applied to relevant underlying strategies.

Where appropriate PAIs were also considered through integration in the investment process, specifically the stock selection process in underlying strategies. For example the global equity strategy considered PAIs in the following way:

- Schrodgers’ proprietary tool, which was used as part of screening the investment universe and for providing a maximum that can be invested in each company, incorporates several PAIs as a component of its scoring methodology. In assessing an issuer’s overall environmental score, PAIs 1, 2 and 3 were included. In assessing an issuer’s overall social score, PAIs 12 and 13 were included.

The investment team monitored all PAI indicators via Schrodgers’ PAI dashboard.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager’s own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schrodgers Engagement Blueprint.

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint),

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

During the reference period there was an engagement with an American multinational technology conglomerate. The engagement touched upon environmental, social, and governance matters, with specific focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives highlighted their commitment to climate and emissions reductions, albeit acknowledging challenges in achieving these, particularly in relation to energy use in buildings and the carbon impact of data centre construction. Efforts to advocate for changes to energy policy and improve renewable energy capacity were also discussed. On the topic of responsible AI, the representatives discussed safety measures, product review processes, and regulatory compliance. They also highlighted the company's efforts to ensure that their products meet responsible AI standards, with specific processes in place for sensitive use cases and rigorous contracts for enterprise customers. Furthermore, they mentioned that tools are used to identify potential risks in their AI products.

In addition, there was a further engagement with a Swiss multinational holding healthcare company. We gained valuable insights into the company's approach to several key sustainability challenges. The company is proactively addressing antimicrobial resistance (AMR) by enhancing patient diagnostics and reducing broad-spectrum antibiotic use, alongside supporting global health security through an AMR surveillance programme. Acknowledging potential business risks, they are leveraging diagnostics as opportunities in AMR management. They also ensures manufacturing partners adhere to strict environmental standards to combat antimicrobial effluents. On climate action, they submitted targets to the Science Based Targets initiative, including new short-term 2029 and 2045 net zero goals, though certain supply chain emissions will require offsetting. They plan to report in line with the Task Force on Climate-related Financial Disclosures (TCFD) from 2025 and view climate-driven health challenges, like malaria, as business opportunities. In terms of access and health equity, they are addressing limitations highlighted by their performance in the Access to Medicine (ATM) Index, particularly in diagnostics access for emerging markets. They are also advancing clinical trial diversity, responding to guidance from the FDA. Next steps involve advocating for more comprehensive ESG reporting to better reflect their ongoing efforts in these areas.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	157
Human Rights	62
Corporate Governance	78
Natural Capital and Biodiversity	41
Human Capital Management	28
Diversity and Inclusion	21

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 87%. The Fund maintained a higher overall sustainability score than the bespoke benchmark (blend of the named benchmarks as described above) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are

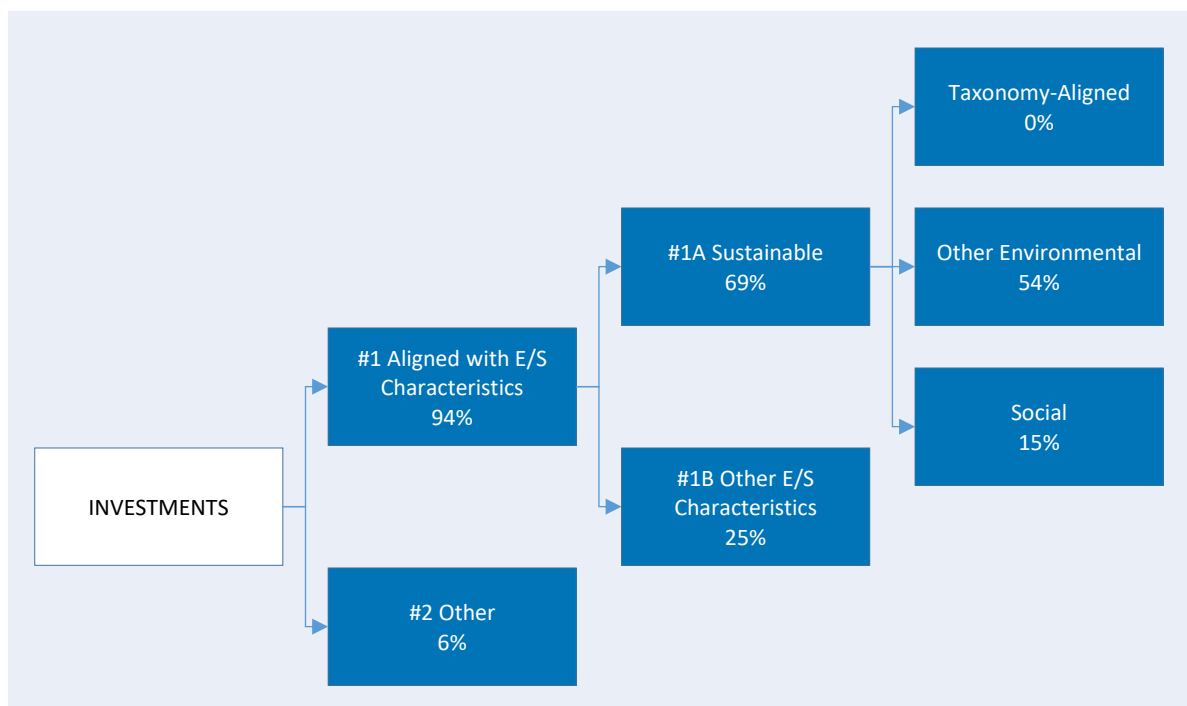

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 69% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 54% was invested in sustainable investments with an environmental objective and 15% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	3.32
Industrial	Healthcare	3.13
Industrial	Media & Entertainment	2.43
Industrial	Telecommunications	1.78
Industrial	Consumer Goods	1.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

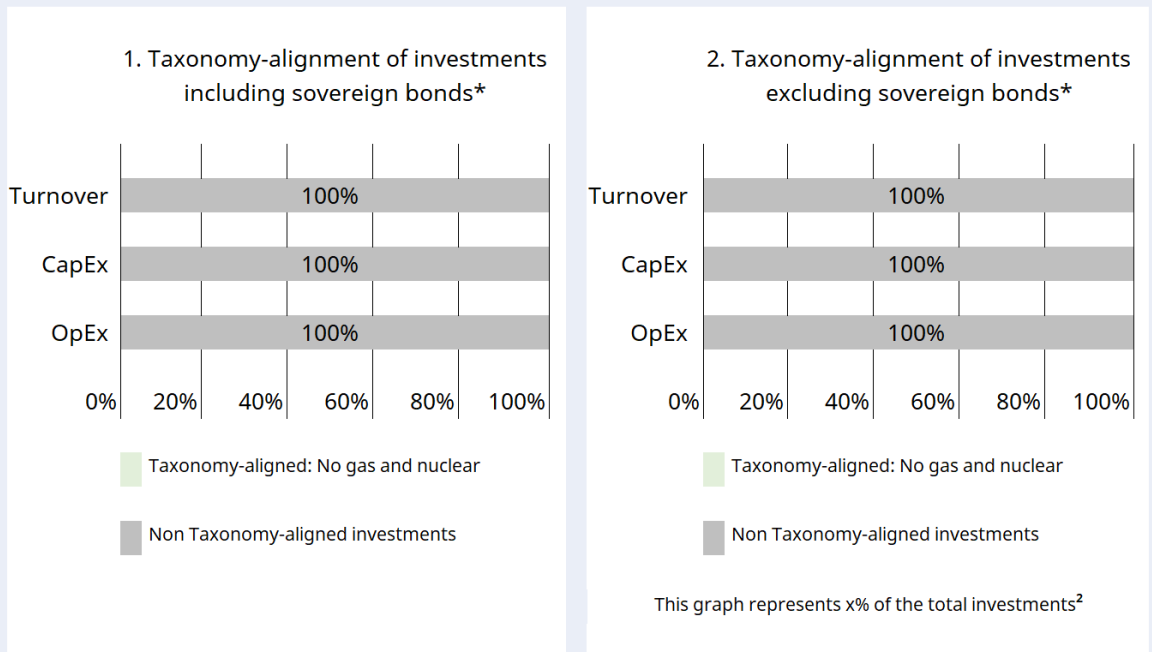

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

xx

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 54%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 15%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including,

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Future Trends

**Legal Entity Identifier :** 5493002E4JUCFUL6QF10

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 30% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.2% and the benchmark's sustainability score for the reference period was -1.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Education
- Medicine
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	71
Aug 2022 - Dec 2022	65

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	5.2	-1.5
Jan 2023 - Dec 2023	7.9	-2.2
Jan 2022 - Dec 2022	4.0	-2.5

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures.
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) - applied to Sustainable Investments.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager’s own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schrodgers Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity). All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	107

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Corporate Governance	52
Human Rights	49
Natural Capital and Biodiversity	22
Human Capital Management	19
Diversity and Inclusion	15

The engagements shown relate to engagements with companies and issuers.

During the reference period there was an engagement with an American multinational technology conglomerate. The engagement touched upon environmental, social, and governance matters, with specific focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives highlighted their commitment to climate and emissions reductions, albeit acknowledging challenges in achieving these, particularly in relation to energy use in buildings and the carbon impact of data centre construction. Efforts to advocate for changes to energy policy and improve renewable energy capacity were also discussed. On the topic of responsible AI, the representatives discussed safety measures, product review processes, and regulatory compliance. They also highlighted the company's efforts to ensure that their products meet responsible AI standards, with specific processes in place for sensitive use cases and rigorous contracts for enterprise customers. Furthermore, they mentioned that tools are used to identify potential risks in their AI products

In addition, there was a further engagement with a Swiss multinational holding healthcare company. We gained valuable insights into the company's approach to several key sustainability challenges. The company is proactively addressing antimicrobial resistance (AMR) by enhancing patient diagnostics and reducing broad-spectrum antibiotic use, alongside supporting global health security through an AMR surveillance programme. Acknowledging potential business risks, the company is leveraging diagnostics as opportunities in AMR management. They also ensure manufacturing partners adhere to strict environmental standards to combat antimicrobial effluents. On climate action, they submitted targets to the Science Based Targets initiative, including new short-term 2029 and 2045 net zero goals, though certain supply chain emissions will require offsetting. They plan to report in line with the Task Force on Climate-related Financial Disclosures (TCFD) from 2025 and view climate-driven health challenges, like malaria, as business opportunities. In terms of access and health equity, they are addressing limitations highlighted by their performance in the Access to Medicine (ATM) Index, particularly in diagnostics access for emerging markets. They are also advancing clinical trial diversity, responding to guidance from the FDA. Next steps involve advocating for more comprehensive ESG reporting to better reflect their ongoing efforts in these areas

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the 50% MSCI World EUR Hedged and 30% FTSE World Government Bond Index EUR Hedged and 20% Bloomberg Global Aggregate Corporate Index EUR Hedged and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	9.87
Information Technology	Semiconductors & Semiconductor Equipment	4.95
Information Technology	Technology Hardware & Equipment	2.57
Cash Equivalents	Treasury Bills	15.78

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 36%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Multi-Asset Income

**Legal Entity Identifier :** 549300LDFN23PNRCYH21

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 66% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 30% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.0% and the benchmark's sustainability score for the reference period was -2.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 66% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	66
Jan 2023 - Dec 2023	56
Aug 2022 - Dec 2022	56

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	4.0	-2.9
Jan 2023 - Dec	2.8	-4.1
Jan 2022 - Dec	5.4	-4.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Prior to 2024 our methodology to calculate the percentage of sustainable investments did not take into account investments in other funds, which may have resulted in lower figures. From 2024 Schroder Sustainable funds are included within the calculation. This calculation is performed at fund level and not at the level of the individual underlying holdings, so the figure shown may be higher than if the underlying holdings were evaluated. Other non-Schroders funds held are not included in the calculation.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contraceptives. Assigned in proportion to company market share of global revenue;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant Investment Manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons) – applied to long and short exposures
- UNGC Violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents) – applied to Sustainable Investments
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) – applied to relevant underlying strategies

Other PAIs were considered via active ownership, which was performed indirectly via the underlying Investment Managers. Where applicable, based on the underlying strategies and the relevant Investment Manager's own investment process, PAIs were considered post-investment through engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Examples of PAIs captured via this approach included PAI 1 (GHG emissions), PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity). All PAI indicators are monitored via Schroders PAI dashboard.

During the reference period, we engaged with a major technology company, with a particular focus on environmental sustainability and artificial intelligence (AI) responsibility. Company representatives

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

emphasized their commitment to reducing climate and emissions impacts, acknowledging the challenges posed by energy use in buildings and the carbon footprint of data centre construction. They also discussed their advocacy for energy policy changes and efforts to enhance renewable energy capacity. On responsible AI, the representatives highlighted safety measures, product review processes, and regulatory compliance, ensuring their products meet responsible AI standards. Specific processes for sensitive use cases and rigorous contracts for enterprise customers were also mentioned, along with tools to identify potential risks in AI products. Additionally, we engaged with a Spanish multi-national fashion retailer to explore their approach to Just Resilience and support for workers in the supply chain facing physical climate risks and associated human rights issues. While the company's disclosures indicate an awareness of the need for resilience, they are still in the early stages of understanding supplier physical risks and their impact on people. The company's proximity sourcing may reduce exposure to Southeast Asian garment manufacturing hubs, but it remains unclear how they assess risks at the supplier level. The company does not yet fully integrate human rights adaptation measures in line with Just Resilience principles, relying instead on local legislation compliance. The company engages with trade unions to identify key issues for workers and plans to expand its disclosure on physical risk assessment and value at risk in future reports. Although concrete examples were lacking, it appears that the company is beginning to address these concerns, and future engagements can help share best practices to support their progress.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	105
Corporate Governance	54
Human Rights	51
Natural Capital and Biodiversity	36
Human Capital Management	19
Diversity and Inclusion	17

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 92%. The Fund maintained a higher overall sustainability score than the 30% MSCI AC World Index (hedged to EUR), 40% Barclays Global Aggregate Corporate Bond Index (hedged to EUR) and 30% Barclays Global High Yield excl CMBS & EMG 2% Index (hedged to EUR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability

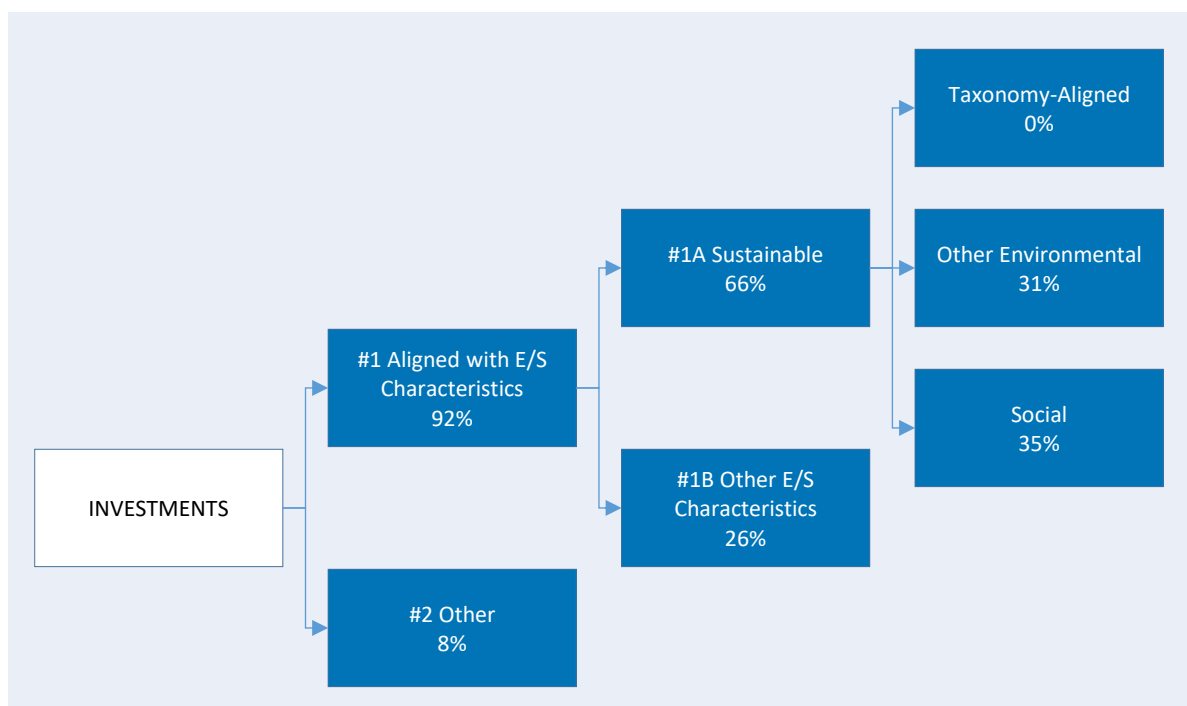

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 66% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 31% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	5.75
Industrial	Healthcare	4.74
Industrial	Telecommunications	4.66
Industrial	Automotive	4.17
Industrial	Transportation	3.30
Industrial	Services	3.24
Industrial	Real Estate	2.31

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 31%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 35%.

### • *What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Debt Total Return

**Legal Entity Identifier :** TLC5LFN105XXSK6FZ338

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Fund's sustainability score for the reference period was -2.7% and the benchmark's sustainability score for the reference period was -3.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

**• ...and compared to previous periods?**

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

**• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process, and some were considered via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there were limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. However, as part of the investment process, a Schrodgers' proprietary tool was used which incorporates some of the PAIs as part of its scoring methodology. During the reference period, PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAIs 12, 13, and 16 related to social matters were considered as part of the investment process of the following countries: Argentina, Brazil, Colombia, Chile, India, Bahrain, Egypt, Poland, Romania, South Africa and Turkey.

PAIs were also considered post-investment through engagement. The Investment Manager primarily used Schrodgers' proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. During the reference period, active engagements with emerging sovereigns included the Bahamas, Colombia, Mexico, Uruguay, Hungary, Bahrain, China, Indonesia, Malaysia and Philippines.

These engagements covered a range of topics and were aligned with environmental PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAI 16 (Human Capital) in Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	9
Natural Capital and Biodiversity	4
Corporate Governance	1
Human Capital Management	1

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the 50% JPM GBI-EM Diversified Index and 50% JPM EMBI Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

### • *In which economic sectors were the investments made?*

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable for this Fund.

## What was the share of socially sustainable investments?

This question is not applicable for this Fund.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Credit Conviction Short Duration

**Legal Entity Identifier :** 549300GRJ5K0KUG41F58

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 59% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.2% and the benchmark's sustainability score for the reference period was -2.4%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 59% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	59
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	50

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.2	-2.4
Jan 2023 - Dec 2023	1.2	-2.2
Jan 2022 - Dec 2022	5.3	N/A*

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

\* On the 21 September 2023, the Fund committed to maintaining a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate Total Return Index, based on the Investment Manager's rating system. As a result a Benchmark figure for 2022 is not displayed and the 2023 is a weighted average of the last four months of the year.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

and 4. All PAI indicators are monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	33
Corporate Governance	20
Human Rights	9
Natural Capital and Biodiversity	8
Diversity and Inclusion	4
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

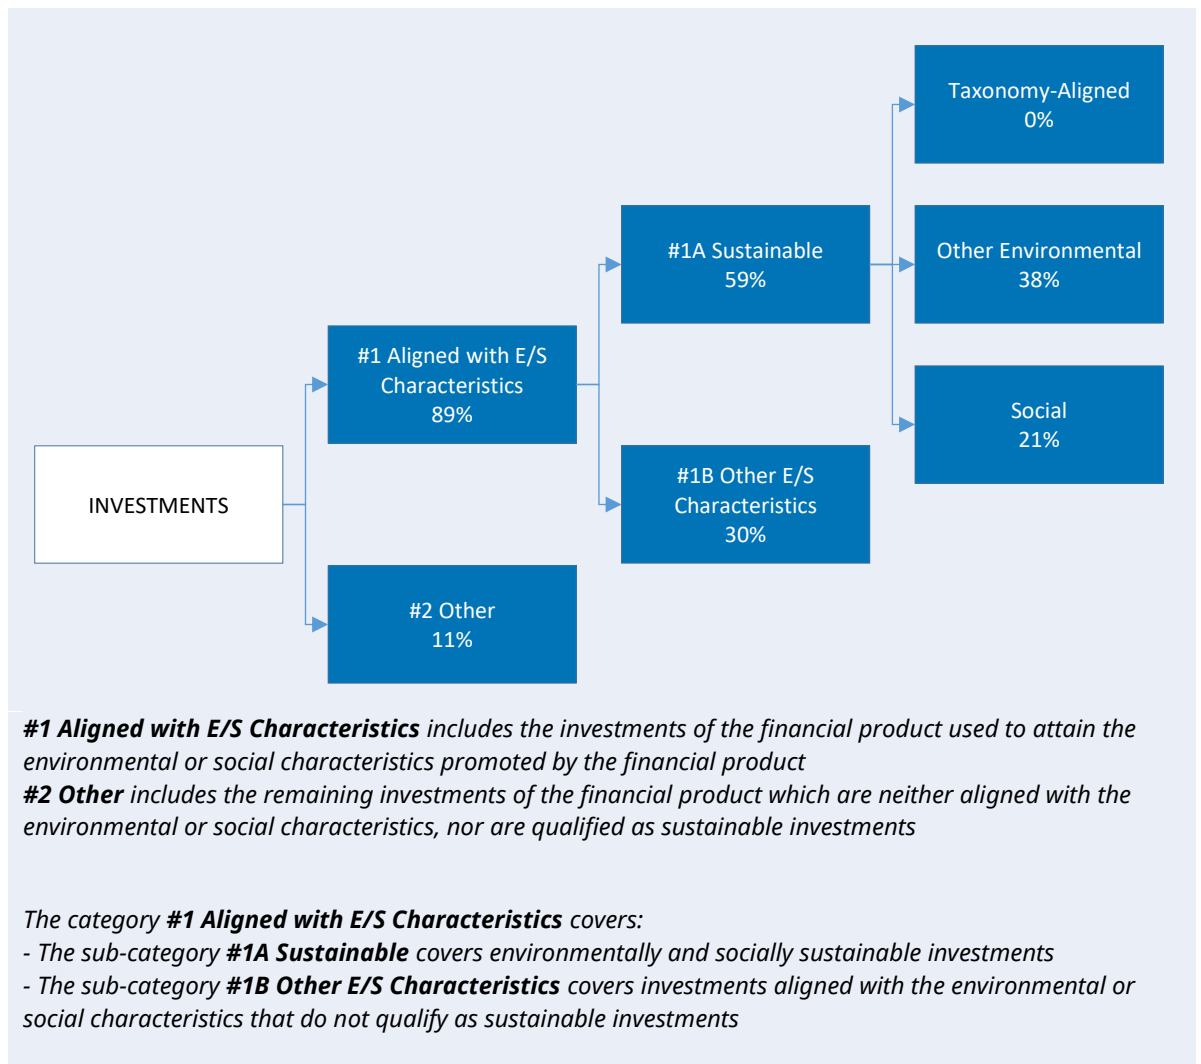

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 89%. The Fund maintained a higher overall sustainability score than the ICE BofA 1-5 Year BBB Euro Corporate total return index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 59% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## *previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 21%.

