# Notes to the Financial Statements as at 31 December 2024

## The Company

The Company was incorporated in Luxembourg on 5 December 1968 as a 'société anonyme'. Pursuant to an Extraordinary General Meeting of Shareholders held on 31 January 1989, the form and name of the Company, as well as its establishment period, was changed to a 'société d'investissement à capital variable' ('SICAV') established for an unlimited period under the name of Schroder International Selection Fund. The Company qualifies as an undertaking for collective investment (UCI) regulated by the provisions of Part I of the Luxembourg Law of 17 December 2010, as amended, regarding undertaking for collective investment (the '2010 law').

## Classes of Shares

The Share Classes available for each Sub-Fund are set out in the current prospectus, along with details of any minimum subscription, minimum additional subscription and minimum holding amounts and details of initial charges, redemptions charges and distribution charges (where applicable) for each Share Class.

## Accounting Policies

### Summary of Significant Accounting Policies

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis. Sub-Funds that have been liquidated or are intended to be liquidated after the year end are prepared on a non-going concern basis. Schroder ISF Global Managed Growth and Schroder ISF Global Social Growth were liquidated subsequent to the year end date. The application of the non-going concern basis of accounting has not lead to material adjustments to the Sub-Funds' published net asset values. This cash is monitored by management and will be re-distributed to the investors once all outstanding costs are paid.

For Sub-Funds that have been liquidated, any residual cash is monitored by management and will be re-distributed to the investors once all outstanding costs are paid. At the reporting date the cash amounts held at custody for the following liquidated Sub-Funds were as follows:

Sub-Funds	Cash held at custody as at reporting date
Schroder ISF Sustainable Swiss Equity	45 CHF
Schroder ISF Sustainable Conservative	21,046 EUR
Schroder ISF Carbon Neutral Credit 2040	48,715 EUR
Schroder ISF Global Credit Duration Hedged	832 EUR
Schroder ISF Global Multi-Factor Equity	32,791 USD
Schroder ISF QEP Global Value Plus	220,467 USD

## Net Asset Value

### Calculation of Net Asset Value per share

The Net Asset Value ('NAV') per Share of each Share Class is calculated on each Dealing Day in the currency of the relevant Share Class. It will be calculated by dividing the Net Asset Value attributable to each Share Class, being the proportionate value of its assets less its liabilities, by the number of Shares of such Share Class then in issue. The resulting sum is rounded to the nearest four decimal places. Further details on rules that apply in valuing total assets can be found in the current prospectus.

The financial statements are prepared on the basis of the last NAV calculated during the year. This was 31 December 2024 for all Sub-Funds, with the exception of the following Sub-Funds, where 31 December was a non-dealing day and, therefore, 30 December was the date of the last NAV calculated: Schroder ISF EURO Equity, Schroder ISF Italian Equity, Schroder ISF Japanese Equity, Schroder ISF Swiss Equity, Schroder ISF European Dividend Maximiser, Schroder ISF European Equity Impact, Schroder ISF European Special Situations, Schroder ISF European Sustainable Equity, Schroder ISF Japanese Opportunities, Schroder ISF Japanese Smaller Companies, Schroder ISF Nordic Micro Cap, Schroder ISF Nordic Smaller Companies and Schroder ISF Swiss Small & Mid Cap Equity.

### Valuation of the Assets of the Company

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Company may consider appropriate in such case to reflect the true value thereof.

The values of securities, derivative instruments and assets are determined on the last day on which prices were calculated. The basis for this value uses the available price at the valuation point for each fund on the stock exchange or any other regulated market on which those securities or assets are traded or admitted for trading. Where such securities or other assets are quoted or dealt in on more than one stock exchange or any other regulated market, the Directors shall make regulations for the order of priority in which stock exchanges or other regulated markets shall be used for the provision of prices of securities or other assets. Please refer to the prospectus for further information.

If a security is not traded on or admitted to any official stock exchange or any other regulated market or, in the case of securities so traded or admitted, the last available price does not reflect their true value, the Directors are required to proceed on the basis of their expected sales price, which shall be valued with prudence and in good faith.

Financial derivative instruments, which are not listed on any official stock exchange or any other regulated market, are valued in accordance with market practice. The swaps are valued at their fair value based on the underlying securities (at close of business or intraday) as well as on the characteristics of the underlying commitments. Please refer to the prospectus for further information.

Schroder ISF EURO Liquidity and Schroder ISF US Dollar Liquidity are Standard Variable Money Market Sub-Funds which fall under Money Market Fund Regulation or MMFR the regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on Money Market Funds, as it may be amended or supplemented from time to time. The assets of Sub-Funds qualifying as Money Market Funds shall be valued on at least a daily basis. The Net Asset Value per Share shall be calculated as the difference between the sum of all assets of the Sub-Fund and the sum of all liabilities of the Sub-Fund valued in accordance with Mark-to-Market or Mark-to-Model, or both, divided by the number of outstanding Shares of the Sub-Fund. Units or shares of any other standard or short-term Money Market Fund ("targeted MMF") provided that all of the following conditions are fulfilled: (1) no more than 10 % of the assets of the targeted MMF are able, according to its fund rules or instruments of incorporation, to be invested in aggregate in units or shares of targeted MMFs.

# Notes to the Financial Statements as at 31 December 2024 (continued)

## Net Asset Value (continued)

Units or shares in open-ended undertakings for collective investment are valued on the basis of the latest available reported Net Asset Value.

If any of the aforesaid valuation principles do not reflect the valuation method commonly used in specific markets or if any such valuation principles do not seem accurate for the purpose of determining the value of the Company's assets, the Directors may fix different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures.

Any assets or liabilities in currencies other than the base currency of the Sub-Funds are converted using the relevant spot rate quoted by a bank or other responsible financial institution.

The Directors are authorised to apply other appropriate valuation principles for the assets of the Sub-Funds and/or the assets of a given Share Class if the aforesaid valuation methods appear impossible or inappropriate due to extraordinary circumstances or events.

As of 31 December 2024, fair valuation was applied to the following securities:

Security Name	Sub-Fund
Magnitogorsk Iron & Steel Works PJSC	Schroder ISF BIC (Brazil, India, China)

# Notes to the Financial Statements as at 31 December 2024 (continued)

## Swing Pricing Adjustment

A Sub-Fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares in a Sub-Fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to counter this impact, a Swing Pricing mechanism may be adopted to protect the interests of Shareholders of the Sub-Fund. If on any Valuation Date, the aggregate net transactions in Shares of a Sub-Fund exceed a pre-determined threshold, as determined and reviewed for each Sub-Fund on a periodic basis by the Management Company, the Net Asset Value per Share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively.

The net inflows and net outflows is determined by the Management Company based on the latest available information at the time of calculation of the Net Asset Value per Share. The Swing Pricing mechanism may be applied across all Sub-Funds. The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment may vary from Sub-Fund to Sub-Fund and in normal market conditions is not expected to exceed 2% of the unadjusted Net Asset Value per Share of the relevant Fund on any Dealing Day.

The swing pricing mechanism has been applied to the Company's Sub-Funds since 12 January 2009 and applies to all of the Sub-Funds.

On 31 December 2024 the last working day of the year under review, the official Net Asset Values per share of Sub-Funds following the application of the swing pricing adjustments are shown in the table below. All other financial information stated in this report is shown before any adjustments for swing pricing.

## Fair Value Pricing

In accordance with the provisions of the current prospectus, fair value pricing may be implemented to protect the interests of the Company's Shareholders against market timing practices. Accordingly, if a Sub-Fund is primarily invested in markets that are closed for business at the time the Sub-Fund is valued, the Directors may, during periods of market volatility and by derogation from the provisions above under 'Calculation of Net Asset Value per share', cause the Sub-Fund Administrator to allow for the Net Asset Value per share to be adjusted to reflect more accurately the fair value of the Sub-Fund's investments at the point of valuation. The level of adjustment is based upon a systematic process involving a multi-factor regression approach that incorporates global that incorporates global, regional and security specific factors up until the point of valuation.

The Directors, however, reserve the right to extend the implementation of fair value pricing in respect of other Sub-Funds wherever they deem it appropriate. On 31 December 2024, the last working day of the year under review, the following Sub-Funds were adjusted.

Sub-Fund	Currency	Total Adjustment
Schroder ISF Asian Opportunities	USD	13,993,167

## Cash Collateral Reinvestment

For the purpose of counterparty risk mitigation, Sub-Funds with currency hedging transactions related to hedged share classes will pay or receive cash collateral on a daily basis from the counterparty, thus reducing their exposure over the duration of the forward contract. Investment Managers may reinvest

\* Please refer to the Directors' Report for details of all corporate actions that occurred during the year under review.

# Notes to the Financial Statements as at 31 December 2024 (continued)

## Cash Collateral Reinvestment (continued)

the cash collateral they receive from their counterparty in connection with currency hedging, in line with the investment objectives of the Sub-Fund.

## Realised Gains and Losses on Sales of Investments in Securities

Realised gains and losses on sales of investments in securities are determined on the average cost basis and include transaction costs.

## Income

Dividends are credited to income on their ex-dividend date. Interest income is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts, where applicable. Bank interest is credited to the Sub-Funds upon receipt.

## Forward Currency Exchange Contracts

Outstanding forward currency exchange contracts are valued at the last available price at NAV calculation day by reference to the forward rate of exchange applicable to the maturity of the contracts. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Unrealised gain/(loss) on forward currency exchange contracts'.

## Futures Contracts

Futures contracts were valued at the last available price at NAV calculation day. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Unrealised gain/(loss) on financial futures contracts'.

## Options Contracts

Options contracts were valued at the last available price at NAV calculation day. The net market value is shown in the Combined Statement of Net Assets under 'Options purchased and swaptions contracts at market value' for assets and under 'Options written and swaptions contracts at market value' for liabilities.

## Inflation Rate Swap Contracts

The Company invests in inflation swaps as part of the investment strategy. Inflation swaps were valued at the last available price at NAV calculation day at their intrinsic value. The valuation method involves the determination of the net present value of future cash flows at the closing date. The result of these revaluations together with any interest receivable/payable in relation to inflation swaps on 31 December 2024 is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

## Interest Rate Swap Contracts

In order to hedge against interest rate fluctuations, the Company may enter into interest rate swaps. Such contracts must be denominated in the currencies in which the assets of such Sub-Fund are denominated, or in currencies which are likely to fluctuate in a similar manner and must be either listed on an exchange or dealt in on a Regulated Market. Interest rate swaps were valued at the last available price at NAV calculation day at their intrinsic value. The valuation method involves a current value of each interest rate and capital series converted into the currency of the Sub-Fund on the closing date. The result of these revaluations together with any interest receivable/payable in relation to interest rate swaps on 31 December 2024 is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

## Credit Default Swap Contracts

A credit default swap contract is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The value of the underlying securities shall be taken into account for the calculation of the investment and borrowing powers applicable to individual issuers. The market values are recorded under 'Swap contracts at fair value' in the Combined Statement of Net Assets. The changes in unrealised gains or losses are included in the Combined Statement of Operations and Changes in Net Assets under 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. When a contract is closed, the realised gains or losses are recorded under 'Net change in realised appreciation/(depreciation) on swap contracts' in the Combined Statement of Operations and Changes in Net Assets.

## Total Return Swap Contracts

The Company may use total return swaps. A total return swap is a bilateral financial contract which allows the Company to enjoy all of the cash flow benefits of an asset without actually owning this asset (the 'Reference Asset'). The Company will have to pay a periodic fee (fixed or floating payment) in exchange of its right to receive the total return of the Reference Asset (coupons, dividends and capital gains or losses). The Reference Asset can be almost any asset, index or basket of asset which constitutes an eligible investment for the Company. The Company may use such instruments to seek exposure to an eligible market or for hedging purposes.

The Company will only enter into a total return swap transaction with financial institutions specialised in this type of transaction. In addition, the use of total return swaps must comply with the investment objectives and policies and risk profile of the relevant Sub-Fund. The total commitments arising from the use of total return swaps together with the total commitments arising from the use of other derivative instruments may not, at any time, exceed the net assets of the relevant Sub-Fund.

The total return swaps were valued at the last available price at NAV calculation day. The unrealised gain or loss on total return swaps at the year end is represented by the values of interests to be received (or paid), based on relevant swap agreements' interest rates less (or plus, respectively), the value of the performance to be paid (or received, respectively), based on the total return value of underlying assets, which is made of the current fair value of the bonds plus the coupon for such debt instruments for the relevant swap period. The unrealised gain/(loss) is shown in the Combined Statement of Net Assets under 'Swap contracts at fair value'.

## Fees and Expenses

### Management Fees

The Investment Managers are entitled to receive management fees for their services, which are calculated and accrued daily by reference to the Net Asset Value of the Sub-Funds and are paid monthly. No management fees are payable out of the net assets for I and J share classes, however the Investors are charged directly by Schroders. The actual rates payable as at 31 December 2024, which vary from Sub-Fund to Sub-Fund and from share class to share class are set out in the table on pages 959 - 982.

# Notes to the Financial Statements as at 31 December 2024 (continued)

## Performance Fees

In accordance with the provisions of the current prospectus, performance fee terms were applied to 1 Sub-Fund. Accordingly, the Investment Managers of the relevant Sub-Fund are entitled to receive from the Sub-Fund a performance fee, in addition to management fee, provided that the increase in the Net Asset Value per share of the Sub-Fund over the calendar year outperforms their relevant benchmarks over the same period, in accordance with the high water mark principle, i.e. by reference to the Net Asset Value per Share at the end of any previous performance period (the High Water Mark). The performance period shall normally be each financial year except that where the Net Asset Value per Share as at the end of the financial year is lower than the High Water Mark, the performance period will commence on the date of the High Water Mark.

If a performance fee is introduced on a Sub-Fund during a financial year, then its first performance period will commence on the date on which such fee is introduced. The performance fee is 20% of the outperformance and is payable annually in January. Further details of the calculation of the performance fees can be found in the current prospectus.

The Sub-Fund in relation to which performance fees were calculated during the year under review as well as details of the relevant Investment Manager and benchmark are set out in the following table.

Sub-Funds	Investment Manager	Benchmark
Schroder ISF European Alpha Absolute Return	Schroder Investment Management Limited	Euro Short Term Rate

No performance fees were charged for the financial year under review.

## Distribution Fees

The distribution fee represents the cost charged to the Sub-Fund for the distribution of the share classes and it is expressed as a percentage of the net assets. The actual rates payable which vary from Sub-Fund to Sub-Fund and from share class to share class can be found in the current prospectus.

## Depositary and Administration Fees

The Depositary and Sub-Fund Administrator are entitled to fees for related services rendered in accordance with common practice in Luxembourg, payable monthly, out of the net assets of the Sub-Fund.

## Operating Expenses

The Sub-Funds pay other Operating expenses incurred in the operation of the Company which are composed of statutory fees and are mainly audit, legal and publication fees, please refer to the 'Operating Expenses' shown in the Combined Statement of Operations and Change in Net Assets.

## Directors' Fees

For the year from 1 January 2024 to 31 December 2024, Richard Mountford received in remuneration an amount of EUR 90,000, Hugh Mullan received in remuneration an amount of EUR 65,000. Marie-Jeanne Chevrement received in remuneration an amount of EUR 41,799. Bernard Herman and Eric Bertrand each received in remuneration an amount of EUR 80,000. Yves Francis received in remuneration an amount of EUR 82,555.

The remaining Directors have waived their remuneration.

## Taxation

The Company is not subject to any taxes in Luxembourg on income or capital gains. The only tax to which the Company in Luxembourg is subject is the 'taxe d'abonnement' to a rate of 0.05% per annum based on the net asset value of each Sub-Fund at the end of the relevant quarter, calculated and paid quarterly. In respect of any Share Class or Sub-Fund which comprises only institutional Investors (within the meaning of article 174 of the Law of 17 December 2010), the tax levied will be at the rate of 0.01% per annum.

Interest and dividend income received by the Company may be subject to non-recoverable withholding tax in the source countries. The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin, and provisions in this respect may be recognised in certain jurisdictions.

Capital gains realised on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 20% Indian capital gains tax (15% prior to 23 July 2024). The disposal of Indian listed stocks after 12 months after purchase (long-term gains) are subject to a 12.5% Indian capital gains tax (10% prior to 23 July 2024). The capital gains taxes are taken into account on an arisen basis at the applicable rates for a short term gain or a long term gain without taking a provision into account. The capital gains taxes are accrued in the net asset value and included in the statement of net assets under the heading 'Other liabilities' and included in the statement of operations and changes in net assets under 'Net realised gain/(loss) on: currency exchange' for the capital gain taxes linked to realised gains and under 'Net Change in unrealised appreciation/ depreciation on: currency exchange' for the unrealised appreciation of investments during the year.

# Notes to the Financial Statements as at 31 December 2024 (continued)

## Taxation (continued)

During the year, the Sub-Funds listed below received a tax rebate related to dividend paying Italian equity securities. Italy has for years imposed a dividend withholding tax which was higher than that imposed on domestic funds. Under European case law, Schroders and our advisers successfully argued that this is contrary to the European Directive principles of freedom of establishment and freedom of capital. The positive impact to the Sub-Fund NAV's at the point of receipt was as follows:

Sub-Funds	% of NAV	Sub-Funds	% of NAV
Schroder ISF EURO Equity	1.3650%	Schroder ISF Global Smaller Companies	0.0970%
Schroder ISF Global Equity	0.0012%	Schroder ISF Global Sustainable Growth	0.0001%

Schroder ISF Global Recovery	0.1133%	Schroder ISF European Alpha Absolute Return	4.4842%

## Changes in the Sub-Funds

A list specifying the total purchases and sales for each Sub-Fund, which took place during the year under review, may be obtained free of charge upon request at the Company's registered office.

## Transactions made for a Purpose other than Hedging

In accordance with the provisions of the current prospectus, the Company may, for a purpose other than hedging, purchase and sell futures contracts, forward foreign exchange contracts, financial derivative instruments that are traded OTC including, without limitation, total return swaps, contracts for difference or other financial derivative instruments with similar characteristics and equity swaps provided that the Company will only enter into equity swap transactions with highly rated financial institutions specialised in this type of transaction.

## Disclosure of Transaction Costs

The transaction costs are broker commission fees and taxes related to the purchase and sale of transferable securities. Custodian transaction costs are not included in this table, please refer to the Depository Fees shown in the Combined Statement of Operations and Change in Net Assets which includes custody transaction costs that represent fixed rate charges per market levied by the custodian for the servicing of portfolio transactions. Bond Sub-Funds will generally show the figure of zero as the broker commission fees are included in the spread, which is excluded from the calculation pursuant to Annex I, Schedule B, Chapter V of Directive 2009/65/EC of the European Parliament. Transaction costs for baskets of contracts for difference are included in the market value. The transactions costs for the year under review are as follows:

Sub-Funds	Sub-Funds Currency	Total Transaction Costs

## Investment Restriction

To ensure eligibility for the French Plan d'Épargne en Actions (PEA), as at 31 December 2024, Schroder ISF EURO Equity will invest at least 75% of its assets in equity securities issued by companies which have their head office in the European Union, or in an EEA state that has signed a tax agreement with France, including a clause on combating fraud and tax avoidance.

## Cross Sub-Fund Investments

As at 31 December 2024, the total cross Sub-Fund investment amounts to EUR 2,229,522,232 and therefore, the total combined NAV at the year end without cross Sub-Fund investments would amount to EUR 119,489,009,430. The details of the cross Sub-Fund investments are disclosed in the following table:

# Appendix I – Global Exposure and Leverage (Unaudited)

## Method used to calculate global exposure

The following sections indicate whether the UCITS global exposure is managed under a commitment approach, a relative Value at Risk relative VaR) approach or an absolute Value at Risk (absolute VaR) approach.

For Sub-Funds managed under a VaR approach, additional information is provided on the VaR model, the VaR benchmark, the regulatory VaR limit usage and the level of leverage reached.

### 1. Commitment approach

The approach used for the Sub-Funds with low derivative usage or Sub-Funds which limit their derivatives commitment to 100% or less of their Net Asset Value.

Schroder ISF Sustainable Global Sovereign Bond <sup>^</sup>	Bloomberg Global Treasury EUR hedged index

The level of leverage is an indication of the derivative usage and of any leverage generated by the reinvestment of cash received as collateral when using efficient portfolio management techniques. It does not take into account other physical assets directly held in the portfolio of the relevant Sub-Funds. The figure is not representative of the maximum amount that a Sub-Fund could lose, as it includes the derivatives used to protect the Net Asset Value of a Sub-fund as well as the derivatives backed by risk free assets and derivatives which do not generate any incremental exposure, leverage or market risk from an economic perspective. The reported leverage figure is therefore not a true representation of the economic leverage<sup>1</sup> in the Sub-fund. The level of leverage disclosed is based on the total notional value<sup>2</sup> of all financial derivative instruments held by a Sub-Fund and is expressed as a percentage of Sub-Fund's Net Asset Value. For the purpose of this calculation the holdings and offset derivative positions ('long' and 'short' positions) do not cancel each other out and the figure is a sum of Sub-Funds the total holdings (except for forwards used for currency hedging purposes).

- 1 Where economic leverage is the sum of derivatives commitments (calculated in line with ESMA 10/788) and excludes derivatives used within hedging arrangements, derivatives whose commitment is covered by risk free assets and derivatives which are not considered to generate any incremental exposure and leverage or market risk.
- 2 Delta adjusted in line with ESMA 10/788 when appropriate

Sub-Fund	Total Return Swaps - returns for the Sub-Funds	
	Absolute - in Sub-Fund currency	
Schroder ISF Commodity		3,667,854
Schroder ISF Cross Asset Momentum*		4,707,447
Schroder ISF Global Multi-Asset Balanced		994,796
Schroder ISF Multi-Asset Total Return		12,184
Schroder ISF European Alpha Absolute Return		981,090

### Cost

The costs attributed to total return swaps held during the year were included in the spread.

\* Please refer to the Directors' Report for details of all corporate actions that occurred during the year under review.

# Appendix III – Remuneration Disclosures (Unaudited)

## UCITS remuneration disclosures for Schroder Investment Management Europe S.A. ('SIM Europe') for the year to 31 December 2024

These disclosures form part of the non-audited section of this annual report and accounts and should be read in conjunction with the Schroders plc Remuneration Report on pages 62 to 83 of the 2024 Annual Report & Accounts (available on the Group's website [www.schroders.com/ir](http://www.schroders.com/ir)) which provides more information on the activities of our Remuneration Committee and our remuneration principles and policies.

The UCITS Material Risk Takers ('UCITS MRTs') of SIM Europe are individuals whose roles within the Schroders Group can materially affect the risk of SIM Europe or any UCITS fund that it manages. These roles are identified in line with the requirements of the UCITS Directive and guidance issued by the European Securities and Markets Authority.

