

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Credit High Income

a sub-fund of Schroder International Selection Fund SICAV

Class A Distribution EUR Hedged (LU0592039753)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The Fund aims to provide capital growth and income by investing in fixed and floating rate securities issued by governments and companies worldwide. The Fund aims to mitigate losses in falling markets. The mitigation of losses cannot be guaranteed.

Investment policy

The Fund invests at least two-thirds of its assets in fixed and floating rate investment grade and high yield securities issued by governments, government agencies, supranationals and companies worldwide, including emerging market countries. As the Fund is index-unconstrained it is managed without reference to an index.

The Fund may invest:

- in excess of 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds);
- up to 20% of its assets in asset-backed securities and mortgage-backed securities;
- up to 10% of its assets in convertible bonds (including contingent convertible bonds);
- up to 10% of its assets in open-ended Investment Funds; and
- in money market investments and hold cash.

The investment manager aims to mitigate losses by diversifying the fund's asset allocation away from areas of the market identified as having a high risk of material negative return.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

Benchmark

The fund's performance should be assessed against its target benchmark being to exceed 1/3 Barclays Capital Global High Yield Ex Cmbds&Emg 2% CAP USD Hedged index TL, 1/3 JPM CEMBI Broad index TL, 1/3 JPM GBI-

EM Global Diversified Composite index. The majority of the fund's investments may be components of the benchmark. The investment manager invests on a discretionary basis and is not limited to investing in accordance with the composition of the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class pays a quarterly distribution at a fixed rate of 5% per annum of the value per share. The distribution policy is kept under review.

Risk and reward profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

ABS and MBS risk: The fund may invest in mortgage or asset-backed securities. The underlying borrowers of these securities may not be able to pay back the full amount that they owe, which may result in losses to the fund.

Contingent convertible bonds: The fund may invest in contingent convertible bonds. If the financial strength of the issuer of a contingent convertible bond falls in a prescribed way, the value of the bond may fall significantly and, in the worst case, may result in losses to the fund.

Capital risk / Distribution policy: As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Currency risk/hedged share class: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Event risk: The fund will take significant positions on companies involved in mergers, acquisitions, reorganisations and other corporate events. These may not turn out as expected and may result in losses to the fund.

High yield bond risk: High yield bonds (normally lower rated or unrated) generally carry greater market, credit and liquidity risk.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

IBOR: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Derivatives risk – Efficient Portfolio Management and Investment Purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Charges

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing charges	1.55%
Charges taken from the fund under certain specific conditions	
Performance fee	
None	

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2019 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Performance achieved between 2011 and 2019 was achieved in circumstances that no longer apply. The fund's objectives and investment policy were changed on 26 February 2020.

■ A Distribution QF EUR Hedged (LU0592039753)

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in euro after the ongoing charges and the portfolio transaction costs have been paid. Entry charges are excluded from calculations of past performance. The Benchmark performance is shown in the base currency of the fund.

The fund was launched on 25 January 2011.

The shareclass was launched on 02 March 2011.

Practical information

Depository: J. P. Morgan Bank Luxembourg S.A.

Further information: You can get further information about this fund, including the prospectus, latest annual report, any subsequent half-yearly report and the latest price of shares from the fund's management company at 5, rue Höhenhof, L-1736 Senningerberg, Luxembourg, and from www.schroders.lu/kiids.