## **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Alpha Absolute Return

**Legal Entity Identifier :** 549300FIRE2DG9WO1K16

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>	

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The percentage of sustainable investments shown (which are all long positions, as short positions are not deemed to be sustainable investments) represents the sustainable investments as a proportion of the long exposure of the Fund during the reference period. This is in line with the pre-contractual disclosure for the Fund, where the Fund committed to invest at least 10% of its long exposure in sustainable investments.

For additional context, the percentage of sustainable investments as a proportion of the gross exposure of the Fund during the reference period, was 28%. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the other calculations in the asset allocation section below. The long exposure and gross exposure excludes cash and cash equivalents.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund used derivatives extensively to implement its investment strategy and to meet the environmental and/or social characteristics promoted by the Fund. Long and short derivative positions contributed differently to the Fund's overall sustainability score as described. Equity and index derivatives (excluding options) are scored in the same way as physical holdings, on a look-through basis, and also contributed to the Fund's overall sustainability score.

The Fund also invested at least 10% of its long exposure in sustainable investments during the reference period. The long exposure excludes cash and cash equivalents.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 17.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Sanitation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Tobacco

Tobacco is a societal cost (and therefore were scored negatively) yet contributed positively to the sustainability score of the Fund because they represent short positions, and short positions with negative scores contribute positively towards the aggregate sustainability score of the Fund.

The Fund committed to invest at least 10% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool and in line with this commitment the Fund invested 57% of its long exposure in sustainable investments (which are all long positions, as short positions are not deemed to be sustainable investments) during the reference period, based on quarter-end data.

For additional context, during the reference period and based on quarter-end data, the Investment Manager invested 28% of the Fund's gross exposure in sustainable investments. This represents the percentage of sustainable investments as a proportion of the gross exposure of the Fund. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the calculations in the asset allocation section below.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund % (Gross)	Fund % (Long)
Jan 2024 - Dec 2024	28	57
Jan 2023 - Dec 2023	31	65
Aug 2022 - Dec 2022	31	63

### Sustainability score

*This table details the Fund's sustainability score, year on year*

Period	Fund (%)
Jan 2024 - Dec 2024	17.9
Jan 2023 - Dec 2023	20.8
Jan 2022 - Dec 2022	34.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

communities through telecommunication services;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>. Firm-wide exclusions also applied to long exposures in companies generating more than 20% of their revenue from thermal coal mining.

- The Fund excluded single name long positions in companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded, from its long exposure, single name long positions in companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production)

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics, including governance, capital allocation, water usage with mining companies, climate and net zero with the construction and property companies. These engagements related to PAIs 8 (Emissions to water) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	3
Human Rights	2
Natural Capital and Biodiversity	1
Corporate Governance	1

The engagements shown may include engagements assigned to short positions, cash, derivatives, collective investment schemes, debt and repos held by the Fund.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
SMITH AND NEPHEW PLC	Health Care	3.42	United Kingdom
HISCOX LTD	Financials	3.35	United Kingdom

VEOLIA ENVIRON. SA	Industrials	2.66	Germany
TESCO PLC	Utilities	2.66	France
ASHMORE GROUP PLC	Consumer Staples	2.55	United Kingdom
UNITE GROUP PLC	Financials	2.53	United Kingdom
	Real Estate	2.51	United Kingdom
SODEXO SA	Consumer		
	Discretionary	2.36	France

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Exposures have been provided on a look through basis for index futures, index options, total return swaps (TRS) positions and contract for difference (CFD) baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97% of gross exposure. The Fund maintained a positive absolute sustainability score, and so the Fund's investments (both long and short) that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). Long positions with positive scores and short positions with negative scores both

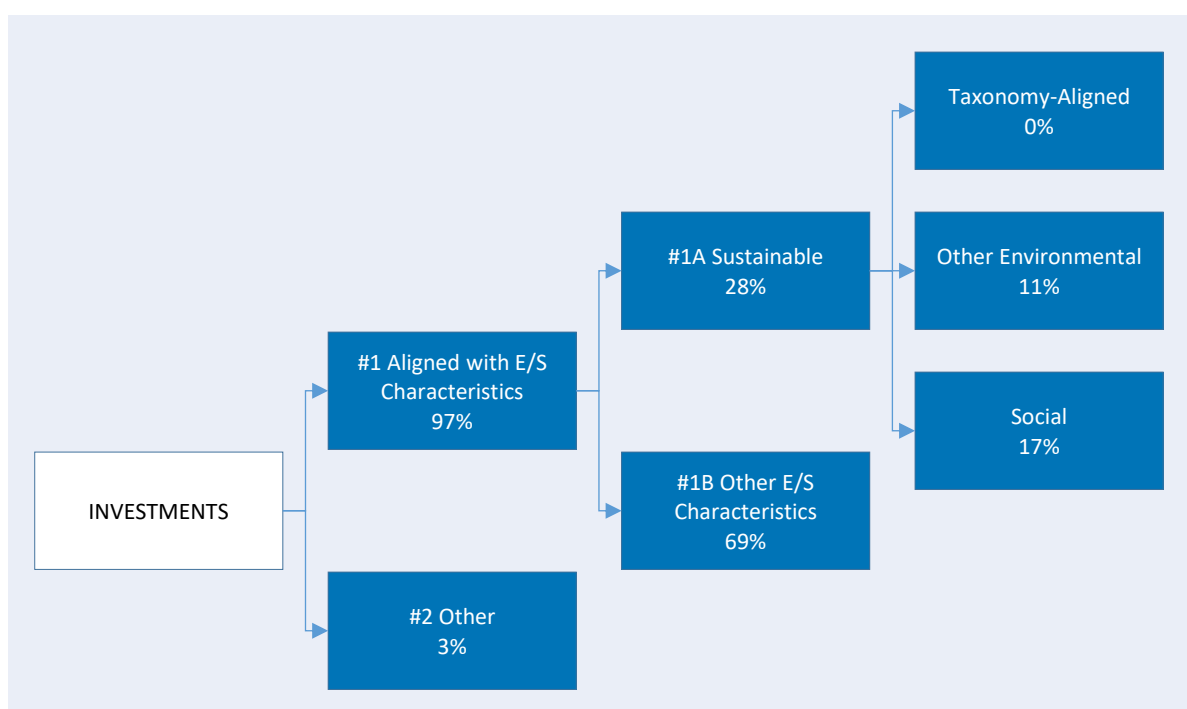

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributed positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detracted from the aggregate score. The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of gross exposure that was invested in sustainable investments, as indicated in #1A. Cash and cash equivalents are excluded from the proportions in #1 and #1A.

The Fund invested 28% of its gross exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. The gross exposure includes both long and short positions but the percentage only includes long exposures as short exposures are not deemed to be sustainable investments. Within this, 11% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. However, the Fund committed to invest at least 10% of its long positions in sustainable investments. The Fund invested 57% of its long exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits". The gross exposure and long exposure excludes cash and cash equivalents.

#2 Other includes investments that were not scored by Schroders' proprietary sustainability tools and so did not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund's investment strategy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

The percentages shown above are calculated as a proportion of gross exposure for consistency purposes. However, the Fund committed to invest at least 10% of its long exposure in sustainable investments and, as an average during the reference period, based on quarter-end data, the Fund invested 57% of its long positions in sustainable investments.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used. This netting was applied before determining whether an exposure was long or short, and before calculating the gross exposure.

## • **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets (Net)	% Assets (Gross)
Communication Services	Media & Entertainment	2.3	4.6
Communication Services	Telecommunication Services	2.5	4.0
Consumer Discretionary	Automobiles & Components	-1.9	1.9
Consumer Discretionary	Consumer Discretionary	2.2	8.2
Consumer Discretionary	Consumer Durables & Apparel	5.1	9.9
Consumer Discretionary	Consumer Services	8.4	13.1
Consumer Staples	Consumer Staples Distribution &	-2.6	7.7
Consumer Staples	Food, Beverage & Tobacco	-1.5	19.0
Consumer Staples	Household & Personal Products	1.7	4.3

Information Technology	Semiconductors &	-0.8	0.8
Materials	Materials	-4.0	11.7
Real Estate	Equity Real Estate Investment	2.6	6.6
Real Estate	Real Estate Management &	-0.4	0.4
Utilities	Utilities	-0.1	5.4
Energy	Energy	-5.2	5.2

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

During the reference period and based on quarter-end data, the Fund invested 11% of its gross exposure in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 23% of its long exposure in sustainable investments with an environmental objective that were not aligned with the Taxonomy.

## • *What was the share of socially sustainable investments?*

During the reference period and based on the quarter-end data, the Fund invested 17% of its gross exposure in sustainable investments with a social objective. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 34% of its long exposure in sustainable investments with a social objective.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that were not scored by Schroders’ proprietary sustainability tools and so did not contribute towards the Fund’s sustainability score. Cash and cash equivalents are excluded from the calculations of gross and long exposure due to the long / short nature of the Fund’s investment strategy.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies (single name long positions used for investment purposes only); and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Bond

**Legal Entity Identifier :** 61XW5S6PT0DGAORX3X38

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.9% and the benchmark's sustainability score for the reference period was 1.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Education
- Power Provision
- Socio-Political Stability
- Water Access

The Investment Manager invested 74% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	73
Aug 2022 - Dec 2022	78

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.9	1.5
Jan 2023 - Dec 2023	1.7	1.3
Jan 2022 - Dec 2022	3.2	1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. All PAI indicators are monitored via Schrodgers PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we have had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

strategies (relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	58
Corporate Governance	21
Human Rights	13
Natural Capital and Biodiversity	12
Human Capital Management	5
Diversity and Inclusion	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the Bloomberg EURO Aggregate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

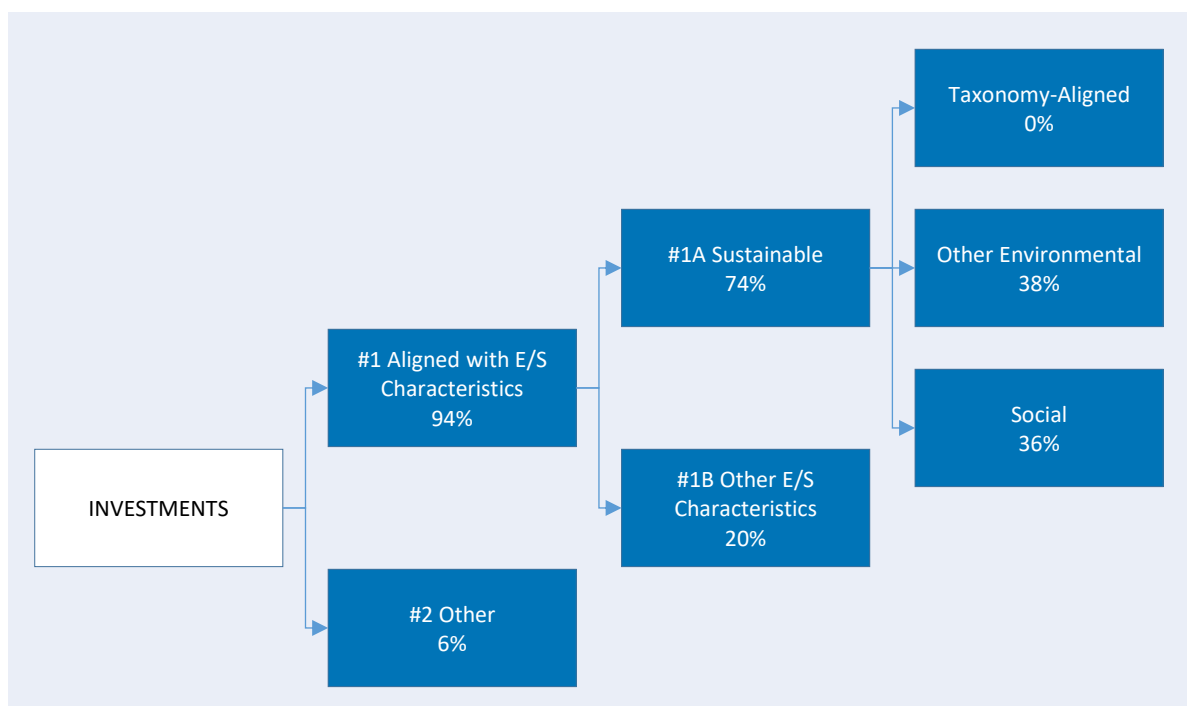

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 74% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 36%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Government Bond

**Legal Entity Identifier :** GQO6F0370CMTJBILPZ30

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 93% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.4% and the benchmark's sustainability score for the reference period was 2.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- International Aid
- Multinational Institutions
- Socio-Political Stability

The Investment Manager invested 93% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	93
Jan 2023 - Dec 2023	97
Aug 2022 - Dec 2022	97

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.4	2.3
Jan 2023 - Dec 2023	2.5	2.3
Jan 2022 - Dec 2022	2.7	2.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Multinational Institutions: the estimated societal benefits associated with countries working together through international organisations that encourage cooperation and diplomatic resolutions to global problems. Assigned in proportion to a country's net UN contributions; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The nature of this Fund is such that it does not meaningfully invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds in Schroders’ range. Nonetheless, the exclusions were formally applied, and included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates PAIs as a component of its scoring methodology. For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. All PAI indicators are monitored via Schroders PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund did not invest). During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Natural Capital and Biodiversity	3
Climate Change	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

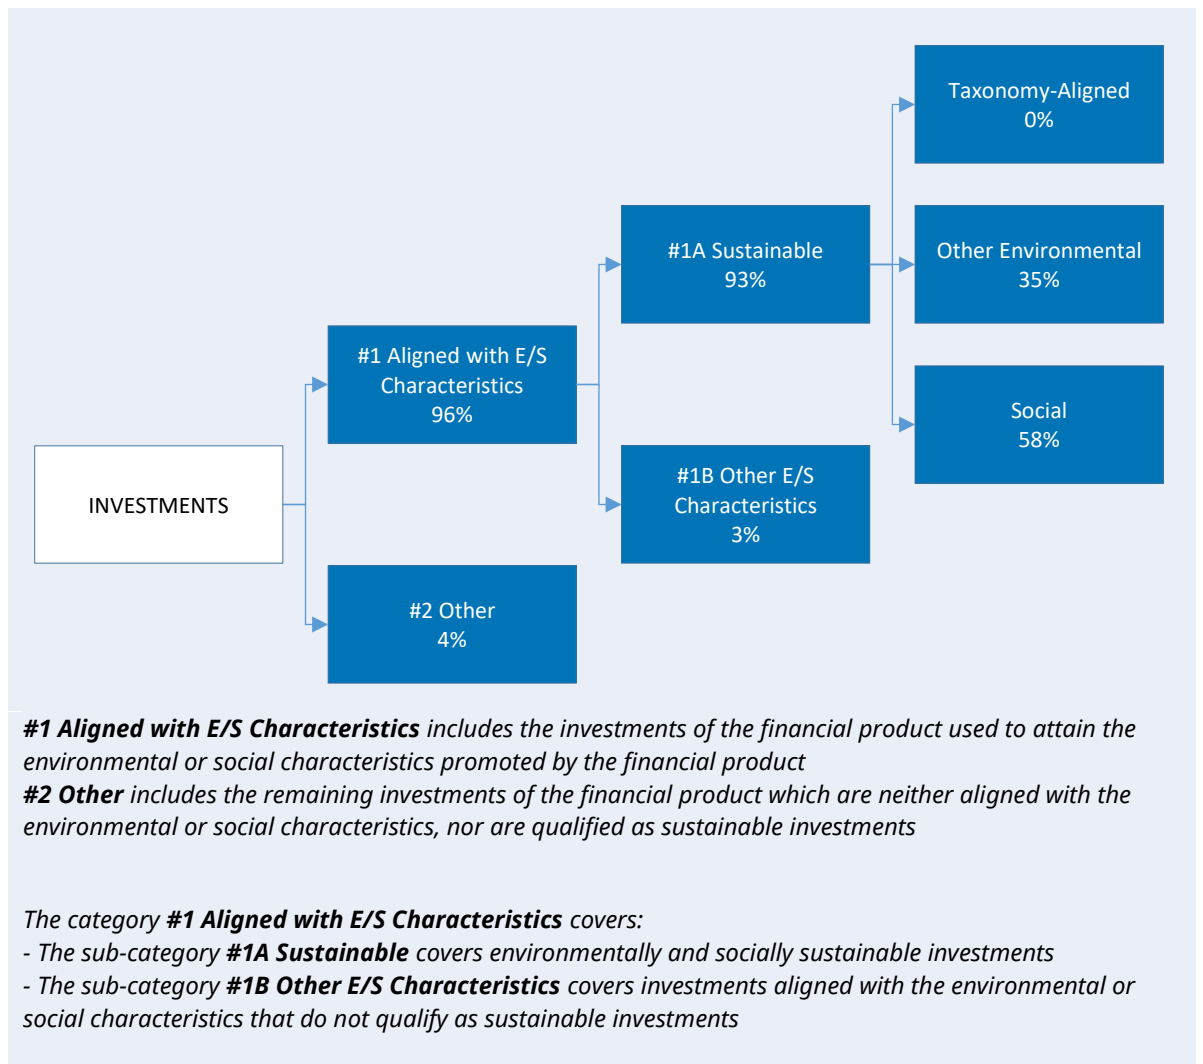

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Government Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 93% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 58% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Sovereign (Developed)	Sovereign (Developed)	85.37
Financial	Banking	3.62
Financial	Financial Services	0.57
Supranational	Supranational	2.20
EMD Sovereign	EMD Sovereign	2.01
Foreign Sovereign	Foreign Sovereign	1.74
Cash	Cash	1.24
Cash	Margin Cash	0.39
Government Guaranteed	Government Guaranteed	0.93
Local Authority	Local Authority	0.92
Cash Equivalents	Treasury Bills	0.49
Agency	Agency	0.33
Industrial	Transportation	0.19
Derivatives	Inflation Derivatives	0.02
Derivatives	Interest Rate Derivatives	-0.02

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

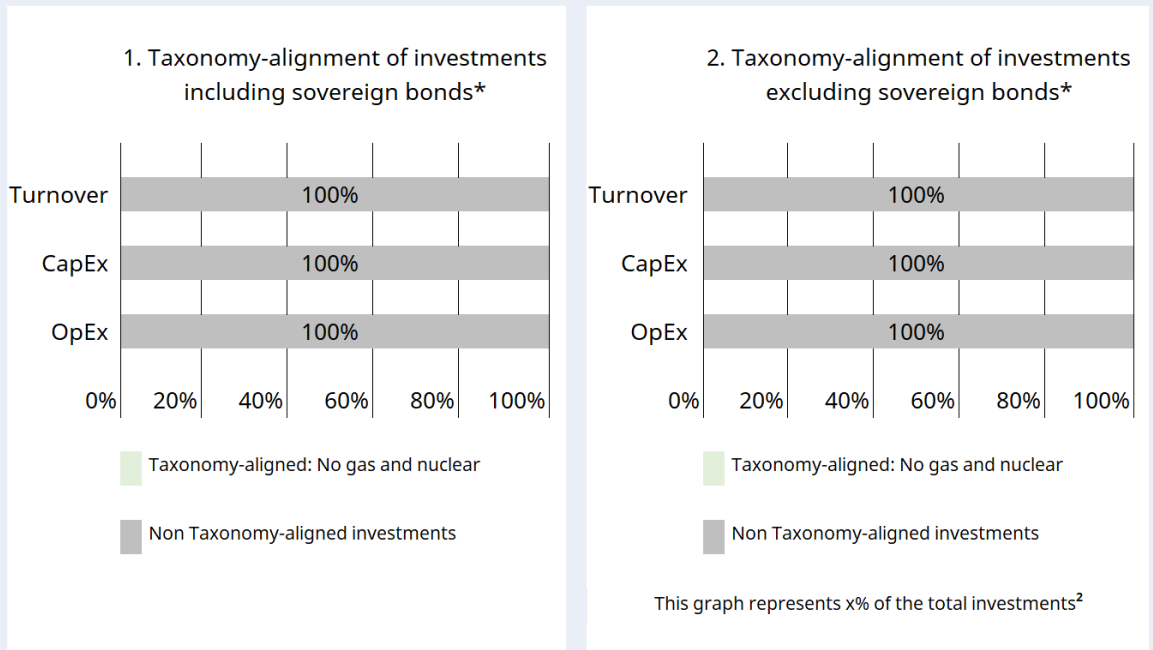

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 58%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Short Term Bond

**Legal Entity Identifier :** LKIIDMHWTJNCPJTJ3M14

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.4% and the benchmark's sustainability score for the reference period was 0.8%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Education
- High Salaries
- Sanitation
- Socio-Political Stability

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	67
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	66

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.4	0.8
Jan 2023 - Dec 2023	1.0	0.5
Jan 2022 - Dec 2022	1.9	0.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. All PAI indicators are monitored via Schrodgers PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

(relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	35
Corporate Governance	14
Human Rights	5
Natural Capital and Biodiversity	4
Human Capital Management	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 92%. The Fund maintained a higher overall sustainability score than the Bloomberg Euro Aggregate (1-3 Y) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that

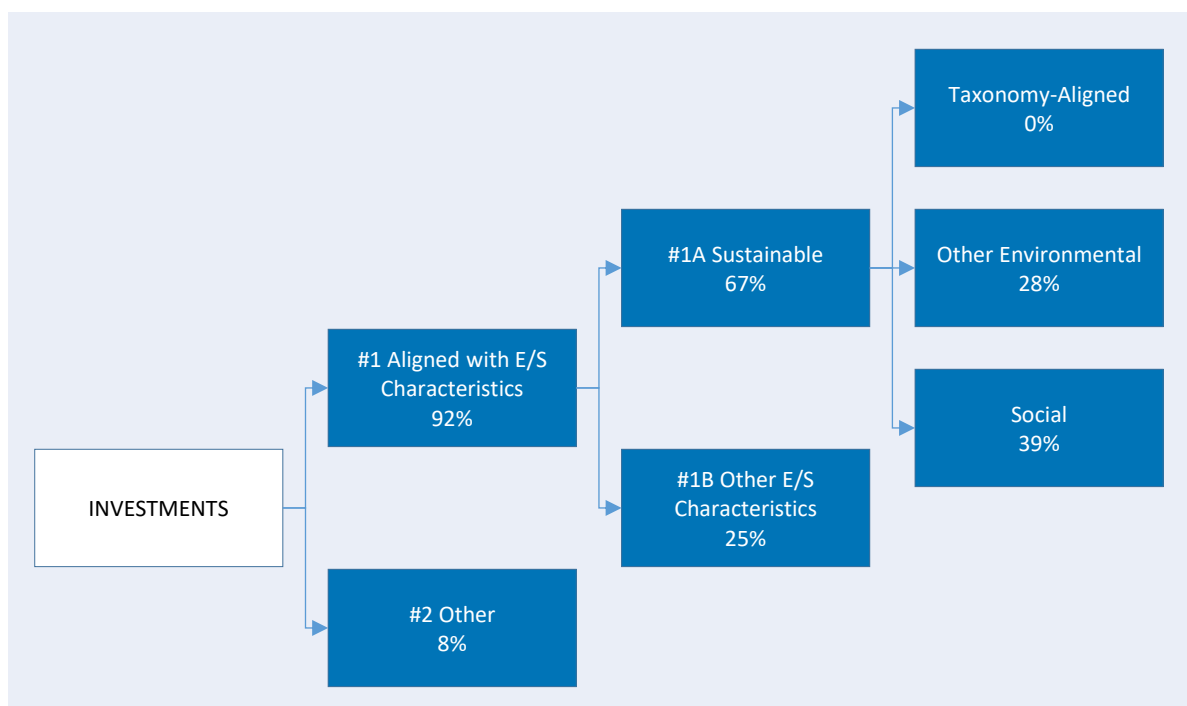

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 39% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Banking	26.73
Financial	Financial Services	7.35