The Remuneration Committee of Schroders plc has established a remuneration policy to ensure the requirements of the UCITS Directive are met for all UCITS MRTs. The Remuneration Committee and the Board of Schroders plc review remuneration strategy at least annually. The directors of SIM Europe are responsible for the adoption of the remuneration policy and periodically reviewing its implementation in relation to SIM Europe. During 2024 the Remuneration Policy was reviewed to ensure compliance with the UCITS/AIFMD remuneration requirements and no significant changes were made.

The implementation of the remuneration policy is, at least annually, subject to independent internal review for compliance with the policies and procedures for remuneration adopted by the Board of SIM Europe and the Remuneration Committee. The most recent review found no fundamental issues but resulted in minor recommendations relating to policy documentation.

Our ratio of operating compensation costs to net operating income guides the total spend on remuneration each year. This is recommended by the Remuneration Committee to the Board of Schroders plc. This approach aligns remuneration with Schroders financial performance. In determining the remuneration spend each year, the underlying strength and sustainability of the business is taken into account, along with reports on risk & compliance, legal and internal audit matters from the heads of those areas.

The remuneration data that follows reflects amounts paid in respect of performance during 2024.

- The total amount of remuneration paid by SIM Europe to its 332 staff was €55.67 million of which €42.25 million was fixed remuneration (e.g. salaries, benefits in kind) and €13.42 million was variable remuneration (e.g. annual bonus awards or deferred bonus awards). Employees of other Schroders Group entities who serve as Directors of SIM Europe receive no additional fees in respect of their role on the Board of SIM Europe.
- The following disclosures relate to UCITS MRTs of SIM Europe. Most of those UCITS MRTs were employed by other Schroders group companies, including as a result of delegation by SIM Europe of investment management or other responsibilities to other Schroders group entities or third parties. Many of those UCITS MRTs provide services to other Schroders group companies and other clients. In the interests of transparency, the aggregate remuneration figures that follow reflect the full remuneration for each SIM Europe UCITS MRT. The aggregate total remuneration paid to the 224 UCITS MRTs of SIM Europe in respect of the financial year ended 31 December 2024, and attributed to SIM Europe or the UCITS funds that it manages, is €169.80 million, of which €50.45 million was paid to senior management, €116.93 million was paid to MRTs deemed to be taking risk on behalf of SIM Europe or the UCITS funds that it manages and €2.42 million was paid to other UCITS MRTs including control function MRTs. Those total remuneration values include amounts paid by delegates where available.

For additional qualitative information on remuneration policies and practices see [www.schroders.com/rem-disclosures](http://www.schroders.com/rem-disclosures).

# Appendix V – Sustainable Finance Disclosure (Unaudited)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Opportunities

**Legal Entity Identifier :** YV2UILN4DUFWUTDZHO58

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes
   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 71% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.8% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Donations
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 71% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	71
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	57

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.8	-2.5
Jan 2023 - Dec 2023	-1.0	-2.4
Jan 2022 - Dec 2022	-1.4	-2.9

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	25
Natural Capital and Biodiversity	5

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Human Rights	4
Corporate Governance	4
Human Capital Management	2
Diversity and Inclusion	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.75	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

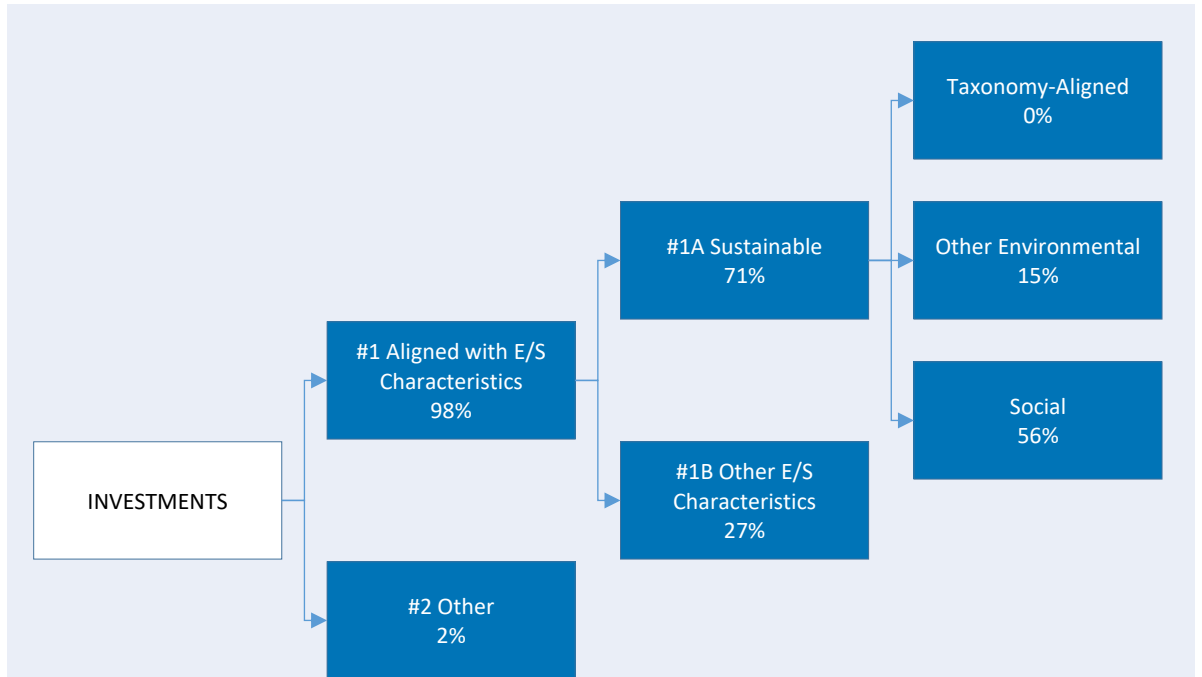

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 71% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 15% was invested in sustainable investments with an environmental objective and 56% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	22.23
Information Technology	Software & Services	9.00
Information Technology	Technology Hardware & Equipment	2.84
Financial	Banking	15.86
Financial	Insurance	5.20
Financial	Real Estate	2.83
Financial	Financial Services	0.60
Consumer Discretionary	Consumer Durables & Apparel	7.93
Consumer Discretionary	Consumer Services	4.74
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.55
Consumer Discretionary	Automobiles & Components	0.13
Collective Investments	Unit Trusts	9.54
Industrial	Capital Goods	5.45
Industrial	Transportation	0.11
Health Care	Health Care Equipment & Services	3.04
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	0.20
Energy	Integrated Oil & Gas	1.65
Energy	Oil & Gas Refining & Marketing	1.36
Materials	Materials	1.86
Consumer Staples	Food, Beverage & Tobacco	1.12
Cash	Cash	0.74

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 15%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 56%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF EURO Equity

**Legal Entity Identifier :** 3YYOQS43D8251JTKU860

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI European Monetary Union (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -0.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	68
Jan 2023 - Dec 2023	58
Aug 2022 - Dec 2022	56

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.2	-0.7
Jan 2023 - Dec 2023	-0.8	-1.8
Jan 2022 - Dec 2022	-1.5	-2.3

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including climate risk & oversight challenges in the Banking sector, and climate & Net Zero commitments for held companies. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	24
Corporate Governance	12
Human Rights	5
Diversity and Inclusion	4
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	7.43	Netherlands

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sources.

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI European Monetary Union (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	25.48
Industrial	Transportation	1.48
Information Technology	Semiconductors & Semiconductor Equipment	11.56
Information Technology	Software & Services	8.51
Information Technology	Technology Hardware & Equipment	1.51
Financial	Banking	10.00
Financial	Financial Services	3.15
Financial	Insurance	2.39
Consumer Discretionary	Consumer Services	2.99
Consumer Discretionary	Consumer Durables & Apparel	2.36
Consumer Discretionary	Media & Entertainment	2.08
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.78
Consumer Discretionary	Automobiles & Components	0.32
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.49
Health Care	Health Care Equipment & Services	3.24
Consumer Staples	Food, Beverage & Tobacco	4.20
Consumer Staples	Household & Personal Products	3.02
Consumer Staples	Consumer Staples Distribution & Retail	0.08
Materials	Materials	3.53
Communication Services	Telecommunication Services	2.33
Cash	Cash	1.32
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.19
Utilities	Utilities	1.19
Energy	Oil & Gas Exploration & Production	0.43
Energy	Oil & Gas Refining & Marketing	0.35

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

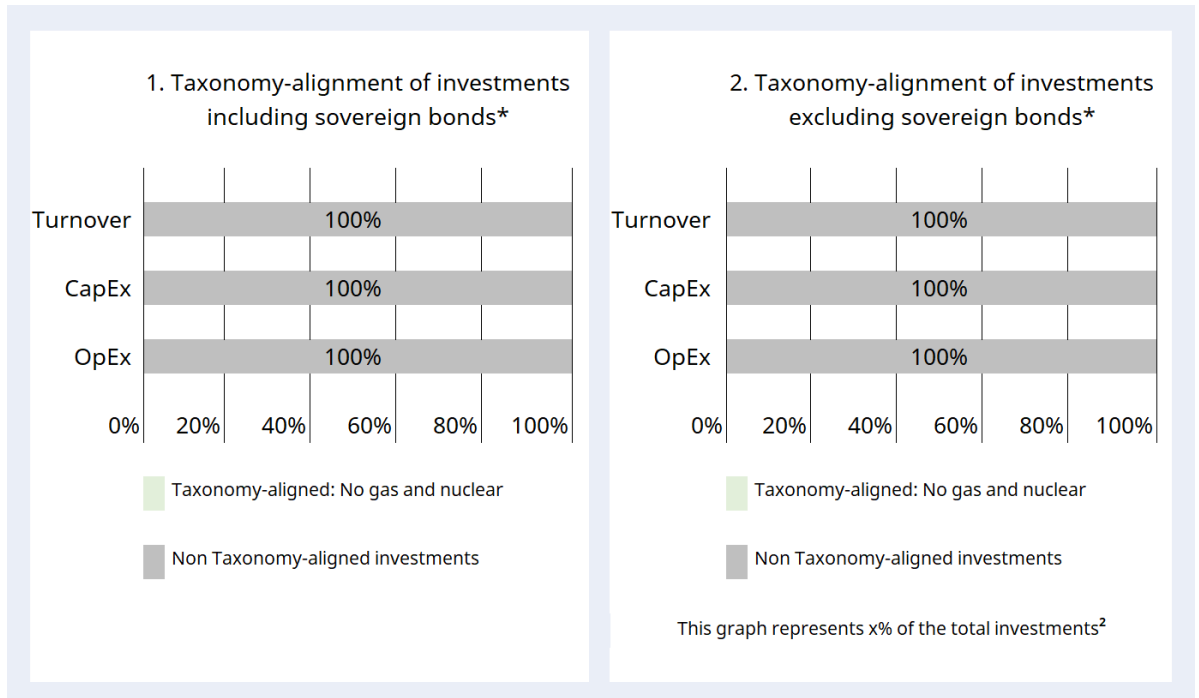

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Global Equity

**Legal Entity Identifier :** W98SM5I2EG2S17ELT606

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 62% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country (AC) World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.2% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 62% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	62
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	47

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.2	-2.1
Jan 2023 - Dec 2023	1.6	-2.9
Jan 2022 - Dec 2022	0.6	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the investment process, Schrodgers’ proprietary tool was used which incorporates several PAIs as a component of its scoring methodology. For example, PAI 2, 3, 4, 5, 6 (Greenhouse gas emissions) and PAI 4 from Annex 1 Table 2 (Investments in companies without carbon emission reduction initiatives) were included as part of a company’s overall environmental score. These PAIs, amongst others, are embedded within our investment process, informing our view on business risk and long-term growth drivers. PAI 13 (Board gender diversity) was also considered as part of our assessment of good governance, management quality and company strategy. During the reference period, PAI 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3 (Number of identified cases of severe human rights issues and incidents) were considered relative to industry peers and poor performance issuers on these metrics / indicators received higher risk scores in our assessment and formed the basis of our engagement activities. All PAI indicators are monitored via Schrodgers’ PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on climate commitments and biodiversity targets related to PAIs 6, 7 and 8. For example, in reference to PAI 7 (Activities negatively affecting biodiversity-sensitive areas) we engaged with a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

company in the consumer sector on its contribution to single-use plastic. Over the period, our engagements covered a range of topics and related to PAIs 6, PAI 4 from Annex 1 Table 2 and PAI 14 from Annex 1 Table 3.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	63
Human Rights	34
Corporate Governance	32
Natural Capital and Biodiversity	13
Human Capital Management	12
Diversity and Inclusion	11

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	1.13	Netherlands

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI All Country (AC) World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 62% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Software & Services	20.00
Information Technology	Semiconductors & Semiconductor Equipment	10.79

Cash	Margin Cash	0.04

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

## Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Italian Equity

**Legal Entity Identifier :** KZ4CKIFING0D2JM68769

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 49% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE Italia All-Share (TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

### • How did the sustainability indicators perform?

The Fund's sustainability score for the reference period was 0.1% and the benchmark's sustainability score for the reference period was -0.9%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine
- Power Provision
- Water Access

The Investment Manager invested 49% of the Fund's assets in sustainable investments. This figure

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	49
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	63

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.1	-0.9
Jan 2023 - Dec 2023	0.2	-1.3
Jan 2022 - Dec 2022	1.6	-1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues; and
- Water Access: the estimated societal benefits associated with the benefits to human health from the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

provision of clean drinking water. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including climate reporting challenges in the Banking sector.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	8
Corporate Governance	5

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Diversity and Inclusion	1
Human Capital Management	1
Natural Capital and Biodiversity	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
UNICREDIT SPA NPV	Financial	9.94	Italy
INTESA SANPAOLO SPA EUR0.52	Financial	9.65	Italy
ENEL EUR1	Utilities	6.15	Italy

IREN SPA EUR1	Utilities	2.08	Italy

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## Asset allocation

describes the share of investments in specific assets.

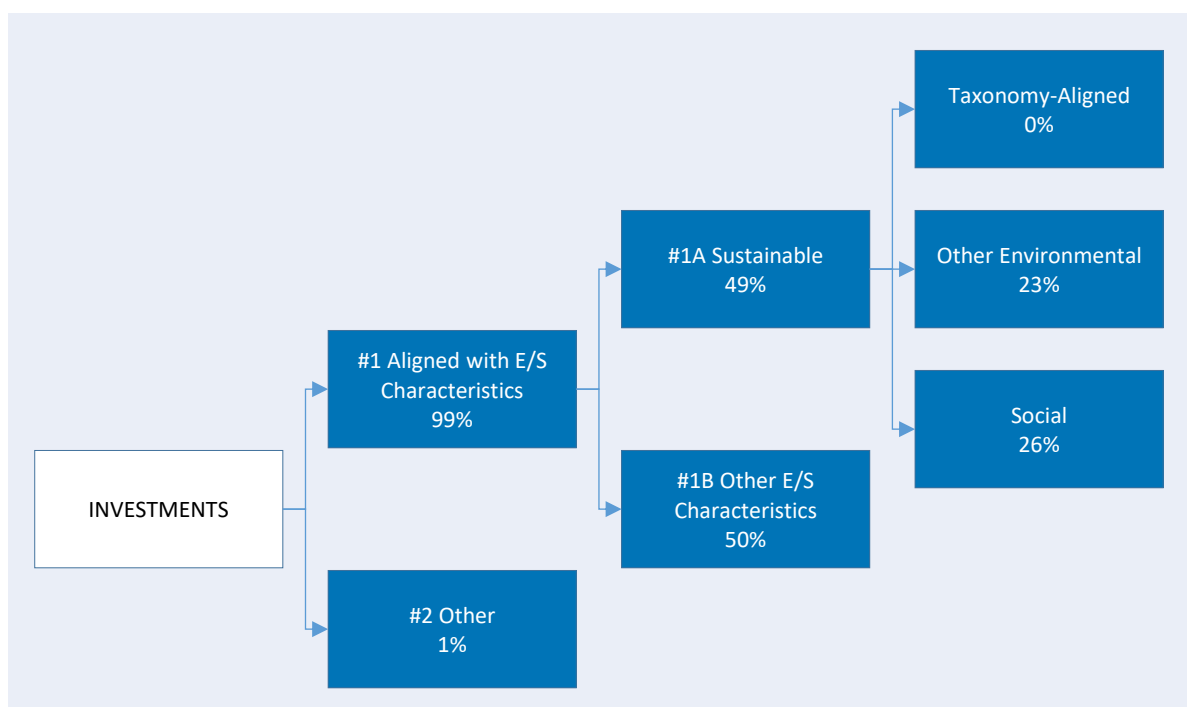

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the FTSE Italia All-Share (TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 49% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 26% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Banking	29.29
Financial	Insurance	4.47
Financial	Financial Services	2.22
Consumer Discretionary	Automobiles & Components	11.43
Consumer Discretionary	Consumer Durables & Apparel	5.30
Consumer Discretionary	Consumer Services	1.78
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.31
Utilities	Utilities	14.11
Utilities	Gas Utilities	0.22
Industrial	Capital Goods	10.94
Industrial	Commercial & Professional Services	0.26
Information Technology	Semiconductors & Semiconductor Equipment	5.07
Information Technology	Software & Services	2.07
Information Technology	Technology Hardware & Equipment	0.31
Energy	Oil & Gas Equipment & Services	3.23
Energy	Integrated Oil & Gas	1.16
Energy	Oil & Gas Refining & Marketing	0.21
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.40
Health Care	Health Care Equipment & Services	0.87
Consumer Staples	Household & Personal Products	1.52
Materials	Industrial Gases	1.09
Materials	Materials	0.12
Communication Services	Telecommunication Services	0.90
Cash	Cash	0.73

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 23%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 26%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Japanese Equity

**Legal Entity Identifier :** CJJRRIDG3Y95POYRD382

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 60% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.0% and the benchmark's sustainability score for the reference period was -2.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Financial Inclusion
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 60% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	60
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	58

### Sustainability score

*This table details the Fund's and benchmark's sustainability score, year on year. Period Fund (%)*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.0	-2.6%
Jan 2023 - Dec 2023	1.0	-3.2%
Jan 2022 - Dec 2022	1.2	-3.1%

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. PAIs were considered through our ESG integrated process in both the analysis of individual companies and portfolio construction. Individual analysts were primarily responsible for financial forecasts and ESG assessment through the use of Schrodgers proprietary tools. The analysts’ views on ESG factors covering multiple PAIs were quantified by our analysts, alongside fundamental financial factors. All PAI indicators are monitored via Schrodgers PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, Tokyo based Japanese equity team including fund managers and analysts engaged with investee companies on their plans around and disclosure of net zero targets which relates to PAIs 1, 2 and 3. This is our Climate Changes focused engagement targeting higher emission companies within our investee companies, and collaborated with Sustainable Investment team. We also engaged with companies to discuss social and governance issues, and the topics discussed with management of investee companies included board gender diversity, related to PAI 13.

A summary of the Fund’s engagement activity during the reference period, including the relevant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	12
Climate Change	12
Natural Capital and Biodiversity	3
Diversity and Inclusion	2
Human Capital Management	1
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
MITSUBISHI UFJ FINANCIAL GROUP INCORPORATED NPV	Financial	5.50	Japan
SONY GROUP CORPORATION NPV	Consumer Discretionary	4.84	Japan

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

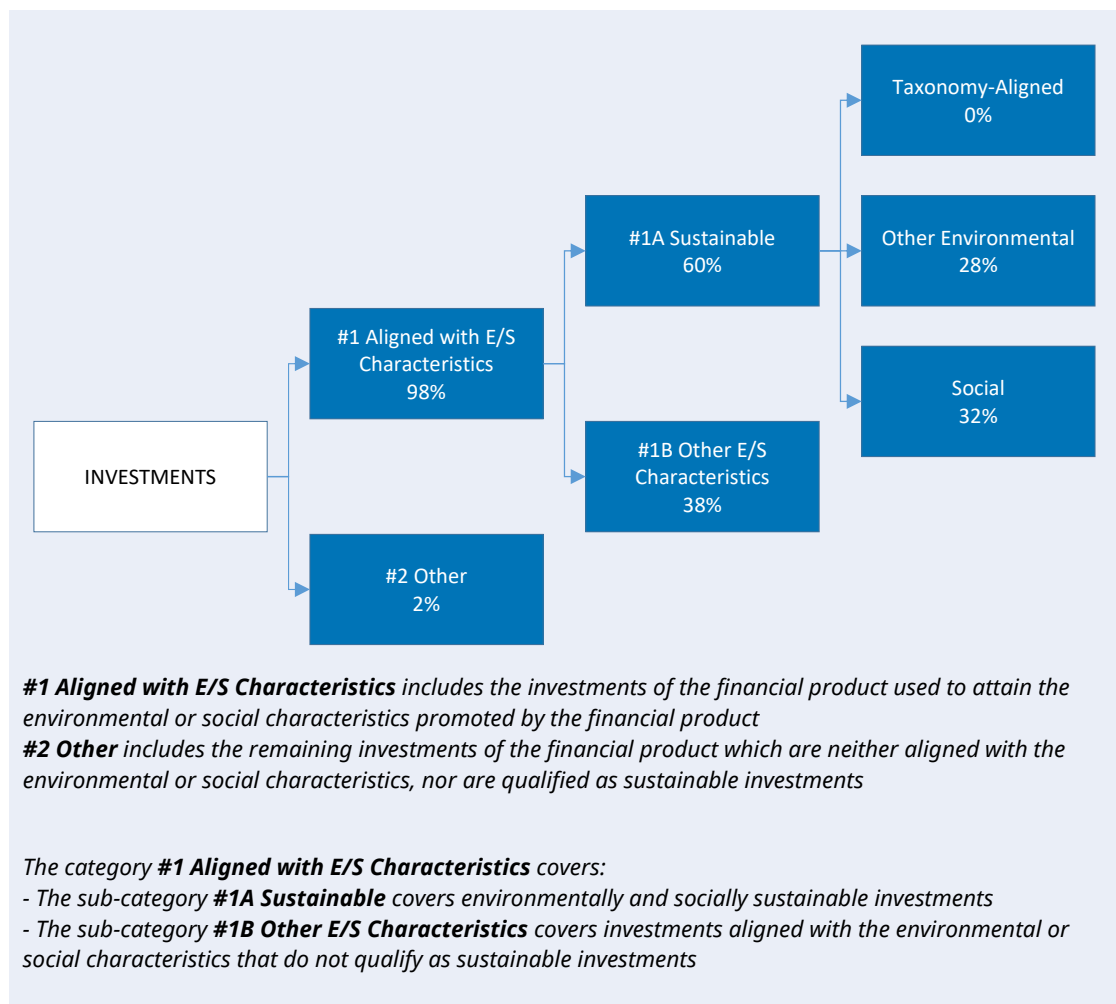

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the Tokyo Stock Exchange 1st Section Index (TOPIX) (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 60% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 28% was invested in sustainable investments with an environmental objective and 32% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Insurance	8.21
Financial	Banking	7.79
Financial	Financial Services	5.04
Financial	Real Estate	2.10
Consumer Discretionary	Automobiles & Components	10.74
Consumer Discretionary	Consumer Durables & Apparel	8.85
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.41
Consumer Discretionary	Media & Entertainment	0.50
Consumer Discretionary	Consumer Services	0.06
Industrial	Capital Goods	14.71
Industrial	Commercial & Professional Services	2.47
Industrial	Transportation	0.07
Information Technology	Software & Services	7.23
Information Technology	Technology Hardware & Equipment	5.79
Information Technology	Semiconductors & Semiconductor Equipment	3.34
Communication Services	Telecommunication Services	7.79
Communication Services	Media & Entertainment	0.51
Materials	Materials	6.62
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.79
Health Care	Health Care Equipment & Services	0.05
Cash	Cash	2.22
Cash	Margin Cash	0.01
Consumer Staples	Consumer Staples Distribution & Retail	0.72

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

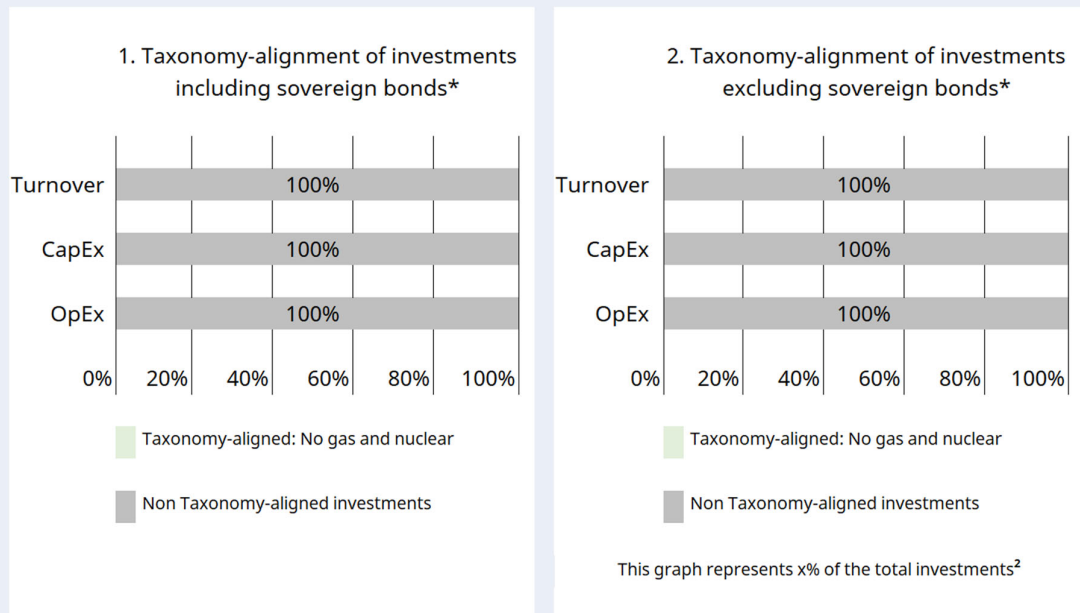

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 28%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 32%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

### Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Swiss Equity

**Legal Entity Identifier :** K0IBGMFXVN7F42QXE203

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a positive absolute sustainability score, based on Schroders' proprietary tool.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024. On 15 May 2024 Schroder ISF Sustainable Swiss Equity was merged into the Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The positive absolute sustainability score for the reference period was 3.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Donations
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	65
Aug 2022 - Dec 2022	68

### Sustainability score

*This table details the Fund's sustainability score, year on year*

Period	Fund (%)
Jan 2024 - Dec 2024	3.2
Jan 2023 - Dec 2023	2.2
Jan 2022 - Dec 2022	2.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including Climate commitments for held companies within the Utilities sector. These engagements related to PAIs 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
------------------	-----------

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Climate Change	8
Corporate Governance	6
Human Rights	5
Diversity and Inclusion	4
Human Capital Management	3
Natural Capital and Biodiversity	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ROCHE HOLDING AG NPV	Health Care	9.49	United States
NOVARTIS AG CHF0.50 (REGISTERED)	Health Care	9.29	Switzerland
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	8.47	United States
COMPAGNIE FINANCIERE RICHEMONT SA CHF1 (REGISTERED)	Consumer Discretionary	5.73	Switzerland
ZURICH INSURANCE GROUP AG CHF0.10 (REGISTERED)	Financial	5.21	Switzerland
UBS GROUP AG CHF0.10 (REGISTERED)	Financial	3.41	Switzerland
PARTNERS GROUP HOLDING AG CHF0.01 (REGISTERED)	Financial	2.82	Switzerland
LONZA AG CHF1(REGISTERED)	Health Care	2.37	Switzerland
ABB LIMITED CHF0.12 (REGISTERED)	Industrial	2.33	Switzerland
ALCON INC CHF0.040000	Health Care	2.12	United States
SANDOZ GROUP AG CHF0.05	Health Care	2.08	Switzerland
SIKA AG CHF0.01	Materials	2.06	Switzerland
TECAN GROUP AG CHF0.10 (REGISTERED)	Health Care	1.91	Switzerland
SCHINDLER HOLDING AG PARTICIPATING CERTIFICATES CHF0.10	Industrial	1.90	Switzerland
GIVAUDAN SA CHF10	Materials	1.87	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

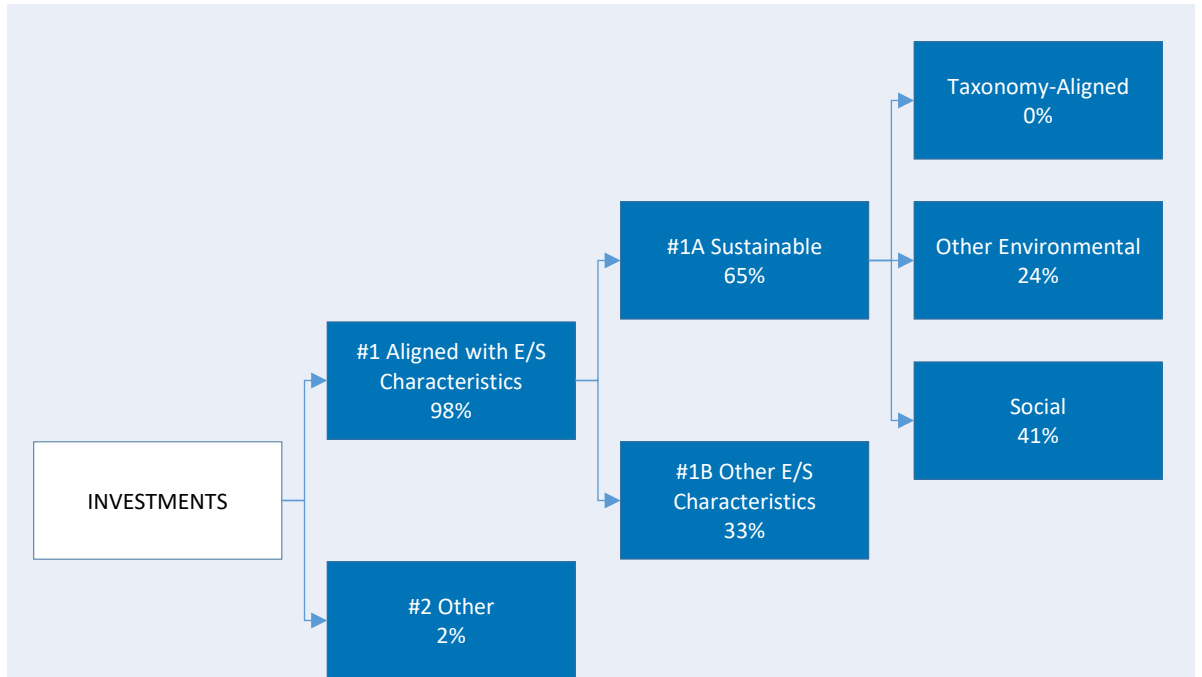

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a positive absolute sustainability score, and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned represents the average during the reference period, based on quarter-end data.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 24% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	28.65
Health Care	Health Care Equipment & Services	5.34
Financial	Financial Services	10.41
Financial	Insurance	9.09
Financial	Banking	0.85
Industrial	Capital Goods	11.97
Industrial	Transportation	1.70
Industrial	Commercial & Professional Services	0.58
Consumer Staples	Food, Beverage & Tobacco	12.66
Consumer Discretionary	Consumer Durables & Apparel	7.99
Materials	Materials	5.46
Information Technology	Technology Hardware & Equipment	2.62
Information Technology	Semiconductors & Semiconductor Equipment	0.62
Utilities	Utilities	1.37
Cash	Cash	0.69

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 24%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 41%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF UK Equity

**Legal Entity Identifier :** O3Z02YF8JZJN90D5MT95

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 56% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the FTSE All Share Total Return Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.5% and the benchmark's sustainability score for the reference period was -15.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 56% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	56
Jan 2023 - Dec 2023	69
Aug 2022 - Dec 2022	60

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	-0.5	-15.5
Jan 2023 - Dec 2023	-1.4	-18.2
Jan 2022 - Dec 2022	-1.5	-25.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	11
Corporate Governance	9
Human Rights	8
Natural Capital and Biodiversity	5
Human Capital Management	5
Diversity and Inclusion	4

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Asset allocation**  
describes the share of investments in specific assets.

## • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the FTSE All Share Total Return Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 56% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 26% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Consumer Discretionary	Media & Entertainment	11.61
Consumer Discretionary	Consumer Services	9.95
Consumer Discretionary	Consumer Discretionary Distribution & Retail	7.93
Consumer Discretionary	Consumer Durables & Apparel	4.93

Real Estate	Equity Real Estate Investment Trusts (REITs)	3.98
Cash	Cash	1.63

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

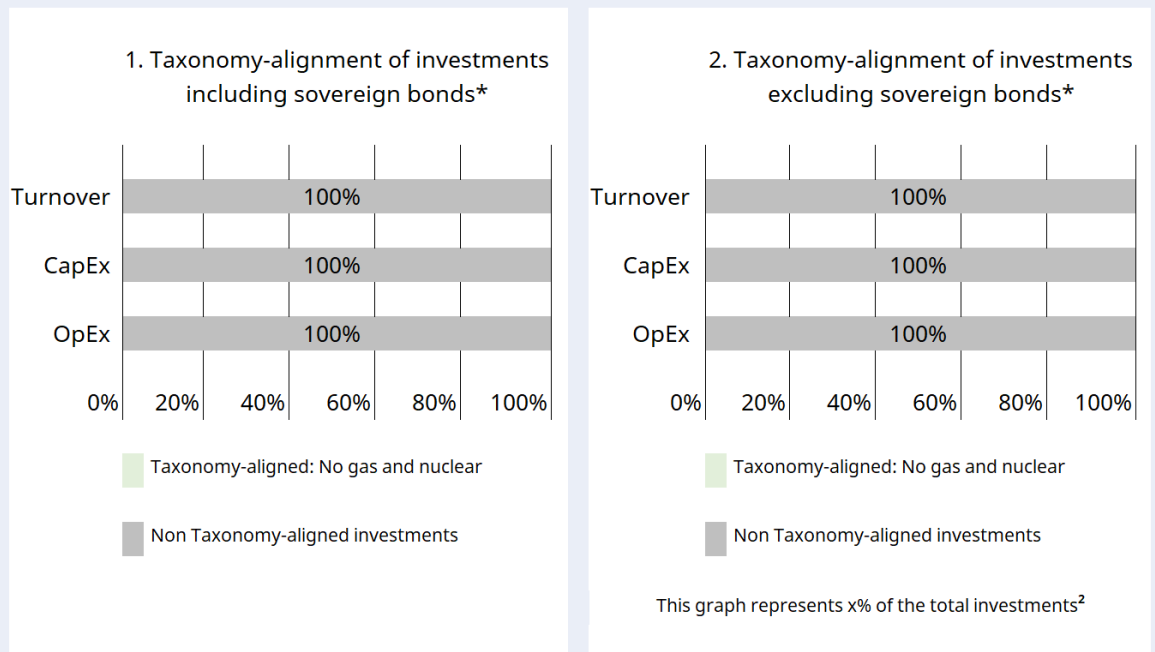

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 26%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 30%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Dividend Maximiser

**Legal Entity Identifier :** 5493008UI8R6FCP1MG15

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 64% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.1% and the benchmark's sustainability score for the reference period was -4.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- Donations
- Financial Inclusion
- High Salaries
- Innovation

The Investment Manager invested 64% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	64
Jan 2023 - Dec 2023	53
Aug 2022 - Dec 2022	50

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.1	-4.7
Jan 2023 - Dec 2023	-1.3	-3.2
Jan 2022 - Dec 2022	-1.5	-3.8

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

applications.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team has a number of proprietary tools to aid ESG analysis. At the company level, Asia CONTEXT is the main repository for the team’s ESG analysis. Asia CONTEXT provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. By expanding our information sources beyond company reporting, we build a more robust and balanced picture of a company’s performance and reduce our reliance on corporate disclosure. PAI indicators may be further reviewed via the Schrodgers PAI dashboard and Asia Context templates, and our investors may also consider a company’s SustainEx score as part of their ESG review.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schrodgers Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with investee companies on their approach to a net zero transition and setting emissions reduction targets, which relates to PAIs 1, 2 and 3. Other topics discussed with investee companies has included water intensity and management, related to PAI 8. All PAI indicators are monitored via Schrodgers PAI dashboard.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC Pacific ex Japan High Dividend Yield (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 64% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 23% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Banking	20.70
Financial	Insurance	7.09
Financial	Real Estate	7.03
Financial	Financial Services	3.73
Information Technology	Semiconductors & Semiconductor Equipment	23.99

Industrial	Capital Goods	1.11
Health Care	Health Care Equipment & Services	1.09
Real Estate	Real Estate Management & Development	-0.01
Real Estate	Equity Real Estate Investment Trusts (REITs)	-0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

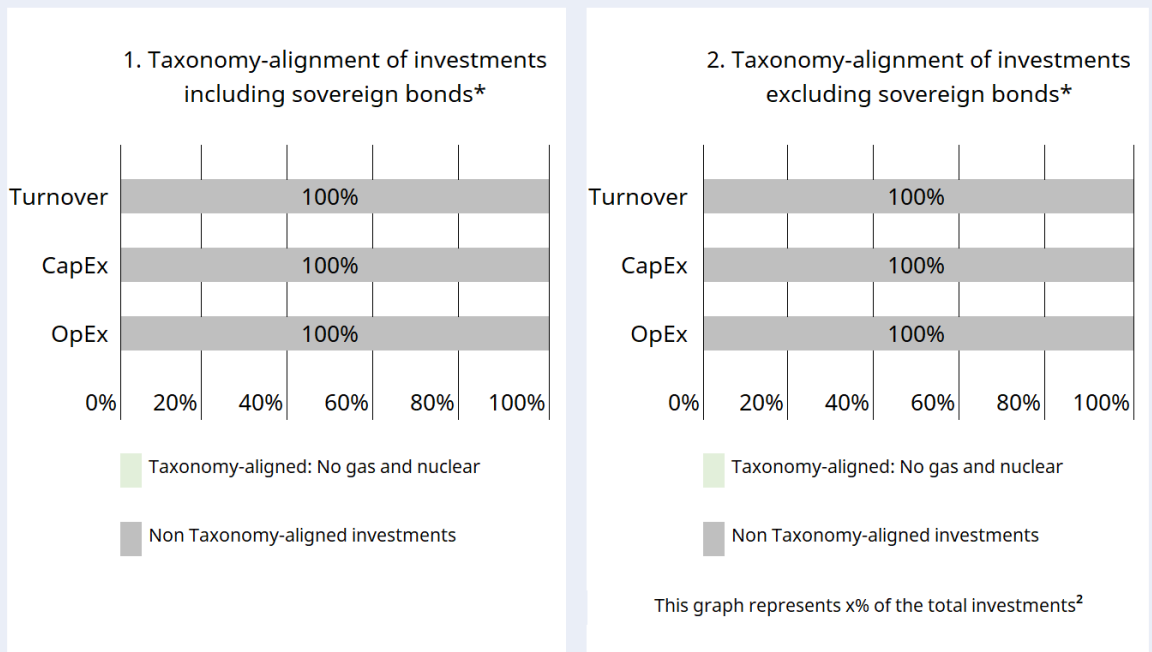

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 23%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 41%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Equity Impact  
**Legal Entity Identifier :** 549300VDHYBAVAYHQV19

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 30%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 66%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 75% of its assets in sustainable investments, which are investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) that were expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributes to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments is monitored daily via the Investment Manager's automated compliance controls.

The Investment Manager used a number of sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. The Investment Manager selected companies that will derive at least 50% of their revenues within three to five years from whose main activity is associated with one or more of the UN SDGs. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a company's products and services are expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review.

Once these steps were completed, the company and scorecard were then validated and approved by

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

The Investment Manager applies sustainability criteria when selecting investments for the Fund. The Investment Manager defines positive impact according to three key themes: (i) Climate Change (ii) Health & Well-being (iii) Social Development and Sustainable economy. Sustainable economy is a system that supports society and provides for a good quality of life while minimizing resource use and environmental harm in order to preserve natural resources for future generations, including the companies that facilitate such a system.

As at the end of the reference period, the companies in the Fund were aligned with the following three positive impact themes, which address mutually-exclusive SDGs: (1) 53% in Social Development and Sustainable Economy; (2) 25% in Healthcare; and (3) 22% in Climate Change.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	97
Apr 2023 - Dec 2023	97

### Impact Theme Breakdown

*This table details the percentage of assets invested in companies that align with each key Impact theme, year on year.*

Period	Social Development & Sustainable Economy (%)	Healthcare (%)	Climate Change (%)
Dec 2024	53.4	25.0	21.5
Dec 2023	50.6	25.7	23.7

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

matters, respect for human rights, anti-corruption and anti-bribery matters.

<https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom-up stock analysis at a company level. Portfolio holdings are reviewed on a proprietary scorecard that assesses the materiality of impact for each company amongst other dimensions of impact, which can consider a number of PAIs including PAI 1-3 (Greenhouse gas emissions). The Asian Equities Investment team used a proprietary tool which provides a framework for analysing a company's relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions). PAI indicators were also reviewed as appropriate via the Schroders PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership.

Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	13
Human Rights	2
Corporate Governance	1
Diversity and Inclusion	1
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

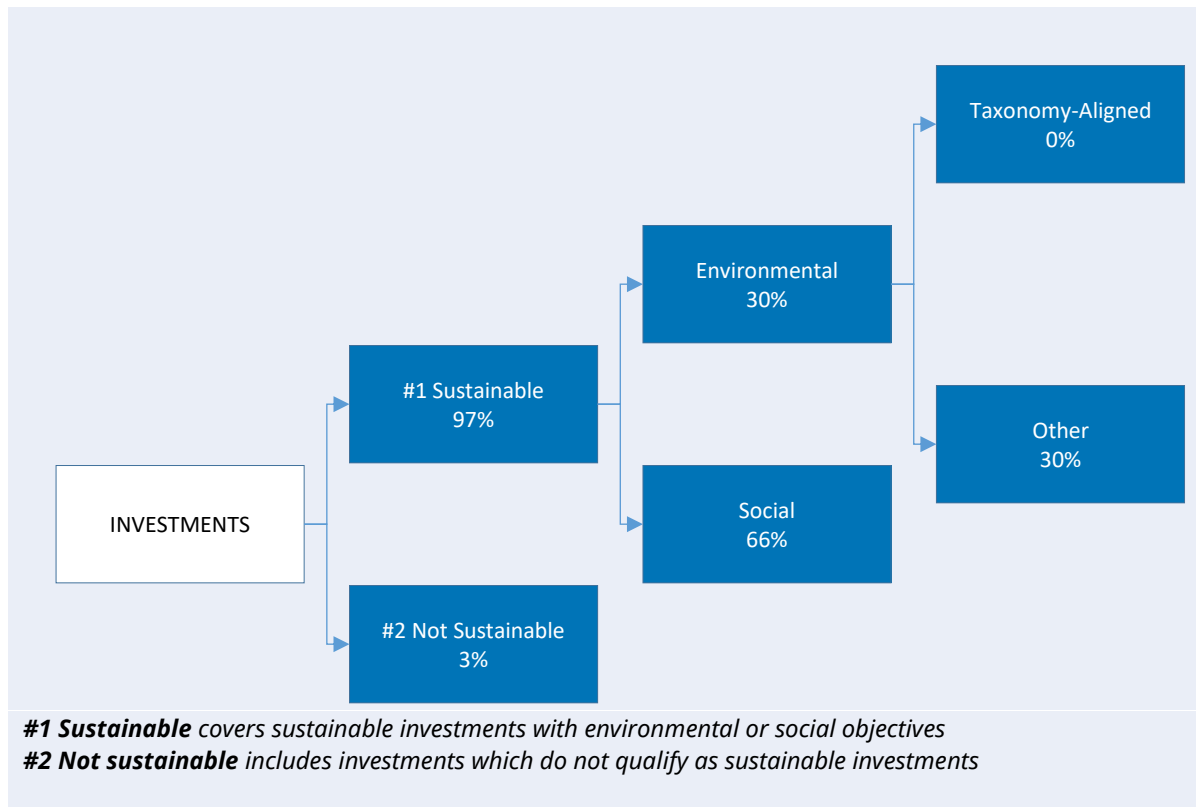

#1 Sustainable are investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) which were expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs.