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 39%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Bond

**Legal Entity Identifier :** ITFMVE39JEIQ35YCI721

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.2% and the benchmark's sustainability score for the reference period was 0.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- High Salaries
- Socio-Political Stability
- Water Access

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	60
Sep 2022 - Dec 2022	65

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.2	0.2
Jan 2023 - Dec 2023	0.6	-0.1
Jan 2022 - Dec 2022	1.3	-0.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2 were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. All PAI indicators are monitored via Schrodgers PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers. During the reference period, however, we had opportunities to engage with relevant sovereign

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	71
Corporate Governance	28
Natural Capital and Biodiversity	23
Human Rights	21
Human Capital Management	9
Diversity and Inclusion	8

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate Bond Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 33% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Securitized	Mortgage Backed	21.78
Securitized	Collateralized Mortgage Obligation	1.35
Securitized	Asset Backed	0.99
Securitized	Commercial Mortgage Backed	0.01
Sovereign (Developed)	Sovereign (Developed)	20.18
Financial	Banking	12.40
Financial	Financial Services	2.43
Financial	Insurance	1.40

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 33%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 32%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Inflation Linked Bond

**Legal Entity Identifier :** RUBFC6653PDCGJDLQB12

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 96% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.6% and the benchmark's sustainability score for the reference period was 1.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Education
- International Aid
- Power Provision
- Socio-Political Stability
- Water Access

The Investment Manager invested 96% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	99
Aug 2022 - Dec 2022	97

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.6	1.6
Jan 2023 - Dec 2023	2.9	1.8
Jan 2022 - Dec 2022	1.8	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- International Aid: the estimated societal benefits associated with humanitarian aid following natural disasters or conflicts and financial support for economic development of underdeveloped economies. Assigned in proportion to total net Official Development Assistance (ODA) receipts;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues;
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The nature of this Fund is such that it does not meaningfully invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds. Nonetheless, the exclusions formally applied included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates PAIs as a component of its scoring methodology. For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. All PAI indicators are monitored via Schrodgers PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers (in which this Fund does not meaningfully invest). During the reference period, however, we had opportunities to engage with relevant sovereign and supranational issuers, primarily with respect to their approach to net zero carbon strategies (relating to PAI 15, GHG intensity).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	4
Human Rights	4
Corporate Governance	3
Human Capital Management	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Global Governments Inflation-Linked EUR Hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 96% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 61% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)		90.11
Utilities	Non-Electric Utilities	1.40

Derivatives	Interest Rate Derivatives	-0.02
Derivatives	FX Derivatives	-0.74

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 61%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 35%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar Short Duration Bond

**Legal Entity Identifier :** 549300SQ2F1F5L1C1W23

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 4.3% and the benchmark's sustainability score for the reference period was -0.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- Medicine
- Sanitation
- Water Access

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	67
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	65

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	4.3	-0.3
Jan 2023 - Dec 2023	1.5	-0.8
Jan 2022 - Dec 2022	2.0	-1.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance / environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to have them provide an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	17
Human Rights	6
Corporate Governance	6
Natural Capital and Biodiversity	4
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

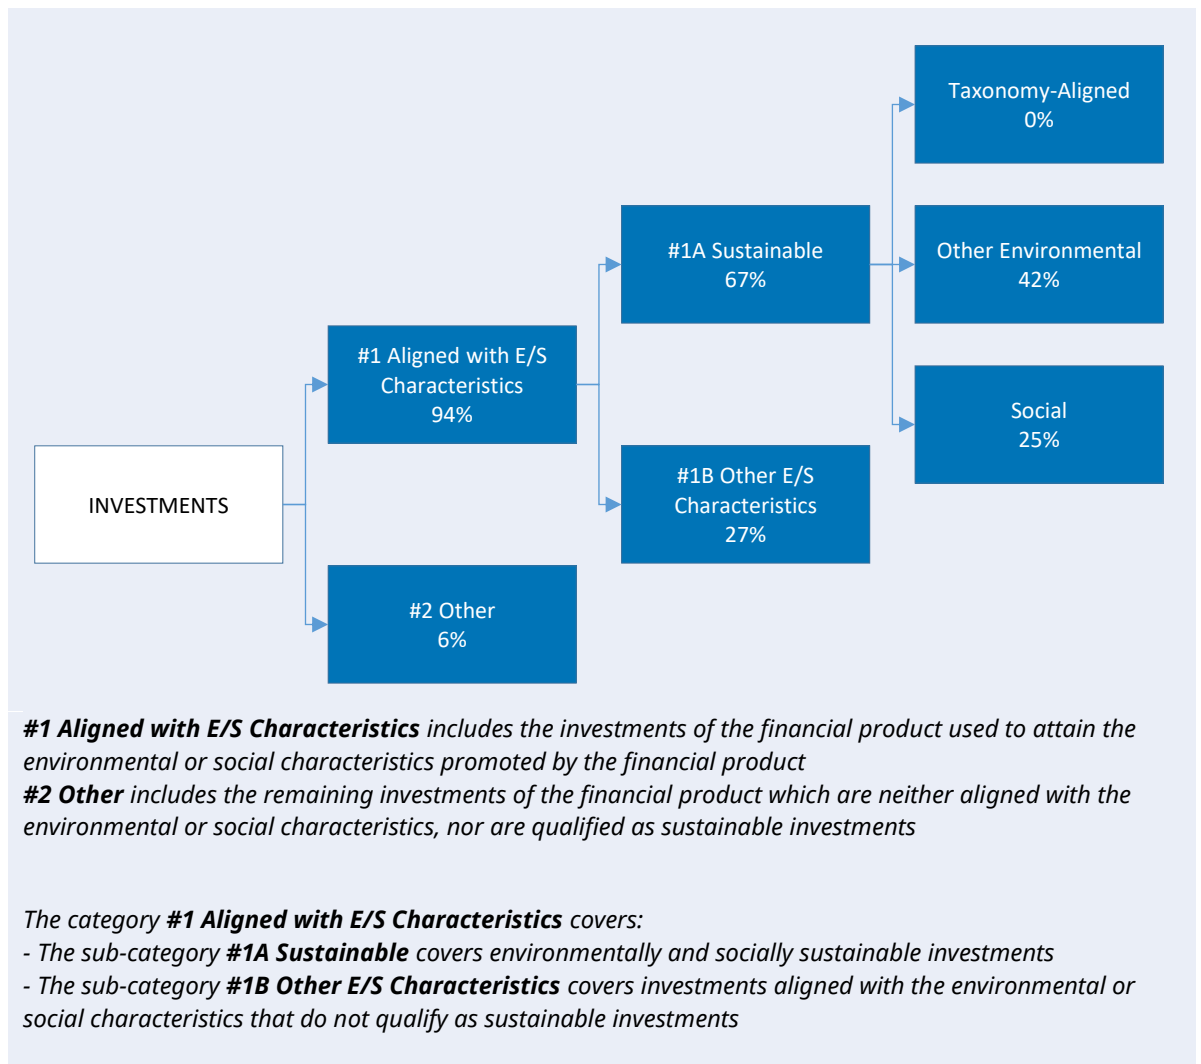

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the Bloomberg US Govt/Credit 1-3 Year Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 42% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets

Cash	Margin Cash	0.12

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

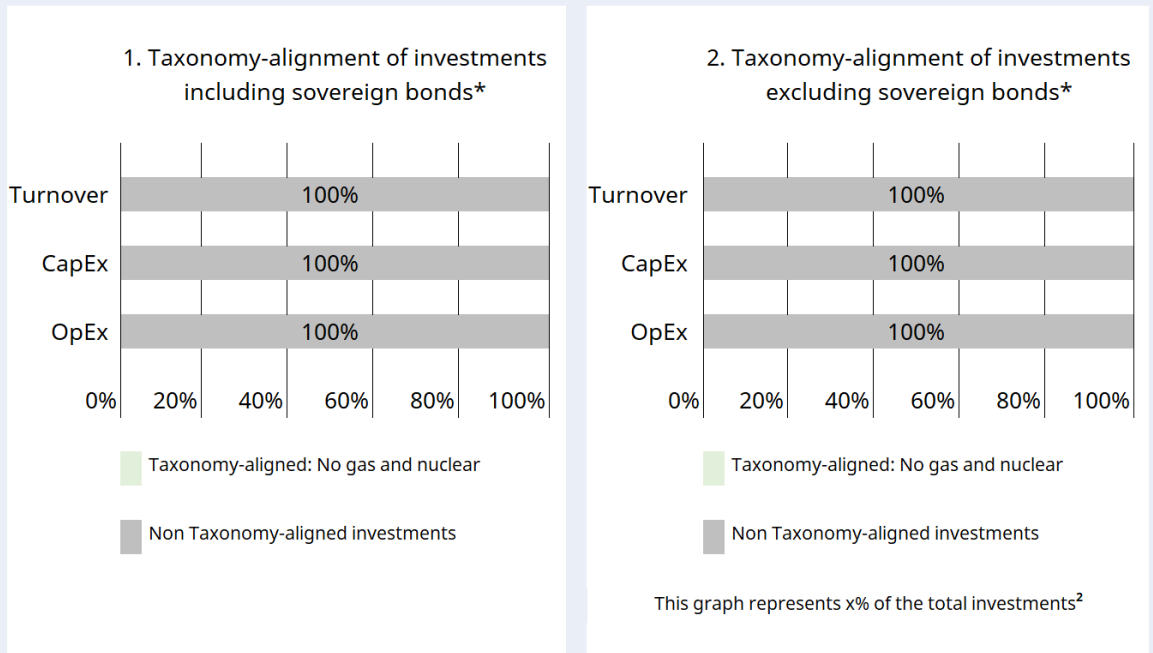

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 25%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF US Dollar Bond

**Legal Entity Identifier :** GB3IPB54OX2RMO1Y4781

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.0% and the benchmark's sustainability score for the reference period was -1.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries
- Sanitation

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	59
Aug 2022 - Dec 2022	62

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.0	-1.3
Jan 2023 - Dec 2023	1.8	-2.1
Jan 2022 - Dec 2022	3.6	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

of global revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance / environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to have them provide an update on their climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	24
Corporate Governance	10
Human Rights	9
Natural Capital and Biodiversity	5
Human Capital Management	4
Diversity and Inclusion	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

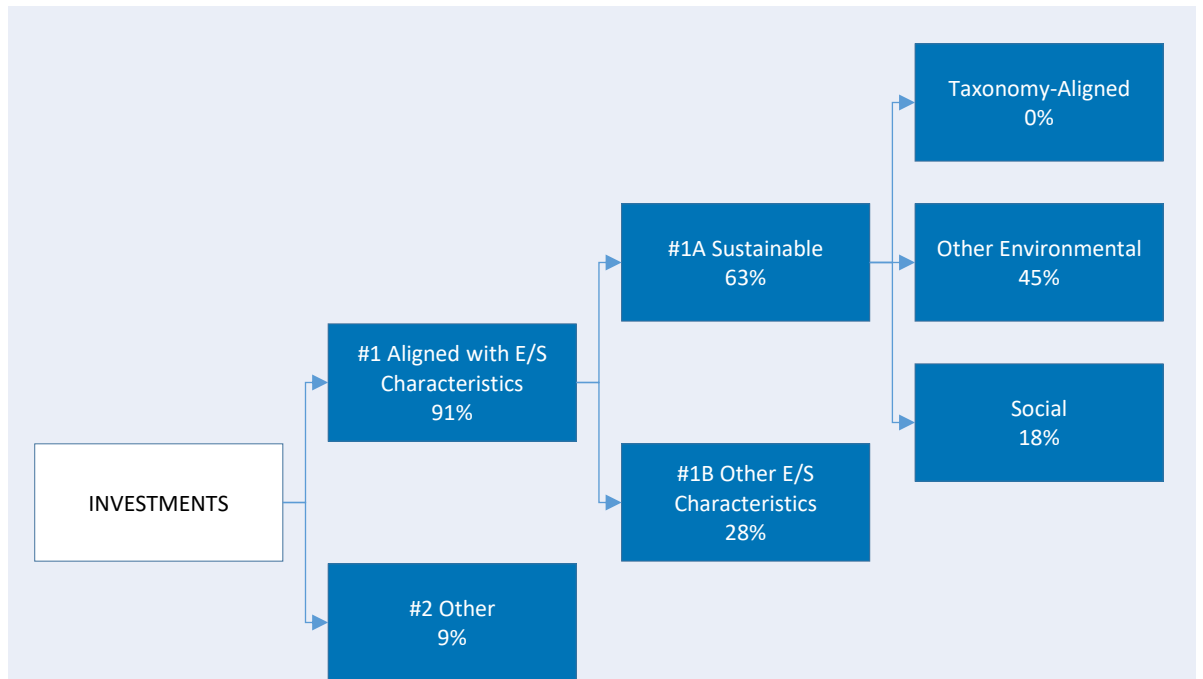

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the Bloomberg US Aggregate Bond (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 45% was invested in sustainable investments with an environmental objective and 18% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

Taxonomy-aligned: No gas and nuclear

Non Taxonomy-aligned investments

2. Taxonomy-alignment of investments excluding sovereign bonds\*

Taxonomy-aligned: No gas and nuclear

Non Taxonomy-aligned investments

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 45%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 18%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Alternative Securitised Income

**Legal Entity Identifier :** 549300WDWBV63KONLL52

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles.

5% of the assets in the Fund were ranked as 5-stars, 42% were ranked as 4-stars and 51% were ranked as 3-stars, measured using quarter-end data throughout the reference period.

Compliance with the minimum required score was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

### • ...and compared to previous periods?

#### Proprietary star ratings

*This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.*

Period	5-stars (%)	4-stars (%)	3-stars (%)
Jan 2024 – Dec 2024	5	42	51
Jan 2023 – Dec 2023	11	31	58
Sep 2022 – Dec 2022	20	28	48

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this Fund.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate.

Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for purpose;

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- The Investment Manager's rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;
- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure was calculated using quarter-end data throughout the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Securitized	Collateralized Mortgage Obligation	50.27
Securitized	Asset Backed	30.55
Securitized	Mortgage Backed	8.42
Securitized	Commercial Mortgage Backed	6.16
Cash Equivalents	Treasury Bills	10.74
Collective Investments	Unit Trusts	1.64
Derivatives	FX Derivatives	0.10
Financial	Finance Companies	0.08
Cash	Margin Cash	0.15
Cash	Cash	-8.10

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

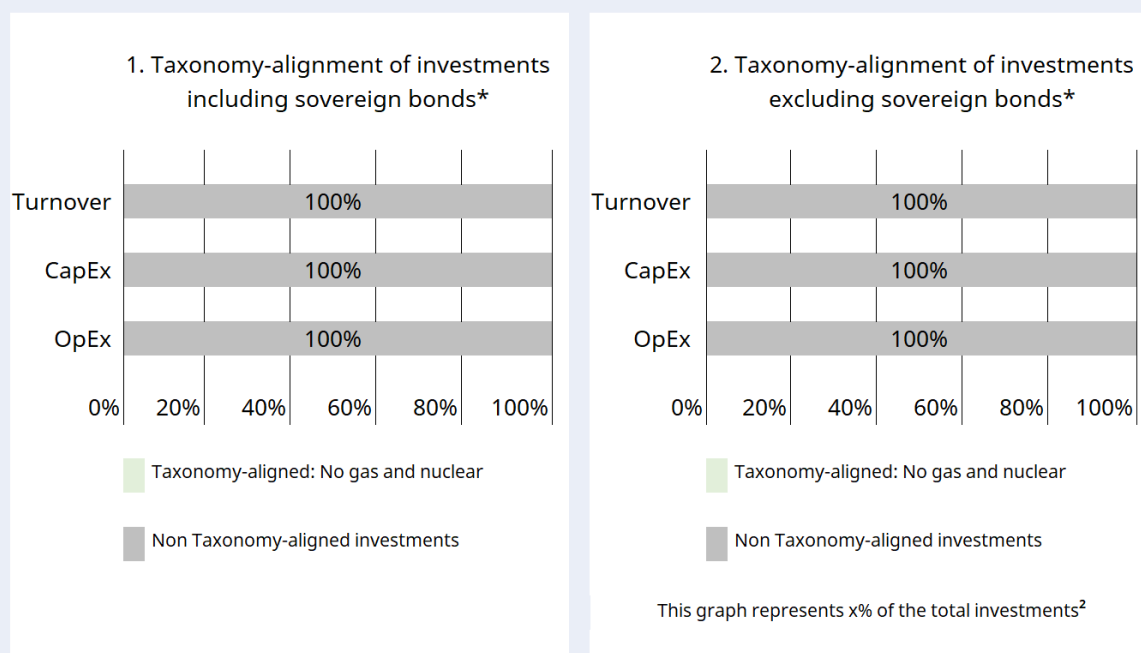

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, money market instruments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager’s rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure; and
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Credit Opportunities

**Legal Entity Identifier :** 549300T8YDW23OK28X19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 52% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.2% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Financial Inclusion
- High Salaries
- Power Provision

The Investment Manager invested 52% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	52
Jan 2023 - Dec 2023	47
Aug 2022 - Dec 2022	47

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.2	-2.5
Jan 2023 - Dec 2023	1.2	-2.9
Jan 2022 - Dec 2022	3.4	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAIs 1 and 2, we engaged with a company in the metals and mining sector to follow up and share feedback on their targets and initiatives related to carbon emissions. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 15.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	15
Corporate Governance	8
Natural Capital and Biodiversity	3
Diversity and Inclusion	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

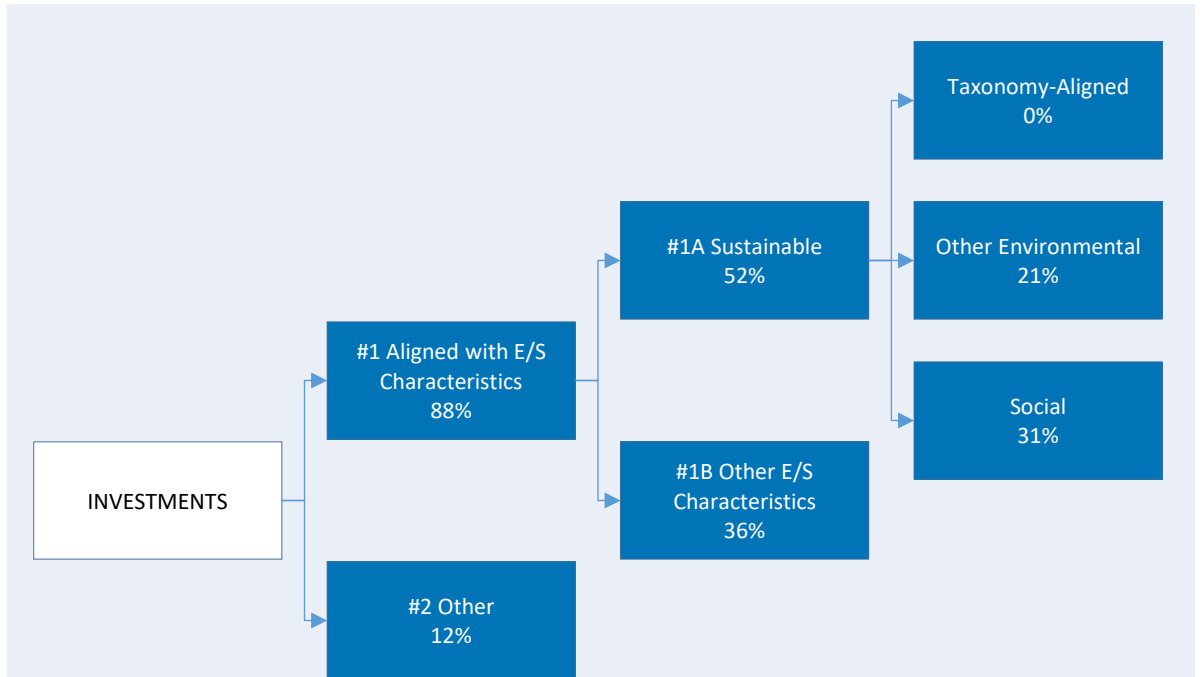

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the JP Morgan Asia Credit Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 52% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 31%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Local Currency Bond

**Legal Entity Identifier :** 549300KCHS55SNB1JYW85

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 28% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx Asian Local Currency Bond Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.6% and the benchmark's sustainability score for the reference period was -1.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Clean Energy
- Connectivity
- Education

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - Socio-Political Stability

The Investment Manager invested 28% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

### • ...and compared to previous periods?

#### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	28
Jan 2023 - Dec 2023	30
Sep 2022 - Dec 2022	33

#### Sustainable score

*This table details the percentage of assets invested in sustainable score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	-0.6	-1.3
Jan 2023 - Dec	-0.7	-1.3
Jan 2022 - Dec	-0.7	-1.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Education: the estimated societal benefits of a country's education spend per school age capita; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. The combination of the Investment Manager’s fundamental and quantitative analysis helped to provide a comprehensive view on ESG factors on a country, sector and issuer level. That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. All PAI indicators are monitored via Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. For example, during the reference period, we engaged with an investee company on human rights and supply chain working conditions related to PAI 10 (Violations of UNGC principles).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	18
Corporate Governance	7
Natural Capital and Biodiversity	4
Diversity and Inclusion	3
Human Capital Management	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall

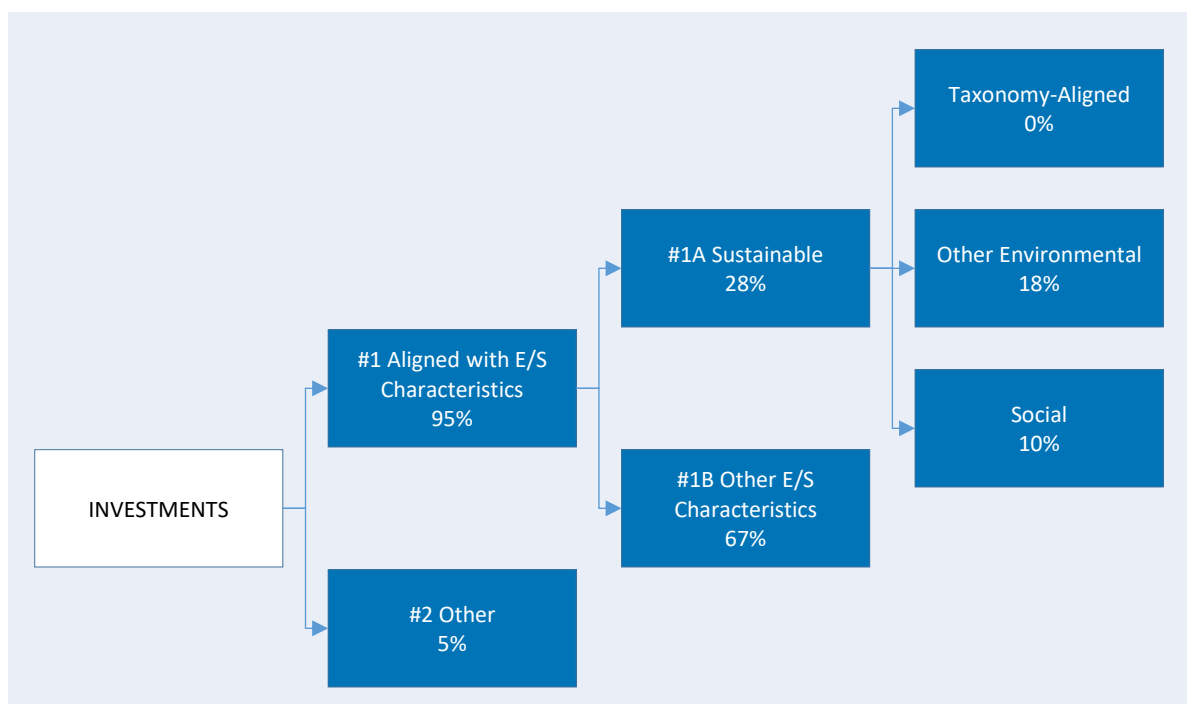

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability score than the iBoxx Asian Local Currency Bond Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 28% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 18% was invested in sustainable investments with an environmental objective and 10% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 18%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 10%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF BlueOrchard Emerging Markets Climate Bond

**Legal Entity Identifier :** 5493007XCI1VSIJ1FK02

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 95%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: 0%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 31 May 2024 the Fund invested at least 75% of its assets, and from 1 June 2024 at least 80% of its assets, in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change. The Investment Manager selected sustainable investments from a universe that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the investment's contribution to the UN SDG of taking action to combat climate change alongside the Investment Manager's assessment of impact via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager considered the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental objective, and specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to verify that every bond included in the investment universe had satisfactory ESG and impact scores and was aligned to the Fund's investment objective of combatting climate change. There was a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a bond is expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review.