The Fund invested 97% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 66% was invested in sustainable investments with a social objective.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Health Care	Health Care Equipment & Services	14.37
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	7.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## • *What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

## • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 66%.

## • *What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to attain the sustainable investment objective of the Fund were the following:

- The Fund invested at least 75% of its assets in sustainable investments, which were investments in Asia Pacific companies (excluding Japan) or companies which derive a significant proportion of their revenues or profits from Asia Pacific countries (excluding Japan) that were expected to contribute towards the advancement of an environmental or social objective linked to one or more of the UN SDGs;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- During the reference period the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focussed on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe; and

The Investment Manager also engaged with selected companies as part of a group-wide climate engagement programme. Topics included understanding these companies' pathways to net zero, encouraging the development of fossil fuel financing in line with best practices, and improving disclosures around climate metrics.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Equity Yield

**Legal Entity Identifier :** HW8T20METRZQAOYP1O66

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.1% and the benchmark's sustainability score for the reference period was -4.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	60

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.1	-4.2
Jan 2023 - Dec 2023	1.4	-5.6
Jan 2022 - Dec 2022	1.9	-10.0

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	17
Corporate Governance	4

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Diversity and Inclusion	3
Human Rights	2
Natural Capital and Biodiversity	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.74	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED PREFERENCE KRW5000	Information Technology	6.03	South Korea

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

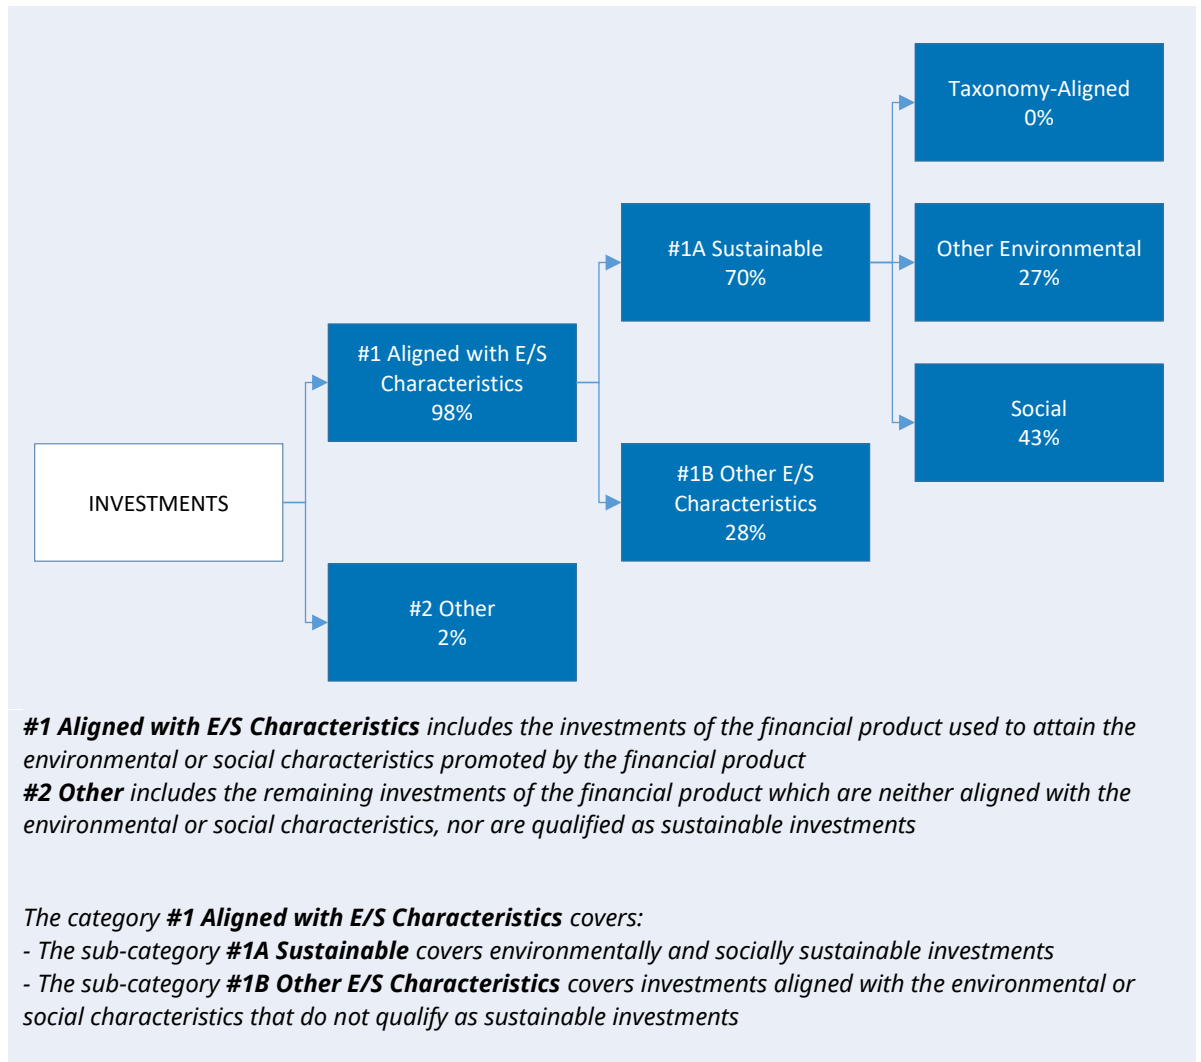

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan High Dividend Yield (net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 27% was invested in sustainable investments with an environmental objective and 43% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	19.85
Information Technology	Software & Services	6.39
Information Technology	Technology Hardware & Equipment	2.41
Financial	Banking	14.05
Financial	Insurance	5.35
Financial	Financial Services	3.31
Financial	Real Estate	2.24
Consumer Discretionary	Consumer Durables & Apparel	7.62
Consumer Discretionary	Consumer Services	4.21
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.46
Industrial	Capital Goods	7.18
Industrial	Transportation	2.23
Industrial	Commercial & Professional Services	1.36
Materials	Materials	7.38
Health Care	Health Care Equipment & Services	2.96
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.90
Communication Services	Telecommunication Services	2.17
Communication Services	Media & Entertainment	1.51
Utilities	Utilities	3.53
Cash	Cash	1.76
Consumer Staples	Consumer Staples Distribution & Retail	1.14

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 27%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 43%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Smaller Companies

**Legal Entity Identifier :** I42YR6PXBTSHDUSQQX75

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Ex Japan Small Cap (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 1.9% and the benchmark's sustainability score for the reference period was -1.8%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Training

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	68
Jan 2023 - Dec 2023	72
Aug 2022 - Dec 2022	64

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	1.9	-1.8
Jan 2023 - Dec 2023	1.9	-0.4
Jan 2022 - Dec 2022	1.4	-1.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	7
Corporate Governance	3

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Human Capital Management	1
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
CRYSTAL INTERNATIONAL GROUP HKD0.01	Consumer Discretionary	3.23	Hong Kong
CHROMA ATE INCORPORATED TWD10	Information Technology	3.21	Taiwan

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

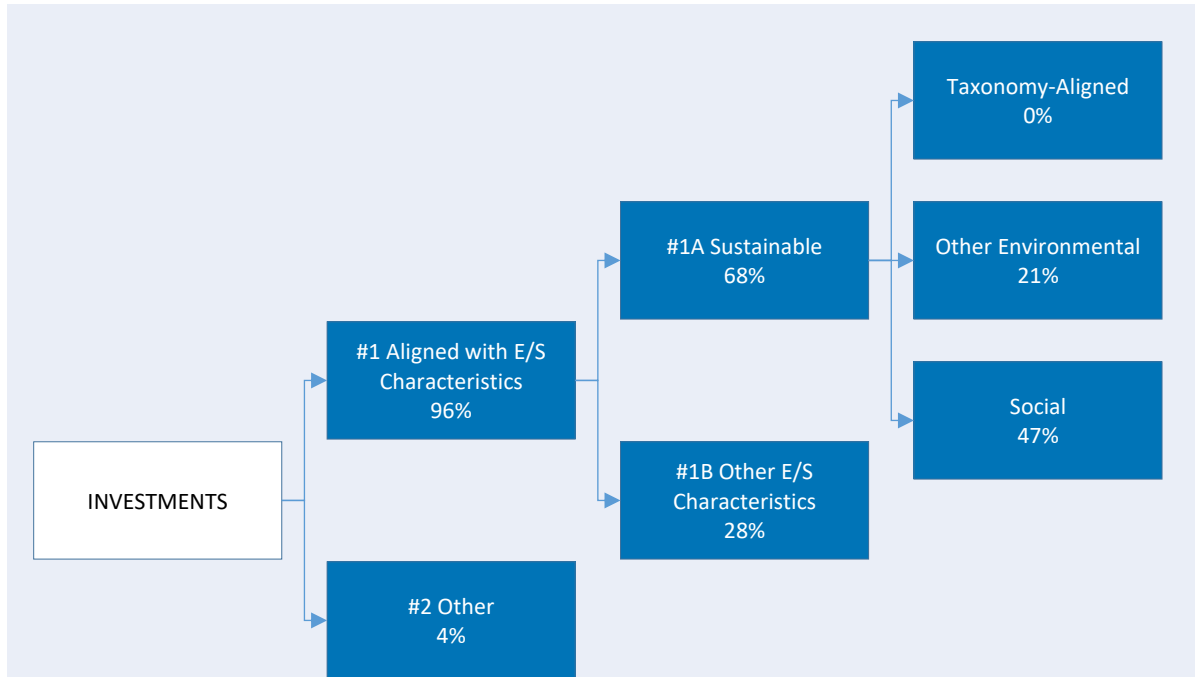

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Ex Japan Small Cap (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 47% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Durables & Apparel	14.41
Consumer Discretionary	Automobiles & Components	4.54
Consumer Discretionary	Consumer Discretionary Distribution & Retail	3.56
Consumer Discretionary	Consumer Services	2.68
Consumer Discretionary	Media & Entertainment	1.55
Industrial	Capital Goods	14.57
Industrial	Commercial & Professional Services	2.79
Industrial	Transportation	1.47
Financial	Real Estate	9.42
Financial	Financial Services	5.69
Financial	Banking	2.18
Information Technology	Technology Hardware & Equipment	10.18
Information Technology	Semiconductors & Semiconductor Equipment	6.60
Information Technology	Software & Services	0.36
Health Care	Health Care Equipment & Services	5.82
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.64
Materials	Materials	5.64
Consumer Staples	Food, Beverage & Tobacco	2.63
Consumer Staples	Household & Personal Products	0.82
Cash	Cash	2.57
Utilities	Gas Utilities	0.88

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 47%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Asian Total Return  
**Legal Entity Identifier :** A3HSL7JNL11S4BK1H669

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 68% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -2.4%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Donations
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 68% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	68
Jan 2023 - Dec 2023	60
Aug 2022 - Dec 2022	58

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.2	-2.4
Jan 2023 - Dec 2023	-0.4	-2.6
Jan 2022 - Dec 2022	0.4	-3.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Donations: the estimated societal benefits from a company's philanthropic donations. Measured based on the monetary value of the sum donated;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	22
Human Rights	5

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Corporate Governance	5
Natural Capital and Biodiversity	4
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.75	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	5.37	South Korea

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

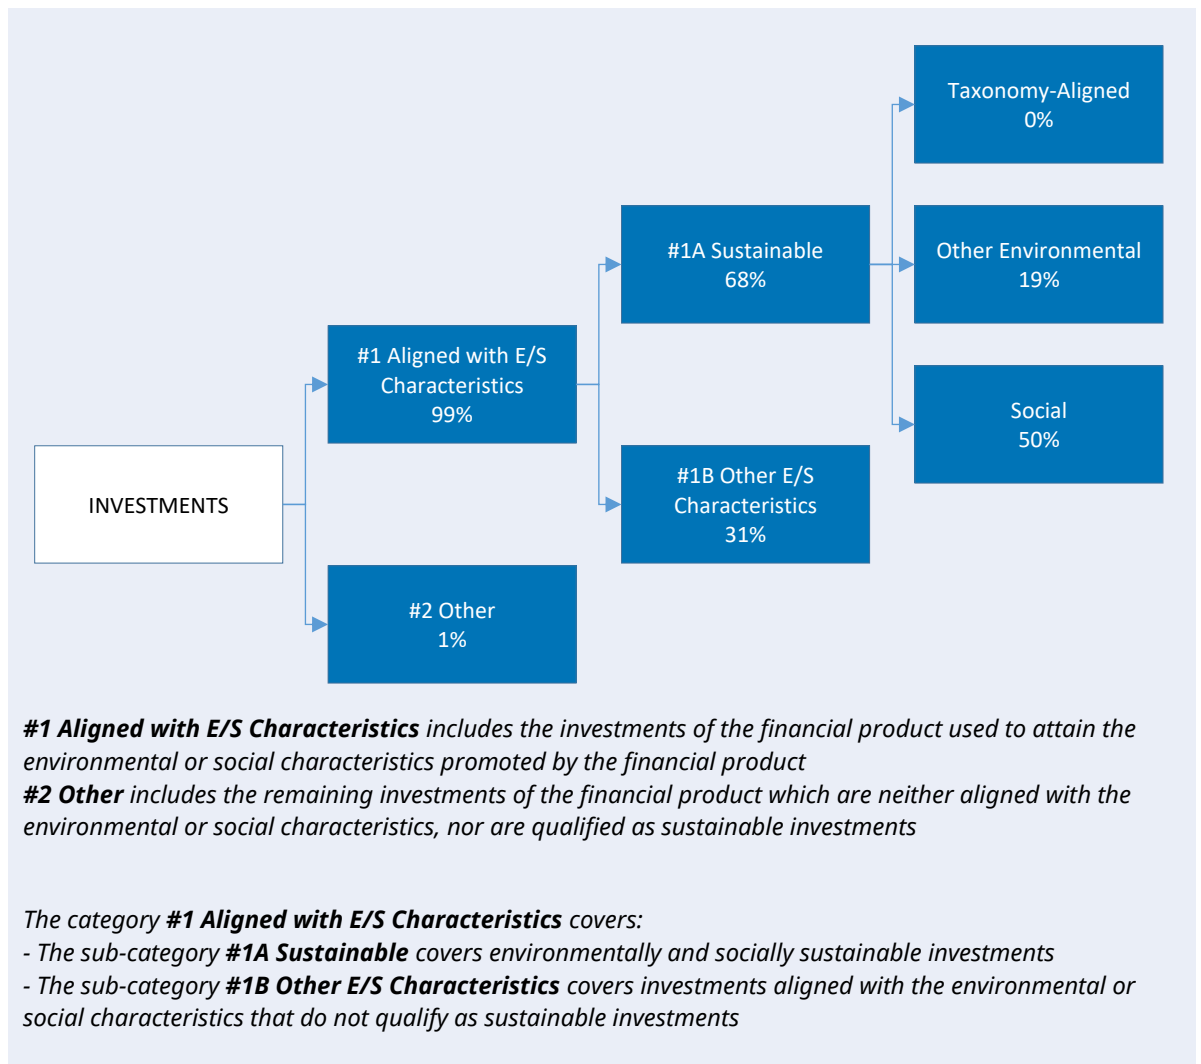

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI AC Asia Pacific ex Japan (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 68% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 19% was invested in sustainable investments with an environmental objective and 50% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• **In which economic sectors were the investments made?**

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	22.35

Derivatives	FX Derivatives	0.03

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

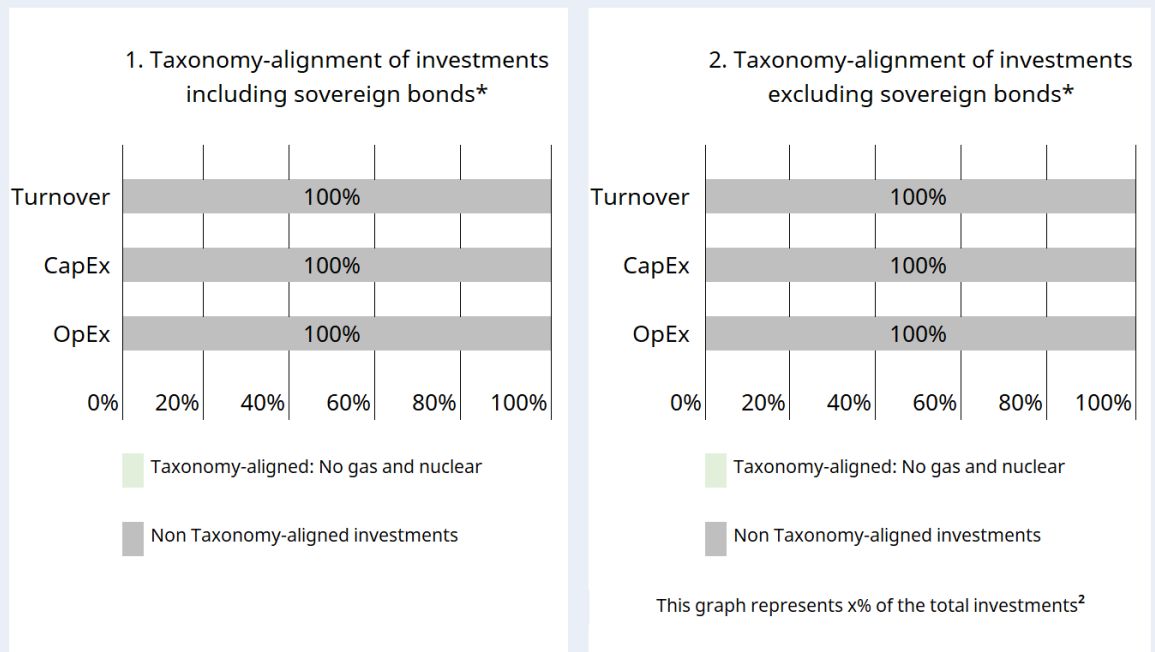

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 19%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 50%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF BIC (Brazil, India, China)

**Legal Entity Identifier :** LM0QRH514E4ICW7YYO70

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.6% and the benchmark's sustainability score for the reference period was -3.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Connectivity
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	61
Aug 2022 - Dec 2022	69

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.6	-3.2
Jan 2023 - Dec 2023	-0.3	-2.9
Jan 2022 - Dec 2022	4.0	-3.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team’s ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company’s performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	26
Corporate Governance	6
Human Rights	6
Natural Capital and Biodiversity	3
Human Capital Management	6
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TENCENT HOLDINGS LIMITED HKD0.00002	Information Technology	9.72	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

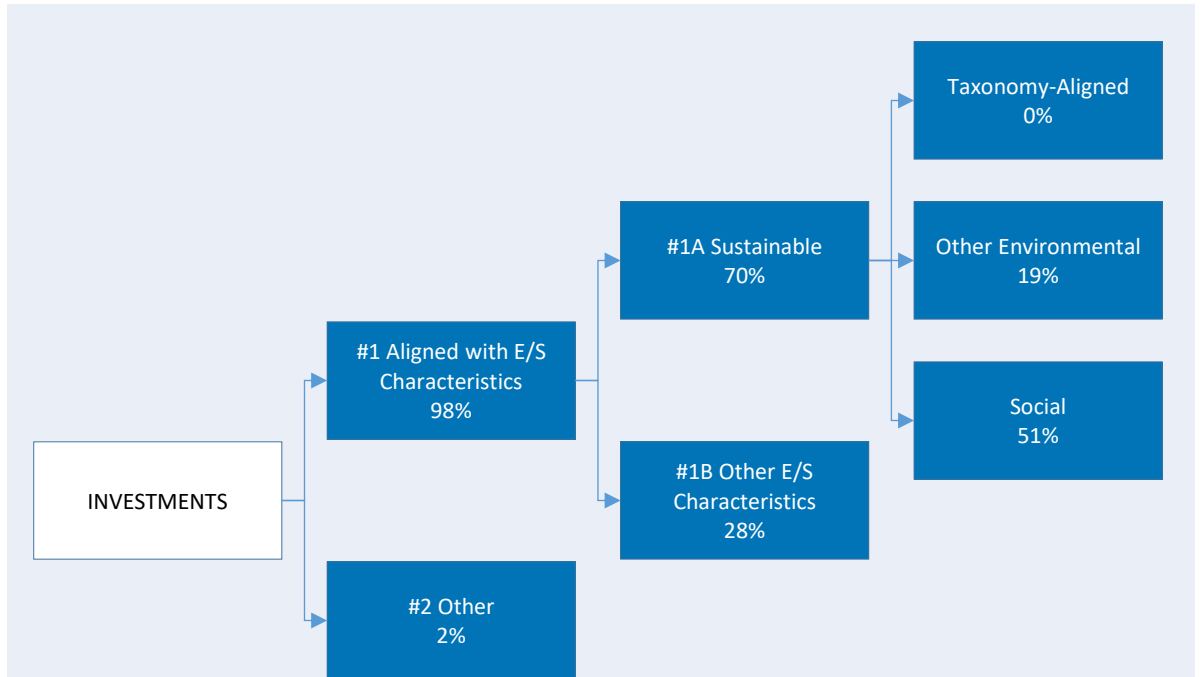

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI BIC (Net TR) 10/40 Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 19% was invested in sustainable investments with an environmental objective and 51% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Discretionary Distribution & Retail	15.42
Consumer Discretionary	Automobiles & Components	4.48
Consumer Discretionary	Consumer Durables & Apparel	3.33
Consumer Discretionary	Consumer Services	0.22
Financial	Banking	13.21
Financial	Insurance	4.36
Financial	Financial Services	1.49
Financial	Real Estate	1.14
Information Technology	Software & Services	15.10
Information Technology	Technology Hardware & Equipment	0.82
Information Technology	Semiconductors & Semiconductor Equipment	0.48
Energy	Oil & Gas Refining & Marketing	4.07
Energy	Integrated Oil & Gas	2.48
Energy	Oil & Gas Exploration & Production	0.96
Industrial	Capital Goods	7.38
Consumer Staples	Food, Beverage & Tobacco	3.37
Consumer Staples	Household & Personal Products	1.60
Consumer Staples	Consumer Staples Distribution & Retail	1.54
Communication Services	Media & Entertainment	2.54
Communication Services	Telecommunication Services	2.47
Materials	Materials	3.59
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	1.90
Health Care	Health Care Equipment & Services	1.68
Utilities	Utilities	3.39
Cash	Cash	2.13
Real Estate	Equity Real Estate Investment Trusts (REITs)	0.87

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 19%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 51%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Changing Lifestyles  
**Legal Entity Identifier :** 5493000OPXVHAW8N3B55

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.8% and the benchmark's sustainability score for the reference period was -2.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 76% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	76
Jan 2023 - Dec 2023	62
Aug 2022 - Dec 2022	67

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.8	-2.1
Jan 2023 - Dec 2023	0.2	-2.9
Aug 2022 - Dec 2022	-0.3	-4.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment research, stock selection and portfolio construction parts of the investment process. For example, in assessing an issuer’s overall environmental score, PAIs 1, 2, 3, 4, 5 and 6 were included. In assessing an issuer’s overall social score, PAIs 12 and 13 were included.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership. During the reference period, we engaged with an investee company on their plans to achieve net zero by 2050, which relates to PAIs 1, 2 and 3. All PAI indicators were monitored via Schroders’ PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
------------------	-----------

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Human Rights	9
Corporate Governance	7
Climate Change	5
Human Capital Management	4
Natural Capital and Biodiversity	3
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TJX COS INCORPORATED COMMON STOCK USD1	Consumer Discretionary	4.85	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

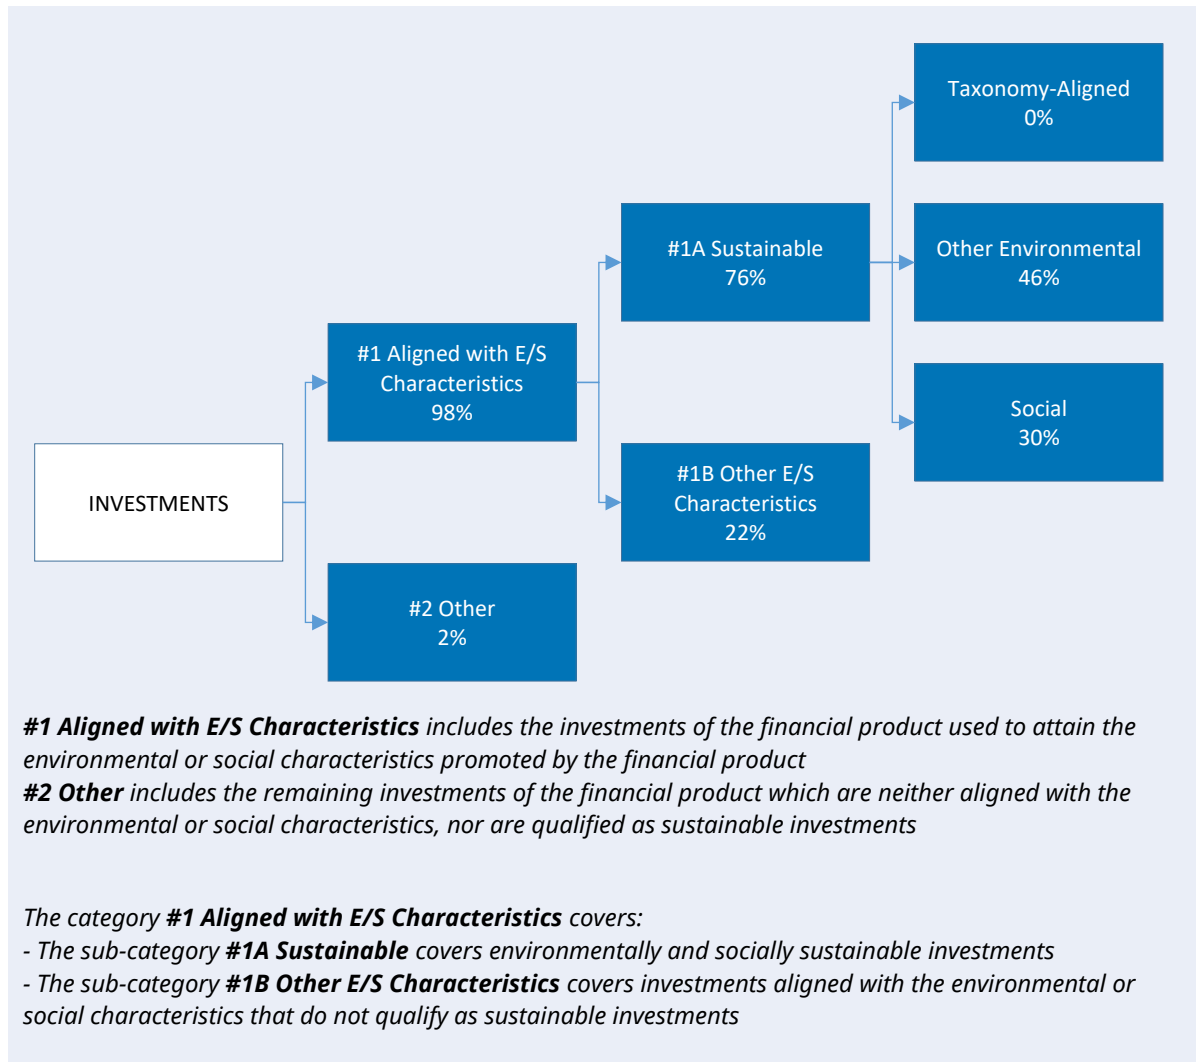

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI All Country World (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 76% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 30% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Consumer Discretionary	Consumer Discretionary Distribution & Retail	22.71
Consumer Discretionary	Consumer Durables & Apparel	12.57
Consumer Discretionary	Consumer Services	5.71
Consumer Discretionary	Automobiles & Components	4.12
Consumer Staples	Consumer Staples Distribution & Retail	9.36
Consumer Staples	Household & Personal Products	9.09
Consumer Staples	Food, Beverage & Tobacco	5.10
Information Technology	Software & Services	16.94
Information Technology	Technology Hardware & Equipment	1.73
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	4.34
Health Care	Health Care Equipment & Services	1.19
Communication Services	Media & Entertainment	3.08
Industrial	Capital Goods	0.96
Industrial	Transportation	0.91
Cash	Cash	1.73
Financial	Insurance	0.45

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 30%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF China A All Cap

**Legal Entity Identifier :** 5493000BXUD89QYZ9M71

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 65% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI China A Onshore (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was -0.1% and the benchmark's sustainability score for the reference period was -2.5%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 65% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	65
Jan 2023 - Dec 2023	63
Aug 2022 - Dec 2022	54

### Sustainability score

*his table details the Fund's and benchmark's sustainability score, year on year.*

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec	-0.1	-2.5
Jan 2023 - Dec	-1.6	-3.3
Aug 2022 - Dec	-4.6	-5.6

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schrodgers’ proprietary tool is the main repository for the team’s ESG analysis. Schrodgers’ proprietary tool provides a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schrodgers’ proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schrodgers’ proprietary tool but monitored instead at the overall portfolio level. We reviewed the PAI data in Schrodgers’ PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	16
Corporate Governance	2
Human Rights	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
PING AN INSURANCE GROUP COMPANY OF CHINA LIMITED A CNY1	Financial	4.35	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

sources.

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

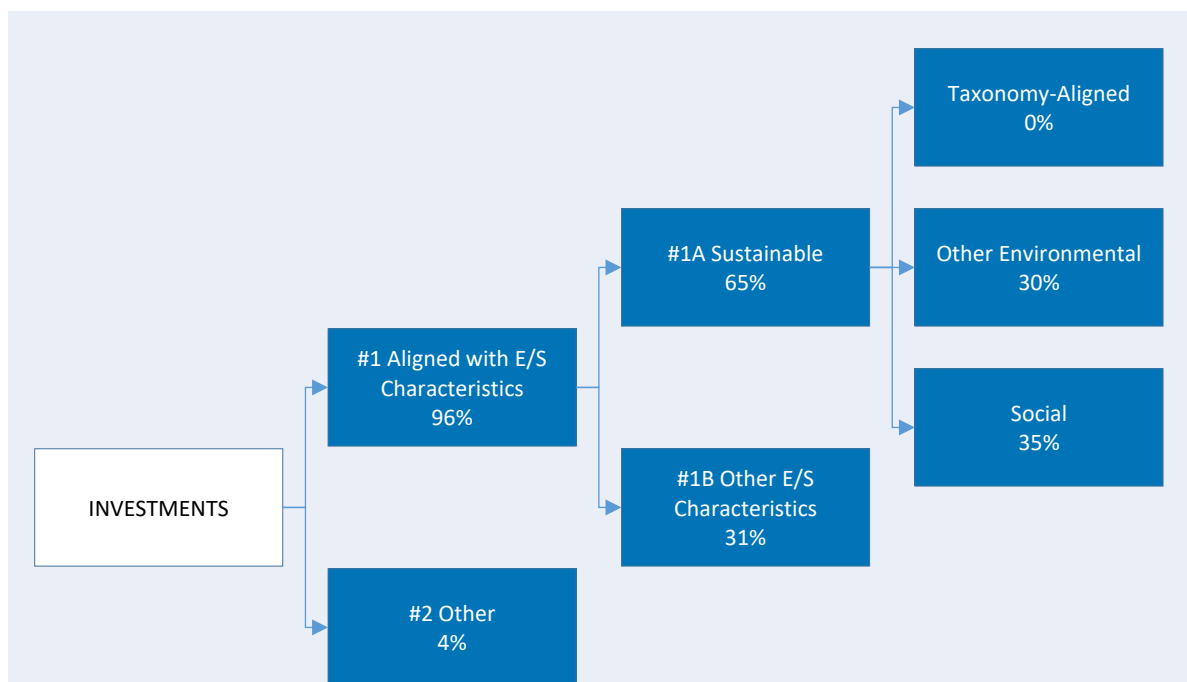

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI China A Onshore (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 65% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 30% was invested in sustainable investments with an environmental objective and 35% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	19.77
Industrial	Transportation	0.57
Information Technology	Semiconductors & Semiconductor Equipment	9.30
Information Technology	Technology Hardware & Equipment	9.24
Information Technology	Software & Services	1.59
Financial	Banking	6.13
Financial	Insurance	5.12
Financial	Financial Services	2.38
Financial	Real Estate	0.58
Consumer Discretionary	Automobiles & Components	5.39
Consumer Discretionary	Consumer Durables & Apparel	3.69
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.39
Consumer Discretionary	Consumer Services	0.84
Consumer Discretionary	Media & Entertainment	0.18
Materials	Materials	9.67
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	7.09
Health Care	Health Care Equipment & Services	1.43
Consumer Staples	Food, Beverage & Tobacco	6.75
Real Estate	Equity Real Estate Investment Trusts (REITs)	1.87
Utilities	Utilities	1.78
Communication Services	Media & Entertainment	1.46
Energy	Integrated Oil & Gas	1.42
Cash	Cash	1.36

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 30%.

### • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 35%.

### • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF China Opportunities

**Legal Entity Identifier :** CON8ADEN6LBWQO6J6710

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 74% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI China (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.2% and the benchmark's sustainability score for the reference period was -1.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Power Provision

The Investment Manager invested 74% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	74
Jan 2023 - Dec 2023	58
Sep 2022 - Dec 2022	59

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.2	-1.2
Jan 2023 - Dec 2023	-0.2	-1.5
Sep 2022 - Dec 2022	-0.6	-2.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

revenue; and

- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents)
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The Asian Equities investment team used a proprietary tool which provides a framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model and covers PAIs 1, 2, 3 and 6 (Greenhouse gas emissions).

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 (Greenhouse gas emissions) and 13 (Board gender diversity). All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	28

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Corporate Governance	6
Human Rights	4
Natural Capital and Biodiversity	4
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TENCENT HOLDINGS LIMITED HKD0.00002	Information Technology	9.75	China

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

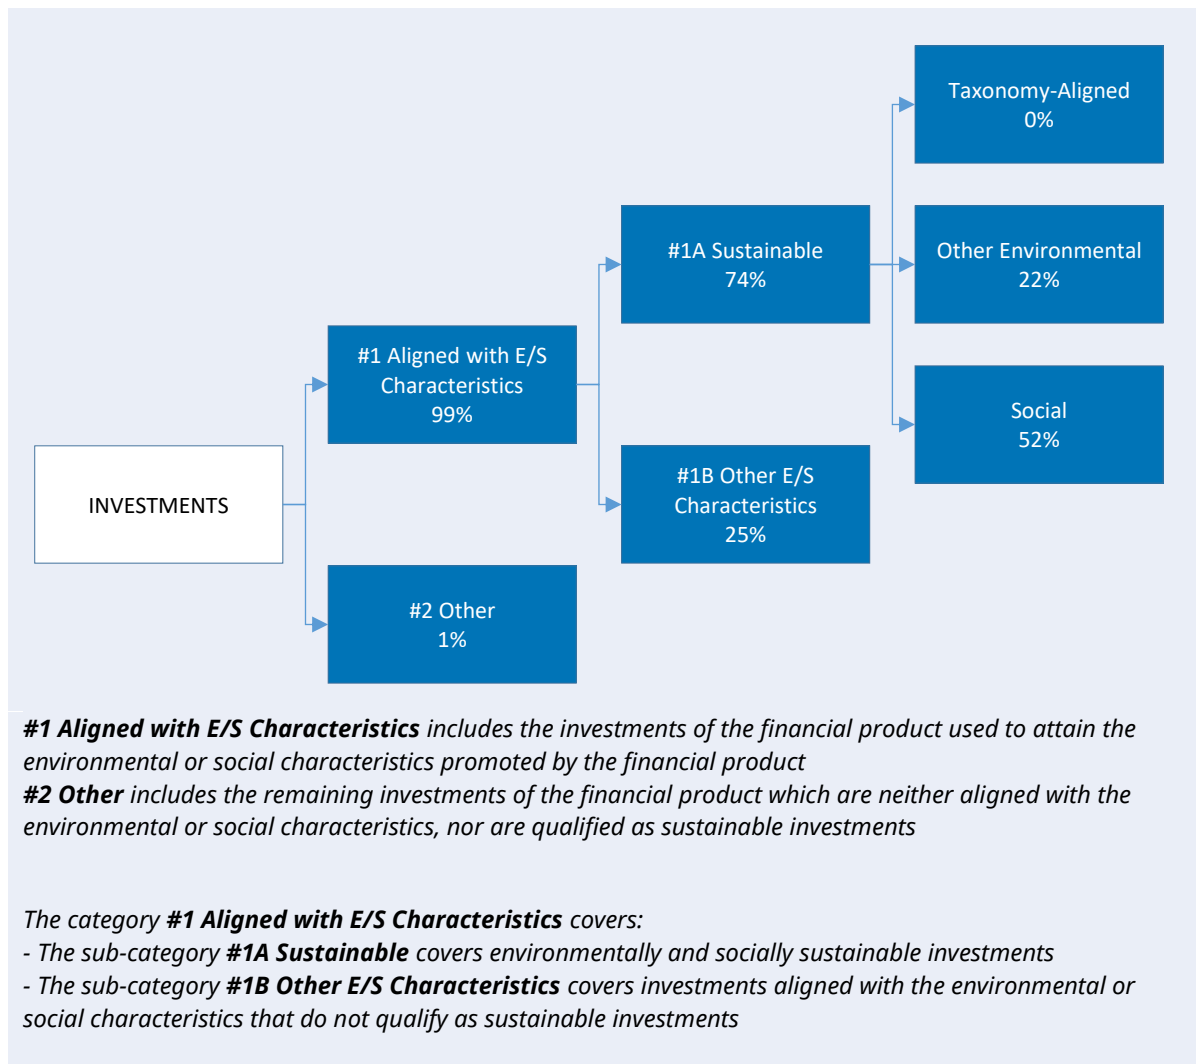

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI China (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 74% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 22% was invested in sustainable investments with an environmental objective and 52% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Communication Services	Media & Entertainment	1.49
Cash	Other	0.01
Cash	Cash	0.01

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

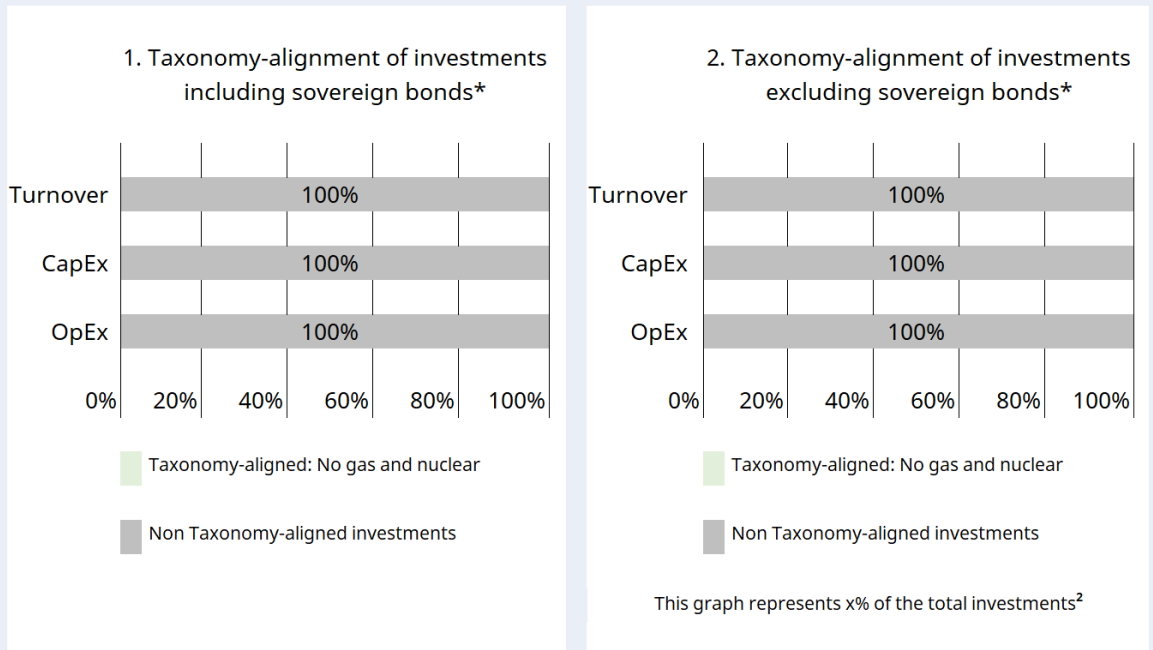

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

## Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

## Transitional activities

are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

### • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

### • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### • *What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?*

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 22%.

### • *What was the share of socially sustainable investments?*

The share of sustainable investments with a social objective was 52%.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund’s engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question ‘How did this financial product consider principal adverse impacts on sustainability factors?’. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

- ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

- ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Circular Economy  
**Legal Entity Identifier :** 549300ZGH24FGKHE0C51

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 98%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: 0%</b>	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments. Within this overall commitment, there is a minimum commitment to invest at least 75% of its assets in sustainable investments with an environmental objective. Sustainable investments are investments in companies worldwide that the Investment Manager expected to contribute towards the transition to a circular economy. Circular economy principles include, but are not limited to: reducing non-renewable raw material consumption, designing out waste and pollution, increasing levels of recycling, and keeping energy, labour and materials in more active use.

The Fund also invested in investments that the Investment Manager deemed to be neutral under its sustainability criteria, which was cash.

No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a revenue based approach in this assessment by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributes to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls. The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a revenue based approach to match an investee company to relevant UN SDGs. The Investment Manager also used a proprietary sustainability tool which rates companies based on their treatment of key stakeholders, including communities and the environment. Examples of the indicators included, but are not limited to, CO2 emissions, recycling rates, wastewater treatment, R&D investment, raw materials from sustainable sources and other qualitative assessments.

Subsequently, the Investment Manager used a number of indicators to derive a sustainability score out of ten for each company. Based on this score, each company was placed within one of the following categories: (1) Best-in-class, (2) Neutral and (3) Laggard. The indicators used to determine the score included but were not limited to metrics such as carbon intensity, board gender diversity and management remuneration. The information was drawn from company management meetings, publicly available corporate information as well as the Investment Manager's internal proprietary tools. The Investment Manager invested 50% of the portfolio in issuers classified as Best-in-class and 48% of the portfolio in issuers classified as Neutral. These figures were calculated as the average of the reference period based on quarter-end data. The Fund did not invest in any companies classified as

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Laggards during the reference period.

## • ...and compared to previous periods?

As this is our first reporting period, this question is not applicable.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## How were the indicators for adverse impacts on sustainability factors taken into account?

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derive revenues above certain thresholds from activities related to thermal coal: PAI 4 (Exposure to companies active in the fossil fuel sector) and PAI 5 (Share of non-renewable energy consumption and production).

During the reference period, PAIs were also considered through integration in the investment process. The Fund considered greenhouse gas emissions, carbon footprint, greenhouse gas intensity of investment companies and activities negatively affecting biodiversity-sensitive areas (PAI 1, 2, 3 and 7) in its analysis as part of the ‘environmental management’ component of the stakeholder analysis. As part of our analysis, we consider how a firm is managing its environmental footprint (including its impact on the climate), its negative impact on biodiversity, as well as its potential exposure to the effects of long-term climate change. While no single metric determines the overall assessment of a company’s environmental management score, the Fund evaluated a variety of different metrics – from both internal and external data sources (including a Schroders’ proprietary tool) – to determine whether a company is adequately managing its climate and environmental risks. In addition to these factors, PAIs 8 (Emissions to water) and 9 (Hazardous waste and radioactive waste ratio) were examined through the assessment of circular economy practices. PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered as part of our investment process using data from a Schroders’ proprietary tool. All PAI indicators were monitored via Schroders’ PAI dashboard.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in the Schroders Engagement Blueprint, which outlines our approach to active ownership.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme:

Engagement Theme	# Issuers
Climate Change	14
Natural Capital and Biodiversity	3
Human Rights	3
Corporate Governance	3

The engagements shown relate to engagements with companies and issuers.

During the year, we engaged with companies on two specific areas i) climate change and ii) resource efficiency

With regard to our climate change engagement, we are engaged with companies across a number of industries and sub-sectors with the aim of encouraging companies to set clear and measurable emissions reduction targets for all three scopes of emissions that are aligned to SBTi and where targets are already set, to ensure these targets are properly integrated into company remuneration policies.

With increasing concerns around resource efficiency and supply chain security across a number of sub-sectors, we engaged with a number of companies with regards to how they can become more efficient with the resources that they use in their operations and those that are used in their supply chains. We focussed mainly on i) raw material inputs ii) waste management iii) energy usage and emissions and iv) water usage.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

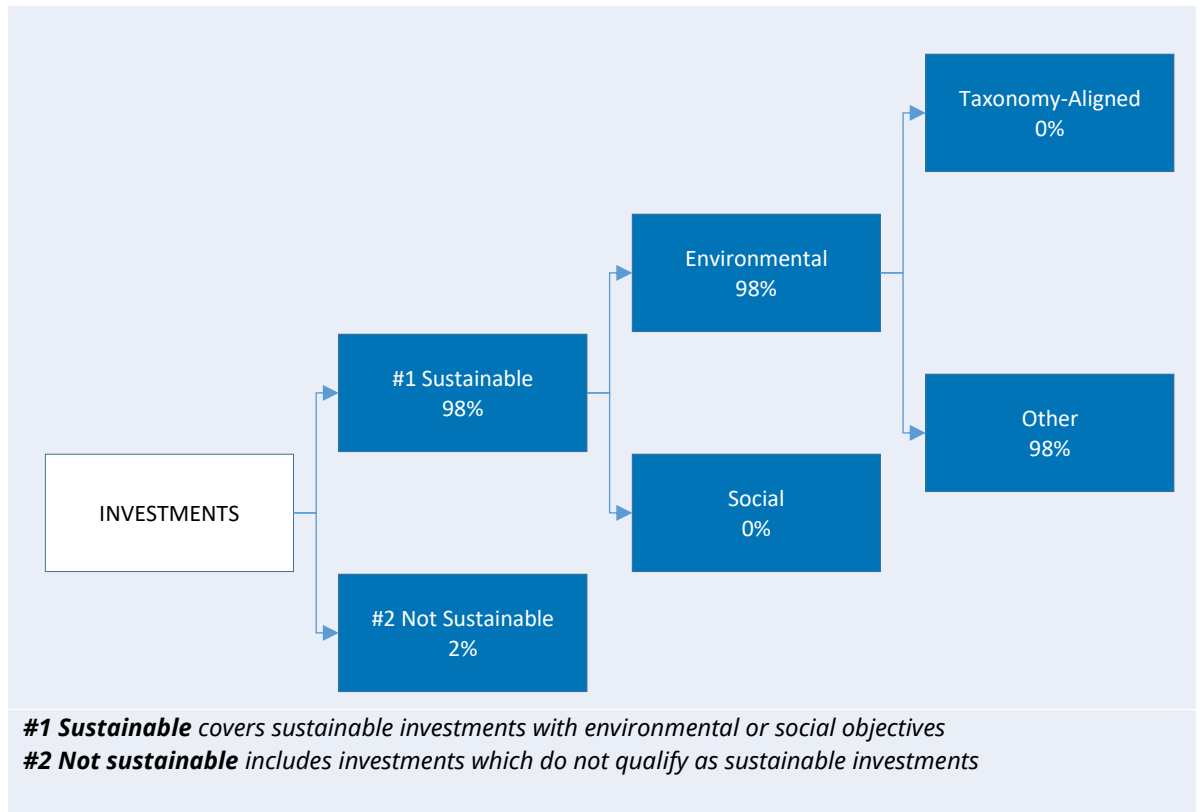

#1 Sustainable are investments in companies worldwide that the Investment Manager expected to contribute towards the transition to a circular economy.