Once these steps were completed, the bond's or company's impact scorecard and the company's ESG scorecard (as applicable) were validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

The Fund generated a positive impact as demonstrated by indicators attributable to the portfolio, which included but were not limited to creating an estimated reduction of 103,747 tons of greenhouse gas emissions (tCO<sub>2</sub>e), generating an estimated 109,474 MWh of renewable energy with financed renewable energy assets, installing an estimated 79 MW of renewable energy capacity and saving an estimated 8,963 MWh of energy with green buildings and energy efficiency projects. These figures are estimated based on publicly available data and are applicable to the reference period.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

*This table details the Fund's average estimated MWh of renewable energy generated, year on year.*

Period	MWh of renewable energy generated
Jan 2024 - Dec 2024	109,475
Jan 2023 - Dec 2023	109,109
Jan 2022 - Dec 2022	152,768

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### **• How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund did not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List: [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

### **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess issuers and approve them for the strategy's sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with a number of issuers covering a range of topics and related to PAIs 1, 2, 3, 12 and 13. For example we engaged with an investee company on net zero carbon emissions targets and SBTi targets, related to PAI 1 and 2. In reference to PAI 1 and 2, we engaged with a company in the financial sector to enquire why the firm did

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

not have SBTi targets committed or validated, and shared the importance of such targets and commitments. All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	24
Corporate Governance	31
Natural Capital and Biodiversity	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

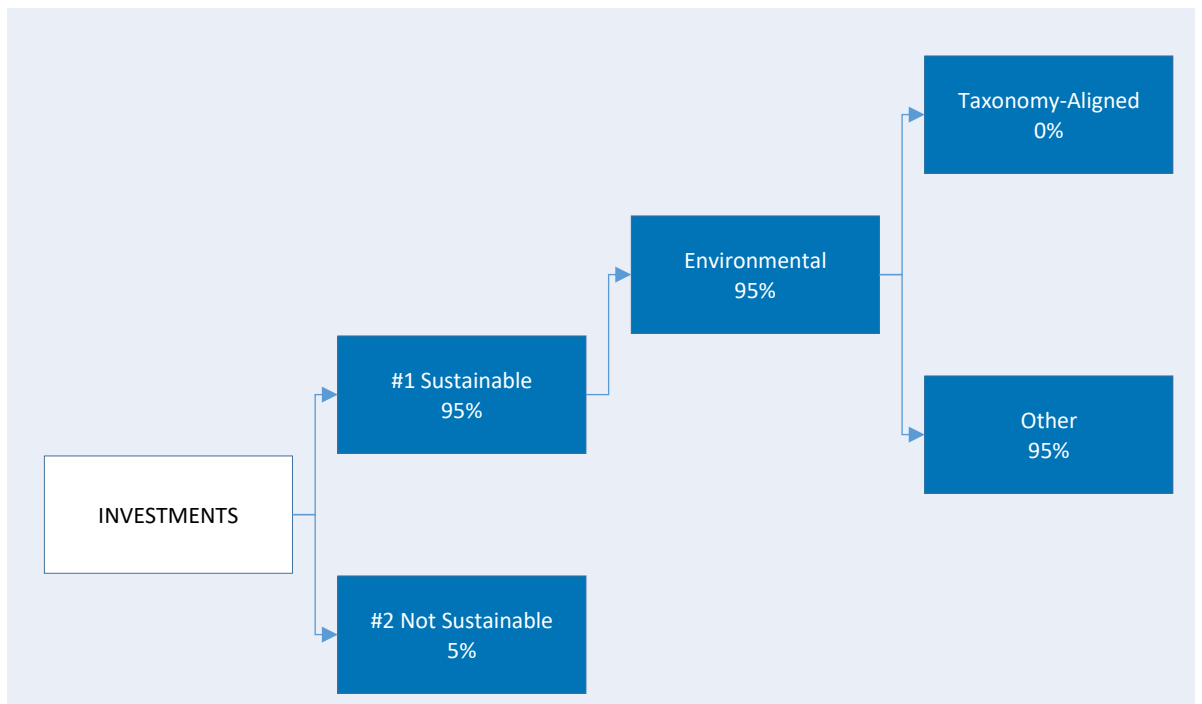

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change.

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Sustainable** covers sustainable investments with environmental or social objectives  
**#2 Not sustainable** includes investments which do not qualify as sustainable investments

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financials	Banking	28.44
Foreign Sovereign	Foreign Sovereign	11.25

Industrials	Oil Refining & Marketing	0.43
Industrials	Capital Goods	0.2
Derivatives	FX Derivatives	0.18
EMD Sovereign	EMD Sovereign	0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## • *What was the share of socially sustainable investments?*

There were no sustainable investments with a social objective.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective were the following:

- The Fund invested at least 80% of its assets in securities issued by governments and companies worldwide, including emerging market countries, that contributed towards the UN SDG of taking action to combat climate change;
- The Fund invested in companies that did not cause significant environmental or social harm;
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies;
- The Investment Manager engaged with certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond's issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager's objectives in terms of sustainability data, and any concerns on insufficient reporting; and
- During the reference period the Investment Manager conducted 57 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

climate change, disclosure and reporting, and corporate governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF BlueOrchard Emerging Markets Impact Bond

**Legal Entity Identifier :** 5493002UVX4QP1OMYB39

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 29%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 67%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 31 May 2024 the Fund invested at least 75% of its assets, and from 1 June 2024 at least 80% of its assets, in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes. The Fund invested at least 5% of its assets in sustainable investments with an environmental objective and at least 50% of its assets in sustainable investments with a social objective.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Fund invested in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as fixed and floating rate securities related to sustainable infrastructure projects and clean energy initiatives.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 96% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager considered the extent to which the issuer's revenues, business activities, or the use of proceeds of a purpose bond contribute to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a proprietary sustainability tool to analyse how the use of proceeds of social and sustainability bonds are contributing to job creation and how many jobs are created or maintained as a result of the bond's proceeds. There is a detailed impact assessment of every company and/or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a bond is expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the bond or company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including the Investment Manager's influence and engagement); and consideration of impact risks. The assessment includes tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's or the bond's positive contribution over time via an annual review.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Once these steps were completed, the bond's or the company's impact scorecard and the company's ESG scorecard (as applicable) were validated and approved by the BlueOrchard Sustainability & Impact (S&I) team, in order for the company or bond to be eligible for inclusion in the Fund's investible universe. The S&I team is independent from the investment teams, and is responsible for the consistent application of impact and ESG assessments and scorecards and that all investments meet minimum ESG and impact ratings, as set out in BlueOrchard's ESG & Impact Policy.

For sustainable investments with a social objective, indicators included but were not limited to providing access to finance to 68,230 people, supporting 59,325 women and minorities, reaching 180,352 number of beneficiaries patients and students, providing 544,195 households with access to connectivity, and supporting 21,272 number of micro/ small/medium enterprises. For sustainable investments with an environmental objective, indicators included but were not limited to creating an estimated reduction of 190,915 tons of greenhouse gas emissions (tCO<sub>2</sub>e), generating an estimated 124,068 MWh of renewable energy with financed renewable energy assets, and installing an estimated 504 MW of renewable energy capacity. These figures are estimated based on publicly available data and are applicable to the reference period.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	96
Jan 2023 - Dec 2023	93

### Environmental Indicators

*This table details the Environmental Indicator figures, year on year.*

Period	Tons of CO <sub>2</sub> emissions reduction	MW of renewable energy capacity installed	MWh of renewable energy generated
Jan 2024 - Dec 2024	190,915	504	124,068
Jan 2023 - Dec 2023	166,722	651	120,717

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## Social Indicators

This table details the Social Indicator figures, year on year.

Period	People provided with access to Finance	Household connectivity provided	Micro/ small / Medium enterprises supported
Jan 2024 - Dec 2024	68,230	544,195	21,272
Jan 2023 - Dec 2023	59,351	301,694	15,322

Period	Women and Minorities supported	Beneficiaries patients and students reached
Jan 2024 - Dec 2024	59,325	180,352
Jan 2023 - Dec 2023	16,829	59,516

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund did not directly invest in the sectors included in BlueOrchard's Public Asset Exclusion List: [https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy\\_Public-Assets.pdf](https://www.blueorchard.com/wp-content/uploads/20220520-BlueOrchard-Exclusion-Policy_Public-Assets.pdf)

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

Reference Period: 1 January 2024 - 31 December 2024

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were included within the BlueOrchard proprietary ESG scorecard which is one of the necessary steps to assess issuers and approve them for the strategy's sustainable investment universe. PAIs 1-14 were included in the BlueOrchard proprietary ESG scorecard within relevant ESG sections and guided the ESG analysis along with other ESG factors such as good governance metrics to determine an overall ESG score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with a number of issuers covering a range of topics and related to PAIs 1, 2, 3, 12 and 13. For example we engaged with an investee company on net zero carbon emissions targets and SBTi targets, related to PAI 1 and 2. In reference to PAI 1 and 2, we engaged with a company in the financial sector to enquire why the firm did not have SBTi targets committed or validated, and shared the importance of such targets and commitments. All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	20
Climate Change	23
Natural Capital and Biodiversity	1
Diversity and Inclusion	1
Human Rights	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

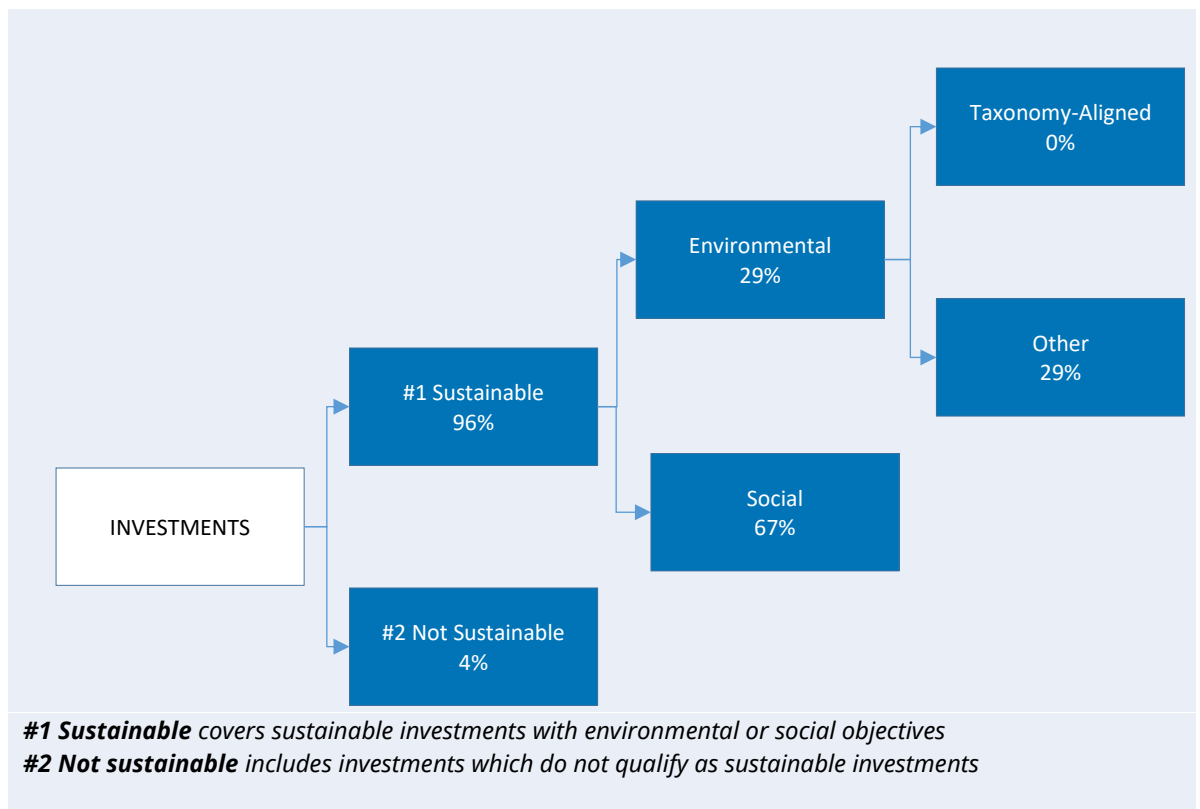

#1 Sustainable are investments in securities issued by governments, government agencies, supranationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund invested 96% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 67% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financials	Banking	39.21
Supranationals	Supranationals	18.28
Agency	Agency	7.93
Foreign Sovereign	Foreign Sovereign	6.55

Derivatives	FX Derivatives	0.08

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx)  
reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 67%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective were the following:

- The Fund invested at least 80% of its assets in securities issued by governments, government agencies, supra-nationals and companies of emerging market countries that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes;
- The Fund invested in companies that did not cause significant environmental or social harm;
- The Investment Manager utilised its proprietary framework to help assess good governance practices of investee companies;
- The Investment Manager engaged certain issuers held in the portfolio and on average aimed to meet or speak with company management at least at the bond's issuance or at the time of the investment. During these meetings sustainability topics (such as net zero and the energy transition) were regularly discussed alongside impact disclosure and reporting plans to voice the Investment Manager's objectives in terms of sustainability data, and any concerns on insufficient reporting; and
- During the reference period the Investment Manager conducted 47 dedicated sustainability

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagements across the investible universe on a number of different topics, including but not limited to climate change, disclosure and reporting, and corporate governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Carbon Neutral Credit

**Legal Entity Identifier :** 54930083X6X1LLU8U819

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : 99.7%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : __%	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund aimed to achieve aggregate carbon neutrality by the year 2025 within its investment portfolio by investing its assets in sustainable investments, which were fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; (iii) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (iii) may include those that provide products or services which enable decarbonisation). All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (a) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (b) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager sought to ensure reduction in carbon emissions by investing in issuers as described in (i) – (iii) above. Companies from sectors with heavy scope 3 emissions were also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions. The Investment Manager periodically assessed whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and sought to identify cases where it may deviate. The Investment Manager also sought to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviewed any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions. These considerations led to divestment by the Investment Manager of more than 9 companies during the reference period.

The Fund also invested at least 75% of its assets in sustainable investments until 31 May 2024 and invested at least 80% of its assets in sustainable investments from 1 June 2024 to the end of the reference period. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund invested 99.7% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to positively screen the sustainable investment universe as well as measure the contribution at an investee company level.

The carbon emissions intensity to sales indicator (tonnes of CO<sub>2</sub>e per \$mn sales), as measured by Scope 1 and 2 carbon intensity using data from a third-party provider, aggregated at portfolio level, reflects the pathway of attaining the sustainable investment objective, before considering avoided emissions. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy. Through investments in issuers with low and neutral carbon intensity, as well as issuers that are decreasing and targeting carbon reduction, the Scope 1 and 2 carbon intensity at the Fund level decreased over 2024 and was meaningfully lower than the global credit universe.

The projected net carbon intensity at the Fund level, while also considering the carbon avoided contribution from decarbonisation enablers, reflects the objective of being net carbon neutral by 2025. At the end of the reference period projected net carbon intensity was zero, as measured through Scope 1 and 2 carbon intensity using data from a third-party provider.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	100
Jan 2023 - Dec 2023	98
Jan 2022 - Dec 2022	97

### Net carbon intensity

*This table details the projected net carbon intensity by 2025, year on year.*

Period	Projected net carbon intensity (scope 1 & 2) tCO <sub>2</sub> e/\$mn

Jan 2022 - Dec 2022	0

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>. Firm-wide exclusions also apply to companies generating more than 20% of their revenue from thermal coal mining.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:
  - Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. For example, PAI 1 and 3 and PAI 4 from Annex 1 Table 2 were also monitored for ongoing security selection, in line with the sustainability objective of the Fund.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity and natural capital disclosures and targets, and climate and net zero commitments for held companies within the utilities, banking and real estate sectors. These engagements related to PAIs 7 (negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, carbon footprint, GHG intensity of investee company and share of non-renewable energy consumption and production). All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

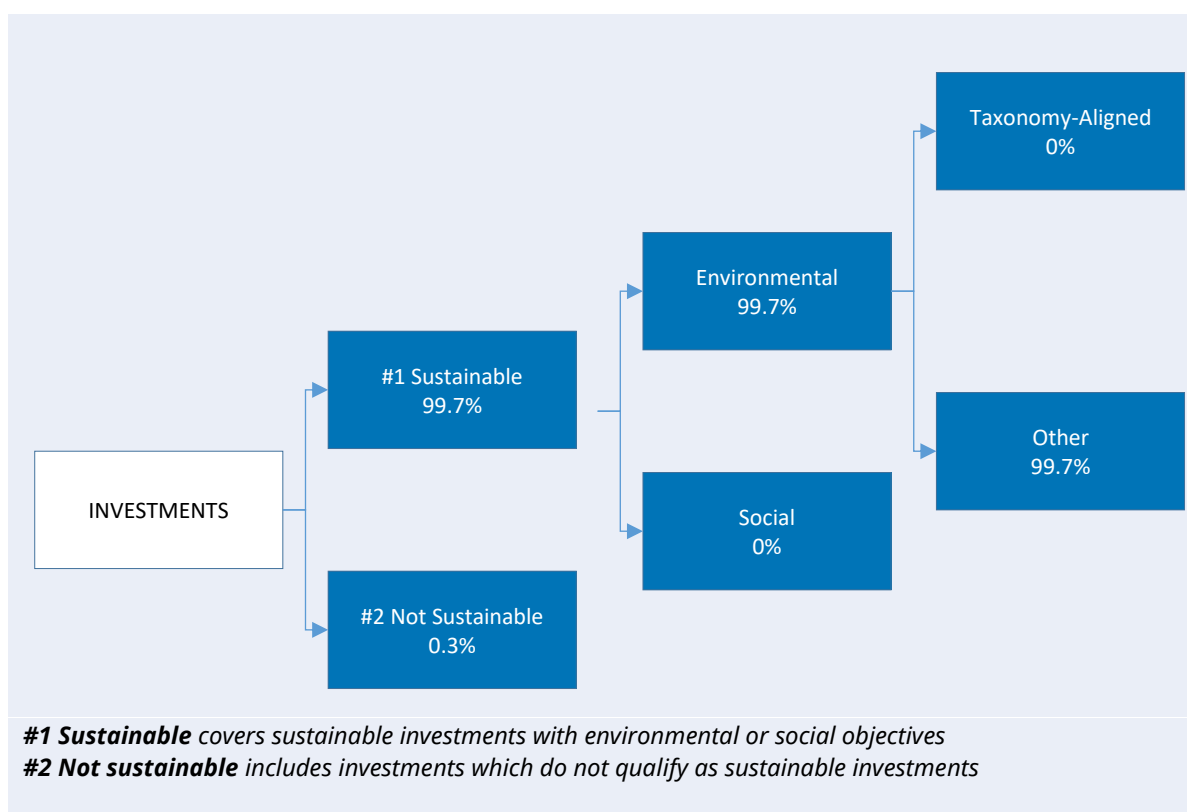

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 80% emission reductions or equivalent by 2030; and/or (iii) otherwise demonstrating a contribution to the reduction of carbon emissions.

The Fund invested 99.7% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	8.44
Industrial	Healthcare	7.26
Industrial	Technology & Electronics	7.09
Industrial	Telecommunications	6.23
Industrial	Capital Goods	5.30
Industrial	Retail	5.02

Cash	Cash	0.33
Cash	Margin Cash	0.01
Derivatives	FX Derivatives	-0.78

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## What was the share of socially sustainable investments?

There were no sustainable investments with a social objective.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective by the Fund were the following:

- The Fund was actively managed and invested at least 80% of its assets in sustainable investments, which are investments that contributed towards the objective of carbon emission reduction;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- Analysis and engagements were conducted, which in one instance resulted in not investing in a company. Despite meeting the environmental objective, the Investment Manager was not comfortable remaining invested following the engagement; and
- The Fund undertook a number of diverse engagements during the reference period. The Investment Manager undertook targeted engagements on companies to reduce their carbon emissions, use more renewable energy and commit to comprehensive carbon reduction pathways. Engagements were also carried out to gain insight and request improvements on topics including biodiversity and natural capital climate adaptation, human rights, corporate governance and human capital management.

## How did this financial product perform compared to the reference sustainable benchmark?

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF China Local Currency Bond

**Legal Entity Identifier :** HPREJ5FHRTCLC11ND15

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx ALBI China Onshore Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.2% and the benchmark's sustainability score for the reference period was -1.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	-1.2	-1.7
Jan 2023 - Dec 2023	-0.4	-1.7
Jan 2022 - Dec 2022	-0.7	-1.8

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

This question is not applicable for this Fund.