The Fund invested 98% of its assets in sustainable investments with an environmental objective. This percentage represents the average of the reference period, based on quarter-end data.

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

• ***In which economic sectors were the investments made?***

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	34.67
Industrial	Commercial & Professional Services	23.70
Materials	Materials	19.22
Information Technology	Software & Services	7.28
Information Technology	Semiconductors & Semiconductor Equipment	2.80

Consumer Discretionary	Consumer Durables & Apparel	2.53
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.02
Cash	Cash	1.63
Consumer Staples	Food, Beverage & Tobacco	1.45

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

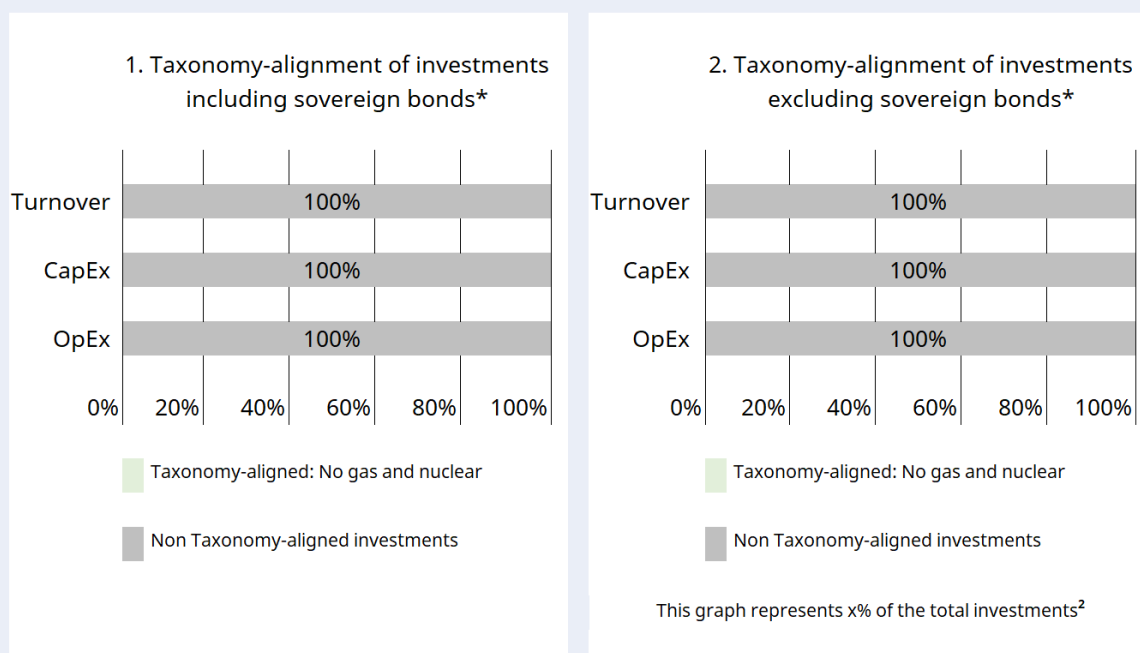

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have

## • What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

greenhouse gas emission levels corresponding to the best performance.

## • How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

All sustainable investments made by the Fund had environmental objectives that were not aligned with the EU Taxonomy.

## What was the share of socially sustainable investments?

There were no sustainable investments with a social objective.

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Fund invested at least 90% of its assets in sustainable investments which were investments in companies worldwide that the Investment Manager expected to contribute towards the transition to a circular economy. Circular economy principles include, but are not limited to: reducing non-renewable raw material consumption, designing out waste and pollution, increasing levels of recycling, and keeping energy, labour and materials in more active use;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies; and

During 2024 the Investment Manager conducted 23 dedicated sustainability engagements across the investible universe on a number of different topics, including but not limited to Climate Change, Natural Capital and Biodiversity, Human Rights, and Corporate Governance.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

### • How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

- *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 15 August 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Europe

**Legal Entity Identifier :** 84NPEABGB2F2O9O8EG57

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 67% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR), based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 15 August 2024, when the fund transitioned from Article 6 to Article 8, to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 5.9% and the benchmark's sustainability score for the reference period was 0.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Contraception
- Financial Inclusion
- High Salaries
- Medicine

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

## - Power Provision

The Investment Manager invested 67% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## *How were the indicators for adverse impacts on sustainability factors taken into account?*

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom-up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schrodgers proprietary tool is the main repository for the team's ESG analysis. Schrodgers proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schrodgers proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schrodgers proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schrodgers PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related net zero carbon emissions targets (PAI 1,2 and 3) and procuring renewable energy (PAI 5). Further topics of engagement included board gender diversity, which relates to PAI 13. Where issuers were flagged on lack of data availability on PAIs, the Investment Manager engaged with issuers with the primary focus to increase reporting, quality and availability of PAI data.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	4
Corporate Governance	3
Human Rights	2
Human Capital Management	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

**Asset allocation** describes the share of investments in specific assets.

## What was the proportion of sustainability-related investments?

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

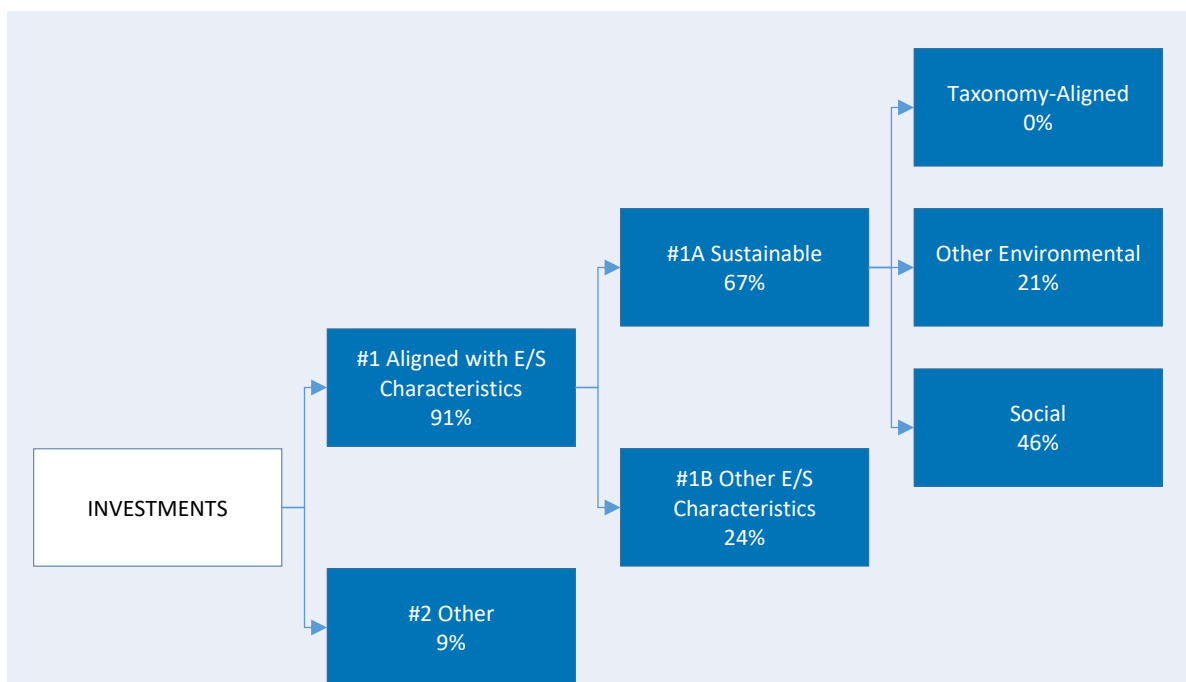

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 91%. The Fund maintained a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR) and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 67% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 21% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Financial	Banking	41.74
Financial	Financial Services	9.45
Financial	Insurance	3.49
Industrial	Transportation	5.39
Industrial	Commercial & Professional Services	1.44
Industrial	Capital Goods	1.19
Consumer Staples	Consumer Staples Distribution & Retail	5.88
Consumer Staples	Food, Beverage & Tobacco	1.54
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	6.40
Health Care	Health Care Equipment & Services	0.97
Consumer Discretionary	Consumer Durables & Apparel	4.87
Consumer Discretionary	Consumer Discretionary Distribution & Retail	1.68
Energy	Oil & Gas Refining & Marketing	4.15
Energy	Integrated Oil & Gas	2.14
Cash	Cash	5.93
Materials	Materials	3.59
Utilities	Utilities	0.15

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• ***What was the share of investments made in transitional and enabling activities?***

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

• ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 21%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 46%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders’ proprietary sustainability tool and so did not contribute towards the Fund’s sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders’ Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders’ proprietary tool, which supports the analysis of a counterparty’s management of environmental, social and governance trends and challenges.

Schroders’ Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

# SFDR Periodic Report (continued)

Reference Period: 15 August 2024 - 31 December 2024

• *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets

**Legal Entity Identifier :** BDU06UKEHWLI0JDDWF68

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 63% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.0% and the benchmark's sustainability score for the reference period was -3.3%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Innovation
- Power Provision

The Investment Manager invested 63% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	63
Jan 2023 - Dec 2023	54
Aug 2022 - Dec 2022	57

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	0.0	-3.3
Jan 2023 - Dec 2023	0.1	-2.9
Jan 2022 - Dec 2022	2.8	-3.2

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team’s ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company’s relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company’s performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Corporate Governance	61
Climate Change	48
Human Rights	16
Natural Capital and Biodiversity	8
Human Capital Management	8
Diversity and Inclusion	6

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

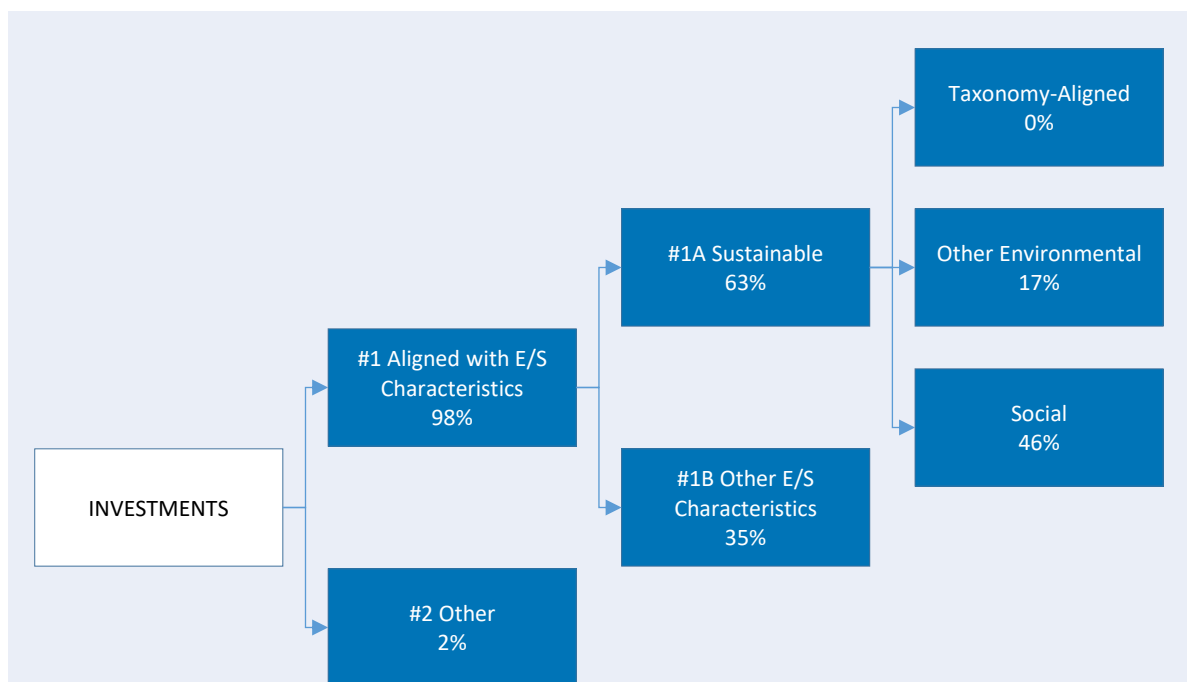

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 63% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 17% was invested in sustainable investments with an environmental objective and 46% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets

Utilities	Utilities	1.65

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 17%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 46%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets Equity Impact

**Legal Entity Identifier :** 5493000PBF2B6FI3QM81

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 40%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 58%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in companies that were expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term. The Fund also invested in cash, which the Investment Manager deemed to be neutral under its sustainability criteria.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributes to an environmental or social objective (as applicable), and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective (as applicable). Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the impact contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focuses on the impact that a company's products and services are expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review.

Once these steps were completed, the company and scorecard were then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

As at the end of the reference period, the companies in the Fund were aligned with the following five

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

key impact areas; (1) 28% in inclusion; (2) 13% in health and wellness; (3) 20% in environment; (4) 24% in sustainable infrastructure; and (5) 15% in responsible consumption.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

*This table details the percentage of assets invested in sustainable investments, year on year.*

Period	Fund (%)
Jan 2024 - Dec 2024	98
Jan 2023 - Dec 2023	97
Jan 2022 - Dec 2022	95

### Key Impact Areas

*This table details the breakdown of the sustainable investments by impact area at the end of the reference period.*

Period	Inclusion %	Health and Wellness %	Sustainable Infrastructure %	Environment %	Responsible Consumption %
Dec 2024	28	13	24	20	15
Dec 2023	32	22	21	15	10
Dec 2022	21	28	20	20	11

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC)

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom-up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas.

PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Corporate Governance	6
Human Rights	4
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

#1 Sustainable are investments in companies which were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term.

The Fund invested 98% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 40% was invested in sustainable investments with an environmental objective and 58% was invested in sustainable investments with a

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

social objective.

#2 Not sustainable includes cash, which was treated as neutral for sustainability purposes.

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	12.20
Industrial	Commercial & Professional Services	7.49

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

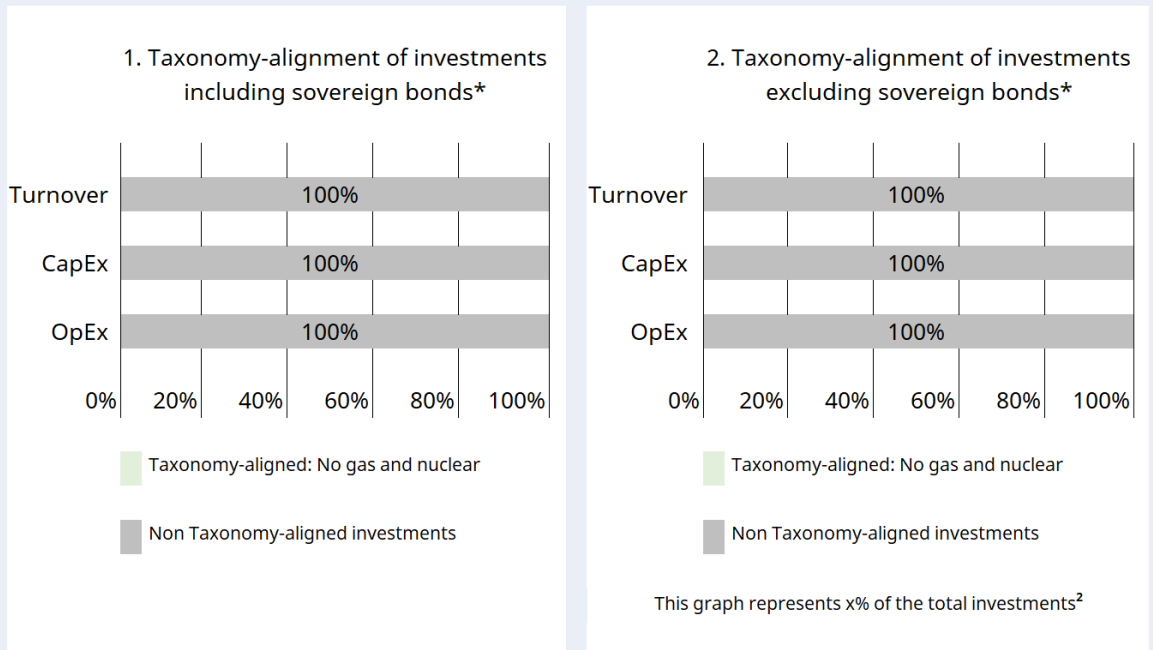

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 40%

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 58%

## What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash.

Minimum safeguards were applied where relevant to investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction, which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

- The Fund invested at least 90% of its assets in sustainable investments, which were investments in companies that were expected to contribute towards the advancement of one or more of the UN SDGs, to be managed in the interests of all stakeholders, and to deliver returns to shareholders over the long term. ;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- During the reference period, the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focused on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe;

## How did this financial product perform compared to the reference sustainable benchmark?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 26 June 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF Emerging Markets ex China

**Legal Entity Identifier :** 636700J6JW0DW2LOUW56

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> __%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 55% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> __%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 26 June 2024 (launch date) to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 0.3% and the benchmark's sustainability score for the reference period was -4.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Connectivity
- High Salaries
- Medicine
- Power Provision

The Investment Manager invested 55% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • *...and compared to previous periods?*

As this is our first reporting period, this question is not applicable.

## • *What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?*

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in proportion to a company's share of power provision revenues.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

## • *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

**Principal adverse impacts** are the most significant negative impacts of investment decisions on

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process through the bottom-up stock analysis at a company level. The emerging markets investment team has a number of proprietary tools to aid ESG analysis. At the company level, Schroders proprietary tool is the main repository for the team's ESG analysis. Schroders proprietary tools provide a systematic framework for analysing a company's relationship with its stakeholders and the sustainability of its business model. It contains more than 250 metrics drawn from company reports and other sources that assess a company's performance in specific areas. PAIs 1, 2, 3, 9 and 13 were specifically considered as part of the Schroders proprietary tool analysis where appropriate and material to the business. In the case of PAI 8 and 12 the availability of data was very limited so it was not widely used within Schroders proprietary tool but monitored instead at the overall portfolio level. All PAI indicators were monitored via Schroders PAI dashboard. We reviewed the PAI data in the PAI dashboard regularly as part of the monthly ESG risk meeting which formally reviews portfolio level ESG characteristics.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period, our engagements covered a range of topics including those related to PAIs 1, 2, 3, 5 and 13.

All PAI indicators were monitored via Schroders PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	19
Corporate Governance	10
Human Rights	6
Human Capital Management	4
Diversity and Inclusion	2
Natural Capital and Biodiversity	1

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **26 Jun 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFACTURING COMPANY LIMITED TWD10	Information Technology	9.85	Taiwan
SAMSUNG ELECTRONICS COMPANY LIMITED KRW100	Information Technology	6.23	South Korea

BHARTI AIRTEL LIMITED INR5	Communication Services	1.79	India
ITAU UNIBANCO HOLDING SA ADR (EACH REPRESENTS 1 PREFERENCE SHARE)	Financial	1.66	Brazil
SK HYNIX INCORPORATED KRW5000	Information Technology	1.60	South Korea
HDFC BANK LIMITED INR1	Financial	1.60	India
Bank Central Asia PT	Financial	1.59	Indonesia
SISF FRONTIER MARKETS EQUITY I ACCUMULATION	Collective Investments	1.56	Luxembourg

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

### Asset allocation

describes the share of investments in specific assets.

#### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

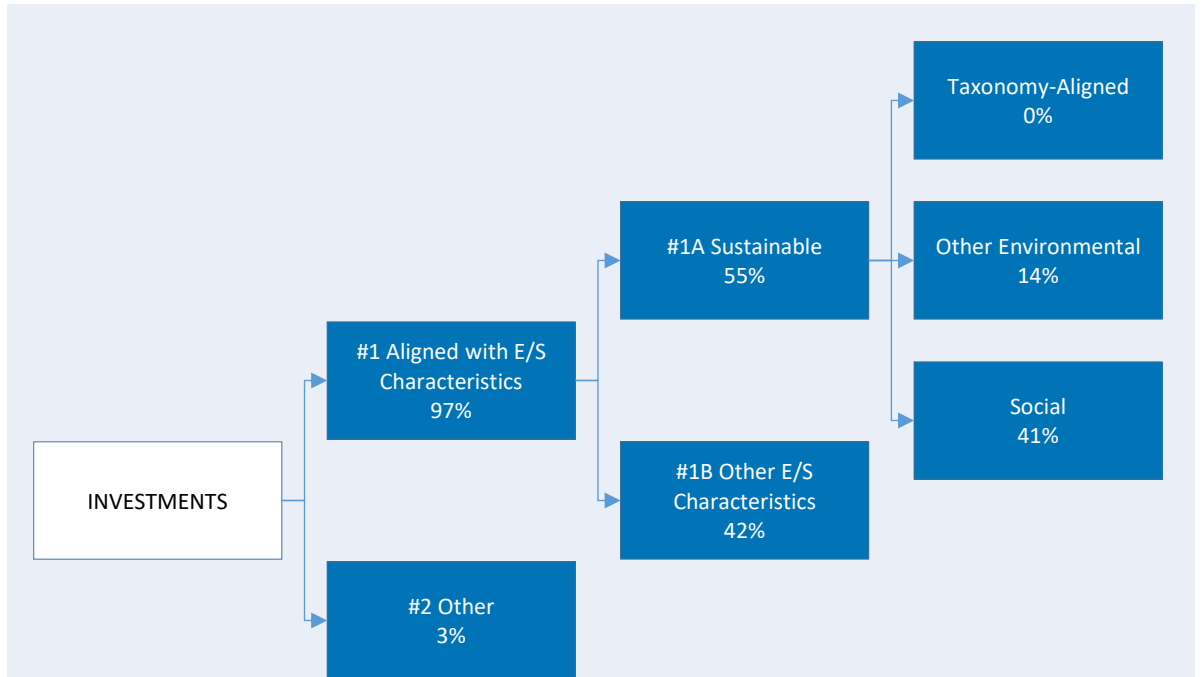

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 97%. The Fund maintained a higher overall sustainability score than the MSCI Emerging Markets ex China 10/40 (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 55% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 14% was invested in sustainable investments with an environmental objective and 41% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Information Technology	Semiconductors & Semiconductor Equipment	21.45
Information Technology	Technology Hardware & Equipment	7.80
Information Technology	Software & Services	4.61
Financial	Banking	23.42
Financial	Insurance	2.33
Financial	Real Estate	1.75
Financial	Financial Services	1.07
Consumer Discretionary	Automobiles & Components	3.71
Consumer Discretionary	Consumer Discretionary Distribution & Retail	2.14
Consumer Discretionary	Consumer Durables & Apparel	1.24
Consumer Staples	Consumer Staples Distribution & Retail	2.77
Consumer Staples	Food, Beverage & Tobacco	2.48
Consumer Staples	Household & Personal Products	0.57
Energy	Oil & Gas Refining & Marketing	2.75
Energy	Integrated Oil & Gas	1.54
Energy	Oil & Gas Exploration & Production	0.77
Industrial	Capital Goods	3.98
Industrial	Transportation	0.30
Materials	Materials	3.99
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	2.07
Health Care	Health Care Equipment & Services	0.85
Cash	Cash	2.53
Communication Services	Telecommunication Services	2.12
Communication Services	Media & Entertainment	0.08
Utilities	Utilities	2.13
Collective Investments	Unit Trusts	1.56

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

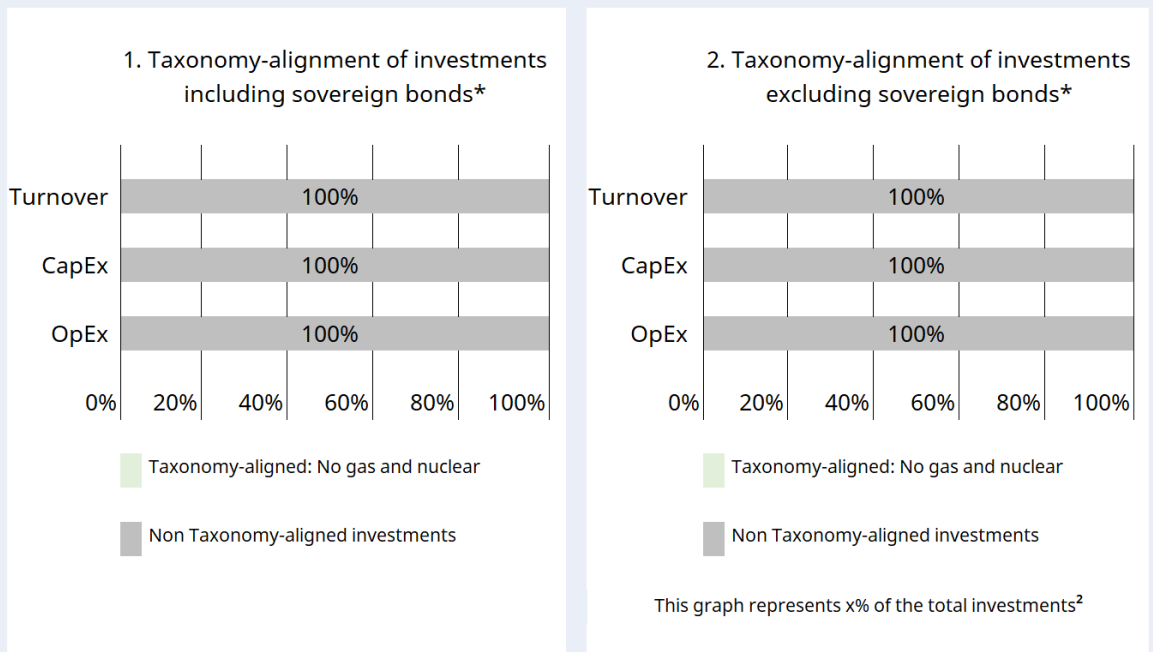

Taxonomy-aligned activities are expressed as a share of:

**- turnover**  
reflecting the share of revenue from green activities of investee companies

**- capital expenditure**  
(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## • **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 14%.