## *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAIs related to GHG emissions and carbon footprint (PAIs 1, 2, 3 and 15), were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. The combination of the Investment Manager’s fundamental and quantitative analysis helped to provide a comprehensive view on ESG factors on a country, sector and issuer level. That said, due to a lower availability of PAI indicators for many issuers in Asia, some PAIs may be less meaningful in the context of an Asia focused strategy. Over time we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. All PAI indicators are monitored via Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. For example, during the reference period, we engaged with an investee company on a climate action plan and greenhouse gas emission targets related to PAI 1, 2, 3, and 15.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

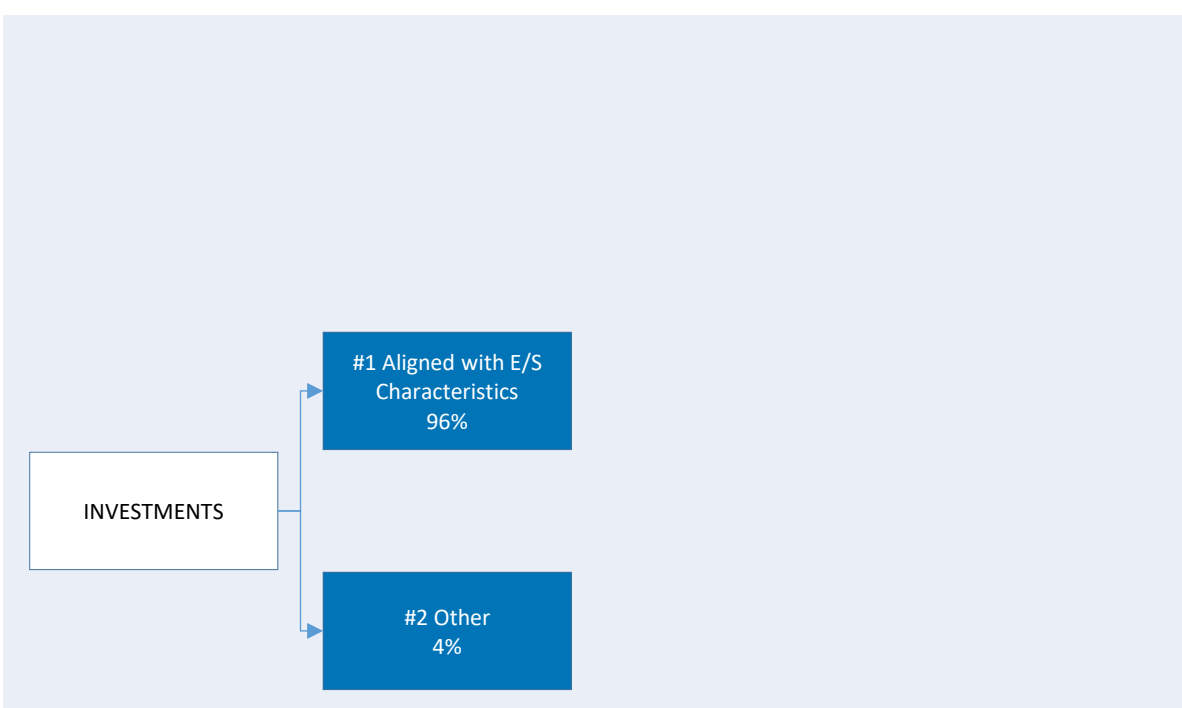

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the iBoxx ALBI China Onshore Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

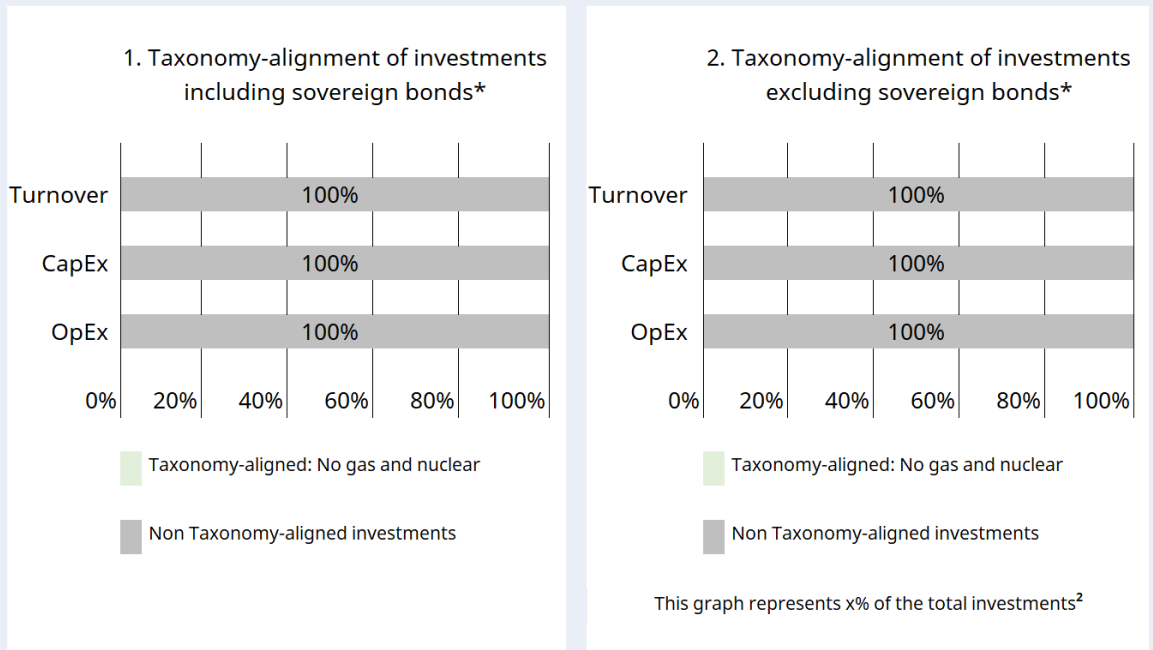

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

This question is not applicable for this Fund.

## What was the share of socially sustainable investments?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Local Currency Bond

**Legal Entity Identifier :** 549300V3X0D0HRKP2Z47

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   **X** No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -1.2% and the benchmark's sustainability score for the reference period was -2.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Infrastructure: the estimated societal benefits associated with investment in infrastructure. Assigned in proportion to a country's infrastructure spend via gross capital formation (GCF) data;
- Medical Research: the estimated societal benefits of medical innovation resulting in improvements in human conditions, increases of life expectancy and quality of life. Assigned in proportion to the social benefit of medical innovation to countries using patent data, specifically the number of medical-related technology patents filed by applicant country; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ***...and compared to previous periods?***

• ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

• ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***How were the indicators for adverse impacts on sustainability factors taken into account?***

This question is not applicable for this Fund.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process, and some were considered via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

PAI data is less meaningful in the context of an emerging markets sovereign focused strategy, as during the reference period there were limited PAI data available. Over time, we anticipate that this data will improve which will allow us to further assess the consideration of PAIs. However, as part of the investment process, a Schrodgers' proprietary tool was used which incorporates some of the PAIs as part of its scoring methodology. During the reference period, PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAIs 12, 13, and 16 related to social matters were considered as part of the investment process of the following countries: Argentina, Brazil, Colombia, Chile, India, Bahrain, Egypt, Poland, Romania, South Africa, Turkey.

PAIs were also considered post-investment through engagement. The Investment Manager primarily used Schrodgers' proprietary tool and data from external data providers in order to identify, assess and monitor environmental topics for engagement. During the reference period, active engagements with emerging sovereigns included the Bahamas, Colombia, Mexico, Uruguay, Hungary, Bahrain, China, Indonesia, Malaysia, Philippines. These engagements covered a range of topics and were aligned with environmental PAIs 1, 2, 3, 4, 5 and 15 related to greenhouse gas emissions, PAIs 7, 8 and 9 related to biodiversity, water and waste and PAI 16 (Human Capital) in Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	9
Natural Capital and Biodiversity	4
Corporate Governance	1
Human Capital	1

The engagements shown relate to engagements with companies and issuers.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
SCHRODER CHINA FIXED INCOME FUND RMB I ACC(CFMI)	Collective Investments	5.34	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

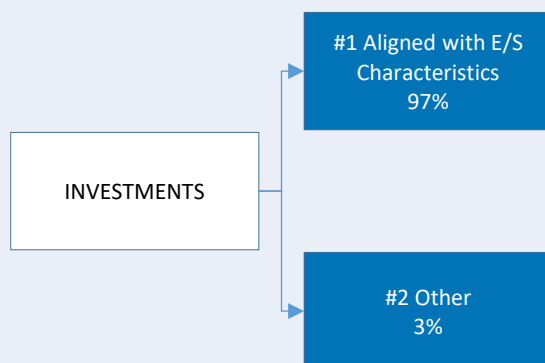

describes the share of investments in specific assets.

#### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the JP Morgan GBI-EM Global Diversified Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

#### • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
EMD Sovereign	EMD Sovereign	74.98
EMD Sovereign	Treasury Bills	0.84
EMD Sovereign	Financial Services	0.50
Supranational	Supranational	7.94
Cash Equivalents	Treasury Bills	6.71
Collective Investments	Unit Trusts	5.34
Cash	Cash	2.18
Cash	Margin Cash	0.08
Agency	Agency	0.82
Government Guaranteed	Government Guaranteed	0.62
Industrial	Media & Entertainment	0.06
Derivatives	FX Derivatives	-0.07

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schrodgers' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schrodgers' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schrodgers'

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

### • How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics

**Legal Entity Identifier :** 4EKHGXD69UZIZADPEK36

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period. The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.1% and the benchmark's sustainability score for the reference period was -2.4%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine
- Power Provision
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	54
Jan 2023 - Dec 2023	51
Aug 2022 - Dec 2022	49

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.1	-2.4
Jan 2023 - Dec 2023	1.3	-3.1
Jan 2022 - Dec 2022	3.7	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4. All PAI indicators are monitored via Schrodgers PAI dashboard.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	53
Corporate Governance	31
Human Rights	18
Natural Capital and Biodiversity	13
Diversity and Inclusion	10
Human Capital Management	7

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 34% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Real Estate	6.61

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 20%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Credit Conviction

**Legal Entity Identifier :** 549300JJL34Z2HKTT336

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.1% and the benchmark's sustainability score for the reference period was -2.0%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine
- Power Provision
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	55
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	49

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>. Firm-wide exclusions also apply to companies generating more than 20% of their revenue from thermal coal mining.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4. All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	42
Corporate Governance	26
Human Rights	12
Natural Capital and Biodiversity	8
Human Capital Management	6
Diversity and Inclusion	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 90%. The Fund maintained a higher overall sustainability score than the iBoxx EUR Corporates BBB (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 55% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Real Estate	9.32

from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 20%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO High Yield

**Legal Entity Identifier :** FDQ3U0BX0ZTSLH0GBR19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.8% and the benchmark's sustainability score for the reference period was 3.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	57
Aug 2022 - Dec 2022	56

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4. All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	22
Corporate Governance	16
Human Rights	6
Natural Capital and Biodiversity	6
Human Capital Management	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 79%. The Fund maintained a higher overall sustainability score than the ICE BofA Merrill Lynch Euro High Yield Constrained Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

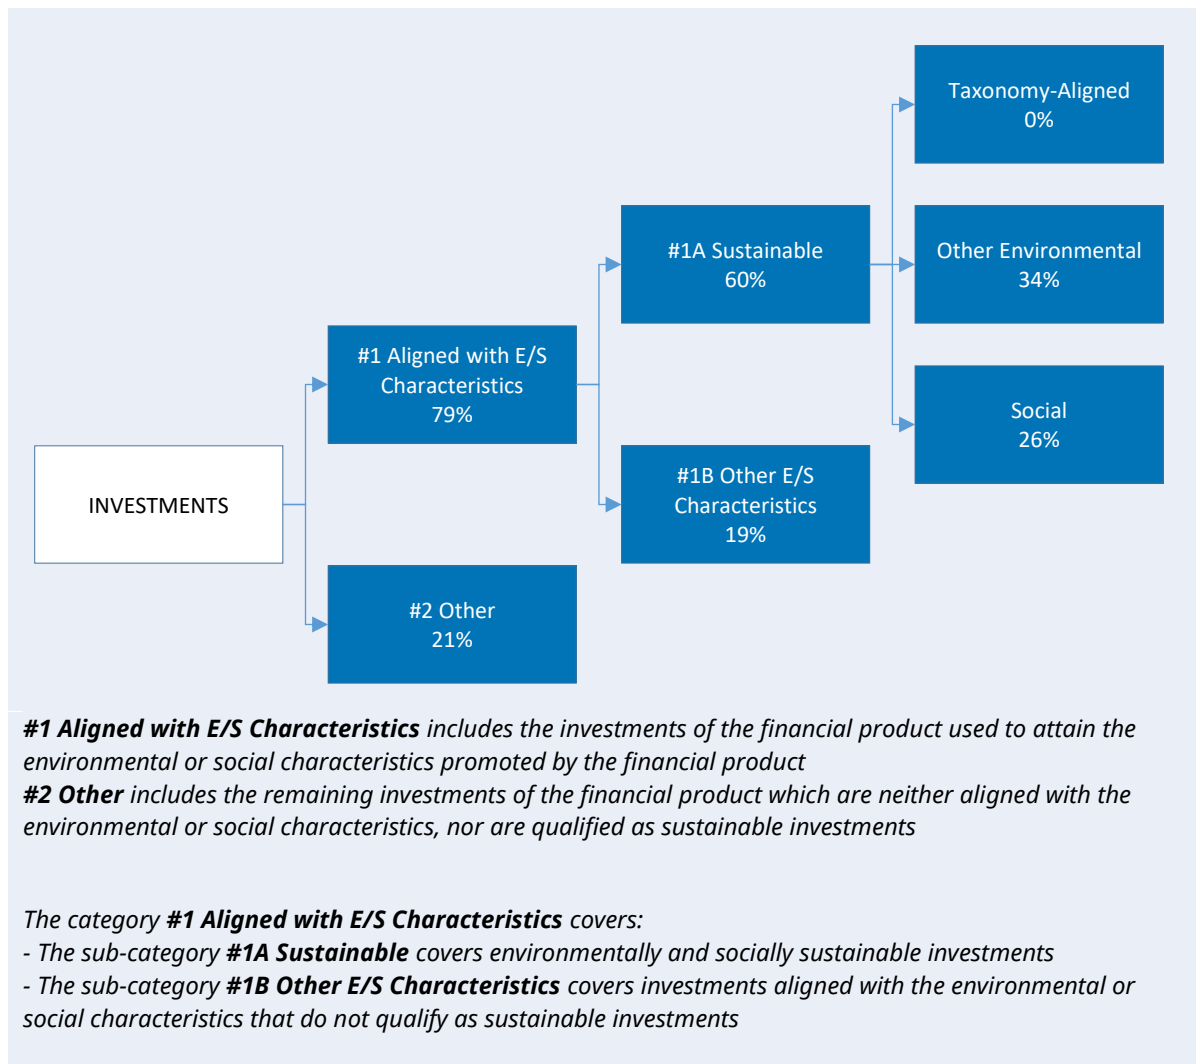

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 34% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 34%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 26%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Corporate Bond

**Legal Entity Identifier :** 1YK3XMIPDXWQ8KR0SJ46

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 46% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -4.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access

The Investment Manager invested 46% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	46
Jan 2023 - Dec 2023	41
Aug 2022 - Dec 2022	34

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.6	-4.7
Jan 2023 - Dec 2023	0.0	-6.6
Jan 2022 - Dec 2022	0.2	-6.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4. All PAI indicators are monitored via Schroders PAI dashboard.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	95
Corporate Governance	47
Human Rights	25
Natural Capital and Biodiversity	24
Human Capital Management	14
Diversity and Inclusion	12

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the Bloomberg Global Aggregate - Corporate Index Hedged to USD and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

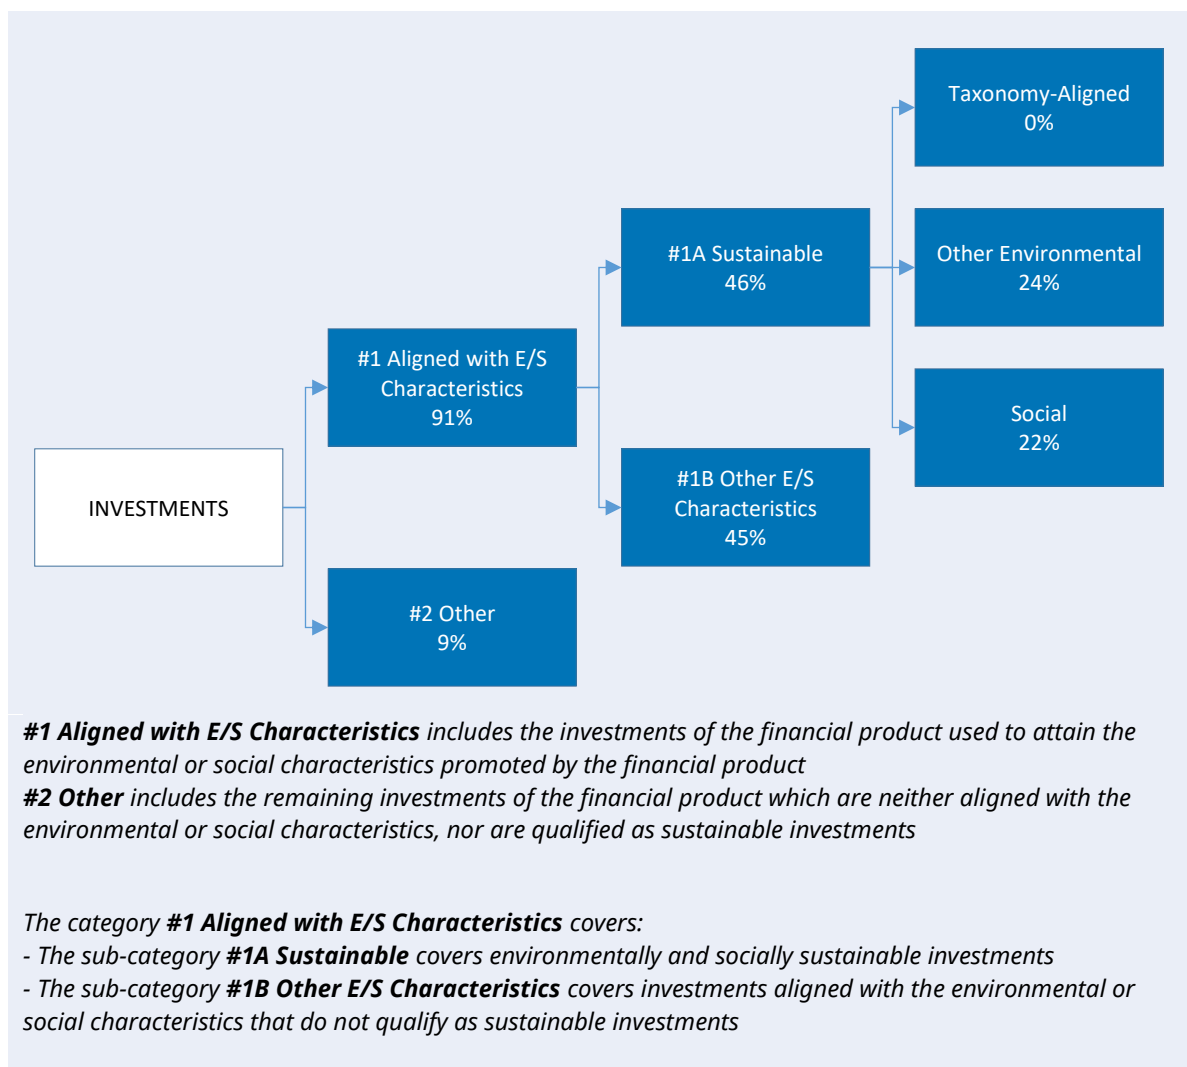

The Fund invested 46% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 22% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 22%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Credit High Income

**Legal Entity Identifier :** GLW6BQ1WNCTANKN6GW68

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -3.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Education
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	62
Jan 2023 - Dec 2023	48
Aug 2022 - Dec 2022	38

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.6	-3.7
Jan 2023 - Dec 2023	1.7	-5.3
Jan 2022 - Dec 2022	1.1	-6.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schrodgers funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schrodgers.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schrodgers to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schrodgers' 'global norms' breach list. Schrodgers' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schrodgers' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schrodgers.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schrodgers' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schrodgers' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	30
Corporate Governance	20
Diversity and Inclusion	7
Natural Capital and Biodiversity	7
Human Rights	6
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

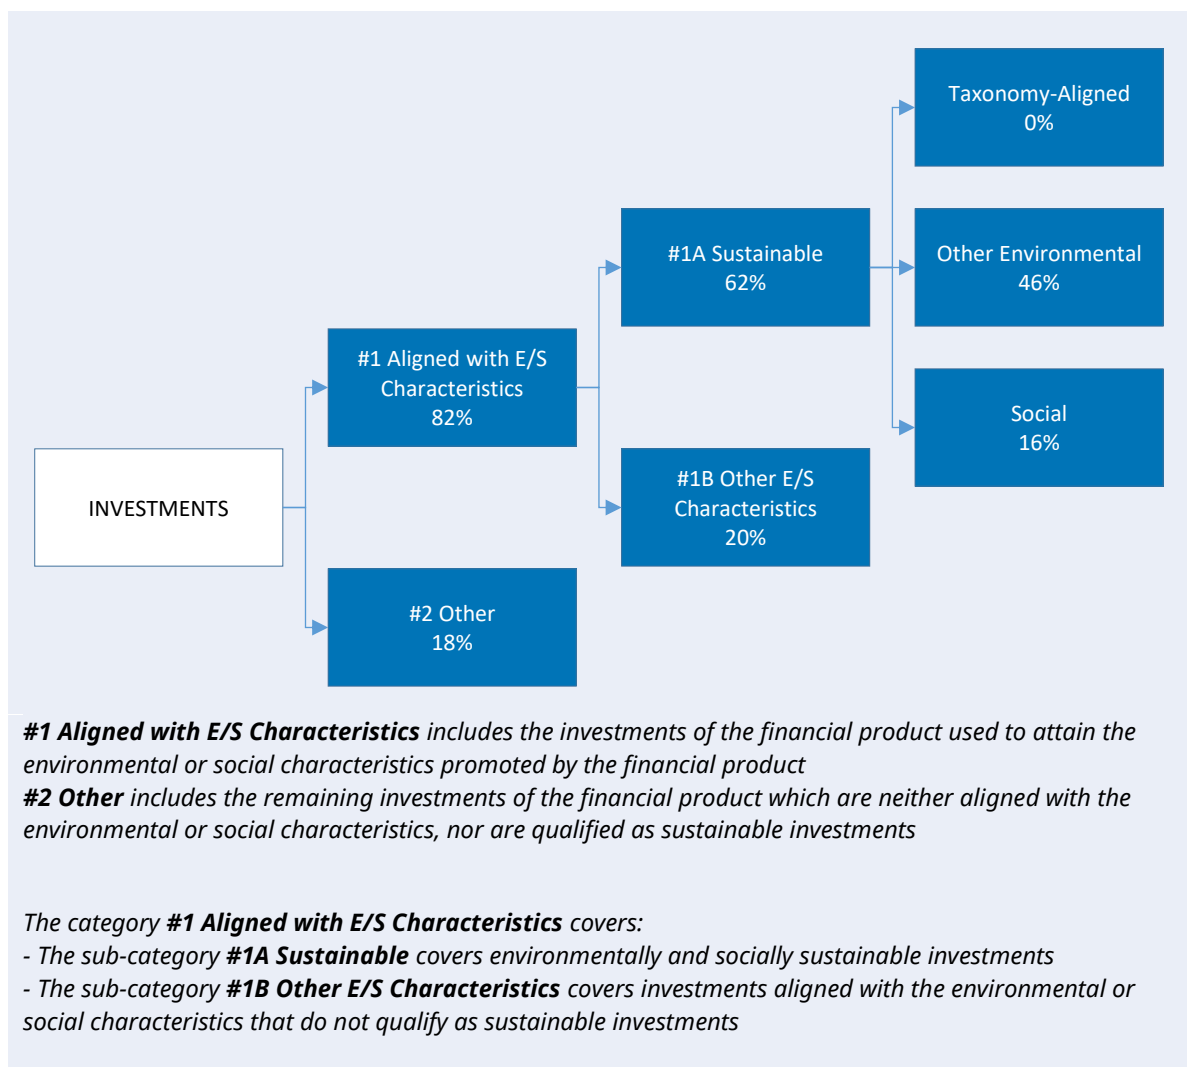

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 82%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury BBB+ to CCC+ USD, EUR, GBP Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 16% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Real Estate	9.75

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 16%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Credit Income

**Legal Entity Identifier :** 5493009U5NQCD335Y052

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 61% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.5% and the benchmark's sustainability score for the reference period was -4.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Education
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Water Access

The Investment Manager invested 61% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	61
Jan 2023 - Dec 2023	50
Aug 2022 - Dec 2022	44

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.5	-4.6
Jan 2023 - Dec 2023	0.2	-6.0
Jan 2022 - Dec 2022	1.4	-5.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;

- Education: the estimated societal benefits of a country's education spend per school age capita;

- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	121
Corporate Governance	54
Human Rights	39
Natural Capital and Biodiversity	29
Human Capital Management	16
Diversity and Inclusion	14

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

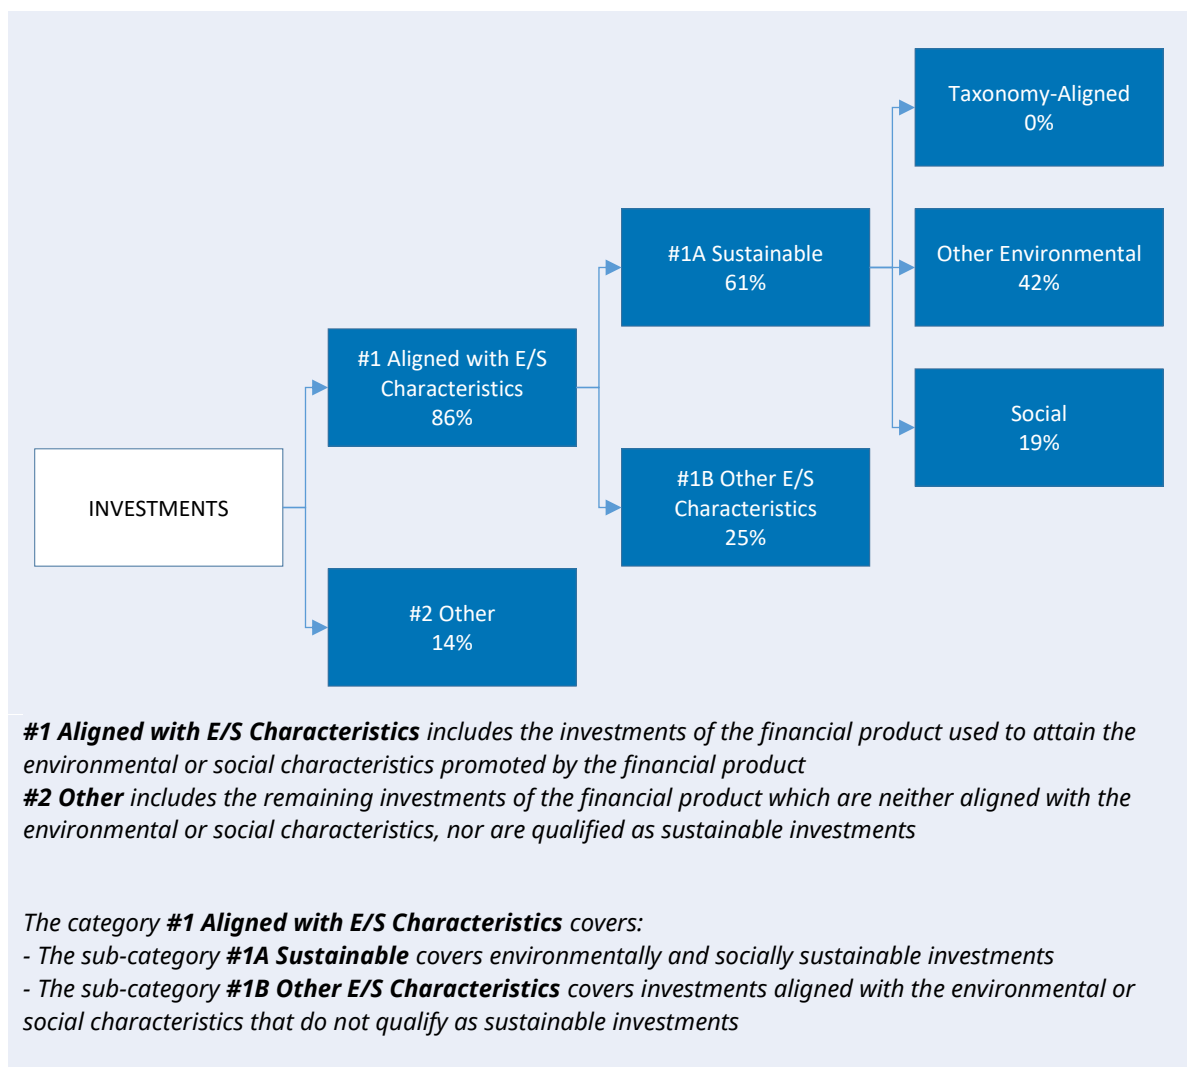

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 86%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse ex Treasury A+ to B- USD Hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 61% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 42% was invested in sustainable investments with an environmental objective and 19% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 42%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 19%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global High Yield

**Legal Entity Identifier :** M6LM7N6UFRSLZ1MG8Z19

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 42% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.4% and the benchmark's sustainability score for the reference period was -0.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Medicine

The Investment Manager invested 42% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	42
Jan 2023 - Dec 2023	39
Aug 2022 - Dec 2022	39

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.4	-0.9
Jan 2023 - Dec 2023	-0.4	-1.6
Jan 2022 - Dec 2022	-0.2	-1.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	48
Corporate Governance	23
Human Rights	14
Natural Capital and Biodiversity	9
Human Capital Management	6
Diversity and Inclusion	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

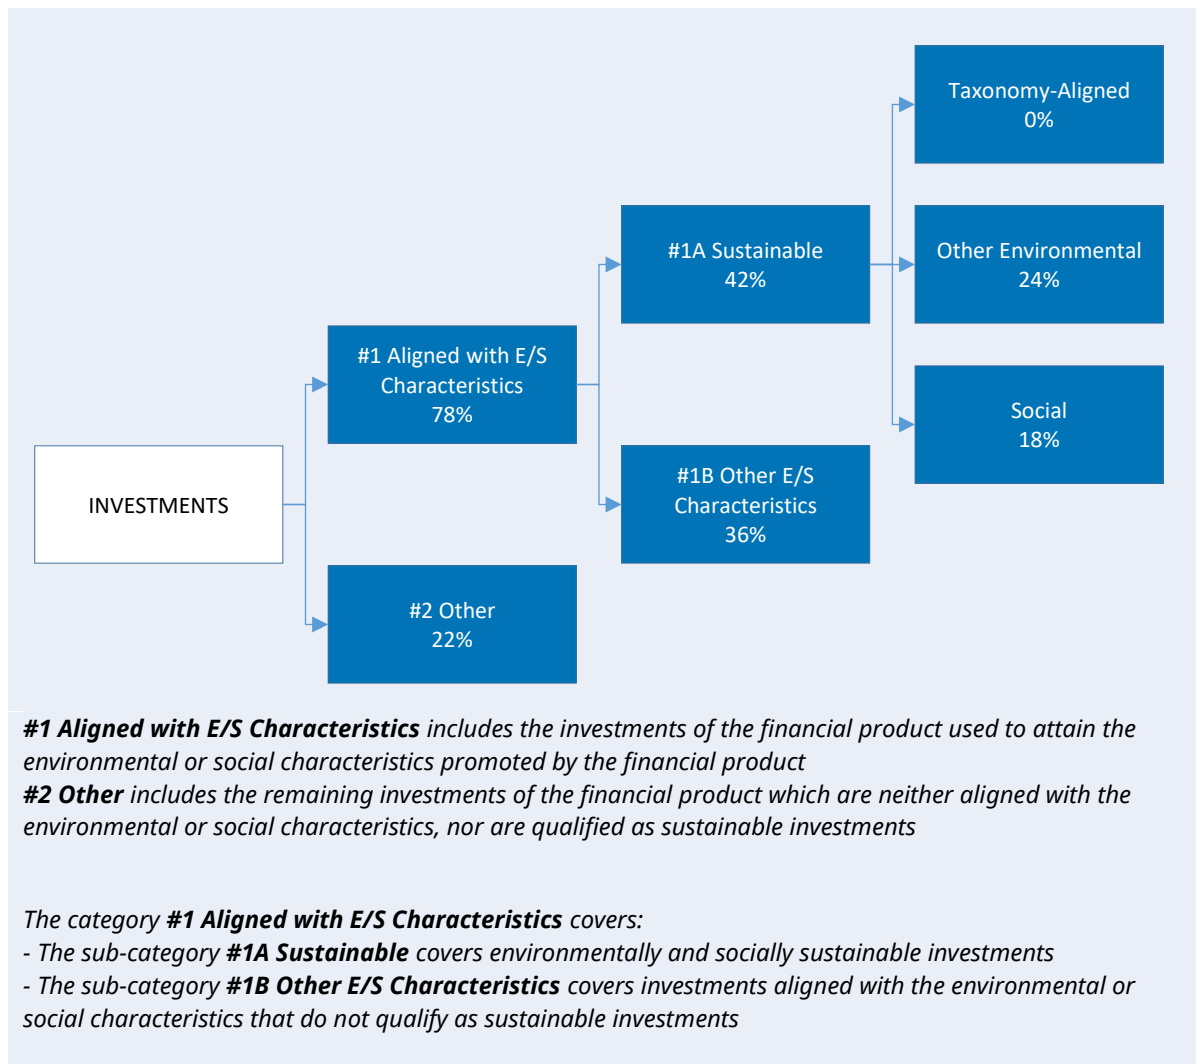

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 78%. The Fund maintained a higher overall sustainability score than the Bloomberg Global HYxCMBSxEMG Index USD Hedged 2% cap and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 42% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 18% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Media & Entertainment	11.44
Industrial	Leisure	7.72

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

**What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 18%.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Sustainable Convertible Bond

**Legal Entity Identifier :** 5493006DE43UTCSDK432

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE Global Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.1% and the benchmark's sustainability score for the reference period was 0.4%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Water Access

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	73
Jan 2023 - Dec 2023	78
Aug 2022 - Dec 2022	67

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	5.1	0.4
Jan 2023 - Dec 2023	6.9	1.5
Jan 2022 - Dec 2022	6.0	1.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schrodgers’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

Schrodgers’ proprietary tool incorporates several PAIs as a component of its scoring methodology. PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines Schrodgers approach to active ownership. Issuers identified as laggards may be selected for engagement on PAI indicators material for the sector and the region the company operates in.

While there is a high degree of correlation between PAI laggards and the strict exclusion screening for our fund, the Investment Manager may engage with selected issuers held by the Fund on PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity) and others.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	10
Climate Change	8
Human Rights	3
Natural Capital and Biodiversity	3

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Diversity and Inclusion	1
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

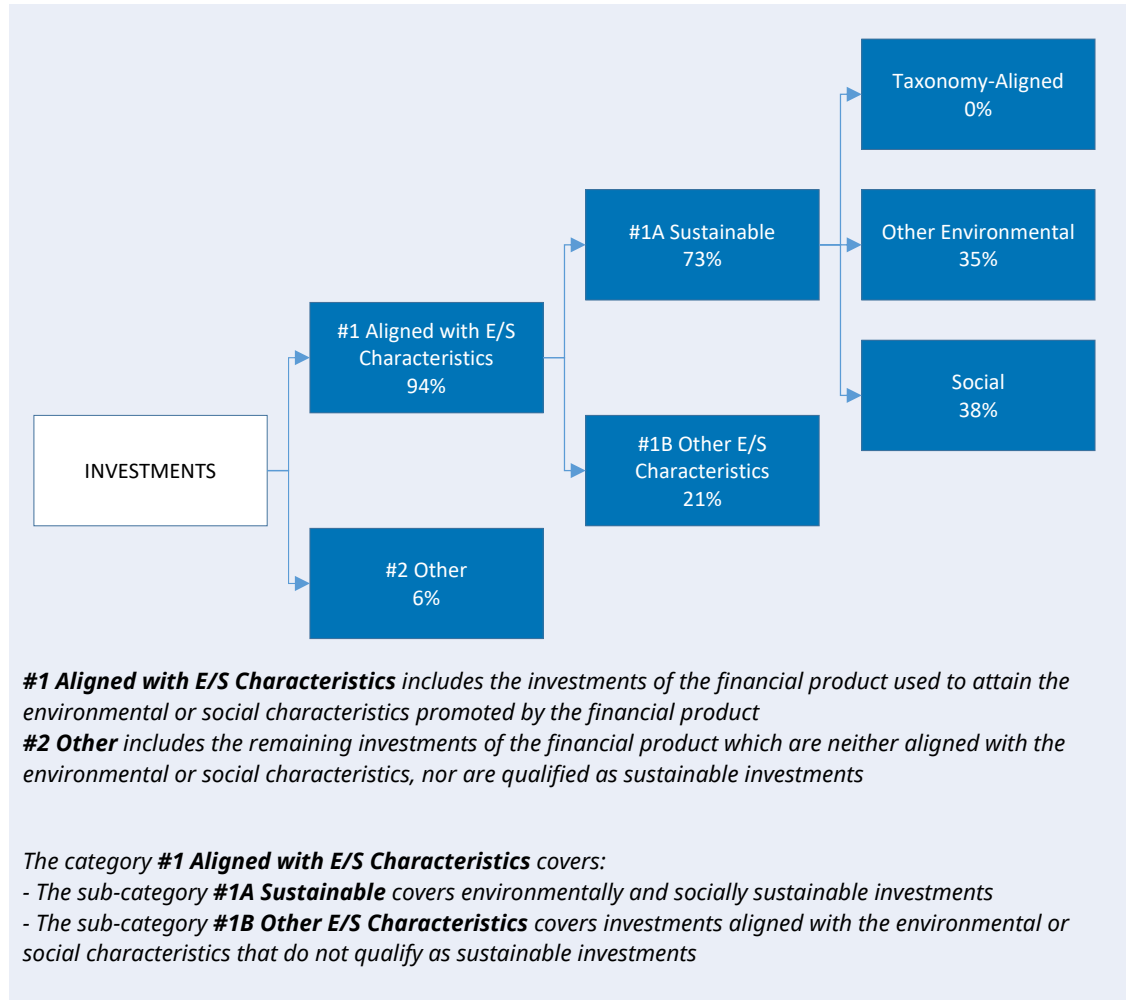

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 94%. The Fund maintained a higher overall sustainability score than the FTSE Global Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 73% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Technology & Electronics	34.34
Industrial	Healthcare	9.90
Industrial	Retail	7.49
Industrial	Basic Industry	6.44
Industrial	Capital Goods	5.46
Industrial	Leisure	4.36
Industrial	Automotive	3.39
Industrial	Real Estate	3.24
Industrial	Transportation	2.72
Industrial	Services	2.43
Industrial	Media & Entertainment	1.94
Industrial	Consumer Goods	0.25
Financial	Financial Services	7.69

Financial	Banking	1.03
Cash	Cash	4.99
Utilities	Electric - Generation	1.80
Utilities	Non-Electric Utilities	1.74
Derivatives	FX Derivatives	-0.33

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

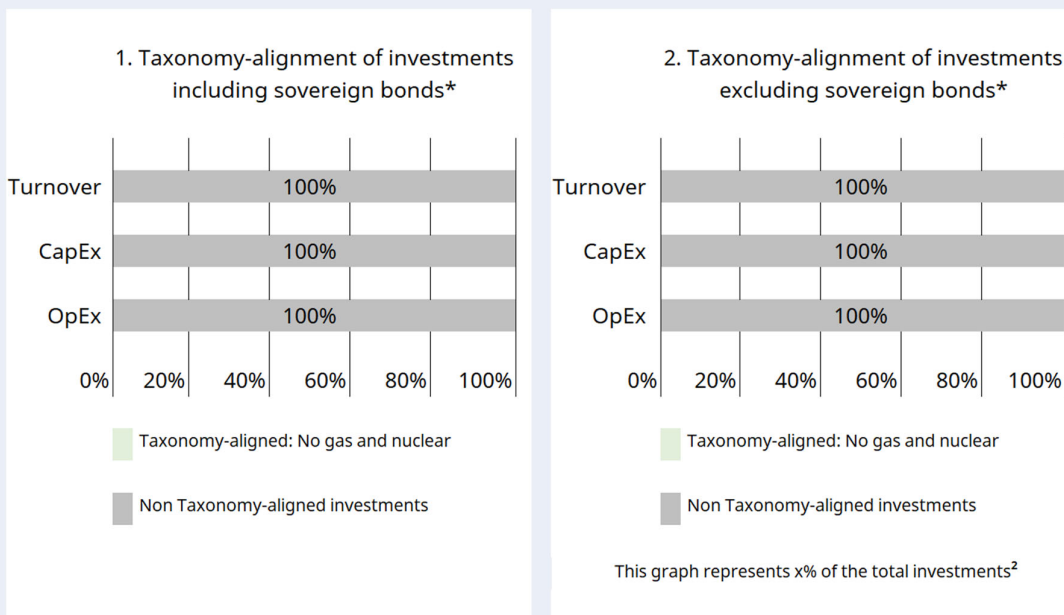

Taxonomy-aligned activities are expressed as a share of:

- **turnover**  
reflecting the share of revenue from green activities of investee companies

- **capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx)  
reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 38%.

### • *What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

### Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Securitised Credit

**Legal Entity Identifier :** 549300JBQIOS7PKT3U55

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
	<input checked="" type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund only invested in assets deemed above a minimum threshold based on the Investment Manager's rating system. Securities were ranked across Environmental, Social and Governance factors using a scorecard system and were awarded points on a 100-point /100 percent scale. These scores were then translated into a scoring system of 1- star – 5-stars, with a score of 5-stars deemed the highest. The Investment Manager ensured that at least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and 100% of the assets were invested in those ranked 2-stars or higher.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • How did the sustainability indicators perform?

The Investment Manager used different sustainability indicators to score each investment in the Fund depending on the specific asset-type, e.g. whether the underlying secured assets were mortgages or commercial real estate or another asset type. Indicators were either quantitative, data-oriented measures or information provided following engagement with issuers. Indicators included but were not limited to environmental metrics such as environmental transition risk or physical risk, social metrics such as predatory lending risk or consumer education effort and governance metrics such as risk retention or clarity of roles.

2% of the assets in the Fund were ranked as 5-stars, 31% were ranked as 4-stars and 67% were ranked as 3-stars, measured using quarter-end data throughout the reference period.

Compliance with the minimum required score was monitored daily via our automated compliance controls.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

### • ...and compared to previous periods?

#### Proprietary star ratings

*This table details the percentage of assets invested in accordance with the proprietary star ratings, year on year.*

Period	5-stars (%)	4-stars (%)	3-stars (%)
Jan 2024 – Dec 2024	2	31	67
Jan 2023 – Dec 2023	15	35	49
Jan 2022 – Dec 2022	15	30	52

### • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

• **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

This question is not applicable for this Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

This question is not applicable for this Fund.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

This question is not applicable for this Fund.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As stated in the pre-contractual disclosure for the Fund, the Investment Manager was not able to adequately consider the principal adverse impacts on sustainability factors as these metrics only applied to investments in companies, sovereign debt and real estate.

Due to the nature of the Fund’s assets, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager considered adverse impacts relevant to the strategy in the following way:

- The Investment Manager ensured that investments were aligned with the UN Principles for Responsible Investment (“PRI”). All investments were compliant with industry standards, fair, and fit-for

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

purpose;

- The Investment Manager's rating system considered adverse impacts on society such as the asset footprint on the environment or impact on climate change;
- Investments that could not meet minimum standards related to social, environmental or governance concerns were excluded from the portfolio. The list of excluded sectors was reviewed, updated and published quarterly.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. This means investments that were ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria. This figure was calculated using quarter-end data throughout the reference period.

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, Money Market Investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Securitized	Asset Backed	37.64
Securitized	Collateralized Mortgage Obligation	32.74
Securitized	Mortgage Backed	23.37
Securitized	Commercial Mortgage Backed	3.06
Cash Equivalents	Treasury Bills	23.39
Collective Investments	Unit Trusts	0.43
Derivatives	FX Derivatives	0.10
Financial	Finance Companies	0.08
Industrial	Transportation	0.08
Cash	Margin Cash	0.30
Cash	Cash	-21.20

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

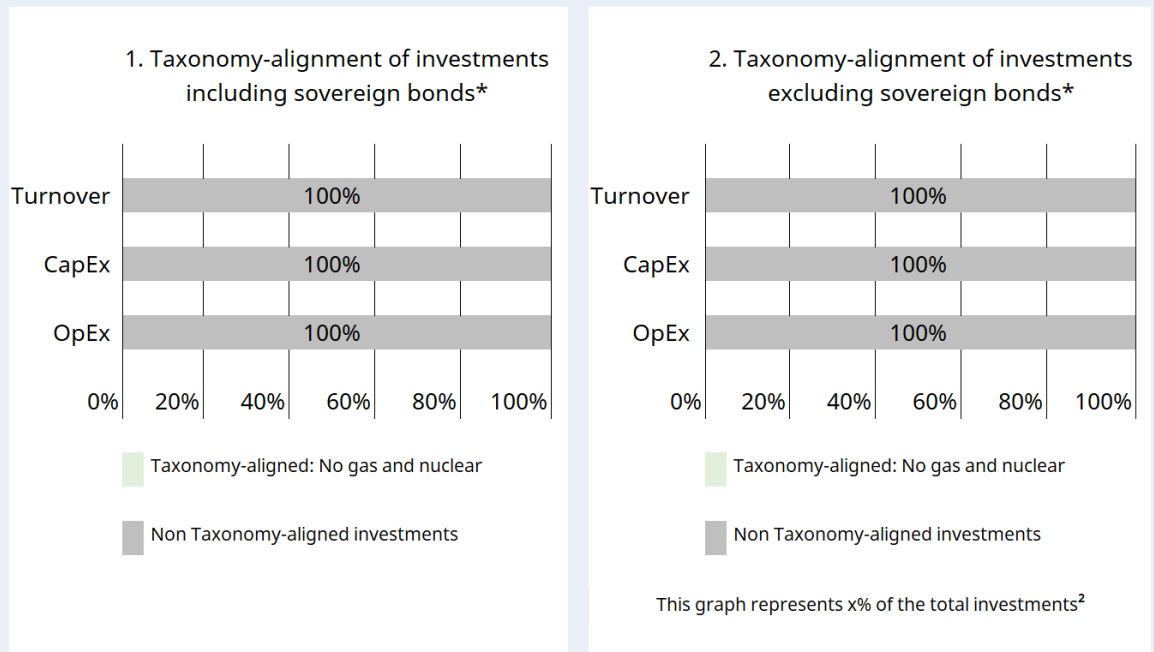

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

This question is not applicable for this Fund.