## • **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective was 41%.

## • **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 26 June 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Dividend Maximiser

**Legal Entity Identifier :** 5G167LY8W47ZFOL7Z717

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: \_\_%**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: \_\_%**

It promoted E/S characteristics, but **did not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained

i) a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system; and

ii) a carbon intensity score below that of the MSCI Europe (Net TR) Index, based on the Weighted Average Carbon Intensity (WACI).

This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

Carbon intensity is a measure of a portfolio's exposure to carbon-intensive companies. It is expressed as the carbon emissions per million dollars of revenue and displayed as metric tons CO<sub>2</sub>e / \$M revenue. The carbon intensity is measured using data from a third party provider. Where a data point is not available, the provider may make use of estimated data.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

Disclaimer: Certain information © MSCI ESG Research LLC. Reproduced by permission.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.4% and the benchmark's sustainability score for the reference period was -3.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Avoided Emissions
- Connectivity
- Contraception
- High Salaries
- Medicine

The Fund's Weighted Average Carbon Intensity (WACI) for the reference period was 77 CO<sub>2</sub>e/\$M and the benchmark's Weighted Average Carbon Intensity for the reference period was 82 CO<sub>2</sub>e/\$M. This means that the Fund's WACI over the reference period was lower than the benchmark's WACI over the same period, based on quarter-end data, using data from a third party provider.

The Investment Manager invested 69% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	69
Jan 2023 - Dec 2023	67
Aug 2022 - Dec 2022	67

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.4	-3.6
Jan 2023 - Dec 2023	3.4	-5.2
Jan 2022 - Dec 2022	2.7	-8.1

### Carbon exposure

This table details the Fund's and benchmark's carbon exposure, year on year.

Period	Fund (tCO <sub>2</sub> €/M)	Benchmark (tCO <sub>2</sub> €/M)
Jan 2023 - Dec 2023	1.9	6.3
Jan 2022 - Dec 2022	3.1	6.4

### Carbon intensity

This table details the Fund's and benchmark's carbon intensity, year on year.

Period	Fund (tCO <sub>2</sub> €/M)	Benchmark (tCO <sub>2</sub> €/M)
Jan 2024 - Dec 2024	77	82

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Until 23 March 2024 the Fund had a commitment to maintain a lower carbon exposure than the benchmark. On 24 March 2024 this commitment was changed to maintain a lower carbon intensity than

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

the benchmark. Previous data is still shown for reference.

**• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Connectivity: the estimated societal benefits from companies' that enable or support the connection of communities through telecommunication services;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schrodgers' proprietary tool which incorporated several as a component of its scoring methodology; for instance, PAIs 12 (Unadjusted gender pay gap) and 13 (Board gender diversity) were considered using data from our internal Schrodgers' proprietary tool.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including Natural Capital and Biodiversity in the metals & mining sector, and climate & net zero commitments for companies held within the Healthcare, Industrials and Technology sectors. These engagements related to PAIs including 7 (activities negatively affecting biodiversity-sensitive areas) and 1 and 2 (GHG emissions and Carbon Footprint). As part of Schrodgers' central climate priorities list, we engaged with investee companies within our universe to understand how companies are responding to the challenges climate change may pose to their long-term financial position. In reference to PAI 1, 2, 3, 7 & voluntary PAI 1, we continued our efforts to encourage companies to set clear emissions reduction targets for all three scopes of emissions and where targets are already set, to ensure these targets were properly integrated into company remuneration policies where it is material. We also continued to encourage companies to eliminate commodity-driven deforestation activities by 2025 and participate in the Schrodgers' wide deforestation engagement initiative where a holding of ours is flagged as at risk. All PAI indicators are monitored via Schrodgers PAI dashboard.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	30
Corporate Governance	23
Human Rights	13
Diversity and Inclusion	8
Natural Capital and Biodiversity	7
Human Capital Management	5

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

Reference Period: 1 January 2024 - 31 December 2024

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
SIEMENS AG NPV (REGISTERED)	Industrial	4.61	Germany
INTESA SANPAOLO SPA EURO.52	Financial	4.41	Italy
SAP SE NPV	Information Technology	4.35	Germany
SWISS RE AG CHF0.10	Financial	3.99	United States
NOVO NORDISK CLASS B DKK0.1	Health Care	3.76	Denmark
ASML HOLDING NV EURO.09 (POST SPLIT)	Information Technology	3.76	Netherlands
KONINKLIJKE KPN NV EURO.04	Communication Services	3.48	Netherlands
NOVARTIS AG CHF0.50 (REGISTERED)	Health Care	3.31	Switzerland
SVENSKA HANDELSBANKEN AB SERIES A NPV	Financial	3.16	Sweden
SSE PLC ORDINARY 50P	Utilities	3.14	United Kingdom
SKANDINAVISKA ENSKILDA BANKEN AB SERIES 'A' NPV	Financial	3.12	Sweden
ENERGIAS DE PORTUGAL SA EUR1	Utilities	2.83	Portugal
SKF AB SERIES 'B' NPV (POST SPLIT)	Industrial	2.79	Sweden
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	2.38	United States
RECKITT BENCKISER GROUP ORDINARY 10P	Consumer Staples	2.37	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 99%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they

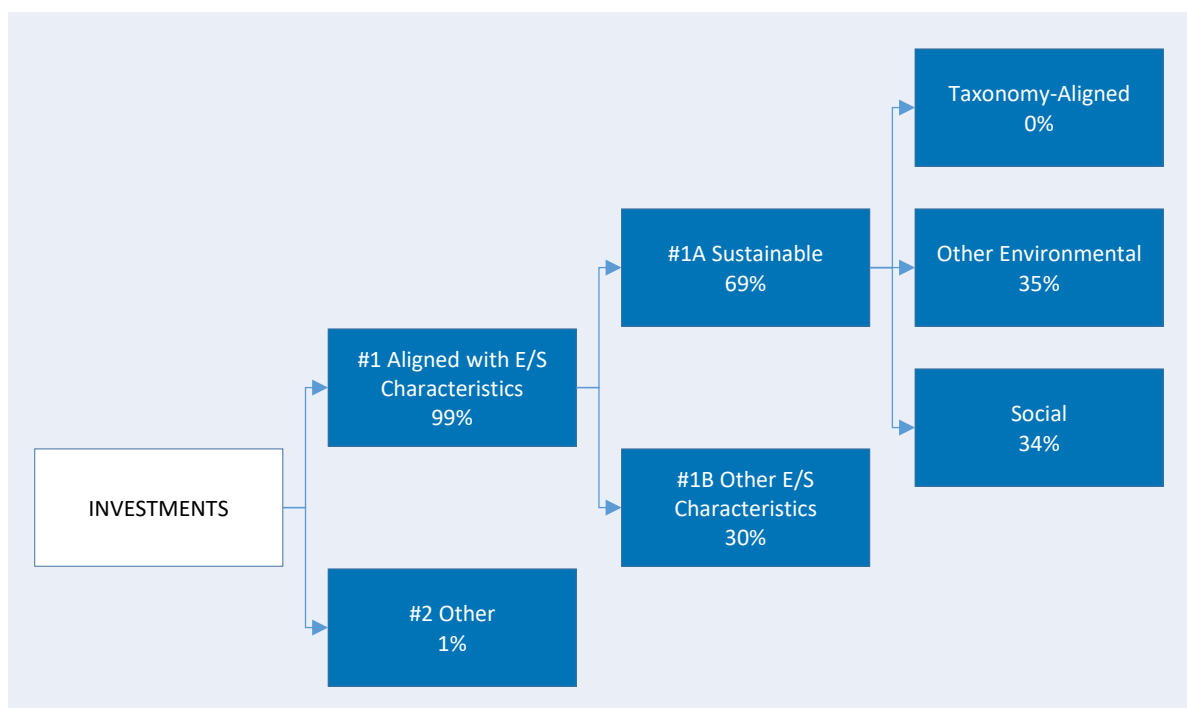

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 69% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 35% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments

- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Financial	Banking	15.13
Financial	Insurance	6.44
Financial	Financial Services	1.28
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	13.73
Health Care	Health Care Equipment & Services	1.55
Industrial	Capital Goods	13.01
Information Technology	Semiconductors & Semiconductor Equipment	6.18
Information Technology	Software & Services	4.61
Information Technology	Technology Hardware & Equipment	1.45
Consumer Staples	Household & Personal Products	6.03
Consumer Staples	Food, Beverage & Tobacco	3.83
Consumer Staples	Consumer Staples Distribution & Retail	0.34
Consumer Staples	Food Bevg Tobacco	-0.01
Consumer Discretionary	Media & Entertainment	2.55
Consumer Discretionary	Consumer Services	1.68
Consumer Discretionary	Consumer Durables & Apparel	1.58
Consumer Discretionary	Automobiles & Components	1.51
Consumer Discretionary	Consumer Discretionary Distribution & Retail	0.58
Utilities	Utilities	5.93
Communication Services	Telecommunication Services	4.88
Communication Services	Media & Entertainment	-0.01
Materials	Materials	4.22
Energy	Oil & Gas Refining & Marketing	0.96
Energy	Oil & Gas Exploration & Production	0.55
Energy	Oil & Gas Storage & Transportation	0.51
Cash	Cash	1.48

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 35%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 34%.

## What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash, which was treated as neutral for sustainability purposes and covered call options for income generation purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score and carbon intensity of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Equity Impact

**Legal Entity Identifier :** OZ21W1QBRG4B97S8ZE25

## Sustainable investment objective

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes  No

<input checked="" type="checkbox"/> It made <b>sustainable investments with an environmental objective: 46%</b>	<input type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	<input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made <b>sustainable investments with a social objective: 49%</b>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was met.

The Fund invested at least 90% of its assets in sustainable investments, which are investments in European companies that the Investment Manager expected to contribute positive impact by advancing an environmental or social objective linked to one or more of the UN SDGs using a science or engineering-driven, innovation-led approach. The Fund also invested in cash used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

The Investment Manager selected companies from a universe of eligible companies that were determined as meeting the Investment Manager's impact criteria. The impact criteria included an assessment of the company's contribution to the UN SDGs alongside the Investment Manager's assessment of the company via its proprietary scorecard. The investment process was aligned with the Operating Principles for Impact Management.

No reference benchmark was designated for the purpose of attaining the sustainable investment objective.

The reference period for this Fund is 1 January 2024 to 31 December 2024. On 8 May 2024 the Fund's name and strategy changed from Schroder ISF European Innovators to Schroder ISF European Equity Impact.

**Sustainability indicators** measure how the sustainable objectives of this financial product are attained.

### • How did the sustainability indicators perform?

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data.

The Investment Manager was responsible for determining whether an investment met the criteria of a sustainable investment. The Investment Manager used a combination of a revenue based approach in this assessment, by considering whether a certain percentage of the relevant issuer's revenues, capital expenditure or operating expenditure contributed to an environmental or social objective and specific sustainability key performance indicators to assess the investment's contribution to an environmental or social objective. Compliance with the minimum percentage in sustainable investments was monitored daily via our automated compliance controls.

The Investment Manager used different sustainability indicators to measure the contribution at an investee company level. In particular, the Investment Manager used a quantitative screening tool to identify companies that derive a certain minimum percentage of their revenues from whose main activity is contributing to an environmental or social objective. In addition, there was a detailed impact assessment of every company via the completion of a proprietary scorecard. The impact scorecard focused on the impact that a company's products and services were expected to have. The Investment Manager considered different aspects of impact such as: what outcome and UN SDGs the company is contributing to; who is served by the outcome (such as the relevant stakeholder or industry); an assessment of our expected contribution (including Schroders influence and engagement); and consideration of impact risks. The assessment included tracking Key Performance Indicators (KPIs) that are used to measure and monitor the company's impact over time via an annual review. Examples of the indicators included, revenues generated via the production or distribution of energy-efficient products, or services using a science or engineering-driven approach to reduce CO2 emissions such as natural refrigerants or eco-friendly heat pumps.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Once these steps were completed, the company and scorecard were then validated and approved by Schroders' Impact Assessment Group (IAG), in order for the company to be eligible for inclusion in the Fund's investible universe. The IAG consists of members from Schroders' impact and sustainable investment teams and members of the investment team.

At the end of the reference period, the companies in the Fund were aligned with the following key impact areas; (1) 51% in climate & sustainable infrastructure; (2) 24% in health and wellbeing; (3) 12% in inclusion; and (4) 7% in responsible consumption & production.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework. The Fund did not invest in any issuers within this exclusionary criteria.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	95
Jan 2023 - Dec 2023	95
Jan 2022 - Dec 2022	90

As this is our first reporting period as an Impact strategy, this is our first year reporting key impact areas.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • How did the sustainable investments not cause significant harm to any sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## ***How were the indicators for adverse impacts on sustainability factors taken into account?***

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and from July 2023 Schroders' 'global norms' breach list which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs are considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporates several PAIs as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Engagements may cover a range of topics, including pollution and waste in the chemicals sector, and climate and net zero commitments for held companies within the technology sector. These engagements relate to PAIs 7, 8 and 9 (Negative affects to biodiversity-sensitive areas, emissions to water and hazardous waste) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production ).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
Climate Change	12
Human Rights	7
Corporate Governance	5
Natural Capital and Biodiversity	3
Diversity and Inclusion	3
Human Capital Management	2

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	6.66	Netherlands

LONZA AG CHF1(REGISTERED)	Health Care	3.43	Switzerland

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • What was the asset allocation?

The Fund's investments that were used to meet its sustainable investment objective are summarised below.

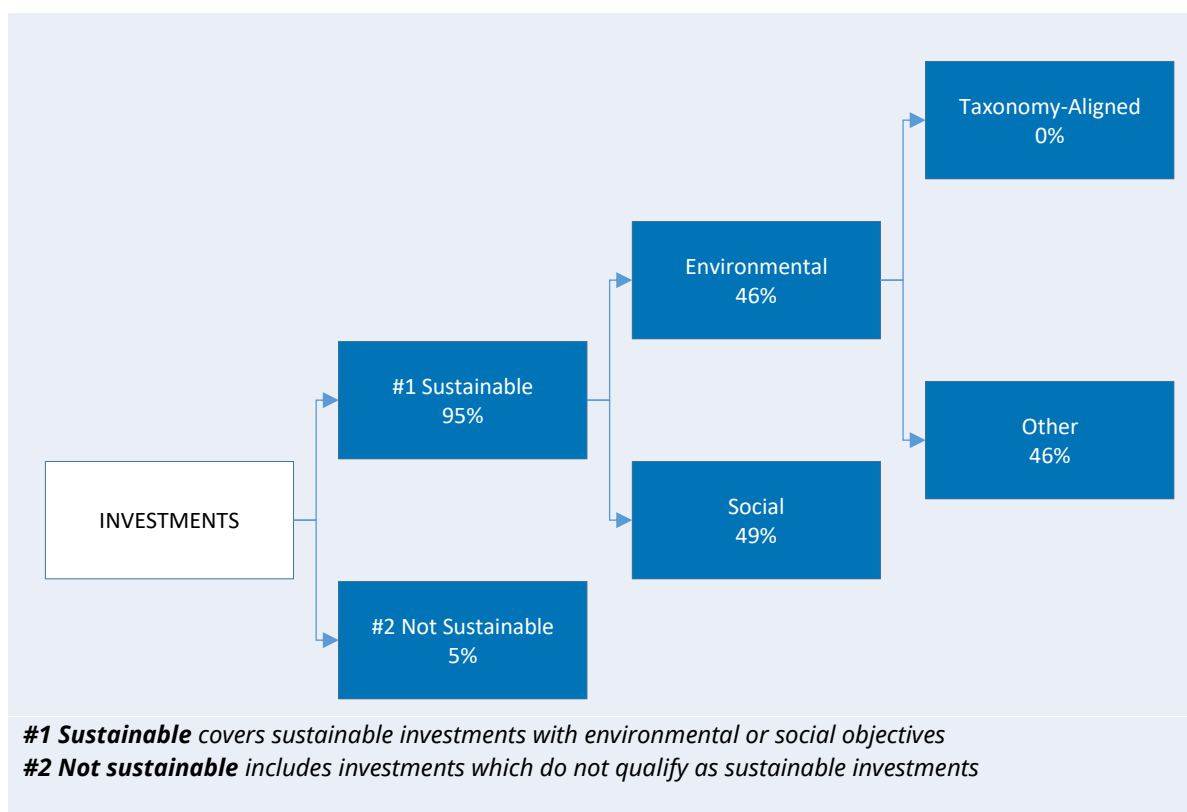

#1 Sustainable are investments in European companies that contributed towards the advancement of one or more of the UN SDGs using a science or engineering-driven, innovation-led approach.

The Fund invested 95% of its assets in sustainable investments. This percentage represents the average of the reference period, based on quarter-end data. Within this, 46% was invested in sustainable investments with an environmental objective and 49% was invested in sustainable investments with a social objective.

#2 Not sustainable includes cash used with the aim of reducing risk (hedging) or managing the Fund more efficiently, which were treated as neutral for sustainability purposes.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	29.45
Industrial	Commercial & Professional Services	6.60
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	15.23
Health Care	Health Care Equipment & Services	9.21
Information Technology	Semiconductors & Semiconductor Equipment	12.60
Information Technology	Technology Hardware & Equipment	4.55
Materials	Materials	11.27
Consumer Discretionary	Media & Entertainment	6.42
Cash	Cash	4.68

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

### • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

- Yes:
- In fossil gas  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

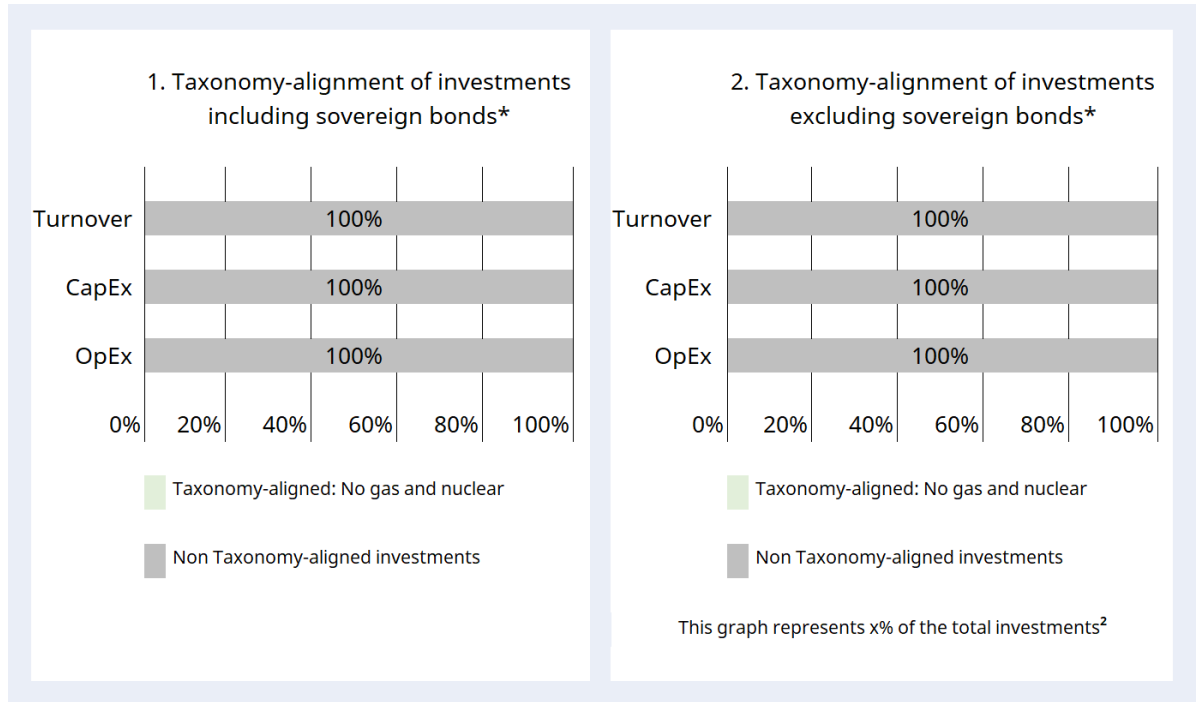

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.*

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**- capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

**- operational expenditure** (OpEx) reflecting green operational activities of investee companies.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

**• What was the share of investments made in transitional and enabling activities?**

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

**• How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

This question is not applicable.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 46%

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 49%

## What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

#2 Not sustainable includes investments that were treated as neutral for sustainability purposes, which was cash used with the aim of reducing risk (hedging) or managing the Fund more efficiently.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken during the reference period to meet the sustainable investment objective of the Fund were the following:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- The Fund invested at least 90% of its assets in sustainable investments, which were investments in European companies that the Investment Manager expected to contribute positive impact by advancing by advancing an environmental or social objective linked to one or more of the UN SDGs using a science or engineering-driven, innovation-led approach;
- The Fund invested in companies that did not cause significant environmental or social harm;
- A central good governance test was applied to assess good governance practices of investee companies;
- During the year the Investment Manager conducted a number of engagements across the key themes such as climate change, diversity and inclusion, human rights and natural capital. Of particular note were a number of impact engagements, focused on increasing the impact of, or improving the impact measurement of, products and services offered by companies in the investible universe; and
- In addition, the Investment Manager worked on a mass engagement project during the reference period which encouraged companies within the portfolio to set net zero emissions transition plans as well as an engagement programme to improve board gender diversity both of which will remain priorities into the next reference period.

## How did this financial product perform compared to the reference sustainable benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

No index was designated as a reference benchmark for the purpose of attaining the sustainable investment objective of the Fund.

### • *How does the reference benchmark differ from a broad market index?*

This question is not applicable for this Fund.

### • *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the reference benchmark?*

This question is not applicable for this Fund.

### • *How did this financial product perform compared with the broad market index?*

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Smaller Companies

**Legal Entity Identifier :** 1J9TCPI0PE5175IZP193

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 73% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe Small Cap (NDR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.1% and the benchmark's sustainability score for the reference period was 0.2%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Medicine
- Power Provision
- Sanitation

The Investment Manager invested 73% of the Fund's assets in sustainable investments. This figure represents the average percentage of sustainable investments during the reference period, based on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.1	0.2
Jan 2023 - Dec 2023	3.7	0.4
Jan 2022 - Dec 2022	1.4	0.4

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

Until 31 July 2023, the Fund's benchmark was the EMIX European Smaller Companies (TR) Index. Since 1 August 2023 the benchmark has been the MSCI Europe Small Cap (NDR) Index.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue;
- Power Provision: the estimated societal benefits of access to power and electricity. Assigned in

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

proportion to a company's share of power provision revenues; and

- Sanitation: the estimated societal benefits associated with the provisions of products and services that tackle poor sanitation, lack of safe water and hygiene. Assigned in proportion to company market share of global revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## **• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## **How did this financial product consider principal adverse impacts on sustainability factors?**

The Investment Manager's approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders' proprietary tool which incorporated several as a component of its scoring methodology.

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below:

<b>Engagement Theme</b>	<b># Issuers</b>
Corporate Governance	10

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Climate Change	9
Natural Capital and Biodiversity	5
Human Capital Management	2
Human Rights	2
Diversity and Inclusion	1

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
CRANSWICK PLC ORDINARY 10P	Consumer Staples	3.52	United Kingdom
CTS EVENTIM AG & CO KGAA NPV	Consumer	3.32	Germany
HALMA PLC ORDINARY 10P	Discretionary Information Technology	3.14	United Kingdom
WEIR GROUP PLC (THE) ORDINARY 12.5P	Industrial	3.01	United Kingdom
DO AND CO AG NPV	Consumer Discretionary	2.87	Austria
D'IETEREN GROUP NPV	Consumer Discretionary	2.66	Belgium
FLUIDRA SA NPV	Industrial	2.54	Spain
NEXANS SA EUR1	Industrial	2.54	France

HEMNET GROUP AB NPV	Communication Services	2.40	Sweden
BRITISH LAND COMPANY PLC REIT 25P	Financial	2.23	United Kingdom
TELECOM PLUS PLC ORDINARY 5P	Utilities	2.22	United Kingdom
AKER BP ASA NOK1	Energy	2.19	Norway
ROTORK PLC ORDINARY 0.5P	Industrial	2.16	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation** describes the share of investments in specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI Europe Small Cap (NDR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

The Fund invested 73% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 44% was invested in sustainable investments with an environmental objective and 29% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	22.81
Industrial	Commercial & Professional Services	1.39
Consumer Discretionary	Consumer Durables & Apparel	6.18
Consumer Discretionary	Consumer Discretionary Distribution & Retail	5.44
Consumer Discretionary	Media & Entertainment	4.30
Consumer Discretionary	Consumer Services	2.87
Information Technology	Software & Services	8.59
Information Technology	Technology Hardware & Equipment	7.01
Information Technology	Semiconductors & Semiconductor Equipment	2.56
Financial	Banking	4.56
Financial	Financial Services	3.65
Financial	Real Estate	2.23
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	5.88
Health Care	Health Care Equipment & Services	2.05
Consumer Staples	Food, Beverage & Tobacco	4.36
Materials	Materials	4.32
Real Estate	Equity Real Estate Investment Trusts (REITs)	3.12
Communication Services	Media & Entertainment	2.64
Utilities	Utilities	2.22
Energy	Oil & Gas Exploration & Production	2.19
Cash	Cash	1.62

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas                       In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 44%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 29%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

• ***How does the reference benchmark differ from a broad market index?***

This question is not applicable for this Fund.

• ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the reference benchmark?***

This question is not applicable for this Fund.

• ***How did this financial product perform compared with the broad market index?***

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Special Situations

**Legal Entity Identifier :** KV1VJCZ9TY7EN2E4WH87

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 76% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe Net TR Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 25% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 2.5% and the benchmark's sustainability score for the reference period was -3.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- High Salaries
- Innovation
- Medicine
- Training

The Investment Manager invested 76% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	76
Jan 2023 - Dec 2023	68
Aug 2022 - Dec 2022	69

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	2.5	-3.6
Jan 2023 - Dec 2023	1.8	-5.2
Jan 2022 - Dec 2022	2.0	-8.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue; and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Training: the estimated societal benefit associated with a more highly skilled workforce, both to the company and society. Assigned based on company spending on employee training.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.

- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.

- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation. In exceptional circumstances a derogation may have been applied in order to allow the Fund to continue to hold a company on Schroders' 'global norms' breach list, for example where the stated investment strategy of the Fund may otherwise be compromised. Any such company was not categorised as a sustainable investment.

- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schroders’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schroders’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schroders Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including biodiversity challenges in the Materials sector, and climate & Net Zero commitments for held companies within the Industrials sector. These engagements related to PAIs 7 (Negatively affecting biodiversity-sensitive areas) and 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Engagement Theme	# Issuers
Climate Change	13
Human Rights	8
Corporate Governance	8
Natural Capital and Biodiversity	4
Diversity and Inclusion	3
Human Capital Management	3

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	5.87	Netherlands
RELX PLC ORDINARY 14.4397P	Consumer Discretionary	5.67	United Kingdom
NOVO NORDISK CLASS B DKK0.1	Health Care	5.42	Denmark
EXPERIAN PLC ORDINARY USD0.10	Industrial	4.27	United States

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 96%. The Fund maintained a higher overall sustainability score than the MSCI Europe Net TR Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data.

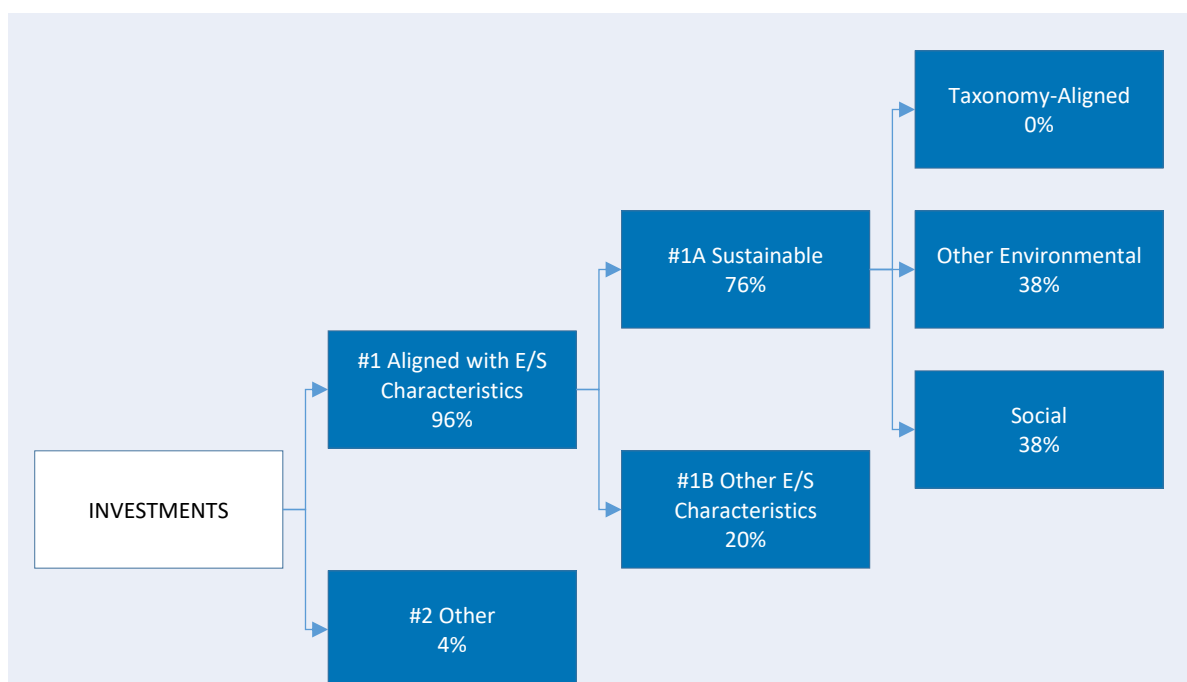

The Fund invested 76% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 38% was invested in sustainable investments with an environmental objective and 38% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**#1 Aligned with E/S Characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

## • In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Sector	Sub-Sector	% Assets
Industrial	Capital Goods	31.09
Industrial	Commercial & Professional Services	7.55
Health Care	Pharmaceuticals, Biotechnology & Life Sciences	10.37
Health Care	Health Care Equipment & Services	9.52
Information Technology	Semiconductors & Semiconductor Equipment	11.67
Information Technology	Software & Services	3.20
Information Technology	Technology Hardware & Equipment	2.95
Consumer Discretionary	Media & Entertainment	6.55
Consumer Discretionary	Consumer Durables & Apparel	2.35
Consumer Discretionary	Automobiles & Components	0.32
Materials	Materials	5.67
Materials	Industrial Gases	2.00
Cash	Cash	3.59
Financial	Banking	2.38
Consumer Staples	Household & Personal Products	0.79

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**• Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes:

In fossil gas  In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

<sup>2</sup>As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

## • *What was the share of investments made in transitional and enabling activities?*

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

## • *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

This question is not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy was 38%.

## What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 38%.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to investments and derivatives by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' Credit Risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' Credit Risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund and of individual investments when selecting the assets held by the Fund;
- A central good governance test was applied to assess good governance practices of investee companies; and
- The Investment Manager undertook engagements covering one or more of the six priority themes set out in our Engagement Blueprint (Link <https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf>). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies.

## How did this financial product perform compared to the reference benchmark?

Reference

No index was designated as a reference benchmark for the purpose of attaining the environmental or

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

social characteristics promoted by the Fund.

**• How does the reference benchmark differ from a broad market index?**

This question is not applicable for this Fund.

**• How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the reference benchmark?**

This question is not applicable for this Fund.

**• How did this financial product perform compared with the broad market index?**

This question is not applicable for this Fund.

# SFDR Periodic Report

Reference Period: 1 January 2024 - 31 December 2024

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

**Product Name :** Schroder ISF European Sustainable Equity

**Legal Entity Identifier :** 5493009GLO7HFGVW9C92

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

**Did this financial product have a sustainable investment objective?**

Yes   No

<input type="checkbox"/> It made <b>sustainable investments with an environmental objective: __%</b>	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 70% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective: __%</b>	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b>

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met.

The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index, based on the Investment Manager's rating system. This benchmark (which is a broad market index) is not a reference benchmark for the purposes of the environmental and social characteristics promoted by the Fund.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The Fund also invested at least 50% of its assets in sustainable investments during the reference period.

The reference period for this Fund is 1 January 2024 to 31 December 2024.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### • *How did the sustainability indicators perform?*

The Fund's sustainability score for the reference period was 3.6% and the benchmark's sustainability score for the reference period was -3.6%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than the benchmark's weighted average score over the same period, based on month-end data.

In each case the sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions
- Contraception
- High Salaries
- Innovation
- Medicine

The Investment Manager invested 70% of the Fund's assets in sustainable investments. This figure

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

represents the average percentage of sustainable investments during the reference period, based on quarter-end data. Sustainable investments are measured by reference to the sustainability score in Schroders' proprietary tool.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

## • ...and compared to previous periods?

### Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

Period	Fund (%)
Jan 2024 - Dec 2024	70
Jan 2023 - Dec 2023	66
Aug 2022 - Dec 2022	69

### Sustainability score

This table details the Fund's and benchmark's sustainability score, year on year.

Period	Fund (%)	Benchmark (%)
Jan 2024 - Dec 2024	3.6	-3.6
Jan 2023 - Dec 2023	3.0	-5.2
Jan 2022 - Dec 2022	3.0	-8.1

For 2022 the percentage of sustainable investments was calculated as an average over the last four months of the reference period. From 2023 the percentage is calculated as an average based on quarter-end data.

## • What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Innovation: the estimated societal benefits arising from the investment in Research and Development (R&D). Assigned based on the unitary benefit of R&D spend, or estimated based on company patent applications; and
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

involvement in the healthcare value chain and proportion of company market share to global sub-sector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

## • **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

- Firm-wide exclusions applied to Schroders funds. These related to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons and thermal coal mining. Further information and a list of excluded controversial weapons companies is available at <https://www.schroders.com/en/sustainability/active-ownership/group-exclusions/>.
- The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal.
- The Fund excluded companies that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.
- The Fund may have also applied certain other exclusions in addition to those summarised above. Further information on all of the Fund's investment exclusions is to be found under "Sustainability-Related Disclosure" on The Fund's webpage <https://www.schroders.com/en-lu/lu/individual/fund-centre>.

## **How were the indicators for adverse impacts on sustainability factors taken into account?**

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative approach. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

1. Quantitative: this included indicators where specific thresholds have been established:

- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) and

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

PAI 14 (Exposure to controversial weapons). Further, the following PAIs were assessed as part of Schroders' 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring): PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

## ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

## How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager’s approach to considering principal adverse impacts on sustainability factors differs depending on the relevant indicator. Some indicators were considered via the application of exclusions, some were considered via the investment process and some via engagement. Further details on how these have been considered during the reference period are detailed below.

PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons, such as anti-personnel mines, cluster munitions, chemical weapons and biological weapons).
- UNGC violators: PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and Schrodgers’ ‘global norms’ breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).
- Companies that derived revenues above certain thresholds from activities related to thermal coal, that were deemed by the Investment Manager to contribute significantly to climate change were excluded from the investible universe: PAIs 1, 2, 3, 4 and 5 (Greenhouse gas emissions).

During the reference period, PAIs were also considered through integration in the investment process. As part of the issuer level due diligence process, via company analysis from meetings with management teams and on desk analysis of annual reports and statements, several PAIs were considered. These were considered alongside PAIs from Schrodgers’ proprietary tool which incorporated several as a component of its scoring methodology.

PAIs were also considered post-investment through engagement where the Investment Manager engaged in line with the approach and expectations set out in Schrodgers Engagement Blueprint, which outlines our approach to active ownership. Over the period our engagements covered a range of topics, including climate reporting challenges in the Banking sector. These engagements related to PAIs 1, 2, 3 and 5 (GHG emissions, Carbon Footprint, GHG intensity of investee company and Share of non-renewable energy consumption and production).

A summary of the Fund’s engagement activity during the reference period, including the relevant engagement theme, is shown below:

Engagement Theme	# Issuers
------------------	-----------

# SFDR Periodic Report (continued)

Reference Period: 1 January 2024 - 31 December 2024

Climate Change	27
Corporate Governance	21
Human Rights	12
Diversity and Inclusion	6
Human Capital Management	4
Natural Capital and Biodiversity	4

The engagements shown relate to engagements with companies and issuers.

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

## What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **1 Jan 2024 to 31 Dec 2024**

Largest Investments	Sector	% Assets	Country
NOVO NORDISK CLASS B DKK0.1	Health Care	4.77	Denmark
ASML HOLDING NV EUR0.09 (POST SPLIT)	Information Technology	4.65	Netherlands
SAP SE NPV	Information Technology	4.14	Germany
SIEMENS AG NPV (REGISTERED)	Industrial	3.63	Germany
INTESA SANPAOLO SPA EUR0.52	Financial	3.05	Italy
SWISS RE AG CHF0.10	Financial	2.84	United States
STANDARD CHARTERED PLC ORDINARY USD0.50	Financial	2.71	United Kingdom
NESTLE SA CHF0.10 (REGISTERED)	Consumer Staples	2.60	United States
SSE PLC ORDINARY 50P	Utilities	2.59	United Kingdom
ESSILORLUXOTTICA SA EUR0.18	Health Care	2.49	France
SKANDINAVISKA ENSKILDA BANKEN AB SERIES 'A' NPV	Financial	2.44	Sweden
PUBLICIS GROUPE SA EUR0.40	Consumer Discretionary	2.38	France
HALEON PLC GBP0.01	Consumer Staples	2.35	United States
KONINKLIJKE KPN NV EUR0.04	Communication Services	2.28	Netherlands
RELX PLC ORDINARY 14.4397P	Consumer Discretionary	2.15	United Kingdom

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

Reference Period: 1 January 2024 - 31 December 2024

## What was the proportion of sustainability-related investments?

**Asset allocation**  
describes the share  
of investments in  
specific assets.

### • *What was the asset allocation?*

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98%. The Fund maintained a higher overall sustainability score than the MSCI Europe (Net TR) Index and so the Fund's investments that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). The percentage in #1 Aligned with E/S characteristics represents the average during the reference period, based on quarter-end data.

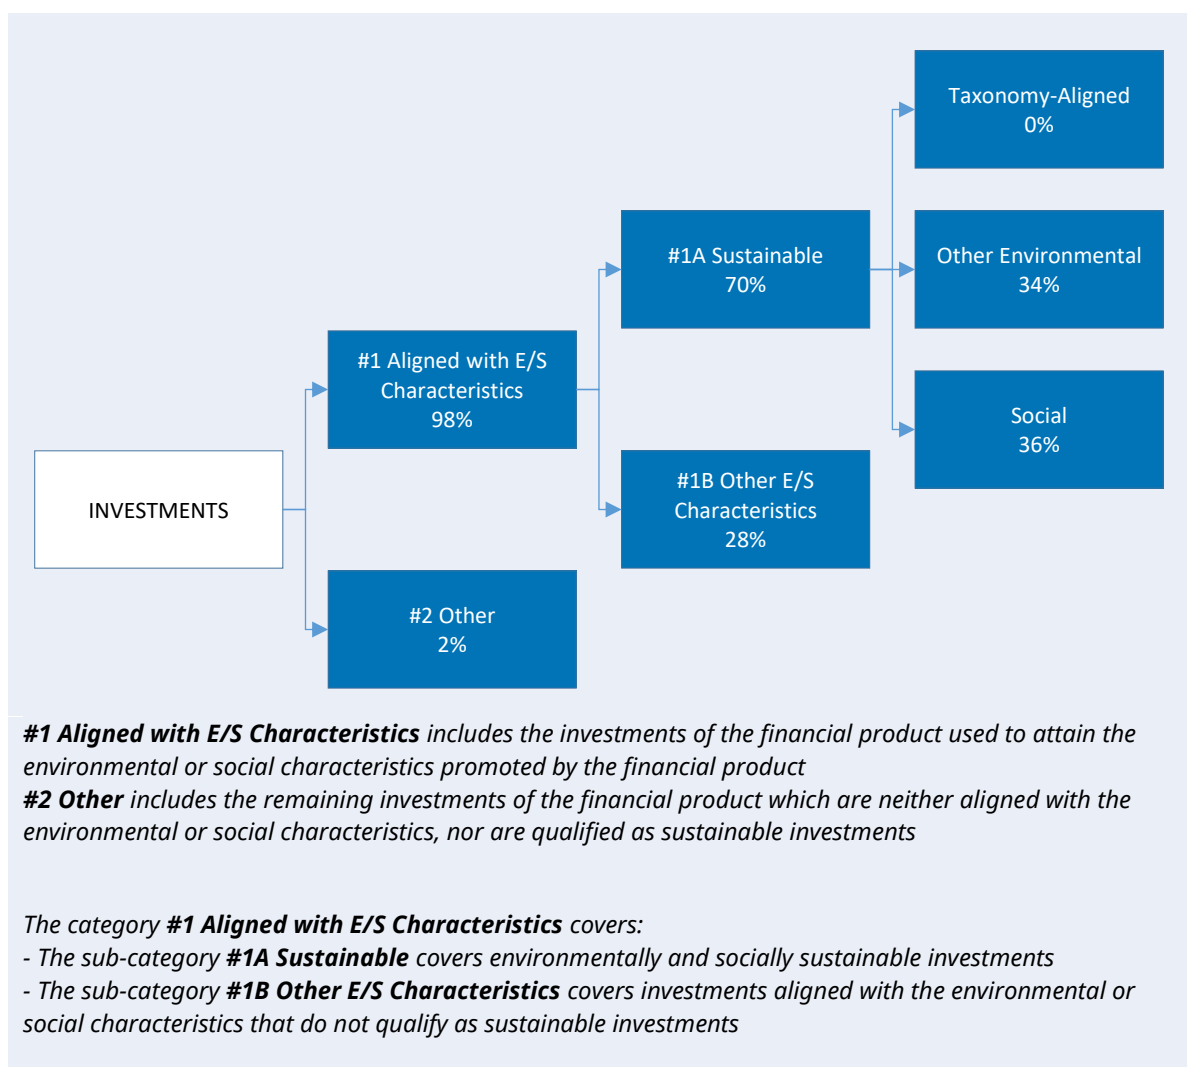

The Fund invested 70% of its assets in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. Within this, 34% was invested in sustainable investments with an environmental objective and 36% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. A sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes cash, which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Materials	Materials	7.09
Utilities	Utilities	4.63
Communication Services	Telecommunication Services	2.28
Cash	Cash	2.22
Energy	Oil & Gas Refining & Marketing	0.48

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets and sector classifications aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets and sector classifications aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of assets and sector classifications aligned to economic sectors, due to the differing calculation methodologies and data availability of these alternative data sources.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the EU Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.