**What was the share of socially sustainable investments?**

This question is not applicable for this Fund.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes investments that were treated as neutral for sustainability purposes, which were cash, money market instruments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently. #2 also includes investments that were not aligned with the environmental or social characteristics of the Fund as they were not ranked in the top 3 Sustainability categories according to the Investment Manager's rating criteria.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- At least 80% of the assets in the Fund were ranked in the top 3 Sustainability categories (3, 4, 5-stars) and the Investment Manager invested 100% of its assets in those ranked 2-stars or higher based on the Investment Manager's rating system;
- To the extent possible the Investment Manager assessed good governance of the special purpose vehicles (SPVs – the structures holding the assets) and assessed the fiduciary behaviour of parties to the structure); and
- Securitised markets and the markets for private financing are less standardised with respect to ESG metrics as there is no third-party scoring and reporting is in a non-standard format. Engagement activities focused on deriving information, to understand where sub-sectors and companies were in their evolution, to improve transparency, to assess social, environmental or alignment characteristics to reward and incentivise / more correctly risk price for externalities, to identify those more likely to achieve levels of governance, social policy or environmental advantage that were aligned with our own standards, particularly where the market has not correctly differentiated.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Social Impact Credit

**Legal Entity Identifier:** 549300YH78G2CDHL6585

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: 22.2%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 77.3%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

Until 31 May 2024 the Fund invested at least 75% of its assets, and from 1 June 2024 at least 80% of its assets, in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. These themes included but were not limited to:

- Sustainable Infrastructure (such as connectivity, sustainable power and clean water)
- Economic Inclusion (such as training, gender equality, workforce diversity, access to finance and quality work)
- Health and Wellbeing (such as medicine and healthcare services)

The Fund invested at least 67% of its assets in sustainable investments with a social objective. The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash, money market investments and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager selected investments for the Fund from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The criteria included an assessment of the company's, country's or purpose bond's contribution to social impact themes, which themselves align with one or more of the UN SDGs alongside the Investment Manager's assessment of impact via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management. The Fund also invested in social, sustainability and green bonds, which are bonds that are specifically designed to address social challenges.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 99.5% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager considered the extent to which the issuer's revenues, business activities or the use of proceeds of a purpose bond contributes to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to a social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution. In particular, the Investment Manager applied quantitative and/or qualitative criteria to identify companies that are expected to contribute positively towards the attainment of one or more UN SDGs, such as Quality Education (SDG 4), Gender Empowerment (SDG 5) and Quality Work (SDG 8). Examples of the indicators included, but were not limited to, female representation in the workforce and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

percentage of women in managerial positions. In addition, there was a detailed impact assessment of every company, country or bond (as applicable) via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a company, country or bond is expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company, country or bond is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schrodgers' influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's, country's or bond's impact over time via an annual review. Once these steps were completed, the impact scorecard was then validated and approved by Schrodgers' Impact Assessment Group (IAG), in order for the company or sovereign or bond to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schrodgers' impact and sustainable investment teams and members of the investment team.

At the end of the reference period, approximately 10.1% of the Fund's NAV was invested in companies that were expected to contribute towards Quality Education (SDG 4), as measured by, but not limited to, numbers of students reached, education institute supported or grants for education. The Fund also invested in companies that were expected to contribute towards other UN SDGs including, but not limited to, Quality Work (SDG 8), Good Health and Wellbeing (SDG 3), Affordable and Clean Energy (SDG 7) and Digital Inclusion (SDG 9).

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	100
Jan 2023 - Dec 2023	100
Jan 2022 - Dec 2022	98

### SDG Alignment

This table details the percentage of assets aligned with SDGs, year on year.

Period	Quality Education (SDG 4) (%)	Good Health and Wellbeing (SDG 3) (%)	Inclusion (SDG 10 and 5) (%)
Jan 2024 - Dec 2024	10	24	6
Jan 2023 - Dec 2023	25	29	7
Jan 2022 - Dec 2022	28	-	-

**Principal adverse impacts** are the most significant negative impacts of investment decisions on

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process as Schroders' proprietary tool incorporates several PAIs as a component of its scoring methodology. In assessing an issuer's overall social score one or more of PAIs 11, 12, 13, and 14 (Social and employee matters) and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators are monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	7
Diversity and Inclusion	3
Human Rights	3
Human Capital Management	3
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers.

Given the impact nature of the fund, we undertook additional engagements focusing on formulating impact thesis for example.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes.

The Fund invested 99.5% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 22.2% was invested in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainable investments with an environmental objective and 77.3% was invested in sustainable investments with a social objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives, used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Healthcare	18.11

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

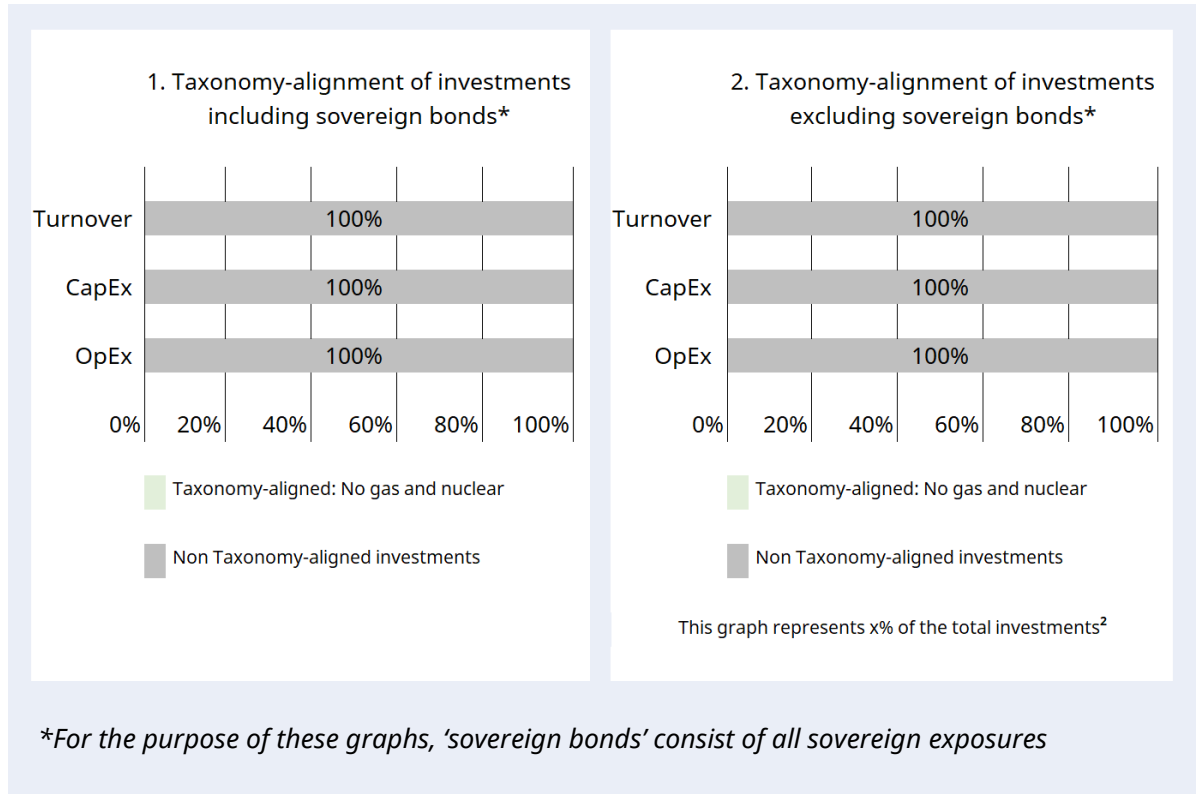

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 0%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 77.3%.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 80% of its assets in fixed and floating rate securities issued by governments, government agencies, supra nationals and companies worldwide that the Investment Manager expected to contribute positively towards social development themes. The Investment Manager also analysed and invested in selective social bonds with social objectives;
- The Fund invested in companies that did not cause significant environmental or social harm. During the reference period, the Investment Manager divested from a one company with social objectives which the Investment Manager believed had developed adverse impacts on pollution and hazardous waste;
- A central good governance test was applied to assess good governance practices of investee companies.
- The Investment Manager undertook a number of engagements on holdings in the Fund during the reference period, that focused on diverse set of topics such as inclusion and quality education, corporate governance and diversity, sustainable food and water, impact formulation, disclosure, health, safety and wellbeing, nature related risk and management, and climate transition and net zero targets;
- The Investment Manager utilised Schroders' proprietary tool and analysis to select companies which have forward looking social and sustainability targets as well as have forward looking research and development expenditure, for example in the healthcare sector, aimed at positive social impact.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Strategic Credit

**Legal Entity Identifier :** 549300402PQWGGYQR877

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 54% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments during the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 1.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- Education
- High Salaries
- Medicine

The Investment Manager invested 54% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	54
Jan 2023 - Dec 2023	46
Aug 2022 - Dec 2022	47

### Sustainability score

This table details the Fund's sustainability score, year on year

Period	Fund (%)
Jan 2024 - Dec 2024	1.6
Jan 2023 - Dec 2023	2.5
Jan 2022 - Dec 2022	3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	32
Corporate Governance	22
Human Rights	7
Natural Capital and Biodiversity	6
Human Capital Management	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 84%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

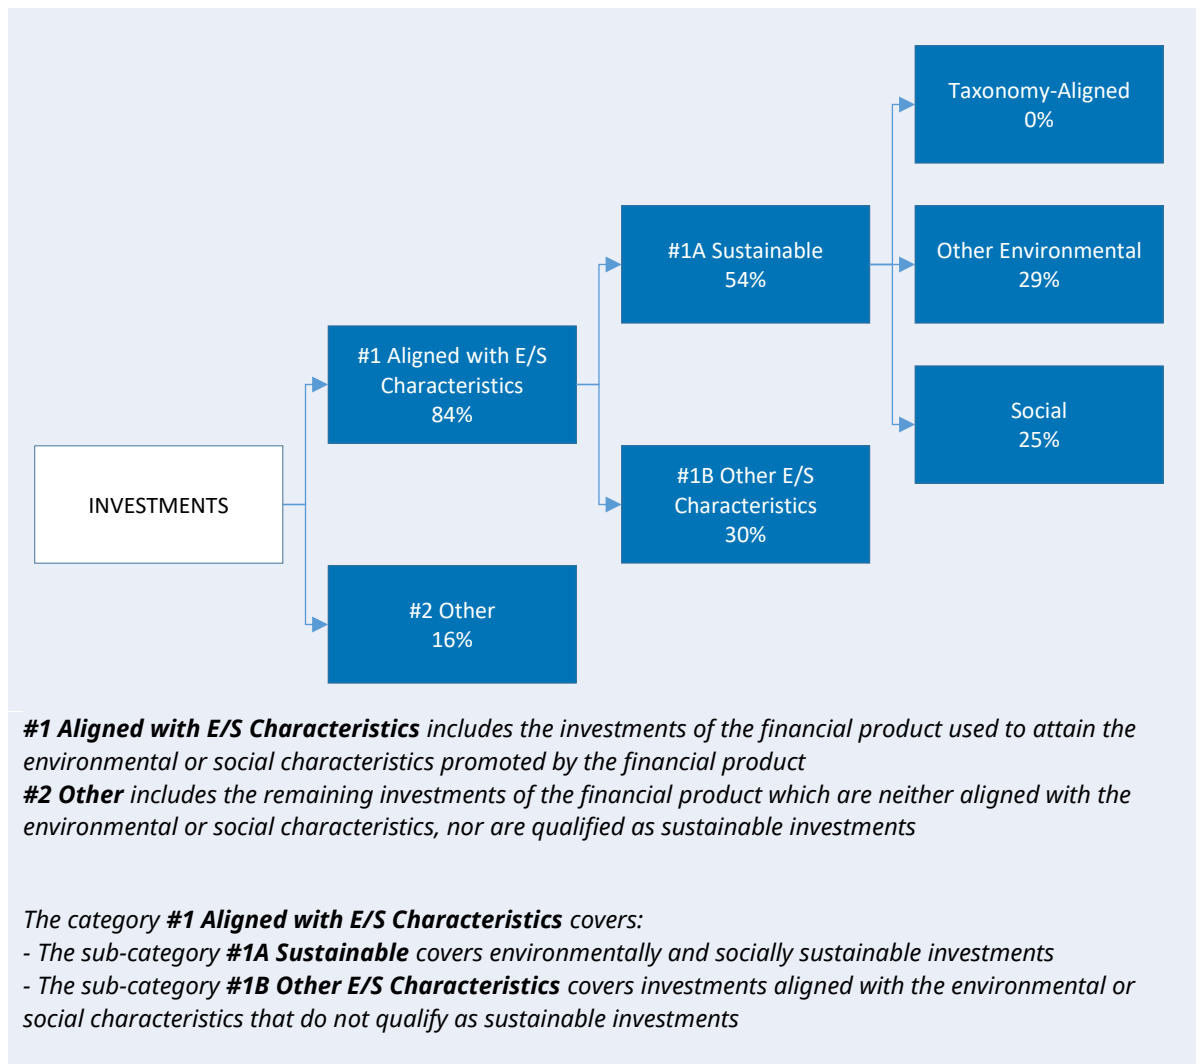

The Fund invested 54% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 25% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 25%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Euro Credit

**Legal Entity Identifier :** 5493003OZ3JFD52K6J04

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 75% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the ICE Bank of America Euro Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments until 31 May 2024 and invested at least 55% of its assets in sustainable investments from 01 June 2024 to the end of the reference period.

The Fund also invested at least 10% of its assets in green, social and/or sustainable bonds.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.8% and the benchmark's sustainability score for the reference period was -2.4%. This means that the Fund's weighted average score over a rolling six-month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Power Provision

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - Water Access

The Investment Manager invested 75% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

### • *...and compared to previous periods?*

#### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	75
Jan 2023 - Dec 2023	64
Aug 2022 - Dec 2022	63

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

### • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were via the investment process and some via engagement. Further details below.

For this product, PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. Greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies, activities negatively affecting biodiversity-sensitive areas: PAI 1, 2, 3 and 7 are considered into this fund through Schroders’ proprietary tool and subsequent sustainability assessments. The proprietary tool incorporates several PAIs as a component of its scoring methodology and sustainability assessments. As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. Certain PAIs may be more relevant for different issuers, sectors, or industries and therefore we assess companies based on ESG performance and PAIs on a sector-relevant basis. While no single metric determines the overall assessment of a company’s environmental score, the Investment Manager evaluated a variety of different metrics to determine whether a company is adequately managing its climate and environmental risks.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on topics such as climate alignment, which are related to PAI 1, 2, 3 and 4. For example, in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

reference to PAI 1, we engaged with several companies in the financial , technology and utility sectors to have them provide an update on their climate targets and transition plan. We are continuing our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to ensure these targets are properly integrated into company remuneration policies. We are also engaging on natural capital and biodiversity policies related to PAI 7 and 9. All PAI indicators are monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	60
Corporate Governance	38
Human Rights	23
Natural Capital and Biodiversity	19
Diversity and Inclusion	10
Human Capital Management	8

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 95%. The Fund maintained a higher overall sustainability score than the ICE Bank of America Euro Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund invested 75% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 51% was invested in sustainable investments with an environmental objective and 24% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Real Estate	7.11
Industrial	Healthcare	6.16
Industrial	Telecommunications	5.35
Industrial	Capital Goods	3.99
Industrial	Transportation	3.43
Industrial	Retail	2.92
Industrial	Automotive	2.73
Industrial	Media & Entertainment	2.43
Industrial	Technology & Electronics	2.24
Industrial	Services	2.18
Industrial	Consumer Goods	2.08
Industrial	Basic Industry	1.95
Industrial	Leisure	1.04
Industrial	Oil Refining & Marketing	0.01
Financial	Banking	28.57
Financial	Insurance	8.69
Financial	Financial Services	4.13
Utilities	Electric - Integrated	3.02
Utilities	Electric - Generation	2.27
Utilities	Non-Electric Utilities	1.56
Utilities	Electric - Distr/Trans	1.01
Sovereign (Developed)	Sovereign (Developed)	3.50
Cash	Cash	2.09
Foreign Sovereign	Foreign Sovereign	0.99
Supranational	Supranational	0.57
Derivatives	FX Derivatives	-0.05

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

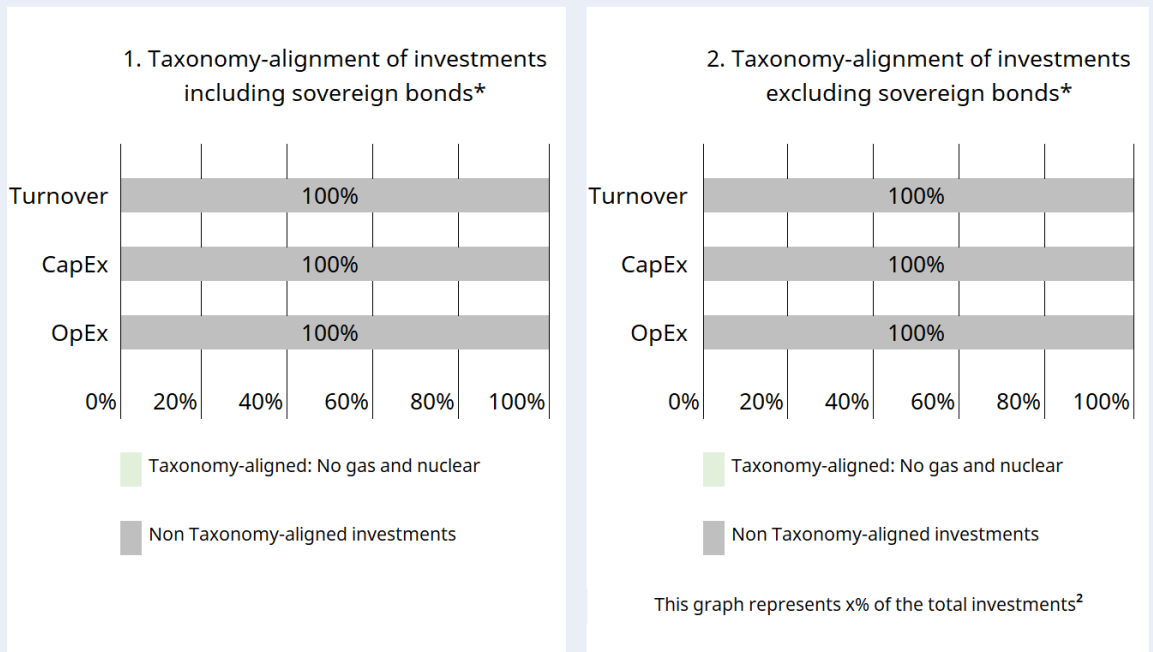

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 51%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 24%.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund and applied sustainability analysis on individual investments using in house or third party sustainability research;

- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;

- A central good governance test was applied to assess good governance practices of investee companies; and

- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4d44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Credit Income Short Duration

**Legal Entity Identifier :** 5493006ZQNNBQCGW4K92

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 10% of its assets in sustainable investments until 31 May 2024 and invested at least 40% of its assets in sustainable investments from 01 June 2024 to the end of the reference period.

The Fund used derivatives to meet the environmental and/or social characteristics promoted by the Fund, specifically to attain the Fund's sustainability score in Schroders' proprietary tool.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was -3.8%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Power Provision

- Water Access

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	52

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.5	-3.8
Jan 2023 - Dec 2023	3.0	-5.1
Jan 2022 - Dec 2022	3.8	-5.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue;

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN - Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders' proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company's overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engaged with a company in the energy sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	86
Corporate Governance	41
Human Rights	29
Natural Capital and Biodiversity	22
Human Capital Management	14
Diversity and Inclusion	11

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 89%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse 1-5 year TR ex-Treasury A+ to B- EUR hedged Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

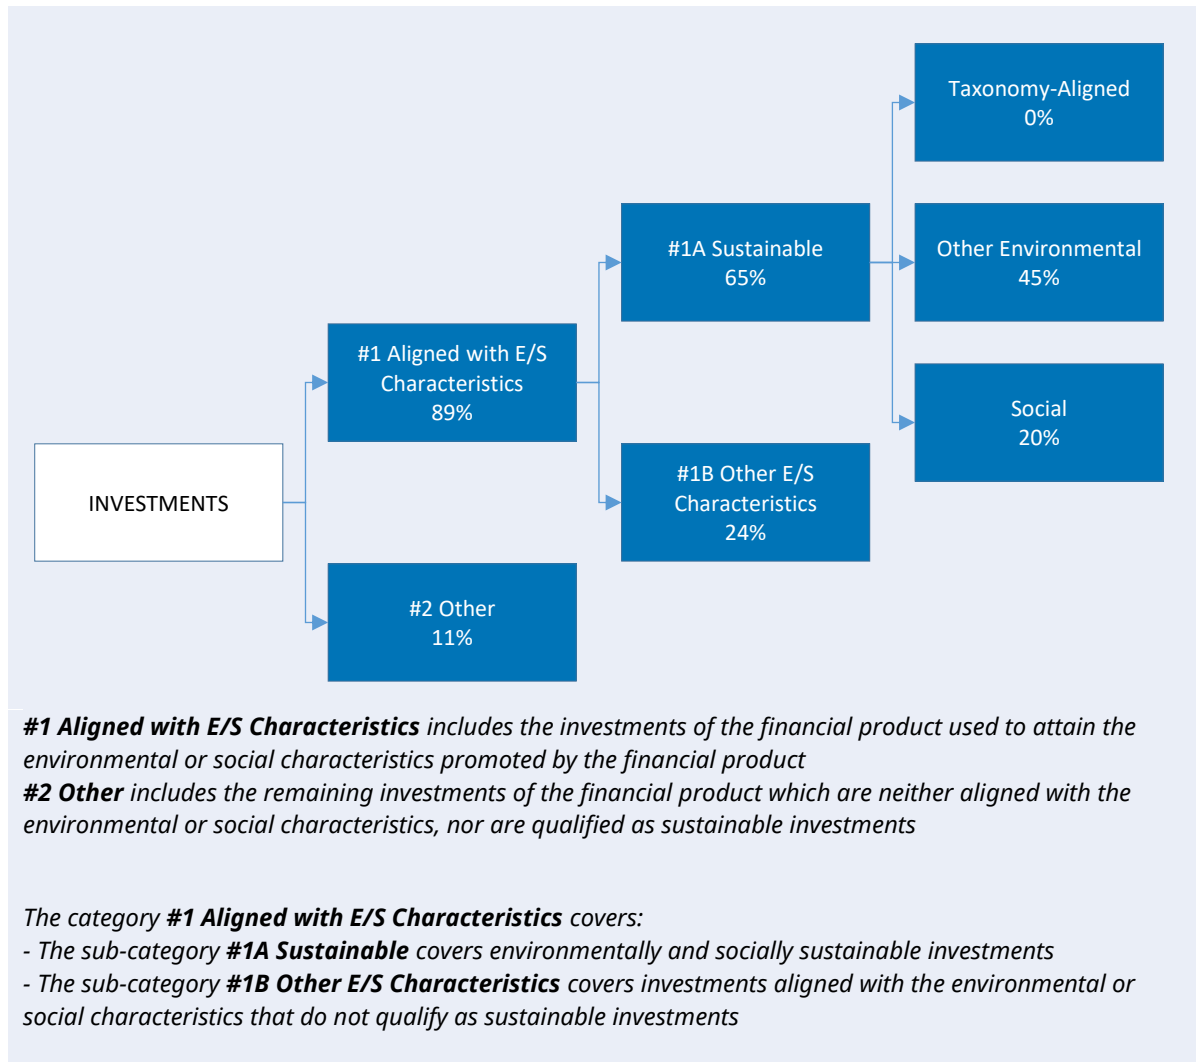

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 45% was invested in sustainable investments with an environmental objective and 20% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• **What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 45%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 20%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Multi Credit

**Legal Entity Identifier :** 549300N4PLUJQQE2N097

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 57% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.9% and the benchmark's sustainability score for the reference period was -4.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Water Access

The Investment Manager invested 57% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	57
Jan 2023 - Dec 2023	52
Aug 2022 - Dec 2022	49

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue; and

- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4. All PAI indicators are monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	53
Corporate Governance	25
Human Rights	19
Natural Capital and Biodiversity	14
Human Capital Management	9
Diversity and Inclusion	9

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

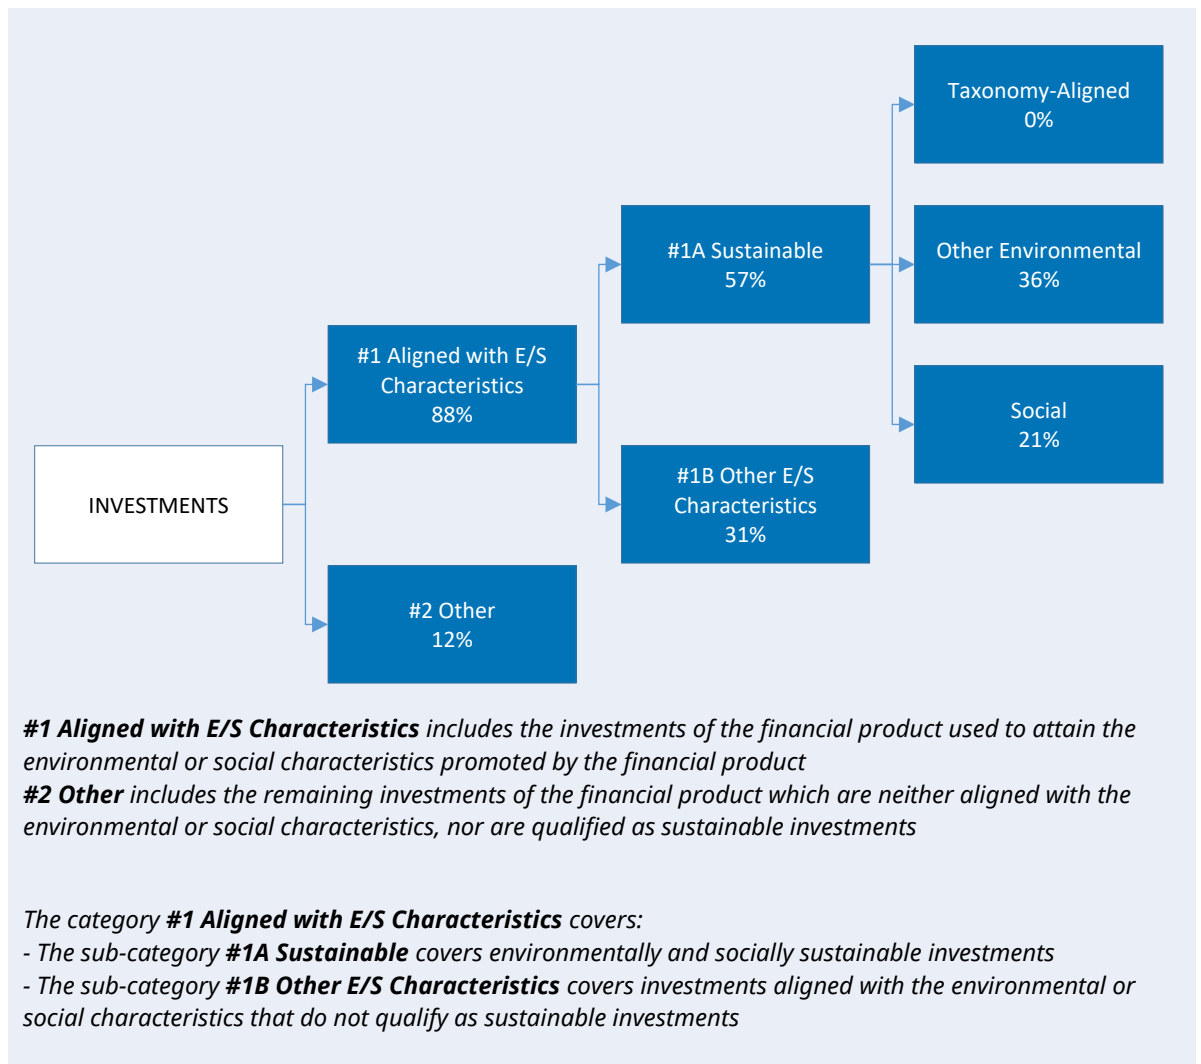

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the Bloomberg Multiverse (TR) ex Treasury A+ to B- Index, USD Hedged and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 57% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 36% was invested in sustainable investments with an environmental objective and 21% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## - capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

## - operational expenditure (OpEx)

reflecting green operational activities of investee companies.

1. Taxonomy-alignment of investments including sovereign bonds\*

2. Taxonomy-alignment of investments excluding sovereign bonds\*

This graph represents x% of the total investments<sup>2</sup>

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 36%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 21%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable Global Sovereign Bond

**Legal Entity Identifier :** 549300TDFLMR98OUAQ49

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 95% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg Global Treasury EUR hedged index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.5% and the benchmark's sustainability score for the reference period was 1.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Clean Energy
- Education
- Infrastructure
- Patents
- Socio-Political Stability

The Investment Manager invested 95% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	95
Sep 2023 - Dec 2023	97

### Sustainable score

This table details the percentage of assets invested in sustainable score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.5	1.5
Sep 2023 - Dec 2023	3.7	1.7

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Clean Energy: the estimated environmental benefit associated with renewables and the accelerated transformation of countries' energy systems;
- Education: the estimated societal benefits of a country's education spend per school age capita;
- Infrastructure: the estimated societal benefits associated with investment in infrastructure. Assigned in proportion to a country's infrastructure spend via gross capital formation (GCF) data;
- Patents: the estimated societal benefits associated with governments conducting in-house Research and Development (R&D) and also finance R&D in various sectors of the economy. Assigned in proportion to the social benefits of innovation to countries using resident patent application data from the World Intellectual Property Organisation (WIPO); and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

run economic growth.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. The investment process for this strategy incorporates the exclusion of sovereign issuers who fail to meet our sustainable criteria on environmental, social or developmental grounds. During the reference period a number of sovereign issuers were excluded on grounds of insufficient progress or aspiration on environmental improvements (which relates to PAI 15 - GHG intensity) or of an unsatisfactory approach to achieving the UN SDGs or allowing basic social freedoms (which relate to PAI 16 – investee countries subject to social violations).

The nature of this Fund is such that it does not invest in corporate bonds and hence in practice such corporate exclusions are less important than for other Funds. Nonetheless, the exclusions were formally applied, and included the following:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates PAIs as a component of its scoring methodology. For sovereign issuers, PAIs 15 (GHG intensity) and 16 (investee countries subject to social violation) are highly relevant and were considered when assessing the suitability of various countries’ debt for the portfolio. All PAI indicators are monitored via Schroders PAI dashboard.

There tend to be fewer opportunities to engage with sovereign issuers, as opposed to corporate issuers

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

(in which this Fund does not invest). However, as part of an engagement with a sovereign by the same Investment Manager relating to PAIs 1, 2 and 3 (Greenhouse gas emissions) resulted in that entity being included in the Fund's portfolio allocation.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Natural Capital and Biodiversity	2
Corporate Governance	1
Climate Change	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall

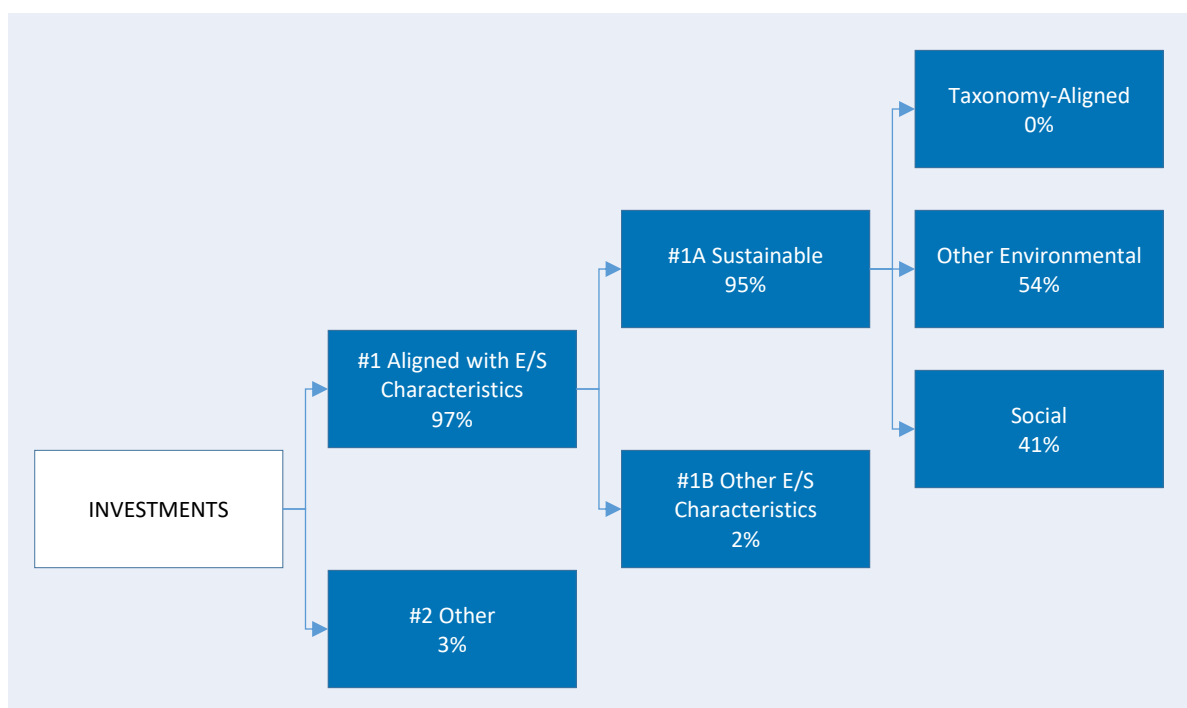

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sustainability score than the Bloomberg Global Treasury EUR hedged index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 54% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Sovereign (Developed)	Sovereign (Developed)	65.63
Supranational	Supranational	14.52
Cash Equivalents	Treasury Bills	4.82
EMD Sovereign	EMD Sovereign	4.36
Government Guaranteed	Government Guaranteed	3.72
Cash	Cash	1.64
Cash	Margin Cash	1.18
Local Authority	Local Authority	2.35
Foreign Sovereign	Foreign Sovereign	1.83
Agency	Agency	0.59
Derivatives	Inflation Derivatives	0.02
Derivatives	FX Derivatives	-0.23
Derivatives	Interest Rate Derivatives	-0.43

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 54%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 41%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**Reference benchmarks** are indexes to measure whether the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

financial product attains the environmental or social characteristics that they promote.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar Corporate Bond

**Legal Entity Identifier :** 549300PT9R3Q0O6WKS27

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.5% and the benchmark's sustainability score for the reference period was -6.0%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Medicine
- Sanitation
- Water Access

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	65
Sep 2023 - Dec 2023	67

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	5.5	-6.0
Sep 2023 - Dec 2023	6.7	-8.6

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schroders’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 1 and 2, were included as part of a company’s overall governance/ environmental score and we considered the decarbonising and minimising emissions plans for a number of companies. All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, in reference to PAI 1, we engaged with a company in the financial sector to provide an update on its climate targets and transition plan. Over the period, our engagements covered a range of topics and related to PAIs 1, 2, 3 and 4.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	12
Human Rights	5
Natural Capital and Biodiversity	4
Corporate Governance	3
Human Capital Management	2
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

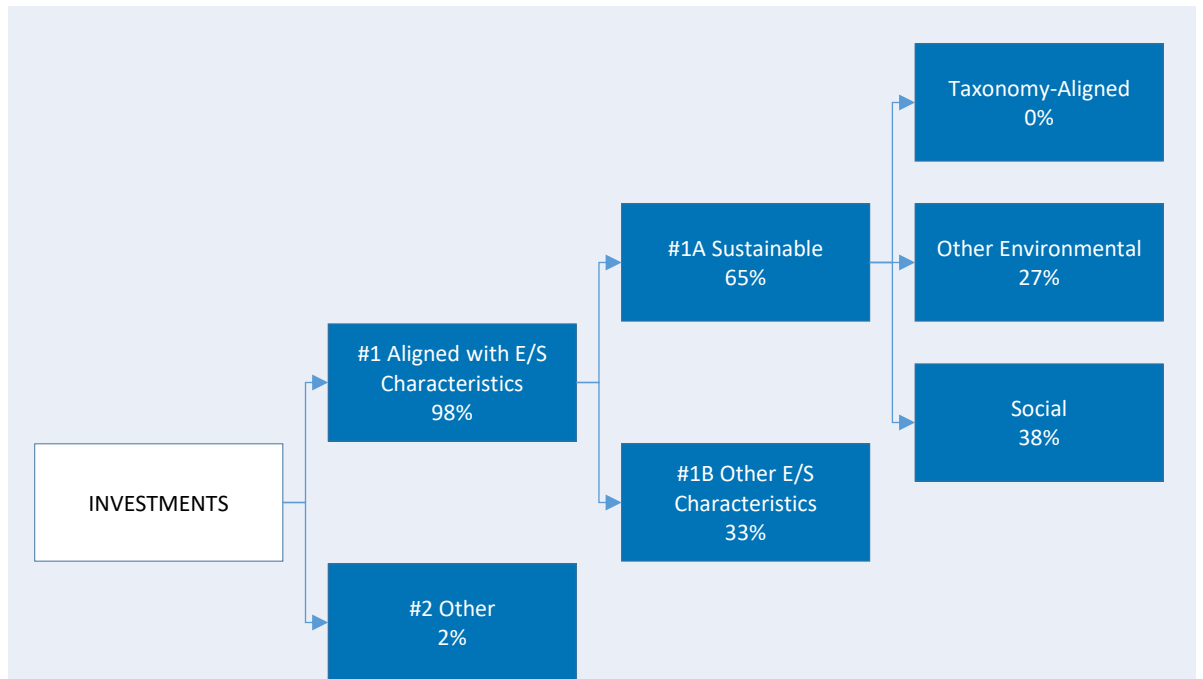

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Bloomberg US Corporate Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Healthcare	12.73
Industrial	Real Estate	8.81
Industrial	Technology & Electronics	6.37
Industrial	Consumer Goods	5.96
Industrial	Capital Goods	5.28
Industrial	Basic Industry	5.07
Industrial	Retail	4.73
Industrial	Telecommunications	4.65
Industrial	Media & Entertainment	3.61
Industrial	Automotive	1.87
Industrial	Services	0.92
Financial	Banking	17.18
Financial	Financial Services	10.03
Financial	Insurance	1.93
Utilities	Non-Electric Utilities	3.01
Utilities	Electric - Integrated	2.24
Utilities	Electric - Generation	1.96
Utilities	Electric - Distr/Trans	1.87
Cash	Cash	1.39
Cash	Margin Cash	0.38

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 38%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Sustainable US Dollar High Yield

**Legal Entity Identifier :** 549300XZ2TNRMX4VI765

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Bloomberg US High Yield Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 40% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 6.1% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Contraception
- High Salaries
- Medicine
- Water Access

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool and / or whether the asset is classified as a green, social and / or sustainable bond.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

**• ...and compared to previous periods?**

As this is our first reporting period, this question is not applicable.

**• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool and / or was classified as a green, social and / or sustainable bond.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social

**Principal adverse impacts** are the most significant negative impacts of investment

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology, for example, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and PAI 3 (GHG intensity of investee companies). All PAI indicators are monitored via Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, and related to PAIs 1, 2, 3 and 4.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	18
Human Rights	9
Corporate Governance	6
Human Capital Management	5
Natural Capital and Biodiversity	4
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. The Fund maintained a higher overall sustainability score than the Bloomberg US High Yield Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. From June 2024 also included within #1 are any green, social or sustainable bonds that were not scored by Schroders' proprietary sustainability tool.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 29% was invested in sustainable investments with an environmental objective and 31% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool or from June 2024 was classified as a green, social and / or sustainable bond. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Media & Entertainment	13.13
Industrial	Healthcare	12.46
Industrial	Telecommunications	9.75
Industrial	Services	6.28

Utilities	Non-Electric Utilities	1.35
Utilities	Electric - Integrated	1.28
Cash	Cash	1.67
Cash	Margin Cash	0.25
Derivatives	Credit Derivatives	-0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 29%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 31%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name:** Schroder ISF Carbon Neutral Credit 2040

**Legal Entity Identifier:** 5493007M7VXI36SNXJ14

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

**X** Yes   No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> 97.5%	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund aimed to achieve aggregate carbon neutrality by the year 2040 within its investment portfolio by investing in at least 75% of its assets in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by one or a combination of the following: (i) being carbon neutral; (ii) aiming for, and being on track to achieve, 75% emission reductions or equivalent by 2040; (iii) committing to net zero by 2050; (iv) having SBTi decarbonisation targets; (v) otherwise demonstrating a contribution to the reduction of carbon emissions (and companies within (v) may include those that provide products or services which enable decarbonisation). All companies held by the Fund were deemed to be sustainable investments by the Investment Manager.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Aggregate carbon neutrality means achieving net zero carbon emissions intensity by balancing investments in (a) issuers that generate carbon emissions, but that have stated goals to reduce such emissions with (b) issuers that contribute to reducing carbon emissions.

The Fund's objective includes a reduction in carbon emissions, which means that it aims for low carbon emissions, consistent with the long-term objectives of the Paris Agreement on limiting global warming. The Investment Manager sought to ensure reduction in carbon emissions by investing in issuers as described in (i) – (v) above. Companies from sectors with heavy scope 3 emissions were also required to have scope 3 emissions reduction targets or a commitment to reduce scope 3 emissions. The Investment Manager periodically assessed whether an issuer's carbon reduction pathway is consistent with the criteria through which it earlier qualified for investment by the Fund and sought to identify cases where it may deviate. The Investment Manager also sought to identify situations where an issuer's emissions reduction targets did not keep pace with the emissions reduction trajectory for that sector and reviewed any major changes in the emissions profile of an issuer, for example due to mergers or acquisitions.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for the Fund is 1 January 2024 to 13 November 2024 when the Fund was liquidated.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 97.5% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used specific sustainability key performance indicators to assess the investment's contribution to an environmental objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

The Investment Manager used different sustainability indicators to positively screen the sustainable investment universe as well as measure the contribution at an investee company level.

The carbon emissions intensity indicator (tonnes of CO<sub>2</sub>e per \$mn sales), as measured by Scope 1 and 2 carbon intensity using third-party data, aggregated at portfolio level, reflects the pathway of attaining the sustainable investment objective, before considering avoided emissions. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy.

Through investments in issuers with low carbon intensity as well as issuers that are decarbonising compared to sector peers, the Fund-level Scope 1 and 2 carbon intensity indicators (tonnes of CO<sub>2</sub>e per \$mn sales) at end of the reference period was 105. Given the Fund's pathway to net carbon neutrality by 2040, during the reference period the Fund invested in some companies which have targets to decarbonise by 2040, from diverse sectors of the Fund's carbon neutral universe. Furthermore, the Fund's carbon intensity was lower than the global credit universe.

The projected net carbon intensity at the Fund level, while also considering the carbon avoided contribution from decarbonisation enablers, reflects the objective of being net carbon neutral by 2040. At the end of the reference period projected net carbon intensity (Scope 1 and Scope 2) was zero, using data from a third-party provider.

The Fund also pursued alignment to the Paris Agreement by investing in companies committed to net zero by 2050 or having SBTi decarbonisation targets. The Fund's Scope 3 carbon intensity decreased during the reference period, and remained lower than the reference universe. Scope 3 emissions are a consequence of the activities of the company but occur from sources not owned or controlled by the company.

The Fund also applied additional exclusions related to fossil fuels, which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within these exclusionary criteria.

## • ...and compared to previous periods?

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Sep 2024	98
Jan 2023 - Dec 2023	99
Jan 2022 - Dec 2022	96

This table details the scope 1 and scope 2 carbon intensity, year on year.

Period	Scope 1 & 2 Carbon Intensity tCO <sub>2</sub> e/\$mn
Sep 2024	105
Dec 2023	133
Dec 2022	45

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

This table details the projected net carbon intensity by 2040, year on year.

Period	Projected net carbon intensity (scope 1 & 2) tCO <sub>2</sub> e/\$mn
Sep 2024	0
Dec 2023	0
Dec 2022	45

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way, but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above-mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

For this product, PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, oil and gas, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the issuer analysis part of our investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its positive selection methodology. For example, PAI 1, 3 and PAI 4 from Annex 1 Table 2 were considered in defining the investment universe and were also monitored for ongoing security selection, in line with the sustainability objective of the Fund.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active investment. During the reference period, we engaged with investee companies on climate alignment related to PAI 1, 2, 3 and 4. For example, we engaged with more than 4 companies in the financial sector to request setting climate targets for financed emissions and design transition plan. Over the period, our engagements covered a range of topics including related to PAIs 1, 2, 3, 4, 5 and 9. All PAI indicators were monitored via Schrodgers PAI dashboard.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Natural Capital and Biodiversity	10
Human Rights	8
Corporate Governance	6
Diversity and Inclusion	4
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 13 Nov 2024**

Largest Investments	Sector	% Assets	Country

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in fixed and floating rate securities issued by governments, government agencies, supra-nationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction by being carbon neutral, aiming for, and being on track to achieve, 75% emission reductions or equivalent by 2040, had committed to net zero by 2050, had SBTi decarbonisation targets or otherwise demonstrated a contribution to the reduction of carbon emissions. This includes (i) issuers that generated carbon emissions, but that had stated goals to reduce such emissions and (ii) issuers that demonstrated a contribution to the reduction of carbon emissions.

The Fund invested 97.5% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. All the sustainable investments had an environmental objective.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

Sector	Sub-Sector	% Assets
Industrial	Telecommunications	8.54
Industrial	Retail	8.08
Industrial	Capital Goods	6.28
Industrial	Consumer Goods	6
Industrial	Basic Industry	5.95
Industrial	Automotive	5.49
Industrial	Technology & Electronics	4.99
Industrial	Healthcare	4.76
Industrial	Real Estate	2.68
Industrial	Transportation	2.35
Industrial	Services	2.02
Industrial	Leisure	1.25
Industrial	Oil Refining & Marketing	1.01
Industrial	Media & Entertainment	0.98
Financial	Banking	21.82
Financial	Financial Services	6.63
Financial	Insurance	3.74
Utilities	Electric - Generation	1.48
Utilities	Non-Electric Utilities	1.33
Utilities	Electric - Distr/Trans	0.69
Cash	Cash	2.37
Local Authority	Transportation	0.9
Securitized	Asset Backed	0.65

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

### • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

All sustainable investments made by the Fund had environmental objectives.

### • *What was the share of socially sustainable investments?*

There were no sustainable investments with a social objective.

### • *What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which were cash, and derivatives used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 75% of its assets fixed and floating rate securities issued by governments, government agencies, supnationals and companies worldwide that in the Investment Manager's view contributed towards the objective of carbon emission reduction;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Fund undertook a number of diverse engagements during the reference period. The Investment Manager undertook targeted engagements on companies to reduce their carbon emissions, use more renewable energy and commit to more comprehensive carbon reduction pathways. Engagements were also carried out to gain insight and request improvements on topics including nature related risks and management, Governance and Just Transition, and Human capital management.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 13 November 2024

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable.
